scarcely fail to materially enlarge our knowledge of the currents of the arctic seas, a knowledge for the lack of which much effort has been wasted. Captain Altman had approached this King Carl's Land in 1871, and reported that it was entirely free from ice. He believed that there were three large and five small islands, lying about $79^{\circ} 8' \text{ N. lat.}$, and $32^{\circ} 17' \text{ E. long.}$ from Greenwich. Captain Jansen reports that there is but one large island, which is much indented with bays and caves, and some small islands. The exploration of these seas and those farther east—to the north of Novaya Zemlya—has been actively maintained by these Norwegian sailors during the last two years. Dr. Petermann has critically examined the logs of eight Norwegian whaling-captains, and two or three German sailors, all of whom have within a year and a half sailed over the arctic seas north of Novaya Zemlya, some of them going as far north as $77^{\circ} 30'$, and all report the sea as free from ice at least to that high latitude as late as October 15th, and with unmistakable traces of the Gulf Stream, in a higher temperature of the sea, and West India fruits tossed ashore on the islands. Thousands of white whales sported in the sea to the eastward, and, so far as any appearance of ice went, there seemed little to prevent a vessel from sailing through to Behring's Straits in one summer. The Austro-Hungarian expedition, under Weyprecht and Payer, is now in those seas, and there seems quite as much reason to expect a good result from their explorations as from those of any of the exploring expeditions. Dr. Petermann has seen his theory confirmed that there was at least an equal chance for reaching high latitudes unobstructed by ice, to the north of Novaya Zemlya, with the route on which English and American explorers have insisted—by way of Smith's Sound. The English geographers, however, refuse to be convinced, and another expedition, to be fitted out under the direction of Mr. Sherrard Osborne, is to start in the spring or early summer of 1878 for Smith's Sound.

In the *ANNUAL CYCLOPÆDIA* for 1871, reference was made to the voyage of the Hassler, a new coast-survey steamer, around Cape Horn, and to the scientific expedition of Prof. Agassiz and a corps of physicists, in her, having primarily in view the ichthyology of the South Atlantic and Pacific Oceans, with reference to their bearing on fossil ichthyology. But, though the fish were the first object, no department of physical science was neglected in this voyage. Geology, botany, zoology in general, physical geography, ethnology, and astronomy, were all embraced in its observations. In the Straits of Magalhaens and on the Patagonian coast on both sides, the glacier systems of that region were fully explored, and much valuable knowledge acquired in regard to the formation, movement, and disintegration of the monster glaciers of the

Southern Hemisphere. Their vast extent in some portions of the Straits of Magalhaens was a surprise even to Agassiz, whose thorough mastery of the whole science of glaciers is unequalled. Two points of great interest in reference to glacial action were settled, viz.: that the great glaciers of the southern portion of South America did not come from the Andes, but had forced their way northward from the south—from Terra del Fuego, and from the sloping sides of the water-passages or natural canals which stretch northward on the western side of Patagonian Chili, and extended formerly up the low-lying valley between the coast-range and the Andes, between Talcahuano and Santiago, coming in all cases from the south; and, secondly, that in some instances these glaciers have formed and have carried the drift over a stratum of volcanic lava—showing that this glacial action is much more recent than had usually been supposed. The Hassler was detained at Talcahuano, Callao, and Panama, for repairs, and the scientific party made good use of their time in exploring the vicinity of those places. They arrived in San Francisco late in August, and were accorded a most hearty reception there. The work of the expedition may be summed up in a very careful and constant observation of the temperatures of the sea, from Boston, through the Straits of Magalhaens, to Panama, by Count Pourtales; observations on glaciers, already referred to, by Prof. Agassiz; astronomical and meteorological observations by other members of the scientific corps; botanical and ethnological observations and collections in great profusion, and the largest collection of zoological specimens, in every department, ever made in this country; so large, indeed, that Prof. Agassiz is in despair for room to bestow them. The Coast Survey has been, in other directions, contributing largely to the advancement of geographical science, having made progress, during the year 1872, in its survey of almost every portion of our coast, and thus rendered inestimable advantages to our commerce; and in its commencement of a geodetic survey of prominent stations in the interior, to connect, as by a net-work, its accurately-ascertained positions on the coast with the entire interior of the country, and thus furnish data for the geodetic and geological surveys of the several States. The results already attained in these surveys show their very great importance. In ascertaining the exact meridian of Columbus, Ohio, it was discovered that in the previously-accepted longitude of that city there was an error of three miles, and, consequently, that all previously-drawn maps of the State or United States, based on the old longitude, were wrong to that extent, at least. There is some reason to believe that this error is much increased in some of the States farther west, though the longitude of St. Louis had previously been correctly determined.

II. NORTH AMERICA.—There are few items

of interest in *British North America*. The survey of the Pacific Railroad, through Western Canada, Manitoba, and British Columbia, has been completed, and, by the aid of British capitalists and grants of bonds by the Dominion of Canada, a sufficient sum raised to justify the commencement of the enterprise. The charter admits of their running to the United States boundary, and connecting, if they find it necessary, with other roads in the United States.

Rev. W. W. Kirkby, long a missionary of the English Church at the factories and forts of the Hudson's Bay Company, and a geographer of known reputation, gave in the *Church Missionary Intelligencer* of January, 1872, a description of the climate, temperature, and productions of the west coast of Hudson's Bay, especially in the vicinity of Fort Churchill, where he had been spending four or five months. He had been, some years before, stationed at Fort Simpson, on the Mackenzie River, and he compares the climate of the two stations, and thus demonstrates that the isothermal lines, as the traveller approaches the west coast of North America, tend rapidly northwest, and that the climate of 63° to 65° N. lat., on the Mackenzie River, is really milder than that of 57° or 58° on the western shore of Hudson's Bay, and also milder than that of 52° to 55° on the eastern coast. Fort Churchill is in N. lat. about 58°, five or six miles from the bay, and on a low and marshy strip of land lying between Hayes and North Rivers. Fort Simpson is situated on the Mackenzie, in lat. about 63°, on land somewhat higher and drier. From his tables we give the following comparative record of the average temperature of the seasons and of the year at these two stations:

	Winter.	Spring.	Summer.	Autumn.	Yearly average
Ft. Churchill, Lat. 58°	- 11°	+ 26.55	60.00	27.24	25.61
Ft. Simpson, Lat. 63°	- 15°	+ 19.00	52.00	21.72	17.90

Mr. Kirkby states that at Fort Churchill, on the 9th of June, the ice was still running in the rivers, and that the climate is so cold and changeable that the 5th of June was the first day of the season which was wholly bright and clear, without excessive cold in some part of the day. Even during the summer months, in the warmest and sunniest days, if the wind begins to blow from the bay, there is an immediate change to intense cold. At Fort Simpson, on the contrary, though in so much higher latitude, the climate is much milder, and the winds which blow from the upper valley of the Mackenzie River are balmy and grateful.

In the UNITED STATES the year has been marked by extraordinary geographical activity and progress. The completion, just at the close of the year, of Messrs. Asher & Adams's "Topographical, Commercial, and Statistical Atlas and Gazetteer of the United States" is an event worthy of notice. Nearly six years of intense labor by a large corps of experienced

map-engravers and topographers had been bestowed upon it; the Government, Coast, and Signal Service surveys and maps, the State surveys, the maps and plans of all the railways, the collections of the topographer of the Post-Office Department, and numberless maps, plans, and surveys from private sources, were brought into requisition for it. The principal features of novelty and excellence in this great atlas of sixty maps are: That all the maps of the United States are drawn to one scale—20 miles to the inch—and thus show, as no large atlas of this country ever has done, the relative size and territory of each State; that the location of all towns and cities has been adjusted to the recent discovery of the previous errors in longitude in Ohio and other States, made by the Superintendent of the Coast Survey, in his recent geodetic reconnaissance of the interior States, of which we have already spoken; that all railway routes, either partially or wholly completed, are laid down, and all stations on them, thus obviating the necessity of inserting all the old post-routes, now discontinued; that while all important places, and all stations on the railways, are inserted, the names of unimportant places are left off the maps, but inserted, with their location, distance, and direction from the nearest railway station, in the accompanying gazetteer, so that their exact locality can be immediately ascertained; that the coast-lines are laid down in exact conformity to the latest maps and charts of the Coast Survey, and maps of the Dominion of Canada and its provinces, of Alaska, of Europe, of the World on Mercator's projection, an excellent map of the physical geography of the United States, and also one of the United States as a whole, are added to the collection of State maps; that the gazetteer is a complete geographical index, giving alphabetically, by States, the name, location, and direction from the nearest railway-station, of every city, town, village, and post-office, in the United States and Canada; while separate tables give the population of Canada by counties; census statistics of population, agricultural productions, manufactures, valuations, taxes, and debts, not national, and of education, of each State and Territory; full statistics of all the governments and countries of the globe, and the population, in the order of countries, of all the most important towns in the world. Of course, no atlas or gazetteer can ever be absolutely perfect, but this is a much nearer approximation to perfection than any thing hitherto published in this country. There has been also a decided improvement in the quality and accuracy of the better grade of mounted maps of the United States and in the atlases for the use of schools. Some of the mounted maps, in careful drawing, in fulness of detail, and their frequent revision, and in the statistical pamphlets which accompany them, furnish a very tolerable substitute for the more expensive

atlases and gazetteers. Beginning, now, with the States on the Atlantic coast, we notice that that great engineering work, the Hoosac Tunnel, in Western Massachusetts—a work second in extent only to the Mont Cenis Tunnel—is rapidly approaching completion. It is expected that not only the tunnel but the approaches to it connecting it with the railways of which it is to form a part, will be finished and in running order by March 1, 1874. The entire expenditure by the State, it is estimated, will not exceed \$12,792,234. The great enterprise of tunnelling under the rocks at Hellgate, on the East River, between New York and Long Island City, is still prosecuted actively, and will probably be completed during 1873. When these mines or headings are blown up, they will render the channel of the East River passage perfectly safe for vessels of the largest draught, and the European steamers will probably prefer the sheltered route *via* Long Island Sound to the rougher and more dangerous one *via* Sandy Hook and the Lower Bay.

Proceeding southward, we notice, as an event of great importance, the completion of the Chesapeake and Ohio Railway, just at the close of the year; not merely as affording another and shorter trunk-route to the Ohio and Mississippi Valleys, and so to the Pacific slope, but because it traverses a region almost wholly unknown hitherto, and one which is richer in valuable minerals than perhaps any other in the world. Every variety of iron-ore known to commerce is found along its roadway, and most of them in great abundance: in its western division, along the deep valley of the Kanawha, and in the cañon of New River, coal is found in strata of from 26 to 30 feet thick, and of the best qualities, lying nearly horizontal, and so far above the track of the railway that it can be shot into the cars direct from the mines. This coal is partly cannel, of the well-known Breckenridge and other varieties, equal to the Liverpool cannel; a splint-coal, pronounced by founders and iron-masters nearly equal to charcoal for iron-making, and other qualities, similar in character to the Western Pennsylvania coals; limestone, hydraulic cement, petroleum, salt of the very best quality, excellent slate, kaolin, marl, copper, and other metals, numerous medicinal springs of high reputation, and vast forests of the finest timber in the United States. The cannel-coals are already shipped to England, the great increase in the price of coal there rendering their exportation profitable. This new railway must prove of great advantage to Richmond and Norfolk, and will be connected with a line of steamers from these ports to Europe. It will also build up a fine city at Huntington, its terminus on the Ohio River.

The old project of a ship-canal across the Peninsula of Florida has been again revived. The route now proposed is, up the St. John's River 127 miles, thence up the Ocklawaha

River for 60 miles, then a ship-canal through the swamps for 40 miles to the Amazara (Withlacoochee?) River, 85 miles from the point where it empties into the Gulf of Mexico near Cedar Keys. This makes the whole route 262 miles in length, but saves 650 miles' (some of it dangerous) voyaging around the capes and keys of the peninsula. As there are no deep cuts required, a more feasible route would seem to be from Port Orange, Mosquito Inlet, by way of the almost continuous water-communication, through Indian River, St. John's, and the chain of lakes, to the Withlacoochee River, landing at the same point with the other, the distance across being not more than 175 miles, with not more than 25 miles of canal to be excavated. A party of four naturalists and sportsmen, including Mr. Van Olinda, Captain Mayne Reid, and a Mr. Gordon, explored the Lower St. John's River, in a large sail-boat, in 1871, in the interests of natural science, and report that the number of species of wading and web-footed birds, and indeed of birds generally, is greater than in any region of equal size in North America. They found great quantities of game, and several new and interesting varieties of fish and reptiles, and made valuable observations in regard to the climate, aspect of the country, productions, etc.

In the Ohio and Mississippi Valleys, considerable attention has been aroused the past year by the publication of the geological surveys which have been for some years in progress in Ohio and Indiana, and the geological reconnoissances in Illinois and Iowa. The Ohio report gives great prominence to the coal formations and the iron-ores in the State, though other ores, minerals, and earths, are not overlooked. It seems that in the northeastern and extreme eastern counties of the State, there is a coal, known as the Mahoning Valley Coal, the lowest in place of all the coal-seams of the State, which is an excellent furnace or smelting coal, very free from sulphur and phosphorus, and containing from 58 to 62 per cent. of fixed carbon. It is the analogue of the block-coal of Indiana, from which, however, it is separated by an axis of elevation, or great geological island, which forms the boundary between the Appalachian basin and the Illinois basin, which latter extends through the southwestern quarter of Indiana. Besides this Mahoning Valley Coal, which now supplies nearly or quite half the iron-furnaces of Ohio, Prof. Newberry describes six or seven other seams overlying this first, some of them cannel and others bituminous, but, though well adapted for fuel, and especially for steam-engines, having, with one or two exceptions, too much sulphur for furnace or gas-producing purposes. There is, however, in some localities, a splint-coal of fair quality, which may answer for the furnaces, though it has as yet been found only in moderate quantity; and one or two of the cannel-coals, in some localities, have been used successfully for producing

gas. Ohio is rich in iron-ores, though lacking some of the kinds necessary for the production of the best qualities of iron and steel. But these are brought in large quantities from Lake Superior, New Jersey, and Missouri. In the southwestern quarter of Indiana, there is an extensive deposit of this block-coal, of great purity, and free from sulphur and phosphorus. Indiana is not rich in the best iron-ores, but brings her iron-ore from Missouri and Lake Superior (except the brown hematites, of which there is a partial supply in the State), and smelts it, by the aid of this coal, at a cost not exceeding 35 to 36 dollars per ton. This discovery of the block-coal has greatly increased the manufacture of iron in the State. In other mineral products Indiana is not behind her sister States. Mineral paints, ochres, the finer kinds of clay, and various kinds of building-stone, are plentiful.

But the great geographical interest of the year has centred in the Territories lying in the vicinity of the Rocky Mountains, and especially in Montana and Idaho, Utah and Wyoming, Arizona and New Mexico. Our space is not sufficient to give in much detail the results of the exploring expeditions which traversed these regions so little known. The explorations of 1871 (described in the *ANNUAL CYCLOPEDIA* for 1871) in the region about the head-waters of the Yellowstone, Jefferson, Madison, and Gallatin Rivers, following as they did upon the daring and perilous adventures of Governor Langford and his companions of the previous year, roused a deep interest in the region, and Congress set apart a tract about 52 by 62 miles square, containing 3,578 square miles, as a national park or reservation for the benefit and instruction of mankind, to be known as the "Yellowstone National Park." This park contains the Yellowstone and several smaller lakes, the Geysers, the mineral springs, and baths of the Yellowstone and Fire-hole basins, and the remarkable falls, slides, and cañons of that wonderful region. To complete the exploration of this interesting section, a second Government expedition, under the direction of the veteran geologist, Prof. F. V. Hayden, was sent out in the summer of 1872. By this expedition a route was surveyed from Ogden, Utah, to Fort Hall, Idaho; the great Teton Mountains, laid down on the maps as in Idaho, but found to be thirty miles out of place and in the bounds of Wyoming, were explored; and the valleys of the Yellowstone were carefully examined. Some of the peaks of the Tetons were climbed by Mr. Stevenson and Governor Langford, though with great difficulty. One, which they named Mount Hayden, was found to be 13,400 feet high. Near the summit of the Grand Teton, mines of great age were found, at an elevation of 13,162 feet above the sea. The examination of the four remarkable passes at the head of Henry's Fork was another important result of this expedition. This region seems to form the apex of

the continent. From it flow the waters of the Missouri, Columbia, and Colorado. The passes are as follows: Targee or East Pass, 6,500 feet elevation, forming one of the great gate-ways to the Madison Valley and the sources of the Yellowstone; Henry's or South Pass, about 6,000 feet, opening into Snake River Valley, one of the largest affluents of the Columbia; Red Rock or West Pass, 6,800 feet, connecting the great valley of the Jefferson Branch; and Madison or South Pass, opening into the lower Madison. All are so smooth and low that a carriage may be drawn over them at full speed, and there are no obstructions to a railroad over either of them. A new geyser basin was found, and the latitude and longitude of several points were accurately fixed. Explorations have also been made in the region of the Upper Yellowstone, and among the mountains of the Uintah range. The last-named region was found eminently adapted for grazing. It had no important mineral deposits, and was remarkable for the absence of birds and insects.

The Forty-second Congress, at its last session, appropriated \$75,000 to continue and reorganize this survey of the Territories under the direction of the Department of the Interior, and it has been reorganized under the title of the "United States Geological and Geographical Survey of the Territories, under the Department of the Interior." Dr. F. V. Hayden is chief geologist and chief of the survey, and Mr. James T. Gardner is chief geographer. The work done under the direction of Dr. Hayden, though well done, has been in detached districts, and without connection, or a general system. Henceforth it will be conducted systematically. The field of operations, in 1873, will be Colorado Territory. The whole region will be carefully mapped, its geological and mineralogical character ascertained, the coal-beds and minerals traced, and the agricultural capacities of each Territory and its meteorology thoroughly investigated.

The War Department sent out, in 1871 and 1872, two exploring expeditions, that of Clarence King on the 40th parallel, of which we shall say more presently, and that of First-Lieutenant George M. Wheeler, which had for its object a thorough investigation of the region west of the hundredth meridian, for the purpose of determining its geographical positions, working out carefully its topography, and studying successfully its geology, natural history, and climatology. In his preliminary report, submitted in the winter of 1872, Lieutenant Wheeler stated that he had divided the whole region into eighty-five rectangles of equal size, marked their corners with great precision, and then, taking each one in detail, he proposed to determine its astronomical, physical, and geographical features. He had completed, in 1871, eight of these rectangles. During 1872 he carried forward his work almost simultaneously in Utah, Arizona, and

Nevada, exploring the southern and southwestern portions of the Salt-Lake Basin, and the mining regions of Eastern Nevada, establishing astronomical points, by means of which he could determine with greater accuracy the localities of the mineral veins. Among the astronomical stations determined was Mount Nebo, in Southern Utah, which was ascended by two of the party, its latitude and longitude, and altitude (the last being 12,500 feet) ascertained, and the descent made safely, though with considerable difficulty. The Wahsatch Mountains constituted the eastern limit of his operations during the year. Lieutenant Wheeler had a large and carefully-selected staff of eighteen or twenty persons, three of them officers of the United States Engineer Corps.

Clarence King's expedition along the 40th parallel continued at its work later in the season than the others, and has not as yet made any report. At present we only know that the exposure of the gigantic Arizona diamond-fields fraud was made by his party, and that his geographical and geological knowledge were both brought into action in tracing it up.

Still another of these exploring expeditions is that of Prof. Powell in the valley and cañons of the Colorado River and its tributaries, now in progress. This is under the direction and mainly at the expense of the Smithsonian Institution. Prof. Powell had, it will be remembered, led two previous expeditions to this region. His preliminary report, made January 13, 1873, states that they had explored a tract 300 miles in length, and about 175 miles in breadth, and about 700 miles of the course of the river from the point where the Union Pacific Railroad crosses Green River to the mouth of the Little Colorado. They have surveyed all the affluents of the Colorado between these points, ascertained the geological structure of the longitudinal and transverse valleys, and visited the "Seven Ancient Cities of the Province of Tusayan." They had made barometrical observations of the height of all prominent points, and had taken several thousand stereoscopic views of the wonderful scenery. They had, also, made many discoveries of the mineral wealth of the region in silver, copper, gold, and coal, as well as interesting contributions to human knowledge in paleontology, botany, archaeology, and linguistics. There have been numerous private exploring parties in this interesting region of the Rocky Mountains, but their discoveries, if any, are not yet made public. We should have noticed, in speaking of the explorations in the Uintah Mountains, Prof. Hayden's record of the height of the principal peaks of that range: Gilbert's Peak he makes 13,182 feet; Cox's Peak, 13,250 feet; Dawes's Peak, 13,300 feet; Logan's Peak, 13,250 feet, and an unnamed peak on the west side of the Uintah range, estimated at 13,500 feet. Turning now to the Pacific slope, we find that, in 1871 and 1872, Washing-

ton Territory was very thoroughly explored and surveyed, the Coast Survey having made a survey of the coast, and government officers of the interior. The results of this exploration have not yet been published, but we find, in the Proceedings of the California Academy of Sciences, the latitude and longitude of Mount Rainier stated as $46^{\circ} 51' 9''$ north latitude, and $121^{\circ} 45' 28''$ west longitude from Greenwich. The height of the mountain is definitely settled as 14,444 feet. The same authority gives the height of Mount Baker, about which there has been much controversy, as 10,760 feet. The decision of the final arbiter, the Emperor Wilhelm, on the long-pending question of the true channel of the San Juan de Fuca Strait, confirms what we have always claimed, that the Haro Channel, southeast of Vancouver's Island, is the rightful boundary, and gives us possession of the islands of that archipelago lying northwest of Rosario Straits. We should not forget that *Alaska* is a part of Washington Territory. Mr. William H. Dall, who has been exploring there, returned in the autumn of 1872, after a little more than a year's residence on Unalaska Island, where he had made many archaeological discoveries of great interest. Traces were discovered of a race prior to the present inhabitants. This race had attained to a considerably higher civilization than the Aleuts, and, though their implements were of stone and bone, they had made garments, and carvings in wood and bone, of great ingenuity and merit. They had a rude plan of embalming their dead, and placed their bodies in caves in the positions of active life; men were covered entirely with carved wooden armor, and placed in canoes as if hunting or holding a paddle; women as if sewing, dressing skins, or nursing their infants, and old men as if beating their drums.

Proceeding southward, or rather southeastward, we find, in the *Chicago Railroad Gazette*, a series of letters from Mr. Stephen Powers, a civil engineer, describing the Rio Grande Valley, which he had been exploring in the interests of the Texas Pacific Railroad. "For a distance of sixty miles above Fort Quitman," he says, "the bottoms on both sides of the Rio Grande will not average above a quarter of a mile in width; from San Eleazar to El Paso, where the Mexican settlements are scattered along, they are twice or three times as wide. From these mere ribbons of bottom-lands there slopes easily up to the Sierras, eight or ten miles back, a gravelly mesa, covered with *chaparral*, and totally worthless, except for its mesquite-beans." Yet he found this narrow valley on both sides densely populated, with a quaint, quiet, unenterprising Mexican population, the one street of El Paso being seven miles long, and abounding in beautiful gardens. "The explanation of this populousness," he says, "must be sought in the extraordinary fertility of the river-

flats, and the facility with which they can be irrigated. The Rio Grande is scarcely less infallible than the Nile in its annual swelling and recession, and is at its highest when most needed. Rising so near the level of its low banks, the water is easily carried over the fields in earthen aqueducts (not ditches), from which, wherever tapped, the water flows down between the long rows of maize. Rich as they now are, these flats will never need manuring, for the water is laden with a rich argillaceous silt. I never saw water so thick and soup-like; it is said to be the heaviest water on the continent, not excepting that of the Mississippi."

A discovery of great importance was made by the observers of the Signal-Service Office, in November, 1872. From time immemorial the great November atmospheric wave, which breaks upon the coast of England, and is the precursor of the severe storms and gales of the European winter, has excited the attention of scientific men and of experienced seamen.

Sir John Herschel and others supposed that it was confined to England and Western Europe, which it reached from the South Atlantic, and over which it rolled in continued undulations from the last of October to January. But, on the 12th of November, a similar atmospheric wave began to break over the shores of the northwest coast, as shown by the weather-telegrams. By the evening of the 13th it had spread over most of the Pacific States and Territories, Utah, and Nevada, and at midnight was rushing through the passes of the Rocky Mountains. On Thursday, the 14th, it descended upon the plains. On Friday morning it extended in unbroken magnitude from Oregon and Washington Territory, eastward through the great trough or depression of the Rocky Mountain backbone in Idaho and Montana, and stretched thence to the Lower Missouri and Lower Mississippi Valleys and over the western shores of the Mexican Gulf. This discovery will enable meteorologists to anticipate, by many days, the approach of winter, as it advances from the Pacific coast eastward in the great current of westerly winds. It serves to clear up the old mystery of American winter storms, showing that they originate in the Rocky Mountains, upon whose cold and loftiest summits in Nevada, Utah, Colorado, and Southern Wyoming, the vapor-laden air of this wave, coming from over the warm Pacific, is now seen to be condensed in the overwhelming snows of the forty-first parallel. As this vast aerial wave is probably, like the English wave, continued in successive undulations for two or three months, it may assist in explaining the comparatively high temperature and light precipitation in winter along Puget's Sound and eastward.

We turn next to *Mexico*, from which, however, we have but small record of either progress or discovery. The altitude of Popocatepetl, which, like most of the summits of the Mexican Cordilleras, has been variously

stated, has been ascertained, by a careful measurement by officers of the School of Engineers in Mexico, to be 17,885 feet. This is 13 feet more than Humboldt's calculation, and nearly 20 feet less than Oltmann's, while Dollfus, Sonntag, and Glennie, made it from 100 to 160 feet higher.

In the bulletin of the *Société de Géographie* for September, 1872, there is a very elaborate paper by M. A. de Morineau, on the civilization of Mexico at the commencement of the sixteenth century, in which, from authentic documents as well as from the ruins of their temples, cities, and dwellings, the writer demonstrates that the civilization of the Aztecs, at that period, was nearly equal to that of the Chinese of the present day. A party of naturalists visited and ascended, in 1871, the Cofre de Perote, a remarkable mountain on the route between Vera Cruz and the city of Mexico. Though not so high as some of the other peaks of Mexico, it is peculiar in not having a conical summit; the top being in the form of a colossal sarcophagus or chest, whence the name, "The Coffin of Perote." The Mexicans have a legend that Moctezuma, their great emperor and martyr, under the guidance of the Spirit of the Air, deposited his treasures in this gigantic coffer, and that they will remain there till he comes again, in renewed youth, to resume his sway over Mexico. The height of the mountain, according to the measurement of Señor Lerdo de Tejada, the present learned President of the Mexican Republic, is 13,416 feet. These naturalists made it 14,050 feet, but their calculations, made from a barometer at the commencement of a violent storm, were not trustworthy.

The geographical interest in the *Central American States* centres still in the possibility and practicability of an interoceanic canal. Captain Selfridge's report, while it demonstrated the possibility of such a canal by way of the Atrato and Napipi Rivers, placed the cost of its construction so high (not less than \$125,000,000), though his exploration is continued on the Pacific side, that it seemed best to ascertain whether Honduras, Tehuantepec, or Nicaragua, did not offer equal facilities at a much lower cost. Accordingly, Captain Hatfield was sent out with an exploring-party, by the Secretary of the Navy, with orders to examine three routes above the Isthmus of Panama. Meantime, on the petition of some members of the New York Chamber of Commerce, the President appointed, March 13, 1872, Brevet Major-General A. A. Humphreys, U. S. A.; Prof. Benjamin Peirce, U. S. Coast Survey; and Captain Daniel Ammen, U. S. N., commissioners, "to examine and consider all surveys, plans, proposals, or suggestions of routes of communication, by canal or water communication, between the Atlantic and Pacific Oceans, across, over, or near the isthmus connecting North and South America, which have already been submitted, or which may hereafter be

submitted to them, be submitted to the President, during the pendency of their appointment, or which may be referred to them by the President, and to report, in writing, their conclusions, and the result of such examination to the President, with their opinions as to the probable cost and practicability of such route or plan, and such other matters, in connection therewith, as they may think proper and pertinent." These commissioners have not yet reported.

In the *West Indies* the war between the Spanish Government and the insurgents has gone on languidly; emancipation has been decreed in March, 1873, in Porto Rico; Santa Cruz (St. Croix) is becoming a desert in consequence of the cutting off of the forests, the process of desiccation and drought having reached seven miles from the shores, and creeping upward rapidly every year. The proposed treaty of cession, by which Santo Domingo was to become a territory of the United States by purchase, having failed in the United States Senate, notwithstanding the urgency of the President and the favorable report of the commissioners, a private company has been formed, which has purchased the Bay of Samana and the lands adjacent, with a view to their settlement and the eventual control of the entire territory of Santo Domingo. Two or three works have been published, giving very full accounts of the island, its soil, climate, productions, inhabitants, and history; of these, by far the most complete is Mr. Samuel Hazard's "Santo Domingo, Past and Present, with a Glance at Hayti," a very exhaustive work on the whole subject, and most admirably illustrated, with excellent maps. The mineral and vegetable kingdoms are both exceedingly rich in their productions, the climate is not objectionable, and the terms of purchase not exorbitant; but the present population is about as worthless as it well can be, and yet shows no symptoms of dying out.

III. SOUTH AMERICA.—In the bulletin of the *Société de Géographie* for October, 1872, there is a very full geographical description of New Andalusia, one of the states or provinces of Venezuela, by M. P. Saillard. The country is fertile, well watered, and produces large crops of coffee, cacao, sugar-cane, cocoa-nuts, bananas, etc., for which there is a ready market. It has extensive salt-works, yielding salt of the very best quality, coal-mines, and mines of silver and antimony; the rivers and sea-coast swarm with excellent fish, which form a considerable portion of the diet of the people. They have large flocks of sheep and goats, and some horses and cattle. But, with all these advantages, they have extensive marshes, producing malignant fevers; small-pox and yellow fever rage fearfully every year; and frequent hurricanes destroy their crops and dwellings. The country is in a state of anarchy, and there is no prospect of improvement.

In Guiana, Mr. C. B. Brown, whose descrip-

tion of the Great Kaieteur Water-fall was given in the *ANNUAL CYCLOPEDIA* for 1870, traversed, between September, 1871, and March, 1872, the greater part of British Guiana, ascending and descending the Corentyn, Essequibo, Berbice, and Demerara Rivers. The result of these explorations will be to banish from the maps of that country henceforth the chains of mountains which have been found there. The water-shed has not a height of more than 600 or 700 feet above the sea-level, and the highest hill is only 1,240 feet above the sea. Guiana, or, at least, the British and Dutch territories by that name, have been partially explored from the south, by a party from Para, Brazil, in search of gold-mines long ago opened by Portuguese miners, and also in part for natural history and artistic purposes. The party ascended the Amazons to Obydos, and then entered the Trombetas, which has its sources in the Tucumuraqua Sierras, which separate Brazil from the Guianas; they ascended that stream and one of its affluents to the mountains, and then cut their way through the jungle, climbed to the broad savannas, and, finally, to the summit of the highest peak of the Sierras, and surveyed the whole region of Southern Guiana. The mountains were not lofty, but on their southern side presented, except where some stream had forced a passage through them, an almost perpendicular wall of basalt. There were abundant evidences of the presence of gold, but the country seemed absolutely without human inhabitants, and, while animal life abounded, the solitude of that vast region was so terrible that they could not endure it.

The great empire of Brazil comprises a considerably larger territory than the whole of Europe; but much of its interior is yet unexplored, and inhabited only by scattered Indian tribes. M. Emmanuel Liail, a French geographer, resident for thirteen years in the empire, published, near the close of 1872, an elaborate work on the "Climate, Geology, Fauna, and Botanic Geography, of Brazil," accompanied by a carefully-constructed physical map of the eastern half of the empire. On this map are laid down, with great minuteness of detail, the various spurs, ranges, and chains of mountains, which traverse the south-eastern portion of the empire, as well as the scores of navigable and non-navigable streams, affluents, and tributaries of the Amazons, the Parana, the San Francisco, and the half-dozen smaller but considerable rivers which discharge their waters into the Atlantic below 12° south latitude. In connection with these researches into the physical geography of the empire, we may notice that Señor Glazion, the director of the imperial parks at Rio de Janeiro, has been making observations on the height of the Brazilian mountains, and has ascertained that Mount Itatiaiosu, or, as he prefers to call it, Mount Itatiaia, 8,899 feet above the sea-level, is the loftiest summit in the empire. It is situated in latitude

20° south, in the province of Minas Geraes, near the source of one of the smaller affluents of the San Francisco River. In conjunction with the Bolivian Government, the Brazilian Emperor has taken measures to overcome the difficulties which have hitherto prevented the navigation of the upper waters of the Madeira River. This noble stream, one of the largest tributaries of the Amazons, has its sources and a long stretch of navigable waters in the interior of Bolivia; but free navigation with the Atlantic is prevented by a series of rapids and cataracts nearly 230 miles in length, midway in its course. These obstructions will be obviated by a railway connecting the lower course of the river with the navigable waters above the rapids. The contract for the building of this railway has been taken by Colonel G. E. Church, an English engineer, who is constructing it as rapidly as possible. It is said that its completion will bring two millions of people, now separated from Europe and the United States by the long passage *via* the Andes, and Cape Horn, or the Panama Railroad, within easy and speedy communication with both countries, greatly to the advantage of commerce.

The *Argentine Republic*, under the able administration of President Sarmiento, is making rapid progress in material and intellectual development. Its population in 1872 was about 2,100,000. Its imports in 1870, \$50,290,000, and its exports, \$28,980,000. At the end of 1872, there were 1,188 miles of railway completed, and grants for 1,200 miles more to be completed by 1877, under a state guarantee of 7 per cent. At the same date there were 8,200 miles of telegraph-lines in operation, and 1,450 more in course of construction. The public schools were increasing in number and in efficiency.

In *Paraguay*, the details of the treaty of peace with the allied powers not having been confirmed, the Argentine Confederation, one of these powers, has seized and occupied the province of Gran Chaco, lying along the west bank of the Paraguay River, and it will henceforth form a part of the Confederation.

In *Chili* a new volcano has become active in Araucania, between the volcanoes of Villarrica and Llama. Dr. Peter Möller, a Chilean physicist, gives its name as Lhagnell. The half-crazy Frenchman, who has for some years claimed to be the Emperor of Araucania, with the title of Orélie I., was in July, 1872, reported as being in France (where just now both kings and emperors are at a discount), endeavoring to obtain the recognition of his claims.

In *Bolivia*, notwithstanding some political disorders, the opening of the country to commerce by the new railway around the rapids and cataracts of the Madeira River will undoubtedly greatly facilitate the development of the country. The export of the gum caoutchouc, or India-rubber, from the valley of the Amazons, is stated to have been 5,760 tons,

and Colonel Church predicts that it will be doubled when the vast groves of rubber-trees in Northern Bolivia become accessible.

In *Peru*, the Peruvian Hydrographic Commission of the Amazons have ascertained with great accuracy the latitude and longitude, and in most cases the altitude, of about sixty points on the upper Amazons. We have room for but a few of the most important: *Iquitos*: on the Amazons, lat. 3° 44' 15" S.; long. 73° 07' 84" W. from Greenwich. *Mouth of the Ucayali River*: lat. 4° 30' 00" S.; long. 73° 05' 00" W. from Greenwich. *Mouth of the River Tambo*: lat. 10° 41' 00" S.; long. 78° 14' 00" W. of Greenwich. *Moyobamba*: lat. 6° 02' 10" S.; long. 76° 54' 20" W. of Greenwich. Elevation above sea-level, 3,044.5 feet. *Lamud*: lat. 6° 05' 38" S.; long. 77° 51' 06" W. of Greenwich. Height above sea-level, 7,529.6 feet.

In *Ecuador*, recent measurements of the highest of well-known peaks in the Ecuadorian Andes confirm the belief that from some cause the height of these mountains is diminishing. Quito was found by La Condamine in 1745 to be 9,596 feet above the sea; by Humboldt in 1803, 9,570 ft.; by Boussingault in 1831, 9,567 ft.; by Orton in 1867, 9,520 ft., and by Reiss and Stübel in 1871 (after the great earthquake), only 9,356 ft. Panecillo, according to Humboldt, was 10,244 ft.; according to Orton, 10,101; according to Reiss and Stübel, 10,006. Pichincha, according to Humboldt, was 15,922 ft. high; according to Orton, 15,827, and according to Reiss and Stübel, only 15,704. The crater of Pichincha, according to Wisse and Moreno, was 13,600 ft. above the sea-level; according to Orton, 13,800; according to Reiss and Stübel, 13,175 ft. The crater of Antisana has sunk 165 feet in 64 years. The uniformity of these diminished altitudes in all the best-known summits forbids the idea that they can be due to any inaccuracy of measurement either in the earlier or later observers. Reiss and Stübel give the height of the three peaks of Cotacachi as: N. W. peak, 16,291 ft.; S. E. peak, 16,272 ft.; N. peak, 15,842 ft. Late in 1872, Dr. Reiss ascended Cotopaxi, and ascertained that its height was 19,827 feet.

Father Wolf, a geologist of Ecuador, has been reporting to the Government on the fossils of the Manobi coast, in the neighborhood of the Rio Bamba. The oldest of the volcanic beds is entirely covered with bones of various mammals. Here are found the bones of numerous mastodons; of a fossil horse which seems to have existed in great numbers in antediluvian times; of bears, etc., etc.

IV. EUROPE.—Though the starting-point of numerous geographical expeditions, and actively engaged through its numerous geographical societies, and government exploring expeditions, the geography of Europe itself seems to have been somewhat neglected the past year. The Admiralty surveys have been maintained, topographical and geodetic explorations and measurements ordered; a consider-

able number of new maps, some of them of great beauty, issued; further efforts made to establish, definitely and conclusively, the actual meridian of Paris; an extension of the arc of meridian into Algeria and to Iceland proposed; further discoveries made as to the elevation of some of the sea-shores, and the depression of others, and the census of several of the European states completed and published. It has been ascertained that the *Swiss* glaciers cover 209,809 hectares (in round numbers 500,000 acres), or more than half the whole area of the Swiss cantons. About half of these glaciers belong to the basin of the Rhone; 75,050 hectares feed the waters of the Rhine, 18,251 hectares the Danube or one of its affluents, and 13,531 the Po. The *German* census of December 1, 1871, is just published. The population of Prussia is 24,642,388, of whom 12,051,232 are males, and 12,490,776 females; an increase of about 2.8 per cent. since 1867. The increase of population in Baden had been only 1.84 per cent. Bavaria had increased only .53 per cent. Mannheim, in Baden, had 89,614 inhabitants, Carlsruhe, 36,622. A new tunnel through the St. Gothard Mountain, in the Alps, has been commenced—the St. Gothard Railway Company being rivals of the proprietors of the Mont Cenis line. It is to be nine miles and a little more in length, to be finished in eight years or less, and to cost \$10,000,000. Extensive excavations have been made in Rome, under the direction of the Italian Government, and an English Archaeological Society, and have resulted in interesting archaeological discoveries, and in throwing doubt and distrust on legends heretofore confidently believed; especially that of the Mamertine prisons having been the last place of imprisonment of the apostles Peter and Paul prior to their martyrdom. Excavations have also been made in Athens, with very interesting results. It is found that ancient Athens was not less than fifty feet below the modern city.

V. ASIA.—The geographical discoveries and explorations in Asia, in 1872, are of three classes: the results of travel not undertaken for distinctly geographical purposes, but of great interest from their incidental relations to geography; the results of military or engineering expeditions, some of them preceded by explorers who collected geographical information either for present or future military and commercial purposes; and explorations in the interests of biblical, historical, or other archaeological investigations. To the first class belong the late W. H. Seward's "Travels Around the World," which, though undertaken as a pleasure-trip, were full of geographical as well as political and national interest. His long career as a Senator, and his eight years' service as Secretary of State, and premier of the national Cabinet, had given him a wider reputation among Oriental nations than that possessed by any American citizen then living; and, though holding no diplomatic ap-

pointment, and affecting to be nothing more than a private citizen, he was everywhere received with honors such as had never fallen to the lot of any foreigner, and such as had in many instances been previously withheld from the highest potentates. His reception in public by the Mikado or Tenno, of Japan, was the first instance, in many centuries, in which the profound mystery of the imperial court had been penetrated, and it paved the way for a change which seems to be as beneficent as it is extraordinary. In China, also, his dignified and statesmanlike intercourse with the highest official personages of the Imperial Government was alike honorable to himself and beneficial to the country of which he was an unofficial representative. Gifted with remarkable powers of observation, and the ability to utilize them, Mr. Seward's notes of the countries through which he passed, in his extended tour, are replete with interest in regard to the ethnology, habits, customs, manners, agriculture, commerce, and artistic advancement of these various peoples. The vast wealth and gorgeous display of some of the Indian princes and maharajas who entertained Mr. Seward and his party make the stories of the "Arabian Nights' Entertainments" seem simple verities. To the second class belong the numerous expeditions sent by the Russian Government into the khanate of Khiva, various portions of Soongaria, the Pamir Steppe, Mantchooria, Saghalien, Corea, and elsewhere, with a view to extend its commerce and its conquests over the wild nomadic tribes of Central Asia; the exploring parties sent out mainly for commercial purposes by the British Government, from India, to penetrate the regions on both sides of the Himalayas, and to traverse, as far as possible, Tibet and Western China; and the expeditions of other powers, or of missionary explorers, through Siam, Cochin China, Sumatra, Java, and Borneo. Our space does not permit us to go into detail in regard to any of these expeditions, and perhaps not to mention the names of all; but a few words concerning the more prominent must suffice. M. Matussofsky, in 1870-'71, made a journey from the frontiers of Western Siberia to Khobdo and Uliasutai, and thence to the north, to the sources of the Yenissei and to Minusinsk, contributing largely to our knowledge of a region hitherto almost unexplored. He ascertained that the position of Khobdo, on Klaproth's map, was seventy-four miles west of its true position, and that Lake Ike-Aral and some of the mountains were in wrong positions. M. Schepelleff explored the district of Kuldja, in Toorkistan, or Soongaria, in 1871-'72, giving valuable details concerning its geographical position, tribes, population, etc., and crossed the Moodjart Pass in the Thian-Shan, within the limits of Kashgar. M. Fedchenko, another Russian officer, in the summer of 1871, penetrated to the northern part of the Pamir Steppe, crossing the Cheptyk Pass, 12,000 feet above

the sea-level, with peaks on either side rising to a height of 18,000 or 19,000 feet, with immense glaciers, carrying lateral moraines between them. The journey was perilous in the extreme, and, from political causes, he was unable to penetrate farther than the Terek Dawan Pass. M. Keiftsoff, another Russian officer, penetrated to the court of the Khan of Khokan, and succeeded in persuading him to permit the taking of photographs of scenery, ruins, and even portraits of the members of the Khan's own family. A party of Russian travellers, under Government protection and the auspices of the Imperial Geographical Society of St. Petersburg, explored, in 1871-'72, the upper valley of the Yellow River, of China and Mongolia. After passing through Kalgan they crossed the desert of Gobi, entered the mountains of Suma Khodo, 80 miles northwest of Kuku-Khoto, visited the country of the Urutes, the Ordos, and the Alashan, in Southeast Mongolia, and then, returning to Peking for supplies of money and provisions, set out again in the hope of penetrating to Kuku-nor. The Archimandrite Palladius, whose journey through Mantchooria was spoken of in the *ANNUAL CYCLOPEDIA* for 1871, returned to Peking by sea after completing his researches. An English explorer, Mr. Thomas Adkins, British consul at New Chwang, China, also visited, in 1872, Mantchooria, traversing it from the city of Kirin to Ningoota and other places east of the Soongaree River, and describes with great minuteness the geography and scenery of Northern Mantchooria. Two English officers, Sir Frederick Goldsmid and Major St. John, R. E., have been exploring the contested Perso-Afghan frontier from Kerman to Seistán, about the delta of the Helmund River, and were joined at Seistán by Colonel Pollock and Dr. Bellew, who had travelled from Candahar to Seistán along the banks of the Helmund by a new route. The party subsequently ascertained the true meridian of Teheran to be $51^{\circ} 24' 5''$ east from Greenwich. Major Montgomerie, who has been so long connected with the surveys of the Himalayas, reports having sent out a third native explorer, whom he names, from his rank, "the Havildar," who passed with his instruments from Peshawur to Badakshán, observing for latitude in the Swát, Punjkora, and Chitrál Valleys, and recording his observations so as to form, with the previous observations of the Pundit and the Mirza, a complete survey as far as Badakshán. He intended to go on from Badakshán to Khokan by way of Darwáz and Karategin, but the political disturbances made it impossible. As it was, his life was in great peril, from the murderers of Mr. Hayward. Dr. John Anderson, who accompanied Major Sladen from Mandalay, the capital of Burmah, to Western Yunnan, the southwestern province of China, has published an exhaustive and very interesting account of that expedition, adding much to our knowledge of this previ-

ously little-known region. Captain T. Blakiston, R. A., made in the autumn of 1871 a very thorough exploration of the Japanese island of Yesso, at the instance of the Japanese Government. He learned much of the Ainos, the hairy aborigines of the island, and gives an interesting account of its fisheries and other industries. The altitude of the Japanese volcano Fusi-yama has been fixed at 13,080 feet.

The archaeological explorations now in progress in Palestine, on both sides of the Jordan, those on the site of ancient Troy, as well as those at Ephesus, are deeply interesting, and promise to prove still more so in the future; but in the strictest sense they belong rather to archaeology than to geography.

VI. AFRICA.—Our notices of geographical exploration in Africa must necessarily be confined to three points: the explorations for the sources of the Nile; the gold and diamond region between the Limpopo and Zambezi; and the explorations in Morocco and Northwestern Africa. Sir Samuel Baker's expedition, under the auspices of the Khédive, seems to make but slow progress. It was when last heard from, in October, 1871, at Gondokoro and its vicinity, about lat. $40^{\circ} 30' N.$, where it was likely to be detained for some months, cutting a canal through the dense growth of water-plants which obstructed navigation, and awaiting reinforcements. Meantime from other directions the march of exploration was going on. Dr. George Schweinfurth, the ablest of the German African explorers, after spending some years in the exploration of Nubia and the Blue Nile, was sent in 1868 by the trustees of the Humboldt fund to explore the region from Khartum to Gondokoro. Arriving at Khartum in November 1, 1868, he attached himself to the caravan of an ivory-trader named Ghattas, and on June 5, 1869, they set out for the Bahr-el-Ghazal, a tributary of the Bahr-el-Arab. Twenty-two days later they reached Meshera, at the head of navigation just beyond the Djira, which became Dr. Schweinfurth's headquarters. This town belongs to the Dinka, a tribe which contrasts strongly with the tribes farther south and west. These he visited in 1870; setting out at the end of January, and coming to the Niam-Niam he found them a very original people, with their hair let down to their waists, great eyes far apart, and noses as broad as they are long; height middling, the legs being rather short in proportion to the body. They sharpen their canines to a point as an instrument of warfare as well as for service in their cannibal repasts. Hunting and fishing furnish them food; of cultivation they do little. The Monbuttu live south of the Niam-Niam, beginning at $4^{\circ} N.$, on the further side of the Welle. This river is supposed by Schweinfurth to flow into Lake Tchad. They are even greater cannibals than their neighbors, and physically and socially are a more striking people. Still farther south are the Akka, a nation of dwarfs,

one of whom Schweinfurth nearly succeeded in bringing back with him. In 1870 a second visit was made to the Niam-Niam, when, December 1st, a fire destroyed the depot of Ghattas, including most of Schweinfurth's precious collections. At the same time the traders met with a repulse, and retreat became necessary. Six months were still spent in the valley of the Bahr-el-Ghazal, and were used in making excursions to the west among tribes that have been terribly reduced by the slave-trade.

In the ANNUAL CYCLOPÆDIA for 1871 it was stated that an American newspaper (the *New York Herald*) had sent one of its correspondents to find and relieve Dr. Livingstone. The report, at first doubted, proved to be true, and in May, 1872, news was received from Zanzibar that the correspondent, Henry M. Stanley, at the head of a considerable expedition fitted out from Zanzibar and Bangamoyo, had joined Livingstone at Ujiji, in November, 1871, had remained with him about four months, ascending the Tanganyika to its northern extremity, and was subsequently accompanied by Dr. Livingstone on his return journey as far as Unyanyembe. In August, 1872, Mr. Stanley reached Paris, and soon after England; was received by the British Association for the Advancement of Science, and subsequently by the Royal Geographical Society. He arrived in New York, in November, 1872, where he was received with abundant honors, and late in December published his narrative, "How I found Livingstone." While all credit is due to Mr. Stanley for his energy and enterprise in carrying out the orders of his principal, Mr. J. G. Bennett, and for his zealous and perilous expedition into the interior of Africa, we fail to see that he has made any positive additions to our geographical knowledge, or that he had had the training or culture which would enable him to do so. That he found Dr. Livingstone, and rendered him material aid in the way of supplies, was an indirect service to the cause of science, and is worthy of commendation; but Mr. Stanley, obviously, was not qualified to discuss the topics of African discovery with the able geographers of Great Britain and the Continent. Dr. Livingstone's discoveries during the past five or six years may be briefly summed up thus: He has ascertained that Lake Tanganyika is *not* one of the sources of the Nile. He has discovered five lakes, west, southwest, and south of Tanganyika, namely, Lake Bangweolo, between latitude 11° and 12° south; Lake Moero, latitude 8° south; Lake Kamolondo, latitude 6° south, and longitude 25° 30' east from Greenwich; and Lake Lincoln, or Shebugo, on the same latitude, but about 23° 40' east longitude; and, finally, an unknown lake, which he had not visited, but had twice approached within fifty or sixty miles. This lake lies in latitude 1° 30' to 2° 40' south, and between 25° and 26° east longitude from Greenwich, and is probably the lake described by Piaggia. These five lakes, so far

as Dr. Livingstone has been able to trace, are connected by the branches of a river, which he names the Lualaba, or in its farthest extension (to Lake Bangweolo) the Luapula. The easternmost branch or fork of this stream he names Webb's Lualaba, the central, Bartle Frere's Lualaba, and the western, Young's Lualaba. These streams he believes to be connected, either through the Albert Nyanza or by some more direct connection, with the sources of the Nile; but, as Dr. Petermann has shown with great ability and clearness, the probabilities are much stronger that they will prove to be affluents and sources of the Congo or Zaire, and to flow westward. Lake Bangweolo is 4,000 feet above the sea-level. The German geographers have sent out an expedition under the leadership of Dr. Güssfeldt, amply provided to explore the country west of this chain of lakes, and ascertain their connection with the Congo, going by way of the Loango coast. Gerhard Rohlfs is also on his way to this region, by way of Lake Tchad; and an English Livingstone-Congo expedition, under command of Lieutenant Grandy, had reached Sierra Leone, where their men were to be engaged, December 14, 1872, and on the 27th of December set out for the south coast. The party consisted of about twenty-five men. Karl Mauch, the South-African explorer, has been making explorations in the region of *Southeastern Africa* lying between the Limpopo and the Zambezi, and believes that he has found, in latitude 20° 15' south and longitude 26° 30' east, the site of the ancient Ophir and the ruins of the Queen of Sheba's palace, and of a temple built by her in imitation of that of Solomon. He urges strong reasons for his opinion.—*Morocco* was very carefully explored by French geographers in 1871 and 1872, its climate, productions, coast-lines, and mountains described, and its people and rulers portrayed. The course of the cholera, which in 1868 followed in the wake of the grand progress of the Sultan through his empire, has been mapped out, and its ravages described. The same zealous geographers have explored very thoroughly the island of *Madagascar*. Alfred de Grandidier, who has spent several years in the study of the geography and ethnology of the island, states the population at a little more than 4,000,000. Of these, about 1,000,000 are Hovas, the dominant race, supposed to be of Malay origin. The Betsileos, their allies, numbering about 600,000, are of mixed race. The Malagasees, who occupy the eastern part of the island, are composed of six or seven tribes, apparently of Kaffre origin, and number about 2,000,000. There are, besides, three or four smaller tribes, numbering in all about 500,000, and possibly of similar origin. Three-fourths of the whole are nominally Christian, the Queen and the ruling race being avowedly so. The island is fertile, and the northeastern half is remarkable for the beauty of its scenery.

GEORGIA. After the inauguration of James Milton Smith, the new Democratic Governor of Georgia, chosen by a special election to succeed Bullock, the Legislature remained in session a few days, and then adjourned to the 17th of July. The most important business of the adjourned session was to receive and act upon the reports of the several investigating committees appointed in the winter. First came the report of the committee appointed to "ascertain and report the number of bonds and indorsements which had been issued and put into circulation by Rufus B. Bullock, late Governor; the aggregate amount thereof, by whom the same were sold, the amount of money paid therefor, the times when and the persons to whom such payments were made, and all other facts connected with the history of said bonds." It covered 200 printed pages, and gave a complete history of the issuing, negotiating, and indorsing of bonds by the State authorities. The amount of the bonds was stated as follows:

When issued.	When due.	Amount.
1841 and 1866.....	1871.....	\$154,500
1842 and 1852.....	1872.....	750,000
1842 and 1843.....	1872.....	137,000
1844 and 1848.....	1874.....	251,000
1855.....	1878.....	100,000
1859.....	1879.....	200,000
1860.....	1880.....	200,000
1861.....	1881.....	100,000
1866.....	1886.....	3,764,000
1867.....	1887.....	165,000
1868.....	1888.....	263,000
1870.....	1890 and 1894....	6,380,000
Grand total of State bonds.....		\$12,464,500

INDORSED BONDS, INDORSED SINCE JULY, 1868.

To Brunswick & Albany Railroad.....	\$3,300,000
Bainbridge, Cuthbert & Columbus Railroad..	600,000
Macon & Brunswick Railroad.....	670,000
Cherokee Railroad.....	300,000
Cartersville & Van Wert Railroad.....	275,000
South Georgia & Florida Railroad.....	464,000
Alabama & Chattanooga Railroad.....	194,000
Grand total indorsed bonds.....	\$5,733,000
Grand total State bonds.....	12,450,000

Grand total State bonds and indorsed bonds..\$18,183,000

The following is a summary of the important statements of the committee concerning these bonds: The Alabama & Chattanooga Railroad bonds to the amount of \$194,000 were indorsed by Bullock. Thirty bonds sold at from 90 to 94½ cents, and 164 were hypothecated to New York Warehouse Company for \$100,000 by the railroad company. The committee recognize these bonds as good. The Bainbridge, Cuthbert & Columbus Railroad issued \$600,000 of bonds, of which \$240,000 were indorsed by Bullock without the signature of the Secretary of State, who was to sign them when twenty miles were done. Fifty miles were graded, but none ironed. These bonds are void. The Brunswick & Albany Railroad had \$3,300,000 indorsed bonds, and \$1,880,000 gold State bonds. The road cost \$20,000 per mile. The road was in operation 65 miles in 1863. The indorsements were given in

every case before the lawful amount of road was completed. Bonds were issued fifteen or twenty miles in advance. There was no investment of private parties in the road. Certificates were prepared in blank by the engineer and filled at pleasure. All of the bonds were indorsed by Governor Bullock without date. Some 1,680 bonds were signed by Frost after he ceased to be president of the road. For \$1,125,000 of the bonds there is no road to show. There are \$3,000,000 of debt against the road. The committee decides the whole of these bonds invalid. The Macon & Brunswick road has had \$2,550,000 bonds indorsed, of which \$2,100,000 were under the present constitution, for which there is an equivalent of private investment, but not for the \$450,000. The committee makes no recommendation. These bonds brought from sixty cents to par. The Cartersville & Van Wert Railroad has two sets of indorsed bonds for the same miles, \$275,000 in one batch and \$300,000 in the other, both out. The testimony shows that the road was not built when the bonds were indorsed. The committee report these bonds void.

Two million currency bonds were issued to raise money on temporarily. Three million gold bonds were afterward issued to pay the money. Only a portion of the currency bonds were surrendered, and those were used by Mr. H. I. Kimball, the agent of the State, in negotiating the substitution, to borrow money on. The State got none of the money. The committee report these bonds as of no force. The gold bonds were \$3,000,000. Kimball got \$250,000 for the opera-house; James \$100,000 for the Executive mansion; Henry Clews had \$102,000 unsold; \$300,000 have been returned to the Treasury, and \$2,598,000 were sold and hypothecated. Of this last sum Clews sold \$1,650,000, and Kimball manipulated the rest. Clews got \$1,432,250 for his bonds, and paid \$370,000 on old bonds, \$100,000 on State Road bonds, \$609,192.78 on drafts and notes of Bullock and Foster Blodgett, on account of State Road, \$198,700 to the National Bank, and \$254,000 for expenses and fees. The money paid on Bullock's and Blodgett's drafts was misappropriated, and Clews did not get the gold bonds as collateral security but for sale. The money raised by Kimball on these bonds cannot be estimated. The committee recommends all these gold bonds to be paid, as Bullock was not restricted by law as to their issue. The gold bonds held by Clews are illegally in his hands, in the opinion of the committee.

The South Georgia & Florida Railroad \$464,000 bonds are declared properly indorsed.

The State Road mortgage bonds, to the sum of \$614,000, issued by Ex-Governor Jenkins and used by Bullock, are valid.

With the report the committee submitted bills to the following effect:

To declare the indorsement of the bonds of the Brunswick & Albany Railroad null and void, and to prohibit the Governor, Treasurer, or any officer of the State, from paying the interest or principal, or in any way recognize the validity of said indorsement; to declare null and void, and unconstitutional, the issue of the State gold bonds in aid of the Brunswick & Albany Railroad Company under act of October 17, 1870, and to prohibit the Governor of Georgia, the Treasurer, or any other officer of the State, from paying principal or interest on the same; to declare the indorsement of the bonds of the Cartersville & Van Wert Railroad Company and the Cherokee Railroad Company null and void, and to prohibit the Governor, Treasurer, or any other officer of the State, from paying the interest or principal, or in any way recognizing the validity of said indorsement; to declare the indorsement of the bonds of the Bainbridge, Cuthbert & Columbus Railroad Company null and void, and to prohibit the Governor, Treasurer, or any other officer of the State, from paying the interest or principal, or in any wise recognizing the validity of said indorsement; to declare null and void certain quarterly gold bonds, issued in 1870, and to prohibit the Governor, Treasurer, or any other officer, from paying the interest or principal of the same. (These were 100 held by Henry Clews.)

Resolutions were also submitted as follows:

Recognizing the quarterly gold bonds issued under act of September 15, 1870, to be good and valid; that the bonds hypothecated be redeemed by the payment of the money borrowed, with lawful interest; that the indorsement of the bonds of the South Georgia & Florida Railroad was made in compliance with law, and therefore valid; that the indorsement of the bonds of the Alabama & Chattanooga Railroad is valid and binding; that the currency bonds issued in August, 1870, having been cancelled by the gold bonds, are not binding, and prohibiting the Governor, Treasurer, or any other officer of the State, from paying interest or principal, or in any way recognizing their validity.

The bills invalidating the indorsement of the State on the bonds of the Brunswick & Albany, the Cartersville & Van Wert & Cherokee, and the Bainbridge, Cuthbert & Columbus Railroad Companies, were passed with very little opposition. Resolutions were adopted recognizing the validity of the State indorsement on the bonds of the Macon & New Brunswick, and the South Georgia & Florida roads. The act declaring certain gold bonds null and void was passed in the following terms:

Be it enacted by the Senate and House of Representatives, That the quarterly gold bonds, issued by the State, under act of September 15, 1870, and now held by Henry Clews & Co., of New York, and numbered as follows, to wit: 1825, 1826, 2591 to 2600, both inclusive, 1771 to 1774, both inclusive, 1741, 1683, 1629, 1630, 1010, 797, 798, 2601 to 2575, both inclusive,

1791, 1792, 1811, and 1840, are hereby declared void and of no binding force against the State of Georgia.

The resolution recognizing the validity of the other gold bonds issued under the act of September 15, 1870, and ordering their prompt redemption, passed. The resolution relating to currency bonds was adopted, as follows:

Resolved, That the currency bonds issued under act of August, 1870, for temporary purposes, have been cancelled by the issue of gold bonds for the purposes of the original issue, and it is hereby declared that said currency bonds are not binding upon the State, and the Governor, Treasurer, or any other officer of the State are hereby prohibited from paying the principal or interest, or any part thereof, or in any manner recognizing the validity of said bonds.

The following was also adopted by way of amendment to the resolution:

Whereas, J. Boorman, Johnson & Co., of New York, and A. G. Johns, of Brooklyn, hold certain currency bonds of the State, which they allege were hypothecated with them by H. I. Kimball, as the State's agent; and—

Whereas, It is claimed by said stockholders that, if allowed to make further proof, they will be able to show that the funds, loaned upon such hypothecation, were received and used by the State; and—

Whereas, It is the purpose of this General Assembly to meet and discharge all demands against the State for sums of which she has received the benefit, and to give to parties holding such demands the largest opportunity to establish the character of their claims; therefore, be it

Resolved, That said holders of currency bonds may have reduced to writing, and sworn to before Thomas L. Snead, of New York, such statements as they may see proper to submit, touching the hypothecation of said bonds, and the fact that the State received the benefit of the money borrowed on said hypothecation. The testimony shall be in the form of question and answer. The said Thomas L. Snead, as commissioner to take such testimony as aforesaid, shall transmit the same taken to the Governor, whose duty it shall be to lay the same, together with the report of the Bond Committee for the currency bonds, before the next General Assembly.

The proposition to declare the indorsement of the bonds of the Alabama & Chattanooga Railroad Company valid met with much opposition, and a substitute declaring them null and void, and prohibiting the payment of principal or interest, was adopted in the House. This failed, however, in the Senate, and no final action was taken on the subject. A resolution was also adopted by the House, providing for an amendment of the constitution in the following terms:

The General Assembly shall have no power to recognize as legal, or make provision by law for the payment of the illegal and fraudulent indorsement of the bonds of various railroad companies, and other bonds mentioned in the several acts of the Legislature passed at the July and August session of 1872, declaring the State's non-liability upon the same.

After this act shall have been passed by two-thirds, by successive Legislatures, as by the constitution provided, it shall be the duty of the Governor, by his official proclamation, to make provision for submitting the amendment to the qualified voters of this State, for final ratification or rejection, at the next general election occurring more than sixty days after passing by two-thirds the second time as aforesaid.

This, too, failed to pass the Senate.

The committee appointed to investigate the management of the Atlantic & Western Rail-

road, under the State authorities, rendered two reports. The majority declared that during the sixteen months from August, 1868, to December, 1869, while Mr. Hulbert was superintendent, the receipts of the road amounted to \$1,716,206.47, of which \$346,000 was paid over to the State Treasury; and that during the twelve months from January to December, 1870, when Foster Blodgett was superintendent, the receipts were \$1,464,737.01, of which only \$45,000 was paid over, while debts were contracted to the amount of \$600,000, in addition to various unascertained claims. It was said that in many cases money was drawn to pay the same claim more than once, and that, in many more instances, claims were paid which were exorbitant or fraudulent. Many unnecessary persons were employed in the service of the road, and wholly uncalled-for expenditures incurred. It is declared that the loss by mismanagement and fraud, under Mr. Blodgett, was not less than \$1,000,000. The committee appointed to investigate the lease of the road also made its report, which provoked considerable discussion. The subject was finally disposed of by the adoption of the following resolutions:

Resolved, That the investigation of the special committee, raised for the purpose of investigating and passing upon the fairness or unfairness of the lease of the Western & Atlantic Railroad, have failed to disclose evidence sufficient to support the charge of fraud in procuring the lease.

Resolved, That, in the opinion of the General Assembly, the lease of the Western & Atlantic Railroad secures to the State a certain sum for rental much larger than can be hoped for under political control.

Resolved, That the Governor be required to have the entire stock and outfit of the road appraised, and the appraisal made under order of the Governor shall stand in the place and stead of the present assessment.

Resolved, That, within ninety days from the date of the passage of this resolution, the present lessees shall each sign their present bond, that the question of their liability may be set at rest.

Resolutions were also adopted providing for the taking of an inventory of the property of the road, and for ascertaining its condition.

The committee appointed to investigate the alleged official mismanagement of Governor Bullock, made a long report, the principal points of which were to the following effect: That the Governor allowed Mr. Kimball, as financial agent of the State, to borrow money on the State's credit for his private use; that he transferred money belonging to the State in the Georgia National Bank, to his own private account, and permitted State money, in the same bank, to be used on Kimball's account; that he was guilty of fraud and corruption in the purchase of the Opera-House at Atlanta for the Capitol; that he subsidized the press by enormous and unnecessary contracts for printing, and purchased a newspaper for which he secured State patronage; that he granted pardons to criminals for money and political support; that he permitted the penitentiary to carry on a system

of plundering from the State, and shared in the proceeds; and was guilty of extravagance and corruption in nearly all his transactions. His part in the management of the Atlantic & Western Railroad, and in indorsing bonds illegally, being covered by the reports of other committees, is barely alluded to. No direct action was taken by the Legislature on this report.

This session of the Legislature continued till near the end of August, and passed 435 acts and 59 joint resolutions, but the bulk of them related to matters of purely local interest. Among the resolutions adopted was one requesting the members of Congress from Georgia to use their efforts to obtain an appropriation for the surveying and locating of a canal to connect the Atlantic Southern States with the Western States. A division of the State into nine congressional districts was made in accordance with the new apportionment act of Congress. A bill to regulate the time of holding elections, providing that State officers and members of the Legislature should be chosen on the first Wednesday of October, Congressmen on the Tuesday following the first Monday of November, and county officers on the first Wednesday of January, passed the Senate, but was lost in the House.

The Democrats of the State held a convention at Atlanta, June 26th, to appoint delegates to the National Convention at Baltimore, and adopted the following resolutions:

Resolved, That the Democratic party of Georgia stands upon the principles of the Democratic party of the Union, bringing into special prominence, as applicable to the present extraordinary condition of the country, the unchangeable doctrine that this is a Union of States, and that the indestructibility of equality with each other is an indispensable part of our political system.

Resolved, That, in the approaching election, the Democratic party invites everybody to cooperate with it in a zealous determination to change the present usurping and corrupt Administration, by placing in power men who are true to the principles of constitutional government and a faithful and economical administration of public affairs.

Resolved, That, in our opinion, the delegates to the Baltimore Convention should go unmolested by instructions, and should act with all the lights before them as they deem best for the good of the party and the welfare of the country.

Another convention was held on the 24th of July, for the purpose of making nominations for Governor and presidential electors. James M. Smith was nominated for Governor, and it was declared that the election of Greeley and Brown for President and Vice-President of the United States would be "conducive to the preservation of the rights of the States, to local self-government, and the protection of the individual liberty of the citizen." An invitation was also extended to "everybody" to cooperate with the Democratic party "in a zealous determination to change the present usurping and corrupt Federal Administration, by placing in power men who are true to the principles of constitutional

government, and to a faithful and economical administration of public affairs." An attempt to secure the coöperation of the "Liberal Republicans" was not successful, the committee of the latter, with whom negotiations were carried on, sending the following communication to the convention:

The committee of Liberal Republicans, whose communication is before the Democratic Convention, have conferred with the committee appointed by the convention who have expressed themselves as individually favorable to a union of the two elements, upon the just basis of giving to the Liberal Republicans a fair representation upon the electoral ticket according to their numbers, and they regret to learn from the Democratic committee that in their judgment it is impossible to carry such a measure through the convention without a serious rupture.

The Democratic committee have suggested that we harmonize with the Democracy of the State, without representation upon the ticket. We are enabled to appreciate the liberality of the invitation to unite with the Democracy, without such recognition. We are determined, however, that we will do no act which can in any way imperil the success of Greeley and Brown in this State, and while we protest against the spirit of illiberality which denies us representation upon the electoral ticket which is to be put before the people by those who have adopted our candidates for President and Vice-President, we will place no electoral ticket in the field, but will cast our votes for the Greeley and Brown electoral ticket without regard to the former political opinions of the individual electors, or the manner in which they have been brought before the people. But as to all matters connected with State elections we hold ourselves at liberty to cast our suffrage in such manner as our self-respect and our sense of duty to the country may dictate.

The Republicans of the State held their convention at Atlanta on the 21st of August, and nominated Dawson A. Walker for Governor. Presidential electors were also nominated, and the following resolutions adopted:

Resolved, That this convention, in the name of the Republicans of Georgia, hereby declares its devotion to the principles of the Republican party of the Union as declared by the National Convention at Philadelphia in May last, and proudly ratifies the nominations of Ulysses S. Grant for President, and Henry Wilson for Vice-President; commend those candidates to the people of Georgia as statesmen whose capacity, wisdom, and integrity have been proven by the severest tests, as worthy guardians of the public honor, and inflexible friends of Union, liberty, and equal rights.

Resolved, That the present General Assembly of Georgia, by enacting penal laws calculated to ensnare the innocent by its contrivances practically to wrest the ballot from the poorer citizens; by its faithlessness to the cause of popular education; by denying local government to citizens of certain municipalities, and by its general unfriendliness to the classes whose toil has largely built up the prosperity of the State, has demonstrated its unfitness for its high trust, and should be superseded by a body of more wisdom, justice, and moderation, and of more devotion to the welfare of the masses of the people.

On the following day, August 22d, the Democrats who did not favor the candidates nominated at Cincinnati and Baltimore, for President and Vice-President, held a convention at Atlanta, and appointed delegates to the National Democratic Convention to be held at Louisville, Ky., at the same time recommend-

ing the names of Charles O'Connor, of New York, and J. Proctor Knott, of Kentucky, as suitable candidates for President and Vice-President. The following platform, drawn up by Alexander H. Stephens, was unanimously adopted:

Resolved, That the Government of the United States is one formed by separate States; that it is one of limited powers, delegated by the States for specific purposes and objects set forth in the Constitution, and that it possesses of itself no original or inherent power whatever.

Resolved, That the Union established by the Constitution is a Union of the States, federal in its character, composed of States and thereby united, and is incapable of existence without the States as its constituent integral parts; that the indestructibility of the States, of their rights and of their equality with each other, is an indispensable part of this political system, and therefore the perpetuation of the Union in its integrity depends upon the preservation of the States in their political integrity; the Government of the United States being a Federal Republic, and not a consolidation of the whole people into one homogeneous nation.

Resolved, That the right of local State government, with the subjection of the military to the civil authority, and the security of the privilege of the writ of *habeas corpus* in time of peace, with the power to enforce the rights and promote the well-being of its inhabitants, by such means as the judgment of its own people may prescribe, and secured and guaranteed under the Constitution of the United States to the several States of the Union; and that, too, not "subject to any solemn constitutional obligation upon the part of the Federal Government of any kind whatever; but on the contrary, the Federal Government is under a solemn constitutional obligation not to interfere in these matters in any way, and, when it does so, it becomes a usurper of power, an oppressive tyrant, and an enemy to the liberties of the country."

Resolved, That the perpetuation of the Union, and the maintenance of the Government as both were established by the Constitution, and as both under the Constitution have been expounded in the foregoing resolutions, in conformity with the teachings of Jefferson, Madison, and Jackson, have ever been held as cardinal doctrines, of the Democratic party, and they are now reiterated with increased earnestness, under the solemn conviction that the only sure hope for the preservation of liberty rests in bringing back the administration of the Government to these principles, and in receiving it from the hands of those whose admitted usurpations and revolutionary measures now threaten the entire overthrow of the whole fabric of our system of free institutions, and the erection in their stead of a consolidated empire.

The election occurred on the 5th of November. The full vote cast for presidential electors was 188,906, of which 62,550 were in favor of the election of Grant and Wilson, 76,856 for Greeley and Brown, and 4,004 for O'Connor and Adams; majority for Greeley, 13,806. The total vote for Governor was 151,014, of which Smith received 104,589 and Walker 46,475; majority for Smith, 58,064.

There was comparatively little disorder in the State during the year. A riot occurred at Savannah on the 29th of July, which grew out of the persistent efforts of certain negroes to ride in street-cars, which had been previously reserved for white persons only. The negroes had been ejected from the cars by some of the passengers, and a conflict in the streets had

resulted. This, however, was speedily suppressed. There was some bloodshed, and a good deal of excitement, but no one was killed. One of the negroes, Avery Smith by name, brought a charge against three white men, concerned in ejecting him from the car, for conspiring together, and with others, "with intent to injure, oppress, threaten, and intimidate deponent, a colored citizen of the United States, and other colored persons, said persons also being citizens of the United States, with intent to prevent and hinder said deponent and said other colored citizens, whose names are unknown to deponent, from his and their free exercise and enjoyment of the right and privilege of riding in the cars of the street-car company, in the city of Savannah, said street-cars being run by an incorporated company, said company being public carriers of passengers, the right, privileges, and immunity of riding in said cars being a right, privilege, and immunity granted and secured to deponent and said other persons by the Constitution and laws of the United States, they being citizens of the United States."

The parties were tried before United States Commissioner H. C. Wayne, and discharged on the ground that the charge had not been sustained. In his decision the Commissioner said:

So far, then, as the court has been able to sift the evidence and bring it to the test of the law, the complainant had no right, privilege, or immunity under the Constitution or laws of Congress to be abridged. But, on the contrary, he stands before this court a deliberate violator of a legal regulation of the street-car company, and, *pro tanto*, a disturber of the public tranquillity. Holding, moreover, a position of trust and emolument under the United States Government, he should have been the last to foment disturbance of the public peace; and, a comparative stranger to this community, besides, should have come among us bearing the olive-branch of peace, and not the firebrand of social discord. It was by such men as himself that the riots of the evening of the 29th of July, in this city, were originated. And justice to the truth of the inquest compels the court to add, though with regret, that the management of the road, by its timid course, must take its share of the responsibility for them.

In conclusion, it is a matter of gratification to the court to observe that none of our respectable colored citizens appear to have been mixed up in the scene that marred the fair fame of our peaceful city on the 28th and 29th of July last, but, that those disgraceful acts appear to have been conceived, promoted, and executed by bad men from other parts of the country, backed, however, it is true, unfortunately, by a few native ruffians; for there are ruffians among the colored people as well as among the whites, no race or color being exempt from the curse of ruffianism.

The official statement of the State finances on the 1st of January, 1873, places the public debt at \$8,186,500. The receipts of the Treasury, for the year, amounted to \$2,101,540.84; the disbursements were \$1,835,207.14; the balance on hand at the end of the year, \$766,133.70. The Treasurer estimated the amount to be raised, for the year 1873, at \$1,418,935. The sources of revenue will yield \$2,085,939. The valuation of taxable property is placed at \$234,492,468.

The State University appears to be in a flourishing condition. The number of students matriculated during the year was 817, and 46 were graduated at the last commencement. The income of the institution, for the year ending July 29th, was \$29,221.25, of which \$11,305 was derived from tuition fees. The College of Agriculture and Mechanic Arts has had 127 students. In July the sum of \$90,202.17 was paid into the Treasury from the sale of scrip for Government lands for the benefit of this institution.

The whole amount of school revenue prior to October 1st was \$492,924.27. The number of patients in the Lunatic Asylum is 509. Of these 423 are white, and 86 colored; 379 are lunatics, 74 idiots, and 56 epileptics. The expenses for the year were \$160,359.40, including \$61,916.53 paid on special appropriations for completing buildings and for other improvements. The Academy for the Deaf and Dumb has had 61 pupils during the year. The Academy for the Blind had 39 pupils, and the amount disbursed for their support during the year was \$10,759. The number of convicts in the penitentiary is 530; 44 have been discharged, 21 have escaped, 14 have died, one has been pardoned, one was killed by accident, and one was killed by the guard.

According to the census of 1870, there were 6,831,856 acres of improved land, 12,928,084 of woodland, and 3,888,001 of other unimproved land. The cash value of farms was \$94,559,468, of farming implements and machinery, \$4,614,701; total amount of wages paid during the year, including value of board, \$19,787,086; total (estimated) value of farm productions, including betterments and additions to stock, \$80,390,228; orchard products, \$352,926; produce of market-gardens, \$193,266; forest products, \$1,281,623; home manufactures, \$1,113,080; animals slaughtered or sold for slaughter, \$6,854,382; value of all live-stock, \$30,156,317. There were 81,777 horses, 87,426 mules and asses, 231,310 milch-cows, 54,332 working-oxen, 412,261 other cattle, 419,465 sheep, and 988,566 swine. The chief productions were, 308,890 bushels of spring and 1,818,127 of winter wheat, 82,549 of rye, 17,646,459 of Indian-corn, 1,904,601 of oats, 5,640 of barley, 22,277,380 pounds of rice, 288,596 of tobacco, 473,984 of cotton, 846,947 of wool, 410,020 bushels of peas and beans, 197,101 of Irish and 2,621,562 of sweet potatoes, 21,927 gallons of wine, 4,499,572 pounds of butter, 10,518 tons of hay, 553,192 gallons of cane molasses, and 474,027 of sorghum, 610,877 pounds of honey, and 81,233 of wax.

The total number of manufacturing establishments was 3,836, employing 405 steam-engines of 10,826 horse-power, 1,729 water-wheels of 27,417 horse-power, and 17,871 hands, of whom 15,078 were males over 16, 1,498 females over 15, and 1,295 youth. The amount of capital employed was \$13,930,125;

wages paid during the year, \$4,844,508; materials, \$18,583,731; products, \$31,196,115.

The total number of religious organizations was 2,873, having 2,698 edifices, with 801,148 sittings, and property valued at \$3,561,955. The principal denominations were:

DENOMINATIONS.	Organists' no.	Sittings.
Baptist.....	1,369	899,165
Christian.....	34	10,985
Congregational.....	10	2,800
Episcopal.....	35	10,080
Lutheran.....	11	3,000
Methodist.....	1,348	827,843
Presbyterian.....	134	49,575
Roman Catholic.....	14	5,500

The whole number of libraries was 1,735, with an aggregate of 467,232 volumes. Of these, 32, with 7,765 volumes, were private, and 545, with 162,851 volumes, were other than private. There were in the State 110 newspapers and periodicals, with an aggregate circulation of 150,987; 15,539,724 copies were annually issued. There were 5 tri-weekly, circulation 3,600; 9 semi-weekly, circulation 5,100; 73 weekly, circulation 88,837; 2 semi-monthly, circulation 700; 6 monthly, circulation 21,950, and 1 quarterly, circulation 1,000.

GERMANY, an empire in Europe, reëstablished January 18, 1871. The Emperor William I. was born March 22, 1797. He is a son of King Frederick William III. and Queen

Louisa, and was married June 11, 1829, to Augusta, daughter of the Grand-duke Charles Frederick of Saxe-Weimar. The heir-apparent, Frederick William, born October 18, 1831, has the official title of Crown-Prince of the German Empire and Crown-Prince of Prussia. He was married, January 25, 1858, to Victoria, Princess Royal of Great Britain and Ireland, born November 21, 1840. His children are: Prince Frederick William, born January 27, 1859; Princess Charlotte, born July 23, 1860; Prince Henry, born August 14, 1862; Princess Victoria, born April 12, 1866; Prince Waldemar, born February 10, 1868; Princess Sophia Dorothea, born June 14, 1870; Princess Margareta, born April 22, 1872. Imperial Chancellor (Reichskanzler) Otto, Prince of Bismarck-Schönhausen. President of the Imperial Chancery (Reichskanzler-Amt), Delbrück, Minister of State. The "Imperial Supreme Commercial Tribunal" (Reichs-Ober-Handels-Gericht) is the supreme court in commercial affairs for all the states of the German Empire, except Bavaria; and it is, at the same time, the supreme court for Alsace-Lorraine. It has its seat in Leipzig.

The following table exhibits the area and population of the states belonging to the German Empire, the number of representatives of every German government in the Federal Council, and the number of deputies who represent each state in the Reichstag:

STATES.		Square Miles.	Population, 1871.	Votes in Federal Council.	Deputies to the Reichstag.
1. Prussia (including Laueburg).....	Kingdoms	135,806	24,691,208	17	236
2. Bavaria.....		29,293	4,861,408	6	48
3. Saxony.....		5,779	2,556,244	4	28
4. Württemberg.....		7,532	1,818,541	4	17
5. Baden.....		5,870	1,461,428	3	14
6. Hesse.....		2,964	852,843	3	9
7. Mecklenburg-Schwerin.....		5,190	557,897	2	6
8. Saxe-Weimar.....		1,404	286,183	1	3
9. Oldenburg.....		2,469	316,641	1	3
10. Mecklenburg-Strelitz.....		1,032	96,982	1	1
11. Brunswick.....	Duchies	1,425	311,715	2	3
12. Saxe-Meiningen.....		966	187,884	1	2
13. Saxe-Altenburg.....		510	142,122	1	1

Both the Federal Council (Bundertag) and the Reichstag meet in annual session, convoked by the Emperor. The Reichsland of Alsace-Lorraine, separated from France by treaty of May, 1871, and provisionally unrepresented in the legislature of the empire, will have, when admitted, one member in the Federal Council, and fifteen deputies in the Reichstag. The subjects of the German Empire who are of a non-German nationality are divided as follows:

NATIONALITY.	Inhabitants.	Percentage.
Polish.....	2,450,000	6.5
Vindish.....	140,000	
Czechic.....	50,000	
Lithuanian.....	150,000	0.4
Danish.....	150,000	0.4
French.....	220,000	0.7
Total of population of non-German nationalities.....	3,170,000	8.
Total of population of German nationality.....	37,800,000	92.

The following towns of Germany had, according to the census of 1871, a population of more than 20,000 inhabitants (those marked † being non-Prussian):

Towns.	Inhabitants.	Towns.	Inhabitants.
Berlin.....	895,889	†Lubeck.....	39,743
†Hamburg.....	240,351	†Mannheim.....	39,514

By the Constitution of April 16, 1871, the Prussian obligation to serve in the army is extended to the whole empire. Every German is liable to service, and no substitution allowed, all capable of bearing arms having to serve in the standing army for seven years, three in active service, and four in the army of reserve. After quitting the army of reserve, he forms part of the landwehr for five years. The strength of the Imperial German Army, in 1872, was:

	Officers.	Men.	Reserv.
1.—PEACE-FOOTING.			
Infantry of the Line.....	5,534	258,323	4,371

Empire.....	1871....	10,692,000	10,692,000
Total.....		604,500,000	59,966,000	569,800,000	1,098,800,000

In the budget of the German Empire for the years 1872 and 1873, as fixed by a law of December 4, 1871 (modified by an additional law of June 20, 1872, and by the law of July 20, 1872), the revenue and expenditures are, for the year 1872, 116,990,000 thalers, and for the year 1873, 118,840,489 thalers. Bavaria, Württemberg, and Baden, have their own taxes on beer and brandy; and Bavaria and Württemberg have their own administration of postal and telegraph affairs. These states have, therefore, to contribute comparatively larger sums to the common expenses of the empire. The total debt of the empire, at the close of the year 1871, was 256,508,120 thalers.

The movement of shipping in the ports of the German Empire was, in 1871, as follows:

STATE.	1871.	
	Vessels.	Tons.
ENTERED.		
Prussia.....	55,770	4,297,774
Hamburg.....	5,499	2,516,674
Bremen.....	2,237	1,154,654
Lübeck.....	2,260	294,664
Oldenburg (1870).....	668	76,000
Mecklenburg.....	783	100,000
Total, 1871.....	68,155	8,435,000
Total, 1870.....	49,880	6,221,000
CLEARED.		
Prussia.....	55,050	4,222,800
Hamburg.....	5,457	2,515,712
Bremen.....	2,241	1,118,056
Lübeck.....	2,296	301,513
Oldenburg.....	653	105,000
Mecklenburg.....	774	100,000
Total, 1871.....	67,471	8,364,000
Total, 1870.....	48,301	5,788,000

The commercial navy, at the close of 1871, was composed as follows:

SEAS.	Total Vessels.	Tons.	Number Steamers.	Tons.
In the German Ocean.....	2,703	682,771	85	109,475
In the Baltic Ocean.....	2,420	622,801	94	21,311
Total.....	5,123	1,305,572	179	130,786

The vessels were distributed among the maritime states as follows:

STATE.	Vessels.	Tons.
Prussia (1870).....	2,373	642,905
Hamburg.....	406	230,636
Bremen.....	265	280,284
Mecklenburg.....	404	163,300
Oldenburg.....	313	55,902
Lübeck.....	49	10,840

The emigration from the ports of Bremen and Hamburg was as follows:

	PORT OF BREMEN.		PORT OF HAMBURG.		Vessels.
	Number.	Vessels.	Total.	Direct.	
From Germany.....	45,674	30,260
From Austria.....	8,338	208	1,172	34,639	99
From other States.....	6,514	10,792
Total, 1871.....	60,516	208	42,224	34,639	99
Total, 1870.....	46,781	140	32,556	27,442	71
Average, 1866-'70.....	62,516	191	47,294	41,435	111
Total, 1866-'71.....	1,356,879	7,009	43,514	37,050	97
Total, 1866-'71.....	666,468	569,496	2,445

The number of railroads in operation on January 1, 1872, was 13,095 miles. The aggregate length of telegraph-lines was 22,076 miles; of telegraph-wires, 71,407 miles; the number of telegraph bureaux, 8,726.

The postal statistics of Germany, in 1871, were as follows:

	Officers.	Revenue.	Expenditures.	Letters.	Newspapers.
Imperial Mail.....	4,937	25,901,640 Thalers.	23,522,389 Thalers.	332,681,353	202,665,474
Bavaria (1870).....	1,079	3,280,773 Florins.	3,096,573 Florins.	48,147,260	58,234,379

Baden (1870).....	445	2,014,181 "	1,699,704 "	25,294,000	17,000,000
Total, about.....	6,806	426,000,000	254,000,000

The new session of the German Reichstag was opened on April 8th by Prince Bismarck, who, by order of the Emperor, read the following speech:

HONORED GENTLEMEN: Your labors during the present session will, in the first place, be devoted to continuing the legislative regulation and development of the common institutions of the empire, already commenced last year. The control of the raising and disbursement of the imperial revenue will be definitely regulated by a law determining the constitution and the powers of the Audit Department, and the authorities, who will be intrusted with the administration of this control, as well as with the preparation of the estimates to be passed by the Federal Council and the Reichstag, will by this law be invested with the requisite powers. The draught of a military penal code for the German Empire will be laid before you, in order to insure uniformity of military institutions in this respect, and, in compliance with the wishes of Parliament, to supplement the uniformity already attained in the administration of the civil law. A bill regulating the position of the public functionaries of the empire, which has already been before the House, has undergone a fresh revision, having regard to the opinions expressed by the committee of the Reichstag, and to the political changes which have since occurred. The measure thus amended will be submitted to your consideration and decision. The uniform levy of the beer-tax, in those parts of the empire where the tax exists, has already at different times engaged your attention, without the existing obstacles having been successfully removed. A bill for the better levying of the brewery-tax in the German Empire will be laid before you, with the object of settling this question and of carrying out a reform of the malt-tax, in the interest of the revenue as well as of the consumers, by levying a tax on the substitutes for malt. The gratifying increase of traffic and consumption has made it possible, while respecting the well-tried principles of prudent calculation, to estimate at a higher figure the receipts from the imperial taxes on articles of consumption, and the surplus of the postal administration, in the budget about to be laid before you for 1878, so that, notwithstanding the increased charges in several departments of the expenditure, a diminution in the state contributions toward the imperial exchequer may be looked forward to. It is proposed to bring forward a supplement to the budget of the year 1872, in order, besides providing for various wants which have recently arisen, to furnish the necessary funds for founding a statistical office, which, by a uniform and scientific elaboration of the results of statistical inquiries in the empire, will be able to render important services to the Legislature and the Government, as well as contribute largely to a scientific appreciation of our national and social condition. The administration of the year 1871 has yielded a considerable financial surplus, both in the revenue and the postal department. A bill will be submitted to you for the legal disposal of these sums, as well as for the disposal and distribution of the French war indemnity. In compliance with the provisions of the laws by which credits were granted in 1870 and 1871, an account will be laid before you of the disbursements made by the states of the late North-German Confederation in consequence of the war with France. The negotiations conducted for some years past with the Gov-

ernment of the kingdom of Portugal have resulted in the conclusion of a treaty on the 2d of March last, on the model of treaties of commerce and navigation concluded with other states, and by which the mutual commercial and shipping relations of the two countries are placed on the same footing as the most favored nations. We may, therefore, hope that the foundations of more intimate and more extensive commercial relations between Portugal and Germany have been successfully laid. The treaty will be submitted to you for your sanction. A consular convention has likewise been concluded with the United States, as well as a postal treaty with France, regulating the mutual postal relations of the two countries, in view of their continually-increasing correspondence. The new administration in, and the consolidation of the affairs of, Alsace-Lorraine make satisfactory progress. The damage done by the war is gradually disappearing, with the aid of the subventions given in conformity with the law dated the 15th of June, 1871. The foundations of a German administration have been laid there, the administration of the law is placed on a secure basis, and the University of Strasbourg will be opened on the 1st of next month; imperial assistance will, it is hoped, not be withheld, to meet the extraordinary cost arising from the establishment of scientific institutions connected therewith. A synopsis of the laws passed up to the present time in the newly-acquired provinces, as well as of the various general ordinances issued therein, and a review of the course the administration has hitherto pursued, will, in conformity with the law passed the 9th of July of last year, be laid before you. Honored gentlemen, you will share the satisfaction with which the confederate governments look back on the events of the first year of the newly-founded German Empire, and the joyful confidence with which they look forward to the further national and state development of our internal institutions. With equal satisfaction you will hail the assurance that the policy of his Majesty the Emperor and King has succeeded in retaining and strengthening the confidence of all foreign states; that the power acquired by Germany through becoming united in one empire is, not only a safe bulwark for the Fatherland, but likewise affords a strong guarantee for the peace of Europe.

On April 10th the Reichstag elected Herr Simson President, and Prince Hohenlohe and Herr Bennigsen Vice-Presidents. On April 10th the Consular Convention between Germany and the United States was ratified.

On April 25th the German *chargé d'affaires* in Rome, Herr von Derenthal, addressed a communication from his Government to Cardinal Antonelli acquainting him with the nomination of Cardinal Prince Hohenlohe as envoy of the German Empire to the Pope, and announcing his early arrival in Rome, in order to make sure that the choice of the prince-cardinal was agreeable to his Holiness, and that the new ambassador of Germany might present his credentials accordingly. No reply having been received from the Roman Curia up to the 1st of May, Herr von Derenthal received an order to make inquiries of

Cardinal Antonelli, who replied the next day, explaining his silence by the announced early arrival of Cardinal Prince Hohenlohe; but stating that the Pope, though not insensible to the Emperor's intentions, was, nevertheless, in the unpleasant position, under existing circumstances, of not being able to authorize Cardinal Hohenlohe's accepting so delicate and important a mission. The German Government and the Reichsrath took great offence at this refusal of the Pope to receive Cardinal Hohenlohe, and in the Reichsrath a motion was made to strike out in the proposed budget the estimate for an envoy to the Pope. Prince Bismarck, on May 14th, made in the Reichsrath a speech on the subject which produced a profound impression. He said that the last transaction with the Papal Government had demonstrated the difficulty of effecting an understanding with the Roman Curia through the medium of an envoy. The latest dogmas promulgated by the Holy See rendered it impossible to act in harmony with Rome. To restore peace among the religious denominations it appeared necessary to seek a solution of the difficulties by enacting a law for the empire securing complete liberty of conscience. The rejection of an envoy by the Government to whom it was proposed to accredit him was not a frequent occurrence. It was not a courteous proceeding, and had not happened to Prince Bismarck during a diplomatic career lasting over twenty-one years. It pained him the more, inasmuch as Cardinal Hohenlohe appeared fitted to bring about a conciliatory feeling. The regret he felt would not, however, justify him in manifesting irritation. Regard for the interests of the Catholic population of Germany had determined him to nominate another envoy, however difficult it would be to find one equal to Cardinal Hohenlohe, and doubtful as he was of a substitute achieving good results. At a later stage of the discussion, Prince Bismarck emphatically declared that he should always reject any treaty with Rome in which the Papacy might claim that certain state laws should not be binding upon a portion of the subjects of the empire. The motion for striking out the estimate for an envoy to the Pope was rejected, and the item was adopted by a large majority.

On May 1st, the University of Strasbourg was opened with great ceremonies, an occurrence in which all Germans took a profoundly patriotic interest, as it is expected that the university will greatly contribute to the revival of German sentiments in Alsace and Lorraine. The Oberpräsident of Alsace-Lorraine, Herr von Möller, after a brief allocution, read the charter of endowment, subsequently handing the original to the Rector, Dr. Bruch. The latter warmly returned thanks to the Emperor, the Imperial Chancellor, the First President, Dr. Roggenbach, and the Mayor of Strasbourg, after which he read a congratulatory address

from the German Parliament. After a hymn, specially prepared for the occasion, had been sung, Prof. Springer delivered a festive oration. Addresses were spoken by Prof. Waitz, in the name of nineteen German universities, which were represented by deputations, by Prof. Tomaschek, in the name of four German universities of Austria, and by Prof. Wyss, in the name of three universities of Switzerland. The proceedings were closed by a few words from Dr. Bruch. The hall was densely crowded.

With regard to the introduction of the Imperial Constitution into Alsace-Lorraine, the Government introduced a bill proposing to suspend it until January 1, 1874. The Federal Commissary Herzog pointed out, in the course of the debate, that Alsace-Lorraine was not yet ripe for the introduction of the Federal Constitution in its integrity, especially as the question of choice of nationality would have to be settled first. The councils-general would enter upon their functions in the course of the current year. The bill of the Government was opposed by the Catholic party and the party of Progress, while all the other parties favored it, and passed it by a large majority.

An important debate rose in the Reichsrath, on May 15th, on several hundred petitions, some of which advocated the expulsion of the Jesuits from the country; some, and these the majority, interceded in behalf of the order. Any measures against the order were strongly opposed by the Rev. Dr. Moufang, one of the leading prelates in the Diocese of Mayence, and by Herr Peter Reichensperger, a member of the Supreme Court of Appeal at Berlin, an accomplished writer on history and art, and for many years a leader of the Catholic party in the Prussian Diet. On the other hand, the Government was urged to proceed against the Jesuits in the interest of religious peace, by Privy-Councillor Wagener, one of the leaders of the Conservative party; by Prince Hohenlohe, late Bavarian premier, and brother of Cardinal Hohenlohe; by Herr Fischer, burgo-master of the town of Augsburg, and, like Prince Hohenlohe, a Roman Catholic; and, in conclusion, by the well-known Prof. Gneist, of the University of Berlin, who acted as chairman of the special commission which had been charged with reporting upon the petitions. The report lamented that, "as a consequence of the pro-papal tendencies until lately prevalent in the ministry, the number of convents has enormously increased. In 1865 we had 69; in 1864, 243; in 1866, 481; in 1869, 828. The number of persons shut up in these institutions, from 976 in 1855, had increased to something like 10,000 by 1869. In Belgium, where the same sort of unhealthy liberty prevails, it is even worse, the number of monks and nuns having increased from 12,000 in 1846 to over 20,000 in 1870. The House then adopted a resolution drawn up conjointly by a number of Conservative and Liberal members:

road, under the State authorities, rendered two reports. The majority declared that during the sixteen months from August, 1868, to December, 1869, while Mr. Hulbert was superintendent, the receipts of the road amounted to \$1,716,206.47, of which \$346,000 was paid over to the State Treasury; and that during the twelve months from January to December, 1870, when Foster Blodgett was superintendent, the receipts were \$1,464,737.01, of which only \$45,000 was paid over, while debts were contracted to the amount of \$600,000, in addition to various unascertained claims. It was said that in many cases money was drawn to pay the same claim more than once, and that, in many more instances, claims were paid which were exorbitant or fraudulent. Many unnecessary persons were employed in the service of the road, and wholly uncalled-for expenditures incurred. It is declared that the loss by mismanagement and fraud, under Mr. Blodgett, was not less than \$1,000,000. The committee appointed to investigate the lease of the road also made its report, which provoked considerable discussion. The subject was finally disposed of by the adoption of the following resolutions:

Resolved, That the investigation of the special committee, raised for the purpose of investigating and passing upon the fairness or unfairness of the lease of the Western & Atlantic Railroad, have failed to disclose evidence sufficient to support the charge of fraud in procuring the lease.

Resolved, That, in the opinion of the General Assembly, the lease of the Western & Atlantic Railroad secures to the State a certain sum for rental much larger than can be hoped for under political control.

Resolved, That the Governor be required to have the entire stock and outfit of the road appraised, and the appraisement made under order of the Governor shall stand in the place and stead of the present assessment.

Resolved, That, within ninety days from the date of the passage of this resolution, the present lessees shall each sign their present bond, that the question of their liability may be set at rest.

Resolutions were also adopted providing for the taking of an inventory of the property of the road, and for ascertaining its condition.

The committee appointed to investigate the alleged official mismanagement of Governor Bullock, made a long report, the principal points of which were to the following effect: That the Governor allowed Mr. Kimball, as financial agent of the State, to borrow money on the State's credit for his private use; that he transferred money belonging to the State in the Georgia National Bank, to his own private account, and permitted State money, in the same bank, to be used on Kimball's account; that he was guilty of fraud and corruption in the purchase of the Opera-House at Atlanta for the Capitol; that he subsidized the press by enormous and unnecessary contracts for printing, and purchased a newspaper for which he secured State patronage; that he granted pardons to criminals for money and political support; that he permitted the penitentiary to carry on a system

of plundering from the State, and shared in the proceeds; and was guilty of extravagance and corruption in nearly all his transactions. His part in the management of the Atlantic & Western Railroad, and in indorsing bonds illegally, being covered by the reports of other committees, is barely alluded to. No direct action was taken by the Legislature on this report.

This session of the Legislature continued till near the end of August, and passed 485 acts and 59 joint resolutions, but the bulk of them related to matters of purely local interest. Among the resolutions adopted was one requesting the members of Congress from Georgia to use their efforts to obtain an appropriation for the surveying and locating of a canal to connect the Atlantic Southern States with the Western States. A division of the State into nine congressional districts was made in accordance with the new apportionment act of Congress. A bill to regulate the time of holding elections, providing that State officers and members of the Legislature should be chosen on the first Wednesday of October, Congressmen on the Tuesday following the first Monday of November, and county officers on the first Wednesday of January, passed the Senate, but was lost in the House.

The Democrats of the State held a convention at Atlanta, June 26th, to appoint delegates to the National Convention at Baltimore, and adopted the following resolutions:

Resolved, That the Democratic party of Georgia stands upon the principles of the Democratic party of the Union, bringing into special prominence, as applicable to the present extraordinary condition of the country, the unchangeable doctrine that this is a Union of States, and that the indestructibility of equality with each other is an indispensable part of our political system.

Resolved, That, in the approaching election, the Democratic party invites everybody to coöperate with it in a zealous determination to change the present usurping and corrupt Administration, by placing in power men who are true to the principles of constitutional government and a faithful and economical administration of public affairs.

Resolved, That, in our opinion, the delegates to the Baltimore Convention should go unmolested by instructions, and should act with all the lights before them as they deem best for the good of the party and the welfare of the country.

Another convention was held on the 24th of July, for the purpose of making nominations for Governor and presidential electors. James M. Smith was nominated for Governor, and it was declared that the election of Greeley and Brown for President and Vice-President of the United States would be "conducive to the preservation of the rights of the States, to local self-government, and the protection of the individual liberty of the citizen." An invitation was also extended to "everybody" to coöperate with the Democratic party "in a zealous determination to change the present usurping and corrupt Federal Administration, by placing in power men who are true to the principles of constitutional

James M. Taylor

government, and to a faithful and economical administration of public affairs." An attempt to secure the coöperation of the "Liberal Republicans" was not successful, the committee of the latter, with whom negotiations were carried on, sending the following communication to the convention :

The committee of Liberal Republicans, whose communication is before the Democratic Convention, have conferred with the committee appointed by the convention who have expressed themselves as individually favorable to a union of the two elements, upon the just basis of giving to the Liberal Republicans a fair representation upon the electoral ticket according to their numbers, and they regret to learn from the Democratic committee that in their judgment it is impossible to carry such a measure through the convention without a serious rupture.

The Democratic committee have suggested that we harmonize with the Democracy of the State, without representation upon the ticket. We are enabled to appreciate the liberality of the invitation to unite with the Democracy, without such recognition. We are determined, however, that we will do no act which can in any way imperil the success of Greeley and Brown in this State, and while we protest against the spirit of illiberality which denies us representation upon the electoral ticket which is to be put before the people by those who have adopted our candidates for President and Vice-President, we will place no electoral ticket in the field, but will cast our votes for the Greeley and Brown electoral ticket without regard to the former political opinions of the individual electors, or the manner in which they have been brought before the people. But as to all matters connected with State elections we hold ourselves at liberty to cast our suffrage in such manner as our self-respect and our sense of duty to the country may dictate.

The Republicans of the State held their convention at Atlanta on the 21st of August, and nominated Dawson A. Walker for Governor. Presidential electors were also nominated, and the following resolutions adopted :

Resolved, That this convention, in the name of the Republicans of Georgia, hereby declares its devotion to the principles of the Republican party of the Union as declared by the National Convention at Philadelphia in May last, and proudly ratifies the nominations of Ulysses S. Grant for President, and Henry Wilson for Vice-President; commend those candidates to the people of Georgia as statesmen whose capacity, wisdom, and integrity have been proven by the severest tests, as worthy guardians of the public honor, and inflexible friends of Union, liberty, and equal rights.

Resolved, That the present General Assembly of Georgia, by enacting penal laws calculated to ensnare the innocent by its contrivances practically to wrest the ballot from the poorer citizens; by its faithlessness to the cause of popular education; by denying local government to citizens of certain municipalities, and by its general unfriendliness to the classes whose toil has largely built up the prosperity of the State, has demonstrated its unfitness for its high trust, and should be superseded by a body of more wisdom, justice, and moderation, and of more devotion to the welfare of the masses of the people.

On the following day, August 22d, the Democrats who did not favor the candidates nominated at Cincinnati and Baltimore, for President and Vice-President, held a convention at Atlanta, and appointed delegates to the National Democratic Convention to be held at Louisville, Ky., at the same time recommend-

ing the names of Charles O'Connor, of New York, and J. Proctor Knott, of Kentucky, as suitable candidates for President and Vice-President. The following platform, drawn up by Alexander H. Stephens, was unanimously adopted :

Resolved, That the Government of the United States is one formed by separate States; that it is one of limited powers, delegated by the States for specific purposes and objects set forth in the Constitution, and that it possesses of itself no original or inherent power whatever.

Resolved, That the Union established by the Constitution is a Union of the States, federal in its character, composed of States and thereby united, and is incapable of existence without the States as its constituent integral parts; that the indestructibility of the States, of their rights and of their equality with each other, is an indispensable part of this political system, and therefore the perpetuation of the Union in its integrity depends upon the preservation of the States in their political integrity; the Government of the United States being a Federal Republic, and not a consolidation of the whole people into one homogeneous nation.

Resolved, That the right of local State government, with the subjection of the military to the civil authority, and the security of the privilege of the writ of *habeas corpus* in time of peace, with the power to enforce the rights and promote the well-being of its inhabitants, by such means as the judgment of its own people may prescribe, and secured and guaranteed under the Constitution of the United States to the several States of the Union; and that, too, not "subject to any solemn constitutional obligation upon the part of the Federal Government of any kind whatever; but on the contrary, the Federal Government is under a solemn constitutional obligation not to interfere in these matters in any way, and, when it does so, it becomes a usurper of power, an oppressive tyrant, and an enemy to the liberties of the country."

Resolved, That the perpetuation of the Union, and the maintenance of the Government as both were established by the Constitution, and as both under the Constitution have been expounded in the foregoing resolutions, in conformity with the teachings of Jefferson, Madison, and Jackson, have ever been held as cardinal doctrines, of the Democratic party, and they are now reiterated with increased earnestness, under the solemn conviction that the only sure hope for the preservation of liberty rests in bringing back the administration of the Government to these principles, and in receiving it from the hands of those whose admitted usurpations and revolutionary measures now threaten the entire overthrow of the whole fabric of our system of free institutions, and the erection in their stead of a consolidated empire.

The election occurred on the 5th of November. The full vote cast for presidential electors was 138,906, of which 62,550 were in favor of the election of Grant and Wilson, 76,856 for Greeley and Brown, and 4,004 for O'Connor and Adams; majority for Greeley, 13,806. The total vote for Governor was 151,014, of which Smith received 104,589 and Walker 46,475; majority for Smith, 58,064.

There was comparatively little disorder in the State during the year. A riot occurred at Savannah on the 29th of July, which grew out of the persistent efforts of certain negroes to ride in street-cars, which had been previously reserved for white persons only. The negroes had been ejected from the cars by some of the passengers, and a conflict in the streets had

resulted. This, however, was speedily suppressed. There was some bloodshed, and a good deal of excitement, but no one was killed. One of the negroes, Avery Smith by name, brought a charge against three white men, concerned in ejecting him from the car, for conspiring together, and with others, "with intent to injure, oppress, threaten, and intimidate deponent, a colored citizen of the United States, and other colored persons, said persons also being citizens of the United States, with intent to prevent and hinder said deponent and said other colored citizens, whose names are unknown to deponent, from his and their free exercise and enjoyment of the right and privilege of riding in the cars of the street-car company, in the city of Savannah, said street-cars being run by an incorporated company, said company being public carriers of passengers, the right, privileges, and immunity of riding in said cars being a right, privilege, and immunity granted and secured to deponent and said other persons by the Constitution and laws of the United States, they being citizens of the United States."

The parties were tried before United States Commissioner H. C. Wayne, and discharged on the ground that the charge had not been sustained. In his decision the Commissioner said:

So far, then, as the court has been able to sift the evidence and bring it to the test of the law, the complainant had no right, privilege, or immunity under the Constitution or laws of Congress to be abridged. But, on the contrary, he stands before this court a deliberate violator of a legal regulation of the street-car company, and, *pro tanto*, a disturber of the public tranquility. Holding, moreover, a position of trust and emolument under the United States Government, he should have been the last to foment disturbance of the public peace; and, a comparative stranger to this community, besides, should have come among us bearing the olive-branch of peace, and not the firebrand of social discord. It was by such men as himself that the riots of the evening of the 29th of July, in this city, were originated. And justice to the truth of the inquest compels the court to add, though with regret, that the management of the road, by its timid course, must take its share of the responsibility for them.

In conclusion, it is a matter of gratification to the court to observe that none of our respectable colored citizens appear to have been mixed up in the scene that marred the fair fame of our peaceful city on the 28th and 29th of July last, but, that those disgraceful acts appear to have been conceived, promoted, and executed by bad men from other parts of the country, backed, however, it is true, unfortunately, by a few native ruffians; for there are ruffians among the colored people as well as among the whites, no race or color being exempt from the curse of ruffianism.

The official statement of the State finances on the 1st of January, 1873, places the public debt at \$8,186,500. The receipts of the Treasury, for the year, amounted to \$2,101,540.84; the disbursements were \$1,335,207.14; the balance on hand at the end of the year, \$766,133.70. The Treasurer estimated the amount to be raised, for the year 1873, at \$1,418,935. The sources of revenue will yield \$2,085,939. The valuation of taxable property is placed at \$234,492,468.

The State University appears to be in a flourishing condition. The number of students matriculated during the year was 317, and 46 were graduated at the last commencement. The income of the institution, for the year ending July 29th, was \$29,221.25, of which \$11,805 was derived from tuition fees. The College of Agriculture and Mechanic Arts has had 127 students. In July the sum of \$90,202.17 was paid into the Treasury from the sale of scrip for Government lands for the benefit of this institution.

The whole amount of school revenue prior to October 1st was \$492,924.27. The number of patients in the Lunatic Asylum is 509. Of these 423 are white, and 86 colored; 379 are lunatics, 74 idiots, and 56 epileptics. The expenses for the year were \$160,359.40, including \$61,916.53 paid on special appropriations for completing buildings and for other improvements. The Academy for the Deaf and Dumb has had 61 pupils during the year. The Academy for the Blind had 39 pupils, and the amount disbursed for their support during the year was \$10,759. The number of convicts in the penitentiary is 530; 44 have been discharged, 21 have escaped, 14 have died, one has been pardoned, one was killed by accident, and one was killed by the guard.

According to the census of 1870, there were 6,831,856 acres of improved land, 12,928,084 of woodland, and 3,888,001 of other unimproved land. The cash value of farms was \$94,559,468, of farming implements and machinery, \$4,614,701; total amount of wages paid during the year, including value of board, \$19,787,086; total (estimated) value of farm productions, including betterments and additions to stock, \$80,890,228; orchard products, \$352,926; produce of market-gardens, \$193,266; forest products, \$1,281,628; home manufactures, \$1,118,080; animals slaughtered or sold for slaughter, \$6,854,382; value of all live-stock, \$30,156,317. There were 81,777 horses, 87,426 mules and asses, 231,310 milch-cows, 54,332 working-oxen, 412,261 other cattle, 419,465 sheep, and 988,566 swine. The chief productions were, 308,890 bushels of spring and 1,818,127 of winter wheat, 82,549 of rye, 17,646,459 of Indian-corn, 1,904,601 of oats, 5,640 of barley, 22,277,880 pounds of rice, 288,596 of tobacco, 473,934 of cotton, 846,947 of wool, 410,020 bushels of peas and beans, 197,101 of Irish and 2,621,562 of sweet potatoes, 21,927 gallons of wine, 4,499,572 pounds of butter, 10,518 tons of hay, 553,192 gallons of cane molasses, and 474,027 of sorghum, 610,877 pounds of honey, and 31,233 of wax.

The total number of manufacturing establishments was 3,836, employing 405 steam-engines of 10,826 horse-power, 1,729 water-wheels of 27,417 horse-power, and 17,871 hands, of whom 15,078 were males over 16, 1,493 females over 15, and 1,295 youth. The amount of capital employed was \$13,930,125;

wages paid during the year, \$4,844,508; materials, \$18,583,731; products, \$31,196,115.

The total number of religious organizations was 2,873, having 2,698 edifices, with 801,148 sittings, and property valued at \$3,561,955. The principal denominations were:

DENOMINATIONS.	Organists/ae.	Sittings.
Baptist.....	1,860	889,165
Christian.....	84	10,285
Congregational.....	10	2,800
Episcopal.....	35	10,000
Lutheran.....	11	3,000
Methodist.....	1,948	827,843
Presbyterian.....	134	49,575
Roman Catholic.....	14	5,500

The whole number of libraries was 1,735, with an aggregate of 467,232 volumes. Of these, 32, with 7,765 volumes, were private, and 545, with 162,851 volumes, were other than private. There were in the State 110 newspapers and periodicals, with an aggregate circulation of 150,987; 15,539,724 copies were annually issued. There were 5 tri-weekly, circulation 3,600; 9 semi-weekly, circulation 5,100; 73 weekly, circulation 88,837; 2 semi-monthly, circulation 700; 6 monthly, circulation 21,950, and 1 quarterly, circulation 1,000.

GERMANY, an empire in Europe, reëstablished January 18, 1871. The Emperor William I. was born March 22, 1797. He is a son of King Frederick William III. and Queen

Louisa, and was married June 11, 1829, to Augusta, daughter of the Grand-duke Charles Frederick of Saxe-Weimar. The heir-apparent, Frederick William, born October 18, 1831, has the official title of Crown-Prince of the German Empire and Crown-Prince of Prussia. He was married, January 25, 1858, to Victoria, Princess Royal of Great Britain and Ireland, born November 21, 1840. His children are: Prince Frederick William, born January 27, 1859; Princess Charlotte, born July 23, 1860; Prince Henry, born August 14, 1862; Princess Victoria, born April 12, 1866; Prince Waldemar, born February 10, 1868; Princess Sophia Dorothea, born June 14, 1870; Princess Margareta, born April 22, 1872. Imperial Chancellor (Reichskanzler) Otto, Prince of Bismarck-Schönhausen. President of the Imperial Chancery (Reichskanzler-Amt), Delbrück, Minister of State. The "Imperial Supreme Commercial Tribunal" (Reichs-Ober-Handels-Gericht) is the supreme court in commercial affairs for all the states of the German Empire, except Bavaria; and it is, at the same time, the supreme court for Alsace-Lorraine. It has its seat in Leipzig.

The following table exhibits the area and population of the states belonging to the German Empire, the number of representatives of every German government in the Federal Council, and the number of deputies who represent each state in the Reichstag:

STATES.		Square Miles.	Population, 1871.	Votes in Federal Council.	Deputies to the Reichstag.
1. Prussia (including Lauenburg).....	Kingdom.	135,806	24,691,203	17	236
2. Bavaria.....		99,298	4,961,403	6	48
3. Saxony.....		5,779	2,556,244	4	28
4. Württemberg.....		7,532	1,818,541	4	17
5. Baden.....		5,870	1,461,428	3	14
6. Hesse.....		2,964	852,843	3	9
7. Mecklenburg-Schwerin.....		5,180	557,897	2	6
8. Saxe-Weimar.....		1,404	286,183	1	3
9. Oldenburg.....		2,469	316,641	1	3
10. Mecklenburg-Strelitz.....		1,052	96,362	1	1
11. Brunswick.....	Duchies.	1,425	311,715	2	3
12. Saxe-Meiningen.....		966	187,884	1	2
13. Saxe-Altenburg.....		510	142,122	1	1
14. Saxe-Coburg-Gotha.....		760	174,839	1	2
15. Anhalt.....	Principallies.	1,026	208,354	1	2
16. Schwarzburg-Rudolstadt.....		374	75,593	1	1
17. Schwarzburg-Sondershausen.....		332	61,296	1	1
18. Waldeck.....		483	56,218	1	1
19. Reuss-Greitz (older line).....		106	45,094	1	1
20. Reuss-Schleitz (younger line).....		330	89,093	1	1
21. Schaumburg-Lippe.....		171	32,051	1	1
22. Lippe-Detmold.....		438	111,153	1	1
23. Lübeck.....		107	52,158	1	1
24. Bremen.....	Free Cities.	98	122,565	1	1
25. Hamburg.....		156	338,974	1	3
26. Alsace-Lorraine (imperial country).....		5,608	1,549,459
Total.....		211,469	41,053,196	58	382

Both the Federal Council (Bundertag) and the Reichstag meet in annual session, convoked by the Emperor. The Reichsland of Alsace-Lorraine, separated from France by treaty of May, 1871, and provisionally unrepresented in the legislature of the empire, will have, when admitted, one member in the Federal Council, and fifteen deputies in the Reichstag. The subjects of the German Empire who are of a non-German nationality are divided as follows:

NATIONALITY.	Inhabitants.	Percentage.
Polish.....	2,450,000	6.5
Vindish.....	140,000	
Czechic.....	50,000	
Lithuanian.....	150,000	0.4
Danish.....	150,000	0.4
French.....	230,000	0.7
Total of population of non-German nationalities.....	3,170,000	8.
Total of population of German nationality.....	37,800,000	92.

MINIMUM BANK RATE OF DISCOUNT.	Bullion held by the Bank.	Notes held by the Public.	Reserve of Notes.	Price of Consols.
January 1st. Bank Rate stood at 3 per cent. from December 14, 1871.....	£24,636,575	£25,645,410	£18,901,165	...
April 4, 3½ per cent.....	21,760,815	26,022,085	10,738,780	92½
April 11, 4 per cent.....	20,380,275	26,011,470	9,818,805	92½

September 28, 4½ per cent.....	21,088,635	25,690,830	10,347,795	92½
October 8, 5 per cent.....	20,634,405	27,134,755	8,469,650	92½
October 10, 6 per cent.....	19,734,480	26,651,960	8,069,500	92½
November 9, 7 per cent.....	19,151,480	25,880,180	8,321,300	...
November 28, 6 per cent.....	21,999,515	24,614,945	12,834,570	92½
December 12, 5 per cent.....	22,451,795	24,410,560	13,041,225	91½

The variations in the bank rate of discount were fourteen in number during the year 1872; the lowest rate being 3 per cent., on June 20th, and the highest 7 per cent., on November 9th.

GREECE, a kingdom in Europe. King, George I., second son of the King of Denmark, born December 24, 1845; accepted the crown offered to him by the Greek National Assembly on June 5, 1863; married on 15th (new style 27th) of October, 1867, to Olga, daughter of the Grand-duke Constantine of Russia; Crown-prince Constantine, Duke of Sparta, born 21st July (new style, 2d of August), 1862.

The area of Greece is 19,353 square miles. The total population of the thirteen nomarchies into which the kingdom is divided, according to the census of 1870,* was 1,437,026, of whom only 5,261 were foreigners. Adding the army, consisting of 12,420 men, the navy, numbering 1,315 men, and 7,183 sailors abroad, the total population of the kingdom was 1,457,894. The nomarchies are subdivided into eparchies. The table on the following page gives the population of nomarchies and eparchies, according to the censuses of 1860 and 1871.

According to the census, the number of the males (754,176) shows a remarkable excess over the females (703,718). The increase since 1861 for the kingdom in general is only one per cent.; in the old provinces it is one for every 85, while in the Ionian Islands it has, since the time of the last census of the islands in 1865, only been one for every 643, and several islands even show a decrease of population. The population of the largest cities in 1871 was: Athens, 44,510; Syra (Hermopolis), 20,996; Patras, 19,641; Zante, 17,516; Corfu, 15,452. Nearly the entire population belongs to the Greek Church; only 12,535 belong to other Christian churches, and 3,499 to other religions. 67,941 inhabitants do not speak the Greek language.

The revenue for the year 1871 amounted to 33,921,000 drachmas; the expenditures to 34,498,262; the public debt to 242,487,893. The

* A full account of the results of the census may be found in "Rapport sur l'état de la statistique en Grèce, présenté au congrès de St. Petersburg," par A. Mausolas (Athens, 1872).

imports in 1868 were valued at 88,400,000 drachmas, the exports to 54,540,000. The movement of shipping embraced 18,193 sea-going vessels, of an aggregate tonnage of 2,788,795, and 154,419 coasting-vessels of an aggregate tonnage of 5,676,674. The commercial navy, on December 31, 1868, numbered 5,422 vessels, of 334,901 tons. The first railroad in Greece (from Athens to Piræus and Phalerus) was opened in January, 1869; it has a length of 12 kilometres (one kilometre=0.62 mile.) The second road, from Piræus to Lamia, was begun in 1872; it will be 220 kilometres long. The aggregate length of the telegraph-lines is 1,600 kilometres.

On January 5th the King dismissed the ministry of Zaimis, and intrusted Bulgaria with the formation of a new cabinet. On January 7th the Chamber was informed by Bulgaria that the new ministry which had been formed of members of the two parties, Kumundaros and Bulgaros, was composed as follows: Presidency and Foreign Affairs, Bulgaria; Interior, Nikolopoulos; War, Drakos; Navy, Bubulis; Finances, Maumichapulos; Justice, Agamemnon Metaxas; Worship, Notaros. On January 9th the Chamber was dissolved by royal decree.

The elections for the new Chamber (which last in Greece four days, one of which must be Sunday) were finished on the 12th of March. Party contests were very violent, and in some districts serious disturbances took place, in which twenty persons, among them a candidate and a mayor, were killed, and many more severely wounded. The King opened the Chamber of Deputies on April 5th. The speech from the throne announced that the relations of Greece with all foreign powers were friendly, and expressed a hope that they would remain undisturbed. The King likewise dwelt on the satisfactory condition of the public safety, notwithstanding the agitation caused by the elections. The Chamber devoted more than two months to examining disputed elections, and to adjusting party and personal interests. It was not until the 19th of June that it was organized by the election of M. Spiro Milio as president.

The most important event in the history of Greece during the year 1872 was the compli-

cation arising between its Government and France and Italy concerning the mines of Laurium. This question has not only been the cause of the downfall of several Greek ministries, but, continuing unsettled at the close of the year 1872, threatened to bring the country into a most dangerous position. The following is a brief statement of the Laurium question: In May, 1863, a Frenchman and an Italian disembarked in the bay of Ergastiria, or, as it is written in our maps, Agastira, at the foot of the southern promontory of Attica, where Cape Colonna stretches seaward, with the columns of the Temple of Sunium visible in the distance. As the representatives of one of the most important commercial houses of Marseilles, and the proprietors of valuable mines in Spain and Sardinia, they came to examine the present condition of those ancient lead, zinc, and antimony deposits, which, according to Pliny, were discovered by Erichonius, King of Athens, in the fifteenth century B. C., which were being successfully worked in the days of

Themistocles, and which, still later, under Pericles, seemed to have obtained their maximum development. At the time of Strabo they were considered exhausted, and the last notice we have of them, by Pausanias, 174 years after Christ, speaks of them as a fact of by-gone history. The two explorers cleared away the superincumbent rubbish, and, descending into one of the excavations of the original mines, were the first human beings who had entered it for 2,000 years. Here they found an iron pick-axe without its handle, an earthen-ware lamp, and rude tracings with some sharp instrument, now filled with a calcareous deposit, and they

* The island of Kythira (Cerigo) was, after the annexation of the Ionian islands to Greece, at first formed with Zante into a nomarchy; in the census of 1865 it appears united with the nomarchy of Lakonia (probably on account of its geographical situation); according to the census of 1870 it is an eparchy of Argolis and Korinthia, probably in consequence of the more convenient steam-boat connection with Cerigo and Crete.

† Levkas and Itaki constituted, until 1867, a nomarchy of their own. Their incorporation with the nomarchies of Kerkyra and Kephallinia reduces the number of nomarchies from 14 to 13.

perceived the value of the mounds of *débris* which the old miners had rejected, and, without further delay, entered into negotiations with the *Parèdre* and *Chinótis*, or village headman and his council. They found that some of the property was in dispute between the village and the Government. They completed the purchase with the village, determining to make it right with the Government afterward. A treaty of purchase was formally made, and the whole village turned out to celebrate the event in rejoicings and festivities. The explorers returned to Athens and found no difficulty with the Government, who guaranteed them possession of the property, irrespective of the results of the pending dispute, upon the payment of a further sum of 10,800 francs. At the same time they obtained from the Governor the concession of the right of exploring the ancient mines existing over a certain extent of the Commune of Laurium, and the right to the ores of argentiferous galena which exist in their neighborhood. Having great experience and abundant capital at their disposal, they soon realized their most sanguine expectations. In a few years a town of 8,000 inhabitants sprang up on the shores of the once-deserted bay. Ships from all countries and in considerable numbers anchored in its waters; England, France, and Italy, supplied mechanics, blacksmiths, carpenters, etc.; labor flocked from all parts of Greece and the islands; upward of forty miles of macadamized road, the best in Greece, were constructed, and tramways and a railway seven miles long connected the mines with the port. This sudden conversion of a desert into a source of such vast wealth excited the cupidity alike of the Greek Government and the brigands to whom it grants its protection. One, signing himself Kytzos, Prince of Attica, demanded 50,000*f.* of black mail from the company as the price of leaving them alone, but he was killed before he had an opportunity of putting his demands into execution. Spanos, who succeeded Kytzos and Arranitakis, also attempted on one occasion to seize the Director-General of the Mines, and a pitched battle was on the point of being fought between a Greek company and the Franco-Italians, which was only averted by the arrival of troops from Athens. Public feeling at last got so worked up in Greece at the sight of a number of foreigners exporting their mineral wealth and pocketing the profits, that the Government was forced to pass a law declaring all scoria and *débris* of old mines Government property, and giving the law a retrospective effect, on the strength of which they claimed not merely an exorbitant tax from the Laurium Company for the future, but a sum of 2,000,000*f.* for back payment for the eight years before the law was made. This the company refused to pay, and the diplomatic agents of the two Governments found themselves compelled to interfere to protect their

subjects from so extortionate a demand. The Greeks continued more obstinate as they perceived the richness of the prize won by the foreigner, the value of which was estimated by their own official reports at a milliard of francs. The company, in despair of being able to continue to work their property in security, offered at last to sell for 14,000,000*f.* to the Greek Government what the latter had valued at a milliard. An agreement to this effect was made with the ministry, which promised to bring in a bill authorizing the sale. At the last moment, however, it perceived no such bill would be carried, and attempted to postpone it. The King would not permit this breach of faith, and the ministry, rather than face the inevitable defeat which it would entail, resigned. He was, in July, succeeded by Deligeorgis, who has written a memorial defending the law and receding from the agreement of his predecessor. He has proposed, indeed, to abolish the law, and let the question be tried by the judges. His cabinet was composed of Ypsilanti, as Minister of Foreign Affairs; Christides, Minister of Finances; Grivas, Minister of War; Derosso, Minister of the Navy; Zambelli, Minister of Public Worship. In August, the Ministers of Foreign Affairs and Public Worship resigned, and were replaced by M. Spiliotakes and M. Mavrokordatos. The French and Italian ministers (in September) decidedly rejected a circular, in which the Greek Government explained its views, declared its discussion closed, and proposed that the matter should be submitted to arbitration or arrangement.

The following is an accurate summary of the "identical note" recently presented by the representatives of France and Italy, at Athens, to the Greek Government, in reply to the statement drawn up by the latter with respect to the Laurium affair: The Greek Government, by a new interpretation of the law of 1871, sought to remove the question from the region of diplomacy by referring it to the decision of the law courts. The French and Italian representatives cannot consider that view as a proper mode of arrangement. They remind the Greek Government that the Laurium Company was in peaceable possession of the lands conceded to them when that Government, without any valid reasons, took upon itself to forbid the working of the *ecvolades* by resorting to exceptional measures and arbitrary resolutions. In the face of such proceedings France and Italy had a right to intervene diplomatically on behalf of their respective subjects, the victims of a positive confiscation. The law of 1871 deprived the Greek courts of all power of deciding the question, and a reference to those courts would be absolutely illusory, for on the sitting of the Chamber, on the 27th of April, 1871, M. Deligeorgis obtained the adoption of the law in its existing terms, "to close the door against any judicial interpretation." Thus, the Greek Government,

which proposes to obtain a judicial interpretation of this law, proposes an aggravation of the difficulty, as France and Italy absolutely refuse to assent to such a course. If Greece were willing to accept an arbitration, the question might have been settled long since; but Greece has refused to do so. Neither will the Greek Government come to an understanding with France and Italy, and therefore it must effect an arrangement with the parties interested. The "identical note" goes on to show the absolute necessity for diplomatic intervention—an intervention which can only cease when the affair is finally arranged. The Ministers of Foreign Affairs and Public Instruction now urged that some arrangement should be arrived at relative to this question; but M. Deligeorgis, maintaining a contrary opinion, the two ministers resigned (November 10th), and M. Deligeorgis personally assumed their duties. France and Italy asked the good offices of the great powers with the Greek Government, in order that Greece should accept arbitration. In December, the ministers of Austria, Germany, and Russia, notified to the Greek Government that it should terminate the Laurium Mines difficulty, in accordance with the just demands of France and Italy, adding that, in case Greece should decline this course, she need not expect to be in any way supported.

GREELEY, HORACE, an American reformer and journalist, the founder of the *New York Tribune*, and the candidate of the Liberal Republicans and Democrats for the presidency, in 1872, born in Amherst, N. H., February 3, 1811; died near Pleasantville, Westchester County, N. Y., November 29, 1872. He was the third of the seven children of Zaccheus Greeley. His father and mother were both born a few miles eastward of Amherst—the latter in Londonderry, of Scotch-Irish lineage (her maiden name was Woodburn), the former in that town or Pelham, of English extraction; but both families had long been settled in that region—the Woodburns since 1728. All his ancestors, so far as there exists any remembrance, were farmers, the Greeleys being generally poor, the Woodburns in comfortable circumstances. Mr. Greeley spent much of his early childhood with his maternal grandfather, and was first sent to school from his grandfather's house. Even in his infancy he showed a great fondness for books, and great aptness in acquiring the rudiments of education, so that, when he was ten years old, like most precocious children, he was the wonder of the neighborhood. When not quite ten years of age, his father lost his little property in New Hampshire, and removed to Westhaven, Vt., near the head of Lake Champlain, where he remained nearly six years. The first two years were employed in land-clearing upon contract, with the aid of his two sons; the next two in a saw-mill, while the boys worked on a small, poor farm; the residue in clearing and farming upon

shares. These occupations took much of young Greeley's time, but he was still able to devote himself to the acquisition of knowledge, and he read with avidity every thing in the shape of a book or newspaper which could be found in the neighborhood. When but eleven years old, hearing that an apprentice was wanted in the newspaper-office at Whitehall, he accompanied his father to the printer's, in hope of obtaining the position, but was rejected on account of his extreme youth. He went home greatly cast down, but in the spring of 1826 he entered the office of the *Northern Spectator*, in East Poughkeepsie, Vt., as an apprentice. His father, meantime, was about starting for the West, in search of a new home, and finally settled in the forest region in the northern part of Erie County, Pa., on the border of the State of New York. Horace diligently applied himself to learning his trade, of which he soon became master in all its branches. He remained in Poughkeepsie a little more than four years, when, after spending a short time at his father's house in the wilderness, he obtained employment in a newspaper-office in Erie. Here he made many friends, and was offered a partnership in the business, although only a young man of twenty. He thought best to decline the proposal, and, as work afterward fell off, he decided to take a fresh departure, and seek his fortune in the great metropolis. After paying a farewell visit at his father's, and dividing with him his earnings at Erie, with twenty-five dollars in his pocket, and very little extra clothing in his bundle, he set his face toward New York. He arrived in this city on the 17th of August, 1831, when the midsummer heat was at its height. He had never before seen a city of even 20,000 inhabitants, nor gazed upon a sea-going vessel. The spectacle of so many square miles of stately buildings, with the furlongs of masts and yards, aroused a feeling of astonishment and wonder akin to awe. He had completed his twentieth year the February before; tall, slender, and ungainly, with ten dollars in his pocket, and a scanty store of summer raiment, mostly on his back, the pale-faced youth did not command a cheerful prospect of immediate success. After searching in vain for a suitable boarding-house, he at length found quarters in an obscure hostelry near the North River. His first business was to find work at his trade. Early in the morning he began to ransack the city in search of employment. In the course of two days he had visited more than half the printing-offices in New York, without the slightest gleam of success. His youthful appearance and rustic ways were not in his favor. When he called at the *Journal of Commerce*, its distinguished editor, Mr. David Hale, frankly told him that he believed him to be a runaway apprentice from some country printing-office, a presumption which, though erroneous, might, under the circumstances, be deemed excusable. Thoroughly wearied with

his two days' disconsolate quest, he resolved to leave New York while a little money still remained in his pocket. He was frightened by the prospect of the almshouse, which stared him in the face, and wished to make his escape while the chance was yet left. In the evening, however, he made the acquaintance of some young Irishmen, who had called at his landlord's in their stroll about town. Upon hearing that he was a wandering printer in pursuit of work, they at once took an interest in his affairs, and directed him to a place where he could find employment. This was the printing-office of Mr. John T. West. The work was so difficult that no printer acquainted in the city could be induced to accept it. It was the composition of a miniature New Testament, with numerous marginal references, and in a curiously intricate style of typography. No other compositor could be persuaded to work on the book for more than two or three days, and Mr. Greeley, accordingly, had it nearly all to himself. By diligent type-setting from twelve to fourteen hours of each day, he could earn, at most, not over six dollars a week.

After several changes which did not greatly improve his circumstances, in January, 1832, Mr. Greeley formed an engagement with the *Spirit of the Times*, a weekly journal, devoted to sporting intelligence, and edited by Mr. William T. Porter. The foreman of the office was a young man named Francis Story, with whom Mr. Greeley soon contracted an intimate friendship. Urged by his solicitations, he consented to form a partnership with him for the purpose of conducting the business of job-printing. They soon took a contract for printing a cheap daily newspaper, to be sold about the streets, at that time a novel idea. The first number of the paper, which was conducted by Dr. H. D. Shepard, was issued on the 1st of January, 1833. It fell almost still-born from the press. The day was one of the coldest of the season, and the streets were obstructed by a mass of snow, which had fallen the night before. No publicity had been given to the enterprise. The editor was incompetent to his task, and in less than a month the whole enterprise came to an untimely end. The printers were saved from bankruptcy by the intervention of an eccentric Englishman, who had conceived a fancy for journalism, and was persuaded to purchase the wreck of the attempted daily. After a few issues he threw up the experiment, but the money which he had paid to the young printers preserved them from further embarrassment. Meantime, their job-printing business continued to prosper; there was no lack of work, when the firm was suddenly dissolved by the death of Mr. Story, who was drowned while bathing in the East River. His place, however, was soon supplied by the accession of Mr. Jonas Winchester; and in the spring of 1834, without any premonitory flourish of trumpets, the two young printers

issued the first number of the *New-Yorker*, a weekly journal, devoted to literature, political intelligence, and general news. The paper was edited by Mr. Greeley, while his partner took charge of the general business of the printing-office. For the seven years and a half of its existence, the *New-Yorker* sustained a high reputation for its literary excellence, the fairness and impartiality of its criticisms, the accuracy and extent of its intelligence, and the elevated tone of its general discussions. Its columns were not only under the immediate supervision of Mr. Greeley, but the editorial articles were written, and the admirable selections which contributed so much to its celebrity were, for the most part, made, by his own hand. The paper rose from scarcely a dozen subscribers to more than nine thousand, although, as it was conducted on the vicious credit system, and, consequently, lost large sums by bad debts, it never became a pecuniary success. In 1838 Mr. Greeley became the editor of the *Jeffersonian*, a cheap weekly newspaper, established to maintain the Whig ascendancy in the State of New York, in the election-campaign of that season. It was conducted with great moderation of tone, but with signal energy and efficiency. It attained a circulation of 15,000 copies, and presented an admirable example of successful political discussion, without passionate heat or personal invective. During the canvass of 1840, which resulted in the election of General Harrison to the presidency, Mr. Greeley conducted the *Log Cabin* from May to November, when it expired by its own limitation. In about a month, however, its publication was resumed as a family political paper, and continued for one year, when it was merged in the *Weekly Tribune*. Of the *Log Cabin* Mr. Greeley was sole editor and publisher. Its circulation was entirely unprecedented at that time. The first issue consisted of 80,000 copies, but before the close of the week there was a call for 10,000 more. It soon ran up to 80,000, and would doubtless have attained a still wider circulation had the publisher possessed the present facilities for printing and mailing.

The first number of the *Daily Tribune* was issued on April 10, 1841. It was a small sheet, and sold at the price of one cent a copy. In the following autumn, the *Weekly Tribune* was commenced, and with these journals his name was ever after identified. His energy, talent, and experience, and \$1,000 borrowed from his friend James Osgeshall, were the only capital upon which the paper started. It succeeded, while hundreds of other ventures equally promising failed; but it did not succeed without difficulty. The publication office was at No. 30 Ann Street. The list of subscribers numbered six hundred names. Five thousand copies of the first number were printed, and Mr. Greeley afterward acknowledged that he found difficulty in giving them away. The expenses of the first week were

\$525, the receipts \$92. After four months Mr. Thomas McElrath became a partner in the paper, and at the end of the first year its success was established. The cardinal idea of Mr. Greeley, in the establishment of the *Tribune*, was, the publication of a journal which should be equally free from narrow partisanship and timid neutrality. He took his stand on the independence of the daily press. Avoiding the fierce intolerance of party spirit, on the one hand, and a tame servility to public opinion on the other, he aimed to hold a position between those extremes, expressing his convictions with frankness and promptitude on all public measures, but not avoiding the exposure of errors on the part of those with whom, in the main, he agreed. With these views Mr. Greeley had completely identified his name with the influence of his journal. To secure its beneficent power was the chief purpose of his life. No prize, in his estimation, was of such precious worth as its efficient action in aid of sound and lofty principles, of the advancement of truth in religion and science, of the liberal education, the material prosperity, and the social happiness of the whole American people. It would be too much to say of Mr. Greeley, or of any journalist of our times, that he had succeeded fully in attaining to this lofty ideal of the mission of the daily journal; but it is certain that his views of the true character of journalism grew wider and loftier with each year of his life, and that he struggled with ever-increasing zeal to realize them. His aspirations in this direction found a voice in the eloquent and often-quoted paragraph from his autobiography: "Fame is a vapor; popularity an accident; riches take wings; the only earthly certainty is oblivion; no man can foresee what a day may bring forth; while those who cheer to-day will often curse to-morrow; and yet I cherish the hope that the journal I projected and established will live and flourish long after I shall have mouldered into forgotten dust, being guided by a larger wisdom, a more unerring sagacity to discern the right, though not by a more unfaltering readiness to embrace and defend it at whatever cost; and that the stone which covers my ashes, may bear to future eyes the still intelligible inscription, 'Founder of the *New York Tribune*.'"

Mr. Greeley was elected to Congress in 1848, to fill a vacancy, and served in that body from December 1st of that year, to March 4, 1849, distinguishing himself chiefly by his endeavors to reform the abuses of the mileage system. But he failed to make a marked figure in the House of Representatives, and never afterward was a member of any deliberative body, except the late Constitutional Convention of New York. The editorial chair and the lecture-room were his proper spheres, and in these he had the most influence, and exerted the greatest power. It was more than twenty years after Mr. Greeley had been a constant writer for the newspaper press, before he ven-

tured to publish a volume. This was his "Hints toward Reforms" (1850), consisting chiefly of lectures and addresses which he had delivered before various literary associations within the preceding six or eight years. They comprise the maturest thoughts of the writer on the conditions of social progress, and elucidate his convictions on the leading topics of reform, to which he had largely devoted the energies of his life. His next work, "Glances at Europe," relating some of his experiences in foreign travel, was published in 1851, and was followed in 1859 by his "Overland Journey to California," a record of his impressions from scenes that were even then passing away, and which have now for the most part given place to new and improved relations. A work of more elaborate preparation was, "The American Conflict" (1864), relating the history of the recent civil war, and tracing its causes to the influence of slavery on the politics of the country. The point of view from which this work is written was, the conviction of the divine government of the world by immutable moral laws, and of the certainty of retribution as consequent upon every compromise with evil. It is distinguished for its fulness of detail, the fairness of its judgments, and its acute analysis of the causes of political events. Among his writings, the brief volume on the principles of political economy of which he was always the ardent advocate, and the narrative of his personal experience as a practical farmer, "What I Know about Farming," a work which, though its title has afforded a vast amount of amusement to the would-be-wits of the newspapers, is really a work of decided merit, have met with a large share of popular favor, and enhanced his influence among the intelligent reading-classes. His most interesting work is doubtless the "Recollections of a Busy Life" (1869), in which with inimitable *naïveté* he relates the successive steps by which he advanced from the obscurity of a country printing-office to his recent position among the eminent men of the age. Mr. Greeley had twice visited Europe: the first time to testify before a parliamentary commission; the second, to attend the International Exposition in Paris, in 1855-'56. On this latter occasion, he had his only experience of prison-life. A Monsieur Lechesne, a sculptor, had sent a statue to the New York Palace Exhibition, 1852, which had been broken and destroyed. Hearing that Mr. Greeley was in Paris, the sculptor caused his arrest, as a director and representative of the Crystal Palace Association, on a claim for \$2,500 for the broken statue. As bail could not be readily obtained in a strange city upon short notice, Mr. Greeley had no alternative but to go to jail, and to jail he went. He was soon visited by Mr. Mason, the American ambassador, and other friends, and a lawyer was secured for him. It was shown that the effects of the association were in the hands of a receiver, and that Mr. Greeley was not personally liable under the laws of

New York, proofs of which secured his release, and he left the prison with the quaint comment that his last opportunity for learning French had passed away. Mr. Greeley began his political career as a Whig, and, though denying the right of the party leaders to fetter his conscience, he acted with that party generally, until the formal organization of the Republican party in 1855, when he gave in his allegiance to it, having, indeed, been one of its founders. But he was too independent to be bound by party harness, and on minor issues often bolted from the behests of the leaders. These bolts were, however, never for either party or personal ends, but from a conviction, always honest if sometimes mistaken, that the cause of right would be subserved thereby. He sustained the war and President Lincoln (whose nomination, indeed, he had done much to bring about), but he did it after his own fashion. He certainly committed some errors, but his heart was evidently in the right place; and, before long, it was fully understood that the *Tribune* was the vigorous defender of the Union, and the earnest assailant of all who sought its overthrow. Still, Mr. Greeley loved peace, and when he saw, or thought he saw, an opportunity to terminate the long and bloody strife, he was swift to try to improve it. When the war was over, he retained no malice, but sought fairly and openly, and against much bitter hostility, the pacification and restoration of the whole country. His consenting to be one of the bondsmen of Jefferson Davis was at the time a very unpopular act, and undoubtedly cost him the senatorship (a position which he had long desired, from honorable motives), but it was done from the belief that it was right, and without a moment's hesitation. With each year, however, he had become more impatient of partisan dictation, more convinced of the corruption which was permeating all parties, and was not probably sorry for the opportunity (without any personal motive in the beginning) to bolt from those partisan leaders, under whose whip and spur he had long been restive. That he expected the Cincinnati nomination (however much he might have desired it), is hardly probable; that, having received it, there was but one course for him to pursue—the one he did pursue—must be obvious to every candid man. The canvass was one of exceptional bitterness, even ferocity in some quarters, but his own part in it was characterized by dignity, ability, and a measure of courtesy as undeserved as it was unexpected, even by his friends. Its sad ending is a painful commentary on the frailty of human life; the sickness and death of his wife, the latter event occurring but a week before the election; his withdrawal from the canvass in September, to watch by her dying bed; his deep grief; the greatness of his defeat; the struggle of the overworn, overtasked brain to still go on with its weary round of duties; the wreck of a noble intellect; the

death scene, the hastening of even his bitterest foes to do honor to the dead—these are all matters of record. The sad fact remains that, whatever may have been his qualifications or want of qualifications for the presidency, the presidential canvass caused us the loss of the most active journalist of the day. His traits of personal character are best described in the words of one whose intimate associations with him for years amply qualified him to speak of them:

The character of Mr. Greeley has been held too long in a conspicuous light before the public to require any formal or elaborate analysis in this place. No American citizen was probably known to a greater number of persons. Although the recipient of few public offices, his life was, emphatically, a public one. One of the common people, by birth and education, himself, he lived with the people, and before the people. One of his greatest delights was in popular discussion. He never shrunk from argument, and loved to measure the minds of other men with his own. He had no concealment, no disguises, no subterfuges; he carried his heart upon his lips; his thoughts and feelings must have vent; and so transparent was his nature, that, in the utterance of his convictions, he did not always pay sufficient court to the conventional proprieties of time and place. He was a man of wide, if not intimate, companionship. He was at home in the society of a great variety of minds. No diversities of culture, or taste, or even of opinion, impaired the cordiality of his friendships. His closest ties were often with men whose pursuits he did not share, whose principles he did not adopt, whose habits of thought, perhaps, he did not even fully comprehend, but over whom he exerted a powerful attraction, by the subtle magnetism of his character. His own sympathies were rather with the great masses of humanity, than with the peculiar traits that constitute the essence of personality. He was more apt to look at men in the light of effective forces, grouping them according to their respective energies, than to study the expression of the inner and individual qualities which distinguish them from one another. He habitually asked what a person could do, rather than what he was, estimating the man less by his intrinsic being than his incidental activity. His own power of accomplishment was wonderful. No weight of responsibility, or magnitude of service, was ever felt as a burden. He never hesitated to do the work of two men with his single hand, nor to crowd the work of two days into one. Always he appeared insensible to weariness, without the consciousness of satiety in labor, or exhaustion of force. If, at times, he needed change, he never showed the need of rest. The variety of his undertakings was as remarkable as the promptness of his performance. He seldom, if ever, failed to keep an appointment, or to justify a promise.

Mr. Greeley combined a singular hospitality to new ideas with a profound attachment to conservative principles. He had no passion for innovation. He sought no change for the sake of change. He clung tenaciously to an opinion which he had once adopted, and rarely surrendered in his manhood a conviction of his youth. Both his religious and political creeds were formed at an early age, and no essential principle of either was renounced in after-life. Though generally regarded as a radical thinker, he had no tendency to revolutionary or destructive measures. Extremes of opinion, or of practice, found no favor in his eyes. He cherished a wholesome distrust of the fantastic love of novelty which makes no account of ancient landmarks, or of ancient prejudices. However glittering the promises of the future, he firmly held his anchorage in the

past. At the same time, he gave a courteous greeting to the new light which dawned upon the intellectual horizon. He never made his own experience the measure of possibility. He listened to every scheme which was held forth in the interests of humanity. He treated their advocates with kindness, if not always with sympathy, and challenged for their pretensions a generous hearing. Every improvement in legislation, in the order of civil society, in the arrangements of labor and the relations of industry, in the researches of science and the education of the young, was welcomed with cordiality, and examined with fairness. His faith in the future was not dimmed by his reverence for the past. Nor was his confidence in the progress of the human race impaired by any tincture of personal selfishness. Scarcely any man of his culture and genuine refinement of mind had a less active sense of individual comfort. But, what he did not seek for himself, he sought for his kind. He keenly felt for the poor, the infirm, the ignorant, the forsaken, the helpless, and though often abrupt in his expressions, and not conciliatory to excess in his manners, he will be set down by the recording angel as "one who loved his fellow-men."

Prominent as were the relations of Mr. Greeley with the public, no one can fully comprehend his character without following him into the retirements of private and domestic life. He was a man of singular purity of nature. No foul word or unseemly jest was ever permitted to escape his lips. He cherished the strongest attachment to the ties of family and home. No man had a keener sense of the power of kindred blood. His domestic tastes had the force of a passionate instinct. His devotion to his invalid wife, through years of protracted suffering, exhibited the character of a religious sentiment. The innate poetry of his nature was concentrated upon his children. His love for the "glorious boy," whose early death was a perpetual grief, seemed less like a reality than a romance. This child, whose radiant beauty was never equalled in "the sunshine of picture," cannot be forgotten in any remembrance of the father. His sweet and gracious nature was no less attractive than his personal loveliness. His sudden death, nearly twenty-five years ago, left a feeling of loneliness and desolation upon the heart of Mr. Greeley, for which the lapse of years brought no assuaging influence. "When, at length," he writes of himself, "the struggle ended with his last breath, and even his mother was convinced that his eyes would never again open upon the scenes of this world, I knew that the summer of my life was over, that the chill breath of its autumn was at hand, and that my future course must be along the down-hill of life."

GREELEY. Mrs. MARY YOUNG CHENEY, wife of Horace Greeley, a lady of remarkable intellectual ability, born at Litchfield, Conn., in 1814; died in New York City, October 30, 1873. As Miss Cheney, she received a very thorough education, under the instruction of that eminent teacher, the late John P. Brace, and his successor at Litchfield; and, while yet under twenty years of age, came to New York City, and taught a school for young ladies, with remarkable success. Being threatened with a pulmonary disease, she removed to Warrenton, N. O., where she established a similar school, which was still more successful, and which was only discontinued on her marriage with Mr. Greeley, July 5, 1836. Mrs. Greeley was a lady of wide and generous literary culture, a polished and elegant writer; but she was also a woman of strong and de-

cided views, to which she adhered with great tenacity. She had adopted Dr. Sylvester Graham's system in regard to vegetable diet; and, for years, she ruled her household and entertained her guests in accordance with his theories. She was, nevertheless, a loyal wife, and performed her part, so long as her health permitted, in endeavoring to aid her husband in his enterprises. While he was struggling to maintain the *New-Yorker*, she prepared the literary criticisms, and they were well done. A year after the establishment of the *Tribune*, she, and the Countess d'Ossoli (then Miss Margaret Fuller), travelled extensively over the Continent of Europe, making many of their journeys on foot, and taking with them a young child of Mrs. Greeley's, and both corresponded regularly with the paper, in letters, whose ability and vivacity have not since been surpassed by the able correspondents of the metropolitan journals. Mrs. Greeley early became a convert to the doctrines of the Spiritualists, and her belief in those doctrines materially influenced the latter portion of her life. She had been an invalid for nearly ten years from a complication of pulmonary and nervous disorders, and had repeatedly visited Europe and the tropics in the vain hope of finding relief from the severe suffering under which she labored. In June, 1872, she returned from Europe with her daughters, and spent most of the summer at Chappaqua, but, at her own request, was brought to New York City for the final struggle with disease. Her husband, during the last month of her life, abandoned the exciting and embittered political campaign, then in progress, and, for weeks, shut himself away from all his associates to minister with the most tender and unwearied fidelity to his dying wife.

GREENLEAF, ALFRED, A. M., an eminent teacher and promoter of education, born in West Newbury, Mass., May 10, 1804; died in Brooklyn, N. Y., December 26, 1872. He was of an intellectual and highly-cultivated family, and early manifested an eager desire for learning. He was fitted for college at the age of sixteen, but did not enter Dartmouth College until a year or two later. A serious illness prevented him from graduating with his class, but, in 1838, his Alma Mater conferred on him the degree of M. A., which he had previously received from the University of New York. Very soon after leaving college, he commenced life as a teacher at Marblehead, Mass. After about two years' experience there he was called to the principalship of the Franklin Hall School, at Salem, Mass., a school of six hundred pupils, many of them of adult age. He conducted this school with remarkable success for about ten years, when (in 1838) he was called to Brooklyn to take charge of a young ladies' seminary of very high grade. He accepted the invitation, and for twenty-two years presided over it with such credit to himself and benefit to his pupils (of whom more

than a thousand survive him), that to have graduated from Prof. Greenleaf's school with honor was a sure passport to any desirable position. In 1860, wearied with thirty-four years of constant teaching, he severed his connection with the seminary, and engaged in the business of insurance brokerage, in which he continued till his death. Prof. Greenleaf was a man of great activity, usefulness, and excellence, in all the relations of life. He maintained to the last his familiarity with all that was valuable in the current literature, science, and art, and took especial delight in the great discoveries of our time in physical science. He was also active in the prosecution of all enterprises of philanthropy and Christian benevolence.

GRILLPARZER, FRANZ, a German dramatic poet, born at Vienna, January 15, 1791; died there, January 20, 1872. He received a good education, and was early employed as a subordinate clerk in the office of the Imperial Chancellor of the Exchequer. He first attracted attention as a dramatist in 1816, by his tragedy of "The Grandmother," which alike, by its literary merits and its supernatural machinery, thrilled the public and retained its place upon the stage for many years. Three years later he produced his "Sappho," regarded by literary critics as his greatest work; and, in 1822, "The Golden Fleece," a fantastic drama. Neither of these met with as much popular favor as his first tragedy, though possessing greater merit. In 1823 he was appointed editor and reviser of the documents of the Chancellor's department, and in 1832 keeper of the archives. In 1861 he was created a Senator for life in the Austrian Reichsrath. His social life was singular. Among his friends, when he first commenced writing verse, was a Counsellor Frohlich, who became strongly attached to him, and whose house was his constant resort. The counsellor had three daughters, young children at this time, Netti, Kathi, and Peppi, who were all very much interested in him and beloved by him. It was the expectation of the father that he would eventually marry one of them, but for many years his income was small, and he seemed equally attached to all three. On the death of the parents he took up his residence with them as their protector, and, all ideas of marriage being given up, he remained the head of the household, tenderly cared for by the three sisters till his death—the second sister, by will, inheriting his property, but dividing it with her sisters. Herr Grillparzer's other dramas and historic tragedies were: "The Fortune and End of King Ottokar," 1825; "Melusina; a Faithful Servant to his Master;" "The Waves of Love and the Sea," a dramatization of the old story of Hero and Leander; "The Song of Life," 1840, a dramatic poem of great beauty. He also produced some comedies, among others, one which had a high reputation, "Woe to those who lie." In all his

tragedies and comedies an exuberance of lyric melody veils the tragic or comic element. His late works were two tragedies, "Annibal" and "Rudolph II.," a volume of lyric verse, which rendered him popular with the young; and a poem, written in 1848, celebrating the victories of Radetzky, which was enthusiastically received by the Austrian public. In his old age the veteran dramatist wrote two plays, which bore striking evidence of decaying powers; but, as the theatres would not produce them, he never again visited these scenes of his great successes.

GRIMES, JAMES WILSON, LL. D., an American statesman and Senator, born at Deering, Hillsdale County, N. H., October 16, 1816; died in Burlington, Iowa., February 7, 1872. After receiving an academic education, he entered Dartmouth College, whence he graduated in 1836. Like many other restless, ambitious sons of New England, he emigrated westward, soon after leaving college. In 1838 he settled in Iowa, then a Territory, was elected to the Legislature, and served as delegate to that body during the whole of the existence of Iowa in a territorial condition. The dignity of Statehood was reached in 1846, and Mr. Grimes succeeded to the governorship in 1854, serving four years. In 1859 he was elected to the United States Senate, and was a member of that body from that time until 1869, when, prostrated by a stroke of paralysis, which first assailed him during the Impeachment Trial, he anticipated the expiration of his term of office and resigned his seat in the Senate. He sought health in Europe, and, during a brief visit to England, he was courteously received as a representative American. During his official career he was a faithful, laborious, and conscientious legislator and executive officer. He was also a member of the Peace Congress of 1861, and filled various minor commissions in the gift of his constituency. He was noted for his independence of character, and was frequently brought into temporary conflict with his Republican associates in the Senate on account of the wide difference which existed between his views and theirs. This was prominently conspicuous in the impeachment of Andrew Johnson, when Mr. Grimes was one of the few Republican Senators who voted for the acquittal of the President. For this course the Senator was generally condemned by the Republican press of the country; but time, which sets all things even, has corrected the hasty judgment of those heated days, and there can scarcely now be found any who do not believe that Mr. Grimes acted in that famous trial in obedience to what he believed to be his conscientious duty. He received the honorary degree of LL. D. from Dartmouth College and from Iowa University.

GRISWOLD, JOHN A., an American manufacturer, political leader, and Congressman, born in Nassau, Rensselaer County, N. Y., in

1822; died in Troy, N. Y., October 31, 1872. He was descended from an old American family which was largely represented in the War for Independence. When seventeen years of age he went to Troy and entered a hardware establishment, but at the expiration of a year accepted the position of book-keeper in a house engaged in the cotton-trade. During this period of his life he lived in the family of his uncle, Major-General Wool, enjoying the influence of refined and cultivated society. In a few years Mr. Griswold engaged in business on his own account in a wholesale and retail drug establishment. He subsequently became interested in the manufacture of iron as a partner in the Rensselaer Iron Company. In this field of enterprise he was eminently successful. His business expanded from year to year, until, not many years ago, by the consolidation of his works with those of Mr. Corning, he became the principal partner in one of the largest iron establishments of the country, owning a rolling-mill and Bessemer steel-works in Troy, and blast-furnaces at Fort Edward, and on the Hudson. He was also, with his partners, the owner of an iron-mine at Lake Champlain, and, besides, was largely interested in several local companies. In 1855 he was elected mayor of the city of Troy, and gave general satisfaction in the discharge of his duties. At the outbreak of the war he at once arrayed himself among the supporters of the Union. He aided in raising the Second Regiment New York State Volunteers. He was also instrumental in raising the Thirtieth, One Hundred and Twenty-fifth, and One Hundred and Sixty-ninth Regiments of New York Volunteers, as well as the Black Horse Cavalry, and the Twenty-first New York or "Griswold Light Cavalry." Mr. Griswold also rendered effective aid to the Union cause by building, at great pecuniary risk, the celebrated Monitor, which rendered such effective service in its conflict with the Merrimac in Hampton Roads. In October, 1863, Mr. Griswold, at that time a Democrat, was nominated as a candidate for Representative in Congress, and, although the district (the XVth) was strongly Republican, he was elected by a majority of 1,287 votes. He soon afterward joined the Republican party, and was reelected by large majorities in 1864 and 1866. In the House, Mr. Griswold was an ardent supporter of the war measures of the Government, and labored earnestly to promote the industrial interests of the country. He was never an extreme partisan, but by a genial, agreeable disposition secured the esteem of prominent men in both political parties. In July, 1868, Mr. Griswold was nominated by the Republican State Convention for the office of Governor of New York. In the laborious and exciting canvass which followed in that presidential year, Mr. Griswold was unanimously supported by the Republicans, and proved a very popular candidate. His opponent, Governor Hoffman,

however, was elected, and henceforth he was not prominently known in State politics. Mr. Griswold was held in great esteem by his fellow-citizens in Troy. He was a liberal employer, providing generously for aged workmen, and shielding the young and inexperienced from ill-treatment or neglect. He contributed liberally to the charities of the city, irrespective of sectarian considerations, and took a warm interest in all measures calculated to advance the prosperity of Troy.

GUATEMALA (REPÚBLICA DE GUATEMALA), an independent state of Central America, extending from latitude 13° 40' to 18° 20' north, and from longitude 88° 17' to 93° 17' west. It is bounded north by Mexico; east by Belize and the gulf of Honduras; south by Honduras, San Salvador, and the Pacific; and west by the same ocean. The area of the republic is about 40,777 square miles, and the population 1,180,000. The capital, Guatemala la Nueva, has probably 40,000 inhabitants.

Provisional President, Miguel Garica Granados; Minister of Foreign Affairs. Minister of the Interior, of Justice, Instruction, and Worship, J. M. Samagoa; Minister of War, General G. de Solares (September, 1872); Minister of Finance, Metropolitan Archbishop, B. Piñol; coadjutor, M. F. Barrutia y Croquer, Bishop of Caristo *in part*.

The standing army is composed of 3,200 men, and the militia of 13,000.

The value of the exports, in 1871, to the following countries were:

England.....	\$662,234
France.....	16,621
Germany.....	561,822
United States of America.....	828,961
California.....	874,391
South America.....	33,106
Central America.....	128,800
Panamá.....	33,181
Belize.....	108,648

Total.....\$2,747,784

The following table gives the total exports for the five years 1867-'71:

1867—5,207 tons, valued at.....	\$1,973,950 43
1868—7,192 ".....	2,141,998 75
1869—7,536 ".....	2,497,137 34
1870—8,407 ".....	2,391,418 85
1871—8,916 ".....	2,657,715 84

The export of money is not included.

The value of the cochineal exported in the same period was:

1867.....	\$1,068,047 40
1868.....	891,513 70
1869.....	1,266,613 56
1870.....	895,414 20
1871.....	876,025 20

And that of coffee:

1867.....	\$415,878 00
1868.....	788,035 71
1869.....	790,227 57
1870.....	1,132,206 20
1871.....	1,312,129 80

It was learned that the crop of cochineal would be small; and prices were greatly affected by the nature of the crops in the Canaries.

The following were, in 1869, the sources of the national revenue:

NATIONAL REVENUE.

Customs duties.....	\$390,767
Internal taxes.....	819,495
Tobacco monopoly.....	18,156
Sundries.....	7,013
English loan.....	1,018,061
Internal loan.....	138,080
Total.....	\$1,885,582

The expenditures were as follows:

Executive, etc.....	\$49,069
Ministry of the Interior, etc.....	65,944
Legations.....	6,910
Public worship.....	28,634
Army.....	263,336
Ministry of commerce.....	77,935
Public debt.....	1,397,404
Sundries.....	77,030
Total.....	\$1,885,233

The public debt, in 1865, was \$2,461,978, of which \$1,489,379 composed the floating debt. The outlays on the public debt were as follows in 1865:

Consolidated debt.....	\$31,716
Old foreign debt.....	15,551
New foreign debt.....	22,963
Loan guaranteed by customs' duties.....	141,561
Amortization.....	555,700
Payments of the treasury bonds of 1850-63.....	523,918
Payments of the 8 per cent. bonds.....	6,000
Total.....	\$1,297,404

The indebtedness of the republic to Great Britain, which, in 1862, was \$1,500,000, had reached \$3,000,000 in 1872.

The public debt was reduced last June, by \$31,854.09; and the total debt, on July 1st, was \$5,043,988.72.

A writer at Panamá, on March 5th, says:

"The Republic of Guatemala, as well might be expected, is, at present, passing through a real crisis. After a struggle, which ended in overthrowing a government of thirty years' duration, the march of modern civilization, the ideas of the age, all have conspired to make the situation a difficult one. Not only in Guatemala, but in all Central America, there is a tendency to lay aside the things of the past and begin another life."

The Government issued various decrees for promoting the culture of sugar in the department of Sacatepeque, and that of coffee in Amatitlán; also another for the promotion of the cultivation of the sugar-cane and tobacco in Chiquimula and Zacapa. A bridge is to be built over the Rio Negro.

Corporal punishment was forbidden in the schools.

The Government assigned \$700 a month to the improvement of the port of Champerico, and the road leading from it to Quezaltenango.

With the expectation of correcting the unhealthiness of the port of San José, water was to be brought for the use of the population from the river Guacalate. In view of the state of siege existing in the departments of the east and centre, a law was passed in March restricting the liberty of the press, and enacting many unnecessary and tyrannical measures. For instance, all manuscripts must, before publication, be submitted to the censo-

rial examination of the ministry; and not only the manuscript, but the printed copy thereof, so that in case the Government should refuse permission to publish, the writer would be unnecessarily obliged to pay the cost of printing; consequently, no one wrote, nothing was published, and dissatisfaction was general throughout the country. It was reported that the better judgment of President Granados rebelled against the measure; and that he only sanctioned it in obedience to the influence of his ministry, and others who are still believers in the law of force. Two newspapers had suspended in consequence of the decree.

The United States minister, Mr. Hudson, presented himself to the Provisional President in the Government Palace, for the purpose of delivering the letter from President Grant, in reply to that from General García Granados announcing his elevation to the Executive power in Guatemala. On the occasion of the presentation, Mr. Hudson made a speech in English, full of sympathy for Guatemala and its Government.

The Provisional President, who understands English well, made an appropriate reply in the same language.

Members of the Assembly were to be paid \$100 per month during the session, and one dollar per league going and returning.

An attempt at revolution was made at Petapa in the early part of the year by one Antonio Muñoz; but the plans of the insurrectionists were disconcerted and defeated, and three of the principal ringleaders were shot.

A treaty of alliance, offensive and defensive, was made by Guatemala with the Republic of San Salvador, the most noteworthy stipulations of which were: complete interdiction of the Jesuits in both republics, in any capacity, and under whatever circumstances they might be found; mutual protection against internal dissensions, with the privilege for Guatemala to levy troops in Santa Ana, and for San Salvador to do likewise in Chiquimula; and the connecting the two republics by means of telegraph-lines.

The collection of inland duties (customs) was abolished, and all cities were opened to commerce, except those on the frontiers of Chiapas, San Salvador, and Honduras.

The Order of Jesuits was declared extinct by the Government, and their property was to be sold at auction.

Dr. Gilbert Totten, son of Colonel Totten, of the Panama Railroad Company, died at Quezaltenango on the 29th of May.

The republic was still at peace in June, but the Government had promised support to that of San Salvador, in the event of a war with Honduras.

A contract for a railway from San José to the capital was signed with Mr. Kelly.

A decree of the Government, for the expulsion of all priests who should in future touch upon political subjects of a reactionary nature,

elicited manifestations of profound indignation from the clergy.

The harvest of cochineal in the Department of Sacatepeque was finished, with a result not at all favorable, owing to the unusually heavy rains, which had caused disease among the insects. Prices of good cochineal ranged about 73 cents per pound, and inferior, 70 cents. As the real origin of the disease among the cochineal insects had not been satisfactorily cleared up, farmers in this branch of agriculture felt discouraged, and were inclined to abandon cochineal for coffee, which, though not so profitable, is less liable to accidents. In Amatitlan, where the *nopaleros* have suffered much more than in Sacatepeque, the idea of abandoning cochineal was still more general, and of devoting the land to the cultivation of the sugar-cane.

A free school was established at Quezaltenango; many of the citizens gave handsome contributions to it, and the political chief of the city his entire salary.

The Government, in July, fixed the legal rate of interest at five per cent., except in cases of special loans.

The press of Guatemala was declared free, except in cases of the abuse of freedom.

General Rufino Barrios refused to accept the portfolio of the Department of War, in order to take an active part in the war against Honduras.

No apprehensions were entertained of a commercial crisis resulting from the war. Money was abundant at eight per cent. interest, and discounts at one per cent. for short periods.

Ex-President Medina was said to be among the malcontents of Guatemala and San Salvador, in a secluded corner of Omoa. The port of Trujillo was occupied by the troops of the provisional Government.

The subject of the boundary-line with Mexico was under discussion by the Governments of both republics.

The Government ordered the ex-Convent of San Francisco to be prepared for the custom-house and other Government offices, reserving habitations for the parish curate, and a school capable of containing 500 children.

Government opened negotiations with Mr. Stanley McNider, the constructor of part of the telegraph-lines of San Salvador, for the purpose of extending the system throughout the Republic of Guatemala. Six lines were required, with 25 stations, and a total length of about 500 miles, at the rate of \$150 per mile, or \$75,000 for the whole, and give also instructions in telegraphy to 40 young men whom the Government would name. The contract was signed shortly afterward, and it was decided that the first line should be from the capital to the river Paz.

The bad condition of the port of San José gave rise to much murmuring, and was attributed to lack of energy on the part of the au-

thorities, and the persistent refusal by the Wharf Company to allow the custom-house to be established on the mole, by which change two important results would be gained: economy of expenditure for employes, and the effectual prevention of contraband. Government was disposed to purchase the mole, if the consent of the shareholders could only be obtained.

The Constituent Assembly met on the night of August 20th. A new party of malcontents had formed in the Department of Santa Rosa.

Diplomatic relations, suspended in 1866, between Guatemala and Costa Rica, were resumed by decree.

For the benefit of the commercial interests of the Department of the Altos de Guatemala, the port of Champerico was opened for exports and imports; that place was deemed preferable to all others, as being at once the healthiest and most central in the department. The custom-house will be at the town of Retaltinlen, until it can conveniently be established at Champerico. The decree to the above effect, and which was to go into force three months after the 10th of June, 1871, was by the President circulated and published on the 1st of July of the same year.

Two hundred Indians attacked Jalapa on the 17th of September. The battle lasted an hour, and resulted in the defeat of the Indians, who fled, and were pursued by 800 troops.

On the 15th of September, the national anniversary was celebrated with much enthusiasm in the National Institute, at Quezaltenango.

It is asserted that, in the forests of Veten, there are mahogany-trees valued at \$80 each, and in sufficient abundance to discharge the whole of the national indebtedness to England in five years.

A school of music was to be opened in the capital, and placed under the management of the director of the military bands.

The governor of the bishopric excommunicated, for the second time, a newspaper called *El Crepúsculo*. The proclamation to that effect warned the *faithful* against reading that journal, having it in their possession, subscribing to, or circulating it, and was posted on the doors of the churches and of the university, but were immediately torn down by the people.

A report was current in October that a number of immigrants were assembled at Belize, and were to be provided with arms for the purpose of invading the republic, to destroy the present Government, and restore the order of things which had been overturned by the revolution of 1871. The arms were, it appears, brought from New York, and were to be distributed among the conspirators by a Belize merchant, who, however, did not deliver them, as the conspirators were unable to pay for them, but offered them on sale to the Government of Guatemala.

Mr. Corbett, the British *chargé d'affaires* was endeavoring to accomplish the negotiation of a treaty of extradition between the republic and England.

The National Chamber, in its session of December 5th, accepted, by 35 votes against 7, the new constitution.

The qualifications for a voter require him to be 21 years of age, and to know how to read and write, or, in the absence of the latter accomplishment, to have a capital of \$1,000.

Medals were to be awarded to the officers and soldiers who had served in the action of Santa Barbara, for the liberation of Honduras.

Commerce continued to increase in the port of San José, notwithstanding the opening of Champerico.

House-rents in the capital have doubled within the last decade.

GUÉROULT, ADOLPH, a distinguished French journalist and politician; born in Radepond (Eure), France, January 29, 1810; died in Paris, August 3, 1872. His father was a wealthy thread-manufacturer. He was educated at Paris, and soon after graduation joined the Saint-Simonians, who at that period attracted to them a large number of the intellectual young men of France. After the dispersion of the Saint-Simonians by the Government, Guérout travelled in Spain and Italy, corresponding with the *Journal des Débats*.

In 1842 he was appointed, at the instance of M. Guizot, consul at Mazatlan, and five years later was transferred to Jassy. He was removed by the Provisional Government, and devoted himself to journalism, giving much attention to industrial questions in his position as editor of the *République* and the *Crédit* newspapers. In 1852 he became Vice-President of the *Crédit Foncier*, was editor-in-chief of the *Presse* from 1857 to 1859, and in 1859 founded the *Opinion Nationale*, a low-priced journal of liberal tendencies. M. Guérout was elected in 1863 to the *Corps Législatif*, and therein advocated the separation of church and state, and the abolition of the stamp on newspapers. He also sustained the imperial policy in regard to Germany, and was vigorously assailed on that account. He was defeated at the general elections of 1869, and was subsequently mainly engaged in conducting his journal. His writings for the press were, to a large extent, reprinted in book-form. The most important of them were: "Letters on Spain," 1838; "The Colonial Question," 1842; "The French Colonies and Beet Sugar," 1842; *Liberty and Trade*, the *High Price of Rents*, and the *Public Works of Paris*, 1861; "Studies in Politics, and Religious Philosophy," 1862; "The Policy of Prussia," 1866; "Speeches delivered in the *Corps Législatif*," 1869.

H

HADLEY, Prof. JAMES, LL. D., an eminent scholar, philologist, professor, and author, born in New Fairfield, Herkimer County, N. Y., March 30, 1821; died in New Haven, Conn., November 14, 1872. His father, James Hadley, M. D., was for many years Professor of Chemistry in the Medical College in New Fairfield, and afterward held the same professorship in the Medical College at Geneva, N. Y. James passed his boyhood and youth in diligent and most successful study, entered Yale College as Junior in 1840, and graduated in 1852, with high honors. He began the study of divinity, and became a thorough Hebrew scholar; but did not complete the studies of that profession. Such had been his attainments in science, that he was appointed Tutor in Mathematics in Middlebury College, but, returning to Yale as Classical and Historical Tutor, was chosen Assistant Professor of Greek in 1848, when Prof. Woolsey was elected president, and in 1851 was made full Professor of Greek, which office he filled down to the time of his death. He was an almost universal scholar. He had studied the sciences with patience and exactness, and followed their progress with great and unabated interest; but his favorite field was philology. He was a Sanscrit, Arabic, and Armenian scholar, was familiar with German and its great stores

of learning, and made himself master of Celtic, Gothic, Welsh, and Anglo-Saxon. He seemed more interested in the Teutonic than in the Romanic languages, from the fact, perhaps, that they threw so much light on the origin and structure of his native tongue, which he made a matter of critical study, and of which he wrote the history prefixed to Webster's Dictionary. Besides his varied linguistic attainments, he was well versed in civil law, and his course of lectures on that subject was concluded in the curriculum of the Yale Law School and was also delivered at Harvard. So great was his diligence and earnestness in the performance of his duties as professor, that he was esteemed one of the main supports of his college; distinguished as that institution is for the learning and ability of its instructors, no one was more learned or more able than he; President Woolsey's judgment of him was just—that he would have been considered as a great scholar even among the great scholars of the world. He was early elected into the *Oriental Society*, and was president of it at the time of his death. He was regular in his attendance at all its meetings, and contributed to it very important papers for the society's journal, which has been conspicuous, as well abroad as at home, for its great and varied learning in its appropriate sphere. When the *Philological*

Association was formed, some five years ago, he took a warm interest in its success, believing that its influence on literary studies would be very great, and that it would conciliate and unite our scholars throughout the country; and year by year, whatever may have been the pressure of other work, he manifested his devotion to the Association by his honored presence, and by his valuable labors. He was an admired contributor to our critical journals, as the *North American Review*, the *Bibliotheca Sacra*, the *New-Englander*, and the *Nation*. In 1860 he published a Greek Grammar, based on the German work of Prof. Curtius, of Kiel, but amplified and elaborated with great and searching care; and in 1869 he put forth the same work abridged, "Elements of the Greek Language" (1869), but containing his later and riper views. It was also his intention to edit some of his favorite Greek authors, and, had he lived to realize this, he would have bestowed a great boon on American students. To his extensive and profound attainments in learning, he added the charm of a humble and sincere piety, and such was the loveliness of his character that he perhaps never had an enemy, certainly he never wilfully made one.

HALLECK, * HENRY WAGNER, LL. D., a distinguished officer of the Army in the late civil war, and at his death the senior major-general on the active list, United States Army, born in Westernville, Oneida County, New York, January 15, 1815; died in Louisville, Ky., the headquarters of the Military Division of the South, January 9, 1872.

After receiving an ordinary common-school education at Hudson Academy, N. Y., and passing through a part of the course at Union College, he entered the United States Military Academy July 1, 1835, from which he was graduated third in a class of thirty-one, and thence promoted to the Army July 1, 1839, a second-lieutenant in the Corps of Engineers. His marked ability and skill as an instructor while a cadet caused his being retained as an Assistant Professor of Engineering at the Academy till June 28, 1840. He then, for a year, was assigned as an assistant to the Board of Engineers at Washington, D. C., where he prepared a work on "Bitumen: its Varieties, Properties, and Uses," which embraced all then known of the application of asphalt to military structures. From Washington he was transferred to assist in the construction of the fortifications of New York Harbor, where he remained till 1846, except while on a tour of examination, in 1845, of public works in Europe. During his absence he was promoted, June 1, 1845, to a first-lieutenancy. Upon his return to the United States the committee of the Lowell Institute at Boston, Mass., attracted by Halleck's able report on "Coast Defence"

published by Congress, invited him to deliver a course of twelve lectures on the Science of War. These he published in 1846 in a volume, with an introductory chapter on the Justifiableness of War, under the title of "Elements of Military Art and Science," a second edition of which, with the addition of much valuable matter, including notes on the Mexican and Crimean Wars, appeared in 1861. On the outbreak of the Mexican War, Lieutenant Halleck was detailed as the engineer for military operations on the Pacific coast, and sailed with Captain Tompkins's artillery command in the transport Lexington, which after a seven months' voyage reached her destination at Monterey, Cal. During this long and tedious passage round Cape Horn he undertook, partly as a military study and partly for the occupation of a mind not to be amused with trifles, a translation from the French of Baron Jomini's "*Vie Politique et Militaire de Napoléon*," which in 1864, with the aid of a friend, he revised and published in four octavo volumes with an atlas.

After partially fortifying Monterey as a port of refuge for our Pacific fleet and base for land incursions into California, Lieutenant Halleck took an active part, both civil and military, in all the affairs on this distant theatre of war. As Secretary of State under the military governments of Generals Mason and Riley, he displayed great energy, high administrative qualities, excellent judgment, and admirable adaptability to his varied and onerous duties. As a military engineer he accompanied several expeditions, particularly that of Colonel Burton into Lower California, being engaged in the skirmishes of Palos Prietos, Urias, Todos Santos, and San Antonio, having in twenty-eight hours with a few mounted volunteers made a forced march of 120 miles to the latter place and surprised a considerable Mexican garrison, the governor barely escaping capture. Besides his engineer duties he performed those of aide-de-camp to Commodore Shubrick during naval and military operations on the Pacific coast, including the capture of Mazatlan, of which for a time Halleck was lieutenant-governor; and was also chief of Colonel Burton's staff on his Lower California expedition. For these gallant and meritorious services he was brevetted a captain, to date from May 1, 1847. After the termination of hostilities and the acquisition of California by the United States, a substantial government became necessary. General Riley, in military command of the territory, called a convention of delegates to meet at Monterey, September 1, 1849, to frame a State constitution. This convention, after about six weeks' consideration, agreed upon a constitution which was submitted to and adopted by the people, and by act of Congress September 9, 1850, California was admitted into the union of American States. In this entire movement, one of great importance both to the new State itself and to the whole

* This biographical sketch of General Halleck is abridged from the admirable biographical notice of him in the *Army and Navy Journal*, written by his intimate friend and associate, General G. W. Cullum.

country, Halleck was the active and able leader. He was substantially the author of the constitution of the State, and the foremost man in the convention. He could have been one of the United States Senators, but was unwilling then to relinquish his military profession. Continuing in the Army, he remained as aide-de-camp on the staff of General Riley; from December 21, 1852, was inspector and engineer of light-houses, and from April 11, 1853, a member of the Board of Engineers for fortifications on the Pacific coast; and was promoted captain of engineers, July 1, 1853—all of which positions he held till his resignation, August 1, 1854, from the military service.

After leaving the Army, where his pay was inadequate to his support, and the future presented no distinguished career, Halleck devoted himself to the practice of the law in a firm of which for some time he had been a prominent member; and continued as director-general of the New Almaden quicksilvermine, a position he had held since 1850. In the practice of his profession, with an amount of business which would have overwhelmed most men, Mr. Halleck still found time for no small amount of literary labor, which, though in the line of his professional studies, gave proof of his untiring industry and his thorough mastery of the great principles which underlie the science of law. He prepared "A Collection of the Mining Laws of Spain and Mexico," published in 1859; a translation of "De Fooz on the Law of Mines, with Introductory Remarks," 1860; and a masterly treatise on "International Law, or Rules regulating the Intercourse of States in Peace and War," 1861; subsequently condensed and modified for the use of schools and colleges, in 1866. This work has received the highest commendation of the great German publicists as well as of American, English, and French jurists of the highest rank. Mr. Halleck was also president of the Pacific & Atlantic Railroad from San Francisco to San José in 1855, and major-general of California militia in 1860-'61. Union College had conferred on him the honorary degree of A. M. in 1843, and in 1848 he had received and declined the appointment of Professor of Engineering in the Lawrence Scientific School at Cambridge, Mass. The outbreak of the civil war found Halleck at the head of the most prominent law-firm in San Francisco, and with large interests and much valuable property in California. Yet he did not hesitate a moment in tendering his sword and his talents in defence of the Union. General Scott, well knowing his worth, immediately and strongly urged upon President Lincoln his being commissioned with the highest grade in the regular Army. Accordingly he was appointed a major-general, to date from August 19, 1861, accepting which he without delay repaired to Washington, was ordered to St. Louis, and November 18, 1861, took command of the Department of Missouri, em-

bracing the States of Missouri, Iowa, Minnesota, Wisconsin, Illinois, Arkansas, and Western Kentucky. Around him was a chaos, requiring the prompt, energetic, and ceaseless exercise of his iron will, military knowledge, and administrative powers. The scattered forces of his command were a medley of almost every nationality, with the organization of each and the excellence of none; Missouri and Kentucky were practically but a border screen to cover the operations of the seceding South. Hardly had he assumed command before his remorseless Juggernaut of reform began to crush out every abuse and scatter all opposing obstacles, and in a few weeks order reigned in Missouri. With like vigor he dealt blow after blow upon all who, under the mask of citizens, abetted the enemy—informants communicating with any of them were treated as spies; bridge-burners and marauders were tried and sentenced to death by military commissions; towns and counties were compelled to pay all damages to public property destroyed within their limits; carriages flaunting Confederate flags were seized in the streets and promptly confiscated; women insulting the soldiers, or signalling the inmates of military prisons, were confined to their homes; wealthy secessionists were assessed for the support of loyal refugees, and, failing to pay, were sent beyond the lines; and, to make assurance doubly sure, all officials of corporations, licensed lawyers, voters at elections, employés of the Government, and even the Faculty of the University of Missouri, were required to take the oath of allegiance to the United States. But, while from headquarters thus energetically dealing with the enemy at home, he did not neglect the enemy in arms, over whom, by his admirable strategic combinations, he quickly secured success after success, till, in less than six weeks after assuming command, a clean sweep had been made of the entire country between the Missouri and Osage Rivers, and General Price, cut off from all supplies and recruits from Northern Missouri, to which he had been moving, was in full retreat for Arkansas.

Though the winter had set in, Halleck relaxed not a moment to insure new victories. The Union supremacy in Missouri being established, he now turned his attention to the opening of the Mississippi River, which General Scott had intended unbarring by a flotilla and army descending it in force. Halleck, however, was satisfied that this plan would only stem the torrent of secession, and the enemy would be again able to return upon its path. To effectually thwart and turn all the river strongholds, he felt that the Confederacy must be rent in twain by an armed wedge, driven in between this great stream and the mountains on the east. On January 27, 1862, the President had ordered a general advance of all the land and naval forces of the United States, to be simultaneously made against the insurgents

in arms, on the 22d of the coming month. In anticipation of his part of the grand movement, early in February, Halleck sent his chief of staff to Cairo, to direct, in his name, when necessary, all operations auxiliary to the armies about to take the field on the Mississippi, Tennessee, and Cumberland Rivers, which their respective commanders soon put in motion. Operating by the Ohio River as the base, and the navigable Tennessee and Cumberland as perpendicular lines of operations, it is needless to repeat history by stating the success of Halleck's masterly strategy, carried out by his able lieutenants, against the Confederate first line of defence. In a little over three months of his sway in the West, Forts Henry and Donelson had fallen, the strategically turned flanks of the enemy's line, protected by the powerful works of Bowling Green and Columbus, were deserted, and Nashville, the object of the campaign, was in his possession. In the mean time, Curtis had been sent to drive the Confederates out of Missouri, and, early in March, gained the decisive battle of Pea Ridge, in Arkansas, the enemy flying before him to the protection of the White River; and Pope, dispatched to New Madrid, after taking that place, confronted the fugitives from Columbus at Island No. 10, which, by the happy device of Hamilton's cut-off canal, was turned and taken in reverse, and this strong barrier of the Mississippi removed by the joint action of the Army and Navy. By these masterly operations, the Confederate first line, from Kansas to the Alleghany Mountains, being swept away, and the enemy's strongholds captured or evacuated, the Federal forces moved triumphantly southward, pressing back the insurgents to their second line of defence, extending from Memphis to Chattanooga.

On March 11, 1862, to give greater unity to military operations in the West, the Departments of Kansas and Ohio were merged into Halleck's command, the whole constituting the Department of the Mississippi, which included the vast territory between the Alleghany and Rocky Mountains. General Buell, marching by railroad from Nashville, was directed, on the withdrawal of the enemy from Murfreesborough, to unite with General Grant proceeding to Pittsburg Landing by the Tennessee. Their fortunate union secured the success at Shiloh. Then, to more immediately direct military operations, Halleck took the field, and, after reorganizing and recruiting his forces, moved on Corinth, where the enemy was strongly intrenched on the important strategic position, at the junction where the railroads connecting the Gulf of Mexico and the Mississippi River with the Atlantic Ocean came together. By striking a vigorous blow here on the enemy's left centre, Halleck proposed to repeat the strategy which had succeeded against the first line; but success was indispensable, hence, he made every step of his

progress so secure that no disaster should be incurred, involving the loss of what had already been gained with so much effort and bloodshed. So admirably were his successive camps guarded against surprise or sudden dash, that General Beauregard dared not attack, though on May 2d he made his arrangements, and issued his proclamation to "the soldiers of Shiloh and Elkhorn" that he was about to give battle. A month after the initiation of Halleck's march, May 27th, his compact columns were close upon Corinth's fifteen miles of heavy intrenchments, strengthened by powerful batteries or redoubts at every road or assailable point, and the whole covered to the boggy stream in front by a dense abatis, through which no artillery or cavalry, nor even infantry skirmishers, could have passed under fire. On the next day, heavy siege-guns were put in position, and every thing made ready for a desperate attack upon the enemy, who had been hotly contesting the advance. On the 29th, operations were earnestly resumed against the enemy, who, though driven back at all points, preserved an unbroken front, and served his batteries with great energy. On the morning of the 30th the enemy's slackened fire proved what, from the noise of explosions and moving trains during the preceding night, had been feared—that Beauregard, despairing of maintaining himself in this immense stronghold of the Confederacy, constructed with so much labor and care, had fled. Upon the occupation of Corinth, its enclosing and commanding fortifications were found to be impregnable to assault; within, desolation and smouldering ruins were everywhere visible; and the evacuation, commenced some days before by the removal of the sick, fully completed. Immediately General Pope was sent in pursuit of the retreating enemy. Soon after, General Buell was dispatched toward Chattanooga to destroy the railroad connections. General Sherman was put in march for Memphis, but the Navy had captured the place when he had reached Grand Junction; without delay, batteries were constructed on the southern approaches of the place, to guard against any sudden return of the enemy; and, with prodigious energy, the destroyed railroad to Columbus was rebuilt to maintain the communications with the Mississippi and Ohio, in jeopardy by the sudden fall of the Tennessee, by which supplies had been received.

It had now been a little over six months since General Halleck assumed command at St. Louis, and, from within the limits of his department, during this period, the enemy had been driven from Missouri, the northern half of Arkansas, Kentucky, most of Tennessee, and strong lodgments made in Mississippi and Alabama. General Halleck was severely criticised for consuming six weeks in reaching Corinth; but when the condition of the roads, the hostile state of the country, the rawness of his troops, and a narrow escape from a de-

feat which his forces had encountered at Shiloh, are taken into account, a caution, which might seem slow, was not the worst of faults; and though this caution may have been excessive, as it was apt to be in generals who had been trained in the Engineer Corps, yet it was certainly preferable to that headlong haste which, too often, during the war, led to the ruin of some of the choicest troops. The authorities at Washington seem to have entertained this view of his action; for they were so thoroughly satisfied with his course, that they called him to the capital to take the responsible position of General-in-Chief of the Armies of the United States. He was reluctant to assume this office, and it was only when peremptory orders were issued that he consented to relinquish his Western command.

Reluctantly leaving Corinth, to which he hoped to return again to enter upon the great work of opening the Mississippi and crushing the Confederacy in the Southwest, Halleck reached Washington July 28, 1862, and at once assumed command as General-in-Chief of all the Armies of the United States. The first problem presented was, how safely to unite the two Eastern armies in the field, so as to cover the capital, and make common head against the enemy then interposed between them, and ready to be thrown at will on either. Honest differences of opinions of able generals existed as to the best measures to be adopted to accomplish the desired end, which it is unnecessary here to rediscuss; and the brief limits of this sketch will not permit following in detail the after-reverses and glories of the magnificent Army of the Potomac, nor the brilliant triumphs of the leaders whom General Halleck had left in the West. Suffice it to say that the General-in-Chief entered upon the duties of his high office with heart and soul devoted to the preservation of the Union, and gave the utmost of his eminent abilities, energy, and unremitting industry, to his country's cause. Often compelled to assume responsibilities which belonged to others, constantly having to thwart the purposes of selfish schemers, and always constrained to be reticent upon public affairs, which many desired to have divulged, Halleck, like all men in high stations in time of trial, soon became a target for the shafts of the envious, the disloyal; and the disappointed Congress, in recognition of General Grant's campaigns of Vicksburg and Chattanooga, revived the grade of lieutenant-general. Though a desire was manifested in high places, in some way, to retain General Halleck in the performance of his high functions, he at once insisted that compliance should be made with the obvious intentions of the law, and that, being senior in rank, Grant must necessarily be General-in-Chief. However, Halleck remained at Washington from March 12, 1864, to April 19, 1865, as Chief-of-Staff of the Army, under the orders of the Secretary of War and the General-in-Chief,

performing much of the same duties as before had devolved upon him at headquarters. From April 22 to July 1, 1865, he was in command of the Military Division of the James, with headquarters at Richmond. Upon the termination of hostilities, and the disbandment of the volunteer forces, Halleck was ordered to the Military Division of the Pacific, of which he took command August 30, 1865, and March 16, 1869, was transferred to that of the South, which he retained till his death. It is unnecessary to say that, both at San Francisco and Louisville, he ably, energetically, and economically, carried out the requirements of the Government. The satisfaction he gave in his late command cannot be better expressed than in the words of an intelligent observer, residing at Louisville, who says in a private note: "Of all men who have been in command here, General Halleck was the best liked. He was not only a good soldier, but a statesman and a gentleman, and I am thoroughly convinced that, if there had been a *Halleck* in command of every department in the South and Southwest, we would long since have ceased to hear of outrages consequent upon the 'late unpleasantness.'"

General Halleck had a strong, clear intellect, which enabled him to take a comprehensive grasp of the various important matters presented to his consideration, and was sustained in his conclusions by a most assiduous industry and self-reliant perseverance. Indeed, determination was his most marked characteristic, evinced in a calm firmness, which neither entreaty or persuasion could move from its fixed purpose. With these was united a modesty, almost shyness, and thus, perhaps, he did himself injustice, as his sensitiveness to the value of sincerity caused him often to repel rather than be deemed insincere. This known temperament secured him the most valuable estimation of his instructed and ablest fellow-officers. His dryness of manner was no argument of want of heart, for, indeed, he was a warm, true, loyal friend, and, in the inner circle of his life, was tender and playful, showing a keen sense of humor. His home was a scene of perfect happiness and kind hospitality. Of children he was fond; had an ardent love of Nature, and indulged the expectation of closing his latter hours in a retreat in the beautiful region south of San Francisco, looking on the Pacific Ocean.

HASTINGS, THOMAS, an eminent musical composer and author, music-teacher and hymn-writer, born in Washington, Litchfield County, Conn., October 15, 1784; died in New York City, May 15, 1872. When he was twelve years old, his parents removed to Clinton, Oneida County, N. Y., then an almost unbroken wilderness. His father was a physician, and of his ten children, four, of whom the subject of this sketch was one, were albinos. The hard work of the farm in a new and sparsely-settled town was very trying to

the delicate, sensitive boy, but, despite his imperfect vision, he was exceedingly fond of study. He early developed a taste for music, and even with the meagre facilities for musical study which were within his reach, attained to such a measure of skill in it as to be appointed, when only about eighteen years of age, a chorister in the village choir. About this time an elaborate treatise on music fell into his hands. It was thoroughly scientific, deducing its doctrines from the science of acoustics, and illustrating them by algebraic formulæ, while he, poor boy, had no knowledge of either musical grammar or the higher mathematics, but he struggled with these difficulties with indomitable will, and finally mastered the treatise thoroughly, and found it of great value to him. In his twenty-first year he first made the attempt to find employment as a teacher of vocal music, or singing-school master, as they were then called, but could find no employment in that capacity. A year later, however, he was invited to take charge of a singing-school in Bridgewater, Oneida County, and at Brookfield (then in Herkimer, now in Madison County). He achieved such success, that his services were in great demand, and the choirs he taught were acknowledged to be better trained than any others in that region. After three years of service, he was compelled by ill health to relinquish his work for a time, and, engaged in other pursuits, he did not resume it until 1816. Meantime, in connection with President Backus of Hamilton College, and Prof. Norton, he had been engaged in compiling the "Musica Sacra," the first of his collections of church-music. His reputation had extended in 1817 to Troy, where he taught successfully, and organized an efficient choir for one of the churches. From Troy he went to Albany, and, in addition to the care of his large music-schools, became the chorister or precentor in Rev. Dr. Chester's Presbyterian Church, subsequently Rev. Dr. Sprague's. This was, we think, the first attempt at really scientific congregational singing in any church in this country. Besides Mr. Hastings, there was a well-trained voluntary quartette, the pastor being the tenor, to lead the singing, in which the whole congregation joined. In 1822 Mr. Hastings published a "Dissertation on Musical Taste," a work which had cost him much thought, and which received the high commendations of the late Dr. Lowell Mason and Chancellor Kent. In 1823 he removed to Utica, to take editorial charge of the *Religious Recorder*, a semi-monthly religious paper, which gave, for that time, a large space to church-music. He continued his editorial labors for nine years, though his reputation as a musician and composer of sacred music had caused him to be repeatedly called to lecture on the subject in Albany, New York, Philadelphia, and at Princeton College. In 1832 he was invited to come to New York City,

and endeavor to improve the character of the church-music in the Presbyterian churches there. He accepted the invitation, and made that city his home for the remaining forty years of his life. He accomplished a great work there in the improvement of sacred music as well as in the hymnology of the time. For some years, he led the choir in Rev. Dr. Mason's Church, in Bleecker Street, and devoted his time to the preparation of collections of church music, the composition of tunes, and occasionally of hymns also, the editing of musical periodicals, and the compilation of hymn-books more in accordance with the better taste he had done so much to improve, than those previously in use. In 1836 he published the "Christian Psalmist," an excellent collection of psalms and hymns, which after the lapse of thirty-seven years is still largely in use. The next year he prepared and published the Manhattan Collection. He edited and published for two years (1836 and 1837) the *Musical Magazine*. In 1840 he published the "Sacred Lyre," a new collection of tunes. His other publications were "Spiritual Songs," which we believe ante-dates most of those mentioned above; "Nursery Songs;" a "Collection of Hymns for Mothers' Meetings;" a volume of "Original Hymns;" an Essay on the subject of "Sacred Praise;" a series of "Essays on Prayer;" a small collection of "Indian Melodies" for the Methodist Church; two editions of the "Sacred Songs," and "The Songs of Zion," for the American Tract Society; "The Presbyterian Psalmist," and the "Juvenile Psalmist," for the Presbyterian Board; "The Psalmist," a collection of music with the late W. B. Bradbury, in 1844; "The Choralist" in 1847; "The Mendelssohn Collection" in 1849; "The Psalmista" in 1851; "Selah" in 1856. He had also revised his "Dissertation on Musical Taste;" published a "History of Forty Choirs," and a "Sunday-School Hymn and Tune Book." In 1858, in connection with his son, Rev. Thomas S. Hastings, he brought out "The Church Melodies," one of the best Church hymn and tune books for congregational singing ever published. Through all these years, and up to his death, he had been an almost constant contributor to the religious weekly press, and to religious reviews.

HEGNERBERG-DUX, Count FREDERICK von, Prime-Minister of Bavaria, and Minister of Foreign Affairs, born in Munich, in 1810; died there, June 8, 1872. The Emperor Napoleon I. was his godfather. At an early age he became a page at the court of King Louis I., who afterward appointed him chamberlain and took him on his travels in Italy and Greece. In 1840 he became a member of the Bavarian House of Representatives, and in 1847 he was elected its president. He took an active part in the movement which compelled King Louis I. to expel Lola Montez from Bavaria, and to abdicate his throne. During the revolution of 1848 Count Hegnerberg-Dux sided with the

moderate party, and remained president of the Second Chamber until 1865. He leaned more and more toward the liberal side, and warmly espoused the cause of Schleswig-Holstein in 1868. He joined the so-called National Liberal party, and sympathized with Prussia in 1866. He was among the most enthusiastic advocates of an alliance with Prussia at the breaking out of the war with France, and heartily approved the efforts of Prince Bismarck to restore the German Empire. In August, 1871, King Louis II. appointed him Prime-Minister.

HOGEBOOM, HENRY, LL. D., an eminent jurist, born in Columbia County, 1808; died in Hudson, N. Y., September 12, 1872. He was descended from a family distinguished, for several generations, in the history of the country, and early in life evinced superior intellectual capacity. During his academical course, he distinguished himself particularly in the ancient classics. Graduating from Yale College in 1827 with high honors, he gave himself to the study of law, in the office of Powers & Day, at Catskill, was admitted to the bar in 1830, and, entering upon the practice of his profession in the city of Hudson, soon rose to eminence. He was frequently opposed by the experienced and able lawyers for which the Columbia County bar was remarkable, and competition with such men brought all his latent powers into active exercise, and developed professional ability of the highest order. His field of practice gradually enlarged, and he was called to try important cases in distant parts of the State, and argue causes before our highest tribunals of justice. It was the integrity of his character which rendered him a favorite for office. In 1831 he was appointed a master in chancery, and county judge of his native county, and he discharged the duties of those offices in the most satisfactory manner. In 1839 he was elected a member of Assembly. This was his only experience in legislative life. He became prominent in that body, and served on important committees, but his more congenial field of labor was the law. In 1847, and again in 1849, he was a candidate for Justice of the Supreme Court, but was defeated by a small majority. In 1857 he was again nominated for the same office, and was then elected by nearly 12,000 majority. His services as judge during his first term had shown him to be so preëminently qualified for the place, that, in 1865, he was reëlected by about 2,500 majority, in the same district where, the year before, on a strict party vote, the party which nominated the opposing candidate had had nearly 13,000 majority. Judge Hogeboom was possessed of a clear and discriminating mind. His written judicial opinions are models of accuracy of expression and elegance of style, and his charges to juries were alike sound in law and faultless in composition.

HONDURAS (REPÚBLICA DE HONDURAS), an independent state of Central America;

latitude, from 18° to 16° north, and longitude, from 85° 39' to 89° 6' west. It is bounded on the north by Guatemala and the Gulf of Honduras; on the southeast, by the Caribbean Sea; on the south, by Nicaragua, Fonseca Bay, and San Salvador; and, on the west, by the latter republic and that of Guatemala. Area, 58,168 square miles; population, about 360,000.

President (provisional), C. Arias; Minister of Foreign Affairs, War, and Finance, M. Alvarez; Minister of Navy and Public Instruction, C. Celio Arias; Bishop of Comayagua, J. F. Zepeda (1861).

The standing army is composed of 600 men, in time of peace; and the militia, 6,000.

According to ex-President Medina, the value of the exports may be estimated at \$1,305,000, distributed as follows: Gold and silver, \$600,000; indigo, \$200,000; horned cattle, \$150,000; timber, \$180,000; hides, \$100,000.

The national revenue amounts to about \$400,000 annually, the expenditure being about \$185,000. The internal debt, amounting to some \$450,000, was to be covered, in part, with the surplus of 1868; and the remainder with that of the following year. The customs receipts of the port of Trujillo, and a portion of those of Amapala, are applied to the payment of the consolidated foreign debt. The total indebtedness of the republic to England, in 1872, was \$25,000,000. The budget of expenses for 1873 is estimated at \$391,916.

The *Official Gazette*, of Honduras, of January 31, 1872, affirmed that the republic was at peace, and without any apprehensions of new disturbances. The relations between the republic and that of San Salvador seemed to be more cordial than they had been for a long time. But this state of things was of short duration, and, before the lapse of three months, indications of war became visible. President Medina issued, in April, a manifesto, declaring the patience with which he had endured the insults and calumnies heaped upon him by the press of San Salvador, but adding that, inasmuch as such abusive personalities were countenanced by President Gonzalez, they could not much longer be continued with impunity, and making, therefore, an earnest appeal to the patriotism and bravery of the people to vindicate the honor of the republic, and punish the ingratitude of San Salvador. "If war should come," concluded Medina, "Honduras will not be responsible." About the same time, San Salvador and Guatemala negotiated a treaty of alliance offensive and defensive, which was regarded by Medina as threatening for Honduras; and, accordingly, he decreed the republic in a state of war, and that official relations between Honduras and San Salvador were suspended until an amicable understanding should be established between the two countries.

Expecting an attack from the allied forces, Medina now fortified himself in the city of

Gracias, and, the opposition party at home taking advantage of his absence to overthrow his administration, a revolution broke out, and Arias was appointed Provisional President, with the new cabinet already mentioned. Arias issued proclamations advocating peace, inasmuch as the only object of the war was to free the people of Honduras from the tyranny of Medina.

A convention was soon afterward called, for the purpose of forming a new constitution.

War commenced, and General Medina's principal army was defeated at Comayagua, on the 27th and 28th of May. It was thought that the campaign was at an end, and General Espinoza, who commanded the San-Salvador contingent of the army, was preparing to return home, having sent forward his wounded and part of his equipage as far as Lamani, when news was brought to him that General Medina was again in the field, and orders to retain in Honduras the forces of his division until the despotic administration of President Medina was entirely destroyed. The Provisional President of Honduras then appointed General Espinoza as commander-in-chief of the army of Honduras, who, in consequence, gave orders for the commencement of a new campaign against Medina. The latter was then in Omoa, where he had succeeded in getting up a force composed of filibusters and negroes from the islands of the bay, amounting to about 400 men, and had sent General Miranda to occupy Santa Barbara, and unite with Chanona and Araujo. General Espinoza, aware of all this, waited until Medina should proceed into the interior of the republic in order to cut off his retreat. As soon as General Espinoza was informed that Medina had left the Castle of Omoa, and arrived at the Potrerillos, he sent orders to his second in command, General Juan Antonio Medina, who was with a part of the division in Tegucigalpa, to form a union with him. This having been accomplished, General Juan Antonio Medina was directed to take the road of Santa Cruz, and General Espinoza, with the rest of the force, took that of Santa Barbara by Signatepeque. After having made these movements from the capital, General Espinoza encamped at Trinidad, some six leagues distant from where Miranda had fortified himself. A few days afterward, it was reported that General Medinilla occupied Santa Cruz, after ex-President José M. Medina had left that town and had gone, with his equipments, to Lake Yojoa, where he embarked, and united his forces with those of General Miranda in San José. Medinilla continued his march toward the Castle of Omoa, according to orders. About this time, General Espinoza was informed by one of his scouts that a contingent of recruits would pass through Jesus de Otoro to join the forces of ex-President Medina. He immediately sent 50 men in charge of some officers to intercept that party. They had to pass through a forest,

under a heavy rain, night and day, and arrived at Jesus de Otoro only to find out that the recruits had already passed, under the command of an officer named Mejia. They at once proceeded to the town of San Rafael, where they overtook the recruits, dispersed them, and took possession of their mules, horses, arms, etc.

After some days of encampment in front of the enemy's position, General Espinoza being informed that Medina and Miranda had left San José, he immediately marched after them, and took up his position on the heights of Seguaaca, about three leagues from Santa Barbara, where the enemy had encamped. While there, General Espinoza received a letter, dated July 24th, from ex-President Medina, advising him and the Provisional President of Honduras, Señor Arias, that on the 16th instant another Provisional Government had been inaugurated by General Medinilla in Omoa, with Messrs. Gomez, Bogran, and Leiva, as ministers; also that Medinilla had left with three schooners to take possession of the port of Trujillo, but would soon return. "If," adds the ex-President, "you could have a conference with me, perhaps we might avoid bringing on this unhappy country so many evils, especially with the assistance of Señor Arias." The letter further added: "Let it not be understood by this that I have any idea of giving up my authority. The people are flocking to my standard."

General Espinoza did not answer this note the next day, regarding it as a military stratagem. He ordered two cannons to be fired during the night, which brought to his aid the forces of General Ororo and Marshal Solares. Next day he refused the proposed conference, and, in union with the forces of the two generals just mentioned, marched on the enemy. After a short but fierce struggle of six hours, the forces of the ex-President gave way. The victors remained with two mitrailleuses, sixty prisoners, rifles of different kinds, etc. The pursuit was kept up with one hundred men under General Castro.

On the 7th of August General Espinoza was apprised that the party he had sent out had captured the ex-President, but that Gomez, Medinilla, Arango, and Miranda, had escaped. This report was, however, unfounded, for Medinilla gave himself up to Colonel Razcon, and was sent to the capital of Guatemala. The troops under the command of General Espinoza returned to Comayagua, and surrendered all they had captured to the Provisional Government of Señor Arias.

A Honduras journal, treating of this revolution, remarks that Medina had been too hasty in taking his decision; that he declared war before he was prepared for it, and that he had relied also upon receiving arms and aid from Costa Rica, which republic left him entirely unassisted when he most needed its help.

The national independence was celebrated

at Amapala, September 15th. The consuls and the vessels in the bay hoisted their flags, and the cura said mass in a chapel adorned with palm-leaves. Various patriotic speeches were delivered on the occasion, all ending by cries of "*Viva la América Central!*"

The port of Amapala was, it was said, to be given up to San Salvador, but still to remain, however, a free port.

On the 21st of September, General Streber, commanding the departments of Choluteca and Paraíso, was received with much enthusiasm at Amapala. The general visited the schools, and took measures to favor the Indians, especially in the culture of indigo. The Government gave \$500 to aid in rebuilding their church, which had been burned by the soldiers of ex-President Medina.

Bands of robbers infested that part of the frontiers near Nicaragua.

El Centinela, of September 30th, published a long article on the neutrality of the Pacific Mail Steamship Company, in the question of the delivery of arms to the Provisional Government of Honduras.

By a decree of September 8th, the Order of the Knights of Santa Rosa and the Civilization of Honduras, established by a law of 1868, has been abolished.

Dr. Venero was appointed Minister of Foreign Relations.

Tobacco pays an export duty of \$1.00 per quintal (100 lbs.).

President Arias expressed his thanks to the allied forces of Guatemala and San Salvador for their services on behalf of Honduras.

A correspondent of a London newspaper writes, under date of September 30th, as follows:

"The news received by this mail from Honduras states that Medina is entirely defeated; that having paid to the allies San Salvador and Guatemala the sum of \$54,000 as a ransom for his life, they afterward ignored it, and took him by force from the Spanish consul's house, and he is now in Guatemala in chains.

"It is stated the allied powers, San Salvador and Guatemala, are urging upon the new President Arias to get rid of the gigantic railroad debt by a compromise with the British bondholders, and if possible to offer 5s. in the pound to do so, and to make an offer. To enable Honduras to make this offer, the entire rolling-stock of the railway, etc., has been offered to Mr. Meiggs, the contractor for the Costa Rica Railway, for one-third of its cost, or any price that Mr. Meiggs may be disposed to give for it. It is considered impossible to proceed with the undertaking. It now appears that, instead of fifty miles of the railway said to be completed, in reality only twenty-eight miles of lines laid are in working order.

"Information from Belize, British Honduras, says there has been great excitement here some time past, or rather, in Spanish Honduras. Until very recently fighting has been going on

without intermission, and business, consequently, entirely suspended. The ex-President's wife is here, but her unfortunate husband has been carried off a prisoner. There are, it is said, some fifteen candidates for the Presidency. Another account says, 'Medina is made prisoner; it is expected he will be shot.'

Toward the end of the year, the Government resumed its task of organizing the public administration; the country was at peace; and the President began to take great interest in the establishment of primary schools throughout the republic. This condition was about to be disturbed, according to the *Official Bulletin* of the 30th of December, by some refugees from Belize and Kingston, who had been accumulating arms in these places, and preparing an invasion in union with some refugees of Guatemala. The attempt was nipped in the bud by the English authorities.

President Arias had received congratulatory autograph letters from the late President Morales of Bolivia, President García Morena of Ecuador, and Don Amadeo, on his elevation to the provisional presidency of Honduras.

A correspondence had commenced between the British minister in Honduras, Mr. Corbet, and the Government, asking reasons why the payment of the English debt had been ordered to be suspended.

HOPKINS, Rev. ALBERT, LL. D., F. R. S., a distinguished astronomer and physicist, for forty years an instructor in Williams College, born in Stockbridge, Mass., July 14, 1807; died in Williamstown, Mass., May 24, 1872. He was the younger son of Captain Archibald Hopkins, a cavalry-officer, the grandson of Mark Hopkins, a revolutionary officer, and a brother of Rev. Mark Hopkins, D. D., LL. D., President of Williams College from 1836 to 1872. He was prepared for college by his uncle, Rev. Jared Curtis, entered Williams College in 1824 in an advanced class, and graduated in 1826. The first year after his graduation was devoted to the study of agriculture and engineering. In the autumn of 1827 he was appointed tutor in Williams College, and in 1829 elected Professor of Mathematics and Natural Philosophy there. In 1834 he visited Europe, almost entirely at his own expense, to procure philosophical and chemical apparatus for the college. The next year he commenced on his own responsibility the erection of an astronomical observatory for the college, the first ever established in this country in connection with an American college, and the pioneer of the many which now rank with the best in the Old World in their magnificent equipment and their valuable observations. This humble building, though equipped with a telescope and other instruments of but moderate power, under Prof. Hopkins's management, made many discoveries which aided in establishing a high reputation for American scientists. In 1838 his professorship was changed to one of

Natural Philosophy and Astronomy. In 1839 he erected a magnificent observatory for observing and recording the phenomena of terrestrial magnetism. In 1869 David Dudley Field, Esq., of New York, endowed a Memorial Professorship of Astronomy with \$25,000, stipulating that the proceeds should be secured to Prof. Hopkins during his life. From 1835 to 1840 Prof. Hopkins was also Professor of French. Astronomy was his favorite study, and he had made great attainments in that science, being the constant and valued correspondent of the most eminent European astronomers. He had also made frequent contributions on astronomical and philosophical subjects to the Royal Society of Great Britain, and in 1869, a vacancy occurring among the corresponding fellows of that Society, he was elected to the vacant fellowship, an honor not conferred on more than two or three Americans during the present century. But Prof. Hopkins was more than an astronomer: every department of natural science had received his careful investigation; he was thoroughly at home in the realm of physics, an able geologist, and remarkable for his attainments in physical geography and meteorology; a skillful botanist, and the projector and pioneer of those scientific expeditions from colleges, in which Harvard, and Yale, Cornell, and other colleges, have followed with such grand successes. He founded a Natural History Society and an Alpine Club in the college, to which successive expeditions have given a fine museum and collection, and in all ways developed the taste for physical science among the students, by all of whom he was greatly beloved. Much of the work which has been done during the past thirty years, to improve the grounds of the college, and to adorn the beautiful village in which it is situated, has been the direct labor of Prof. Hopkins, or inspired by him. He was licensed to preach by the Berkshire Congregational Association in 1837, and for many years was a stated supply to Congregational churches in Williamstown and South Williamstown, and much of the time acting college pastor. In 1866 he built, largely from his own resources, a chapel at White Oaks, a previously neglected district of the town, where he performed a truly missionary work, and in 1868 organized a church there. His only son, an officer in the late war, fell in battle, in 1868.

HORSES, CATARRHAL EPIDEMIC AMONG, OR *EPIZOOTIC*, a wide-spread disease which prevailed throughout North America in the autumn of 1872, and the winter of 1873, among horses, and to some extent among sheep and cattle. It made its first appearance at Toronto about the 30th of September (some authorities say the 8th or 9th of October), reached New York about the 18th of October, and in ten days there were 40,000 horses attacked by it, and nearly 13,000 in Brooklyn. In less than two months it had reached Galveston, Texas, following the Atlantic slope in its course, and

not long after followed the Mississippi River northward as far as St. Louis, and then turned westward, reaching Colorado, Wyoming, and Nevada, in January, 1873, and California a few days later. It had visited Chicago, and the region of the upper and lower lakes, a little before or about the same time that it appeared in New York. It prevailed throughout New England about the close of October and the early part of November, though considerably earlier in the northern than in the southern portion of the New England States.

The disease received a great variety of names, among which the most common were horse-distemper, horse-plague, epizootic or epizooty, hipporhinorrhœa, horse-influenza, horse-catarrh, etc. Prof. James Law, of Cornell University, who had given the subject very careful attention, said, in a lecture delivered in New York late in October: "The disease is by no means a new one. Between 415 and 412 B. C., a similar disease raged in Greece, Italy, and Sicily. It has also occurred in A. D. 830, 876, 1173, 1259, 1299 (then especially severe), six times in the fourteenth century, 39 times in the fifteenth, twice in the sixteenth, five times in the seventeenth, 15 times in the eighteenth, and 17 times in the nineteenth thus far—probably not more frequently in later times, but apparently so from the lack of full records earlier. It is doubtful, however, whether it had ever before appeared in the United States, certainly not in the present century, unless in a very mild form. Sometimes it has especially attacked horses, dogs, cats, and oxen, and sometimes man. It is essentially an influenza." Its character was certainly epidemic rather than contagious. It extended, as we have said, very rapidly, more so than it was possible for animals to pass from one city to another, and occasionally leaped long distances, as from Rochester, or Syracuse, to New York City, and appearing simultaneously in stables miles apart.

The first symptom was a chill, or shivering, followed very soon by a high temperature of the whole body, and evident fever. The normal temperature of the blood of the horse is 99.5° Fahr., or below in some instances; but, in the very commencement of this disease, it rose to 100°, 102°, or even 104°. The next symptom was a severe cough, accompanied by copious discharges of a watery fluid from the nose, which soon became a thick, yellow, muco-purulent discharge. At this point the horse usually showed a disinclination to take his food. At this stage, suitable treatment would often arrest the disease, and, after remaining stationary for two or three days, the horse would recover completely in a week or ten days, but, in those cases where its progress was not checked, or where the constitution of the animal was somewhat broken, the early symptoms were succeeded by those of a more aggravated character; the cough increased, the pulse became more rapid, the heat rising in fatal cases

as high as 108° Fahr., the respiration was more frequent and labored; the horse drooped, was languid, and his flesh all over the body seemed to be sore; the discharge from the nostrils increased; the air-passages became involved, and the animal grew weaker and weaker, with all the symptoms of capillary bronchitis, or as frequently pneumonia, and sometimes both combined. The general prostration became more noticeable, dysentery often followed, and eventually the horse sank. It was peculiarly noticeable that in good horses, which had not been subjected to any violent exercise, and that had been properly cared for, the disease did not prove fatal. The majority of deaths occurred among very old and worn-out horses, which had not been in sound condition for a long time. The *post-mortem* examinations revealed evidences not unfrequently of bronchitis and pneumonia in the same lung; the larynx and trachea seemed congested, inflamed, and, together with the bronchial tubes, contained a muco-purulent discharge; in fact, the whole mucous membrane seemed involved in the various changes. The spleen was in many instances found enlarged. The various reports circulated as to the contagious character of the disease, and its appearance in some instances among human beings who had the care of the suffering horses, occasioned some alarm, but on careful investigation they proved not to be well authenticated. In regard to the causes and origin of this epidemic, there was great conflict of opinion. Some eminent veterinarians, and among them Dr. McEuchran, of Montreal, regarded it as dependent upon vegetable fungi or spores in the air which were inhaled by the animals and brought on the disease; but, in reply to this, it was very reasonably asked, why horses alone should be affected; and why the disease should skip over extensive districts, and later return to them. Others regarded it as due to atmospheric influences affecting a wide extent of country, and which, through the terrible heat of the summer, and the electrical disturbances of the autumn, had developed an unusual amount of malarial poison to which it was alleged the horse was unusually sensitive. Other veterinary surgeons have entered into very learned disquisitions as to the neoplastic cells, and the possible effect of the excessively electrical condition of the air upon them. The presence of some atmospheric influence, acting most readily and fatally on unsound and overworked horses, and those kept in foul and ill-ventilated stables, though occasionally attacking apparently healthy and vigorous animals, seems to have been very generally conceded, and, whatever was their mode of action, the fact was certain that a free use of powerful disinfectants like carbolic acid, bromo-chloralum, and bichloride of iron, did greatly facilitate the recovery of the animals attacked. Considerable apprehension was felt at first of its contagious character. Facts did not seem to justify this ap-

prehension. There was no positive evidence of its contagiousness, but it was wisely directed that the straw on which the horses were bedded should be burned, because the secretions of diseased animals are never healthful, and might have imparted other diseases, though probably not this specific one.

In the treatment of the disease there was a great diversity of views, and the usual amount of empiricism and quackery. Veterinary medicine is at a very low ebb in this country, and too many practitioners have but their stereotyped formulæ for all diseases of animals. The evident analogy of the disease to the influenzas or epidemic catarrhal fevers which have attacked the human subject four or five times during the present century, and the similarity of the respiratory organs of the horse to those of man, would naturally have suggested a treatment corresponding to that which was so generally successful in those epidemics. But comparatively few of the practitioners seemed to have any reasonable theory of treatment. Fortunately, the disease was not very fatal even without treatment, though its secondary stage was more dangerous than the first, and hence, under all forms of prescriptions, or without any, a majority of the horses recovered. The treatment which proved most effectual in restoring the horses to perfect health, though somewhat slower than the more heroic methods, was attended with better ultimate success. It was as follows: In the first stage (the chill) the horse was covered with two or three blankets, his legs and head swathed or bandaged, and hot washes, infusions of ginger, and capsaicum, and linseed decoction, administered, together with a steam-bath if practicable. Absolute rest was insisted upon. When the cough and discharge from the nostrils indicated that the second stage had come on, and, as was almost always the case, the throat was so sore and painful that the horse was reluctant to take his food because of the pain of deglutition, the whole throat and neck were to be rubbed briskly, several times a day, with a highly-stimulating liniment, such as the ammonia-liniment, with the addition of one-third or one-half oil of origanum, or spirits of turpentine, and some advised even the addition of croton-oil and tincture of cantharides; internally the warm bran mash was continued and one or two teaspoonfuls of chlorate of potash mixed with it. Some gave also from a bottle two ounces of liquor of acetate of ammonia (spirit of mindererus) and half an ounce of spirits of nitrous ether, repeating the dose every two hours, until free perspiration was induced. The animal was allowed to drink frequently, but in small quantities, of cold water. All his food was to be cooked and soft till he recovered. If the weather was fair he was allowed to be taken out for moderate exercise with his blankets on, but not to be trotted, or put to a load, until the cure was complete. The stable

and all its connections were to be thoroughly disinfected every day, and the straw burned if possible, or covered with ground plaster-of-paris if not. Under this kind of treatment the horses generally recovered, unless they were previously unsound or reduced in flesh, or weakened by overwork, in about ten days. If the attempt was made to use them sooner (as, on the stage and horse-car lines, and drays, the temptation was very strong to do so), they very often had a relapse, accompanied by great weakness, profuse perspiration, dropsy, and often very speedy death. The greater part of the deaths occurred from this relapse. It was at one time asserted that farcy, or glanders, was a very common sequel to this influenza, but, so far as we have been able to learn, there are no well-authenticated cases of this disease appearing after the epizootic, except in horses who had manifested symptoms of glanders before they were attacked by the influenza. The aggregate loss of horses must have been large, though the Commissioner of the Department of Agriculture reports that it was not so great as the natural increase of horses during the year, or in other words, that, despite the disease, the actual number of horses in the country had slightly increased from January, 1872, to January, 1873.

HOWARD, General BENJAMIN C., a Maryland jurist and statesman; died in Baltimore, aged 81 years. He was a native of Maryland, and was graduated from Princeton College in 1809, after which he joined the legal profession. He assisted in organizing troops for the defence of Baltimore in 1814, and commanded the Mechanical Volunteers at the battle of North Point, September 12, 1814, when the American forces successfully resisted the advance of the British army of 9,000 on Baltimore. Mr. Howard served in the House of Representatives from 1829 to 1833, and again from 1835 to 1839. He was chairman of the Committee on Foreign Relations, and in that capacity drew up a report on the North-eastern boundary question. He was also for

many years reporter of the Supreme Court of the United States, and his "Reports of Cases in the Supreme Court of the United States from 1843 to December term in 1855," in 18 vols. (about 8 vols. of the new edition edited by Judge Curtis), are said to be among the best of the series. General Howard took part in the Peace Congress of 1861, which was his last participation in public affairs.

HUNGARY, a country in southeastern Europe, forms the eastern half of the Austro-Hungarian monarchy. The Emperor of Austria is at the same time King of Hungary, which is united with the western or cis-Leithan portion of the monarchy by means of a common imperial ministry, and a joint meeting of delegations from both halves of the monarchy.

The lands of the Hungarian crown consist of Hungary proper, Transylvania, the royal free city of Fiume, Croatia, and Slavonia, and the Military Frontier. The free city of Fiume, with its port and a rural district, was, by a law passed in 1868, separated from Croatia, to which it had formerly belonged, and, in pursuance of this law, received on July 28, 1870, a royal governor, who is immediately subordinate to the Hungarian ministry. The extent of the Military Frontier has been considerably reduced by the incorporation of a portion with Hungary proper. At the close of the year 1869 the area and population of the lands of the Hungarian crown were as follows:

	Area.	Population in 1869, inclusive of military.
Hungary proper.....	84,441	11,633,168
Transylvania.....	20,287	2,135,024
Fiume, royal city.....	7.38	17,894
Croatia, Slavonia.....	8,484	1,150,158
Military Frontier.....	5,837	598,228
Total	119,086	15,509,455

The numerical strength of the several nationalities was, in 1869, estimated by Dr. Ficker ("Die Völkstämme der Oester-Ungarischen Monarchie," Vienna, 1869) as follows:

	Germans.	SLAVI.		ROUMANIANS.		Magyars.	Other Races.
		North.	South.	West.	East.		
Hungary.....	1,540,000	2,310,000	797,000	500	1,447,000	4,895,000	499,500
Croatia and Slavonia.....	81,000	9,000	1,063,000	1,000	300	15,000	8,000
Transylvania.....	235,000	2,000	1,000	1,300,000	578,000	104,000
Military Frontier.....	4,000	1,000	690,000
Total.....	1,810,000	2,222,000	2,441,000	1,500	2,648,000	5,413,000	612,000

The following table exhibits the religious statistics of the country:

	CATHOLICS.			ORIENTAL.		Lutherans.	Reformed.	Unitarians.	Other Christian Denominations.	Jews.	Other Non-Christians.
	Roman.	Greek.	Armenian.	Greek.	Armenian.

Arad.....	31,796	Agram.....	20,637
Grosswardeln.....	29,240	Raab.....	20,253

In the budget for the year 1872 the revenue was estimated at 169,110,719 florins; the expenditures at 232,209,894 florins; deficit, 63,098,675 florins. The public debt at the close of the year 1870 was about 889,500,000 florins.

The length of the railroads in operation, on January 1, 1872, was 4,462 kilometres; of railroads in course of construction, 2,052 kilometres. The length of the telegraph-lines, in 1870, was 10,156 kilometres; of telegraph-wires, 27,764 kilometres.

According to the official census of 1869,* there were in Hungary, under the political division of the country, 54 counties, circles, sees, or districts; in Transylvania, 26; Croatia and Slavonia, 8; Military Frontier (regimental districts), 15; total, 103. To these must be added the free city of Fiume with its territory.

The number of "royal free and privileged cities" was 48 in Hungary, 80 in Transylvania, 1 in Fiume, 8 in Croatia and Slavonia, 11 in the Military Frontier (military communities, 11); total, 98. The number of towns with organized magistrates was 88 in Hungary, 8 in the Military Frontier (fortresses).

Besides, there were

	Market Towns.	Villages.	Houses.
Hungary.....	663	9,466	1,753,163
Transylvania.....	48	2,307	438,089
Total.....	711	11,673	2,191,251

Total lands of Hung'n Crown	769	13,373	2,450,213

There are in the lands of the Hungarian crown 7,653,560 persons of the male; and 7,763,767 persons of the female sex. There were 2,472,547 men, and 1,517,972 women, or in all, 3,990,519 persons who were able to read and to write, and 452,274 men, and 892,018 women, or 1,344,292 persons who were able to read but not to write; the remainder are entirely illiterate. As regards the occupation of the inhabitants, 5,064,763 are engaged in agriculture, forestry, fishing, or mining; 646,964 in industrial and mechanical pursuits; 133,582 in commerce; 177,241 are clergymen, officers, teachers, physicians, lawyers, artists; 80,680 are proprietors of houses or rentes; 1,196,414 are servants; and 8,117,693 (of whom

2,951,227 were over fourteen years old) were without any specified employment.

The agricultural statistics in 1870, as compared with those of the former census of 1857, were as follows:

	1857.	1870.
Horses.....	2,096,065	2,153,819
Mules.....	2,361	3,266
Asses.....	28,275	30,480

Sheep.....	11,281,805	15,076,997
Goats.....	480,973	572,961
Hogs.....	4,504,905	4,443,279
Beehives.....	?	617,407

The Diet of Croatia, which, after several adjournments, had been opened on January 15th, was dissolved by imperial decree on January 19th. The Government officially stated that this measure had become necessary because the Diet denied the legality of the compromise proposed. The real cause was, that the negotiations between the National Croatian party and members of the Hungarian ministry, which, in the latter part of the year 1871, had been carried on in Vienna, had proved a failure. The subsequent session of the Hungarian Diet was, on April 16th, closed by the Emperor-King in person. The speech from the throne pointed out that already, for five years, questions affecting both portions of the monarchy alike have been successfully disposed of without the slightest disagreement. The present Diet has fulfilled its task in contributing to the development of the country's prosperity by judicial and administrative reforms. After enumerating the various laws passed during the session, the speech from the throne adds that the organization of lower courts and the separation of the judicial from the administrative departments have increased the public safety. The organization of municipal and parochial establishments, based on the principle of self-government, insures a strict enforcement of the laws. The speech dwells upon the just manner in which the public revenue, which has greatly increased, has been applied, mentioning the considerable sums voted for the improvement of justice, public instruction, a complete net-work of railways, and the embellishment of the capital. The speech recalls the fact that the expenditure for the development of the Honved Institution was cheerfully voted, and considers the accomplishment of all these measures, without increasing the taxes, to be a proof of the increasing prosperity of the country. The Emperor expresses a hope that, after the abolition of the institutions of the Military Frontier province, there will shortly not be found throughout the monarchy any fraction of the population that does not fully enjoy constitutional rights. The speech regrets that, in consequence of the obstacles to discussion raised within the Diet during the last portion of the session, the Electoral Bill and other measures could not be passed. The friendly relations prevailing with foreign pow-

* The following figures are taken from Keleti, "Uebersticht der Bevölkerung des Staatsgebietes, etc., sämtlicher Länder der Ungarischen Krone," Pesth, 1871.

ers afford a hope that the new Diet, which will before long be convoked, will be able to prosecute the labors it has commenced, amid the blessings of peace. The leader of the Left, Ghicz, declared that he would retire from public life. In a full review of the political situation, he defended the principles of the Left, but at the same time uttered warnings against some dangerous practices used for obtaining popular favor both on political and financial questions.

The election for a new Diet of Croatia ended in the beginning of June. Among the members elected, 48 belonged to the National Croatian party, 27 were Unionists (favorable to the continuing union with Hungary), and 4 undecided. Of the "viril votes" (members who belong to the Diet in virtue of their office or nobility, namely: 9 archbishops and bishops, 7 Obergespans [presidents of counties], and 41 magnates), the majority were supposed to be friendly to the Government; but, at all events, a majority of the whole body was believed strongly to favor the Slavic tendencies in Croatia.

The elections in Hungary proper began in June, and ended toward the close of July. The Hungarian Diet is elected for a term of three years, and the election, lasting several weeks, is generally attended with a great deal of excitement. Most of the time is needed for the registration of the electors, which is done at every election. A special apparatus is created for this purpose, as well as for the elections themselves. In each county and borough the community elect a special committee, which has the whole management of the elections, to the exclusion of the magistrates. This preliminary election gives rise, from the first moment, to an agitation scarcely inferior to that produced by the election of the members themselves, for the result of this latter is believed to depend, to a large extent, upon the former. The law leaves great latitude to the special committee, and the defeated party generally complains that its defeat is more due to skilful operations of the committee than to the real opinions of the majority of voters. The electoral qualifications being of many kinds, and rather vaguely worded, it may give to them in every single case any interpretation it likes. For instance, in boroughs, a house worth 300 florins entitles to a vote, but the standard of value which would be the rating of it is not indicated. Thus, the registering committee may deal with this qualification as party purposes may require: and there is but a nominal appeal from this decision. After the votes have been registered, the county or town is divided into as many electoral districts as there are members to be chosen. This division into districts has, in the main, remained as it was first made by the counties and towns in 1848, but it may always be corrected so as to shift the votes, taking them away where they may not be required, and adding them where they may turn the scale.

Another important decision which lies in the hands of the committee is the fixing of the polling-place for each district, which may be done so as to make the polling most convenient to the party to which the majority of the committee belong, and as inconvenient as possible to the adverse party. Another power of the committees is the decision whether the voting should be open or by ballot. The law of 1848 says distinctly that the vote should be given openly, as the custom has been from time immemorial in all elections in Hungary, and the question arose in former Diets whether an election which was made by ballot was not illegal; but the Diet, without saying that it was legal, allowed it to stand, so that now it is optional in each constituency. At the present elections, as in former ones, in most constituencies open voting was adopted, and the way in which the ballot was managed in those constituencies which adopted it was by no means calculated to gain friends for it among those who wish to put an end to corrupt practices.

When the elections closed in July, it was found that the majority of the Deakist party was larger by about 17 votes than it had been in the preceding Diet. The non-Magyar "nationalities" (Slavi and Roumanians) had in several instances gained new members; but the Left lost so many seats as to strengthen the majority for the Deakists. Deak himself was reelected in the central district of Pesth, by 1,100 against 180 votes. The announcement of this result was the signal for an enthusiastic demonstration, and M. Deak, in reply to the congratulations of the people, delivered a speech, which was received with immense cheering.

The new Croatian Diet was opened at Agram, on June 15th, by the royal commissary, Archbishop Michailovic. After long negotiations between the National party and the Unionists, a compromise was successfully concluded between the latter and a part of the former, who, although demanding a thorough revision of the relations of Croatia to Hungary, yet consented to the continuance of the union. The points on which the two parties agreed were laid down in an address to the Emperor, which was presented by a deputation at Vienna, on July 11th. The reply of the Emperor directed attention to the fact that Croatia already had received, by the "union law of 1868," a large share of provincial self-government, but, at the same time, intimated that the work of revision might be continued.

The Hungarian Diet was opened, on September 4th, by the Emperor Francis Joseph in person. The speech from the throne urges perseverance in the work of internal reform, and congratulates the kingdom and empire on their happy relations with foreign powers. The ministry was slightly modified, Dr. Th. Pauler, late Minister of Public Instruction and Worship, being appointed Minister of Justice, *vice* Herr von Bitto, who had resigned; Herr

Trefort was appointed Minister of Public Instruction and Worship.

The meetings of the cis-Leithan and trans-Leithan delegations took place during the year at Pesth. They were opened on September 17th, and adjourned on October 24th. The proceedings were harmonious and satisfactory. In the Austrian delegation, the president, Herr Hopfen, stated that the common expenditure of the empire for 1878 would be only 8,500,000 florins in excess of that of the previous year, the cis-Leithan quota being even 1,000,000 less. He pointed out also that, in accordance with the declarations of the Government respecting the normal budget for the following year, no increased demands upon the country were to be expected for the requirements of the army. Count Andrássy, in his parting reply to the Austrian delegation, was able to announce that all the resolutions agreed upon by the two delegations would at once receive the sanction of the Emperor.

On December 2d the president of the Hungarian ministry, Count Lonyay, in consequence of very violent personal attacks made upon him in the Second Chamber, chiefly by Czernatony, a member of the Left, tendered his resignation, which was accepted by the Emperor. After an interview of the Emperor with Deak, M. Szlavy, the Minister of Commerce, was charged with the reconstruction of the ministry. Even before the real crisis, two of the ministers, M. Kerkapolyi, Minister of Finance, and M. Tisza, the Minister of Public Works, had repeatedly expressed an intention to withdraw, but they were both induced to remain for the present, so that the new cabinet, with the exception of the late Premier, Count Lonyay, comprised all the members of the old one. In place of M. Szlavy, Count Joseph Zichy, Governor of Fiume, was summoned to take the ministry of Commerce and Agriculture. Before going to Fiume, he had occupied a prominent position in that department.

I

IDE, Rev. GEORGE BARTON, D. D., an eminent Baptist clergyman, scholar, and author, born in Coventry, Vt., in 1806; died in Springfield, Mass., April 16, 1872. His father, Rev. John Ide, had removed from New York into Northern Vermont, in 1800. His early opportunities for education were very good, notwithstanding the sparseness of the population. He grew up with the determination to be a lawyer, and in his eighteenth or nineteenth year commenced the study of the law in Brandon, Vt., teaching school in winter in his native town, to help himself in the expenses of a professional education. While thus engaged, and avowing skeptical tendencies, he met with a change, during a revival in Coventry, which modified his whole subsequent career. He now became convinced that it was his duty to prepare for the ministry, and, after a short period of study, entered Middlebury College, whence he graduated in 1830, with the highest honors of his class. During his college course, he preached occasionally, and soon after his graduation he was ordained, it is believed, at Derby, Vt. He was settled for a short time at Passumpsic Village, and thence removed to Brandon, Vt., in 1832, and was called thence to Albany, N. Y., late in 1834. His reputation for eloquence and power in the pulpit was such that Albany was not suffered to retain him long, and at the close of 1835 he was installed pastor of the Old Federal Street Church in Boston. He was not quite at home in Boston, and, in 1838, accepted the call of the First Baptist Church in Philadelphia to be their pastor. He remained in Philadelphia fourteen years, and ranked in scholarship, eloquence, and efficiency, as the peer of any of the clergymen of that city. In 1852, being desir-

ous that his church should remove up-town, and finding some of his people were reluctant to do so, he accepted a call, which he had just received, to Springfield, Mass., where the last twenty years of his life were spent in a most successful and efficient pastorate. Dr. Ide was a hard student all his life. His library, of somewhat more than 5,000 volumes, all bound with his own hands, was admirably selected for working purposes, and was diligently used. He was a vigorous and polished writer, using language with great precision, and with a remarkable lucidity and logical power. He was somewhat averse to writing for publication, though, in the course of his forty-two years' ministry, he had published a considerable number of volumes. Of these, a few were polemical, several were Sunday-school books, which are models of their kind, more were occasional sermons and addresses, of which not less than twenty-five or thirty appeared in print, and three series of "Bible Pictures," or "Life Sketches of Life Truths," embracing vivid pen-portraits of the lives and deeds of Christ and his Apostles. He was a very frequent contributor to the religious periodicals and reviews. His death was very sudden, and was said to be from disease of the heart.

ILLINOIS. The adjourned session of the Legislature of 1871 did not come to a close until the 9th of April. That portion of its work falling within this year was of a miscellaneous character, having only a local importance. The act relating to the sale of intoxicating liquors, of which mention was made in the preceding volume of this work, called forth considerable opposition, chiefly among manufacturers and sellers of the liquors. A State convention of those interested in this busi-

ness was held at Springfield, where there was a spirited discussion, and the following resolutions were unanimously adopted:

Whereas, The Twenty-seventh General Assembly has enacted a so-called temperance law, which in effect is the prohibition of the sale of spirituous liquors—a law odious in its provisions, and destructive of the rights of persons; and—

Whereas, When the present Legislature was elected, the temperance question was not agitated before the people, and consequently our Representatives did not know the sentiments of the people concerning the same; and—

Whereas, Our Representatives were not instructed to pass such a law, nor was the subject discussed before the people; therefore, we, the people of the State of Illinois, in convention assembled, do hereby resolve—

1. That the movements to enforce a sumptuary law, the nature thereof tending to restrict personal liberty and rights, are revolutionary and destructive, and we pledge our efforts to procure their speedy repeal by all legal and proper means.

2. That the law is unconstitutional, because it impairs the obligations of existing contracts for the leasing of property for the sale of liquors, made before its enactment.

3. That it is utterly repugnant to every principle of common law and right, because it subjects the property of a person to sale by legal proceedings, and in which he is not a party, and of which he had no notice.

4. That a law which makes original judgments of justices of the peace a lien upon real estate is both impolitic and unsafe.

5. That we oppose the so-called temperance law, because, while it hypocritically affects to be in the interests of an advanced morality, it is only a species of class legislation in behalf of the wealthy and against the poorer but equally worthy citizen, giving the former power to poison (as alleged), while the same is refused to the latter.

6. That the attempt to substitute the personal liability of one person for the acts of another is an innovation monstrous and odious, and subversive of common law and right and personal liberty.

7. That it obstructs the production of spirit and wine-producing grain and fruits, thereby circumscribing our agricultural interests, the great source of wealth in our State.

8. That, while we abhor habitual drunkenness and the habitual drunkard as much as any so-called temperance men, we would, as law-abiding citizens, readily submit to the rational regulation of the liquor-traffic, and would make it a felony to sell adulterated and unwholesome liquor of any kind, and as such we would require the keeping of respectable establishments, and especially such as would hold a common drunkard responsible for his own acts.

9. That the General Assembly be respectfully and earnestly requested to repeal the law or submit the question to a vote of the people.

10. That, upon the basis of the above-expressed principles, we will form associations for the preservation of the personal liberty granted us by the Constitution of the United States, and that we will agitate the formation of kindred associations in all the cities and towns in Illinois, and endeavor to perfect a great central union of all these associations.

11. That we will not give our support to any political organization that will not declare its opposition to all sumptuary laws.

12. That our thanks are due to all members of the Legislature who so manfully battled against the passage of the infamous and unjust temperance law, and we hereby tender to them our united indorsement.

The State Convention of the Republican party was held at Springfield, on the 22d of

May. Some time before this date, several Republican members of the Legislature had addressed a letter to ex-Governor Richard J. Oglesby, asking if he would accept the nomination for Governor, if it were tendered him. He signified his willingness to do so, in a letter, in which he took occasion to laud the character and achievements of the party. He was accordingly nominated by acclamation. The rest of the State ticket was as follows: For Lieutenant-Governor, John L. Beveridge; for Secretary of State, George H. Harlow; for Auditor of Public Accounts, Charles L. Lippincott; for State Treasurer, Edward Rutz; for Attorney-General, James K. Edsall. Twenty-one presidential electors were also nominated, and delegates appointed to the National Convention, of the party, to be held in Philadelphia. The following resolutions were adopted by the Convention:

Resolved, That the past acts of the Republican party are a better guarantee for the future than the mere resolutions of a new party. It is the only party in the United States that, while in power, destroyed, or ever tried to destroy, that infamous "sum of all villainies," chattel slavery—the only party that questioned the dogma that "to the victors belong the spoils of the vanquished;" and endeavored to introduce reforms into the civil service, so that honesty, capacity, faithful attention to official duties, might be a better recommendation to office than partisan services; and whose President has proclaimed this new rule of action to the nation. It is the only party that introduced the eight-hour labor-system in the public service. It is the only party that has made treaties with other governments fully protecting our naturalized citizens from foreign claims of allegiance. It has shown unusual energy in guarding our frontier settlers from Indian raids; and the Indians from frauds and plunder of Government agents. Under its patriotic, resolute, and statesmanlike administration, a deeply-plotted and long-matured rebellion, that was declared by the enemies of our country, both domestic and foreign, as unconquerable, has been effectually suppressed, and peace and union, law and order, in a great measure, restored. With a magnanimity unparalleled in the history of nations, no one, for rebellion, perjury, or treason in the late conflict, has been deprived of even the right of suffrage, and few of the right to hold office. And, with "charity for all and malice toward none," universal amnesty will be proclaimed as soon as it can be done consistently with the public safety.

Resolved, That the national taxes and the national debt have both been reduced. The public revenue has been faithfully collected, and defaulting officers promptly removed and prosecuted for their defalcations. The credit of the nation was never in a better condition, and the people have been furnished with a good national currency, that will soon be made better, and equal to gold and silver. And, above all, the humblest citizens have been defended in their constitutional rights at home and abroad.

Resolved, That the principles of the Declaration of Independence, and of the recent amendments to the Constitution of the United States, to secure the enjoyment of natural and civil liberty, adopted by the influence of the Republican party, will not execute or enforce themselves; and no party that does not cordially sympathize with those principles, or that is chiefly composed of men hostile to those principles and to those amendments, is entitled to the confidence or support of patriots and freemen, or can be safely intrusted with the national Government.

Resolved, That, by the fundamental principles of the Republican party, it is the right and duty of all its supporters to condemn every existing abuse in national, State, and municipal governments, and zealously advocate all needful reforms, as has been done with success from the time the party was first organized. No party that ever existed in this country can justly boast of so much independence of thought, speech, and action. It is this freedom that has drawn to it the enthusiastic support of so many intelligent, unbiassed, and generous young men, and repelled so many sordid and disciplined office-hunters, who would make merchandise of their fellow-men, by reducing them to political slavery.

Resolved, That all sovereignty emanates from the people, a portion of which they have delegated to the United States Government, for national purposes, and to guard the people against oppression in and out of the United States; a still larger portion of which they have delegated to State governments, for local, domestic, and municipal purposes, and the residue of that sovereignty over natural rights and civil privileges they have expressly reserved for themselves in bills of rights and restrictions against the encroachments of national, State, and municipal governments; and no sound Republican wishes to deprive the nation, the States, counties, cities, towns, villages, or individuals, of any of their legitimate constitutional rights; and all pretences that the Republican party desires or intends to establish a consolidated government of unlimited powers, are gratuitous slanders, unworthy of the age.

Resolved, That the Republican party is the party of progress, and human rights, and duties. We are for equality of all before the law, and the preservation of constitutional rights, and we disapprove of all unconstitutional legislation for the cure of any of the disorders of society, whether irreligion, intemperance, or any other evil. We oppose the surrender of individual freedom to those who ask that their prejudices, practices, or creed, shall be the law of the land; we demand equal and just rights and duties for every human being, and the largest liberty consistent with the public good, and the preservation of social order.

Resolved, That the necessities of the Government require so large a tariff upon importations that the question of free trade is not one now before the American people; the only question left is, how to so adjust the tariff that it will most promote the labor, industry, and general welfare of the country, without being oppressive to any interests of society; and we know of no better way to dispose of this subject than that adopted by the Republican party in Congress: to learn wisdom from experience, reduce taxation as fast as possible, and remove all unnecessary burdens upon the necessities of life.

Resolved, That, in adjusting the details of a system for raising revenue, to cover the necessary requirements of the Government and meet its liabilities, care should be taken to so regulate the imposts that they will press least upon the growing industries of the country, cheapen the necessities of life, and afford to labor the fairest promise of permanent reward.

Resolved, That we most heartily indorse the recommendation by President Grant of the adoption of proper measures by the national Government for the protection of immigrants, recognizing as we do, in those natives who flock to our shores, a most valuable addition of other countries to the population and wealth of our whole country.

Resolved, That the gratitude of the nation is due to our soldiers and sailors, whose patriotism and valor saved the Union, and made our country, *in fact* as well as in name, a nation of freemen.

Resolved, That the people of the United States owe Ulysses S. Grant a great debt of gratitude for his patriotic devotion to the interests of the people, in war and in peace; that we have unabated confidence in his integrity, patriotism, ability, prudence, and

judgment; and hereby instruct our delegates to the Philadelphia Convention to vote for and use all honorable means to secure his nomination as the Republican candidate for the presidency of the United States.

The delegates of the Democratic and Liberal Republican parties of the State met in separate conventions, at Springfield, on the 26th of June. The following resolutions were adopted in the Democratic Convention:

Resolved, By the Democrats of Illinois in convention assembled, That the platform of principles adopted by the Cincinnati Convention, together with the clear interpretation of the same enunciated in the letter of Horace Greeley, in accepting the nomination of that convention for the office of President of the United States, offers a common ground upon which liberal men of all political parties can consistently unite in opposition to personal government and its attendant official corruption.

Resolved, That our delegates, this day chosen, to represent us in the Democratic National Convention to assemble at Baltimore, be instructed to act and vote as a unit in the spirit of the foregoing resolution.

The Liberal Republicans, over whom Governor Palmer presided, adopted the following platform:

Resolved, That we cordially approve and reaffirm the principles contained in the Cincinnati platform; and that in the success of those principles, and particularly in the thorough reformation of the civil service and the discontinuance of political patronage whereby the taxes collected from the people are employed to override the will of the majority, we see the only salvation of a free government.

Resolved, That in the administration of our State affairs every effort should be made to lighten taxation by the strictest economy in the expenses of the government; that in the construction of our public buildings and in the management of our public institutions, all extravagance should be avoided; that the officers of the government should be held to strict accountability in the discharge of their duties, and that all unnecessary and cumbersome legislation should be avoided.

Resolved, That we can never forget the sacrifices made by the soldiers and sailors whose bravery saved the nation, and we deem it our duty to secure to them the full reward of their patriotism; we therefore declare ourselves in favor of the equalization of their bounties and of the most liberal recognition of their services in the public employment of the country, having regard only to their fitness for such employment and not to the rank they held in the military service.

Resolved, That the cause of equal rights cannot be considered established as long as any opposition thereto exists. Therefore, we hail with unfeigned satisfaction the evidence presented to us of the cessation and disappearance of such opposition in all parts of our common country.

Resolved, Upon this declaration of principle we take our stand before the people of this State as the party of Liberal reform, of reconciliation and peace, inviting all persons, without regard to previous political association, to co-operate with us in the endeavor to secure the success of the principles which, while just and true in themselves, are broad enough to include all the political necessities of the hour and the aspirations of every patriotic citizen.

Resolved, That the administration of Governor Palmer has been characterized by a noble spirit of independence and a fearless adherence to the cause of morality, and the interests of the people as he understood them; and thanks are due and are hereby tendered to him for his jealous guardianship of the public Treasury and the example he has furnished

of an executive who has governed not in the interest of any party or clique, but with an eye single to the paramount good of the whole people.

A conference committee of nineteen members from each convention was appointed to agree upon a State ticket. The following was reported to both bodies, and adopted without opposition: For Governor, Gustavus Koerner; Lieutenant-Governor, John C. Black; Secretary of State, Edward Rummel; Auditor, Daniel O'Hara; Treasurer, Charles H. Lanphear; Attorney-General, Lawrence Weldon.

Delegates to the Baltimore Convention were appointed by the Democratic Convention, and the duty of nominating presidential electors was referred to the State Central Committees of the two parties in joint session.

There was a convention of "straight-out" Democrats on the 25th of August, at which the duty of nominating State officers and adopting a platform was left to the State Central Committee. The ticket agreed upon by them was as follows: For Governor, Sidney Breese; for Lieutenant-Governor, D. S. Starrs; for Secretary of State, Eth. Sutton; for Auditor of Public Accounts, O. H. Wisterman; for State Treasurer, Henry West; for Attorney-General, George A. Meech. The name of Benjamin G. Wright was afterward substituted for that of Sidney Breese, for Governor. The committee also called upon Democrats in different parts of the State to keep up their independent organization and make "straight-out" Democratic nominations for the Legislature and for local offices. It was also resolved "That we have no sympathy with traitors and will not vote for any man who does not support true Democratic principles, as enunciated at Louisville, or who is willing to renounce the party which formed this government and secured its infant prosperity, or who is willing to see it overthrown by a party which attained power in the midst of prosperity, and has since discarded every principle advocated and sustained by its founders."

At the election on the 5th of November, the total vote cast for presidential electors was 429,076; of this, those in favor of Grant and Wilson for President and Vice-President received 241,248; those for Greeley and Brown, 184,770; those for O'Connor and Adams, 3,058; majority in favor of Grant and Wilson, 56,478. The entire Republican State ticket was chosen. The whole vote for Governor was 437,048, of which Oglesby received 257,774; Koerner, 197,084; and Wright, 2,185; majority for Oglesby, 40,690.

The right of women to vote was denied by Judge Jameson, of the Supreme Court, in the early part of the year, in a case brought by two women against the inspectors of election for refusing to register them as voters. The court took the ground that citizenship does not involve the right to vote; that women are citizens as minors are, and may be made voters if the people please, but are not now voters;

that the fourteenth and fifteenth amendments do not affect the question of female suffrage; that "history and common-sense" refute the notion that women have under these amendments acquired any rights they did not previously possess; that there is no such thing as a "natural right" to the suffrage, that right being wholly artificial, and bestowed or withheld by that portion of the community which possesses the power to bestow or withhold it. On the general question of the policy of amending the laws so as to permit women to vote, Judge Jameson said "he saw no ground for refusing it whenever a general demand for the suffrage was made by women themselves." But he added that "if they wish to enter the capitol as legislators, they ought to wait till they can effect their entrance there legally and directly by the door, and not seek to climb thither some other way through passages intended for different purposes."

The financial condition of the State is most satisfactory. The total receipts of the Treasury, for the two years ending November 30th, were \$15,252,055.52, made up of the following items:

Balance on hand December 1, 1870.....	\$4,502,970 88
Reserve Fund.....	3,445,826 86
State Debt Fund.....	1,105,401 80
Interest Fund.....	6,730 47
School Fund.....	1,809,108 50
Illinois Central Railroad Fund.....	934,379 40
Canal Redemption Fund.....	1,583,630 15
Unknown and Minor Heirs' Fund.....	742 29
Local Bond Interest Fund.....	1,804,066 77
Total receipts.....	\$15,252,055 48

The disbursements for the same period amounted to \$13,201,275.14, drawn from the various funds in the following proportions:

Revenue Fund.....	\$4,312,640 88
State Debt Fund.....	2,597,982 82
Interest Fund.....	310,219 23
School Fund.....	1,835,931 21
Illinois Central Railroad Fund.....	1,700,137 59
Canal Redemption Fund.....	1,193,807 69
Unknown and Minor Heirs' Fund.....	794 26
Local Bond Interest Fund.....	1,834,242 58
Total disbursements.....	\$13,201,275 14

The principal items of expense during the two years were as follows:

Legislative.....	\$363,062 22
Executive.....	180,158 74
Judicial.....	304,352 63
Educational.....	2,206,264 58
Educational and charitable.....	305,516 73
Charitable.....	918,784 56
Penal and reformatory.....	369,333 23
Agriculture.....	39,007 03
Commerce.....	238,661 42
State Indebtedness.....	4,383,379 90
New State-House.....	796,641 81
Local Bond Funds.....	1,834,242 78

The balance remaining in the Treasury, on the 1st of December, was \$2,050,776.28.

The total bonded debt of the State, on the 30th of November, 1870, was \$4,890,937.30, and since that date, under an act approved October 20, 1871, revenue deficit bonds have been issued amounting to \$250,000, which increased the debt to \$5,140,937.30. Payments were made on this principal during the two years, amounting, in the aggregate, to \$3,080,786.67, which left the debt, on the 1st of De-

cember, 1872, at \$2,060,150.68. This indebtedness was made up of the following items:

Interest Bonds (inscribed stocks), 1877.....	\$963,445 43
Refunded Stock, Coupon Bonds 1876.....	60,000 00
Refunded Stock, " 1877.....	280,000 00
Thornton Loan Bonds.....	86,000 00
Normal University Bonds.....	28,000 00
\$1000 War Bonds.....	178,000 00
\$500 War Bonds.....	194,000 00
\$100 War Bonds.....	65,600 00
Revenue Deficiency Bonds.....	250,000 00
State indebtedness called in by proclamation of the Governor for payment not yet surrendered to the State:	
New Internal Improvement Stock, amounting to.....	22,900 21
Refunded Stock 1870.....	7,000 00
One old Internal Improvement Bond.....	1,000 00
Thirteen Canal Bonds.....	18,000 00
Two Bonds Interest Stock.....	2,186 00

Total outstanding Nov. 30, 1873..... \$2,060,150 68

Before the 3d of January, 1873, \$327,683.45 had been paid on this, leaving the total outstanding debt, at that date, \$1,732,467.18. It is expected that before the close of the present administration the State will be virtually out of debt, with an annual income, from the Illinois Central Railroad, and the Illinois & Michigan Canal, of not less than \$650,000.

The tax levy for State purposes in 1871 amounted to about nine mills to the dollar on the equalized valuation of property, 5½ mills being for the expenses of the State government, 2 mills for the support of public schools, and 1½ mill for redemption of canal bonds. The total levy for 1872 was 7½ mills: 3½ for general purposes, 4 for payment of interest on the State debt, 2 for the support of public schools, and 1½ for canal redemption.

The number of school districts in the State is 11,251; the number in 1871 was 11,112; in 1870, 11,066. The number of children between the ages of 6 and 21 in 1872 was 882,693, of whom 874,526 were white, and 8,167 colored; in 1871, the number was 878,417, of whom 870,708 were white, and 7,714 colored. The principal school statistics for the last biennial period are as follows:

	1871.	1872.
Number of public high-schools.....	91	86
Number of graded schools.....	651	611
Number of ungraded schools.....	10,414	10,697
Whole No. of free public schools..	11,156	11,396
Number of private schools.....	460	436
Number in 1870.....		580
Decrease.....		94
Number of pupils in private schools	34,883	34,784
Number in 1870.....		41,001
Decrease.....		6,217
Aggregate number of day schools in session.....	1,636,033	1,712,436
Aggregate number in 1870.....		1,558,328
Increase.....		159,198
Average number of day schools sustained.....	146	151
Average number in 1870.....		149
Increase.....		9
Average number of month schools sustained.....	6.7	6.9
Average number in 1870.....		6.7
Increase.....		.3

	1871.	1872.
Whole number of male scholars.....	353,643	345,622
Whole number of female scholars..	319,144	318,426
Total number of scholars attending.	672,787	664,049
Total number of scholars attending in 1870.....		682,715
Increase.....		9,834
Whole number of male teachers....	8,896	9,094
Whole number of female teachers..	11,459	11,839
Total number of teachers.....	30,355	30,924
Total number of teachers in 1870..		30,061
Increase.....		863
Total number of days taught.....	2,018,226	2,072,922
Total number of days taught in 1870		1,986,940
Increase.....		74,753
Grand total number of days' attendance.....	50,108,492	49,842,481
Grand total number of days' attendance in 1870.....		47,596,931
Increase.....		1,945,550

The average daily attendance is thus stated: In 1870, 339,540; in 1871, 341,686; 1872, 329,799, showing the decrease of attendance in two years to be 9,741, while the number of children of school age in the State is increased by 20,069. During the past year there have been built 518 school-houses, against 470 built in 1871. They cost \$761,622.39, being an average cost of \$1,442.46. In 1870, 3,808 school districts owed debts, in 1871, 3,617, and in 1872, 2,621. The total value of school-houses, grounds, furniture, and libraries, in 1872, is \$19,876,708, being an increase in two years of \$5,017,408. The figures of the cost of the school system per scholar are as follows:

FOR TUITION ALONE.		
Upon school census.....	\$4 63	\$4 22
Upon number enrolled.....	6 05	6 55
Upon average daily attendance.....	11 91	12 16

The funds for the support of common schools in 1871 and 1872 were derived from the sources indicated in the subjoined statements:

1871.	
Amount of the two-mill State school-tax apportioned to counties by the Auditor....	\$900,000 00
Amount of interest upon the school, college, and seminary funds, apportioned to counties by the Auditor.....	54,564 93
Amount raised by an <i>ad valorem</i> tax, in the school districts, for general school purposes.....	4,995,396 92
Amount of interest received on the township funds.....	430,318 36
Amount received on district bonds issued for building purposes.....	917,541 29
Amount received from rents.....	58,603 14
Amount received from sales of school property.....	16,131 17
Amount received from fines and forfeitures	10,738 03
Amount reported as received from various other sources.....	197,498 72
Total reported receipts in 1871.....	\$7,470,661 55

1872.	
Amount of the two-mill State school-tax apportioned to counties by the Auditor....	\$900,000 00
Amount of interest upon the school, college, and seminary funds, apportioned to counties by the Auditor.....	54,564 93
Amount raised by <i>ad valorem</i> tax, in the districts, for general school purposes....	5,292,943 65
Amount of interest received upon the township funds.....	523,811 47
Amount received on district bonds, issued for building purposes.....	294,323 90
	\$7,070,651 95

1872.	
Brought forward.....	\$7,070,651 95
Amount received as interest on district funds loaned.....	82,332 37
Amount received, borrowed money.....	230,699 80
Amount received from fines and forfeitures.....	13,946 06
Amount received from sales of school property.....	11,307 86
Amount reported as received from various other sources.....	102,273 73
Total reported receipts in 1872.....	\$7,500,122 76
Total amount expended in 1871, for all school purposes.....	\$7,153,367 41
Total amount expended for all school purposes in 1872.....	\$7,490,699 34

The annexed statement shows the several items and amounts which make up the permanent principal of the common-school funds of the State. A comparison of the present aggregate amount of the township fund, with that reported in 1870, shows an increase, in the last two years, of \$22,185.68.

COMMON-SCHOOL FUNDS—PRINCIPAL.

School fund proper, being 3 per cent. upon the net proceeds of the sales of the public lands in the State, one-sixth part excepted.....	\$612,302 96
Surplus revenue, being a portion of the money received by the State from the General Government, under an act of Congress providing for the distribution of the surplus revenue of the United States, and by act of the Legislature, March 4, 1837, made a part of the common-school fund.....	335,592 23
College fund, being one-sixth part of the 3 per cent. fund, originally required by act of Congress to be devoted to the establishment and maintenance of a State college or university.....	156,612 23
Seminary fund, being the proceeds of the sales of "seminary lands," originally donated to the State by the General Government for the founding and support of a State seminary.....	59,893 72
County funds, created by act of Legislature, February 7, 1836, which provided that the teachers should not receive from the public fund more than half the amount due them for services rendered the preceding year, and that the surplus should constitute the principal of the new fund, to be called the "County School Fund".....	248,265 75
Township funds, being the net proceeds of the sale of the 16th section in each congressional township of the State, the same having been donated to the State for common-school purposes, by act of Congress, in 1813.....	4,968,535 01
Total common-school funds of the State, September 30, 1872.....	\$6,388,248 08

There are in the State 5,351.41 miles of completed and classified railroads, the aggregate cost of which is reported at \$225,529,271.81, or about \$42,264.48 per mile. The total capital stock of the companies is:

Preferred stock.....	\$8,155,199 98
Common stock.....	181,970,864 00
Bonded debt.....	111,456,335 97
Floating debt.....	8,380,173 26
Total.....	\$354,912,569 45

The gross earnings of the completed and classified railroads are as follows:

From freight.....	\$80,074,594 42
From passengers.....	10,155,164 05
From mails, express, and miscellaneous.....	2,997,660 57
Total.....	\$43,227,428 4

The average proportion of the expenses for maintenance and operating, to be deducted

from gross earnings, is 65.60 per cent. The average gross earnings per mile per annum were \$8,108.06. The average net earnings per mile were \$2,780.18.

There has been a very general refusal or neglect on the part of railroad companies to obey the laws fixing maximum rates for transportation of passengers and merchandise, and intended to prevent unjust discriminations. Governor Palmer, in his last message, devotes much attention to this subject. He says:

In my judgment the existing laws, intended to regulate the duties and define the obligations of common carriers by railway, will not accomplish the object desired, for the reason, among others, that they are to a certain extent based upon the wide-spread misconception of the true relation of that class of public agents to the people, and, as a consequence of that misconception, the regulations for the government of the owners and managers of railway lines are confused and weakened by assuming that the ownership and management of railway lines and the receipt, transportation, and delivery of passengers and freights for hire, which constitutes the business of a common carrier, are so inseparable that they are necessarily parts of the same general business, while, in the nature of things, and from the force of practices that now extensively prevail on many lines of railway, they are essentially different pursuits; and regulations intended for the government of the one have no fitness or proper application to the other.

I am satisfied that the only means that will afford the country the relief demanded is, to invite and encourage competition on all the railroads in the State, between the carriers that own or control them, and others who upon just compensation to be made for the use of the roads and their appurtenances, and for the fixed facilities needed, may choose to engage in the business. If the monopoly of the business on any of the important lines of railroad was taken from the corporation that owns the road, the effect would soon be perceived in the increased facilities for transportation and cheaper rates. It is because competition is not now possible, that railroad managers discriminate between localities and individuals, but, if the legal right of others to engage in business on the railroads of the State were once established by law, the mere existence of the right would constantly and favorably influence their conduct, though the right of competition secured to individuals by the law might never be exercised.

It was with a view to break up the monopoly of the use of their own railroad lines by common carriers, and, if possible, to separate the ownership of railroad property from the prosecution of that business, that the Constitutional Convention adopted the 10th, the 12th, and the 14th sections of the 11th article of the constitution.

These constitutional provisions are intended to establish that there is no necessary connection between the ownership of railroads and the prosecution of the business of common carriers by the same persons or corporations; that railroads are public highways, in which the public have rights, the most important of which is to use them for the transportation of their persons and property, subject only to regulations to be provided by law: that the property of railroad corporations may be taken by the State for public uses to give effect to its own policy; and the proper conclusion from these sections, and from the whole scope of that portion of the constitution which refers to railroads, is, that the policy intended to be supported is, to break up the monopoly of the carrying business, which the owners and managers of railroads have secured, and make the lines of railroads free to commerce, subject only to the rights of

the corporations and individuals to whom they belong to demand compensation for their use, and then only to the extent to which they may be used. The fundamental doctrine of the State constitution is, that railways are highways, and that, considered alone in that character, they belong to the public, subject to the control and regulation of the State.

It will be observed that the theory of the constitution, thus presented, concedes to the owners of railroads the right to compensation for the use of their roads, to the full extent that its use may be required or taken, and it will be easy for the General Assembly to prescribe rules under which carriers will be authorized to place upon any of the railroads of the State a definite number of engines and carriages to make stated trips from and to certain points, to move at an established rate of speed, to use the appurtenances of the road, and the fixed facilities provided by the corporation, or the right to provide facilities at different and convenient points along the line, all to be governed by such equal and proper regulations as may be prescribed by the corporation. But the exclusive right of railroad corporations to carry on the business of common carriers on their lines is not supported by any just view of the law. They may, notwithstanding the fact that other carriers engage in business on their lines, continue to prosecute the same business, but upon the highway of commerce in which they are interested as owners, they, while employed in the office and duty of carriers, have no superior rights to others.

In the conclusion of this view of the important subject, it is due to myself that I should say that the interests of the country demand that the power claimed by private persons and corporations to control all the great lines of intercourse between the remotest points on the continent, and the great centres of commerce and trade, cannot be longer endured.

In the infancy of the system, when railroads were merely subordinates to the natural lines of transportation, and their only competitors for business were the wagons of the pioneers, rights and powers were then conceded to the corporations that controlled them, that are utterly inconsistent with the relations they now bear to the commerce of the country. They have superseded the rivers and the lakes, and, like them, must be made free, subject to no other burdens than such as are necessary to compensate those that own them; and no system of regulations which concedes the unfounded claim of railroad corporations, that are also engaged in business as common carriers, to the exclusive use of their lines for their own business, will, or can be effectual to prevent the abuses, unjust discriminations, and extortions, under which the people have suffered so much, and of which they so justly complain.

Governor Palmer in his message also alluded to the popular belief that crime and disorder, especially in large cities, were on the increase, and said that important changes in the administration of justice had been suggested as a remedy for this state of things. He says: "The changes most frequently insisted upon may be stated to be: 1. The abolition of the grand-jury system, and the substitution, for an indictment, of an accusation to be preferred by the law officers of the State. 2. To take from parties charged with crimes the right to a change of venue. 3. To disallow challenges to persons upon the ground of an opinion formed upon information obtained from printed publications, or, as some propose, without regard to the source whence the information is acquired, if the proposed juror will

swear that, notwithstanding any opinion he may entertain, he can try the case impartially.

4. To establish additional restrictions upon the right of accused persons to demand continuances. 5. To make death the penalty of murder; and, 6. Abolish, or greatly restrict, the Executive authority to grant pardons, and wholly take from that department the power to commute the death-penalty to imprisonment for the life of the person convicted, or for any other term." He deprecates any such sweeping changes in the existing order of things.

Governor Oglesby was inaugurated on the 18th of January, 1878, but a few days later was elected to the United States Senate and resigned, Lieutenant-Governor Beveridge succeeding to the Executive chair.

According to the census of 1870, there were 10,829,952 acres of improved land, 5,061,578 of woodland, and 1,491,331 of other unimproved land. The cash value of farms was \$920,506,846; of farming implements and machinery, \$34,576,587; total amount of wages paid during the year, including value of board, \$22,338,787; total estimated value of all farm productions, including betterments and additions to stock, \$210,860,585; orchard products, \$3,571,789; produce of market-gardens, \$765,992; forest products, \$1,087,144; home manufactures, \$1,408,015; animals slaughtered or sold for slaughter, \$56,718,944; value of all live-stock, \$149,756,698. There were 858,788 horses, 85,075 mules and asses, 640,821 milch-cows, 19,766 working-oxen, 1,055,499 other cattle, 1,568,286 sheep, and 2,708,343 swine. The chief productions were: 10,133,207 bushels of spring, and 19,995,198 of winter wheat; 2,456,578 of rye; 129,921,895 of Indian-corn; 42,780,851 of oats; 2,480,400 of barley; 168,862 of buckwheat; 115,854 of peas and beans; 10,944,790 Irish, and 822,641 of sweet potatoes; 10,486 lbs. of clover-seed; 158,464 of grass-seed; 280,048 of flax seed; 2,747,339 tons of hay; 5,249,274 pounds of tobacco; 5,739,249 of wool; 86,083,405 of butter; 1,161,108 of cheese; 104,032 of hops; 2,204,606 of flax; 136,873 of maple sugar; 1,547,178 of honey; 46,262 of wax; 1,960,473 gallons of sorghum, and 10,378 of maple molasses, and 9,258,545 gallons of milk sold.

The total number of manufacturing establishments was 12,597, employing 2,330 steam-engines of 78,091 horse-power, and 528 water-wheels of 12,593 horse-power, and 82,979 hands, of whom 78,045 were males above 16; 6,717 females above 15, and 8,217 youth. The capital invested amounted to \$94,868,057; wages paid during the year, \$31,100,244; value of materials, \$127,600,077; products, \$205,620,672.

There were 505 newspapers and periodicals, with an aggregate circulation of 1,722,541, and issuing 113,140,492 copies annually. There were 89 daily, circulation 166,400; 10 tri-weekly, circulation 40,570; 4 semi-weekly, circulation 2,950; 364 weekly, circulation 890,-

913; 11 semi-monthly, circulation 107,900; 72 monthly, circulation 490,808; 2 bi-monthly, circulation 11,000; 3 quarterlies, circulation 12,000.

The total number of libraries was 13,570, containing 3,823,914 volumes. Of these, 9,865, with 2,399,369 volumes, were private, and 8,705, with 924,545 volumes, other than private, including 79 circulating libraries containing 75,852 volumes.

The number of religious organizations of all denominations was 4,398, having 8,459 edifices, with 1,201,403 sittings, and property valued at \$23,664,288. The leading denominations were:

DENOMINATIONS.	Organizations.	Sittings.
Baptist.....	733	181,454
Christian.....	350	65,175
Congregational.....	213	66,187
Lutheran.....	230	74,301
Methodist.....	1,428	356,678
Presbyterian.....	535	184,849
Roman Catholic.....	290	136,900
United Brethren in Christ.....	125	17,936

INDIA, BRITISH, a dependency of Great Britain in Asia. In extent and population it is about equal to the Continent of Europe without the Russian Empire. Measuring about 1,900 miles from north to south, and some 1,500 miles from east to west, it has a total area of 1,556,990 square miles, and a population of about 205,919,000, the number of persons to the square mile varying from 600, in some parts of Oude and the lower provinces, to 10 in some of the hill districts; two-fifths of the country (616,147 square miles, with 46,245,888 inhabitants) consist of independent native states, whose chiefs acknowledge the supremacy of Great Britain, and, to a certain extent, are subject to its control. The remaining three-

fifths comprise British India proper, with an area of 910,853 square miles, and a population of 159,666,000 inhabitants. British India proper is divided for administrative purposes into eight provinces. The term "presidency," which is applied to the provinces or governments of Bengal, Madras, and Bombay, is no longer applicable to the present condition of affairs, and positively misleads in the case of Bengal. It is a relic of the time when the three settlements of Fort William, Fort St. George, and Bombay, each under the authority of a president, may be said to have comprised the whole of the British possessions in India. Its use now frequently leads to the mistaken opinion that British India is still divided into three presidencies, whereas it comprises eight provinces, each under its own civil government, and each entirely independent of the others. The eight provinces are: 1. Bengal; 2. Northwestern Provinces; 3. Punjab; 4. Central Provinces; 5. Oude; 6. British Burmah; 7. Madras; 8. Bombay. To these must be added the provinces of Mysore (inclusive of the little state of Coorg), Hyderabad, and Sind, which, though contributing to the revenue of India, are governed on the English system. The supreme Government in India consists of the Viceroy or Governor-General, aided by a Council of five members, besides the commander-in-chief. Its business is conducted in five separate departments: Financial, Home, Foreign, Military, and Public Works. Madras and Bombay are under governors; Bengal, the Northwestern Provinces, and the Punjab, under lieutenant-governors; the Central Provinces, Oude, and British Burmah, under chief commissioners.

The area and population of the several provinces are, according to the latest official publication,* as follows:

COUNTRIES.	Capitals.	Square Miles.	Population.
Coorg and Mysore.....	Bangalore, Merrara.....	29,408	6,235,593
Hyderabad.....	Oamraotee, Akolah.....	17,835	
Bengal.....	Calcutta.....	200,794	40,352,960
Northwestern Provinces.....	Allahabad.....	83,690	30,096,898
Punjab.....	Lahore.....	95,766	17,593,946
Central Provinces.....	Nagpoor.....	89,839	7,967,476
Oude.....	Lucknow.....	94,060	11,920,747
British Burmah.....	Rangoon.....	93,679	2,392,319
Madras.....	Madras.....	141,112	30,837,390
Bombay.....	Bombay.....	87,639	11,093,519
Sind.....	Hyderabad.....	54,408	1,793,594
British India.....		910,853	159,666,943
Native States.....		646,147	46,245,888

The population of the chief towns, according to the latest accounts, was as follows:

Calcutta.....	616,349	Bangalore.....	132,000
Bombay.....	648,636	Ahmedabad.....	130,000
Hyderabad.....	400,000	Agra.....	125,362
Madras.....	393,440	Bareilly.....	111,332
Lucknow.....	234,779	Nagpoor.....	111,221
Patna.....	264,122	Cawnpore.....	108,796
Benares.....	200,600	Bhurtpoor.....	100,000
Delhi.....	123,406	Dhar.....	100,000
Jondpore.....	150,000	Fyzabad.....	100,000
Mooredabad.....	146,963	Masulipatam.....	100,000
Baroda.....	140,000		

The revenue and expenditure of British India, from 1868 to 1873, was as follows:

YEARS.	Income.	Expenditures.	Surplus or Deficit.
1869.....	\$49,362,691	\$38,407,834	- \$11,954,857
1870.....	50,901,081	53,389,026	- 2,487,945
1871.....	51,413,885	49,980,696	+ 1,433,189
1872.....	46,976,500	47,376,500	- 400,000
1873.....	48,771,000	48,534,000	+ 237,000

* All the figures are taken from the "Statistical Tables relating to the colonial and other possessions of the United Kingdom, Part XIV., 1869" (London, 1871), except the population of Madras, which is that of the official census of 1871. The figures given in another official publication, the "Statement exhibiting the Moral and Material Progress and Condition of India, during the Year 1863-'69," can partly not be harmonized with the figures of our table.

Dr. G. Smith, in the work, "The Native Christians of India as a Community and a Church," reprinted from the *British and Foreign Evangelical Review* (1871), estimates the aggregate population of India at 212,850,000, of whom 160,000,000 are Hindoos; 2,500,000 Sikhs; Buddhists and Fains, 5,000,000; Mohammedans, 80,000,000; aborigines and outcasts, 14,000,000; Parsees, 85,000,000; Jews, 15,000; Christians, 1,250,000; Protestants, 850,000; Catholics, 760,000; Syrians, 185,000; Armenians and Greeks, 5,000.*

The public debt in March, 1871, amounted to £111,542,208, the interest on which was £5,210,175.

The imports and exports, from 1869 to 1871, were:

YEARS.	Imports.	Exports.
1869	£47,130,000	£23,710,000
1870	46,880,000	53,510,000
1871	88,888,000	57,818,000

The total numbers and tonnage of all vessels entered at ports in British India from various countries were 13,843 vessels, freighted with 2,981,854 tons. The total number and tonnage of all vessels cleared in British India, during the same year, were 14,243 vessels, with 3,467,485 tons, giving a total of 28,086 vessels, and 6,429,329 tons.

The total length of railroads, on December 31, 1871, was 5,089 miles. The aggregate amount expended by the companies on the lines undertaken by them was about £98,000,000; the gross receipts during the year £5,965,671, the amount paid by the Government for guaranteed interest being in excess of the net receipts. The number of post-offices and receiving-houses, in 1871, was nearly 5,000; the number of letters and newspapers sent through the post-office, 84,562,634; the revenue, £908,372. The number of miles of Government telegraph-lines, in 1871, was 14,014; the number of offices, 205. The number of governmental and aided colleges and schools, in 1871, was 25,147, and the number of pupils attending them 799,622.

The "Annual Report of the Loodiana Mission" gives the following account of some Gooroos, whom the writer, a missionary, has visited:

During a journey which extended thirty miles to the southward of Loodiana we met at the town of Rampoor with a peculiar company of Sikhs, who profess to believe in the New Testament as a Divine revelation, and look upon Christ as the immaculate incarnation of the Deity. Their Gooroo, or teacher, seems to think, or at least he teaches his followers, that Christ is to be revealed from heaven very soon, according to Matthew xxiv. and xxv., and Revelations xix.-xxii.; but that Christ will be revealed in his own (the Gooroo's) person! This sect is entirely separate from the other Hindoo sects, and is regarded as a sort of Christian sect by the people around them. They are increasing in numbers, and the Gooroo may yet acquire a considerable number of followers. They profess to observe the Sabbath, to pray to God, and to disregard caste ties. In re-

gard to caste, it seems pretty clear that the Gooroo would gladly break off from the system, and that he tries to lead his followers to do so, but, that he has succeeded in accomplishing his purpose, may be doubted. On one occasion two of his disciples came to Loodiana, and, while there, ate and smoked with Christians, because they had been told to do so by the Gooroo.

The sect referred to above is said to be in the territories of the Maharajah of Putteeala.

From the last educational report of the province of Oude it appears that a much greater interest is shown in education by the Mohammedans than by the Hindoos. The Mohammedans in Oude are only one-tenth of the population, yet there are in the province 18,918 Mohammedan pupils, and only 40,355 Hindoos. The officiating chief commissioner remarks that enormous educational work remains to be done, 95 out of every 100 boys "growing up in ignorance." Of the school-masters, one-fourth are Mohammedans. There are 81 girls' schools, under Government, and 1,908 pupils, of whom 1,072 are Mohammedans. The pupils of the Zenana Agency have increased in the year from 52 to 140, belonging to 90 families, of whom 55 are Mohammedans. In Bengal, on the contrary, the Mohammedans are quite deficient in their interest for education. The total number of "passed" students in the first division were: Entrance, 619; first arts, 115; B. A., 61. Of these the Mohammedans were: Entrance, 15; first arts, 2. The total number of students in all the divisions was: Entrance, 3,471; first arts, 899; B. A., 429. Of these the Mohammedans had only—Entrance, 182; first arts, 11; B. A., 4.

INDIANA. The Republican State Convention of Indiana was held at Indianapolis on the 22d of February, to nominate candidates for the State offices and for presidential electors, and to appoint delegates to the National Convention to be held at Philadelphia in May. The State ticket was as follows: For Governor, General Thomas M. Browne; Lieutenant-Governor, Leonidas M. Sexton; Congressman at large, Godlove S. Orth; Secretary of State, W. W. Curry; Auditor of State, Colonel James A. Wildman; Treasurer of State, Major John D. Glover; Reporter of Supreme Court, Colonel James B. Black; Clerk of Supreme Court, Charles Scholl; Superintendent of Public Instruction, Benjamin W. Smith; Attorney-General, James P. Denny.

The important resolutions, out of eighteen composing the platform, approve of the Ku-klux Act; express gratitude to the soldiers and sailors, and willingness to pay their pensions; approve of the foreign policy of the Government; approve of economy and of reduction of taxation; call for "incidental protection" for Indiana coal and iron; approve of the financial policy of the Government; call for the abolition of useless offices and perquisites, and a reduction of salaries; oppose donations of public lands to railroads; demand protection for immigrants against the capita-

* For the religious statistics of India proper, see *ANNUAL CYCLOPEDIA* for 1871.

tion taxes of seaboard States; approve of the "exposures" of corrupt officials, and denounce corruption generally; approve of free schools; approve of the efforts of working-men to "vindicate their independence of class subordination," and declare that the Republican party is the only party that will help them; and instruct the delegates to the National Convention to vote for Grant and Colfax.

The Democratic Convention was held at Indianapolis on the 12th of June. The State officers nominated were as follows: For Governor, Thomas A. Hendricks; Lieutenant-Governor, W. O. Depauw; Congressmen at large, John S. Williams, Michael C. Kerr; Secretary of State, Owen W. Eddy; Auditor, John B. Stoll; Treasurer, James B. Ryan; Superintendent of Public Instruction, M. B. Hopkins; Attorney-General, Bayless W. Hanna; Clerk of Supreme Court, Ed. Price; Reporter of Supreme Court, John C. Robinson.

The following platform was adopted:

Resolved, By the Democracy of Indiana in convention assembled:

That the principles of the Cincinnati Liberal Republican Convention, taken in connection with the propositions contained in Horace Greeley's letter accepting the nomination of that convention, constitute a platform on which all the elements of opposition to the present corrupt Administration of the Federal Government can stand.

Resolved, That we regard it as unwise and imprudent to place two tickets in nomination for the office of President and Vice-President as the representatives of these principles, as the division of its friends would insure the defeat of both, and it is therefore the fixed conviction of this convention that the Democratic Convention to assemble in Baltimore in July should adopt the nominees of the Liberal Republican Convention instead of making other nominations for the presidency and vice-presidency of the United States.

Resolved, That the delegates appointed from this State to the Baltimore Convention be, and they are hereby, instructed to vote as a unit upon all questions, in accordance with the opinion of a majority of the delegation.

Resolved, That all drainage and other laws, by which the owners of property may be divested of their title by arbitrary assessments or summary process, should be carefully guarded, so as to protect the people from undue oppression, and their property from being taken without just compensation and due process of law; and that all laws contravening these principles should be promptly repealed, or modified so as to conform thereto.

Whereas, The Union soldiers and sailors, by their patriotism and courage in the great rebellion of 1861, preserved the life of the nation and made our public domain valuable: therefore—

Resolved, That we demand for each of the living who was honorably discharged, and for the widows or orphans of the dead, one hundred and sixty acres of the public lands—not heretofore entered, or given away by a Republican Congress to railroad corporations—to be theirs absolutely, without requiring them to become actual settlers thereon.

Resolved, That justice and equality demand that all soldiers who enlisted in the military service of the country during the war of the late rebellion, and who have been honorably discharged therefrom, shall have a bounty granted to them by Congress in proportion to the time they may have served, whether that time shall have been for three months or a longer period.

A "straight-out" Democratic Convention was held at Indianapolis on the 19th of September, at which a full State ticket was put in nomination, and resolutions unanimously adopted indorsing the action of the National Convention at Louisville.

On the 28th of February a convention of those favoring a prohibition of the sale of intoxicating liquors was held at the Capitol, at which the following resolutions were adopted:

Resolved, That "we hold these truths to be self-evident, that all men are created equal; that they are endowed by their Creator with certain inalienable rights; that among these are life, liberty, and the pursuit of happiness; that to secure these rights governments are instituted among men, deriving their just powers from the consent of the governed;" that whenever any law, custom, institution, or business, becomes destructive of these ends, it is the right and duty of the people, by the enactment and execution of all necessary, just, and constitutional laws, to abolish it.

Resolved, That on this basis of fundamental truth, we hold it to be the right and duty of the people to abolish and forever prohibit the manufacture of and traffic in intoxicating liquors, as a beverage, and their importation from foreign countries.

Resolved, That every such evil being *malum in se*, a crime against God and man, is beyond the power of Government to remedy by any provisions but total prohibition and by any process but utter extirpation; and that all laws to license or sanctify, by pretending to regulate such crime, are insane and infamous.

Resolved, That we favor all measures that will effect a reform in the financial affairs of our municipal, State and national Governments, and favor the abolition of the offices of State Agent and State Printer.

Resolved, That we call upon all the good citizens of Indiana, whether total abstainers or not, who recognize the terrible injuries inflicted by the liquor-traffic, to unite with us for its overthrow, and to secure thereby peace, order, and the protection of persons and property.

At an adjourned session of this convention on the 8d of April, a full ticket of State officers was nominated.

The State election took place on the 8th of October. The whole vote cast for Governor numbered 877,917, of which Hendricks, Democrat, received 189,424; Browne, Republican, 188,276; Edgerton, "straight-out" Democrat, 189; Falkenburg, Temperance candidate, 28; making Hendricks's majority over all, 531. The remainder of the officers elected were the Republican nominees, with the exception of the Superintendent of Public Instruction, Milton B. Hopkins, who was the Democratic candidate. At the presidential election on the 5th of November, 351,198 votes were cast, of which the Grant and Wilson electors received 186,144; Greeley and Brown, 165,637; O'Connor and Adams, 1,417; Grant and Wilson's majority over all, 21,090. The State Legislature of 1873 contains 27 Republicans and 23 Democrats in the Senate, and 54 Republicans and 46 Democrats in the House of Representatives. Republican majority on joint ballot, 12.

A special session of the Legislature was opened at the capital on the 14th of November, at which considerable miscellaneous busi-

ness was disposed of, and much more set on foot. Oliver P. Morton was re-elected to the United States Senate, and the State was re-districted for both legislative and congressional representation. The bill apportioning members of the Legislature among the different districts gave much dissatisfaction to the Democratic minority, and it was declared that it gave 80 members of the Senate to 184,000 voters in certain portions of the State; and only 20 to 185,000 voters in other portions, and assigned 59 members of the House to 184,000 voters, and 41 members to 185,000. A written protest against the act was made by the minority in the following terms:

1. That in our opinion the said act is a deliberate fraud and imposition upon the rights and privileges of the people of the State of Indiana.

2. Because said act is a deliberate attempt to sap the very foundation of representative government by denying equal and fair representation to the people in the General Assembly.

3. Because it is a shameful violation of that American doctrine that comes down from the Revolution, that taxation and representation go hand in hand.

4. Because said act is an infamy, passed at the bidding of an unscrupulous partisan influence, and cannot be defended upon any principle of common right, and was passed with indecent haste under the pressure of the previous question, so that debate was prevented and no opportunity afforded to expose its glaring defects.

5. Because said act is a plain and palpable violation of the constitution of the State of Indiana, which requires that Senators and Representatives in the General Assembly shall be apportioned among the several counties according to the number of inhabitants under the enumeration made by law, which provision of the constitution is wholly disregarded and violated by the said act, and is, therefore, null and void.

Among the other bills passed was one raising the salary of the Governor to \$8,000 a year. Bills were introduced regulating the charges of railroads, establishing a new school system, and proposing a convention for the amendment of the State constitution. Numerous petitions were received, calling for legislation prohibiting the sale of intoxicating liquors, and amending the divorce laws.

The regular session of the Legislature began on the first Wednesday of January, 1873, and a few days later Governor Hendricks was inaugurated. Governor Baker in his final message made various recommendations, among others that it be submitted to a vote of the people whether a convention shall be held for the revision of the constitution. In his inaugural address Governor Hendricks recommended reform in the election laws, and in the representation of the people in the General Assembly. He said:

The laws regulating our elections require your special attention. They do not restrain the corrupt, nor protect the votes of the people. Our elections must not become a reproach. Their result must express the will of the people. Our system must be made so efficient as to guarantee purity in the conduct and management of the elections, and also to inspire and establish public confidence. When the people know that a political result has been fairly

brought about, all discontent disappears; they cheerfully acquiesce, and yield entire obedience to the authority thereby established. I cannot now attempt to suggest all the provisions that may be essential to an efficient system, but without the following no system will probably prove efficient:

1. A fair and real representation upon the board of election officers of all political parties having candidates to be voted for.

2. Voting-places so numerous, and the precincts so small, in respect to the voting population, that all who offer to vote may be known by the people of the neighborhood, as well as by the officers.

3. A reasonable period of residence in the election precinct as a qualification to vote, so that persons may not pretend a residence not real, in fraud of the law.

You will find an amendment of the second article of the constitution necessary to enable the Legislature to prescribe such period of residence. The constitution wisely provides for its own amendment, by a convenient and economical proceeding, which renders it unnecessary to throw upon the people the expense of a convention, and avoids the possibility of changes not desired by them.

4. The exclusion of money, as an influence and power, from the elections. If in the contest for power money shall become stronger than the people, we will have the worst government possible. It will be a reproach to us all when wealth can buy what the loftiest talent and the purest virtue cannot attain.

In this connection I wish to call attention to the subject of representative reform, which, during the last ten years, has been advocated by some of the best minds, both in Europe and in this country, and is now undergoing the test of experience. I desire to make this the more emphatic, because in this State it seems yet to be regarded as right and proper for the majority to deny to the minority even that representation which an apportionment based upon population and contiguity of counties would give. Representative reform rests upon the proposition that minorities of constituencies should have a representation as nearly in proportion to numbers as may be practicable. All the citizens contribute to the burdens of government, and should yield obedience to the laws, and it is just, equal, and fair, that all should be represented.

The advantages of this reform are obvious. Political asperities would be modified; local satisfaction would be produced; the temptation to corruption and bribery at elections would be greatly removed; and security and permanency would be given to the influence and power of the minority, thus securing a check upon the majority, should it become arrogant or unscrupulous, so that legislation would proceed more for the people and less for party.

The public debt of the State at the end of the year amounted to \$4,650,930.37, of which \$3,905,906.25 consisted of non-negotiable bonds issued to the school fund. Of the balance, \$32,869.99 consists of four per cent. State stocks issued under the adjustment of 1847, and \$4,060.13 two per cent. stocks of the same date; \$189,000 consists of the war loan issued under legislation of 1861. The remainder, of about \$569,000, consists of the principal and interest of old bonds issued prior to 1841, the payment of which was provided for by an act passed at the extra session of the Legislature in December. There was in the Treasury on November 1, 1871, the sum of \$1,035,288.65, and during the fiscal year ending October 31, 1872, the receipts were \$2,450,558.22; the expenses for the same year amounted to \$2,687,-

201.85, leaving a balance in the Treasury of \$763,356.37. On the 15th of October, the school revenue, amounting to \$385,052.50, was apportioned among the several counties, which allowed fifty-two cents to each of the 631,447 children between the ages of six and twenty-one in the State.

There are about 3,600 miles of railroad in the State, consisting of the following lines and short branches connected with them:

The Northern Penitentiary, at Michigan City, has had an average of 314 inmates during the year. On the 13th of July the chair-shop of the institution was destroyed by fire, and has been rebuilt at an expense of \$7,250. The total receipts of the institution for the year were \$46,841.81, ordinary expenses, \$42,868.94, making the profits of the year \$5,972.87.

The House of Refuge, at Plainfield, contained on the 1st of January, 1873, 191 inmates, 64 of whom were admitted during the year. This institution has a farm, a chair-factory, and shoe-shop.

The following is a statement showing the number of inmates remaining, and the number admitted, discharged, and died, during the year, at the Soldiers' Orphans' Home at Knightstown:

Number remaining October 31, 1871.....	307
Number of children admitted.....	41
Number returned to parents.....	19
Number placed in homes.....	5
Number died.....	2
Number of soldiers transferred.....	42
Remaining in the Home October 31, 1872.....	230

The Home for Disabled Soldiers, formerly connected with this institution, was burned on the 25th of December, 1871, and the soldiers have been transferred to the National Asylum at Dayton, Ohio.

According to the census of 1870 there were in the State 10,104,279 acres of improved land, 7,189,334 of woodland, and 826,035 of other unimproved land. The cash value of farms was \$634,804,189; of farming implements and machinery, \$17,676,591; the total amount of

wages paid during the year, including value of board, \$9,875,348; total (estimated) value of all farm productions, including betterments and additions to stock, \$123,914,302; value of orchard-products, \$2,858,086; produce of market-gardens, \$486,477; of forest-products, \$2,645,679; value of home manufactures, \$605,639; value of animals slaughtered and sold for slaughter, \$30,246,962; value of all live-stock, \$33,776,762. There were 497,883 horses, 43,259 mules and asses, 393,786 milch-cows, 14,088 working-oxen, 618,360 other cattle, 1,612,680 sheep, and 1,872,280 swine. The chief productions were 161,991 bushels of spring and 27,585,231 of winter wheat, 457,468 of rye, 51,094,538 of Indian-corn, 8,590,409 of oats, 356,262 of barley, 80,231 of buckwheat, 9,325,392 pounds of tobacco, 5,029,023 of wool, 35,526 bushels of peas and beans, 5,899,044 of Irish and 150,705 of sweet potatoes, 19,479 gallons of wine, 29,915,385 pounds of butter, 283,807 of cheese, 936,983 gallons of milk sold, 1,076,768 tons of hay, 61,168 bushels of clover-seed, 17,877 of grass-seed, 68,884 pounds of hops, 87,771 of flax, 401,931 bushels of flax-seed, 1,332,332 pounds of maple sugar, 2,026,212 gallons of sorghum molasses, 227,880 of maple molasses, 895,278 pounds of honey and 12,049 of wax.

The total number of manufacturing establishments was 11,847, using 2,881 steam-engines, of 76,851 horse-power, and 1,090 water-wheels of 23,518 horse-power, and employing 58,853 hands, of whom 54,412 were males above sixteen, 2,272 females above fifteen, and 2,168 youths. The capital invested amounted to \$52,052,425; wages paid during the year, \$18,366,780; value of materials consumed, \$63,135,492; products, \$108,617,278.

There were 293 newspapers and periodicals, having an aggregate circulation of 363,542, and issuing 26,964,984 copies annually. There were 20 daily, with a circulation of 42,300; 3 tri-weekly, circulation 2,200; 1 semi-weekly, circulation 350; 233 weekly, circulation 239,342; 6 semi-monthly, circulation 9,200; 28 monthly, circulation 64,150; 2 bi-monthly, circulation 6,000. The total number of libraries was 5,301, containing 1,125,553 volumes; of these, 2,968, with 497,659 volumes, were private, and 2,333, with 627,894 volumes, other than private, including 20 circulating libraries containing 8,248 volumes.

The number of religious organizations of all denominations was 3,698, having 3,106 edifices, with 1,008,380 sittings, and property valued at \$11,942,227. The leading denominations were:

DENOMINATIONS.	Organizations.	Sittings.
Baptist.....	630	152,375
Christian.....	455	123,775
Friends.....	81	29,500
Lutheran.....	195	62,295
Methodist.....	1,403	346,125
Presbyterian.....	575	185,960
Roman Catholic.....	204	86,830
United Brethren in Christ.....	184	33,975

INGERSOLL, RALPH ISAACS, LL. D., an American statesman and diplomatist, born in New Haven, Conn., in 1788; died there, August 27, 1872. He graduated from Yale College in the class of 1808, studied law, and, having been admitted to the bar of his State, entered upon the practice of his profession in his native city, taking high rank among the ablest jurists of that section. His public life commenced while he was still a young man. In 1819 he was chosen a representative of his native town in the State Legislature. This was one of the most important Legislatures ever held in Connecticut. The new constitution had been adopted the year before, and on this Legislature devolved the duty of conforming the existing laws to the new order of things under the constitution which had taken the place of the old charter granted the colony by the second Charles. The prominent men of the State, from both the Democratic, or, as it was called, "Toleration," and the Federal parties, were sent to this Legislature. Mr. Ingersoll was perhaps the most conspicuous debater on the Democratic side. The Federal speakers and the press called him "Young Hotspur," and Theodore Dwight, in his political lyrics, alluded to him under that name. For seven years Mr. Ingersoll continued to represent New Haven in the popular branch of the Legislature, and, in 1825, he was elected at the same time to the Legislature of the State and to the Congress of the United States. He was elected to Congress for four consecutive terms. He held a good position in the House, serving on important committees, most of the time on the Committee of Ways and Means, having for his associates, among other distinguished men, George McDuffie, Gulian C. Verplanck, and James K. Polk. After eight years' service in Congress, Mr. Ingersoll felt that his duty to his young family required that he should devote himself to the practice of the profession which he loved, and he accordingly resigned his seat and returned to his law-office in New Haven. He was appointed State's Attorney for New Haven County in 1833, and held the office for some years, when he resigned. Upon the death of Senator Nathan Smith, Governor Edwards tendered him the place made vacant thereby, but he declined, having no inclination to reënter political life. While in Congress an intimacy was formed between himself and the President, James K. Polk, and in 1846 Mr. Ingersoll received, unsolicited, the appointment of minis-

ter plenipotentiary to Russia, accompanied with a friendly letter, saying that "the office had sought the man, and not the man the office," and urging him not to decline. He remained abroad two years, when he resigned his commission and returned to New Haven, with the determination never again to accept office. To this resolution he adhered strictly, and the evening of his life was passed in quiet retirement, and in the practice of his profession. He was greatly honored and esteemed by the citizens of New Haven, and often urgently solicited to accept office.

INSURANCE. The losses, by fire, during the year 1872, were almost as disastrous to the public and great for the insurance companies as in 1871. The great fire of Boston, November 9th and 10th, occasioned a loss of about fifty million dollars. The following is a statement of life-insurance companies in the United States, their operations during the years 1869, to and including 1871, and their results, as regards premiums received, losses paid, benefits to the insured and to the stockholders, and the cost of general administration, computed on the basis of every thousand dollars insured. The financial accounts embrace cash transactions only, exclusive of reinsurance:

YEAR.	Companies.	Policies.	Amount.
1869.....	76	663,901	\$1,992,353,354
1870.....	88	774,927	2,104,042,823
1871.....	90	841,738	2,195,875,013

Of these, belong to the State of New York:

YEAR.	Companies.	Policies.	Amount.
1869.....	41	325,394	\$943,090,033
1870.....	41	366,447	1,030,978,590
1871.....	39	367,056	1,030,794,080

The total revenues are:

YEAR.	Premium.	Interest and other.	Total.
1869.....	\$65,536,138	\$12,322,171	\$77,858,309
1870.....	75,963,714	15,426,346	90,789,660
1871.....	84,442,780	17,767,931	102,210,711

Of the New York companies, the figures are as follows:

YEAR.	Premium.	Interest and other.	Total.
1869.....	\$39,464,390	\$5,732,336	\$45,196,726
1870.....	40,575,655	6,725,377	47,301,032
1871.....	44,441,336	8,136,858	52,578,194

Total expenditures for each year:

YEAR.	Policy Claims.	Dividends to insured, Policies lapsed, surrendered, etc.	Dividends and Interest to Stockholders.	General Administration.	Total.
1869.....	\$15,051,133	\$12,057,326	\$653,591	\$17,651,535	\$45,413,495
1870.....	19,730,695	14,623,860	737,435	19,704,923	54,285,963
1871.....	23,567,419	19,487,741	847,391	20,566,394	61,468,945
Expenditures of the New York companies:					
1869.....	7,767,367	8,169,533	445,956	9,441,459	25,824,315
1870.....	10,389,444	8,739,015	397,339	10,166,223	29,591,030
1871.....	11,675,921	11,025,315	394,553	9,906,313	32,002,101

The total expenditures average per cent. of total receipts:

In 1869, 53.33 p. c.; 1870, 60.34 p. c.; 1871, 60.14 p. c.
 Maximum—1869, 140.4 p. c.; Minimum—81.2 p. c.
 " 1870, 191.3 p. c.; " 37.4 p. c.
 " 1871, 152.3 p. c.; " 29.4 p. c.
 For New York Cos.—1869, 57.13; 1870, 60.88; 1871, 62.82.

The surplus of receipts over expenditures amounts to:

1869..... \$23,440,804, or 41.67 per cent. of total receipts.
 1870..... 36,003,697, or 59.66 " " "
 1871..... 40,742,686, or 59.97 " " "

The rate of premiums per mille (for an insurance of \$1,000) varies very much in the different companies, from a minimum in 1869 of 7.67 to 61.31; in 1870, from 18.46 to 62.03; in 1871, from 12.24 to 65.25, averaging for all transactions represented, for—

	Per Mille.
1869.....	35.43
1870.....	35.59
1871.....	38.58

Policy claims were paid as follows:

YEAR.	Minimum.	Maximum.	Average.	
1869..	0.92	61.58	8.09	Per mille am't ins'd.
1870..	0.46	65.61	9.81	Per mille am't ins'd.
1871..	1.75	121.56	11.36	Per mille am't ins'd.

The benefits returned to the insured in dividends, purchase of policies surrendered, lapsed, etc., show for—

YEAR.	Minimum.	Maximum.	Average.	
1869..	0.01	20.51	6.43	Per mille am't ins'd.
1870..	0.03	17.10	6.92	Per mille am't ins'd.
1871..	0.08	34.06	8.46	Per mille am't ins'd.

Shareholders received of interest and dividends:

	Average.	
1869.....	0.25	Per mille am't ins'd.
1870.....	0.35	Per mille am't ins'd.
1871.....	0.39	Per mille am't ins'd.

Great diversity prevails in the expenses of general management:

YEAR.	Minimum.	Maximum.	Average.	
1869..	0.21	59.09	9.41	Per mille am't ins'd.
1870..	0.20	70.50	9.88	Per mille am't ins'd.
1871..	0.18	161.23	9.70	Per mille am't ins'd.

INTERNATIONAL COMMUNICATIONS. The improvement in the means of intercourse, and the establishment of better communication between England and France, has been the subject of earnest discussion during many years past, and the public has had presented to it a number of reasonable and unreasonable plans for this object. These plans may be classified under four heads: Those for bridging the Channel between Dover and Calais, or some adjacent point on the French coast; those for making a causeway, and thus creating an artificial isthmus; those for the establishment of a ferry; and, finally, those for driving a tunnel beneath the bed of the sea.

VOL. XII.—26 A

Of all these, the first two have never been advocated by any persons worthy of consideration, and may be, therefore, quickly dismissed; the latter two schemes are represented by two eminent engineers, in whose track follow a number of more or less obscure individuals, who clamor loudly for the credit of precedence in idea, as vehemently as if they could ever have advanced this question of improved international communication to the stage to which it has been brought.

The representative of the steam-ferry is Mr. John Fowler, and that of the tunnel, in England, is Mr. John Hawkshaw.

By the ferry plan, as it was first laid before Parliament some years since, it was proposed to construct suitable harbors on each coast, between which steam-ferries, 450 feet long, and 57 feet beam, were to run, propelled by engines of 1,500 horse-power collectively. The transit was to be performed in an hour, and the most complete accommodation was to be afforded for the carriage both of passengers and goods. To this end, railway passenger carriages and wagons were to be taken on board the ferries, so that, either in going to or returning from the Continent, no change of vehicles would be necessary either for passengers or freight. The point selected for the English harbor was Dover, and that on the French coast between Cape Grianex and Boulogne, at a spot possessing many natural advantages for the purpose. A short line of railway would be necessary, to connect the French port with the Northern Railway of France, and complete the communication. The total estimated cost was about \$10,000,000, and the time required for the execution of the scheme was three years.

Turning to the other proposed means of Continental communication—that of a tunnel beneath the bed of the Channel—a Frenchman propounded the idea to the first Napoleon. In 1866 borings near the South Foreland in England, and near Calais in France, were commenced, and continued during two years; the former reached the green sand after a depth of about 550 feet had been obtained, but at a less depth the French shaft was stopped by accident. Mr. John Hawkshaw investigated, so far as a preliminary investigation would allow, the formation of the Channel bed along the line of the proposed tunnel. These inquiries, tested also by some independent borings, such as the artesian well at Calais, showed that both the lower gray and the upper white chalk, which on the English side have a thickness of 295 feet and 175 feet, respectively, increase gradually toward the French coast, where the thickness of the gray chalk is 480 feet, and that of the white overlying chalk is 270 feet; it is almost certain, too, that there exists no serious rupture in the strata, while the depth chosen for the invert of the tunnel would probably be below the pernicious influence of any fissures that may exist in the white chalk near the

sea-bed. It was proposed to lay the level of the rails at a depth of 270 feet below the bottom of the Channel, to approach and quit the tunnel on each coast with grades of 1 in 60, and to give to the tunnel itself a rising gradient of 1 in 2,640 on each side toward the centre. The total length of the tunnel would be 29½ miles, of which 7½ miles would be taken up in approaches. It was intended that accommodation should be given for a double line of way, and for this purpose the tunnel was to be 28 feet wide, formed with a semicircular arch 28 feet in height from the rails, and the thickness of the brickwork, sides as well as invert, was to be 3 feet.

In March, 1869, a report was laid before the Emperor of the French, prepared by the influential committee appointed to examine into the scheme, which had M. Thomé de Gamond as its able representative and exponent in France. This committee, while not hesitating to give their opinion that the work could be executed, although many grave and hidden difficulties would probably beset the path of the engineer in every step of his hazardous undertaking, found great trouble in forming any conclusion as to the possible commercial future of the work, supposing it to be completed. The minimum estimate upon which they based their assumption was \$50,000,000, too large a sum by far to sink with the hope of obtaining a profitable return. It was proposed at this time to obtain a government grant of \$10,000,000 (as much as Mr. Fowler's first estimate for his complete ferry scheme), to execute preparatory works. This proposition, however, came to nothing, and the storm, then gathering, which subsequently swept across France, has ended, for many years at least, any probability of extensive government help from that country for this purpose.

Mr. Hawkshaw has recently proposed a means of improvement in the Channel service, which consists in placing a fleet of fast boats to run between Dover and Calais, of a type similar to the Holyhead steamers, 350 feet in length, and drawing 8 or 9 feet of water. These would be simply passenger-boats, having no accommodation for railway vehicles on board, and requiring but little alterations in the existing harbors to enable them to run from side to side at all times.

Of a totally different character, however, is the last scheme, in which Mr. Henry Bessemer and Mr. E. J. Reed are the chief movers, and which, not wanting parliamentary sanction, will not suffer the long and tedious delays which would otherwise attend its execution. The new boats proposed by Mr. Reed and Mr. Bessemer to run between Dover and Calais will be the same length as those suggested by Mr. Hawkshaw, i. e., 350 feet, but they will draw, when fully loaded, only 7 feet 6 inches of water. The deck beam will be 45 feet wide, and the width over the paddle-boxes 65 feet. A speed of 20 miles an hour will be ob-

tained from two pairs of engines, developing collectively 4,500 horse-power, and driving four paddle-wheels. The vessels will be double-ended, with a rudder at each end, so that the necessity of turning will be avoided, means being provided to lock the rudders at will. They will be designed with a very low free-board at each end, extending for a distance of 50 feet, so that they may cut through the waves instead of mounting them. The useful length of the vessels will thus be reduced to a length of 250 feet. Speed will rightly be one of the first considerations in designing these boats, because, upon such a service as that for which they are intended, quickness of transit is of the greatest necessity. Next to this qualification comes that of accommodation, and in this respect the utmost attention will be paid to the comfort of the passengers. At each end spacious and well-appointed cabins will be provided for the second-class passengers, who will, besides, enjoy ample deck-room; but the principal feature, and one for the development of which the boats are specially designed, will be a large, central, motionless saloon, constructed according to the plan proposed by Mr. Bessemer. This saloon, which will be placed in the middle of the vessel, will be 70 feet long, 30 feet wide, and 20 feet in height, fitted with some state-rooms leading off from the main cabin. On top there will be a spacious promenade-deck, 7 feet above the main deck of the vessel. To secure an absence of motion in this saloon, it is suspended at each end and at two intermediate points upon steel axes, supported upon standards. The floor of the cabin, necessarily of great weight, is placed below the level of the points of support, in order to assist in keeping the saloon steady, and to counterbalance the disturbing action of the top weight due to passengers on the promenade-deck, as well as that arising from the action of the wind upon the exposed sides of the cabin, which, however, are partially protected from the action of the wind by the two paddle-boxes placed on each side of the vessel. By the arrangement adopted, the suspended saloon, which will weigh 70 or 80 tons, will always tend to keep in a vertical position, and the oscillations, which would arise from the ship's motion, are to be counteracted by simple mechanical appliances. It is only contemplated to neutralize the rolling of the ship, as vessels of so great a length, and of such a form as those to be built for the Channel service, will be subjected to comparatively little pitching, the motion from which will be greatly reduced by the central position of the saloon. To prevent the saloon from being affected by the oscillations of the vessel, or its equilibrium from being disturbed by the movements of the passengers, it is fitted with hydraulic gear, by means of which its position with respect to the vessel is placed under perfect control, an attendant, having a spirit-level before him, being enabled, by the manipulation of a single lever,

at all times to keep the floor of the saloon horizontal.

IOWA. The fourteenth General Assembly of Iowa began its regular session on the 8th of January, and concluded it on the 23d of April. The mass of the work accomplished was of local importance only, but there were a few acts of general interest. The State was divided into nine congressional districts, 50 senatorial districts, and 75 representative districts. A subject that occupied a good deal of attention was that of regulating the sale of intoxicating liquors. There was a Committee on the Suppression of Intemperance to whom all petitions, protests, and propositions, were referred. Among the bills discussed was one providing for the licensing of the sale of "spirituous, vinous, and malt liquors, which was defeated in the House by a vote of 29 yeas to 64 nays. A proposition to prohibit the making, keeping, or selling of liquor, was also defeated, as well as one that made parties selling intoxicating liquors responsible for all damages done by reason of the sale. The act finally passed was in the form of an amendment to the revised laws of 1860, and provided that "no person shall obtain a permit to buy and sell intoxicating liquors under the provisions of article two of chapter sixty-four of the revision of 1860, and the acts amendatory thereto, unless said person shall first present, to the court to which application for such permit is made, a certificate, signed by a majority of the legal voters of the township, city, or ward, in which he desires to sell said liquors, that he is of good moral character, and that they believe him to be a proper person to buy and sell intoxicating liquors for the purposes named in section 1575, of the revision of 1860." Any person applying for a permit is required to file a bond with the clerk of the district court, in the sum of \$3,000, with two or more sureties, who shall justify in twice that amount, "conditioned that he will carry out the provisions of all laws now or hereafter in force relating to the sale of intoxicating liquors, and which said bond shall run in the name of the county, for the benefit of the school fund." It is further provided that no person having a permit shall sell liquors "at a greater profit than thirty-three per cent. on the cost of the same, including freights, and every person having such permit shall make on the last Saturday of every month a return in writing to the auditor of the county, showing the kind and quantity of the liquors purchased by him since the date of his last report, the price paid, and the amount of freights paid on the same; also the kind and quality of liquors sold by him since the date of his last report, to whom sold, for what purpose, and at what price; also, the kind and quality of liquors remaining on hand; which report shall be sworn to by the person having the said permit, and shall be kept by the auditor, subject at all times to the inspection of the public." Any one violating this provision "shall forfeit

and pay to the school fund of the county the sum of \$100," and, for a second violation, the permit will be forfeited. It is made unlawful for any person holding a permit to "knowingly sell, by agent or otherwise, any spirituous or other intoxicating liquors to any minor for any purpose whatever, unless upon the written order of his parent, guardian, or family physician, or to sell the same to any intoxicated person, or to any person who is in the habit of becoming intoxicated. And any person violating the provision of this section shall forfeit and pay to the school fund the sum of \$100 for each offence, to be collected by action on his bond by any citizen of the county."

The question of taxing railroads, and regulating their tariff, was also a prominent one in the debates of the Assembly. The act "to tax railroad property, regulating such taxation, and releasing certain taxes herein named," as finally passed, provides that it "shall be the duty of the Census Board, on the first Monday of March, in each year, to assess all the property of each railroad company in the State, excepting the lands, lots, and other real estate of a railroad company not used in the operation of their respective roads." The officers of any company, owning, leasing, or operating any railroad in this State, are required "to furnish said board, on or before the 15th day of February, in each year, a statement, signed and sworn to by such officer or officers, which statement shall embrace in detail, and show, for the year ending January 1st preceding:

"1. The whole number of miles owned, operated, or leased, in the State, by any railroad company making the return.

"2. The number of miles owned, operated, or leased by such company, with a detailed statement of all property of every kind located in each county in the State.

"3. Also a detailed statement of the number of engines, passenger, mail, express, baggage, freight, and other cars, or property used in operating or repairing such railroad in this State, and on roads which are part of lines extending beyond the limit of this State; the return shall show the actual amount of rolling-stock in use on the company's line in the State during the year for which return is made. The return shall show the amount of rolling-stock, the gross earnings of the entire road operated by the company, and the gross earnings in this State, and all property designated in section three of this act. And such other facts as the Census Board shall in writing require."

Such property is to be valued at its true cash value, and assessment made upon the entire road within the State, "and shall include the right of way, road-bed, bridges, culverts, rolling-stock, depots, station-grounds, shops, buildings, gravel-beds, and all other property, real and personal, exclusively used in the operation of such railroad." In assessing said

railroad and its equipments, the said Census Board shall take into consideration the gross earnings per mile for the year ending January 1st preceeding, and any and all other matter necessary to enable said Census Board to make a just and equitable assessment of said railroad property. If a part of any railroad is without the State, then, in estimating the value of its rolling-stock and movable property, they shall take into consideration the proportion which the business of that part of the road lying within the State bears to the business of the road without the State: *Provided*, That the valuation by the Census Board of the property of railroads shall be in the same ratio as that of the property of individuals.

The Census Board, on or before the 5th of March, must transmit to the supervisors of each county, through which the roads pass, a statement showing the length of road in that county and the assessed value per mile, "as fixed by a *pro rata* distribution per mile of the assessed value of the whole property." The supervisors of the county, at their next meeting after receiving this statement, are required "to make, and enter in the proper record, an order, stating and declaring the length of the main track, and assessed value of such road lying within each city, town, township, and lesser taxing districts, in said county, through which said road runs, as fixed by the distribution of the amount assessed by the Census Board, which aforesaid amount shall constitute taxable value of said property for all taxable purposes. And the amount due each city or incorporated town, under the provisions of this act, shall be paid over, when collected by the county treasurer, to such city or town, and the board of supervisors shall transmit a copy of said order to the city council or trustees of each city or incorporated town or township."

All railroad property thus assessed is made taxable "at the same rates by the same officers, and for the same purposes, as the property of individuals within such counties, cities, towns, townships, and lesser taxing districts."

All laws relating to the enforcement of the payment of delinquent taxes are applicable to all taxes levied under this act, and the county treasury may proceed to collect the same "in the same manner, and with the same right and power, as a sheriff under execution, except that no process shall be necessary to authorize him to seize and sell engines, cars, or other rolling-stock, for the collection of said taxes."

Real estate, belonging to any railroad company, not exclusively used in the operation of the several roads, is made subject to assessment and taxation the same as other similar lands in the several counties wherever situated.

In case the proper officer of any railroad company shall fail to make the required statement under oath, the Census Board shall proceed to assess such railroad property, and shall add thirty per cent. to the assessable value thereof.

Finally, it is provided that the companies shall be released from the payment of all taxes hitherto assessed by local authorities.

"A bill for an act to prescribe rules and regulations for railroads and to establish uniform and reasonable maximum rates of tariff for the transportation of freight thereon," occupied much time, and was discussed at great length, but did not pass. An act was passed making railroad companies liable for the wilful wrongs of their agents and employes.

An act for the protection of the life and health of miners was passed, which provides for a county inspection in each county where there are coal or other mines, whose duty it shall be to ascertain whether the mines are properly ventilated and provided with means of egress, and to cause such to be provided where they are wanting.

Capital punishment for the crime of murder was abolished by the following act:

An Act in relation to Capital Punishment, and regulating Pardons.

SECTION 1. *Be it enacted by the General Assembly of the State of Iowa*, The penalty of death, as a punishment for crime, is hereby abolished.

SEC. 2. All crimes heretofore punishable with death shall be punished by imprisonment for life at hard labor in the State Penitentiary.

SEC. 3. That, in all cases of conviction under the preceding sections, the Governor shall not grant a pardon unless the same shall have been recommended by the General Assembly of the State.

SEC. 4. This act shall take effect from and after its passage and publication.

Approved May 1, 1872.

The vote on its final passage stood 29 to 17 in the Senate, and 66 to 22 in the House. An act was also passed providing "that no appropriation of public money or property shall be made, and no gift, loan, or appropriation of money or property shall be authorized by the corporate authorities, supervisors, or trustees of any county, township, city, or town, or municipal organization of this State, to, or in favor of any institution, school association, or object, which is under ecclesiastical or sectarian management or control."

Another act provides for taking the census of the State in 1878, to be printed and distributed to the county auditors before the 1st of January, 1874. It is to include "an enumeration of the inhabitants, showing the total number of males, total number of females, number of persons entitled to vote, number of militia, number of foreigners not naturalized, number of families, number of dwellings, and number of acres of improved land, and such other items as the Census Board shall deem important."

By another act the council of any city or incorporated town is authorized to raise and appropriate money, not exceeding in amount one mill upon the dollar of the assessed value of taxable property in any one year, "to procure books, maps, charts, periodicals, and other publications, for the establishment and perpetual maintenance of a free public library

within the limits of such city or incorporated town." Provision is made for acquiring land, erecting buildings, adopting rules and regulations, and doing whatever else is necessary to carry out the objects of the act. Such libraries must be open to the free use of every inhabitant of the town in which they are established, "for the general diffusion of intelligence among all classes of the community." The sixth section of the act is as follows: "Any city or incorporated town of this State proposing to accept the benefits of this act, shall, before exercising the powers herein conferred, submit to a vote of the people, at any municipal election of such city or incorporated town, the question 'Shall the city' (or town council, as the case may be) 'accept the benefit of an act of the Legislature for the creation and maintenance of a free public library? Yes. No.?'"

A general act was passed authorizing "any number of persons not less than five" to "associate themselves together and become a corporation as provided in and by the general incorporation laws of the State of Iowa, for the purpose of raising moneys to be loaned among the members of such corporation, and to other persons, for use in buying lots or houses, or in building or repairing houses, or other purposes."

Among the other acts passed was one for the establishment of another penitentiary, to be located "near the stone-quarries near Anamosa;" one providing for the enlargement of the Institution for the Education of the Blind, and the change of its name to the "Iowa College for the Blind;" one establishing a board of Capitol commissioners, with the Governor at its head, to take charge of the erection of the State-House at Des Moines, the cost of which is limited to \$1,500,000; and one constituting a visiting committee to ascertain the condition and management of insane asylums, and see that needed reforms are adopted.

An effort was made to carry a resolution submitting to a vote of the people the proposition, to strike from the clauses of the constitution, relating to the right to vote and hold office, the word "male." The resolution passed the House by a vote of 58 to 59, but was defeated in the Senate, 22 voting in the affirmative, 24 in the negative, and 4 being absent or not voting.

The Assembly adjourned on the 28d of April, to the third Wednesday of January, 1873. The object of the adjourned session was to complete the revision of the code of laws.

The first political convention of the year was that of the Republicans, held for the purpose of appointing twenty-two delegates to the National Convention of the party. Resolutions were adopted, indorsing the Administration of President Grant, and instructing the delegates to vote for his renomination, and for James F. Wilson as a candidate for Vice-President. On the 23d of April a mass convention was held

at Davenport, to choose delegates to the Liberal Republican Convention at Cincinnati. One hundred and fifty delegates were appointed, and resolutions adopted opposing the renomination of President Grant, and pledging support to "any one of the good and able men of the party for the first place in the gift of the people, nominated upon a platform declaring in favor of honesty, economy, amnesty, thorough, genuine reform, and the one-term principle for the presidency."

The Democrats met in convention at Des Moines, on the 11th of June, and appointed delegates to the National Convention at Baltimore. The resolutions favored the indorsement of the nominations and platform of the Liberal Republicans made at Cincinnati.

The Democrats and Liberal Republicans held conventions at Des Moines, on the 1st of August, to nominate State officers. No Governor or Lieutenant-Governor was to be nominated, and the ticket selected by a conference committee and adopted by both conventions was as follows: For Secretary of State, E. A. Guilbert; State Treasurer, M. J. Pholfe; Auditor, J. P. Casserly; Attorney-General, A. G. Case.

The Republican State Convention met at Des Moines, on the 21st of August, and nominated Josiah T. Young for Secretary of State, William Christy for Treasurer, John Russell for Auditor, Aaron Brown for Register of State Land-Office, and M. E. Cutts for Attorney-General. A platform was adopted which eulogized the achievements of the Republican party, indorsed the platform and candidates of the National Convention, and set forth the following principles:

That we are in favor of the most rigid economy in the administration of the affairs of this State and the nation.

That we are opposed to any legislation, State or national, that tends to unjustly discriminate between individual interests and the interests of corporations, believing that property, whether held by individuals or corporations, should bear its equal and just portion of the public burdens.

That we are opposed to all further grants of land to railroad or other corporations, and that the public domain, which is the common heritage of the people of this country, should be sacredly held by the Government for the use and benefit of actual and *bona-fide* settlers.

That we hereby indorse the recommendation of President Grant that immigrants be protected by national legislation, and that all efforts on the part of the government of the State or nation to encourage immigration from foreign countries meet our approval, and we hereby commend the labors of the officers of this State in their efforts to encourage and secure immigration to the State of Iowa.

At the election, the total vote given for President was 202,762, of which the Grant electors received 181,566, and the Greeley electors 71,196. The total vote for Secretary of State was 206,856, of which Young, Republican, received 182,859, and Guilbert, Democrat, received 74,497. The Legislature contained a large Republican majority,

The revenue of the permanent school fund of the State, which was apportioned among the several counties on the 4th of March, amounted to \$161,400.75. The number of youth enrolled at the same date was 461,145. The State Institution for the Education of the Deaf and Dumb contained 102 inmates on the 1st of February. The number enrolled during the two years preceding was 119, of whom 72 were males, and 47 females. The number admitted during that period was 36. The supposed causes of their deafness were as follow: Congenital, 4; scarlet fever, 7; spotted fever, 4; brain-fever, 3; measles, mumps, scrofula, gatherings in the ears, and "unspecified sickness," each 2; inflammation of the brain, small-pox, whooping-cough, diphtheria, sun-stroke, medicine, cold, and "cold in the head," each 1. The institution is open to all deaf-mutes of sound mind, free from immorality or contagious or offensive diseases, between the ages of 10 and 25. A course of instruction covers a space of seven years.

The Home for Soldiers' Orphans, at Cedar Falls, which was organized in 1865, contained, in February, 300 children. The total number received since its organization was 669. The site of the buildings now used comprises forty acres of land. One-third of this area is occupied by the buildings and play-grounds; the remainder is laid out in walks and drives. The main building is of brick, 46 by 90 feet, three stories and basement, with vestibule 7 by 30 feet, and centre wing 40 by 36 feet. Another is the new chapel building erected last year, also of brick, which will seat 400 persons. The school is graded after the public-school system, from the primary to the high-school, and each grade is presided over by a well-qualified teacher. The first provision for expenses made by the State was an allowance of \$8½ for each child, per month, which, in 1868, was raised to \$10, the present rate. The total amount of special appropriations by the State for improvements, outside of the children's expenses, is \$41,900, up to this time.

Forty-seven life insurance companies sent their annual statements to the Auditor in the spring, seven of which failed to report the amount of premiums and losses. The forty companies reporting in full received \$847,925.35 in premiums. The number of policies issued during the year was 4,818. The whole number of policy-holders in the State is estimated at 40,000. The amount paid in losses by the forty companies reporting was \$186,291.81. The estimated amount received for policies by the non-reporting companies was \$100,000, and the losses, \$40,000.

According to the census of 1870, the State contained 9,898,467 acres of improved land, 2,524,796 of woodland, and 3,620,533 of other unimproved land. The cash value of farms was \$392,662,441; of farming implements and machinery, \$20,509,582; total amount of wages paid during the year, including value of board,

\$9,377,878; total (estimated) value of all farm productions, including betterments and additions to stock, \$114,386,441; orchard-products, \$1,075,169; products of market-gardens, \$244,963; forest-products, \$1,200,468; value of home manufactures, \$521,404; value of animals slaughtered or sold for slaughter, \$25,781,223; of all live-stock, \$82,987,133. There were 433,642 horses, 25,485 mules and asses, 369,800 milch-cows, 614,366 other cattle, 855,493 sheep, and 1,853,908 swine.

The chief productions were 28,708,312 bushels of spring and 727,880 of winter wheat, 505,807 of rye, 68,985,065 of Indian-corn, 21,005,142 of oats, 1,960,779 of barley, 109,432 of buckwheat, 71,792 pounds of tobacco, 2,967,043 of wool, 42,313 bushels of peas and beans, 5,914,620 bushels of Irish and 34,292 of sweet potatoes, 37,518 gallons of wine, 27,512,179 pounds of butter, 1,087,741 pounds of cheese, 688,800 gallons of milk sold, 1,777,339 tons of hay, 2,475 bushels of clover-seed, 53,432 bushels of grass-seed, 171,113 pounds of hops, 695,518 of flax, 88,621 bushels of flax-seed, 146,490 pounds of maple-sugar, 1,218,635 gallons of sorghum, and 9,315 of maple, molasses, 853,218 pounds of honey, and 2,225 of wax. The total number of manufacturing establishments was 6,566, having 899 steam-engines, of 25,298 horse-power, and 726 water-wheels, of 14,249 horse-power, and employing 25,032 hands, of whom 28,395 were males above 16 years of age, 951 females above 15, and 686 youths. The invested capital amounted to \$22,420,183; wages paid during the year, \$6,893,292; value of materials, \$27,632,096; products, \$46,534,322.

There were 238 newspapers and periodicals, having an aggregate circulation of 219,090, and issuing 16,403,380 copies annually. There were 22 daily, with a circulation of 19,800; 3 tri-weekly, circulation 1,650; 1 semi-weekly, circulation 1,000; 196 weekly, circulation 187,840; 8 semi-monthly, circulation, 3,400; 5 monthly, circulation 3,950; 2 bi-monthly, circulation 750; 1 quarterly, circulation 700.

The total number of libraries was 8,540, containing 673,000 volumes. Of these, 2,387, with 295,749 volumes, were private, and 1,153, with 377,851 volumes, were other than private, including 18 circulating libraries, with 20,867 volumes.

The number of religious organizations of all denominations was 2,763, having 1,446 edifices, with 431,709 sittings, and property valued at \$5,780,352. The leading denominations are given as follows:

DENOMINATIONS.	Organizations.	Sittings.
Baptist.....	353	50,690
Christian.....	113	13,760
Congregational.....	187	28,925
Friends.....	89	17,075
Methodist.....	139	142,665
Presbyterian.....	375	64,390
Roman Catholic.....	216	67,300
United Brethren in Christ.....	168	10,445

IRON MANUFACTURE IN THE UNITED STATES. In a paper read before the Iron and Steel Institute, by Mr. T. Guilford Smith, of Philadelphia, a brief sketch of the iron manufacture in the United States is given. The following interesting particulars form a portion of it:

The necessities of the colonies in North America, at a very early date, compelled the inhabitants to begin the manufacture of iron. We accordingly find historical notices of furnaces whose very place is now forgotten, as well as the more enduring ruins of the stone stacks then in vogue. The fuel used at that time was, of course, charcoal, and the furnace was always located near to some iron deposit, wood for the charcoal being abundant everywhere.

But, as the forests were gradually cut down, and charcoal became dear in the older settlements, the make of iron decreased, and the furnace itself was finally abandoned for a new one built in the vicinity of fresh woodlands. So the march of settlements has gradually thrust the manufacture of charcoal-iron into the backwoods. Charcoal furnaces are now only to be found in the extreme Northwest, as in Michigan; or in the South and Southwest, as in Alabama, and Tennessee, where great local deposits of iron-ores exist.

The destruction of timber in America, which has been going on steadily ever since the first settlers landed, is at last attracting public notice, and it is hoped that, before long, a system of inspection will be instituted in the several States, by which the cutting of trees will be limited by statute, and the balance restored by planting each year some approximation, at least, to the number cut down. It may not be out of place to say here that California has created the office of State Forester, and made an appointment to fill it.

As long as charcoal-iron maintains its supremacy in the market for various purposes, the question of wood-supply is not without interest to iron-men, but its chief aid would be, of course, to supply the demand for timber of all kinds which has already risen in value at a rate but little dreamed of a few years ago. But the importance of this subject to iron-men in America was much lessened in 1837, when our first experiments in smelting iron with raw anthracite coal were successful at Mauch Chunk, in the Lehigh Valley, Pennsylvania. David Thomas, of Catasauqua, was the first to make this application in the United States. From the discovery in 1837, we now have, in this Lehigh region alone, 33 furnaces, turning out 378,000 tons of iron, while three new furnaces are building, of a total estimated capacity of 27,000 tons additional, and the total production in the country reached nearly 2,000,000 tons in 1870.

Up to 1840 but little iron had been made except with charcoal, the immense deposits of bituminous coal, with which coke is now made for iron-smelting, were as yet too far from markets, except in a small way, perhaps, at Pittsburg, or in Virginia, or Maryland.

Eastern Pennsylvania, the first home of the iron-trade, is drained by the Lehigh and Schuylkill Rivers, so far as the coal-fields are concerned, both of which flow into the Delaware. The Susquehanna, a little farther to the west, but still flowing into the Atlantic, was the next home of the iron industry; next, the Juniata Valley; but it was not until the Alleghany Mountains were crossed that the manufacture of iron may have said to have fairly "gone West."

Pittsburg, "where manufactured iron and steel are more largely produced than in any other point in the United States," became the next seat of iron-manufacture. At Pittsburg, the manufacture of steel obtained its first permanent "lodgment" in the United States. To-day, the skill and enterprise of her people are engaged in establishing the manufacture of phosphor-bronze, the new metallic alloy, which

seems likely to rival steel in many of its uses. The manufacture of iron "stopped to breathe" some time at Pittsburg. Before reaching there, coke had been substituted for anthracite coal as a fuel, and coke continues to be the principal fuel used at Pittsburg still. But not far from there, in Clarion County, Pennsylvania, and at Youngstown and Zanesville, Ohio, still farther west, they discovered a coal, called block-coal, which they could use in the raw state in their blast-furnaces, and make an iron of superior quality. This gave a new impetus to what may be now called "Western iron manufacture." Thus far, at all the various halting-places of the iron-trade, local ores had been used mainly, but the time had now arrived when the trade demanded the purest iron-ores available, and were prepared to pay for their transport from a distance, hoping to be remunerated in the end by the superiority of the product obtained, which the use of the raw block-coal with them was proved to secure.

Let us pause here for a moment to examine what this new fuel (block-coal) is, and what are its peculiarities, for this coal is found to exist not only in this isolated district comparatively, but in a larger field in the State of Indiana, where its use is giving peculiar value to the iron made with it for making Bessemer steel.

Dr. Foster, of Chicago, says, in a pamphlet on "Mineral Wealth and Railroad Development," that "the term 'block,' as descriptive of a peculiar class of coals, came in an unscientific way to the geological vocabulary, but it has now become so firmly rooted that it must hereafter be recognized as legitimate. The physical characters of this class of coals are these: there are two systems of joints traversing the seam perpendicularly, which cut the mass into quadrangular blocks, 2 feet or 3 feet long, and 1 foot or more broad, and the miner, availing himself of these natural divisions, after having undermined the base, is able to pry out the blocks without resort to gunpowder. He can easily take down three tons a day. The sides of the block are smooth, of a dull-bluish color, and are often stained white with fire-clay; but, if cleft longitudinally, there is seen a mass of mineral charcoal, so slightly cemented by bitumen, that it readily cracks on handling. This coal, when thrown upon a fire, at once ignites with a crackling sound, and burns with a bright-yellow flame. It is non-coking, or, in other words, does not run together, thus affording free air-passages. It is so free from sulphur, that it leaves behind a white or gray flocculent ash, and, subjected to the strongest drafts, it gives no clinker. From careful assays, it is ascertained that this class of coals gives from 57 to 62 per cent. of fixed carbon. These block-coals, when tested in a blast-furnace, have all the qualities of charcoal as a reducing agent. Two and a half tons are required to make a ton of iron. It is a significant fact that the puddled iron made at Indianapolis from block-coal pig is employed at Pittsburg in forging gun-barrels."

From the above description of Dr. Foster, the importance of this discovery to the Western manufacture of iron is not easy to be over-estimated. Using this fuel, and some Lake Superior magnetic with some local ores, soon brought the furnaces at Zanesville, Ohio, into notice. The demand for the Lake Superior, or iron-ores as celebrated for their purity, began to increase soon after the discovery of this block-coal. With a view of forming an economical junction of block-coal and Lake Superior iron-ore, the iron-trade took another step farther west, and located itself at Cleveland, on Lake Erie.

"The census of 1880 gave a total of 76 blast-furnaces located in Ohio, Indiana, Michigan, Illinois, Wisconsin, and Kentucky, and 24 rail-bar, sheet, and boiler-plate mills, with a capital of \$5,870,000, employing 2,804 hands, at a cost of \$1,094,160, and producing 85,723 tons, of which 40,000 were rails. In 1870, three works alone in these States have invested more than the capital of 1860, employ 2,800 hands,

at a cost of \$1,556,000 in wages, and produce 100,000 tons of rails, 90,000 tons of pig, and 10,000 tons of bar and plate iron."

The following figures of the production of iron-ore and pig-iron, from the Lake Superior district, speak for themselves: "In 1856, 7,000 tons of ore, no make of iron; value of the ore, \$28,000. In 1860, 116,808 tons ore, 5,600 tons pig-iron; value of both, \$788,496. In 1870, 856,471 tons of ore, 49,398 tons pig-iron; value of the ore and iron, \$6,300,170. Or, since 1866, the value of the total output of ore and iron is, \$29,069,888. In 1870, the product was from sixteen mines, and finds a market in all parts of the country. The largest portion of the ore is sent to Cleveland, Ohio, whence it is reshipped to the coal-fields of the Mahoning and Chenango Valleys by railroad. About 100 furnaces in Ohio and Pennsylvania use Lake Superior ore, while nearly all the charcoal-furnaces in the Northwest are supplied with it."

From Cleveland, following the progress of the pig-iron manufacture, we find no important cities dependent on this branch of business for their growth until we reach St. Louis. Neither Cincinnati nor Louisville has as yet become prominent as a manufacturing city, although it is likely both may do so before long, when the railroads now building are completed.

The gap from Cleveland, Ohio, and St. Louis, Missouri, is almost destitute of iron-works, except those built and building on the newly-discovered block-coal of Indiana, and mainly within that State.

At Terre Haute, one blast-furnace and a rail-mill are in successful operation. These all have taken their rise since 1860, many as late as 1867.

This coal-field is destined to supply St. Louis from the foundation of works within itself. At St. Louis, blast-furnaces have been erected on the most extensive scale, and more are building; one of the finest rolling-mills in America has been erected there, and, from the splendid situation of the city, she is destined to take a most important part in the iron-manufacture of the United States.

Over fifteen furnaces are in blast there, and several rolling-mills. Its proximity to the Indiana coal-field, and to the celebrated Iron Mountain, of Missouri, makes it a cheap as well as convenient point of manufacture. In 1868, 105,000 tons of ore were taken out from Iron Mountain; in 1869, 195,000 tons; in 1870, 816,000 tons, and last year it was confidently expected to reach, if not exceed, 500,000 tons.

The manufacture of Bessemer steel has in like manner followed the same path as that trodden by the iron-manufacture in its westward career—the first works, on the Hudson, at Troy, New York, then at Harrisburg, Pennsylvania, in the valley of the Susquehanna, then at Lewistown, Pennsylvania, in the valley of the Juniata, at Cambria County, Johnstown, Pennsylvania, at Pittsburg, Pennsylvania, Cleveland, Ohio, Wyandotte, Michigan, Joliet, Illinois, and at Chicago, and finally, at Milwaukee, Wisconsin.

The iron interest follows close upon the tide of immigration. The charges for transportation for such long distances encourage the building of furnaces and rolling-mills at the earliest practicable moment. Their erection marks very accurately the years in which wealth has been accumulated.

The total mileage of the railroads of the United States amounts to over 60,000 miles, and has increased in the last decade at the rate of 10 per cent. To supply this demand for rails, and to keep up the renewals of these roads, and to furnish other demands for iron, now keep "700 blast-furnaces, and 300 rolling-mills at work, which employ 140,000 men directly in the business." In addition, we are indebted to foreign countries for 511,059 tons of rails, to say nothing of the vast amount of imports of other forms of iron and steel manufacture, amounting to 826,088 tons.

ITALY, a kingdom in Southern Europe. King, Victor Emmanuel, born March 14, 1820;

succeeded his father as King of Sardinia, on March 23, 1849; assumed the title of King of Italy, on March 17, 1861. Heir-apparent to the throne, Prince Humbert, born March 14, 1844; married April 22, 1868, to Princess Marguerita of Savoy, daughter of the late Duke of Genoa, brother of King Victor Emmanuel; their son, Victor Emmanuel, Prince of Naples, was born at Naples, November 11, 1869. The ministry, in October, 1871, was composed as follows: I. Lanza, President and Minister of the Interior; E. Visconti-Venosta, Minister of Foreign Affairs; I. de Falco, Minister of Justice and of Public Worship; Lieutenant-General Ricotti Magnani, Minister of War; Q. Sella, Minister of Finances; Rear-Admiral A. Riboty, Minister of Marine; I. Devincenzi, Minister of Public Works; E. Castagnola, Minister of Commerce and Agriculture.

During the period from 1870 to 1872, the expenditures and receipts of the kingdom were as follows (value in lire; 1 lire = 19 cents):

	1870.	1871.	1872.
Expenditures	1,111,632,814	1,568,042,949	1,890,877,073
Receipts	950,506,162	1,397,030,390	1,267,323,590

The rentes and interests on the public debt are 408,788,462 lire.

According to the report of the inspector of military levies for the kingdom of Italy, General Federico Torre, the Italian Army numbered, on September 30, 1871, 536,039 men, including officers and the men of the second category of the classes of 1846, 1847, 1848, and 1849, not yet incorporated. Under arms there were 182,531, and on unlimited leave 353,508. Deducting the officers and the non-incorporated categories, the non-commissioned officers and men at the above date were 333,555, which may be considered the real strength fit for immediate service. About 170,000 were under arms, and the rest on leave. The whole number comprised 17,787 non-commissioned officers, 42,900 corporals, and 272,868 privates. The infantry of the line numbered 198,880; the *bersaglieri*, or specially-trained light infantry, organized in battalions like the French *chasseurs-à-pied*, 27,527; cavalry, 21,995; artillery, 41,029; engineers, 2,774; royal carbineers or gendarmes, 19,500; officers on active service, 12,551; on half-pay, or in reserve, 1,519. In the conscription list for military service of men born in 1849, 271,846 names were inscribed. More than 25,000 of these were cancelled for various reasons, and 69,000 were struck off on account of infirmity, deformity, or insufficient stature. When the conscription was over, there were found to be more than 10,000 refractory recruits, the greater number belonging to the provinces of Genoa, Naples, Catania, Palermo, Messina, and Como. Finally, the effective force yielded by that conscription was, in the first category, 86,691, and in the second 47,696—together, 84,387 men of 21 years of age, selected out of

270,000 as the most able-bodied and apt for military service. Out of these 84,887, only 29,541 could read and write, and 3,897 could read; 51,194 were what the Italians call *inalfabeti* (illiterate), that is, more than 60 per cent. of the whole. The soldiers get some education during their time of service, but the great desideratum, as General Torre points out, is that they should be educated, at least as far as reading and writing go, before they enter the ranks, and it is to be hoped that this will soon be the case. The last conscription shows some slight improvement on previous ones. The returns of the marriages contracted in Italy in 1869 show a frightful state of ignorance. Out of about 205,000 men who married in that year, 125,000 could not sign their names to the register!

The imports and exports from 1869 to 1871 were as follows (in lire):

YEARS.	Imports.	Exports.
1869.....	938,500,000	791,600,000
1870.....	866,700,000	736,800,000
1871.....	868,700,000	1,085,500,000

The movement of shipping in 1870 was as follows:

VESSELS.	LOADED.		IN BALLAST.	
	Vessels.	Tonn.	Vessels.	Tonn.
Sailing-Vessels, Italian...	8,399	898,631	1,493	106,539

	90,001	6,347,506	28,733	1,363,346

The area of Italy is 112,622 square miles. A new census of the population was taken in 1871. The following table exhibits the population of the large divisions and of each province in 1871 and 1861:

DIVISIONS OF ITALY.	1871.	1861.	Increase.	P. ct. of Inc.
Piedmont.....	2, 08	2, 08	133,945	0.48

The navy, on January 1, 1872, consisted of 21 iron-clad steamers, carrying 201 guns; 18 screw-steamers, with 338 guns; and 19 side-wheel steamers, with 90 guns. The naval officers were: 1 admiral, 1 vice-admiral, 10 rear-admirals, 33 captains of ships-of-the-line, 50 captains of frigates.

The merchant navy consisted, on December 31, 1870, of 18,822 vessels, with an aggregate tonnage of 1,018,038, among which there were 118 steamers of 32,100 tons.

The aggregate length of railroads in operation was, at the close of the year 1871, 6,425 kilometres (1 kilometre=0.62 mile); the length of telegraph-lines, on January 1, 1871, 16,930 kilometres; the length of telegraph-wires, 49,946 miles. Receipts from railroads, 100,060,000 lire; from telegraphs, 4,816,689 lire; number of telegraph-offices, 1,237; of post-offices, 2,504; number of letters forwarded through the post-office, 87,600,000; of printed articles, 73,900,000.

The relations of the Italian Government with the Pope remained throughout the year unchanged. It repeatedly expressed a wish to come to an understanding, on the basis of the "legal guarantees" law of 1871, and the Pope steadfastly refused to recognize in any way whatever the overthrow of his temporal power. On January 1st, the King sent a special ambassador to the Vatican to tender his Majesty's congratulations to the Holy Father. The ambassador was met by Cardinal Antonelli, who informed him that his Holiness was indisposed and unable to receive visits. The Pope, in an address to a great number of Roman citizens, who called on him on March 10th, declared that it was impossible for two authorities to exist simultaneously at Rome, and to work together harmoniously. Similar addresses were, in the course of the year, made to many other deputations. On April 19th, Signor Ferrari asked, in the Chamber of Deputies, whether the ministry intended to present diplomatic documents relative to the relations with foreign powers. He also asked what had been the state of Italy's relations with the powers since the arrival of the Government at Rome, and in what relation she stood to the Vatican.

The Minister of Foreign Affairs, Signor Visconti-Venosta, said he had no intention of publishing diplomatic correspondence concerning Roman affairs. He added: "The Italian Government has wished to prove, not by dispatches, but by facts and experience, that the great re-

ligious institution of the papacy is respected in all its spiritual functions. There have not been any negotiations or exchange of documents. The Catholic Governments have manifested to us to the full extent their solicitude for the Pontiff and religious interests, but they have, at the same time, evinced their desire to maintain cordial relations with Italy upon the only possible basis, which is that of accomplished facts. All the powers give us proofs of a moderation which serves to facilitate the policy of peace, to which the Government persists in devoting all its efforts."

On June 19th the Pope addressed a letter to Cardinal Antonelli, deploring the threatened enforcement of the law suppressing convents in Italy, as a violation of international law. He says that the constant encroachments on the rights of the Church, by the Government of Italy, violate morality and justice. Only a regard for the highest interests prevents the head of the Church from leaving Rome. The conflict between the Holy See and the Italian Government is inevitable, and reconciliation is impossible. The Pope cannot submit to such usurpations, and he requests Antonelli to protest against them to the foreign powers. On November 16th the Government sent a parchment security for the annual sum allowed to his Holiness in accordance with the legal guarantees voted by the Italian Government off the book of the public debt of Italy. This security was accompanied by a letter from Signor Sella. Cardinal Antonelli replied that the Pope could not receive the sum offered, which was the application of one article of a law not accepted by the Holy See. In the Consistory, held on December 23d, the Pope delivered an allocution, in the course of which he severely censured the persecution of the Church by the Italian Government. The purpose to destroy her was shown in the acts of the Italian Government, which compelled the clergy to serve in the army, and imposed heavy taxes on church property. He solemnly protested against the bill then pending in the Italian Parliament for the suppression of religious corporations, and declared that title to property acquired by this means would be null and void. He repeated his censures of those who encroached on the rights of the Church.

The session of Parliament, which had been opened on November 27, 1871, was prorogued on July 5, 1872. The Parliament did little or nothing while awaiting the labors of a committee appointed to examine the financial solution proposed by Minister Sella. There was much important work which the body could have performed, but the great money question to such extent absorbed the general interest that the members preferred to indulge in repeated adjournments. On March 2d Signor Minghetti (ex-Premier) presented to the Chamber the report of the committee. The following are the principal conclusions of the report: The committee accepts the proposal to issue

notes to the amount of 300,000,000 lire in five years, on condition that the Chamber shall determine each year the portion of this amount that is to be issued. The committee agrees that the proceeds of the sale of ecclesiastical property bonds shall be paid into the treasury for the next five years. It postpones for a later period the consideration of the manner in which the duties of the treasury are to be performed. It assents to the voluntary conversion of the national loan into consolidated stock, at the rate of 5.40, and for that portion of the loan which is not exchangeable by the holders. It accepts the contract with the bank with this modification, namely, that the profit and loss shall be equally divided. It agrees to the proposal for doubling the capital of the bank without increasing its paper circulation. It approves the increase of the tax on petroleum, and partially also the tax on coffee. It rejects the tax on tissues as proposed, and approves the other secondary administrative propositions. The report also stated that Signor Sella, the Minister of Finance, agreed to the committee's conclusions, excepting the postponement of the question respecting the service of the treasury. Signor Sella, on March 18th, defended the proposals which he had brought forward. He agreed to postpone the question of taxing textile fabrics, and, after demonstrating the utility of confiding the service of the treasury to the bank, he announced his readiness nevertheless to accept also the postponement of this question. He said an equilibrium had, in consequence of political events, not been attained. He defended the increase in the circulation of bank-notes and the other proposals of his budget, entering into various calculations in support of his views. He also defended the conversion of the loan. The minister added that he especially trusted to the Right and Right Centre to support him. He contested the accuracy of Signor Rattazzi's assertion that the ministry had not got to Rome entirely by moral means, and in conclusion he called upon the Chamber to declare whether the Government did or did not possess its confidence. Signor Rattazzi, in making a personal explanation, defended his conduct at the period of Mentana. He said the policy he pursued was daring and perilous, but was necessary to avoid still greater dangers. On March 23d the Chamber adopted the whole of the financial projects of the Government by 208 votes against 160; on April 18th they passed the Senate by 72 votes against 2. The propositions of the Government for putting a stop to smuggling, suppressing the free port of Civita Vecchia from the 1st of January, 1874, and converting the free port of Genoa in three years into a general harbor, were also adopted.

In May the Minister of Public Instruction, Signor Correnti, tendered his resignation because his colleagues decided to withdraw a bill he drew up some two years previously, regulating the salaries, etc., of teachers in second-

ary schools, etc. In conformity with the policy adopted by the Italian Government since its arrival in Rome, and which has been applauded by the majority, the ministry resolved to withdraw the bill. Signor Correnti, egged on by the Left, to which he formerly belonged, urged his measure. Applauded by the opposition press, and cheered on by the bitterest opponents of the party from which his colleagues proceed, he would not give way. On May 16th, M. Sella announced that Signor Lanza, the President of the Council, had left for Naples to take the king's commands. On May 18th the President of the Council read the royal decree accepting the resignation of the Minister of Public Instruction, and appointing M. Sella temporarily to assume his functions; also another decree authorizing the withdrawal of the bill concerning the proposed improvements in the position of the masters of secondary schools. From the explanations that ensued, it appeared that Signor Correnti had accepted the suppression of the first article of the bill abolishing the spiritual directors (chaplains) of the schools in question, but had thought it inconsistent with his dignity to agree to the withdrawal of the whole bill, which his colleagues, on the contrary, considered indispensable, although proposing to bring it forward again at a future date, when the questions relating to religious instruction should have been settled. At the present period of the session the Government thought the long discussion was inopportune, which the measure would certainly provoke, and they had endeavored to postpone it by giving precedence to the budget; but the Opposition thwarted them in this, and they had no choice but to withdraw the bill, the more so as it was perfectly well understood that, if it came to a debate, the omitted article would be re-proposed in the form of an amendment by members of the committee which had reported on it. The Chamber ultimately, by 175 votes against 114, rejected an order of the day stating that the House did not consider the explanation given by Signor Lanza satisfactory.

The Italian Chambers reassembled on November 20th, without a speech from the throne or other ceremonies, and without reelection of the Board. The President of the ministry, in reply to a question, detailed the measures which the Government had adopted with regard to the damage caused by the inundations. In answer to Signor Oliva, the minister declared that the condition of public safety had improved, especially as regards acts of violence. The Minister of Justice then introduced the bill for the suppression of religious corporations, which, it was generally expected, would become the most exciting topic of debate. The bill declared that the laws of 1866, 1867, 1868, and 1870, relative to the suppression of religious corporations and the con-

version of their property, should be applied to the province and city of Rome. It, however, maintained the houses of the directors of those corporations that had a director or deputy-director in the city. The original property of such houses might be retained, but could not be increased, and they would not enjoy civil rights. The property of the suppressed corporations would continue to be applied to the charitable purposes for which they were originally established. The edifices appertaining to the religious establishments in Rome would remain at their disposal until such time as the pensions to be granted should have been decided upon, which decision must be arrived at within twelve months. The property of the religious corporations in the city would be converted into inalienable public rentes. The minister, in the course of his speech, added that the total net revenue of the corporations amounts to 7,192,000 francs. The bill provided for the pensioning of the members of the suppressed convents at rates varying from 150 lire to 600 lire per annum. The foreign religious bodies which were included in the expropriation bill might, during two years, constitute foundations in conformity with their institutions from the profits of the churches belonging to them. When the two years' term had expired, the Government would no longer recognize their civil individuality, but would treat with the foreign governments whose subjects they were, to determine what was to be done with their property. Their immovable property would be sold and the proceeds formed into a treasury for the payment of the pensions, under the control of the ministry. The special committee on this bill, on December 13th, all but unanimously adopted the first section. With regard to section 2, which deals with the heads of houses of religious corporations, several deputies of the Left opposed this preservation of the establishments assigned to the generals of orders, and proposed amendments, which, with the consent of the keeper of the seals, were referred back to the committee, which ultimately passed the section by 15 votes against 9. On December 15th the committee adopted a resolution declaring that the suppression of the Society of Jesus, including the chief establishment of the Order in Rome, was imperatively demanded by the interests of the nation. The announcement of this action was received by the Liberal deputies with enthusiastic applause.

In March the Radical party of Italy lost, by the death of Mazzini, its recognized leader. Great demonstrations took place in his honor throughout the peninsula. At his funeral, at Pisa, about 12,000 persons were present, among whom were many students, some deputations from the provinces and the communes, and from working-men's societies and freemasons. In Rome an immense procession, including all the working-men's societies, with banners, flags, and bands of music, carried the

bust of the deceased patriot through the principal streets to the capitol, where it was deposited with imposing ceremonies and eulogistic speeches. By the side of the bust, there was placed, on the car, a colossal statue of Italy, with one hand holding a crown of laurel over the image of the dead patriot, and with the other pointing to him as to one whose example should be followed. There were two accompanying bands of music, and the American flag was borne immediately in front of the car by a young American visitor, walking with Mr. T. Buchanan Read, the painter and poet. The bust, on arrival at the capitol, was received by a deputation of the municipality, and a short speech was delivered during the ceremonial of the reception. In the Italian Parliament, eulogies on the efforts of Mazzini in behalf of Italian unity were delivered by men of all parties. A committee was formed to erect a national monument in his honor, at the head of which was Garibaldi. During the remainder of the year, the Radical party made but few political demonstrations. On November 24th it proposed to hold, in Rome, a large meeting in favor of universal suffrage, but the Government prohibited it, and occupied the principal points of the city with troops and national guards, and arrested a number of persons connected with the movement. On November 25th Signor Nicotera, in the Chamber of Deputies, censured the Government for what he designated as the unnecessary and excessive display of military force in connection with the projected meeting in favor of universal suffrage. Signor Lanza, the president of the ministry, replied it was notorious that the delegates of the democratic societies intended disregarding the decision of the Government in prohibiting the meeting. It was therefore prudent to take measures against a surprise, so as to avoid a violation of the law, and prevent disorder. He believed the Government did its duty in this matter. Signor Lanza declared himself not satisfied with an order of the day, proposed by Signor Nicotera, deploring that the Government had not rightly understood the interests of public order and of the dignity of the state. He proposed that the debate on the subject should be adjourned. At the close of the sitting, Signor Nicotera withdrew his motion, believing that a debate upon it might unfavorably affect the persons arrested.

The municipal elections which were held in Italy derived a particular interest from the fact that, in the former States of the Church, and in several other of the annexed provinces, the Catholic party, for the first time, took an active part in them. In most of the large towns, the Liberal party gained great successes, but, in some places, the Catholics had a majority, and, in many others, they exhibited a strength unexpected by their opponents.

In the latter part of April the grandest eruption of Mount Vesuvius since the year

1631 took place. The devastation caused thereby was terrible. Thousands of acres of cultivated land were covered with ashes and lava, and vineyards and farms were buried out of sight. About twelve persons, as far as could be ascertained, were killed, and an equal number injured. The villages of San Sebastian and Massa di Somma were almost entirely destroyed, and a considerable number of towns and villages were for a time threatened with destruction, and their inhabitants compelled to flee. On May 1st the eruption ceased. The Chamber of Deputies authorized the Government to take the necessary measures to provide for the comfort of the people who were so suddenly deprived of their homes.

During the month of October, terrific inundations laid waste almost every part of the peninsula, and especially the Lombard and

Emilian provinces, bordering on the Po. The disaster assumed the dimensions of a national calamity. The greatest sufferers were the provinces of Mantua and Ferrara. In the former, two-thirds of the area were inundated, and, in the latter, one-third. The number of houseless persons, in the two provinces, was estimated at over 60,000. Sermede, a town about half-way between Mantua and Ferrara, was completely inundated, the water rising up to the first floor of the houses. No lives were lost, but the amount of damage could not be estimated. At Mirandola, a town about twenty miles north of Modena, 7,000 fugitives arrived, and the local authorities were doing their best to supply them with food and shelter. Many houses had been destroyed, and the waters had risen more than a metre higher than in the floods of 1839.

J

JAMAICA, Right Rev. AUBREY GEORGE SPENCER, D. D., Bishop of, born in London, February 12, 1795; died at Torquay, February 24, 1872. He was the eldest son of William R. Spencer, and great-grandson of Charles, second Duke of Marlborough, and was educated at Dr. Burney's school in Greenwich, and at Magdalen Hall, Oxford. He was ordained about 1820. After having held some parochial cures in England, and the archdeaconry of Bermuda, he was consecrated, in 1839, to the bishopric of Newfoundland, whence he was translated, in 1843, to the See of Jamaica; in which island the bishop was also a Privy Counsellor. The gross income of the diocese, which comprised Jamaica, British Honduras, the Bahamas, Turk's Islands, and the Bay Islands, was \$15,000 per annum, chargeable on the Consolidated Fund. Dr. Spencer published a volume of sermons, charges, etc., and contributed some poems to *Blackwood's Magazine* and other periodical publications. He resigned the administration of his diocese into the hands of the Right Rev. Dr. Courtenay, who, in 1856, was consecrated Bishop of Kingston, and suffragan and coadjutor to the Bishop of Jamaica.

JAPAN, an empire in Eastern Asia. The administration and the supreme executive power of the country are vested in the Mikado. The United States Government was represented at the imperial court, in 1871, by O. E. De Long, minister resident at Yeddo.

According to official sources, the population of Japan amounted, in 1870, to 84,786,321; the imperial family had 20 members; the families of the daimios, 3,186; the Samurai, officers, scholars, and warriors, represented a population of 1,872,959; the Buddhist priests, 244,869; the Sintoo priests, 163,140; nuns, 6,711; peasants, traders, mechanics, etc., 31,954,821; beggars, 82,920; pariahs, tanners, etc., 459,695.

The area of the country, comprising Japan proper, and 8,850 islands, which are its dependencies, is reported as follows:

	BY ENGELHARDT.	BY SIEBOLD.
	Square Miles.	Square Miles.
Japan, or Nippon, with Sado, Oki, Awadsi, etc.	90,815	87,443
Stikokki.....	6,974	8,919
Kiusiu and small islands.	17,364	15,635
Yesso and small islands..	31,147	27,535
Eighty-nine Bonin Islands	123
Kuriles.....	3,609	1,606
Total.....	149,309	141,259

The government* is now organized on a basis which is partly European and partly Japanese. The Mikado is, theoretically, an absolute monarch, who reigns and governs, while, in reality, the work of the Government is done by the Great Council, which is divided into three sections, the Centre, Right, and Left. The Centre is composed of the Prime-Minister, Vice-Prime-Minister, and five advisers. The Left consists exclusively of the Council of State, whose functions are analogous to those of the French *Conseil d'Etat*, so far at least as the preparation and discussion of laws are concerned. The Right includes all the ministers and vice-ministers of the nine departments into which the administration has lately been divided. The ministers, either individually or united as a cabinet, decide all ordinary questions; but the more important points are reserved for the Great Council, presided over by the Mikado. A Parliament was formed in 1869, with deputies selected by the provincial governments, whose functions were purely consultative, and in no way legislative. But,

* The following information on the organization of the Government is abridged from an article on Japan, in *Blackwood's Magazine*, September, 1872, which is among the best that have been written on Japan.

being found to be of no use whatever, it was dropped so thoroughly out of sight, that it has not been called together since the Council of State was formed. The idea of an elective Parliament is now actively discussed, and the ministry is very desirous of seeing it realized. Japan is at present divided into seventy-five districts, each one being governed by a prefect. The powers of these functionaries are very extended; for, not only do they govern, but they collect taxes, manage the police, and sit as judges civilly and criminally. But they cannot carry into execution sentences involving punishment of death, until they have been confirmed by the Minister of Justice. A serious and carefully-calculated budget has, for the first time in the history of Japan, been prepared for the year 1872, showing both receipts and expenditures of the year, and series of detailed explanations are appended to it which testify the care used by its compilers. The receipts and expenditures are as follows:

RECEIPTS.	
Rice, at \$4.50 per koku.....	\$11,444,556
Customs.....	299,360
Internal revenue (excise duties, etc.).....	225,675
Miscellaneous.....	260,960
Total receipts.....	\$12,229,551
EXPENDITURES.	
Imperial household.....	\$113,050
Ministry of Foreign Affairs.....	112,200
Army.....	1,700,000
Navy.....	852,500
Colonization of Yesso.....	418,588
Justice.....	16,150
Education.....	73,813
Finance Department (including cost of collecting taxes).....	369,962
Public works.....	1,763,112
Municipal and provincial governments.....	1,895,987
Miscellaneous.....	452,412
Cost of manufacturing new bank-notes and of establishing the Mint.....	210,375
Pensions to daimios and retainers.....	4,024,112
Balance of indemnity to European powers on the Simonosaki affair.....	318,750
Interest on the English loan.....	78,625
Total expenditures.....	\$11,420,385
Surplus.....	\$809,166

The public debt consists at present of £27,412,000, of which £15,204,000 are represented by paper currency, £10,412,000 are debts incurred to Japanese subjects by former local governments, and the balance, £1,796,000, is due to foreign creditors (the Simonosaki indemnity included). The old bank-notes are about to be replaced by very handsome new ones, which have just been manufactured at Frank-

fort. The debts of the former local governments are of three classes, each constituting about one-third of the whole amount. The first class is considered as being in no way binding upon the Government; the second is to be repaid at the rate of £10,000 a year; and the third is to be converted into bonds at 25 years' date bearing interest at 4 per cent. In 1871 a Ministry of Instruction was created, the results of which, in the short space of time which has since elapsed, are extraordinary. Public primary schools are increasing rapidly, especially in the towns; but the movement is far more marked in the western provinces and on the coast than in the interior, where the eagerness for improvement is less felt. Private schools are more abundant still; for, as anybody can establish them, subject to a permission which is always granted, they spring up with facility wherever they are wanted. Books, especially translations of foreign works, are much sought after; newspapers and printing-presses are rapidly increasing, and an earnest desire for knowledge is everywhere seen, throughout the middle and higher classes. The Government, to facilitate the acquirement of foreign languages, has brought out several professors, and has sent at its own expense over 500 students to America and Europe. Until now they were chosen by the ministers and provincial governors. But the demands for admission into the envied class of state students has been so large of late, that henceforth they will be chosen by competitive examination. The students, in addition to a free passage out and back, receive an annual allowance of £200.

The movement of commerce at the principal ports open to foreign nations was, in 1870, as follows:

PORTS.		Imports.	Exports.
Yokohama.....	1st Merchandise...	\$7,966,075	\$13,342,886
	2d Precious met'ls	6,891,694	17,090,973
Hio-go and Osaka.....	1st Merchandise...	8,023,637	3,614,554
	2d Precious met'ls	2,549,932	4,689,992
Nagasaki..... (1870)		2,944,967	1,384,223
Hakodadi..... (1870)		496,908	813,246
Niigata..... (1870)		2,266,731	1,896,427
Total.....		43,880,664	43,021,806

The following table shows the number and nationality of the vessels entering the Japanese ports in 1870, as well as their tonnage:

PORTS.	NORTH AMERICAN.		ENGLISH.		GERMAN.		TOTAL.	
	Ships.	Tons.	Ships.	Tons.	Ships.	Tons.	Ships.	Tons.
Yokohama..... (1870)	146	222,369	318	178,390	128	66,416	722	556,662
Hio-go..... (1870)	126	200,226	146	64,493	33	13,095	341	289,273
Nagasaki..... (1870)	?	?	?	?	?	?	324	246,538
Hakodadi..... (1870)	21	25,996	39	17,078	13	4,735	87	50,592
Niigata..... (1870)	?	?	?	?	?	?	25	7,773
Total.....	1,499	130,933

In March, an attempt was made by a party of twelve persons to assassinate the Mikado. It proved unsuccessful, and the guards in attendance succeeded in capturing two of the

party. The other ten escaped. It caused great uneasiness on the part of the Government, and orders were issued forbidding foreigners to go

* In Mexican dollars: 1=1½ dollar.

beyond the limits of the city of Yeddo. Foreign papers in Yokohama claimed that the conspiracy was participated in by 40,000 men, the retainers of the dispossessed daimios, the object being to seize the Emperor and carry him back to Kioto, and then rise and exterminate the foreigners. The Government discovered the plot, beheaded a number of the leaders, and completely restored order. It resolved to commence settling the debts of the daimios, which policy it was thought would secure peace in the future; because without money the former daimios would be more than powerless.

The first Japanese fair, under the direction of the Government, took place at the sacred city of Kioto on April 10th, and lasted 50 days. Foreigners were allowed to visit it and the suburbs for a period of 64 days, enabling them to show their manufactures. This is considered the virtual abandonment of their exclusive policy, and one of the results from the visit of Iwakura to America. The fair was to be reopened on New-Year's day.

In April, the late Tycoon of Japan was invited by the Mikado to come out of his late retirement, and received an honorary appointment under the Government, accompanied by a highly-complimentary title. The leader of the rebel forces during the late revolution, Katori, has been appointed Minister of Finance. Ennomoto, the Tycoon's admiral who tried to take the island of Yesso, but was imprisoned for four years, has been appointed Superintendent of Yesso.

A frightful fire occurred in April in Yeddo during a severe gale, destroying habitations covering a space of six square miles. The fire originated in one of the prince's late palaces, which was occupied by troops. The flames leaped over whole blocks of buildings and set fire to places a mile distant from the building in which the fire began. An immense amount of property was destroyed; 20,000 persons were made houseless. The Government opened their rice storehouses and fed all who applied. The occurrence of this fire led the Government to permit foreigners to lease land in Yeddo, the owners being compelled to make monthly reports. It was expected that this act would cause foreign money to be invested there to improve the city. A new plan of the burnt district would be made, and wide streets and substantial buildings only would be allowed.

In June, Mr. Watson, the new *chargé d'affaires* for England, refused to meet the Mikado unless he would be allowed to stand in the presence of the Mikado, instead of squatting. Terashima-Tozo, the Minister of Foreign Affairs, refused to accede, and in consequence Mr. Watson declared that he would wait for instructions from home before he would present himself. The difficulty was subsequently settled by an arrangement that both parties would stand during the reception. The first

party so presented was Admiral Jenkins, of the United States Navy.

The sudden suspension of public proceedings by the Japanese embassy in America, and the return of some of the provincial members, attracted considerable attention. The facts in this case were reported to be as follows:

Although the time fixed for the general revision of the treaties had been extended until a period subsequent to the return home of the ambassadors, circumstances arose during their sojourn in Washington which made it appear expedient to them to begin at once the international discussion upon this subject. The credentials which they held did not, however, authorize them to undertake this labor, and it was to obtain a larger power that Ito and Okubo returned to Yeddo. The Government generally favored the proposition, thinking, perhaps, that more generous terms might be obtained by the distinguished visitors in the respective capitals of the treaty powers than would be agreed to by the accredited ministers in Japan. But it was strongly opposed by the heads of the Foreign Office, Soyeshima and Terashima, chiefly on the ground that the ambassadors abroad were unprotected by efficient legal assistance, and might therefore be led into indiscretions, while in their own country they would have the guidance of officers especially engaged for this purpose. The difference was not easily adjusted. At one time it seemed probable that the ambassadors would carry their point, but Soyeshima having threatened to resign, and, in fact, having surrendered his functions for a short interval, it was finally decided to adhere to the original plan.

The Mikado left Yeddo on June 28th, accompanied by eight war-steamers, on a visit to Kioto and other portions of the southern country. This is the first time in Japanese history that the Mikado has embarked on such an excursion, and much good is expected to result from it. He was dressed in a foreign style, with an ample supply of gold braid, and had several attendants who were similarly attired. The natives looked with amazement at these changes, inaugurated through the late civil war.

The relations between Japan and Corea have been for some time of an unfriendly character. The letter of the Mikado, on assuming power in Japan, to the Coreans, demanding tribute, was torn up and scattered with contempt. One of the ambassadors of Japan was imprisoned, and the other sent back to convey the threats of Coreans and their contempt for the new rule. The letter of the Mikado was sent three years ago, since which time America attempted to make a treaty with Corea. The foreign residents of Yokohama declared that, if the Japanese had been friendly disposed toward the United States, they would have informed the Americans of the state of affairs in Corea, and thus avoided a defeat of American

intentions there. During the year 1872 Corea sent more threatening letters to Japan. Sailing-vessels conveyed by a man-of-war were sent to Corea for the purpose of bringing back all Japanese in the country, preparatory to further measures on the part of the Japanese Government. Several foreign war-vessels congregated at Chee-foo, in anticipation of trouble to the Japanese. China was believed to sympathize with Corea.

The *Overland China Mail* has published what purports to be a translation of the treaty and trade regulations agreed upon, in 1871, between China and Japan, which gave so great offence to foreign powers. In framing the articles, the contracting parties have drawn largely on the foreign treaties as their models, and, hence, the opening passages teem with general expressions of good-will, to the extent, even, of saying that, in case of either experiencing injustice or wrong from another state, the one so injured shall "be entitled to assistance or good offices from the other." It is then solemnly agreed that "ambassadors of each country shall, with their families and suite, have access to Peking and Yeddo, respectively, either for permanent residence or on a visit," and, further, that it shall be lawful for the two states to appoint consuls at the ports open to trade. Each state shall "prohibit its consuls from engaging in trade." Article IX. provides that, if "either state have no consul at a treaty port, its subjects who may be resident there shall be subject to the local authorities." It is especially agreed that the books of either country may circulate freely in the other, and natives of Japan are prohibited from presenting themselves at the Chinese competitive examinations. The Chinese ports declared open to trade are the same as those known to us as the treaty ports, with the substitution of Kinchau in the Canton Province for Kiung Chau in Hainan; but the only ports at which Chinamen are to be allowed to trade in Japan are Yokohama, Hakodadi, Osaka, Niigata, and Pezo. At these places convenient sites are to be pointed out by the local authorities for the erection of houses either for residence or business. It is agreed that, if false entries or omissions be discovered in ships' manifests presented by Japanese captains to the Chinese custom-house, the goods shall be confiscated, and the captain fined 500 taels; but "in Japan omissions shall incur a fine equivalent to the duty, and for false entries the fine shall be \$125." If a Japanese captain "presumes to land cargo before the manifest has been examined, he shall be amerced 500 taels, and the goods shall be confiscated." If a Chinese captain is guilty of the same offence in Japan, the goods shall be confiscated. The same restrictions are to be enforced with regard to the trade in nitre, sulphur, and white copper, as are laid down in the English treaty with China, and rice is not to be transported from either country.

A report was extensively circulated in May, 1872, that the Japanese edicts against Christianity had been abolished. It appeared to have come directly by mail from Japan. A statement was also made in the newspapers of the United States that the members of the Japanese embassy, who were then in Washington, received notification from their Government of the abolition of the edicts. These reports were without foundation. The missionaries and official residents in Japan first heard of them from Europe and America. As late as August missionaries of the American societies, in their correspondence, stated that placards, warning the people to beware of Christianity, and threatening punishment to those who accepted it, were still to be found posted in public places. But, while the laws against Christianity have remained nominally in force, the administration of them has been varied and even capricious. A company of sixty-five Roman Catholic natives were arrested near Nagasaki, in December, 1871, and subjected to severe hardships for several months, notwithstanding the remonstrances of European and American ministers. A number of converts to the Russo-Greek Church, near Hakodadi, were arrested and imprisoned, but were released upon representations being made by diplomatic agents. The missionaries who have been permitted to reside in Japan have been restrained within the bounds which the Government has prescribed for them. In the few instances in which they have ventured to speak or hold meetings in other places, they have been rebuked, and those natives who attended their meetings, or associated with them, have been subjected to annoyance and persecution. The Rev. Mr. Gulick, of the American Board, visited Kioto during the exposition which was held there in 1872. A man in that city became acquainted with him, assisted him in renting a house, and attended with him daily at family prayers. This man was afterward arrested, and brought to trial for the offences of wishing to have Christianity spread in Kioto, and of assisting the missionaries. Mr. Ballagh, missionary at Yokohama of the Reformed Church in America, on one occasion, visited a point on the opposite side of the bay from that city, and held religious services, at which two Japanese converts offered prayer. The Japanese Government complained to the American consul that Mr. Ballagh had gone beyond the treaty limits without a pass, and had held religious services; and it made great exertions to discover who the two natives were who had participated in the worship. Mr. Gulick, while at Kioto, sought permission from the Government to remain there, and teach the English language gratuitously. The Government would not grant it, unless he would sign a contract to refrain from the mention of Christianity.

On the other hand, the missionaries have been allowed, and even encouraged, to estab-

lish schools within the limits in which their residence is authorized, and have there preached Christianity without molestation. Their converts have not been interfered with, and the native church at Yokohama has been organized without hinderance. In the absence of official statements, the impression of the missionaries is, that the Government is willing to tolerate Christianity, but does not yet venture, in the face of traditions of the empire, and the prejudices of the people, to take so bold a step as expressly to authorize the general preaching of its doctrines. In the mean time, the local officers are obliged to enforce the laws whenever complaint is made against Christians.

In July, a proclamation was issued abolishing the old Board of Religion (called "Ji-Gi-sho"), and instituting a new department of religion (called Ki-yo-bu-sho"). The old department was concerned exclusively with Sintoism. It was announced, in the proclamation, that the new department would, after careful consultation with the most noted exponents of each sect, promulgate a new form of religion, to which all would be compelled to conform. "The new religion," it was declared, "will be enlightened, simple, and adapted to common-sense, and is likely to meet the approval of all classes." Notification was also given that "all applications of persons desiring to lecture on religious subjects, or to form societies for the purpose of hearing lectures on such subjects, must be made to the new Department of Religion."

The new department promulgates the following rules:

1. Thou shalt honor the gods and love thy country.
2. Thou shalt clearly understand the principles of Heaven and the duty of man.
3. Thou shalt revere the Emperor as thy sovereign, and obey the will of his court.

More recent advices from Japan speak of the appointment of a commission to visit the Western countries, for the purpose of obtaining information on the subject of religion.

A native Christian church was organized at Yokohama, on the 10th of March, with nine professing members. The number of members in this church had increased in September to twenty-five.

A convention of the Protestant missionaries in Japan was held at Yokohama, on the 20th of September. About twenty persons were present, representing the missions of the Presbyterian, Reformed, and American (Congregational) Boards, the Union churches of Yokohama and Yeddo, the native church, and the consular chaplaincies. The missionary of the English Church Missionary Society sent a letter. The convention resolved upon the appointment of a committee of one member from each mission for the translation of the Sacred Scriptures into the Japanese language. It was determined that the members of this committee should be appointed by the missions to

which they severally belonged. Besides their own work of translation, they are to examine and pass upon any other translations which may be presented to them for this purpose. All translations accepted by the committee are to be furnished to the several missions at as early a day as possible for general examination and criticism, and to be afterward carefully revised. The American Protestant Episcopal mission, the English Church mission, and Père Nicolai, of the Greek Church, who were not represented in the convention, were invited to coöperate with the committee in making the proposed translation.

The following resolution, with reference to the plan on which native churches shall be organized, was unanimously adopted:

Whereas, The Church of Christ is one in Him, and the diversities of denominations among Protestants are but accidents which, though not affecting the vital unity of believers, do obscure the oneness of the Church in Christendom, and much more in pagan lands, where the history of the divisions cannot be understood; and, whereas, we, as Protestant missionaries, desire to secure uniformity in our modes and methods of evangelization, so as to avoid as far as possible the evil arising from marked differences, we therefore take the earliest opportunity offered by this convention to agree that we will use our influence to secure as far as possible identity of name and organization in the native churches, in the formation of which we may be called to assist, that name being as catholic as the Church of Christ; and the organization being that wherein the government of each church shall be by the ministry and eldership of the same, with the concurrence of the brethren.

Resolutions were also adopted in favor of the education of a native ministry; for the appointment of a committee to whom all books and tracts, in the Japanese language, shall be referred for criticism and approval, previous to publication; approving the organization of medical missionary societies in Japan; and recommending the adoption of a uniform system of writing Japanese in Roman letters.

JOHNSTON, WILLIAM FREAME, an eminent citizen and political leader of Pennsylvania, Governor of the State from 1848 to 1853, born in Greensburg, Northumberland County, Pa., November 29, 1808; died in Pittsburg, Pa., October 25, 1872. His early opportunities for education were limited, but he had an insatiable thirst for knowledge, and read every thing he could lay hands on, which would give him food for thought. He early became a good speaker and writer, and at the age of eighteen commenced the study of law under Major J. B. Alexander, and in May, 1829, was admitted to the bar. He removed to Armstrong County soon after, and was appointed District Attorney, which office he held to the close of 1832. Soon after he was sent to the Legislature, in which he served several terms. In 1847 he was elected to the State Senate from his senatorial district, and the same year chosen President of the Senate. In 1848 Governor Slunk, who had been reelected the previous autumn, found his health so much reduced that he was unable to perform his du-

ties, and resigned, July 9, 1848. By the constitution, the President of the Senate became his successor, but with the limitation that, if the vacancy occurred three months before the fall or October election, the acting Governor must order a new election; if not, he held over till a year from the fall election. Governor Shunk's resignation took place on the last day legally possible for giving an order for a new election, and, as Mr. Johnston could not reach Harrisburg until the 26th of July, he would have been fully within the provisions of the statute and constitution had he not ordered an election, and, indeed, his authority to order one might be open to some doubt. But he was too just and, at the same time, too modest to desire to usurp any powers to which he had not, by the *spirit* as well as by the *letter* of the law, a just claim, and, accordingly, immediately on his arrival at Harrisburg, he ordered an election, as being in accordance with the evident intent of the constitution. He was elected Governor at this election by a large majority. His administration was one of signal ability. He was a conscientious Whig, though not an ultra or a zealous partisan, and he placed Pennsylvania on the record as indorsing the protective policy in tariff matters, and as disposed to do nothing more in enforcing the Fugitive-slave law than was contained in the strictest and narrowest construction of the letter of the law. In the State he secured the perpetuation and preservation of the colonial and State records, and managed with signal success the complicated finances of the State. He was a candidate for reelection, but his party failed to carry the State, though he ran ahead of his ticket. After retiring from office, he took an active part in the building of railroads, the manufacture of iron and salt, and the production of petroleum. He was earnest and patriotic on the Union side in aiding in the prosecution of the war, was a member of the Committee of Public Safety, and rendered valuable service in preventing West Virginia from being overrun by the enemy. He was for some months collector of the port of Philadelphia.

JUAREZ, BENITO, a Mexican statesman, for fourteen years previous to his death President of the Mexican Republic, born in Villa Ixtlan, in the State of Oaxaca, in 1807; died in the city of Mexico, July 18, 1872. He was of pure Indian stock, his parents belonging to the Zapotecos tribe. He was adopted by the Arteaga family of Oaxaca in early childhood, and, manifesting a strong desire for mental improvement, he was sent to the best schools, and finally to the College of Oaxaca, where he graduated with the highest honors. He then studied law, and was admitted to practice in 1830, and the same year was elected a member of the Institute of Arts and Sciences. He gained distinction and wealth as a lawyer, practising for some years in the city of Mexico. In 1833 he was a member of the State Legislature of Oaxaca, and about the same

time Professor of Canonical Law in the Institute of Oaxaca. He was subsequently appointed Secretary of the Supreme Court, and after several years' service was elected a member of the Mexican Congress, in 1845. He took an active part in the proceedings of Congress, and was a zealous advocate of the law for the secularization of church property, to meet the expenses of the war with the United States in 1846-'48. From 1848 to 1852 he was Governor of his native State of Oaxaca, and at his retirement left a balance in the public treasury. In 1853 he was banished to Cuba by Santa Anna, and went thence to New Orleans, where he remained with his friend, General Montenegro, till 1855, the two supporting themselves by the manufacture of cigarritos. In 1855 he joined Alvarez at Acapulco, and was a representative in the Congress, and Minister of Justice under Alvarez until December, 1855, when the latter retired from the presidency, and his cabinet went out with him. Comonfort, who succeeded Alvarez, made Juarez again Governor of Oaxaca, and in November, 1857, appointed him Secretary of State, and about a month later he was elected President of the Supreme Court of Justice. By the Mexican Constitution, this officer becomes acting President of the Republic by the death or withdrawal of the President, and, though Comonfort had been defeated, and the presidency usurped by Zuloaga, Juarez adhered to his constitutional rights, and established his government first at Guadalajara, then at Colima, and in May, 1858, at Vera Cruz. He remained at the latter place till January, 1861, when, his army having compelled Miramon (who had succeeded Zuloaga) to abdicate, he entered the city of Mexico. In June, 1861, Juarez was elected President by the Congress which assembled in the city of Mexico. He decreed the dissolution of the religious orders, the secularization of church property, and the suspension for two years of payment to creditors of the republic. It is believed that these decrees gave rise to the difficulties with England, France, and Spain, and the armed intervention for the enforcement of their respective claims. After the withdrawal of the English and Spanish forces, the French army remained in Mexico in order to overthrow the republic and establish an empire. Having gained several victories, the French took the city of Mexico in June, 1863, and Maximilian of Austria assumed the imperial power, under the protection of Napoleon III. In view of the intervention, the Mexican Congress gave full powers to Juarez to resist the allies, and on the 28th of September he issued a proclamation calling the nation to arms. After the failure of the Convention of Soledad, and on the approach of the French on the capital, Juarez left Mexico City. He established himself first at Cuernavaca; thence, as the French forces penetrated the country, he retired to San Luis Potosi, and was subsequently compelled, for the same reason, to

betake himself to Zacatecas. Thus driven from place to place, he still continued to hold out against the enemies of his country, having confidence that the cause of which he was the representative would ultimately triumph. After years of disaster and severe trial, his noble courage and indomitable perseverance at length met their reward. With the downfall of the empire he returned in triumph to the city of Mexico, where he was received with the greatest enthusiasm, and in his reelection, in October, 1867, the Mexican people gave the most convincing proof of the esteem in which they held him as the saviour of the liberties of their country.

In the winter of 1867 he had captured Maximilian, and on the 16th of June ordered his execution. He was severely blamed for this act, especially by European writers, but his friends contended that he was unable to prevent it, though he used his utmost endeavors to do so. That Señor Juárez was a man of kind and gentle disposition is the testimony of all who knew him; and though Maximilian's own character was excellent, and great sympathy was felt for his unhappy young empress, yet there seems to have been no precedent among European governments which would have justified Juárez in sparing the life of a foreign usurper of the Government of Mexico, who had repeatedly declared that the Mexican President should be put to death instantly if he were captured.

His foreign enemies driven out of Mexico, and the permanency of his administration in some sense guaranteed by the moral sympathy

and support of the United States, the internal and external commerce of the country rapidly revived, and under the wise administration of President Juárez it attained a fair degree of prosperity. This prosperity, however, has continually been interrupted by revolutions and *pronunciamientos* of more or less importance. The strongest combination formed against Juárez was in May, 1868, when Rivera pronounced in favor of deposing Juárez. The revolutionists, however, frittered away their strength, and under the discreet management of Juárez the Government became solidified, and Lerdo de Tejada was made Chief-Justice of the Supreme Court, in place of Ortega. In 1871 Señor Juárez was again elected to the presidency, but the trying scenes of the previous thirteen years, and the loss, early in 1872, of his wife, to whom he was tenderly attached, had made serious inroads even upon his vigorous constitution, and he died of apoplexy. In person Juárez was thick-set and rather inelegant, having a heavy, slouching gait and coarse frame. His face bespoke his Indian origin—was dark, but with a kindly expression. His mouth was large and somewhat coarse, but when he spoke animatedly his expression was noble and commanding. His oratorical powers were considerable, but his chief strength was in his power of skilful organization, his tenacity and firmness of purpose. In all her history since her independence, Mexico has sustained the loss of no statesman of so much integrity and ability, or one she could so ill spare, as Benito Juárez.

K

KANSAS. The growth of this State, in almost all the elements of material prosperity, since 1861, when she was admitted into the Union, has been remarkable. The following statistics exhibit her condition as it is at present, and as it was in 1862, when the first full reports were made by the several State officers on the affairs of their respective departments: The total value of all taxable property in the State, in 1862, was \$19,285,749. In 1872 it was \$127,690,937.18. In 1862 there were 534 organized school districts; in 1872 there were 3,418. In 1862 the number of children of school age was 13,976; in 1872 the number was 165,982. The number of teachers in the former year was 319; in the latter 3,795. The amount paid to teachers, in 1862 was \$14,009; in 1872 it was \$596,611. The amount raised by district tax, in 1862, was \$10,381; in 1872 it was \$822,644. The total value of school-houses, in 1862, was \$10,432; in 1872 it was \$2,845,262. The whole number of votes cast, in 1862, was 15,418; in 1872 the number was 101,488. In 1862 there were no asylums for the deaf and dumb, none

for the blind, and none for the insane; no State university, no agricultural college, no normal schools, no penitentiary, and no State capitol. In 1862 not a mile of railroad was in operation in the State. Now there are 2,039 miles in actual operation, while several new roads are in process of construction. Kansas has more miles of railroad than either of the twenty-six States named below: Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New Jersey, Delaware, Maryland, West Virginia, Wisconsin, Minnesota, Virginia, North Carolina, South Carolina, Florida, Alabama, Mississippi, Louisiana, Texas, Kentucky, Tennessee, Arkansas, California, Oregon, and Nevada.

The vote of 1870, and the census of that year, taken several months prior to the election, establish that the population averages at least six persons to each voter. The last vote was 101,488, which makes the present population 608,928; an increase since 1862 of half a million people.

While every county in the State is rapidly growing, the largest increase in the number

of inhabitants was in the new counties open to actual settlers, and not to the speculators in real estate.

The Kansas Legislature, whose regular annual sessions last fifty days, adjourned on the 2d day of March, 1872. Numerous acts, relating to general and local interests, were passed during this session, and considerable sums appropriated for public buildings and the support of State institutions, and white and colored schools. The appropriation of \$50,000 to complete the building of the State University at Lawrence was regarded as particularly praiseworthy, and likely to be largely beneficial to education in the higher branches of studies, and to enhance the reputation of the State. A bill for this appropriation had been laid before the Legislature of 1871, when it was rejected. Having been introduced again at the session of 1872, it was passed by both Houses, and unanimously by the Senate, where the measure had met considerable opposition in the preceding year.

The State law concerning usury was amended, so that, in cases where the payment of interest on money is expressly agreed to by the contracting parties at a higher rate than twelve per cent. per annum, the lender may legally collect it from the borrower up to that rate, and not forfeit the whole, as the previous law provided.

A herd law was also passed, to prevent cattle from destroying or injuring farm-crops. This interest is paramount in Kansas, where the industry of the people is exerted chiefly in agricultural pursuits. The bill was introduced in the Lower House, and conferred power on the county commissioners to provide such a law in particular townships belonging to their respective counties as they saw fit, considering the condition and circumstances of the several localities. The Senate passed the bill after making several amendments, the most important one taking from the county commissioners the power of providing a law for a township, and extending it to the whole county, if at all. The Senate amendments were discussed at length in the House, and finally concurred in by a very large majority. Under the provisions of the act, the county commissioners have power to declare a herd law in force in the county at their pleasure, without any vote of the people.

In the House of Representatives a number of members advocated the passage of the bill as originally proposed, while not a few were for the enactment of a general law operating uniformly in the whole State. Even these disagreed in their views; some of them advocating the necessity of fencing the farms, others maintaining that the owners of cattle should be made by law responsible for all damages done by them, and then compelled to restrain their animals, either by putting them under proper guard, or even by fencing the ground on which they were kept. It was

shown by comparative calculations that the expense of putting up and annually repairing the fences to restrain cattle would be by many hundred thousand dollars less than to fence the lands under culture.

The Texas cattle law was amended by the Senate, and the amendment concurred in by the House on the 27th. It forbids the driving of Texas cattle between the months of March and November.

Several matters of public interest, socially as well as politically, were proposed and warmly debated during this session, though finally defeated, or left undecided. Among these was the bill introduced in the House of Representatives, "to confer the right of suffrage on female persons." It was the subject of a protracted and animated debate, a large number of the members taking part in the discussion, but was finally defeated, or rather indefinitely postponed, by a vote of 42 yeas to 33 nays.

The Apportionment Bill, distributing the State into three congressional districts, was the occasion of very great excitement among the members of the legislative body in both Houses, though each of these appear to have arrived at a different conclusion. The plan of apportionment proposed and insisted upon by a vast majority in the House of Representatives was loudly denounced by many within and outside of the legislative halls, as giving representation to the land and not to the people. They characterized it as the effect of a conspiracy, entered into by the southern and northern portions of the State against the remaining portion, for the purpose of depriving the inhabitants of the latter of the full representation which they were entitled to in proportion to their number. The residents of this portion, which was commonly called, on that account, "The Pocket District," are represented as being unanimous in their opposition to the said apportionment. The House of Representatives firmly adhered to its plan, and steadily refused to agree to that proposed and passed in the Senate. The Senate offered a conference on the subject, to be held by a special joint committee, which the Lower House, after some hesitation, assented to; but when the conference had been held, and its result reported by the joint committee, the House refused to agree to it. A motion having then been made to ask for a new committee of conference, the motion was tabled by a large vote.

The most important business transacted by the Kansas Legislature at the session of 1872, was the investigation of the facts relating to the corrupt practices alleged to have been employed in the election of the United States Senator from Kansas in 1871. Explicit and specific statements of such practices having been published in a newspaper shortly after the beginning of the year, implicating several members of the present Legislature, as well as of that of 1871, a demand for an official investi-

gation of the facts in the case was made and successfully urged in both Houses. The measure was strongly opposed by some, on account of the generality, or irrelevancy, of the facts charged, and more, because of the uselessness of the proposed inquiry, even though those facts were ascertained to be true, by reason that the person who should be considered the chief offender was not amenable to the State Legislature, he being now a member of the Federal Senate. It was contended that such investigation should be left to that body, to which it properly belonged. Preambles and resolutions to that end were prepared and discussed; but the sentiment of those who asserted for the State Legislature the propriety and duty of instituting the inquiry prevailed, and, on motion, the work of investigation was extended to the senatorial election also, which had taken place in 1867, and which had been carried, it was stated, by the use of the like corrupt means as that of 1871.

The following joint resolution, having been discussed and severally amended in both Houses, was finally concurred in on the 24th of January, 1872:

Be it resolved by the House of Representatives, the Senate concurring therein, That a committee, consisting of five members of the House of Representatives and three members of the Senate, be appointed to investigate all charges of bribery and corruption connected with the senatorial elections of 1867 and 1871, with power to send for persons and papers, and report to the Legislature as soon as possible; and that, for the purposes of this investigation, each member of the committee who shall be appointed under this resolution shall have power to administer oaths and affirmations.

The joint committee were appointed, and entered immediately upon the performance of the duty assigned them, and concluded their work in about a month. On the 24th of February, 1872, the chairman laid the result of the investigation before the Legislature in a report signed by all the members of the committee, in which the committee said:

From the testimony taken, your committee find that, at the senatorial election of 1867, a large sum of money was used, and attempted to be used in bribing and in attempts to bribe and influence members of the Legislature to secure the election of S. C. Pomeroy, E. C. Ross, and Thomas Carney, by S. C. Pomeroy, Thomas Carney, Perry Fuller, and others in their employ. * * * It also appears, in reference to that election, that S. C. Pomeroy and Sidney Clarke, in March, 1866, jointly paid one thousand dollars, and promised to pay a further sum of two thousand dollars, for which they executed their joint notes to M. W. Reynolds, who has recently been appointed Registrar of the Land-Office at Neodesha, in consideration that he would use the columns of the *State Journal*, at Lawrence, to secure the election of S. C. Pomeroy to the United States Senate in 1867, and Sidney Clarke to Congress in the fall of 1866. It also appears that S. C. Pomeroy paid in addition the sum of two hundred and fifty dollars to the said M. W. Reynolds. It further appears that M. W. Reynolds sued upon these notes, in the Douglas County District Court, and the defendants, Pomeroy and Clarke, pleaded therein an illegal consideration for the notes, and that the findings of the court, upon trial upon the merits, were for the defendants,

and the judgment against the plaintiff, Reynolds; that Reynolds had the case prepared for the Supreme Court, and then directed his counsel not to proceed further in the cause, and that shortly thereafter he was appointed to the public office he now holds.

In relation to the election of 1871, the committee find that the testimony shows that Sidney Clarke was a candidate for election to the office of United States Senator in 1871, and that his friends engaged for him, which act he afterward ratified, some eighty rooms at the Tefft House; that in addition thereto he rented and fitted up on the opposite side of the street from the Tefft House, on the corner of Kansas Avenue and Sixth Avenue, a suite of fine rooms, which was, during that canvass, designated as "The Soup House and the Bread Riot," where refreshments were kept; that he deposited with the Kansas Valley National Bank, when he came here, \$2,500, which was drawn out by Mr. Adams upon authority from Clarke; that Sidney Clarke offered to members of the Legislature appointments to office and payments of expenses of the election of members of the Legislature for their votes for himself for United States Senator; that he told R. S. Stevens to make whatever arrangement he pleased with Caldwell in regard to his (Clarke's) expenses. * * * It also appears that R. S. Stevens, who is a resident of Attica, N. Y., and general manager of the Missouri, Kansas & Texas Railroad, and whose business headquarters were then, as now, in Sedalia, Missouri, was here in the interest of Mr. Clarke, and expended an amount of money for his use in the canvass. * * * In relation to the matters affecting Alexander Caldwell, the testimony shows that money was paid, and offered to be paid to various members of the Legislature by Caldwell's agents and friends; that George Smith paid out to members of the Legislature, for Caldwell, and with an understanding that it should be refunded to him by Caldwell, over \$20,000; that Caldwell promised appointments to office, and other favorable official acts, for votes; that Caldwell said after his election, at different times, that he paid for his seat in the United States Senate from this State twice as much as the salary of the office for the full term of six years would amount to, or about \$80,000, and that he paid Carney's election expenses, amounting to more than ten per cent. of the whole sum, or over \$8,000; that Caldwell offered twice, or oftener, to pay all of Sidney Clarke's election expenses, and that he did agree with R. S. Stevens to pay them upon consideration of Clarke's withdrawal, and Clarke's and his friends' support of Caldwell in the joint convention. From all the testimony your committee find that Alexander Caldwell used bribery and other corrupt and criminal means, by himself and his friends, with his full knowledge and consent, to secure his election in 1871 to the United States Senate from the State of Kansas.

The committee call the attention of the Legislature in an especial manner to the intentional absence, or concealment, of several among the most important witnesses, although duly summoned to appear, on which they say:

Your committee have also to report that the most important witnesses, Thomas Carney, Len. T. Smith, W. H. Carson, and T. J. Anderson, are now fugitives from the State for the purpose of depriving this committee of their testimony, and that their action is in contempt of the proper processes issued upon them, and as your committee is convinced, from all the circumstances attending their sudden and clandestine flight, for a cash consideration paid to at least two of them.

W. A. Martin and Joel Thomas, important witnesses, as we believe, have failed to appear, and we have been unable to hear of their whereabouts since they were served—Thomas being served by copy, Martin twice with personal service, once a subpoena, and once with the rule of the Senate.

Thomas Moonlight and John F. Belcher have failed to appear in obedience to process. Every reasonable effort has been used to get these witnesses.

Diligent inquiry does not discover that R. S. Stevens has been in the State during the pendency of this inquiry. Ever since this inquiry began, there has been an organized effort of persons in the interests of Mr. Caldwell, and perhaps others, to keep out of the reach of the committee witnesses whose attendance was greatly desired.

The committee make pointed remarks on the presumptive self-conviction of the above-named, and other persons, who absconded to avoid the necessity of testifying in the matters under inquiry, and aver that similar corrupt practices, by and for the same parties, were at the time of those two elections brought to bear on other voters besides those previously mentioned in the report, but could not be placed in their full light for want of witnesses and time, concluding as follows:

As our report must necessarily be made before this session closes, and as adjournment is near at hand, we are compelled to close our labors with the testimony of the sixty-four witnesses which we examined, and the documents attached to their testimony, all of which are respectfully submitted.

James D. Snoddy, E. S. Stover, H. C. Whitney, Committee on the part of Senate. W. H. Clarke, J. J. Wood, G. W. Clark, D. H. Johnson, J. B. Boynton, Committee of House.

The report was accepted, and five thousand copies of it, together with the accompanying evidence, ordered printed.

The following concurrent resolution was adopted by the Lower House on the same day:

Resolved by the House of Representatives, the Senate concurring, That a house certified copy of the report and evidence of the investigating committee, appointed to investigate the charges of bribery in the senatorial election of 1867 and 1871, be sent to each of our Senators in Congress; and that a certified copy of the report and evidence be placed in the hands of the Governor of this State, with the request that he forward the same to the Vice-President of the United States, asking that he lay said report and evidence before the Senate of the United States for its information.

In the Senate, where the resolution was taken up for concurrence, on the 28th, a Senator moved to amend it by striking out its second part, which relates to the sending a copy of the report and evidence to the Vice-President of the United States. The motion was carried, and the resolution, so amended, was adopted.

It is stated that this resolution was subsequently stolen from the official records of the Legislature, and that, on ascertaining its disappearance, the chief clerk of the Lower House, in which the resolution had originated, to clear himself from all suspicion, procured a copy of it from its author, and caused it to be duly inserted in its proper place. He also certified a copy of the document, and presented it to the Governor of Kansas that he might transmit it with the proceedings of the investigating committee to Washington under the seal of the State.

The Republicans held their State Convention

at Topeka, on the 21st of February, 1872, to nominate ten delegates to the general convention of the party to assemble at Philadelphia on the 9th of June, and give expression to their principles.

The committee on resolutions reported the following, which were adopted by the convention:

The Republicans of Kansas, in convention assembled, for the purpose of electing delegates to unite with delegates from other States, on June 5th, for the purpose of nominating the next President and Vice-President of the United States, desire to give renewed and most emphatic expression of their confidence in the principles, pride in the record, and faith in the future of that national political organization which carried the country through difficulties, and preserved it amid the disasters of one of the stormiest conflicts in all history; which has addressed itself to the solution of those delicate and difficult problems which are the general legacy of all wars, more especially such a civil strife as ours, in such manner and with such local exceptions as would be inseparable from any policy of pacification; to secure to the country a large degree of internal peace, organic unity, financial standing, and credit, and general business prosperity, which are the wonder and admiration of all countries of the earth. And, believing as the convention does that this satisfactory condition of public affairs is largely attributable to the patient courage and wisdom of the man who was first the trusted commander-in-chief of our armies, and then the honored President of the councils of the republic: it is therefore

Resolved, That the delegates this day chosen to attend the Philadelphia National Convention be, and they are hereby, instructed to cast their votes for the patriot President, citizen, and soldier, Ulysses S. Grant, who, in the dark and disastrous days of the republic, displayed those qualities, of courage, wisdom, loyalty, and unyielding persistency, which inspired the friends of freedom with new energy and hope, filled and fired the gallant soldiers of the Union with the spirit to fight, and, if need be, die in its defence, which crowned our long conflict with the inestimable boon of complete victory and permanent peace; who, in the less dangerous, but more difficult duties to which a grateful people have called him, has proved an able, steady, and successful pilot of the ship of state; amid conflicting opinions and trying exigencies, the earnest advocate of all judicious attempts at political reform, the foremost friend of all oppressed and distressed people, of whatever condition or color, who are struggling for the inalienable rights of perfect equality before the law; the undaunted defender of our national claims and equities in the great parliament of nations; whose Administration, in short, has brought us a degree of peace and prosperity at home, respect and dignity abroad, which it would be suicidal to attempt to interrupt or interfere with until time has been given to complete and cement the work so well begun, and so auspiciously prosecuted to the present time.

Two days after the adjournment of this convention, a number of Republicans, who disapproved its action, held a meeting in the same city, with a view to form themselves into a separate body. They appointed a committee of seven, who, early in March, issued an "Address to the People of the State of Kansas," declaring: "This action is preliminary to the contemplated organization of a movement having for its object the union of the people of our State in a concerted effort to rebuke the corruptions and usurpations which have

characterized our State and national politics." They condemn the proceedings of the Republican Convention which had just adjourned, and set forth several acts of the Republican party for some time past in detail, characterizing them as public wrongs.

In accordance with this address, a distinct party was organized, under the appellation of "Liberal," and a State Convention was held by them at Topeka, on the 10th of April, 1872, for the purpose of declaring their sentiments, and nominating delegates to the Liberal Republican Convention to assemble at Cincinnati on the 1st of May. The meeting was largely attended. A committee on resolutions reported the following, which was adopted:

Resolved, That we, Liberal Republicans of Kansas, mindful of the early record of our State, so closely interwoven with the history of the Republican party, and the struggle for national existence, still steadfast and true to the vital principles which called that party into existence, would ever maintain, as a part of our birthright, the rightful sovereignty of the Union, emancipation, equality of civil rights, and enfranchisement, with a loyalty to principle that is higher and stronger than loyalty to party or party leaders; jealous and watchful of the fair fame of our young State, earnest and resolute now as in the struggle to save its soil from the encroachments of slave-power, we call upon the people of Kansas to unite in an effort to put a stop to the attempted absorption of civil functions by the military, and the encroachment of Executive power; to inaugurate a thorough and genuine reform in the civil service that shall put a stop to the abuse of official patronage for the control of conventions and elections, whether in the interest of an individual, faction, or party; to effect a modification of our revenue system so that no class, or special interest of the country, shall be encouraged at the expense of the rest; to secure a wise and just system of taxation which shall place no needless burden on the people; to save the public lands of the nation to actual settlers under the principles of the homestead law; to establish general amnesty as the direct avenue of impartial suffrage, and to extend our national sympathies to all people who are struggling to emulate our example of popular enfranchisement.

One hundred and ten delegates to the Cincinnati Convention were appointed at this meeting, all of them Republicans.

The Democrats met in State Convention at Topeka on the 11th of June, 1872, nearly every county in the State being represented. The following resolutions were adopted by the convention:

The Democrats of Kansas, in convention assembled, do declare, first, that the paramount duty of every citizen is devotion and obedience to the Constitution and laws of the republic, made as they were with the design and purpose to perpetuate individual liberty to its utmost limits, consistent with good government and public order.

2. That political organizations are useful and beneficial only when their purpose and action demonstrate that love of country controls their counsel and dictates their policy; but when lawless ambition, imbecility, corruption, and man-worship, shall dominate a political party, it is the duty of all citizens, without regard to previous political affiliation, and forgetful of past and buried differences, to join hands and hearts in the efforts to crush such party, and to drive its leaders from power.

3. Believing as we do, that the present chief Executive of the nation, and the nominee of the Repub-

lican party for reelection, is utterly unfitted for the high position he holds; that his administration of the Government stands alone in the history of the nation for shameless ignorance, nepotism, and gift-taking, for a reckless disregard of law, a forgetfulness of the ancient honor of the republic, for an utter want of that dignity and statesmanship which should characterize the executive government of the first republic of the earth, that his countenance and power would degrade the nation, and be dangerous to the liberties of the people; and so believing, we are willing to join with all good citizens in the pending campaign in the effort to drive him from place.

4. As this can, in our judgment, be most surely accomplished by accepting and supporting the platform and candidates of the Cincinnati Convention, the delegates this day accredited to the National Convention at Baltimore are hereby instructed that it is the desire of the Democracy of Kansas, that the national council of the party shall not place a ticket in the field, but that it shall, in the interests of the country, and to the end that a shameless Administration be driven from power, give its sanction and its powerful voice in favor of the nominees and platform of the Cincinnati Convention; and our delegates are directed to vote and act in accordance with this resolution.

Nine delegates were selected to represent the Kansas Democracy in the Baltimore Convention. The colored citizens of Kansas held a State Convention at Lawrence, on the 27th of March, 1872, for the purpose of nominating delegates to the General Colored Convention which was to assemble at New Orleans on the 10th of April; and also for the purpose of effecting an organization of the colored people throughout the State, with a view to assert and secure their rights as citizens against the encroachments attempted on them by the whites. The meeting seems to have been numerously attended by representatives from the several districts of the State.

The following preamble and resolutions were adopted by this convention:

Whereas, To the end that we may be better enabled to secure those civil rights which belong to us in common with other tax-paying citizens of the State, we deem it wise to recommend to the colored people in every city, town, and village in the State, the formation of civil rights clubs, as the best means of diffusing general information among us; and be it further

Resolved, That these clubs formed shall prepare, and send to the Legislature of the State, petitions demanding the repeal of all statutes and school-laws making a distinction of color or race.

Resolved, That we demand of the Republican party (that party being the dominant party of the State) the repeal of all laws upon the statute-books of the State, making a distinction of race, nationality, or color, among its citizens, and that the establishing of a State Normal School especially for colored teachers is another form of class legislation, which we denounce as unjust and unequal for.

Resolved, That the signing of this school bill by his Excellency Governor James M. Harvey tends to foster, rather than diminish, the prejudice against a class of his citizens whose entire support he has always received.

They also adopted a resolution separately offered by a delegate, expressing their apprehension at the efforts then made, in the Constitutional Convention of West Virginia, to engraft on the organic law of that State distinc-

tions on account of color, by limiting to the whites the eligibility to office.

On September 4, 1872, the Republicans of Kansas held State Conventions in two different cities—Topeka and Lawrence, for the purpose of nominating candidates for State officers in the local government, members of Congress, and presidential electors. The purpose of the Topeka Convention was to nominate candidates for Governor and the other State officers. The final result of the contest for Governor was the nomination of Thomas H. Osborn on the tenth ballot. The candidates nominated for the other State offices were the following: For Lieutenant-Governor, E. S. Stover; for Auditor, D. W. Wilder; for Secretary of State, W. H. Smallwood; for Attorney-General, A. L. Williams; for Treasurer, T. E. Hayes; for Chief-Justice, Samuel A. Kingman; for Superintendent of Public Instruction, H. D. McCarthy. The five last-named candidates were nominated for reelection to the offices which they respectively filled already.

The resolutions adopted were as follows:

Resolved, That the Republicans of Kansas in delegate convention assembled, hereby heartily approve and indorse the platform of the national Republican party, adopted at Philadelphia on the 5th day of June, 1872, and we pledge our unswerving support to the nominees of that convention, U. S. Grant and Henry Wilson.

Resolved, That we hold that the laws protecting the rights of the citizens ought to be rigidly enforced, and that, in all cases where the local governments are powerless or inefficient, it is the imperative duty of the national Government to see that the laws are enforced, and here we squarely take issue with the fourth resolution of the Cincinnati platform.

Resolved, That the Republican party of Kansas, now, as in the past, is in favor of the free and uncorrupted exercise of the elective franchise, both at the polls and in legislative elections; and it condemns in unmeasured terms the use of any corrupt policies in efforts to procure election to any elective office; and here pledges uncompromising hostility to all men who have used or may use any corrupting influences to secure any position of profit or honor.

Resolved, That as there is a question at issue between the settlers upon the lands recently acquired from the Indians in this State and railroad corporations, which leaves no apparent recourse except through the courts, a resort to which must involve expense, that the occupants, on account of their poverty, are illy prepared to meet, we ask that the Government itself, without unnecessary delay, test the question to its fullest extent, and as a tangible solution of the question, should it be decided finally that the title to the lands in issue vests in the corporations, by virtue of grants and treaties, then our Senators and Representatives in Congress are earnestly requested to use their utmost endeavors to secure the adoption of measures that will result in satisfying all reasonable demands of the corporations, quiet the title, and vest the same in the occupying claimants under the homestead and preemption laws.

The other Republican Convention, at Lawrence, was held to nominate three members of Congress and five presidential electors.

A series of resolutions was adopted, of a similar nature with the preceding ones.

The Democratic and Liberal Republican

parties of Kansas, in pursuance of a call issued by their respective Central Committees, on June 26, 1872, met in conventions at Topeka, on the 10th of September, "for the nomination of presidential electors, members of Congress, and State officers." The two conventions met separately, but acted in concert. A summary of the result of the proceedings and action of both these conventions was reported and published on the day of their meeting, as follows:

"The joint committees reported the following division of offices, which was agreed to by the conventions. The Liberals are to nominate the Governor, two Congressmen, three electors, Treasurer, Auditor, and Superintendent of Public Instruction; and the Democrats are to nominate the Lieutenant-Governor, one Congressman, two electors, Attorney-General, Secretary of State, and Chief-Justice. Resolutions were adopted in both conventions accepting and indorsing the Cincinnati platform, ratifying the nomination of Greeley and Brown, opposing land grants, favoring the opening of the public domain to actual settlers only, denouncing corruption in the election of Senators, demanding legislation to protect labor, opposing extravagance in every form, denouncing the Indian policy of the Government as a failure, and demanding protection for settlers.

The election resulted in a complete victory of the Republicans, the candidates named in their respective tickets having been elected by a majority for each candidate of 81,198 up to 83,886. The whole number of votes polled was 101,488. In 1870 it was 61,162.

The financial affairs of the State at the end of the year were thus stated by the Governor:

The bonded indebtedness of the State is \$1,334,675. The outstanding State warrants amount to \$201,109.04. There is also outstanding of Territorial warrants, \$7,142.73. These three items comprise the total indebtedness of the State. The sinking fund in the Treasury, at the end of the fiscal year, for the payment of the bonded debt, amounted to \$185,527.34, of which \$119,800 is invested in the bonds of the State. There was in the Treasury, on the 30th of November, for general purposes, \$371.59. The total tax levied for revenue last year was \$1,085,372.95, of which \$829,991.08 was for general purposes.

It was anticipated that the payments made into the Treasury, during the first month of 1873, would probably suffice to redeem the outstanding State warrants mentioned above, and to meet current expenses.

The school-fund, which is mainly derived from the sale of school-lands, and is invested in Kansas State bonds, amounts to \$759,095.99.

The instruction of youth in Kansas seems to be well attended to, and the public schools are in a flourishing condition. "The increase of school districts during the year has been 772; of the number of children of school age, 23,624; of teachers, 717; in the number of school-houses, 669; in the value of school-houses, \$820,668. The total amount received from various sources for the public schools is \$1,701,950."

The State Normal Schools, at Emporia and Leavenworth, are under efficient management. The number of students in the former of these

schools during the year was 190, in the latter, it was 65.

The number of students in the State University, in 1872, was 253. The addition of a law and a medical department was in contemplation. The estimated cash value of the property of this institution is reckoned at \$224,000, exclusive of 46,080 acres of land donated by the General Government for an endowment fund.

The condition of the State Agricultural College appears to be very satisfactory. The number of students in it, during 1872, was 447, against 293 for the previous year. Besides the native scholars who represented twenty-seven counties of the State, there were students at this college from Colorado, Illinois, Iowa, Maryland, Missouri, Nebraska, Ohio, and Texas.

In the Asylum for the Insane the patients numbered 103, filling the capacity of the building to its utmost limit, and the trustees aver "that not more than one-half of the applicants have been admitted, for want of room."

The State Asylum for the Blind, and that for the Deaf and Dumb, are excellently conducted. The number of pupils enrolled in the latter during 1872 was 68, of whom there remained 65 in attendance at the end of the year, an increase of 17 over the number of the previous year. The present building of this institution is inadequate to its wants. The current expenses of the Asylum for the Blind, in 1872, amounted to \$10,100.

In the State Penitentiary there were 333 prisoners confined, 159 of that number having been received into it during the year 1872. Out of these 159, there were 93 convicts under the age of twenty-five years.

A bill concerning convicts was introduced and passed in the Senate of Kansas, at the session of 1872, which seems to be worthy of notice. It enacts that "prisoners convicted of murder be confined in the penitentiary for one year, and then only be hanged on the warrant of the Governor." The House of Representatives also passed the bill, on its third reading, by a vote of 50 to 25.

There were 574 libraries, having 218,676 volumes. Of these, 364, with 126,251 volumes, were private, and 190, with 92,425 volumes, were other than private, including 4 circulating libraries, with 6,550 volumes.

The total number of religious organizations was 530, having 301 edifices, with 102,085 sittings, and property valued at \$1,722,700. The leading denominations were:

DENOMINATIONS.	Organizations.	Sittings.
Baptist.....	93	18,540
Christian.....	85	4,550
Congregational.....	43	835
Episcopal.....	14	3,380
Methodist.....	166	23,525
Presbyterian.....	94	22,510
Roman Catholic.....	87	14,605
United Brethren in Christ.....	24	2,200

The statistics of pauperism and crime were as follows:

Number of persons supported during the year ending June 1, 1870.....	361
Cost of annual support.....	\$40,475
Total receiving support June 1, 1870.....	836
Native.....	190
Foreign.....	146
White.....	108
Colored.....	85
Number of persons convicted during the year.....	151
Number of persons in prison, June 1, 1870.....	329
Native.....	302
Foreign.....	67
White.....	203
Colored.....	60

The number of persons engaged in all classes of occupations was 128,852, of whom 117,343 were males and 6,509 females. Of the population (258,051) ten years of age and over, there were engaged in agriculture, 73,228, of whom 72,918 were males and 310 females; in professional and personal services, 20,736—15,286 males and 5,450 females; in trade and transportation, 11,762—11,786 males and 26 females; in manufactures, mechanical and mining industries, 18,126—17,403 males and 723 females.

KEIGHTLEY, THOMAS, an English historian and classical writer, born in Dublin, October, 1789; died in London, November, 1872. He received an ordinary education at a country school, and entered Trinity College, Dublin. He was intended for the bar, but delicacy of constitution and other considerations changed his plans, and in 1824 he settled in England, in order to devote himself to literary pursuits, becoming a voluminous contributor to the educational literature of the day. He was the author of histories of England, Greece, and Rome, and abridgments of the same for schools; "War of Independence in Greece," 1837; "History of the Roman Empire," 1840; "Notes on the Bucolics and Georgics of Virgil," 1846; "History of India," 1847; "Epistles and Satires of Horace, with Notes and Exercises," 1848; "Mythology of Ancient Greece and Italy," also an abridgment; "Fair Mythology," 1851; "Scenes, Events, etc., of the Times of the Crusaders," 1853; "Account of the Life, Writings, and Opinions of John Milton," 1855. He also translated from the Dutch an edition of Shakespeare's plays, in 1864, and published "The Shakespeare's Expositor" in 1867.

KELLY, WILLIAM, an eminent citizen and political leader of New York, born in New York City in 1807; died in Torquay, England, January 14, 1872. His father, one of the political exiles from the north of Ireland, was a prominent and successful merchant, and his three sons, of whom William was the second, were well-educated, refined, and courteous gentlemen. The brothers were for some years in business together, and, being very successful, were able to retire on ample fortunes while yet quite young men. But they did not retire to lives of indolence. The elder and younger brothers died some years since, and William,

on his noble estate of Ellerslie at Rhinebeck, on the Hudson, was actively engaged in such measures as would benefit and enlighten his fellow-men. He had served two terms in the State Senate, and in 1860 was with great difficulty persuaded to be the nominee of his party for Governor of the State. For several years he was president of the State Agricultural Society, and on his own estate practically demonstrated what was the best farming of which New York lands were capable. But it was in the cause of higher education that he was most deeply interested. He was president of the Board of Trustees of the Rochester University, of the Board of Vassar College, and of the National Baptist Educational Commission, bore an honorable part in the successful effort to establish a State Agricultural College at Ovid, and was one of the original trustees of Cornell University. In all these cases it was not merely his name and influence which he gave to these organizations; he also bestowed on them a liberal share of hard, earnest work, and where money was needed he was equally liberal with that. He was also an active officer in the great benevolent societies of his denomination, and presided over several of them with great dignity and ability. He had made the voyage to Europe for the benefit of his health, which had been for some time impaired, but became suddenly worse, and died at Torquay.

KENSETT, JOHN FREDERICK, N. A., a distinguished landscape-painter, born in Cheshire, Conn., March 22, 1818; died in New York City, December 14, 1872. He began life as an engraver, having been apprenticed to his uncle, Alfred Daggett, an engraver of bank-note vignettes. Devoting his spare hours to experimenting in oil-colors, a desire to learn the art of painting was awakened, and in 1840 he went to England for that purpose. On his arrival in London he became known to Durand, Casilear, and Rossiter, and shared their studies. For five years he studied oil-painting, supporting himself by engraving. At the end of this time he exhibited a view of Windsor Castle in the exhibition of the Society of British Artists, at the rooms in Suffolk Street, Pall Mall East. It is the custom of this association to have a lottery at a guinea a head, and the holders of the two lucky numbers are allowed to choose a picture each as a prize. The winner of the first prize on this occasion selected Kensett's picture, which was admitted by every one to be the best landscape-painting in the collection. The next two years he spent in Rome, whence he sent home a number of Italian views, which gave him a high reputation. Among these, his "View on the Arno" was exhibited in the National Academy of Design, and on its merits he was made an associate of that institution. In the following year he was elected an Academician. In 1848 he returned to the United States, and fixed his residence in New York City, devoting him-

self assiduously to his art. Among his most popular works are: "View of Mount Washington from North Conway," 1849; "Frankonia Mountains," 1855; "October Day in the White Mountains," 1853; "Hudson River from Fort Putnam," 1856; "Falls of the Bashbish;" "Sunset on the Coast," 1858; "Lake George;" "Sunset in the Adirondacks;" "Noon on the Sea-shore;" "Housatonic Valley;" "Coast Scenery;" "Niagara;" and "Narragansett Bay." In 1859 he was appointed a member of the National Art Commission, having the direction of the ornamentation of the Capitol at Washington, and the superintendence of the works deposited there. Mr. Kensett was unquestionably one of the most conscientious landscape-painters of modern times; an indefatigable worker, and thoroughly devoted to his art. His works were highly esteemed in France, Belgium, and England, as well as in this country.

KENTUCKY. The financial condition of the State of Kentucky appears to be sound and satisfactory, except that the revenue laws are so far defective that the expenditures of the government regularly exceed the receipts. The debt at the beginning of the last fiscal year, October 11, 1871, amounted to \$1,069,594, exclusive of the school debt, which is a permanent loan, and amounts to \$1,625,068.60. During the year bonds were redeemed to the amount of \$308,000. A new issue of \$200,000 was, however, made, under an act of January last, to cover the deficit in the Treasury. The bonds outstanding at the end of the fiscal year, October 10th, were as follows:

6 per cent. bonds past due.....	\$25,394 00
5 per cent. bonds past due.....	5,000 00
6 per cent. bonds falling due between the 10th October, 1872, and the 1st of January, 1873.	
6 per cent. bonds maturing in 1873.....	27,000 00
5 per cent. bonds maturing in 1872.....	248,000 00
6 per cent. bonds maturing in 1874.....	66,000 00
6 per cent. bonds maturing in 1875.....	123,000 00
6 per cent. bonds maturing in 1876.....	30,000 00
6 per cent. bonds maturing in 1877.....	3,000 00
6 per cent. bonds maturing in 1878.....	111,000 00
6 per cent. bonds maturing in 1885.....	60,000 00
6 per cent. bonds maturing in 1886.....	5,000 00
8 per cent. bonds maturing in 1873 or 1877....	200,000 00
Total.....	\$966,394 00

The means at the command of the Commissioners of the Sinking Fund for the redemption of the indebtedness are as follows:

Balance in Treasury on the 10th of October, 1872.....	\$544,623 50
Loan to Farmers' Bank, at 5 per cent.....	200,368 00
Loan to Bank of Kentucky, at 5 per cent.....	400,000 00
Balance of proceeds of sale of Kentucky Bank stock, at 6 per cent.....	547,000 00
Amount in Treasury not transferred.....	12,028 33
Balance due on loan to Kentucky River Navigation Company.....	4,000 00
406 shares of stock in Bank of Louisville....	40,600 00
200 shares of preferred stock in Louisville, Cincinnati & Lexington Railroad Company.....	26,000 00
2,178 shares of stock in Lexington & Frankfort Railroad Company.....	108,900 00
Bonds of Louisville & Frankfort Railroad Company.....	74,519 50
Stock in turnpike-roads.....	264,428 96
Amount borrowed by Revenue Department under sundry acts of the Legislature.....	207,919 13

Total resources..... \$2,430,393 71

In addition to the foregoing resources, the State has unadjusted claims against the Federal Government, for advances made during the war, amounting to \$505,478.52.

Holders of the bonds have been notified of the readiness and desire of the State Treasury to pay the principal, with accrued interest and without discount, but they have declined to receive the money and surrender the bonds.

While the sinking fund yields more than is required for the redemption of the State indebtedness as it falls due, the revenue is insufficient to meet the expenses of the government. The Governor for two years past has urged upon the Legislature some action which should remedy this difficulty. In his last message he recommended that the Commissioners of the Sinking Fund be authorized to invest so much of the cash and cash assets on hand, belonging to the sinking fund, in 5-20 bonds of the United States, or other equally good and convertible securities, as will be sufficient to pay off the outstanding redeemable bonds, and that such securities should be held by the commissioners for that purpose and no other, and that all the other resources of the fund, "except the five cents now imposed by law on the \$100 of taxable property," be diverted to the revenue proper. The amounts paid out of the Treasury during the past two years to various charitable institutions and other objects named, together with the revenue collected and the surplus remaining for general purposes, are exhibited in the following statement:

INSTITUTIONS.	1871.	1872.
Eastern Lunatic Asylum.....	\$119,464 00	\$138,977 00
Western Lunatic Asylum.....	69,843 60	82,416 64
Blind Asylum.....	22,758 28	23,105 00
Deaf and Dumb Asylum.....	20,890 95	23,589 15
Feeble-minded Institute.....	81,010 39	24,270 79
Kentucky Penitentiary.....	4,091 50	25,308 33
Criminal prosecutions.....	93,336 18	115,400 48
Jailers.....	90,968 70	119,586 03
Idiots.....	19,656 95	20,751 59
American Printing House for the Blind.....		3,530 00
Conveyance of lunatics.....	4,111 15	3,896 69
Conveyance of convicts.....		11,763 85
House of Reform.....	23,710 00	15,862 40
	\$506,410 40	\$614,303 83
Revenue collected (proper)...	998,076 63	1,008,617 83
Surplus.....	\$487,666 23	\$394,265 06

The expenses of the penitentiary for the year were \$28,083.53, and its revenues, \$9,912.15. The House of Reform for Juvenile Delinquents has been completed, and placed under the charge of a Board of Managers. The other public institutions show a favorable record.

Rapid progress has been made in establishing railroad communications between different parts of the State. The Elizabethtown & Paducah Railroad, 185 miles in length, has been opened for travel during the year. It penetrates the coal and iron region of Western Kentucky, and will aid greatly in developing

the mineral wealth of that section. The Elizabethtown, Lexington & Big Sandy Road has been completed from Lexington to Mount Sterling, and during the year 1873 will probably be extended to the mouth of the Big Sandy, to connect with the Chesapeake & Ohio.

Great improvement has been made in the matter of public education, though much still remains to be done. During the year ending June, schools were taught in 5,308 of the 5,381 districts of the State. The total number of pupils was 416,763, an increase of 10,925 over the preceding year. There is now no general tax for educational purposes, either by the State at large, or by local authorities. The Superintendent, in his last report, lays down the following as "the grand desiderata" for an effective school system: 1. A general statute allowing the districts to tax themselves, without the necessity of procuring special legislation; 2. A law providing for the building of good school-houses upon a uniform plan; 3. A Normal School for training teachers; 4. A general law allowing cities and towns to tax themselves to establish graded schools. On the subject of popular education, the Governor says in his message to the Legislature of 1873:

Whatever political or other differences may obtain among us, this is one about which we cannot afford to differ. It is, and should be, the pride of the State to preserve her own schools, regulated and controlled in her own way, and to keep in her own hands the education of her children. We have witnessed various efforts that have been made to induce the Congress of the United States to set up a system of "national education," which, if done, would virtually take away from the State the control of this subject. It is alarming to contemplate the success of such a scheme. Its direct and inevitable tendency would be to destroy our identity as States, and as the people of separate States; to promote, at once, the consolidation and centralization of all political power in a Federal Government; and alter, at least, those forms and institutions of freedom which we have ever regarded as essential to the maintenance of our constitutional liberty.

He renews a recommendation made in his previous message on the subject of organizing a system of education for the colored population:

The education of this race is not a duty of charity alone, but is demanded by the best interests of society. They form a numerous class of our citizens, sharing with us in civil and political rights, upon whom, too, we are largely dependent for carrying on the industry, especially the agriculture, of the State; and, just in proportion as they shall be left in ignorance and vice, or improved in morals and intelligence by the discipline of a suitable system of education, they will become to the Commonwealth, on the one hand, an incubus of pauperism and crime; on the other, a useful part of our population. Many of these people are struggling hard in the direction of educating their children, and have shown a wonderful measure of success. I trust you will not fail to provide for a system of schools for this portion of our population, and offer them encouragement and assistance in this important department.

The session of the Legislature which began in December, 1871, continued until the 25th

of March. There were 1,015 acts and 41 joint resolutions passed, a very large proportion of which were of a private or special character, and nearly all the rest of purely local interest. Many of the special acts were to prohibit the sale of spirituous liquors in particular localities, or to authorize a tax for schools in single towns or counties. The bill which elicited the greatest amount of discussion was one permitting the Cincinnati Southern Railroad to cross the State. This appears not to have become a law, owing to the inability of the two Houses to agree as to the restrictions to be placed upon the company. An act was passed "to regulate foreign corporations engaged in operating railroads in the State of Kentucky." It requires all such corporations to adopt an order or resolution "authorizing its agents to contract and be contracted with in the name of such corporation, and further agreeing that all citizens resident, and bodies corporate of this State, having claims or demands against said corporation, may sue for, and prosecute to final judgment, all such matters in any of the courts of competent jurisdiction in any of the counties through which said road may be constructed, subject, however, to the same right of removal, by change of venue, as is or may be given to citizens of this State, which authority shall be put to record in the County Court Clerk's office of some one of the counties through which said road runs, a certified copy of which shall be competent evidence in any of the courts of this Commonwealth." If they fail to comply with this provision, or cause any suit or matter of litigation with a citizen or corporation of the State to be removed from the State court to a United States District or Circuit Court, they "shall thereafter be prohibited from doing business in this State; and all contracts thereafter made by such corporation, through its agents, shall be null and void as to such parties; and all parties and persons continuing to contract and do business in this State, either in their own name or that of others, in violation of this act, shall be deemed guilty of a misdemeanor, and for each day he or they shall so offend may, upon indictment, be fined not less than fifty dollars, and imprisoned not less than one week for each day they so offend, either or both, in the discretion of a petit jury." Any discrimination in carrying freight on such roads is prohibited.

An act was also passed making some important changes in the laws of evidence. It declares that no person shall be disqualified as a witness in a suit on account of his interest in the result, that "neither husband nor wife shall be competent for or against each other, or concerning any communication made by one to the other during marriage," and that no one shall be incompetent as a witness on account of his or her race or color.

An act was also passed providing for the election of representatives in Congress by bal-

lot, which makes the State law conform to an act of Congress of February 28, 1871. All other votes in Kentucky are still given *à la voce*.

A provision is made for appointing persons to take charge of pauper lunatics who cannot be taken at either of the asylums, such persons to be paid \$200 a year.

The State was laid off into ten districts, for congressional representation.

The subject of providing for the encouragement of immigration occupied much attention, but no plan was adopted.

The law exempting homesteads from sale for debt was extended in its operation to "every bona-fide house-keeper with a family, irrespective of race or color."

An act amending the charter of the city of Lexington was vetoed by the Governor, on account of the following provisions:

That an act, entitled "An act to amend the charter of the city of Lexington, approved March 3, 1870," be so amended that the councilmen elected under the provisions of an act entitled "An act to amend the charter of the city of Lexington, approved January 24, 1870," shall remain in office for four years from the first Thursday after the first Saturday in March, 1873, and until their successors are duly elected and qualified: *Provided, however*, That the term of office of one councilman from each ward of the city shall expire on the first Thursday after the first Saturday in March, 1873, and of each succeeding year; and it shall be determined by lot, to be drawn among the councilmen from each respective ward, who shall retire from office as above prescribed: *And provided further*, That the councilmen so retiring shall be deemed ineligible to the office of councilman for one year thereafter.

SECTION 2. That upon the termination of the term of office of four councilmen, as provided for in the first section of this act, the eight remaining councilmen shall, on the first Thursday after the first Saturday in March, 1873, and in each succeeding year, elect, by ballot, one councilman from each ward in the city, to fill the vacancies thus occasioned, and whose term of office shall be three years from said date, and until their successors are duly elected and qualified.

These elections, he said, contained "a legislation which is not only extraordinary, but in my opinion violative, if not of the letter, at least the spirit, of the constitution; a legislation not in harmony with the genius of our republican institutions, and certainly subversive of the time-honored traditions and cherished principles of American democracy. They apply, as it seems to me, to a municipal arena, measures kindred to those which we have so strongly and justly reprobated when imposed by Federal authority upon the Southern States. However grieved and indignant we may be, that the real proprietors of a city distinguished for its intelligence, culture, and wealth, should be controlled by the mere numerical strength of an ignorant and thriftless race, just emerged from slavery; and, however anxious we may be to relieve them, we should bear in mind that, though we may for a time repress, we can never truly and effectually remedy a political evil by excep-

tional laws, especially if those laws contravene the theory and fundamental principles of the organic law."

An act was passed providing that "upon the petition of any two or more respectable citizens, verified by affidavit, that any person has, by the habitual or excessive use of opium, arsenic, hashish, or any drug, become incompetent to manage himself or his estates with ordinary prudence and discretion, or upon information and application of the attorney for the Commonwealth, it shall be the duty of the Circuit or Chancery Court of the county in which such person resides to cause an inquest to be held by a jury, in open court, to inquire into the fact. Upon such person being found incompetent to manage himself or, estate with ordinary prudence and discretion, the court may order him or his estate, or both, into the custody and control of a committee of one or more persons, with power to confine such person in any private asylum, or in one of the lunatic asylums of this Commonwealth: *Provided*, That no such person shall be maintained in a public asylum at the expense of the Commonwealth."

By an act amending the act of 1871, which provides for a revision and digest of the laws of the State, the Governor and Judges of the Court of Appeals were required to nominate, and with the consent of the Senate to appoint, five commissioners to make the revision. The commissioners subsequently appointed were James M. Nesbitt and E. J. Bullock for revision of the Statutes, Richard A. Buckner, and Joshua F. Bullitt for the Codes of Practice, and Judge Geo. W. Craddock umpire of both boards.

The Military Committee of the House of Representatives was engaged during a large portion of the session in investigating alleged outrages and disorders in Franklin County, and finally made a report, stating that "a number of gross injuries to the persons and property of citizens of Franklin County have been perpetrated by armed and disguised bodies of men unlawfully banded together. These bands generally move in numbers of from ten to twenty, and their operations are usually confined to the night-time. All the indications are that they are of a low and illiterate class of white men. They are generally mounted, and appear to disperse as soon as the immediate purpose of their combination has been accomplished. Their disguises seem to have been sufficient, in most of the cases brought to the knowledge of the committee, to prevent their full identification; but in many instances the identity of the intruder has been suspected from a supposed recognition of the voice. It has, however, been stated to the committee, on the very highest authority, that many men who have engaged in these unlawful acts are well known." The investigations covered a period of about eighteen months. In a majority of cases the outrages

had been inflicted on negroes, some of whom had been killed, and others whipped, and otherwise maltreated. The effect had been to drive colored laborers from Franklin County. In the opinion of the committee, "these organizations had their inception in the disordered state of the country consequent upon the late war, and were originally intended to suppress anticipated disturbances among the emancipated slaves, and to summarily punish the unlawful acts of bad white men. This condition of affairs afforded an opportunity to evil-disposed white men to engage in unlawful acts, under the guise of these organizations, for the gratification of private vengeance, the indulgence of their prejudices against, and jealousy of, free negro labor, and for an opportunity to plunder." The true and only remedy they declare to be the enforcement of the laws.

"If our judges," they say, "will do their whole duty in forming their grand-juries and in properly instructing them and compelling a performance of their duties, and the grand-juries will use the diligence that the committee has used in the investigation of these alleged outrages, many of the mysteries of the so-called Ku-klux will be dispelled, and sufficient evidence may be discovered upon which to base more indictments."

The report concludes: "The present provisions of the law appear to be sufficient to cover all the offences of which these unlawful bands were guilty, except that of sending anonymous and threatening letters, or posting threatening notices, and intimidating quiet and law-abiding people by riding about armed and disguised. The committee, therefore, recommend that the matter be referred to the Committee on the Judiciary, with instructions to prepare and report a bill covering these or other defects, if any, relating to the same subject in our criminal laws."

There was no election for State officers during the year, but conventions were held by both political parties, for the purpose of appointing delegates to the national nominating bodies, and selecting candidates for presidential electors. The Republican Convention was held at Louisville, on the 18th of March. There was some discussion arising from the opposition of a few delegates to the renomination of President Grant by the National Convention. These were, however, in a small minority, and, after the delegates had been chosen and electors nominated, the following platform was unanimously adopted, the delegates opposing the renomination of Grant having withdrawn from the convention:

We, the Republicans of Kentucky, in convention assembled, declare—

1. That we reaffirm our adherence to the Republican party, pledging ourselves to maintain them as the best safeguard of our liberties. We also reaffirm our adherence to the right of all American citizens—according to the Constitution—to exercise, without diminution or restriction, the elective franchise

in all elections, national, State, or municipal, and hereby express our condemnation of the acts of the Democracy in this State in contravention of this principle.

2. To the people of Kentucky and of the nation we send congratulation upon the fulfillment of the promises given by the Republican party in National Convention assembled in 1868—resulting in the restoration to the Union of all the States—in giving equal rights to all men before the law—surrounding us with prosperity at home, and increased honor among all the nations of the civilized world.

3. We recognize with pride the beneficial achievements of the present Administration in the management of national affairs, in executing the wishes of the people as declared by law, in condemning and punishing corruption, and in relieving the industries of the country from grievous burdens thrust upon them.

4. To an extent beyond our most sanguine expectation, the Republican party has reduced the public debt, and at the same time appreciated to a high standard the national currency and the securities of the Government.

5. We express an undiminished confidence in the personal and official integrity and honor of President Grant, and have witnessed with satisfaction the refutation and exposure of the falsehoods and calumnies directed against him.

6. We pledge ourselves to support the nominees of the convention which is to assemble on the 5th day of June, in the city of Philadelphia, and, believing that President Grant has met his pledges given to the country in the administration of his high office, he deserves our thanks and support, and our delegates are instructed to vote for his renomination for the presidency of the United States.

7. For sacrifices and services in behalf of his country, the Republicans of Kentucky are indebted to General John M. Harlan, and we present his name with pride to the Republicans of the United States as our choice for Vice-President.

The Democratic Convention took place at Frankfort, on the 20th of June. There was also some disagreement in this body, owing to the disposition of some to support the platform and nominations of the Liberal Republicans adopted at Cincinnati, and of others to favor an independent Democratic ticket. The course finally agreed upon is indicated in the following resolutions:

Resolved, That the Administration of the Federal Government, with President Grant as its executive head, has persistently violated the Constitution, and the purity of its administration, and the elective franchise, and, unless arrested in its centralizing doctrines and corrupt practices, will subvert and destroy our liberties.

Resolved, That the Democracy of the State of Kentucky now reaffirm the principles contained in the platform adopted by the former conventions of the party, since and including the conventions of the first day of May, 1866. These platforms contain substantially the theory and practice which, we believe, if carried out, will secure the protection of life, liberty, and property, and all the essential ends of free government.

Resolved, That, while we adhere to the principles declared in said platforms, and while we are deeply impressed with the conviction that the peace, prosperity, freedom, and happiness of the people of the United States will be best secured and promoted by a strict adherence to said principles in the administration of both State and Federal Governments, yet, recognizing and appreciating the necessity of preventing, if possible, the continuance in power of the

present corrupt Administration, while we do not expressly instruct our delegates to the National Convention as to the course they shall pursue, we expect them, after consultation with the representatives of the Democracy of the whole country, to take such action as will most likely insure a perfect union of all the elements of opposition to the nominees of the Philadelphia Convention; and that the Democrats of Kentucky unhesitatingly pledge themselves to give to the ticket that may be presented to the country by the Baltimore Convention an earnest and active support, not only because it will be the representative body of the whole party, but because in party organization it is the ultimate judge of the line of policy which the members of the party should pursue.

Resolved, That the delegates from Kentucky to the Baltimore Convention are instructed to vote as a unit on all questions.

At the election for President in November, the whole number of votes cast was 191,402, of which the Grant and Wilson electors received 88,816, and the Greeley and Brown electors 100,212, while 2,374 were cast for O'Connor and Adams. The majority of Greeley and Brown over Grant and Wilson was 11,396; over all 9,022. The total vote for Governor, in 1871, was 215,142; and Leslie, the Democratic candidate, had a majority of 86,976; in 1868 the total vote for President was 155,455, and Seymour and Blair's majority was 76,325. A Representative to Congress was also chosen in each of the ten congressional districts at the election in November. All of these were Democrats. The State Legislature consists of 34 Democrats and 4 Republicans in the Senate, and 82 Democrats and 18 Republicans in the House.

According to the census of 1870, the State contained 8,108,850 acres of improved, 9,134,658 of wood land, and 1,421,598 of other unimproved land. The cash value of farms was \$311,238,916; of farming implements and machinery, \$8,572,896; total amount of wages paid during the year, including value of board, \$10,709,882; total (estimated) value of all farm-productions, including betterments and additions to stock, \$87,477,874; orchard-products, \$1,231,385; produce of market-gardens, \$527,329; forest-products, 574,994; value of home manufactures, \$1,688,972; value of all animals slaughtered, or sold for slaughter, \$24,121,861; value of all live-stock, \$66,287,848. There were 817,084 horses, 89,280 mules and asses, 247,615 milch-cows, 69,716 working-oxen, 382,993 other cattle, 986,765 sheep, and 1,888,227 swine. The chief productions were 38,532 bushels of spring, and 5,690,172 of winter, wheat; 1,108,908 of rye; 50,091,006 of Indian-corn; 6,620,108 of oats; 238,486 of barley; 8,448 of buckwheat; 105,305,869 pounds of tobacco; 1,080 bales of cotton; 2,234,450 pounds of wool; 119,926 bushels of peas and beans; 2,391,062 bushels of Irish, and 802,114 of sweet, potatoes; 62,360 gallons of wine; 11,874,978 pounds of butter; 115,219 of cheese; 1,845,779 gallons of milk sold; 204,399 tons of hay; 2,551 bushels of clover-seed; 35,896 of grass-seed; 7,777 pounds of

hemp; 237,268 of flax; 14,657 bushels of flaxseed; 269,416 pounds of maple-sugar; 1,740,453 gallons of sorghum; and 49,073 of maple-molasses; 1,171,500 pounds of honey; and 32,567 of wax.

The total number of manufacturing establishments was 5,390, having 1,147 steam-engines, of 31,928 horse-power, and 459 water-wheels, of 7,640 horse-power, and employing 30,636 hands, of whom 27,687 were males above sixteen years of age, 1,159 females above fifteen, and 1,790 youth. The invested capital amounted to \$29,277,809; wages paid during the year, \$9,444,524; value of materials consumed, \$29,497,535; products, \$54,625,809.

There were 89 newspapers and periodicals, having an aggregate circulation of 197,130, and issuing 18,270,160 copies annually. There were 6 daily, with a circulation of 31,000; 4 tri-weekly, circulation 3,500; 4 semi-weekly, circulation 4,100; 68 weekly, circulation 187,930; 7 monthly, circulation 19,700.

The total number of libraries was 5,546, containing 1,909,230 volumes. Of these, 4,374, with 1,590,245 volumes, were private, and 1,172, with 318,985, other than private.

The number of religious organizations, of all denominations was 2,967, having 2,694 edifices, with 876,439 sittings, and property valued at \$9,801,465. The leading denominations are as follows:

DENOMINATIONS.	Organizations.	Sittings.
Baptist.....	1,004	288,938
Christian.....	490	141,585
Episcopal.....	38	15,800
Evangelical Association.....	5	3,000
Lutheran.....	7	1,650
Methodist.....	978	244,918
Presbyterian.....	306	100,750
Roman Catholic.....	130	72,530

Of the total population (930,136) ten years of age and over, there were engaged in all classes of occupation, 414,593, of whom 364,300 were males, and 50,293 females. There were engaged in agriculture, 261,080, of whom 257,426 were males, and 3,654 females; in professional and personal services, 84,024—41,974 males, and 42,050 females; in trade and transportation, 25,292—24,961 male and 331 female; and in manufactures and mechanical and mining industries, 44,197—39,989 males, and 4,258 females. The condition of pauperism and crime is here given:

Number of persons supported during the year ending June 1, 1870.....	2,059
Cost of annual support.....	\$160,717
Total number receiving support June 1, 1870....	1,784
Native.....	1,667
White.....	963
Colored.....	704
Foreign.....	117
Number of persons convicted during the year.....	639
" " in prison June 1, 1870.....	1,067
Native.....	968
White.....	523
Colored.....	443
Foreign.....	99

L

LEE, CHARLES ALFRED, M. D., a physician, medical professor, and author, born at Salisbury, Conn., March 8, 1801; died in Peekskill, N. Y., February 14, 1872. He graduated from Williams College, and soon after commenced the study of medicine with his brother-in-law Luther Ticknor, M. D. Subsequently he entered the Berkshire Medical College, where he received the degree of M. D. in 1825. In 1826 he removed to New York City, and in connection with Dr. James Stewart founded the Northern Dispensary of that city, where he was for about ten years attending physician-in-chief. During a long series of years he gave instruction in the following institutions: The medical schools of the University of New York, and Bowdoin College, Brunswick, Me.; the Berkshire Medical School at Pittsfield, Mass.; and the medical colleges at Geneva, N. Y., Woodstock, Vt., Columbus, O., and Buffalo, N. Y. He was one of the founders of the Medical College of the University of New York, and the Buffalo Medical College, in which he was Professor Emeritus at the time of his death. He was editor of the *New York Journal of Medicine* at one time, and during his long life was a voluminous writer on scientific and medical subjects, a volume on Physiology and another on the Elements of Geology being among his numerous works.

He also edited the American edition of "Coppand's Medical Dictionary." His attention during his later years had been devoted to the subject of the treatment of the insane, and his views on the colonization or out-door system, which he personally investigated while he was in Europe in 1865, were adopted after his return by some prominent institutions for the insane in this country. His advanced age had compelled him to retire from his professional labors, and his useful life ended abruptly after a brief illness.

LEVER, CHARLES JAMES, M. D., Ph. D., LL. D., an Irish novelist, born in Dublin, August 31, 1806; died in Trieste, June 8, 1872. His parents were wealthy, and he received a careful and thorough education at Trinity College, Cambridge, where he took his degree of medicine; afterward passing through a course of study at Göttingen, where he also obtained a degree. In youth he was noted for personal bravery, especially for a daring and reckless spirit as an equestrian. This trait seemed to impart to his writings a lively, vivacious spirit, sometimes running even into a boisterous mirth. His ladies and gentlemen seemed under the influence of champagne, his peasants and servants of "potheen." For a time, at the beginning of his career, he practised as a physician; and it is recorded that, when the cholera raged

in Ireland in 1832, he became a member of the medical council of Londonderry, and manifested equal courage and skill in combating that fearful and potent scourge. At a later period he went to Brussels, as physician to the English embassy in that place. There he remained three years, and there he wrote "The Confessions of Harry Lorrequer"—sounding therein the joyous key-note of all the stories that are distinctively his own, and by which he will hold a place in British literature. The quick invention, the abundant incident, the prodigality of comic climax, the fine flow of animal spirits, and the off-hand, dashing style of this novel made it at once and universally popular, and brought him a success such as might have confirmed a less confident genius in the choice of the vocation of authorship. After this came "Charles O'Malley," "Jack Hinton," "Tom Burke of Ours," "The O'Donoghue," "St. Patrick's Eve," and "The Knight of Gwynne." In 1842 Mr. Lever became the editor of the *Dublin University Magazine*, which periodical he conducted, with most competent ability, for three years, and to which he contributed, among other things, "Maurice Tiernay," "Con Cregan," and "The Diary and Notes of Horace Templeton." In 1845 he retired to the Continent, establishing himself first in a castle in the Tyrol, and afterward at Florence. In 1858 he was appointed by Lord Derby vice-consul at Spezzia, and was transferred to Trieste, in 1867. In addition to the works already mentioned, Mr. Lever wrote "One of Them," "Roland Cashel," "Tony Butler," "Barrington," "Luttrell of Arran," "Sir Brook Fosbrooke," "Tales of the Trains," "The Daltons," "Gerald Fitzgerald," "Glencore and his Fortunes," "The Nevilles of Garrettstown," "The Dodd Family Abroad," "Davenport Dunn," "Arthur O'Leary," "Sir Jasper Carew," "The Commissioner," "The Mystic Vial," "The Heirs of Randolph Abbey," "The Martins of Cro' Martin," "The Bramleighs of Bishop's Folly" (1868), "A Day's Ride: a Life's Romance," "A Rent in the Cloud," "That Boy of Norcott's," and his last novel, "Lord Kilgobbin."

LIEBER, FRANCIS, J. U. D., LL. D., an eminent publicist, author and professor; born in Berlin, Prussia, March 18, 1800; died in New York City, October 20, 1872. His early life was one of remarkable vicissitudes. He entered the Prussian Army at the age of fifteen as a volunteer, took part in the battles of Ligny and Waterloo, and was severely wounded at the siege of Namur. Like most of the students of the German universities, he was opposed to the reactionary tendencies of the Government, and was arrested as a Liberal. Obtaining his release, he continued his studies at the University of Jena. But the Government spies were still watching him, and preventing his advancement, and, at the age of twenty-one, he determined to visit Greece with the Byron expedition, and aid in the struggle

for her independence. The journey and his services there were attended with great hardships and privations; but, when, after much suffering, he reached Italy on his return, he was welcomed by Niebuhr, the historian, who was then ambassador from Prussia to Rome. He remained in Niebuhr's family during the years 1822 and 1823, and while there prepared a narrative of his experiences in Greece, which was published in Leipsic, and translated into other languages. On his return to Germany, though he had been promised safety, he was arrested and thrown into prison at Kopnick. Here he was detained for two years, and he spent the time in study and in the composition of a volume of poems, which, through the influence of Niebuhr, were published in Berlin, under the pseudonym of Franz Arnold. After his release in 1825, finding that he would still be subjected to persecution and annoyances if he remained in Germany, he crossed to England, and, during a year's residence in London, supported himself by private teaching and contributing to German periodicals. In 1827 he emigrated to the United States, and delivered, with but moderate pecuniary success, a series of lectures on history and politics in the principal cities. Returning to Boston, he founded a swimming-school there, on the system of General Pfuhl. The same year he entered into an engagement with Matthew Carey & Sons (afterward, Carey, Lea & Blanchard), of Philadelphia, to edit the "Encyclopædia Americana" for them, in 13 volumes, on the basis of Brockhaus's German "Conversations-Lexicon." This enterprise was completed between 1829 and 1833. During this period he also translated a French work on the Revolution of July, 1830, and the elder Feuerbach's life of Kaspar Hauser. In 1832, having removed to New York, he translated the able work of De Beaumont and De Tocqueville on the "Prisons and Penitentiary Systems of the United States," with an introduction and notes. After the completion of the "Encyclopædia," he was requested, by the trustees of Girard College, to draw up a plan of instruction for that institution. This he published in 1834, and his "Letters to a Gentleman in Germany, written after a Trip from Philadelphia to Niagara," were published the same year. This is not so much a volume of travels as a series of anecdotes, essays, and philosophical discussions, for which the journey furnishes the connecting thread of narrative. In 1835, he published his "Reminiscences of Niebuhr," a charming work, which gives a portraiture of the every-day life of the historian. The same year he was elected to the professorship of History and Political Economy in the College of South Carolina, at Columbia, the capital of that State. He filled this position till 1858, when he removed to New York, and was almost immediately called to a similar chair in Columbia College, which position he filled at the time of his death. During his residence

in South Carolina, he published a large number of important works, among which were the following: "A Manual of Political Ethics" (2 vols., 8vo, Boston, 1838), adopted as a text-book by Harvard, and commended by Kent and Story; "Legal and Political Hermeneutics, or Principles of Interpretation and Construction in Law and Politics;" "Laws of Property: Essays on Property and Labor" (18mo, New York, 1842); "Civil Liberty and Self-Government" (2 vols., 12mo, Philadelphia, 1853). Special branches of civil polity also largely occupied his attention, particularly the subject of penal legislation, on which he wrote "Essays on Subjects of Penal Law and the Penitentiary System," published by the Philadelphia Prison Discipline Society; "Abuse of the Penitentiary Power," published by the Legislature of New York; "Remarks on Mrs. Fry's Views of Solitary Confinement," published in England; "Letter on the Pardoning System," published by the Legislature of South Carolina. Among his more notable occasional papers are: "Letter on Anglican and Gallican Liberty," translated into German, and annotated by the distinguished jurist, Mittermaier, who also superintended a translation of "Civil Liberty;" a paper on the vocal sounds of Laura Bridgman, the blind deaf-mute, compared with the elements of phonetic language, published in the "Smithsonian Contributions to Knowledge;" a series of political articles in *Putnam's Monthly*, on "Napoleon and Utah," and numerous anniversary and other addresses. Among his valuable writings, since assuming the professorship in Columbia College, are, his inaugural address, entitled "Individualism and Socialism, or Communism," in which he maintains that these are the two elements on which human life hinges, and that the problem is, to exclude neither, but to ascertain their true limits; and his discourse, introductory to a course of lectures on the State, in the Columbia Law School, entitled "The Ancient and the Modern Teacher of Politics." He also prepared two or three important State papers at the request of the Government, during the late war: one on the exchanges of prisoners, and another on the principles to be observed in the intercourse between the contending forces. He was appointed arbitrator of the Mexican claims, and held that position at the time of his death.

LITERATURE AND LITERARY PROGRESS IN 1872. The preoccupation of the public mind with politics in the year of a presidential election, with causes affecting the general interests of trade, might be expected to limit the production of books, and by this sign to indicate a diminished literary activity. If the aggregate of publications, good, bad, and indifferent, has not been much, if any, diminished, the number of works that can be said to bear witness to "literary progress" is relatively smaller. But it is sufficiently large to show that the impulse to production is constant,

and their quality is sufficiently meritorious to be a favorable augury for American culture. And it is superfluous to say that, in this point of view, a small number, having the insignia of original power and of genuine art, are worth more than the most voluminous catalogue of dilutions, compilations, and imitations. It will be seen that the year is honored by some of this select worth, the presence of which more than compensates for any deficiency in other respects. The question once asked, with more justice than our national susceptibility permitted us to see, "Who reads an American book?" now admits of no doubtful or hesitating answer. And, as we are every year becoming more characteristically a nation of readers, the question in a commercial version of it, "Who *buys* an American book?" need concern none but ourselves. But books that are worth buying for ourselves cannot fail to be in request abroad, and—whatever doubt may be raised as to some of the conclusions of political economy—nothing but good can come from the freest interchange of thought. With due security for literary property, we may at once do justice to foreign authors, and place our own in a condition to exact justice for themselves.

The question of an international copyright has made no apparent progress. Any thing not involving "politics," or "money," has little chance of gaining the attention of Congress, or of keeping for any length of time the attention of the general public. But a change in the British copyright law, by which Canadian publishers are placed in a condition to become rivals of ours in the business of reprinting English books on terms of advantage, promises to diminish, in a sensible degree, the commercial obstacles to a just treatment of foreign authors. It is to be hoped that the improved tone of sentiment in England upon the copyright question, and the response of eminent authors to the suggestion (*AMERICAN ANNUAL CYCLOPEDIA* for 1871, p. 455) of an authors' as distinguished from a publishers' international copyright, will have a favorable effect upon public opinion in this country.

A noticeable feature in the publishing business is the increase in the number of books sold by subscription. This was formerly a business by itself, never adopted by the regular book-trade except in the issue of works the great cost of which made it necessary for the publisher to assure himself, beforehand, of a remunerative patronage. The inferior character of many of the works sold in this way, by those who made it a specialty, was an occasion of prejudice against the very name of a subscription-book. But it is undeniable that it is a method of sale by which books can be pushed into a larger circulation than they would reach, save in very exceptional instances, by the ordinary channels of trade, and it is coming to be adopted by some of the largest houses. With this extension of the business,

books of a higher character are thus sold. The innovation is regarded with dislike and distrust by those whose interests are identified exclusively with "the old line," but it is not easy to see how it can be injurious to any real and legitimate business. The more really good books are sent into the remoter channels of circulation, the greater will be the demand for other good books, to the profit of those by whom they are published.

The whole number of copyrights entered in the office of the Librarian of Congress during 1872 was: of books, 3,175; of pamphlets, 2,728; of musical productions, 2,812; of dramatic pieces, 18; of maps and charts, 221; and of photographs, engravings, chromos, and prints, 2,621. It is much to be desired that, from time to time, lists of copyrighted titles should be published, to give opportunity for comparing the demand and supply of the different departments of literature. The report we attempt here is neither exhaustive nor minutely analytic. Many of the works recorded have been, like bills on their introduction into a legislative body, "read by their titles" only, and a brief acquaintance with books is enough to teach one that, between the promise of the title and the performance of the contents, there is sometimes a marked disparity. In such cases, the only ill-consequence likely to happen is the entry of a title under the wrong head.

SCIENCE AND PHILOSOPHY.—The works in these departments worthy of mention are not numerous, but are enough to show that our scholars and thinkers recognize the tendency to the implication of physical with metaphysical and moral science. A work that has attracted attention from the union in the author's mind of a hearty interest and large attainments in zoology, with a firm hold upon the principles of psychology, as discoverable in the consciousness, and of a proper metaphysical and spiritual philosophy, is "Instinct in Men and Animals," by Paul A. Chadbourne, LL. D., (now) President of Williams College. Dr. Chadbourne's statements are sometimes wanting in scientific precision, but, in the main, his discussion is marked by freshness and force of thought. The venerable Dr. Martin Payne, in his "Physiology of the Soul, and Instinct, as distinguished from Materialism," brings the resources gathered in a long and successful life, during which his mind has been busy with the highest problems of medical science and physiology, to refute materialistic theories. In connection with this, he reviews the theories of geology now generally accepted, and, with a courage not often found, argues for the literal interpretation of the narratives, in Genesis, of the Creation and the Deluge, and their consistency with all that is known to be true of the structure of the earth's crust. At present, he will find scarcely more among the clergy than among the scientists to concur in these views. Prof. H. N. Day, of Yale College, has added to his other meritorious philo-

sophical treatises "The Science of *Æsthetics*; or, the Nature, Kinds, Laws, and Uses, of Beauty," in form a school text-book; in substance, an original investigation into a subject of research that is far from being hackneyed. Prof. James D. Dana, LL. D., of the same institution, by his "Corals and Coral Islands," has laid the public under new obligations to himself; and the "Oriental and Linguistic Studies" of Prof. W. D. Whitney are an honor to American scholarship and critical culture. From the youngest of our seats of learning, Cornell University, issues a volume of "Lectures on the Psychology of Thought and Action, Comparative and Human," and "An Introduction to Metaphysics," by W. D. Wilson, M. D. The so-called "Science of Religion" is yet in its speculative infancy, but the essays of Prof. Whitney, just mentioned, are proofs of a strong bent of speculation to that region of thought, which is still further indicated by "Oriental Religions, and their Relations to Universal Religion," by Samuel Johnson. The author reverses the tendency commonly shown to look on pagan religions as at an infinite remove downward from the Christian faith; he is so determined to be impartial that he seems to lean away from Christianity. To these we add the following titles:

Appendix to the Fifth Edition of Dana's *Mineralogy*. By George J. Brush.

How the World was Peopled. *Ethnological Lectures*. By Rev. Edward Fontaine.

The Sun, and the Phenomena of its Atmosphere. By Prof. C. A. Young, Ph. D.

About Spiritualism. By E. F. Burr, D. D.

Lectures on Mineralogy, delivered at the School of Mines, Columbia College. With 34 Lithographic Plates. By Prof. T. Eggleston.

The Physiology of Man; designed to represent the Existing State of Physiological Science, as applied to the Functions of the Human Body. By Austin Flint, M. D.

The Child, its Nature and Relations; an Elucidation of Froebel's System of Education.

On Certain New Phenomena in Chemistry. Read before the American Institute. By Verplanck Colvin.

Non-Existence of Projectile Forces in Nature. A Paper read before the American Institute. By John A. Parker.

A Paper on Botany, read as a Report before the American Institute. By Charles H. Peck, A. M.

The Evolution of Life. By Henry C. Chapman, M. D.

Geometrical Analysis. By Benjamin Hallowell.

The Problem of Life and Immortality. By Loring Moody.

Spectrum Analysis explained. By Schellen, Roscoe, Huggins, Lockyer, Young, and others.

On Nebulae, Comets, and Meteoric Showers. By Schellen and others; and Corals and Coral Islands. By J. D. Dana (in "Half-Hour Recreations in Natural Science").

The Unity of Law as exhibited in the Relations of Physical, Social, Mental, and Moral Science. By H. C. Carey.

Myths and Myth-makers. Old Tales and Superstitions interpreted by Comparative Mythology. By John Fiske.

Chemistry, Inorganic and Organic. With Experiments and a Comparison of Equivalent and Molecular Formulas; 276 Engravings on Wood. By C. L. Bloxam.

Lectures on the Nature of Spirit; and of Man as a Spiritual Being. By Chauncey Giles, Minister of the New Jerusalem Church.

HISTORY.—This department of literature, in which so abundant laurels have been won by American authors, is still cultivated with zeal and success. Prof. George W. Greene, whose memoirs of his grandfather, General Nathaniel Greene, are worthy of a distinguished place among the literary monuments of our War of Independence, has published a volume of wider scope, entitled "Historical View of the American Revolution." Mr. Richard Frothingham has made a solid contribution to our political history in his "Rise of the Republic of the United States." The initial volume of the "Rise and Fall of the Slave Power in America," by Henry Wilson (now Vice-President of the United States), relates the political and social prelude of the great internecine struggle in which the institution of slavery perished. Of the later stages of the struggle Mr. Wilson may adopt the words, "all of which I saw, and part of which I was." But, while frankly avowing his own opinions, he has written with candor and in a temperate and composed style. Another phase of the antislavery struggle is commemorated in the "History of the Underground Railroad," by William Still. The same general subject, looked at from an opposite point of view, is treated in "Seven Decades of the Union," by Henry A. Wise. A memento of the less pleasing incidents of the civil war is "Memoirs of the United States Secret Service, compiled by Permission from the Department Records," by Captain George P. Burnham. "An Account of the Battle of Bunker Hill, compiled from authentic sources: with General Burgoyne's Account of the Battle," by David Pulsifer, A. M., gathers up what is known of an affair which has been the subject of many a literary controversy. "Princeton College during the Eighteenth Century," by the Rev. Samuel Davies Alexander, though seemingly a local theme, is a work of wide general interest; the history of the college connecting itself at different points with the history of the country as well as that of the church with which the name of Princeton is identified. A new and enlarged edition, containing the author's latest additions, of "The History of Spanish Literature," by George Ticknor, is to be received, we suppose, as the final form of what has already become a monumental work. The "History of the Oriental Missions of the American Board of Commissioners for Foreign Missions," by the Rev. Rufus Anderson, D. D., LL. D., for forty years Corresponding Secretary of the Board, has the value of unimpeachable authenticity, with the charms of a lucid and graceful style. "The Life and Times of Philip Schuyler," by Benson J. Lossing, LL. D., records and vindicates the career of a man whom his country honored, but whom Mr. Bancroft has disparaged. "Journalism in the

United States, from 1690 to 1872," by Frederic Hudson, is a work of permanent value and great interest. Other works in this department we must merely record:

Ancient America, in Notes on American Archaeology. By J. D. Baldwin.

History of the Indian Tribes of Hudson River; their Origin, Manners, and Customs, Tribal and Sub-tribal Organizations, Wars, Treaties, etc., etc. By E. M. Ruttenber.

History of Annapolis and the United States Naval Academy. By Owen M. Taylor.

The Newspaper Press of Charleston, S. C. A Chronological and Biographical History, embracing a Period of One Hundred and Forty Years. By William L. King.

History of the Empire of Russia, from the Earliest Period to the Present Time. By John S. C. Abbott.

History of Christianity. By J. S. C. Abbott.

The Principles of Church History. By the Rev. Edward D. Van Antwerp, A. M.

A Church History of the First Seven Centuries, to the Close of the Sixth General Council. By Milo Mahan, D. D.

An Ecclesiastical History from the Thirteenth to the Nineteenth Century. By Clement M. Butler, D. D.

Ancient History of Universalism. By H. Ballou, D. D.

The Theory and Use of the Church Calendar in the Measurement and Distribution of Time; being an Account of the Origin and Use of the Calendar, etc. By Samuel Seabury, D. D.

The Vatican Council. By L. W. Bacon, D. D.

Sketches of the Establishment of the Church in New England. By Rev. James Fulton.

History of Methodism in Texas, Statistical, Biographical, Anecdotal. By the Rev. H. S. Thrall.

The History of St. Albans and of Sheldon, Vt. From the *Vermont Historical Gazetteer*.

History of Lexington, Ky. Its Early Annals and Recent Progress, including Biographical Sketches and Personal Reminiscences of the Pioneer Settlers, Notices of Prominent Citizens, etc. By George W. Rank.

History of Wayne County, Indiana, from its First Settlement to the Present Time, with Numerous Biographical and Family Sketches, embellished with upward of Fifty Portraits and Views of Buildings. By Andrew W. Young.

BIOGRAPHY.—Mr. Hawthorne's biography, by the expressed determination of those without whose assistance a satisfactory view of his life and personal character cannot be given, is to remain unwritten. But the "Passages from the French and Italian Note-Books" are valuable biographical *indicia*, and, in connection with previous volumes compiled from the like sources, suggest the portrait which is not to be painted. We are disposed to ask with an English journalist whether there are not many extant letters of Hawthorne, the publication of which would be as legitimate as that of his private journals, and would be, if possible, still more welcome to the multitude of his admirers. "The Life of Abraham Lincoln, being the Private and Public Life of President Lincoln, from his Birth to the Fourth of March, 1861," by Ward H. Lamson, embodies a vast amount of hitherto unpublished matter respecting the early life of its illustrious subject, and his professional and political career previous to his election to the presidency. But in

the selection of materials the author shows a strange want of consideration for the feelings of Mr. Lincoln's family, and it may be doubted whether his insight into Mr. Lincoln's character was equal to his knowledge of the facts of his life. "The Life of John J. Crittenden, with Selections from his Correspondence and Speeches," edited by his daughter, Mrs. Chapman Coleman, recalls—it is to be feared, for a short time only—the memory of a statesman and jurist who in his day deserved well of his country, but left no durable mark upon the national history. The same observation is applicable to the memoirs of a less distinguished man—the "Autobiography of Amos Kendall," whose political career was not particularly brilliant, but whose later connection with the development of the magnetic telegraph was a higher title to remembrance. It is not often that a man's life is first written two centuries after his death. But "The Life of Henry Dunster, the First President of Harvard College," by Jeremiah Chaplin, D. D., records a career and delineates a character worthy of reverent admiration, and which, for reasons apparent in the record, failed of due recognition by contemporaries. Dr. Chaplin has made a book worthy of its subject. "Incidents and Anecdotes of the Rev. Edward T. Taylor, for over Forty Years Pastor of the Seamen's Bethel, Boston," by Gilbert Haven, is an inadequate memorial of a strange pulpit genius. The inadequacy is not the writer's fault. "Father Taylor" powerfully affected not merely the perceptions and judgment, but the imagination, of those who heard him. This must be conceded, for the testimony is various and unanimous, from men whose praise is an honor, and whose penetration was not likely to be deceived. But no report of any thing he ever said produces the same effect, or any thing like it, upon the reader. His biographer tells the outward history of his life, with striking evidences of the impression he produced on others; and some of the anecdotes reveal the man, while others merely reflect his moods, pleasant or otherwise.

Lives of the Deceased Bishops of the Catholic Church in the United States. By R. H. Clark.

The Character and Career of Francis Asbury, Bishop of the Methodist Episcopal Church. By Edwin L. Jones.

Pillars in the Temple; or, Sketches of Deceased Laymen in the Methodist Episcopal Church. By Rev. W. C. Smith.

A Western Pioneer; or, Incidents of the Life and Times of the Rev. Alfred Brunson, D. D. Written by Himself.

The Life of General Grant. By J. S. C. Abbott. Keel and Saddle. A Retrospect of Forty Years in the Naval and Military Service of the United States. By Joseph W. Revere.

Forty Years' Fight with the Drink Demon. By Charles Jewett, M. D.

The Life of Horace Greeley. By James Parton. Memoir of Colonel Charles Stewart Todd. By G. W. Griffin.

Autobiography and Journal. By Rev. Heman Bangs.

Life of Ethan Allen. By Henry W. De Puy.

Walter Powell, of Melbourne and London. Merchant, Philanthropist, and Christian. By L. P. Brockett, M. D.

POETRY.—Our elder poets show no signs of frost upon their laurels. Whittier's volume, "The Pennsylvania Pilgrim, and other Poems," contains some of the choicest work he has wrought. The principal poem has not the charm of "moving incident," but the sketches of character and of scenery are drawn with masterly skill, and the whole is suffused in softened light and an atmosphere of soothing calm. Some of the minor pieces are among his most striking compositions. The completion of Bryant's version of the *Odyssey* adds another to the undying treasures of English verse. And Longfellow's "Three Books of Song" has given pleasure to a multitude of admirers on two continents. Nor have our younger poets been idle. Bayard Taylor, in his "Masque of the Gods," evinced a high degree of imaginative power and command of the resources of poetic art, with a daring which in some passages jars upon a not over-scrupulous religious reverence. J. G. Holland is conquering for himself an honorable recognition among our poets. His immense popularity has made him the laureate of the sovereign people. The verdict of the many finds now an echo in the "fit audience, though few," by whom criticism is dispensed. "The Marble Prophecy, and Other Poems"—particularly some of the "other poems"—have met with a generous appreciation. Our sturdy satirist, J. G. Saxe, whose robust verse fitly expresses both his "sound roundabout sense" and a playful fancy, gives us "Fables and Legends of Many Countries, rendered in Rhyme." That unique genius, Mrs. A. D. T. Whitney, a writer combining quaint fancy, unexpectedness of thought, and a faint tinge of mysticism that reminds us sometimes of Hawthorne in his lighter moods, puts forth a volume of poems under the odd title "*Pansies* . . . for Thoughts." Some of her pieces are so slight as to be unsubstantial, and some are obscure, and when unriddled yield a meaning that hardly compensates for the trouble. But most are of such merit as will add to her already enviable reputation. Mr. C. G. Leland, after his success in dialect, returns to the vernacular in a volume entitled "The Music Lesson of Confucius, and Other Poems." A new venture in literature, "Out of Door Rhymes," by Eliza Sproat Turner, might be called a book of high promise, if the rare finish of some of the pieces did not suggest rather an ample fulfilment of promise. Another name, new in poetic authorship, is Mr. Charles Frederick Johnson, who appears as translator of Lucretius into English verse. He shows a degree of skill in the management of blank verse—with occasional marks of carelessness or of capricious license—to raise a question whether there is not here an augury of success in original composition. "Mireio, a Provençal Poem,"

by Frédéric Mistral, translated by Harriet W. Preston, introduces to us a very pleasing poem, and at the same time to a writer of musical English verse. But the most noteworthy publication of the year, judging by the impression it produced on critical opinions, was "The Book, and Other Poems," by William B. Wright. It seems the unsealing of a new fountain of poetic inspiration. The following have also appeared:

Poems; to which is appended the *Antigone* of Sophocles, literally translated. By J. G. Brinklé.
 Dream Life, and Other Poems. By Stockton Bates.
 Songs of Early and Later Years. By Mrs. M. J. E. Crawford.
 Poems. By Amanda M. Edmonds.
 Legends and Lyrics. By Paul H. Hayne.
 Poems. By S. Z. Shores.
 Idylls of Gettysburg. By Miss E. Latimer.
 Robert of Woodleigh, and Other Poems. By Philip Stoner.
 My Recreations. By Emily E. Ford.
 Imogen, and Other Poems.
 Broken Dreams: a Novel in Verse. By Celia Gardner.
 Riego; or, The Spanish Martyr. A Tragedy. By Judge John Robinson.
 The Outcast, and Other Poems. By J. Watson.
 Vesta (and Other Poems). By Hester A. Benedict.
 Rhymes of Yankee Land. By Aella Greene.
 Poems. By Mary E. Pope.
 The Village Picnic, and Other Poems. By Thomas Durfee.
 Rymes atween Times. By Thomas Mackellar.
 The Architect of Cologne, and Other Poems. By Mary A. Atkinson.

ESSAYS AND CRITICISM.—The Rev. Henry N. Hudson, whose edition of Shakespeare's works has been received with high appreciation both in this country and in England, has recast his "Lectures on Shakespeare," published in 1847, making virtually a new book, under the title "Shakespeare: His Life, Art, and Characters." The proof of much study, of ripe thought, of patient labor, of insight into the meaning and spirit of his author, that has become like a sure instinct, appears on every page. The style is more chastened than that of his earlier work, as well as richer in substance and in the variety of pertinent illustration from the wide field of literature. Mr. Hudson has also published a selection from the plays of Shakespeare, edited, slightly expurgated, and annotated, for schools and families. "Goethe: His Life and Works," by G. H. Calvert, as a biography, shows too great a readiness to condone its hero's faults, but, as a criticism, deserves the praise it has had awarded to it. Mr. A. Bronson Alcott, whose fame, as one of the original "Transcendentalists" of New England and a conversational oracle, has been widely bruited, converses with the public in a volume which is in form made up of a diary and other essays, but, in outward incident, or, rather, in the lack of it, one day is so much like another that one discovers no special significance in the dates. The essays are serious, bookish, meditative, rather than reflective, and express moods rather than any distinct purposes. The absence of humor and of practical suggestive-

ness makes the author's utterance somewhat unimpressive. A volume, coming from a like social seclusion, but representing a vigorous out-of-doors life, is Mr. Wilson Flagg's "Woods and By-ways of New England." The traits of that rural life which, in this emigrating and manufacturing era, is becoming a thing of the past, are delineated by Mr. Flagg with hearty appreciation, while his intimate familiarity with the habits of the forest-trees on the North Atlantic slope gives truth and picturesqueness to his descriptions, and adds force to his plea for the preservation of forests from wanton destruction. Mr. Charles Dudley Warner, who was felicitously introduced to the public by "My Summer in a Garden," meets with a warm welcome when coming to us with a volume of "Backlog Studies." Fireside literature in our language is abundant, and seems to show no signs of decay. Mr. Warner's "Studies" are full of witty suggestion and humorous surprises, on a solid substratum of shrewd common-sense. "The Poets and Poetry of America," by the late Rev. R. W. Griswold, when it first appeared, stood comparatively alone among such compilations for extent of research and liberality of inclusiveness, perhaps erring, as the amiable editor was inclined to err, in the tendency to a too favorable estimate of the merits of contemporary writers. It has not been superseded, and now, revised and brought down to the present time by R. H. Stoddard, it is given a new lease of life. "Essays and Sketches," by the late George B. Woods, is one of those collections which add to their intrinsic merits the pathos of regret for what seems the premature close of a promising career. The same remark applies to the vivacious essays of the just-departed Mrs. Parton, collected under the title, "Caper-Sauce, by Fanny Fern." The "Pennsylvania Dutch" and their curious manners are embalmed in an entertaining volume, with the title above cited, which opens to the general reader a peculiar and primitive state of society. A work of similar character, but having reference to a state of things that has passed away, is "Black Robes; or, Sketches of Ministers and Missionaries in the Wilderness and on the Border"—or what was the border, Western Pennsylvania—by Robert P. Nevin. It is readily done, though not without some traces of theological antipathy. "The Olden Time in New York," by the Rt. Rev. W. Ingraham Kip, draws a pleasing picture of society and manners in the metropolis before the levelling influence of trade and politics had swept away the ancient aristocracy. "Yesterdays with Authors," by James T. Fields, relates, with a little pardonable complacency and in a manner to keep himself on the best terms with his readers, incidents of his personal relations, as a publisher, with Dickens, Thackeray, Hawthorne, Miss Mitford, and other eminent writers, and transcribes numerous letters received from them, not elsewhere published.

THEOLOGY AND RELIGION.—In number, and

perhaps in extent of circulation, this class of publications ranks any other, and includes some that are worthy of particular reference. "Humanity Immortal, or, Man Tried, Fallen, and Redeemed," by Laurens P. Hickok, D. D., might, perhaps, have been, with equal propriety, included under the head of philosophy; for Dr. Hickok's plane of thought, whatever his theme, is always on the high level and in the serene atmosphere of philosophic reasoning. He may fail of the reader's assent, and sometimes of his full apprehension, but never of his profound respect and admiration. The Rev. Dr. Thomas J. Conant has added to the series of biblical works for which the religious world is his debtor, "The Book of Proverbs: The Common English Version revised, with Introduction and Copious Notes." It is a monument of sound, varied, and well-digested learning, employed to aid the popular knowledge of the Scriptures. "Sermons on Living Subjects," by Dr. Horace Bushnell, is a title that might be applied to any volume of discourses by that eminent preacher, though, perhaps, more especially appropriate to this. The strong and rich thought has usually an equally forcible and racy expression, though now and then his "felicity" of language is over "curious." Dr. Charles Hodge has completed his "Systematic Theology," perhaps the ablest modern statement and defence of confessional Calvinism. The Rev. Henry Ward Beecher has struck a new vein by his "Yale Lectures on Preaching." Those who most incline to criticise his style of pulpit discourse agree to commend his exposition of the theory of preaching. The publication of the seventh series of his reported sermons shows his undiminished hold upon the public mind. Dr. Henry Cowles, author of several commentaries that have been well received, publishes a work on "The Psalms," upon the same general plan. "In Christ, or The Believer's Union with his Lord," by the Rev. A. J. Gordon, has met with a cordial reception as an admirable work of devout meditation. "The Fourth Gospel, the Heart of Christ," by the Rev. Edmund H. Sears, is at once a critical vindication of St. John's Gospel, and an exposition of its Christology, not technically "orthodox" in its definitions, but profoundly spiritual in its tone of thought. "Radical Problems," by Cyrus A. Bartol, D. D., is at the opposite pole of thought, regarding the most elementary doctrines of Christianity as problematical. The style is brilliant, but rather aphoristic than consecutive or logical. "Christianity and Modern Thought" is the collective title of a series of discourses and essays by eminent Unitarians, having for their common object the reconciliation of the scientific and speculative tendencies of the time with religion. "The Genuineness and Authenticity of the Gospels," by B. A. Hinsdale, A. M., presents a popular view of the critical evidence for the credibility of the Gospels, as against current objections, which,

with their grounds, are very candidly stated and ably dealt with. "The Resurrection: Sermons by the Rev. Eliphalet Nott, D. D., LL. D." sets forth the evidence for that cardinal doctrine of Christianity, in the fashion of eloquence, now obsolete, of which President Nott was so great a master. Prof. Tayler Lewis, LL. D., contributes an introduction, arguing with much force the sufficiency and the present availability of the "evidences of Christianity," as presented by the apologists of the last century. "The Seal of Heaven," by the Rev. J. B. Jeter, D. D., exhibits what is termed the experimental evidence for the truth of Christianity. "Sacred Geography and Antiquities," by E. P. Barrows, D. D., is a popular manual prepared by a scholar whose name is a voucher for the fulness and exactness of the information communicated. Lange's voluminous commentary on the Bible, as translated and edited by Dr. Schaff and his large corps of coadjutors, makes steady progress: volumes on the Psalms and on the books of the Kings have been added, and have met with a warm approval.

From the mass of religious books we select the following titles:

The Philosophy of God and the World. By Thomas Mitchell.

The Holy Spirit's Work. By Rev. G. Draper.

The Christian Marriage Ceremony; its History, Significance and Curiosities, etc. By J. Foote Birmingham, D. D.

Day unto Day [daily texts, meditation, etc., for a year].

The Golden Rule; or The Book for All. By a Member of a Religious Order.

The Council of the Vatican and the Events of the Time. By Thomas Canon Pope.

The Young Ruler who had Great Possessions; and Other Discourses, chiefly Practical. By J. A. Spencer, S. T. D.

Thought Hives. By T. L. Cuyler, D. D.

The New View of Hell. Showing its Nature, Whereabouts, Duration, and how to escape it. By B. F. Barrett.

Heart Life. By Rev. T. L. Cuyler, D. D.

The Healthy Christian. By Howard Crosby, D. D., LL. D.

Facts in Aid of Faith. By Rev. E. F. Burr, D. D.

The Christian Use of Money. By J. G. Wyckoff, Esq.

Modern Skepticism. By Mark Hopkins, D. D., LL. D.

The Abominations of Modern Society. By Rev. T. De Witt Talmage.

Light on the Pathway of Holiness. By Rev. L. D. McCabe, D. D.

The Faith of Abraham and of Christ. By Henry Dana Ward.

Via Crucis Via Lucis. Forty-six Meditations for Every Day in Lent. Translated from the German of Rev. Dr. John Emanuel Verth, by Rev. Theodor Noethen, D. D.

Unity in Variety. A Series of Arguments, based on the Divine Workmanship in our Planet, the Constitution of the Human Mind, and the Inspired History of Religion. By George Warburton Weldon.

Moses and Modern Science. By Rev. George S. Weaver.

Agreement of Science and Revelation. By Rev. Joseph H. Wythe, M. D.

Lectures on the Church. By Rev. D. W. Merriick.

Walking with God: the Life Hid with Christ in God. By the Rev. S. I. Prime, D. D.

A Rosary for Lent; or, Devotional Readings, Original and Compiled, by the author of "Butledge," **Helps to a Holy Lent.** By the Right Rev. F. D. Huntington, D. D.

The Social Evil. By the Right Rev. F. D. Huntington, D. D.

The Liquefaction of the Blood of St. Januarius at Naples. An Historical and Critical Examination of the Miracle.

Gladness in Jesus. By Rev. W. E. Boardman.

The Papal System. By Rev. William Cathcart.

Immortality of the Soul, and Destiny of the Wicked. By N. L. Rice, D. D.

Christ Liveth in Me. By N. L. Rice, D. D.

Hebrew Men and Times. From the Patriarchs to the Messiah. By Joseph Henry Allen. New edition, enlarged.

A Treatise on Early Confirmation and Communion. By Rev. S. M. Haskins, D. D.

Jesus. By Rev. Charles F. Deems.

The Ritual Law of the Church, with its Application to the Baptismal Offices. By Murray Hoffmann.

Park Street Pulpit. Second Series. Containing **Twenty Sermons.** By the Rev. W. H. H. Murray.

The Great Revival of 1800. By the Rev. W. Speer, D. D.

Woman in the Bible. By Aaron Williams, D. D.

The Scripture Doctrine in reference to the Seat of Sin in the Regenerate Man. By P. J. Easton.

Self-Will and Repentance. By Franz Hoffmann. Translated by C. A. Small, D. D.

The Annihilation of the Wicked Scripturally considered. By the Rev. W. McDonald.

Sunday-School Institutes and Normal Classes. By J. H. Vincent, D. D. With an Introduction by Rev. Alfred Taylor.

The Church School and its Officers. By J. H. Vincent, D. D.

Women Helpers in the Church. Their Sayings and Doings. By William Welsh.

The House of God; or, Claims of Public Worship, with Designs and Estimates of Church Buildings. By W. W. Everts, D. D.

Among the Lilies and Elsewhere, with Jesus. By C. A. Smith, D. D.

The Captive Orphan: Esther, the Queen of Persia. By the Rev. Stephen H. Tyng, D. D.

Wesley and Swedenborg. A Fraternal Appeal to Methodist Ministers. By E. R. Keyes.

The Order and Ceremonial of the Most Holy and Adorable Sacrifice of the Mass, explained in a Dialogue between a Priest and a Catechumen. By Frederiek Oakely.

Copy. Essays from an Editor's Drawer on Religion, Literature, and Life. By Hugh Miller Thompson, D. D.

The Foreign Missionary, his Field and his Work. By the Rev. M. J. Knowlton, D. D.

Itinerant Preaching in the Early Days of Methodism. By T. W. Tucker.

God-Man: Search and Manifestation. By L. T. Townsend.

The Object of Christian Worship. By the Rev. Rufus Ellis.

Sermons for the Times. By the Rev. D. A. Merriick.

Christ in the Soul. By Thomas C. Upham.

The Two Estates. That of Wedded in the Lord, and that of the Single for the Kingdom of Heaven's Sake. By the Rev. Morgan Dix, S. T. D.

Studies in the Church; being Letters to an Old-fashioned Layman. By H. C. Lay, D. D., LL. D.

Sermons delivered in the Brooklyn Tabernacle. By T. De Witt Talmage.

The Wandering Jew. A Statement to a Christian Audience of the Jewish View of Judaism. By Rabbi B. Felsenthal.

The Witch of Endor and Modern Spiritualism. By George C. Baldwin, D. D.

Life in the Exode. By Rev. A. D. Pollock.

The Promises of God: their Nature and Properties, Variety and Value. By W. S. Plumer, D. D.

The Spoken Word; or, the Art of Extemporary Preaching. By the Rev. Thomas J. Potter.

The Book of the Holy Rosary; a Full, Popular, Doctrinal Exposition of its Fifteen Mysteries, and of their Corresponding Types in the Old Testament. By the Rev. H. Formby. Illustrated.

Guide to a Devout Life. By G. H. Wilkinson. With Introductory Note by Bishop Huntington.

Present Issues; or, Facts observable in the Consciousness of the Age. By the Rev. Robert Withers Memminger.

Talks to Bereans. By Rev. Isaac Errett.

Dr. Oldham at Greystones, and His Talk There. [By C. S. Henry, D. D.]

Sermons. By Rev. C. D. H. Campbell, D. D.

A Concise Dictionary of the Bible. Preface by the Rev. G. T. Day, D. D. Supplemented by Rev. H. Lincoln, D. D.

Outlines of Christian Evidences. By Joseph Alden, D. D., LL. D.

Fifteen Years of Prayer. By S. I. Prime, D. D.

Life Lessons on the Book of Proverbs. By the Rev. W. S. Perry.

Letters on the Future Life. Addressed to Henry Ward Beecher. By B. F. Barrett.

The City of God and the Church-Makers. An Examination of Structural Christianity, and Criticism of Christian Scribes and Doctors of the Law. By Richard Abbey, D. D.

The Doctrine of the Lord's Supper, as set forth in the Book of Concord, Critically examined, and its Fallacy demonstrated. By the Rev. J. B. Gross.

Light on the Last Things. By William H. Hayden.

Presbyterianism Three Hundred Years ago. By Rev. Wm. P. Breed, D. D.

Autobiography and Journal. By Rev. Heman Bangs.

The Revision of the English Version of the New Testament. [Reprint of Treatises by Archbishop Trench, Bishop Eliott, and Prof. Lightfoot.] With an Introduction by the Rev. Philip Schaff, D. D.

Hand-Book on Teaching. [For Sunday-Schools.] By Joseph Alden, D. D.

From Atheism to Christianity. By Rev. G. P. Porter.

Love Revealed. By Rev. Geo. Bowen, Bombay.

The Religion of Humanity. By O. B. Frothingham.

Ecclesiastical Polity: the Government and Communion practised by the Congregational Churches in the United States of America.

The Perfect Life. In Twelve Discourses, by William Ellery Channing. Edited by William H. Channing.

GEOGRAPHY, TRAVEL, AND ADVENTURE.—

This is a department of literature which in our time and land is not likely to be neglected.

Three volumes, of more than ordinary merit, conduct the reader on the voyage around the world—the establishing of regular routes of travel across the Pacific, in connection with that of railway communication across the continent, having made this almost as easy of accomplishment as an Atlantic voyage was, forty years ago. "A Voyage Around the World," by N. Adams, D. D., is a slight sketch, but indicating intelligent observation, and executed throughout with such grace of style and suggestive thoughtfulness as to win steadily upon the reader's attention. "Around the World: Sketches of Travel through Many Lands and over Many Seas," by E. D. G. Prime, D. D.,

describes wider and more detailed observations, narrated in a lively style, and marked by good sense and good feeling. But, the most remarkable work, describing a circumnavigation of the earth, is, the Honorable William H. Seward's "Travels around the World," edited by Olive Risley Seward. Mr. Seward's eminence as the most prominent American statesman then living procured him opportunities for observation such as no ordinary traveller could expect. The account of what he saw and heard, as well as of what he said in the interviews he held with distinguished people, is highly interesting and characteristic of the man. His patriotism and his philanthropy—his strong, undissembled Americanism, not excluding a cosmical breadth of sympathy—his sensitiveness to the "report of wrong," and his sanguine optimism—appear by turns without giving the reader any sense of inconsistency. The volume is beautifully printed and illustrated by two hundred engravings and cuts. Still another circumnavigating experience of a more rapid character is reported in "A Seven Months' Run Up and Down and Around the World," by James Brooks. Yet, rapid as was the "run," and hasty the sketches Mr. Brooks made for his journal, and collected in his book, his experience as a journalist secured his work, in good part, from the disadvantages naturally attendant upon improvisation. He is well trained to quick and accurate perception, and to an intuitive grasp of the salient points of a topic. With undeniable traces of the effect of "easy writing," the book on the whole is creditable to the author. "California, for Health, Pleasure, and Residence," by Charles Nordhoff; also, a collection mainly of articles written for periodicals and newspapers, by its clear and fluent style, its careful selection of interesting facts, the fulness of practical information, answering just the questions that almost everybody would ask who had any idea of undertaking the trip to the Pacific, won a welcome from both the critical and uncritical public. "Mountaineering in the Sierra Madre," by Clarence King, is admirable for its traits of description and adventure—its pictures both of Nature and of human nature. The same may be said of "The Land of Desolation; being a Personal Narrative of Observation and Adventure in Greenland," by Isaac J. Hayes, M. D. "Saunterings," by Charles Dudley Warner, is avowedly a book to entertain, not to instruct, and what can be more entertaining than the wit and humor, the alternately bold and sly utterance of Mr. Warner? "The Oregon Trail," by Francis Parkman, is the republication of a work nearly thirty years old; a faithful delineation of what the Oregon trail was, when as yet California was Mexican territory, and Oregon disputed territory. It is worth reading, for its contrast with the scenes of to-day. "Wonders of the Yellowstone," by James Richardson, a compilation, reveals the striking features of a region just beginning to be known

by searchers after the picturesque, and which will reward the search. "The Greeks of To-Day," by O. K. Tuckerman, an ardent "Philhellenist," tells, no doubt, much unfamiliar truth about a people against whom, unfortunately, prejudices exist; but friendly prejudice, though much more tolerable than unfriendly, equally unfits for impartial statement, and our sympathy for the author does not dispense with the need of vigilance in regarding his statements. "An American Girl Abroad," by Adeline Trafton, has all the sparkle, and more of the clear sense than we should naturally look for under the title: "My Last Cruise; where we Went, and What we Saw," an account of visits to the Malay and Loo-Choo Islands, the coasts of China, Formosa, Japan, Kamtschatka, Siberia, and the mouth of the Amoor River, by A. W. Habersham, U. S. N., has the merit of intelligent observation and a graphic style. A monument of remarkable enterprise, and a more than ordinarily meritorious literary record of it, is "How I found Livingstone: Travels, Adventures, and Discoveries in Central Africa," by Henry M. Stanley. There are also to be noted:

The Land of the Veda; being Personal Reminiscences of India, its People, Religion, Mythology, etc., with Incidents of the Great Sepoy Rebellion. By Rev. William Allen Butler, D. D.

Ten Months in Brazil. With Notes on the Paraguayan War. By John Cadman.

Arabia. Compiled by Bayard Taylor.

South Africa. Compiled by the same.

At Home and Abroad. By John P. Kennedy.

A Woman's Experiences in Europe, including England, France, Germany, and Italy. By Mrs. E. D. Wallace.

Six Weeks Abroad, in England, Ireland, and Belgium. By the Rev. George Foxcroft Haskins.

The Wonders of the Yosemite Valley of California. Illustrated with Original Photographs. By Samuel Kneeland. New and enlarged edition.

A Satchel Guide for Vacation Tourists in Europe.

The Diamond-Fields of South Africa.

Diary of a Spring Holiday in Cuba. By R. J. Lewis, M. D.

Over the Plains, and on the Mountains—Kansas and Colorado. By J. H. Tice.

A Journey to Egypt and the Holy Land in 1869-'70. By Henry M. Harman, D. D., Professor of Ancient Languages in Dickinson College, Pa.

Remarkable Voyages; or, Man upon the Sea. By Frank B. Goodrich.

Wild Oats Sown Abroad; or, on and Off Soundings. By Theodore B. Wittmer.

FICTION.—The chief reliance of readers for prose fiction of a high order continues to be on the reprint of English novels. Of the highest quality of invention there has been no example, unless in the unfinished story left by Hawthorne, "Septimius Felton," a study rather than a work; more valuable for its suggestions to the literary artist than adapted to the taste of the novel-reader. It is the plan only that is imperfect—the style has all the purity, the grace, and the subtle suggestiveness found in the composition of the author's most highly-finished productions. Perhaps there should be mentioned in this

category "Never Again," the tale with which Dr. Mayo, author of "Kaloolah," has surprised the public after so long a silence. It is certainly a work of more than ordinary merit, especially in its characters. "A Good Investment: a Story of the Upper Ohio," by William Flagg, is a vivid picture of the manners and characters not long since to be found in the region named. "Romance of the Harem," by Mrs. Leonowens, purports to be derived from authentic sources, and to be credible fact rather than admirable fiction; some portion of it is obviously historical. But it will not, we trust, be regarded as an imputation of bad faith if we assume that some of the stories received a little Oriental embellishment in being told to her, as they certainly are indebted to her for the grace with which the incidents are narrated to us. Literary partnerships of two persons—as Beaumont and Fletcher, or the French novelists, Ercmann and Chatrion—have not been uncommon. But the combination of six persons to write one story was unprecedented; and though it was a strong partnership which included Mrs. H. B. Stowe, Mrs. A. D. T. Whitney, Miss Lucretia Hale, the Rev. Edward Everett Hale, and Mr. F. B. Perkins—the sixth was the lamented and promising writer, Mr. F. W. Loring—we think most readers of "Six of One by Half a Dozen of the Other" will agree that almost any one of them working alone would have made a better book. The story never flags, but the several parts of the story do not dovetail together smoothly. Mr. Hale, the head of this happy family, excels in the production of short stories, written with a Defoe-like, matter-of-fact humor, that makes the wildest fancies seem like sober realities. A collection of these, entitled "His Level Best, and Other Stories," will hold no inferior place among recent humorous productions. Similar praise is deserved by "Coupon Bonds, and Other Stories," by J. T. Trowbridge, whose skill in devising ludicrous situations is matched by the genuineness of his characters as representatives of the genus American, species Yankee. A religious tale superior to most of its class, as pleasant as it is truthful, is "Laicus, or, The Experiences of a Layman in a Country Parish," by Lyman Abbott.

Our stores of fiction are enriched by translations from Continental writers. The most distinguished of them, lately introduced to us, is Turgenev, the Russian novelist, three of whose works, "Smoke," "Liza," and "On the Eve," have been translated, and others are in course of publication; they are warmly appreciated. The Swedish tales of Marie Sophie Schwartz and August Blanche, and those of the French author Cherbuliez, have met with a reception that must gratify their translators. At the same time, the reissue of the novels of such a veteran in our literature as Cooper shows a healthy taste for the olden simplicity.

Some of the works whose titles follow are

of considerable merit, and some have had a popularity which, if not deserved, is at least significant:

Mabel Lee. A Novel. By the author of Valerie Aylmer.

Kate Beaumont. By J. W. De Forest.
The End of the World. By Edward Eggleston.
The Thief in the Night. By Harriet Prescott Spofford.

Beauty and the Beast, and Other Novelettes. By Bayard Taylor.

Dr. Vandyke. A Novel. By John Esten Cooke.
The Reigning Belle. By Mrs. Ann S. Stephens.
Aytoun. A Romance.

True as Steel. A Novel. By Marion Harland.
The American Baron. By James De Mille.
Lucia: Her Problem. By Amanda A. Douglas.
Love in High Life. By T. S. Arthur.

The following list of tales and translations is not exhaustive, but probably leaves few unmentioned that have any representative value:

Athalie, or, A Southern Villegiature. A Winter's Tale. By Filia.

How will it End? A Romance. By J. C. Heywood.

Myself. A Romance of New England Life.
Mystery of Orcival. Translated from the French, by G. M. Towle.

A Leaf in the Storm, and Other Novelettes. By "Ouida."

Dead Men's Shoes. A Novel. By J. R. Halde-
man.

Fifty Years Ago. A Story of New England Life.
By Mrs. C. A. Willard.

Wanted—A Pedigree. By Martha Finlay.

Five Hundred Majority; or, The Days of Tammany. A Political Romance. By Wyllis Niles.

The Merchant of Antwerp. A Tale, by Hendrick Conscience. Translated by R. Lyle.

The Story of a Shower. By Anna H. Drury.

The Cancelled Will. By Miss Eliza A. Dupuy.

Who shall be Victor? A Sequel to "The Cancelled Will." By the same.

Beverly, or, The White Mask. A Novel. By Mansfield Tracy Walworth.

It is the Fashion. A Novel. From the German of Adelheid von Auer, by Mrs. A. L. Wiatar.

The House of Yorke. A story of American Life.
Alban; or, The History of a Young Puritan. By J. V. Huntington.

Edna Browning; or, The Leighton Homestead.
By Mary J. Holmes.

Minna Monté. A Novel. By Stella.

Château Morville. From the French, by E. R.

Eleonore. A Novel. By E. Rothenfels. From the German, by Frances Elizabeth Bennett.

Three Generations. A Novel. By Miss Sarah A. Emery. Illustrated by Miss L. B. Humphrey.

Going Home. A Catholic Novel. By Eliza Martin.

By His Own Might. From the German of N. von Hillern.

Thrown Together. By the author of "Misunderstood."

Fitz Hugh St. Clair; or, It is no Crime to be Born a Gentleman. By Mrs. Sallie F. Chapin.

Not Pretty but Precious; and other Short Stories.
By John Hay, Clara F. Guernsey, Margaret Hosmer, Harriet Prescott Spofford, Lucy Hamilton Hooper, etc.

Under the Cedars; or, What the Years Brought.
By Miss A. J. Hatch.

Myrrha Lake; or, Into the Light of Catholicity.
By Minnie Mary Lee.

At the Altar. A Romance. From the German of E. Werner. By J. L. L.

Hope Deferred. By Eliza F. Pollard.
Victor Norman, Rector. By Mary A. Denison.

POLITICS AND SOCIOLOGY.—The political publications of the year were mostly of party and transient interest. Of more permanent value, or, at least, having regard to more permanent interests, are, "The Dangerous Classes of New York, and Twenty Years' Work among Them," by C. L. Brace, and "The Nether Side of New York," by Edward Crapsey. Quite descriptive and suggestive is the title, "The Recent Financial, Industrial, and Commercial Experiences of the United States; a Curious Chapter in Politico-Economical History," by D. A. Wells. A subject that is undoubtedly destined to draw to itself an increasing measure of popular interest is treated in "Minority or Proportional Representation; its Nature, Aims, History, Processes, and Practical Operation," by Salom Dutcher. The protective system is zealously defended in "The American System: Speeches on the Tariff Question and Internal Improvements," by Andrew Stewart, late M. C. from Pennsylvania. The copyright question is discussed adversely to any international arrangement in "The International Copyright Question considered with Special Reference to the Interests of American Authors, American Printers and Publishers, and American Readers," by Henry C. Carey. The rights of authors do not weigh heavily in this scale of considerations. A related subject is dealt with in "The Duty on Books: Argument in behalf of the Book-Trade of Philadelphia, before the Finance Committee of the Senate." We find also the following:

The Duty on Coal. By Israel W. Morris.
How to Pay Off the National Debt. By Duff Green.

The Labor Question. Thoughts on Paper Currency and Lending on Interest, as affecting the Prosperity of Labor, Commerce, and Manufactures. By W. Brown.

The Constitution of the United States, with a Complete Index; and Washington's Farewell Address; to which are appended the exceedingly interesting 115 Items and Paragraphs in Washington's Original Manuscript, that he afterward either omitted or amended. By Joseph Bullett Burleigh, LL. D.

Paper Money the Root of Evil. An Examination of the Currency of the United States, with Practical Suggestions for Restoring Specie Payments without Bobbing Debtors. By Charles A. Maun.

Dream of a Free-Trade Paradise, and Other Sketches. By Cyrus Elder.

Review of Stephens's "War between the States." By a Constitutionalist.

The Black Man at the South, and the Rebels. By Charles Stearns.

A Handbook of Politics for 1872; being a Record of Political Action, National and State, from July 15, 1870, to July 15, 1872. By Hon. Edward McPherson.

The Issues of American Politics. By Orrin Skinner, of the New York Bar.

THE USEFUL ARTS.—Under this head is included a large variety of publications, in which the practical habit of our countrymen is expressed—not excluding the ornamental arts, and the destructive art of war:

Mines, Mills, and Furnaces of the Pacific States

and Territories. By R. W. Raymond, U. S. Mining Commissioner.

Treatise on Acoustics, in Connection with Ventilation. By Alexander Saeltzer, Architect.

The Metric System of Weights and Measures. By Frederick A. P. Barnard.

The Elements of Agriculture. A Book for Young Farmers. By George E. Waring, Jr.

Manual of Qualitative and Quantitative Analysis with the Blowpipe. From the last German edition, revised and enlarged, by W. Richter. Translated by Henry B. Cornwall, E. M., and John H. Caswell, A. M.

The Civil Engineer's Pocket-Book of Mensuration, Trigonometry, Surveying, Hydraulics, Hydrostatics, Instruments, and their Adjustment, etc. By John C. Trautwine.

Practical Treatise on Limes, Hydraulic Cements, Mortar, etc. Fourth edition. By Q. A. Gillmore.

Pottery: Observations on the Materials and Manufacture of Terra-Cotta, Stone-Ware, Fire-Brick, Earthen-ware, etc. By Arthur Beckwith.

Church Architecture. By H. Hudson Holley.

The Kedge-Anchor; or, Young Sailor's Assistant.

Practical Dairy Husbandry. By X. Willard, A. M.

The American Stud Book. By S. D. Bruce.

Tachyhippodamia; or, The Art of Taming Horses.

By Willis J. Powell.

Practical Rules in Music, with Tabular Illustrations. By John P. Marsh.

Piano Text-Book; containing a Complete System of Musical Notation, together with Rules for Fingering the Scales, Practical Hints to the Pupil, etc. By Addison P. Wyman.

The Manufacture of Steel. By Prof. M. L. Gruner.

From the French. By Lenox Smith, A. M., E. M.

The Complete Phonograph. By Jas. E. Munson.

A Dictionary of Words and Phrases used in Commerce. By Thomas McElrath.

The Origin and Antiquity of Engraving; with some Remarks on the Utility and Pleasures of Prints. By W. S. B.

What to Do, and Why, and How to Educate Each Man for his Proper Work, describing Seventy-five Trades and Professions, and the Talents and Temperaments required for Each. By Nelson Sizer.

Notes on the Bastion System of Fortification; its Defects and their Remedies. By E. S. Holden, E. S.

Annual Record of Science and Industry. Edited, with the Assistance of Eminent Men of Science, by Spencer F. Baird.

Farm-Gardening and Seed-Growing. By Francis Brill.

A Treatise on Diseases incident to the Horse. By Alexander Dunbar.

Hints to Army Officers on the Care of Troops. By Benjamin Rush, M. D. First published in 1777.

A Manual of Guard-Mounting, and Duties of Sentinels.

Easy Rules for the Measurement of Earthworks by Means of the Prismoidal Formula, with an Extensive Table for finding the Solidity in Cubic Yards, from Mean Areas. By Morris Elwood.

The Art of Graining; How Acquired, and How Produced; with Description of Colors and their Application. Illustrated with 42 colored Plates on Stone. By Charles A. Pickett and A. Metcalf.

The Immigrant Builder; or, Practical Hints for Handy Men; showing clearly how to construct Dwellings in the Bush, on the Prairies, or elsewhere, cheaply and well, with Wood, Earth, or Gravel. Copiously illustrated. By C. P. Dwyer, Architect.

Window Gardening. Devoted specially to the Culture of Flowers and Ornamental Plants for Indoor Use and Parlor Decoration. By Henry T. Williams.

The Fruit and Fruit-Trees of America. Second Revision and Correction, with Large Additions, and an Appendix for 1872, containing Many New Varieties.

The New Poultry-Book. A Practical Treatise on

Selecting, Housing, and Breeding Domestic Fowls, and Raising Poultry and Eggs for Market. By George P. Burnham. New edition.

The Apple-dore Cook-Book; containing Practical Recipes for Plain and Rich Cooking.

The Model Potato. An Exposition of its Proper Cultivation; the Causes of its Disease, or Rotting; the Remedy therefor; its Renewal, Preservation, Productiveness, and Cooking. By John McLaurin, M. D. Edited, with Annotations, by R. T. Trall, M. D.

A Pocket Dictionary of Technical Terms used in Arts and Manufactures, with the Addition of Commercial Terms. By Rumph, Mothes & Unverzagt.

A Private Book of Useful Alloys, and Memoranda for Goldsmiths, Jewellers, etc. By J. E. Collins.

Healthy Houses. A Hand-Book to the History, Defects, and Remedies of Drainage, Ventilation, Warming, and Kindred Subjects. With Estimates for the Best Systems in Use, and upward of Three Hundred Illustrations. By William Eassie, C. E.

The School of Chemical Manures; or, Elementary Ideas on the Use of Fertilizing Agents. From the French of Ville. By A. A. Ferquet.

Galvanoplastic Manipulations. A Practical Guide for the Gold and Silver Electrotyper and Galvanoplastic Operator. From the French of Alfred Rosseleur. By A. A. Ferquet.

What I Know about Cooking. By S. Annie Frost.

The Jersey, Alderney, and Guernsey Cow.

Hints on Dress. By an American Woman.

The Trotting-Horse of America. By Hiram Woodruff.

The Practical Carpenter and Joiner. Containing 34 Plates, nine of which are Card-board mounted on Linen, showing Actual Construction, which can be understood by any one. By Robert Riddell.

Every-Day Cookery; containing One Thousand Eight Hundred and Fifty Distinct Receipts. Compiled and edited by Mary Jewry.

Handbook of the Toilet in Ancient and Modern Times. By Arnold J. Cooley.

House-Building. By C. J. Richardson.

The Window Gardener. By Edward L. Rand, Jr.

Flowers for the Parlor and Garden. By the same.

How to Paint. By F. B. Gardner.

Taxidermist's Manual.

The Horse-Owner's Companion; or, Hints on the Selection, Purchase, and General Management of the Horse.

Treatment of the Horse. By Charles Wharton.

The Banjo, and How to Play it. By Frank Converse.

TEXT-BOOKS.—It were a useless task to attempt to chronicle the endless series of new school-books, of which so many are but the working over of the common stock of materials, with some questionable novelties to make a factitious distinction from the old. But it is undeniable that, with the necessity which the progress of science imposes, of recasting elementary books, together with the rising standard of educational efficiency, there is a perceptible improvement in the manuals for the classroom. The effect upon the culture of taste and refinement of mind, by the more elegant typography and make-up of school-books, must be considerable. It is a sign of advance, when selections of Shakespeare's plays, such as Mr. Hudson's "School and Family Shakespeare," with the needful notes for the aid of the youthful student, or Mr. W. J. Rolfe's selection of plays, including "The Tempest," "Julius Cæsar," "Henry VIII.," and "The Merchant of Venice," gotten up in elegant style, with a full apparatus of grammatical and exegetical illustration,

are found among the appliances of elementary education. A work of the same class is "The English of Bunyan" by Prof. J. B. Grier, of Lafayette College, surely a model of homely prose worth study. The manuals in "English Literature," by Prof. A. S. Hart and Mr. F. H. Underwood, are a marked advance on works of their class heretofore in use. Another noticeable work in the same department is "English Literature considered as the Interpreter of English History, designed as a Manual of Instruction," by Henry Coppée, LL. D.; and, perhaps, equally so is "A Progressive Grammar of the English Tongue, based on the Results of Modern Philology," by Prof. William Swinton, A. M., and several among the following:

Logical Praxis. By Prof. H. N. Day.

An Elementary Manual of Chemistry. Abridged from Eliot and Storer's Manual of Inorganic Chemistry. By Wm. Ripley Nichols.

An Elementary Grammar of the Greek Language, based on the twenty-eighth edition of Kühner. By Samuel H. Taylor, LL. D.

Ganot's Natural Philosophy, translated, with the author's sanction, by E. Atkinson.

A Guide to the Reading of the Hebrew Text, for the Use of Beginners. By Rev. W. H. Vibbert, M. A.

The Science of Wealth: A Manual of Political Economy, embracing the Laws of Trade, Currency, and Finance. Condensed and arranged for Popular Reading and Use as a Text-Book. By Amasa Walker.

Elementary Drawing-Book. By J. G. Chapman, M. A.

Drawing for Children.

How to Draw: The Right and the Wrong Way. By A. S. Avery.

First Lessons in Language and Drawing; designed to Teach, at Home and at School, How to Talk, How to Read, How to Draw, on the Object-Lesson Plan. By J. Russell Webb.

Art Education. By Walter Smith, State Director of Art Education in Massachusetts.

Drawing Copies. By the same.

Independent Sixth Reader, including a Complete Treatise on Elocution. By J. Madison Watson.

The Art of Singing. By Carl Gaertner.

Sunday-School Geography. By Rev. George A. Starkweather.

Declamations and Dialogues for Sunday-School Exhibitions. By J. H. Gilmore.

First Lessons in Analytical Arithmetic, comprising Mental and Written Exercises. By Shelton P. Sanford, A. M.

Elementary Geometry. By William F. Bradbury.

Elementary Trigonometry. By the same. Both in one volume, or separately.

New School Dialogues; or, Dramatic Selections either for Reading, Recitation, or Exhibition. By John E. Lovell.

A Practical and Theoretical French Grammar. By Felix J. B. Koestler.

The First German Reader, to succeed "The First Book in German." By George F. Comfort, A. M.

The United States Reader; comprising Selections from eminent American Orators, Statesmen, and Poets, with Explanatory Observations and Notes. By John J. Anderson, A. M.

A School History of the United States. By W. H. Venable.

Latin School Series. Selections from Latin Classic Authors—Phædrus, Justin, Nepos. By Francis Gardener, A. M. Gay, and A. H. Black.

First Lessons in our Country's History. By William Swinton, A. M.

Elementary Tabular System of Instruction in

French. By H. R. Auel, Professor of French in the U. S. Military Academy.

Normal Class Outlines on Teaching. By J. Alden, D. D., LL. D.

The Art of Singing. By Prof. Ferdinand Sieber. Translated, with an Original Chapter on the Hygiene of the Voice, by Dr. F. Seeger.

A Manual of Ancient History, from the Earliest Times to the Fall of the Western Empire, A. D. 476. With a Complete Index and Pronouncing Vocabulary. By M. E. Thalheime.

Ars Oratoria: Selections from Cicero and Quintilian, on Oratory, with Notes. By Martin Kellogg.

A Test Spelling-Book for Advanced Classes. By W. D. Henkle.

A Manual of American Literature. By N. K. Royce.

The Chandler Drawing-Book. By John S. Woodman, of Dartmouth College.

Logic, Theoretical and Practical. A Text-Book for Teachers and Students. By W. D. Wilson, D. D.

Introduction to Metaphysics. By the same.

Comprehensive Geography. Comprising Civil, Physical, Descriptive, Historical, Mathematical, Comparative, Topical, and Ancient Geography, with Map Drawing, and Relief Maps. By James Monteth.

Histories of Livy. Books I., XXI., XXII., with Extracts from Books IX., XXVI., XXXVIII., XXXIX., XLV. By Thomas Chase, M. A.

Latin Lessons. Adapted to Allen and Greenough's Latin Grammar. By R. F. Leighton.

Smaller History of the United States. By David B. Scott.

Elements of Geometry and Trigonometry. By Prof. Edward Olney.

Intermediate Arithmetic. By Prof. C. S. Venable.

Sixth Reader. By Prof. G. F. Holmes, LL. D.

Key to Elementary Algebra. By Prof. C. S. Venable.

English Literature. By Profs. Johnston and Browne.

JUVENILES.—The mass of books for juvenile readers continues to be fictitious, and the grades of fiction provided for them are parallel with those that exist in the same department of literature as purveyed for maturer minds. But efforts are not wanting to allure their tender minds in the directions that promise a higher culture, some of which are of such merit as to deserve success. Of this class of books, intended to stimulate thought and rational curiosity, the volumes of Jacob Abbott having the general title "Science for the Young," deserve honorable mention; as do the biographical volumes of J. S. C. Abbott, commemorating "American Pioneers and Patriots," of which lives of Daniel Boone and Miles Standish have appeared. Of a lighter character, mingling fact and fiction, or rather, making fiction a vehicle for truthful observation, improving sentiment, and a rich, and sometimes droll humor, are the contents of "Aunt Jo's Scrap-bag," by Miss Alcott. Of fiction in matter-of-fact style, Jacob Abbott's "August Stones," four volumes, are good examples. Similar, but with more of the spice of adventure, and the flavor of Young America, are the volumes of "Our Young Yachter's Series," by C. A. Stephens, of which "Camping Out," and "Left off Labrador," have appeared, and more are promised. In the same vein, but in a "louder" style, are the various nau-

tical and other stories of William T. Adams ("Oliver Optic"). Mr. De Mille, who has no peer in the invention of startling plots, directs his talents to the amusement and astonishment of youth, in "The Young Dodge Club," and the volumes of the "B. O. W. C." One of the best story-tellers for the boys is J. T. Trowbridge, who has pursued the career of "Jack Hazard" through a second volume, entitled "A Chance for Himself." Boy nature, as well as that of the children of larger growth, is delineated with exquisite art. Another voluminous writer for the young is Elijah Kellogg, whose "Whispering Pine," and "Pleasant Cove," give titles each to a series. The genus "street Arab" is generously dealt with by Horatio Alger, Jr., in "Phil the Fiddler; or, The Young Street Musician," as in former works that have had no little popularity. The lady who writes under the name of "Sophie May" has won general applause by her story, "The Doctor's Daughter," "Little Folk Life," by Gail Hamilton, has in large measure the author's strong sense and high spirit, and occasional tendency to overdrawing. She has also given us "The Child-World," "Boarding-school Days," by Vieux Moustache, under a thin veil of fiction, details a real experience of boy-life. "Derwent, or Recollections of Boy Life in the Country," describes faithfully, a little too prosaically, the traits of a state of society long past. Edward Everett Hale shows the versatility of his genius by ten Christmas stories grouped under the title "Christmas Eve and Christmas Day," "Roundabout Rambles," by Frank R. Stockton, with the aid of a profusion of engraved illustrations, entertains the young reader with descriptions and tales that will give unwearied pleasure. "Marjorie's Quest," by Jeanie T. Gould, though commonplace in some features of the plot, more than makes up for that by the lifelike characterization and the pure sentiment that pervades it. "Very Young Americana," by Laura W. Ledyard, is happy in conception, and amusing to readers of any age.

Among moral and religious tales, of which there is a very large supply, yet not exceeding the growing demands of Sunday-school and family libraries, a decided success has been gained by "Barriers Burned Away," by Rev. E. P. Roe—a first attempt, we believe—a tale of such literary merit as not to need the plea of good intentions to excuse its existence. "What Katy Did," by Susan Coolidge, is an exquisite production in style and moral. "Home and Abroad; or, The Wonders of Familiar Objects," by the Rev. Sidney Dyer, shows the beauty and the wonder that may be seen in familiar natural objects, and the lessons of reverence they suggest. The effect of the instruction is heightened by beautiful engraved illustrations.

But why attempt to particularize? The above titles are selected with care from a total of more than two hundred, all or nearly all from

the pens of American authors or translators, besides the large number of reprints. The productions, some of them of great value, issued by the English societies and publishers who make such works a specialty, are republished here with great regularity, and swell the supply of juvenile literature. Respecting that portion of the mass which is of American origin, the impression gained by a pretty extensive examination is that their average worth increases year by year. There is still room for improvement. The largeness of the demand makes purchasers too indiscriminating. But the amount of wholesome—sometimes wholesale—criticism that has been directed to the subject of literature for children, has had a salutary effect upon its purveyors, and every year a larger number of able and accomplished writers turn their attention to this department of writing.

LAW.—Excluding reports and practical manuals, the following works are noted:

A Treatise on the Conflict of Laws; or, Private International Law, including a Comparative View of Anglo-American, German, and French Jurisprudence. By Francis Wharton, LL. D.

Draft Outlines of an International Code. By David Dudley Field.

Law and Practice in Bankruptcy. By O. F. Bump.

Law of Bankruptcy in the United States. By A. W. Gazzam.

Patent and Copyright Laws of the United States, with Notes of Judicial Decisions. By S. D. Law.

American Corporation Cases. Embracing the Decisions of the Supreme Court of the United States, and the Courts of Last Resort in the several States, of Questions peculiar to the Law of Corporations, announced since January 1, 1868. By Thomas F. Withrow, Esq. Vol. i., Private Corporations.

A Digest of Statutes and Cases upon Divorce and Alimony in the United States. By William Hardcastle Browne.

The Law and Practice of Injunctions. By William Joyce.

History of a Lawsuit. A Treatise on the Practice in Suits and Proceedings of Every Description, from the Beginning to the End in Courts of Law. By Abraham Caruthers.

The Law of Arbitration and Award. By John T. Morse, Jr.

Law of Fraud and Mistake. With Notes of American Decisions. By M. W. Kerr, Esq. Edited by O. F. Bump, Esq.

Law of Slander and Libel. By John Townsend, Esq.

American Trade-Mark Cases prior to 1871. Edited by Rowland Cox.

The Statutory Jurisdiction and Practice of the Supreme Court of the United States, together with the Forms of Process and Rules established for the Supreme Court, the Court of Claims, the Court of Equity, the Court of Admiralty, and the Court in Bankruptcy. By P. Phillips.

A Selection of Cases, or Sales of Personal Property. With References and Citations. By C. C. Langdell, Dane Professor of Law in Harvard University.

A Treatise on the Law of Estoppel, and its Application in Practice. By Melville M. Bigelow, Esq.

A Treatise on New York City Water-Rights, Streets, Real Estate, etc. By James W. Gerard, Jr.

A Digest of the Law of Partnership. By Charles Fox.

A Treatise on the Law of Set-off, Recoupment, and Counter-Claim. By Thomas W. Waterman.

A Treatise upon Conveyances made by Debtors to Defraud Creditors. By O. F. Bump.

An Analysis of Blackstone's Commentaries. By Frederick S. Dickson.

Commentaries on the Law of Statutory Crimes, embracing General Principles of Statutory Interpretation; Particular Principles applicable in Criminal Cases; Leading Doctrines of the Common Law of Crimes, and Discussions of the Various Statutory Crimes as respects both the Law and the Procedure. By Joel Prentiss Bishop.

A Treatise on the Law of Trade-Marks and Analogous Subjects. By W. H. Browne.

MEDICINE.—Including some practical treatises on health, the following are noted:

History of Medicine, from the Earliest Ages to the Commencement of the Nineteenth Century. By Robley Dunglison, M. D., LL. D. Now first collected and arranged from the Author's Manuscripts, by his Son, Richard J. Dunglison, M. D.

Diseases of Women. By T. G. Thomas, M. D.

Diseases of Children. By J. L. Smith, M. D.

Diseases of the Hair. A Popular Treatise upon the Affections of the Hair System, and the Management of the Hair. By Benjamin Godfrey, M. D.

Voice-Building: A Theory for the Mechanical Formation of the Human Voice. By Dr. H. R. Streeter.

Diseases of the Nerves of the Human Body. By William H. F. Cowes. Edited, with Additions, by William W. Keen, M. D.

Earth as a Topical Application in Surgery. By Ardenell Hewson, M. D.

When and How: A Collection of the More Recent Facts and Ideas upon Raising Healthy Children. By D. Newcomb, M. D.

Injuries of Nerves, and their Consequences. By S. Weir Mitchell, M. D.

The Physiological and Therapeutical Action of the Bromide of Potassium and Bromide of Ammonium. By Edward H. Clarke, M. D., and Robert Amory, M. D.

A Clinical Manual of Diseases of the Ear. By Laurence Turnbull, M. D.

Lectures on Aural Catarrh; or, The Commonest Forms of Deafness and their Cure. By Peter Allen, M. D.

The Treatment of Venereal Diseases; A Monograph of the Methods pursued in the Vienna Hospital under the Direction of Prof. von Ligmord, including all the Formule. By M. H. Henry, M. D.

Lithotomy and Lithotripsy, illustrated by Cases in the Practice of Gordon Buck, M. D.

Doctor in Medicine; and Other Papers on Professional Subjects. By Stephen Smith, M. D.

Medical Electricity. Showing its most Scientific and Rational Application to all Forms of Acute and Chronic Disease, by the Different Combinations of Electricity, Galvanism, Electro-Magnetism, Magneto-Electricity, and Human Electricity. By William White, M. D.

Thermic Fever, or Sunstroke. By H. C. Wood, M. D.

Disease Germs. A New Edition, much enlarged, with an Entirely New Part added, with Twenty-eight Plates, and many Colored Illustrations. By Lionel S. Beale, M. D.

On Renal Diseases. By William Roberts, M. D. Transactions of the Ohio Medical Society. Reported by J. W. Hadlock, M. D.

The Ten Laws of Health; or, How Disease is Produced and can be Prevented. By J. R. Black, M. D.

A Complete Practical Treatise on Surgery. By Frank Hastings Hamilton, M. D.

Diseases of the Throat. By J. Solis Cohen, M. D.

Hysterology. By E. N. Chapman, M. D.

Morbus Brightii. By Joseph Buckner, M. D.

Scrofulous Affections, and the Advantages of their Treatment according to the Principles and Experi-

ences of Homœopathy. Translated from the German of Emil Tietze, by H. Goullon, M. D.

Epidemic Cerebro-Spinal Meningitis. By Meredith Clymer, M. D. With an Appendix and Map showing the Locality of the Disease in the City of New York.

Ovarian Tumors. By Washington L. Atlee, M. D. A Manual of Histology. By Prof. S. Stricker, in Cooperation with Theodore Mynert F. von Recklinghausen, Max Scheutze, and Others. Edited by A. Buck.

Illustrations of the Influence of the Mind upon the Body. By Daniel S. Tuke, M. D.

The Heart and its Diseases, with their Treatment. By J. Milnor Fothergill, M. D.

Dental Pathology, with Special Reference to the Anatomy and Physiology of the Teeth. By Prof. Wed, of the University of Vienna. Translated, with Notes, by W. E. Boardman, M. D., and Prof. Hitchcock, of Harvard University.

A Manual of Hypodermic Medication. By Roberts Bartholow, A. M., M. D.

Autumnal Catarrh (Hay-Fever). By Morrill Wyman, M. D. With Three Maps.

A System of Oral Surgery, being a Consideration of the Diseases of the Mouth, Jaws, etc. By James E. Garretson, M. D.

Modern Medicine. By J. M. Da Costa, M. D.

Bioplasm; an Introduction to Medicine and Physiology for Students. By Lionel S. Beale, M. D.

Feticide; or, Criminal Abortion; a Lecture Introductory to the Course on Obstetrics and Diseases of Women and Children; University of Pennsylvania. By Hugh L. Hodge, M. D.

Aids to Diagnosis of Diseases of the Kidneys, with Ten Full-page Microscopical Plates containing Sixty Illustrations. By W. B. Rusham, M. D.

Surgical Diseases of Women and Children. By M. P. Guersant. Translated from the French, by Richard J. Dunglison, M. D.

The Debilities of Our Boys. By James Jackson, M. D.

ILLUSTRATED BOOKS.—Illustration plays a much larger part in the making of books that admit of it, than formerly. But illustration for ornament's sake, as exemplified in the production of books in which the letter-press is for the sake of the engravings, rather than the engravings for the text, seems to be less in favor. Fewer volumes appear, expressly prepared for the holidays, and those that are published are generally works which would be attractive without being artistically "clothed upon." As heretofore, one of Mr. Bryant's exquisite poems, "The Little People of the Snow," has been honored with a very tasteful and richly-pictured dress. "The Courtin'," by James Russell Lowell, illustrated in silhouette; an illustrated edition of "A Russian Journey," by Edna Dean Proctor; "Frithiof's Saga," illustrated; "The Cotter's Saturday Night," with fifty illustrations; "Songs of Nature;" Wilson Flagg's "Woods and Byways of New England," already mentioned in another connection; and "Songs from the Old Dramatists," are among the principal works of this class prepared by our publishers for the last holiday season. Some very elegant volumes of English manufacture were imported. But there is an increasing tendency to value artistic adornment chiefly as a mode of expressing the admiration that is felt for books worthy of honor.

MISCELLANEOUS.—Some works not easy of classification, and some of merely temporary intrinsic interest, but of value as indications of current opinion and feeling, are grouped together under this head:

A Dictionary of American Biography. By Francis S. Drake. [A work of the highest value for fullness, accuracy, and adaptation to the needs of those who may consult it.]

The Chronicles of Gotham, Book II., by the author of "The New Gospel of Peace."

The Words of Washington, selected and arranged by James Parton.

A Treasury of Thought: An Encyclopædia of Quotations. By Maturin M. Ballou.

Musings of a Middle-aged Woman.

The Debatable Land between this World and the Next. By Robert Dale Owen.

The Laws of Fermentation, and Wines of the Ancients. By William Patton, D. D.

How to Live on a Dime and a Half a Day. By T. L. Nichols, M. D.

The Basic Outline of Universology. By Stephen Pearl Andrews.

Allegories of Life. By Mrs. J. S. Adams.

The Great Republic. A Descriptive, Statistical, and Historical View of the States and Territories of the American Union. By James D. McCabe, Jr.

The Great Fires in Chicago and the West. By E. J. Goodspeed, D. D.

The Great Industries of the United States; being an Historical Summary of the Origin, Growth, and Perfection of the Chief Industrial Arts of this Country. Including Personal Sketches of the Men who best represent its Inventive Genius and Mechanical Enterprise, by Horace Greeley, G. B. Lyman, Albert Brisbane, and other Eminent Writers.

Mesmerism, Spiritualism, Witchcraft, and Miracle. A Treatise showing that Mesmerism is a Key which will unlock Many Chambers of Mystery. By Allen Putnam.

The Priest, Calvin, and Wesley. By David Robinson.

The Isthmus of Tehuantepec. By Theron Skeel.

Three Years in a Man-Trap. By T. S. Arthur.

The Life and Times of James Fisk, Jr. By R. W. McAlpine.

Short-Trip Guide to Europe. By H. Morford.

The Japanese in America. By Charles Lanman.

Relief; a Humorous Drama. By a Chicago Lady.

New Cyclopædia of Poetical Illustrations. By Elton Foster.

The Blazing Star; with an Appendix, treating of the Jewish Kabbala. Also, a Tract on the Philosophy of Mr. Herbert Spencer, and one on New England Transcendentalism. By William B. Green.

Flashes of Light from the Spirit Land, through the Mediumship of J. H. Conant. Compiled and arranged by Allen Putnam.

A Practical Guide to Business. By Lewis B. Welsh.

Work and Play. Annual of Home Amusements and Social Sports.

Pens and Types; or, Hints and Helps for those who Write, Print, or Read. By Benjamin Drew.

Homer and Socrates. From the French of A. de Lamartine. With a Brief Biography. By Mrs. Eliza W. Smith.

The Yale Naught-ical Almanac. A Modestly-Economical Rejuvenescence of some very Ancient Chronicles, unblushingly appropriated.

The Best Reading. Hints on the Selection of Books; on the Formation of Libraries, Public and Private; on Courses of Reading, etc. With a Classified Bibliography for Easy Reference.

Public and Parlor Readings. Prose and Poetry for the Use of Reading Clubs, and for Public and Social Entertainments. By Lewis B. Monroe.

Roughing it. By Mark Twain.

What I Know about Polygamy. A Lady's Life among the Mormons. A Record of Personal Experience as one of the Wives of a Mormon Elder. By Mrs. T. B. H. Stenhouse.

The Stranger's Guide to the Cities of New York, Brooklyn, and Adjacent Places.

The Voices of Seven Thunders. By J. S. Martin. **Nature's Laws in Human Life.** An Exposition of Spiritualism, embracing the Various Opinions of Extremists, pro and con, together with the Author's Experience. By the author of Vital Magnetic Cure. **The Good Health Annual.**

Resources of the State of Arkansas. By James P. Henry.

Landlord and Tenant's Lawyer, adapted to Every State in the Union. By an Attorney-at-Law. **A Book of Law,** but not a Law-Book, giving the Legal Rights and Liabilities of Landlords and Tenants, and Purchasers and Sellers of Real Estate.

The Duties of Young Men. By Silvio Pellico. Translated from the Italian by R. A. Vain.

Half-Hours with the Great Preachers. With Brief Biographical Notices. By M. Laird Simons.

A Dictionary of Every-Day Wants, containing Twenty Thousand Receipts in nearly Every Department of Human Effort. By A. E. Youman, M. D.

The Destiny of Man. By W. Irwin. **Waifs from the Way-bills of an Expressman.** By T. W. Tucker.

Our Digestion; or, My Jolly Friend's Secret. **Get Thee behind Me, Satan!** A Home-born Book of Home-Truths. By Olive Logan.

Hours with the Lonely. By Maria J. Bishop. **Public School Education.** By Rev. Michael Mulen, C. S., S. R.

The Dickens Dictionary. A Key to the Characters and Principal Incidents in the Works of Charles Dickens. By Gilbert A. Pierce. With Additions, by William A. Wheeler.

The To-morrow of Death; or, The Future Life according to Science. By Lewis Figuiet. Translated by S. R. Crocker.

The National Political Manual for 1872. Non-partisan. Comprising Facts, and Figures, Historical, Documentary, Statistical, and Political, from the Formation of the Government to the Present Time. With a Full Chronology of the Rebellion. By E. B. Treat.

Boston Illustrated. With Supplement. **Healthy Houses.** A Hand-Book to the History, Defects, and Remedies of Drainage, Ventilation, Warming, and Kindred Subjects. With Estimates for the Best Systems in Use, and upward of Three Hundred Illustrations. By William Eassie, C. E.

A Manual of American Literature. By N. K. Royse.

The School and the Army in Germany and France, with a Diary of Siege-Life at Versailles. By Brevet Major-General W. B. Hazen, U. S. A. [A book of exceptional authority and value.]

Jubilee Days. By A. Hoppin. [A capital taking-off of the humors of the Great Peace Jubilee in Boston.]

New York Illustrated. New edition, entirely rewritten, and with many New Illustrations.

Errors of Speech. By L. P. Meredith, M. D., D. D. S.

Saratoga in 1901. Two Hundred Pictures.

The Romance of American History. By M. Schele de Vere.

Bible Work in Bible Lands. By Rev. Isaac Bird.

The Problem of Life and Immortality. By Loring Moody.

Boston Postage-Stamp Album. Revised to date. **Five Hundred Mistakes, in Speaking and Writing the English Language,** corrected.

Old Landmarks and Historic Personages of Boston. By S. A. Drake. With Numerous and Curious Illustrations. [A work of more than local interest, admirably done.]

Taine's English Literature, condensed and ar-

ranged for General Readers, and for Schools. By John Fiske.

One Thousand-and-one Mistakes corrected in Reading, Writing, and Spelling.

Mary Queen of Scots, and her Latest English Historian (Mr. Froude). By James F. Meline. [A new edition, called out by Mr. Froude's Lectures on Ireland.]

The Impromptu Speaker. By the author of "Guide to Authorship."

The Drawing-Room Stage. A New Collection of Amateur Dramas, Comedies, and Farces.

Social Charades, and Parlor Operas. By M. T. Calder.

Lectures to Young Men on Various Important Subjects. New edition, with Additional Lectures. By Henry Ward Beecher.

The Children's Birthday Text-Book, with Interleaved Diary for Memoranda.

Five Years in an English University. Third edition, revised. By Charles Astor Bristed.

Coffee: its History, Cultivation, and Uses. By Robert Hewitt, Jr. Illustrated with Chromo-lithograph Woodcuts, and a Map of the World.

Froude's Slanders on Irishmen and Ireland. A Course of Lectures delivered in Association Hall during October and November, 1872. With Preface and Notes. By Colonel James E. McGee. Also, **An American's Opinion of the Englishman; a Lecture delivered by Wendell Phillips on James Anthony Froude,** in Boston, December 8d.

Partingtonian Patchwork. By P. P. Shillaber. **Common Sayings, Words, and Customs; their Origin and History.** By Henry James Learning.

REPUBLICATIONS.—Unsatisfactory as the state of the copyright law continues to be, English authors of repute have no serious difficulty in making profitable arrangements with American publishers for the reproduction of their works in this country. By degrees this process is organizing itself, the leading publishers having their specialties—the Messrs. Appletons, for example, giving precedence to physical science and the related speculations; Messrs. Osgood & Co., and Roberts Brothers, to poetry, and the belles-lettres; the Messrs. Harper to fiction, travels, etc.; Scribner & Co., to theology and philosophy. One of the most important enterprises for popularizing science, recently undertaken, is the "International Science Series," to be composed of works prepared expressly for it by the leading scientists of Europe and America, adapted in their style to the apprehension of the general reader. Two volumes have appeared: "On the Forms of Water," by Prof. Tyndall, and "Physics and Politics," by Walter Bagehot. Seldom, if ever, has a series of works designed for popular reading enlisted the labor and cooperation of so many distinguished investigators. The new magazine, "The Popular Science Monthly," edited by Prof. Youmans, is meeting with encouraging success. Other important works are "Prehistoric Times," by Sir John Lubbock; "Elementary Treatise on Natural Philosophy," by A. Privat Deschanel, translated, with Large Additions, by Prof. J. D. Everett, of Belfast; "The Senses and the Intellect," by Alexander Bain; "Christian Theology and Modern Skepticism," by the Duke of Somerset; "Astronomy and Geology compared," by Lord Ormawaithe; "Man, and his Dwelling-Place," "Life

in Nature," and "The Mystery of Pain," by James Hinton; "Anatomy of Vertebrated Animals," by Thomas Huxley; "How the World was Peopled," by Rev. Edward Fontaine; "Manual of Zoology," by Henry Alleyne Nicholson, M. D.; "Spectrum Analysis, in its Application to Terrestrial Substances, and the Physical Constitution of the Heavenly Bodies," by Dr. H. Schellen, edited by W. Huggins, LL. D.; "Metals, their Properties and Treatment," by Charles Loudon Bloxam; "Practical Horseshoeing," by G. Fleming, F. R. G. S.; new edition of Lyell's "Principles of Geology," and of Sir J. Herschel's "Outlines of Astronomy;" "Theory of Heat," by J. Clarke Maxwell; "Introduction to the Study of Inorganic Chemistry," by W. Allen Miller, M. D.; Pereira's "Elements of Materia Medica and Therapeutics," edited by R. Bentley and T. Redwood, new edition; "The Insect World," by Louis Figuier; "The Human Race," by the same; "The Beginnings of Life," by H. Charlton Bastian, M. D., F. R. S.; "Wagner's Handbook of Chemical Technology," translated and edited by William Crooks, F. R. S.—a series of scientific publications significant of the present tendencies of the public mind. The Messrs. Harpers furnish the works of the leading English novelists, George Eliot, Miss Mulock, William Black, Anthony Trollope, Edmund Yates, etc., including a reproduction of the Illustrated Household Dickens, together with a large number of works of history, travels, etc. Osgood & Co. are the American publishers of Mr. Tennyson, and of most of the best English poetry; Roberts Brothers, of Miss Ingelow; Scribner reproduces the "Speaker's Commentary," and issues the attractive libraries of "Wonders," and of "Travel and Adventure," in part republications, and in part compilations, and the popular writings of George Macdonald. These examples serve to show the assorting process by which different literary wares have their special factors. Of scientific works, in addition to those already enumerated, have appeared—

More Criticisms on Darwin and Administrative Nihilism. By T. H. Huxley, LL. D.

Lectures on the Science of Religion; with a Paper on Buddhist Nihilism, and a Translation of the Dhamapada, or "Path of Virtue." By Max Müller, M. A.

Thoughts upon Government. By Arthur Helps.

Clinical Lectures on the Diseases of Women. By Sir James Y. Simpson, Bart.

Principles of Political Economy, with some of their Applications to Social Philosophy. By J. Stuart Mill.

Strange Dwellings. Being a Description of the Habitations of Animals. By the Rev. J. A. Ward, M. A., F. L. S.

On Intelligence. By Henri Taine.

The Insect World; being a Popular Account of the Orders of Insects; together with a Description of the Habits and Economy of some of the more interesting Species. By Louis Figuier. A new edition, revised and corrected by P. Martin Dunbar, F. R. S. Five Hundred and Seventy-nine Illustrations.

Man in the Past, Present, and Future. From the German of L. Büchner.

The Elements of Mechanism. By T. M. Goodere, A. M.

Town Geology. By the Rev. Charles Kingsley.

The Ancient Stone Implements, Weapons, and Ornaments of Great Britain. By John Evans, F. R. S.

Four Phases of Morals; Socrates, Aristotle, Christianity, Utilitarianism. By John Stuart Blackie, F. R. S. E.

The Expression of the Emotions in Man and the Lower Animals. By Charles Darwin, M. A.

The Ocean, Atmosphere, and Life. Being the Second Series of a Descriptive History of the Life of the Globe. With Two Hundred and Fifty Maps or Figures, and Twenty-seven Maps printed in Colors.

And the following historical and biographical works:

Life and Times of Henry Lord Brougham, written by Himself.

The Life and Times of the Rev. John Wesley, A. M., Founder of the Methodists. By the Rev. Luke Tyerman.

The Life of Charles Dickens. By John Forster, vol. ii.

The History of Ancient Art. By J. J. Winckelmann. Translated by G. Henry Lodge, A. M., M. D.

Leaders of Public Opinion in Ireland. By W. E. H. Lecky.

Memoir of Robert Chambers. With Autobiographical Reminiscences of William Chambers.

History of Greece, by Dr. Curtius, translated by Adolphus William Ward, vol. iii.

Lectures on the History of the Church of Scotland. By A. P. Stanley, D. D.

A Smaller History of the East; from the Earliest Times to the Conquest of Alexander the Great. Including Egypt, Assyria, Babylonia, Media, Persia, Asia-Minor, and Phenicia. By Philip Smith, B. A.

Three Centuries of Modern History. By Charles Drake Yonge.

Voltaire. By John Morley.

Fables concerning the Popes and Prophecies in the Middle Ages. By J. J. I. von Dollinger, D. D.

Encyclopædia of Chronology, Historical and Biographical. By B. B. Woodward, B. A., and W. L. R. Cates.

Outlines of History. By Edward A. Freeman, D. C. L.

Coleridge's Biographia Literaria. Centenary Library Edition.

History of Sculpture, from the Earliest Ages to the Present Time. By Dr. Wilhelm Lübke. With Three Hundred and Seventy-seven Illustrations.

The English in Ireland during the Eighteenth Century, vol. i. By James Anthony Froude.

The Pastor of the Desert. By Eugene Pelletan.

A considerable number of theological and Biblical works, of which the most noticeable are:

Saint Paul in Rome. By J. R. Macduff, D. D.

Christ in Modern Life. Sermons by the Rev. Stopford A. Brooke, M. A.

Sermons on Ecclesiastical Subjects. By Archbishop Manning.

Bible Lore. By J. Cowper Gray.

A Critical and Exegetical Commentary on the Book of Leviticus, with a New Translation. By James G. Murphy, LL. D., T. C. D.

Paul of Tarsus. An Inquiry into the Times and the Gospel of the Apostle of the Gentiles. By a Graduate.

The Song of the New Creation. By Dr. H. Bonar.

The Lord's Prayer. By Frederick Denison Maurice.

Student's Hebrew Lexicon. By Benjamin Davies, Ph. D., LL. D.

Lectures on the Reunion of the Churches of Christendom. By Dr. J. J. I. von Dollinger.

Essentials of New Testament Study. Intended as a Companion to the New Testament, and embracing an Introductory Account of the New Testament; a *Résumé* and Harmony of Gospel History; Tables of Weight, Measure, and Chronology; a Dictionary of Hard Words and Phrases; an Explanation of Obsolete and Archaic Words; a Biographical and Geographical Dictionary; and a Table of Old Testament Quotations; together with Maps, Plans, etc.

Of numerous volumes of poetry, fiction, and miscellaneous works, the following may be specified:

Mohammed Ali and his House. An Historical Romance. By Louisa Mühlbach.

Lord Bantam. By the author of "Ginx's Baby."

Two Plunges for a Pearl. A Novel. By Mortimer Collins.

Twenty Years Ago. Edited by the author of "John Halifax."

Blade of Grass. A Novel. By B. J. Fargeon.

Grif. By the same.

Fair to See. A Novel. By L. W. M. Lockhart.

Character. By Samuel Smiles.

Orion. An Epic Poem. By R. H. Horne.

Short Studies on Great Subjects. Second Series. By J. A. Froude.

Recollections of Past Life. By Sir Henry Holland.

Daisy Burns. By Julia Kavanagh.

Queen Mab. By the same.

Beatrice. By the same.

Poor Miss Finch. By Wilkie Collins.

South-Sea Bubbles. By the Earl and the Doctor.

The Caged Lion. A Novel. By Charlotte M. Yonge.

Old Schoolfellows, and What Became of Them.

Music and Morals. By Rev. H. B. Haweis, A. M.

Our Poor Relations. By Colonel E. B. Hamley.

Good-by, Sweetheart! By Rhoda Broughton.

Red as a Rose is She. By the same.

A Man's Thoughts. By J. Hain Friswell.

Cometh Up as a Flower. An Autobiography by a Lady.

The Stratford Shakespeare. Edited by Charles Knight, 6 vols.

The Desert of the Exodus; Journeys on Foot in the Wilderness of the Forty Years' Wanderings. Undertaken in Connection with the Ordnance Survey of Sinai and the Palestine Exploration Fund. By E. H. Palmer, M. A. With Maps, and numerous Illustrations taken on the Spot by the Sinai Survey Expedition, and C. F. Tyrwhitt Drake.

Studies in Poetry and Philosophy. By J. C. Shairp.

Culture and Religion in some of their Relations. By the same.

The Days of Jezebel. An Historical Drama. By Peter Bayne.

Fifteen at the Fair, and Other Poems. By Robert Browning.

Classical Studies as Information, or as Training. By a Scotch Graduate.

Sybil's Second Love. By Julia Kavanagh.

Cerise. A Tale of the Last Century. By G. J. Whyte Melville.

White Rose. By the same.

The Golden Lion of Granpère. By Anthony Trollope.

Ombra. By Mrs. Oliphant.

At His Gates. By the same.

The Laird of Norlaw. By the same.

The Rose Garden. By the author of "Unawares."

Unawares. By the author of "The Rose Garden."

The Story of a Millionaire. By Louisa Mühlbach.

Middlemarch. A Novel. By George Eliot.

The Maid of Sker. A Novel. By R. D. Blackmore.

Hermann Agha. An Eastern Narrative. By W. Gifford Palgrave.

Scrambles among the Alps. By Edward Whymper.

The Vicar's Daughter. By George Macdonald.

Wilfred Cumbermere. By the same.

Work and Wages Practically Illustrated. By Thomas Brassey, M. P.

Premiums paid to Experience. By Edward Garrett.

Thirty Years in the Harem. By Madam Kabrizli Mehmet Pasha.

The Adventures of a Brownie. By the author of "John Halifax."

Robert Ainslie. A Novel. By M. E. Braddon.

To the Bitter End. By the same.

The Lady of Lyndon.

Dickens as a Reader. By Charles Kent.

Off the Skelligs. A Novel. By Jean Ingelow.

Little Rosy's Travels; or, Country Scenes in the South of France, with Twenty-four Illustrations, by L. Frölich.

Little Mother. By the author of "Little Rosy's Travels." Twenty-three Illustrations by Frölich.

The Doctor's Dilemma. A Novel. By Hesba Stretton.

The World of Anecdote. By Edwin Paxton Hood.

Gareth and Lynette. By Alfred Tennyson.

Outlines to Burgher's Ballads. By Moritz Retzsch.

From the Nile to the Jordan. Footsteps of the Israelites from Egypt to Sinai.

The Strange Adventures of a Phaeton. A Novel. By Wm. Black.

An Only Sister. By Madame Guizot De Witt.

Translated by the author of "John Halifax."

The Wandering Heir. A Novel. By Charles Reade.

The Yellow Flag. By Edmund Yates.

Dr. Wainwright's Patient. By the same.

New editions of standard British authors, varying only in styles and prices, need not be mentioned.

LITERATURE, ENGLISH, IN 1872. The extent to which English books are republished in this country makes it necessary to add little to what is indicated by the statements on that subject contained in the preceding article. But so much is published in England which has no special adaptation to the American market that a brief review is made necessary. The following summary of the books of the year is given by the *Publishers' Circular*:

Theology, Sermons, Biblical, etc.: New books, 570; new editions, 182; American importations, 80. **Educational, Classical, and Philological:** New books, 348; new editions, 81; American importations, 10. **Juvenile Works and Tales:** New books, 186; new editions, 43; American importations, 7. **Novels, Tales, and other works of fiction:** New works, 468; new editions, 240; American importations, 86. **Law, Jurisprudence, etc.:** New books, 68; new editions, 33; American importations, 25. **Political and Social Economy, Trade, and Commerce:** New books, 113; new editions, 49; American importations, 14. **Arts, Science, and illustrated works:** New books, 373; new editions, 114; American importations, 46. **Voyages, Travels, and Geographical Research:** New books, 172; new editions, 52; American importations, 27. **History, Biography, etc.:**

New books, 235; new editions, 88; American importations, 45. *Poetry and the Drama*: New books, 272; new editions, 99; American importations, 13. *Year-books and Serials, in volumes*: New books, 269; new editions, 6; American importations, 12. *Medicine, Surgery, etc.*: New books, 96; new editions, 41; American importations, 13. *Belles-Lettres, Essays, Monographs, etc.*: New books, 182; new editions, 53; American importations, 11. *Miscellaneous (including pamphlets, not sermons)*: New books, 104; new editions, 24; American importations, 9. The whole number of books published during the year was 4,814, of which 3,424 were new books, 1,100 new editions, and 290 American importations.

In this classification it will be seen that Theology takes the lead. Under this there have appeared some important biblical works—a translation of Dr. M. M. Kalisch's "Commentary on Leviticus;" "The Hebrew Prophets Translated Afresh," by the late Rowland Williams, D. D.; Bishop Colenso's "Examination of the Pentateuch and Book of Joshua," Part V., and his "Examination of the New Bible [the Speaker's] Commentary:" these are of the rationalistic school. Of more orthodox interpretations, besides the Speaker's Commentary, there appeared a fragment from the pen of the late Dean Alford, "The Book of Genesis and Part of the Book of Exodus: a Revised Version," etc.; "Commentary on the Psalms," by G. Phillips, D. D.; and "The Doctrine of Christ Developed by the Apostles," by Edward Steane, D. D. On Ecclesiastical topics there have appeared, "Ecclesiastical Reform," essays edited by Orby Shipley, A. M.; "Difficulties of the Day, and How to Meet Them," sermons by E. S. Ffoulkes, B. D. ("The Difficulties of Yesterday, rather," as an irreverent critic called the book), chiefly on questions between the Eastern and Western Churches; "Dissent in Relation to the Church of England," the Bampton Lectures of the Rev. G. H. Curteis, M. A.—courteous and able, but apparently not effective with Dissenters; and "Essays on Cathedrals," edited by Dean Howson. Of numerous sermons, doctrinal works, etc., it may suffice to mention "Sermons preached for the most part in Ireland," by Archbishop Trench; "Forty Sermons," by H. P. Liddon, D. D.; "Faith and Free Thought," essays by various writers, with preface by Bishop Wilberforce; "The Christian Doctrine of Prayer for the Departed," by the Rev. F. G. Lee; "Essays," by J. H. Newman, D. D.; "Colloquia Crucis," by Dora Greenwell. In intimate connection with these topics may be mentioned the following philosophical works: "The Conscience: Lectures on Casuistry," by the late F. D. Maurice, and a reprint of his "Moral and Metaphysical Philosophy," with a new preface; "The Place of Mind in Nature," by James Martineau; "Darwinism in Morals," by Frances Power Cobbe; "Enigmas of Life," by W. R. Greg; and an impor-

tant and very interesting work, "Rational Theology and Christian Philosophy in England in the Seventeenth Century," by John Tulloch, D. D.

In Poetry, the event of the year was the completion of Mr. Tennyson's "Idyls of the King," the several parts of the Arthurian romance having been coming out for some years. The whole has, of course, appeared nearly simultaneously in this country. Another production of mark is the new poem of William Morris, "Love is Enough." This either has been or will have been republished here before these lines meet the reader's eye. In the secondary class of poetry, but high up in that class, must be ranked "Olivier Grange," presumably the work of a new candidate for the public favor, but showing the mingled power and self-restraint, the firmness and grace of touch, that promise a good deal. But this also is too well known in America to need particular description. Two writers, singularly enough, seem to have hit simultaneously upon the same subject and the same mode of treatment. "Hannibal: an Historical Drama," by John Nichol, and "Hannibal in Italy: an Historical Drama," by William Forsyth, Q. C., LL. D., come abreast before the reading public, to compete for recognition and honor. Mr. Nichol gets more unequivocal honor than Dr. Forsyth. The author of the admirable new "Life of Cicero" has obtained doubtful success as a votary of the tragic muse, judging by the tone of the criticism on his last production. Two other volumes of verse receive a somewhat flattering reception—"Interludes," by Alfred Austin, and "So Far," by Herbert Randolph.

In Science, the eagerness of American appreciation assures any work of merit of being promptly reproduced among us. "The Orbs around Us," by R. A. Proctor; "Rude Stone Monuments in All Countries: their Age and Uses," by James Ferguson, F. R. S.; and a learned and sumptuous work on a painful subject of contemplation, "Thanatophadia of India, being a Description of the Venomous Snakes of the Peninsula," by J. Fayser, M. D., are among the meritorious books not reprinted here.

In the literature of Travel, the best things are naturalized among us. "The Foreigner in Far Cathay" has been promised an introduction to American readers, and deserves it. Equally deserving, perhaps, is "Egypt of the Pharaohs and of the Khédive," by the Rev. F. Barham Zincke, and "Unexplored Syria," by Richard F. Burton and Charles F. Tyrwhitt Drake. In very natural connection with these works comes the mention of "Essays on Eastern Questions," by W. Gifford Palgrave, an instructive volume; and "The Miscellaneous and Posthumous Works of Henry Thomas Buckle."

English Grammar is treated in a truly scientific method, in "Historical Outlines of Eng-

lish *Accidence*," by the Rev. Richard Morris, LL. D. "*Manual of Mythology*," by A. S. Murray, is pronounced, by a reputable critic, "the best work of the kind in English." An edition of "*Thucydides*," by Richard Shilleto, and the late Prof. Conington's *Virgil*, have unstinted praise.

In Fiction, the supply is enormous in quantity, the mass indifferent in quality. Every thing that will bear exportation—and some that won't—comes across the Atlantic. "*Joshua Marvel*," by B. L. Farjeon, was thought to auspicate the revelation of a new master, in succession to the great prose poets that have recently passed away. Expectation does not continue at the first pitch. A novelty in the illustration of fiction is adopted in a new edition of the "*Writings and Life of Charlotte Brontë*" and her sisters. Instead of the pictorial representation of characters and scenes, the volumes are to be illustrated by landscape views referred to in them. S. Baring-Gould's "*Legends of Old Testament Characters*" obviously comes under the head of fiction, though the difference between the traditions of the Talmud and of the Mohammedans, and the modern romance or society novel, is as great as can well be imagined.

But the product of History and Biography is specially rich. England is never slack to commemorate her statesmen and heroes, and all whose memory honors the nation. Supplementary volumes of the Duke of Wellington's *Dispatches and Correspondence* have appeared, making, with the portions before published, a large but very valuable mass of historical material. A sixth volume of Mr. Spedding's "*Life, Correspondence, and Miscellaneous Works of Bacon*," carries forward a work of no ordinary value. A seventh volume will complete it. A new volume of Mr. E. A. Freeman's "*History of the Norman Conquest*," and one on the "*Growth of the British Constitution*," deserve notice. "*The Life of Sir Henry Lawrence*" worthily commemorates one of England's Indian heroes. A serious sifting of heroism in that quarter is made in a work entitled "*Empire in Asia, How we Came by It, A Book of Confessions*," by W. M. Torrens, M. P. Two valuable volumes of essays are Mr. E. W. Robertson's "*Historical Essays*," and "*Essays on Historical Truth*," by Andrew Bisset. "*History of British Commerce from the Conclusion of the Seven Years' War to the Present Time*," by Prof. Leoni Levi, has been well received. Two volumes in "*Ecclesiastical Biography*," of more than ordinary merit, have appeared, "*St. Chrysostom: his Life and Times*" by W. R. W. Stephens, M. A., and "*The Life and Labors of St. Thomas, of Aquin*," by the Very Rev. Roger Bede Vaughan, O. S. B. Mr. Elwin's "*Life and Correspondence of Alexander Pope*" has reached its eighth volume. Most readers think there is "somewhat too much" of it. The memoirs of Baron Stockmar revealed a char-

acter of previously unsuspected importance, and threw a strong light on the court-life of England and Germany. Of a very different character, and appealing to the sympathies of literary association, are a second series of Miss Mitford's *Letters*, and "*Memorials of a Quiet Life*," by Augustus J. C. Hare.

In Art, Mr. Ruskin's "*Aratra Pentelici: Lectures on the Elements of Sculpture*," exhibit him somewhat as he was when he first became known to American readers, dealing with a subject he has studied, and on which his genius for expression has matter to communicate that is not unworthy of such a medium. He is of course unable to refrain from his habitual denunciatory tone on things in general. His "*Fors Clavigera*" essays on political economy, or philosophy, or ethics, or politics, or whatever else the author would prefer to call it, addressed to the working-class, are not likely to produce any effect directly upon the class appealed to. The indifferent part of his audience, that is to say, people in general, find his essays more amusing than instructive. Mr. Ruskin is publishing a new edition of his works. In this he suppressed a large part of "*Modern Painters*," the first of his published books. But the expressed desire of many of his old admirers to possess that work, which had been for some time out of print, induced him to allow a reprint of it in a separate form—the revised and condensed edition being the exemplar for the final issue of his complete works. Sir Charles L. Eastlake's "*History of the Gothic Revival*" is one of the most important productions of the year in this department. "*Children in Italian and English Design*," by Sydney Colvin, is a pleasing subject finely treated, and illustrated by photographs and woodcuts. "*Athena Photographed*," by W. J. Stillman, commends itself to the lovers of classical architecture. A rare gift-book of more than temporary interest and value is "*Chefs-d'Œuvre of Art and Masterpieces of Engraving, selected from the Collection of Prints and Drawings in the British Museum, reproduced in Photography*," by Stephen Thomson.

The death of Lord Lytton (Edward Bulwer) in January last, was the occasion of disclosing the authorship of "*The Coming Race*," and of "*The Parisians*," in course of publication in *Blackwood's Magazine*. It will be remembered that Lord Lytton originally published "*The Caxtons*" anonymously. Like Sir Walter Scott, he made repeated attempts, by anonymous publications, to divert the public with the idea of the advent of a new candidate for popular favor as a novelist. His last anonyms had been for the time successful concealments. It is also stated that he left another work of fiction complete or nearly so. He was a literary artist of great talent and of remarkable versatility, quick to discern and ingenious to gratify the successive phases of public taste, but giving doubtful promise of permanent fame.

LITERATURE, CONTINENTAL, IN 1872. The movements in Continental Literature, in 1872, will be seen by the following extracts from the correspondence of the London *Athenæum*:

BELGIUM.—The Franco-German War, 1870-'71, has turned public attention in Belgium to two great problems—popular education and national defence. They fill the columns in the newspapers, they are discussed in public meetings, and give rise to innumerable essays, pamphlets, and writings of every kind. The publications of the past year are naturally colored by these absorbing interests. We have a series of books on military subjects, which Miquardt (Henry Merzbach) has made his *spécialité*. Among the most remarkable may be mentioned "Commentaires sur la Guerre, 1870-'71," with maps and plans, by Major Van de Velde; "La Fortification à Fossés Secs" (with an atlas), by Colonel Alexis Brialmont; "Des Chemins de Fer en Temps de Guerre" (second edition), by Captain A. de Formanoir; the "Bombardment et la Fortification Moderne," by Captain Piron; and the "Souvenir de la Guerre Franco-Allemande au Point de Vue Chirurgical," by Dr. Henry van Holsbeek.

Among the publications relating to education, the small but interesting work by Charles Buls may be mentioned, "Une Excursion Scolaire à Londres." The author explains the method of popular instruction adopted in England, and gives the history of opinion on the subject of education. The Educational League, a powerful association, started for the purpose of enforcing obligatory secular education, has published the prospectus of an organization of education on this principle. This prospectus, the work of several persons distinguished by their special knowledge of the subject, is enriched by an appendix and notes. M. Émile de Laveleye has written a work upon this same question, entitled "L'Instruction du Peuple," which contains official information on the present state of education in various civilized countries.

As regards belles-lettres not much has been done. The "Fables" of the late Maréchal, with a "Study" upon this form of instruction, by A. Pichard, and a biography of the author, by Prof. Le Roy, introduce us to an agreeable and original author. The poem "L'Année Sanglante" (1870-'71), contains some vivid and energetic verses. Émile Leclercq has published an interesting novel, called "Maison Tranquille" ("Quiet House"). Another clever novelist, Charles de Coster, has written "Le Voyage de Noëes," a little tale, which has caused great discussion, and had no less success than the delightful "Contes Flamands," which first made his reputation. M. Stecher, Professor at the University of Liège, has pronounced an oration upon the Flemish language, and the utility and advantage of the study of it to Belgium. It is a remarkable discourse, and has excited great attention, because it

touches upon a question which is always warmly discussed. "L'Etat et l'Eglise," by Ernest Allard, gives a curious history of the relations between these two powers in Europe, but especially in Belgium, down to the present day. The author pronounces in favor of the absolute separation of the two, and insists upon the necessity of abrogating those of the decrees of Napoleon I. which are contrary to the Belgian Constitution of 1831.

A curious and original work has been written by J. O. Houzeau, entitled "Études sur les Facultés Mentales des Animaux comparées à celles de l'Homme." The author deals in turn with the automaton, the intelligent being, and the sociable being. These two volumes constitute a study of comparative psychology. The subject treated upon is exactly that of Mr. Darwin's recent work, "The Expression of the Emotions in Man and Animals." "Le Système Penitenciaire," by August Visschers, is an account of the construction of the Maison de Force, at Ghent, erected by order of the Flemish States in 1771. It notices all the different kinds of prison discipline attempted in this excellent prison down to the year 1872. A most noticeable work must be especially mentioned, "Mémoire sur les Causes des Effets Bienfaisants, et sur les Causes des Effets Nuisibles, des Boissons Alcooliques," by F. Haeck. The author treats this question broadly, and believes he has found a chemical method of eliminating all the noxious elements from alcoholic drinks without depriving them of any of their virtues.

Coming to the domain of philosophy, we have to make mention of "Les Commandements de l'Humanité," by G. Biberghin, Professor in the University of Brussels. It is a little catechism of general morals, after the manner of Krause. The author places himself on the outside of all revealed religion, and traces a succinct code of morality, which is binding upon all men, whether they are free-thinkers or orthodox believers. We must also mention a discourse by M. Looman, Rector of the University at Liège, upon "La Liberté dans la Vie Morale." He passes in rapid review the theories of the anti-spiritualists, and refutes them.

In the field of literary history we have to mention the last four volumes, fourteenth to seventeenth, of "Les Chroniques de Froissart," edited with so much judgment and learning by Kervyn de Lettenhove. We may remark by the way that the seventeenth volume contains a hitherto unpublished fragment, in which Froissart himself gives us the abstract of his chronicles.

In the history of art, a curious monograph has been written by Alph. Wauters, "Sur la Vie et les Œuvres de Hugo van der Goes," one of the most original, and the least known painters of the Flemish school in the fifteenth century.

Judicial literature has been enriched by sev-

eral good works. Prof. F. Laurent, the well-known author of the "Études sur l'Histoire de l'Humanité," continues the publication of his "Principes de Droit Civil," which is distinguished by the learning and independence of its conclusions. The sixth volume treats especially of property and of usufruct. Another Professor of the University of Ghent, M. Waelbroeck, has published a good "Traité des Droits de l'Enregistrement et de Transcriptions pour les Mutations entre Vifs."

In the exact sciences we may mention first "Les Annales de l'Observatoire Royal de Bruxelles" (tome xxi.), published by the learned editor, Ad. Quetelet, who has also brought out this year a new edition of his "Histoire des Sciences Mathématiques et Physiques chez les Belges." Neither can we omit the "Tableau de l'Astronomie dans l'Hémisphère Austral et dans l'Inde," by Edouard Mailly—the "Fondements d'une Géométrie Supérieure Cartésienne," by F. Folia, Administrator of the University of Liège. We may conclude our list with the pamphlet, by M. J. Graindorge, upon "L'Intégration des Équations Mécaniques"—the short works of the Profs. Delbœuf and Plateau, upon "La Mesure des Sensations Physiques," and the interesting biographical study, by Prof. Vanlair, upon "Spring, sa Vie et ses Travaux."

As the Flemish language addresses itself more especially to the working-classes, it is principally works of imagination which are written in that tongue. Hendrik Conscience has published a series of seven stories. They are simple and touching, and depict Flemish manners as he alone knows how to paint them. Another prose writer of talent, D. Sleekx, has written several tales, among which an historical romance, called "Hildegonde," has attracted much notice. The subject is taken from the history of the Low Countries toward the end of the fifteenth century. Flemish literature is rich in novels; it is the form of literature which finds the greatest response in the heart of this simple and in general but little-developed people. The poet, Jan van Beers, who, after Conscience, is the most popular of Flemish authors, has this year published a magnificent edition of his complete works. They are marked by truth and vigor of sentiment, and by picturesque simplicity of the description both of life and natural scenery. Jan van Beers is very popular, not only in Belgium, but also in Holland.

The "Willems-Fonds" has this year issued a series of popular works, among which may be especially noticed the second volume of the "Voordrachten over de Grondwet," a collection of the reports of the lectures on the Belgian Constitution, by the journalist of Ghent, Rolin-Jacquemyns. He passes in review the different privileges proclaimed by the fundamental law of Belgium, and he treats especially of the right of combination as it regards the societies of working-men, and also the liberty

of speech guaranteed by the article twenty-three of the constitution. This brings the author to the examination of the Flemish movement, its past history and future prospects. The work is at once solid and entertaining, and good judges consider it the best commentary on the Belgian Constitution which can be put into the hands of the working-classes.

Literary history has produced the first volume of "Letterkundige Geschiedenis van Vlaanderen" ("Literary History of Flanders"), by C. A. Serrure, giving a view of the state of Flemish and French literature in the province of Flanders down to the fifteenth century.

In dramatic literature, several good works have appeared; among others, a *bourgeois* drama by Van de Sande, and an historical play by Willem Geets, entitled "William the Fool of Burgundy." The first representation of this piece at the theatre at Malines was a great triumph for the author. It is laid in the reign of Philip the Good, Duke of Burgundy, and the most original character is that of the prince's jester, which reminds one of the Tribolet of M. Victor Hugo. The *répertoire* of the Flemish lyrical drama has been enriched this year by an opera, the work of Miry, the composer of Ghent, and entitled "The Poet and his Dream." The *libretto* was written by Hendrik Conscience, the novelist. This work is spoken of as intended to inaugurate the opening of the splendid theatre at Antwerp, which the communal administration has just erected there, in honor of the dramatic muse of Flanders. The Director of the Musical Academy, at Antwerp, Pieter Benoit, has put the finishing stroke to an opera, "War," founded upon a Flemish poem by Jan van Beers. These are the two important events in the musical world of Flanders, and they are intimately connected with those of the literary world.

In history we may mention "De Geschiedenis van Lier" ("History of Lier"), by Antoon Berzmann, already favorably known as a writer of romances full of humor and character. It is an elaborate monograph, which, beginning with the story of a little town in the province of Antwerp, goes on to trace in an original manner the history of all Belgium. The religious struggles of the sixteenth century, the unlucky attempts at reform by the philosophical emperor, Joseph II., are well and amusingly treated. Ferdinand van der Haeghen, the librarian of the University of Ghent, has at length published the first volume of "Van die Beroerlicke Tyden in die Nederlanden en voornamelyk in Ghendt" ("Troubles of Ghent and of the Low Countries"), from 1566 to 1568, by Marcus van Vaernewyck, the chronicler of Ghent in the sixteenth century. This book will make a sensation, as it brings to light an unpublished manuscript, which contains a sort of journal, written with an impartial *naïveté*, by the Catholic, Vaernewyck

during the worst period of the religious troubles in Flanders. It is a new and important source of information upon that most controverted point of history, the troubles of the Low Countries in the sixteenth century.

DENMARK.—The literature of the past year is less remarkable for its extent than for the germs of future activity which the twelve months have revealed, and the indication these germs have given of the possible future of Danish literature.

The death of the great psalmist and ecclesiastical party leader, the titular bishop, Grundtvig, in September last, when nearly ninety, was an event of no ordinary moment. The name of this prolific writer means, in the North, spiritual revival in the church and reformation in the school, especially in elementary education. The movement which he started is designated by the somewhat vague term "Grundtvigianism," and is still young. It is reserved for the future to reveal what direction it may take, and especially how far the foundation laid by the author will prove able to support the superstructure that is rising. His adherents have issued some publications of note, e. g., another volume of Prof. Hammerich's Church History, and a new edition of the Muratorian Canon, with notes, by Bishop Kirkegaard.

In strong contrast to the Grundtvigian, Old Lutheran, or orthodox theological tendency, is the new rationalism. A gifted young author, Brandes, strongly imbued with the principles of this school, lately wrote a work called "The Main Currents of the Literatures of the Nineteenth Century," in which, as well as in some lectures at the university, he rather severely censured Danish literature for its want of independence and originality. Our authors resented the affront, and the University has forborne appointing him to a post of "Docent" in æsthetics for which he was a candidate.

In history we have, from the pen of V. Schmidt, the first volume of what promises to be an interesting work on ancient history, although founded on the researches of others, "The Ancient History of Assyria and Egypt." In military history we have a treatise by Sarauw, on "The War between France and Germany," and one by another Danish officer, on "The Fight for Metz," 1870. Then we have a popular history, with 1,000 illustrations, of the Scandinavian kingdoms. The completion of the late Prof. Allen's important work, "The History of the Three Northern Kingdoms," 1497-1536, has been wisely committed by the university to the greatest living historian in Denmark, P. Müller, and the first part of the fourth volume has appeared within the year.

In folk-lore and Danish philosophy I may mention, first, three publications from the pen of the learned Svend Grundtvig, a new part of his great collection of "Denmark's Old Ballads;" "The Visitation-book" of Bishop

Peter Palladius, from the Reformation time; and a "Danish Dictionary," compiled with a view to establishing fixed rules for the highly-vacillating orthography of the language. H. Rink, a previously well-known authority on Greenland affairs, has edited a collection of Esquimaux legends which have attracted attention. From Andersen we have "Tales and Stories" and "New Tales and Stories."

The belles-lettres have received an addition in two novels from the greatest writers of fiction in Denmark, "The Nordby Family," by H. F. Ewald, and the "Bride from Rörvig," by Vilh. Bergsøe.

The excellent Museum of Northern Antiquities and the Ethnographical Museum have won great popularity for the science of archaeology here. Besides the ordinary periodical publications of the chief representative body of this science, the Royal Society of Northern Antiquaries, I may mention Madsen's valuable work, "Illustrations of Danish Antiquities and Monuments," of which the twenty-fifth part has now been published.

In natural science, besides the periodical literature, there is only one independent work of merit to mention, namely, Orsted's "Contributions to the Knowledge of the Oak Family."

Among philosophical works, of which several have appeared this year, "The Philosophy in Germany since the Days of Hegel," by Höfding; "Humanity and Christendom in their Historical Development: A Representation of the Philosophy of History," by H. Scharling; and "The Laws of History: an Historico-Philosophical Inquiry," by O. Rørders, are worthy of notice.

Statistical science is admirably represented in the "Court and State Calendar, published by Trap, secretary of the King's Cabinet, and edited by Erichsen, *chef de bureau* in the Finance Ministry. A great deal of statistical matter has emanated from the Statistical Bureau, which is of the highest value for the statesman, the public deputy, and the student of national economy.

In Oriental philology I have only one work to mention, namely, "Ten Jatakas: the Original Pali Text, with a Translation and Notes," by the very able linguist, Fausbøll, of the University Library here.

Lastly, I would call attention to a great bibliographical work, "Bibliotheca Danica; or, a Systematic Catalogue of the Danish Literature from 1482, when the first Danish Book was printed, till 1830." Properly speaking, only such books find place in the volume as are found in the three great libraries, the Royal, the University, and Karen Brahe's, in Odense, one well stocked with old works. In "Bibliotheca Danica" are included, besides Danish books proper, the Literature of Sleswick (but not of Holstein), the Norwegian up to 1814, the Icelandic and that of the colonies, as well as translations of works in these literatures

into a foreign idiom. This work, which is one of vast bibliographical importance, owes its origin to the head librarian of the Royal Library here, Chr. Bruuns, and is edited under his supervision. The first part, of 596 columns, comprises theology only, with a systematic table of contents, but an index of names is wanting.

FRANCE.—The literary results of the last year are unsatisfactory, sterile, and unattractive. No new men of talent arise. The old pens have been scribbling, plying their old trade, unheeded by the public, whose heart and mind have been engrossed by Versailles, Thiers, the *Pacte de Bordeaux*, the *Proposition Rivet*, the *Centre-Gauche*, *Contre-Droit*, and their ramifications, modifications, contradictions, wars, reconciliations, and tergiversations of all kinds. We call that politics.

Many booksellers have disappeared; bankruptcy has struck down the firms of Lacroix & Co. and Amyot. Some of the best houses are tottering; the French Academy is silent—a good old girl, who has played strange pranks, feels ashamed, abashed, shuts herself up, conceals from all eyes her last choices, and does not know what to do, having been ignominiously treated by Bishop Dupanloup, who spurned her, and by the public, whom M. Olivier's admission scandalized.

The present stage is, for French literature as well as for French society, a halt, a repose, a void, if you please—a place for us to pause, to look around, and take heart and breath, and gird our loins for a new journey and a fresh evolution of our mental life and literary strength.

A man of wit and learning, of the name of Martin (a name as common in France as Schultz in Germany and Smith in England), has been at the pains of making a bundle of all the barbarisms, solecisms, and untoward or illicit modes of speaking and writing, which are to be met with in our books, journals, etc., of the day. His publication, which appears weekly, has for its title *Vaugelas's Messenger*. Vaugelas was a Savoyard of yore, a kind of French Porson in his day, an austere and inexorable judge of verbal niceties. M. Martin Vaugelas follows the track of the older one. Any foreigner desirous to know exactly the present state of our most difficult and peculiarly intricate language, must read the *Vaugelas's Messenger*, where every new batch of provincial terms, incorrect expressions, vulgarisms, slang words, and grammatical impurities, and all blunders into which the fashionable writers of the moment may have fallen, are regularly noted down, and ascribed to the delinquent. It is a most prodigious crop. Academicians, the natural tutors and overseers of the idiom and style, are contributors to that budget in large proportions. Novelists of notoriety and talent introduce into the vernacular French of Rabelais, Molière, and Voltaire, the dialectic peculiarities of the South and of

the North. About and the Alsacians write a kind of Alsatian French. The Paris slang forms a great item in the *Figaro* and *Gaulois*, but more especially and powerfully in the *Vie Parisienne*, the modish *Kladderadatsch* of our French capital. Any man, German-bred or Saxon-bred, Englishman or Scotchman, who can read currently and understand thoroughly the *Vie Parisienne*, is a Parisian born, or deserves to be so. Even the *savants* and philosophers begin to adopt a *patois* of their own.

I went to see the other day, at our Français, the revival of some *chefs-d'œuvre*, gems of our older school. The performers were young and clever. Some of them, namely, Mounet-Sully, energetic, and sculptural. The utterance good; acting excellent. Although all went exceedingly well, the heart of the public was untouched. "Near me sat" (so speaks one of our contemporaries) "a dozen gentlemen, of about thirty or above that age, all men of good breeding, something like a deputation from the Jockey Club. They remained quiet, attentively listening, respectfully looking at the sacred play. By-and-by they began to yawn; some dozed a little, others fumbled into their pockets. Some one then exclaimed, 'It wants breadth!' and another, 'Really Andromache plays too much with the corpse!' The latter being weary of the sentimental coquetry of the Greek widow, the former of the narrow compass into which Racine's plot is compressed." Neither of them felt the fine points, the depth, and the sweet cadences. Yes, gentlemen, Racine wants breadth; you are too broad for him, he too delicate and refined for you. Breadth he never sought; he wrote for his little circle of *beaux esprits* and *beaux seigneurs*, whom he took to be the whole world. He did not write for you, who call yourselves aristocrats, and are in reality no such thing. Aristophanes wrote cynical, half-naked, half-tipsy comedies, to please his fellow Athenians, who were not ashamed to go about in the same Bacchanalian, indecent predicament. Never think of pulling violently off any drama from its parent stem, public opinions and manners, whence it draws its very nourishment and life.

Sardou now reigns. He has overstepped even Dumas *filis*. He is the undoubted successor of Scribe, and a universal favorite. More satirical, personal, and vindictive than Scribe, less dry and philosophically inclined than Dumas, he perfectly chimes in with the humors of the day. Sardou is intentionally eccentric, fantastical, and delicate. The difference between him and Scribe is the same as between some *rusé* commercial traveller amusing his *table d'hôte*, with ready wit and fun of indifferent kind, and the high-bred young fellow, with exuberant spirits, who does not care much about restraint or *bon goût*, Sardou, son to a Southern *bourgeois*, a land-owner and spiritist of the environs of Cannes, passes, too, for a believer in *tables tournantes* and rappings;

does not discredit the popular rumor about his devilry, and very probably laughs in his sleeve. His talent was something in common with your witty old Congreve, our Dufresny, and the Venetian Gozzi, a man of mark evidently. What was legerdemain and *escamotage* with Scribe, became more subtle and scientific in Sardou. He has mysterious traps and hidden means of preparing a surprise for his audience.

Gondinet, Meilhac, Halévy, Pailleron, the rivals of Sardou, are not without merit. Gondinet has *bon ton* and a gracious delicacy, Meilhac a keen, ingenious vein, Halévy is a most facetious and happy caricaturist, and Pailleron knows how to wield the heaviest dramatic weapons. His dramatic vein is rather akin to your older dramatists' genius—men who wrote "A Woman Killed with Kindness" and "Oronooko." Like them, he has fire, moral intentions, a crude and incoherent sense of reality and passion in lumber and middle life. However, in every dramatic essay of the last twelve months there is a visible lassitude, an uncertain and unsteady handling, as if the authors did not exactly know what to do and what to think. The most decided success of the whole year has been an archæological *tour-de-force*, the revival of Pathelin's farce, which M. Fournier has very prettily modernized, and where Got plays admirably well.

We grow archæological, statistical, positive, much unlike our forefathers. I do not complain of that. The better and best books of the season, Taine's "Notes on England," for instance, or Maxime du Camp's "Paris, its Functions and Organisms," have something about them that is un-French—northern, analytical, matter-of-fact, thoughtful—quite alien to old Rousseau's fiery rhetoric or Voltaire's flippant causticity. In France now, as in Italy and Spain, a gradual change is going on, unperceived and slow, from the old formulas and hypotheses of the Latin races to the deeper sphere of science, inquiry, and truth. Cavour was half-English, half-French; Jovellanos, Manzoni, Azeglio, Tocqueville, Thierry, half-English too, leaned toward strict investigation, a severe search after truth, and gave a preference to facts over formulas. Phraseology is no longer the essential and unique quality required in an author. Men like Théophile Gautier, more sensuous than reflective, or like Scribe, more clever than real, are quite at a discount. The spirit of the age, even in France, grows inquisitive. The intelligent few who can further those ends, and satisfy such wants—few indeed, among us Frenchmen, but effective—become the secret leaders of the intellectual march. Even if they show themselves deficient in purity of language, elegance of style, originality, color, and grace, they find favor and ready acceptance. Let the book be as ill-written as can be, if there is solid stuff in it, many readers will praise it—it will be eagerly sought for. Books of a *procès verbal* kind, with dry ciphers, documents, raw and crude like Soulié's

"Documents on Molière's Life," and Fournier's numerous little books on our old authors, enjoy a kind of restricted but desirable popularity. They interest; they seem a relief after so many over-colored, over-stretched caricatures of fancy, satire, eloquence, and wit: so that the chasm between imagination and fact, between reason and fancy, widens every day.

Excellent editions of Dante, Quevedo, Cervantes, Chaucer, Shakespeare, etc., with commentaries, various readings, notes, and rectifications, are being published at Madrid, Florence, Vienna, London, etc. But nothing in that way can be compared to the admirable collection of our classics printed by the Maison Hachette, under the surveyorship of M. Adolphe Regnier. The last instalment, the "Mémoires de Retz," edited by M. Feillet, is a model of good editorship.

If accuracy of detail, exact erudition, and strict verification of dates, receive now more applause and are more generally honored than are brilliancy of fancy, flow of eloquence, or fertility of wit, the source of that preference awarded to the most arid and untoward part of the intellectual field is to be sought in the utter disdain with which, for some ten or fifteen years, historic truth and real facts have been handled by our most celebrated wits, Jules Janin, Lamartine, Victor Hugo, Gautier, Capefigue, etc.

GERMANY.—The war of 1870, which brought into being a politically united Germany, has had as little effect upon letters as the war of 1866, which broke a political bond of union between all German races that had long been rotten, but did not destroy the literary unity which links together the Germans who form the "New Empire," and the separate races which inhabit Salzburg, the Tyrol, Austria, Styria, Carinthia, and German Bohemia. So far as literature is concerned, the Germans form after Sedan, as after Sadowa, one undivided nation. The most important place in the roll of this year's literature is filled by an Austrian, a typical Viennese. The strangest circumstance is that, although for many years before his death regarded as dead, he has, at least out of his native country, only begun to live since his death. About twelve months ago, Franz Grillparzer expired in his eighty-first year, almost overwhelmed with tokens of honor, which, long withheld, had at last been showered upon him. The well-known prophecy of Lord Byron, that the world would have to learn to pronounce his unpronounceable name, has at length been fully fulfilled. The world till lately knew him only as a writer for the stage, and, even in that capacity, chiefly from the most severely impugned of his works, "Die Ahnfrau," and from the one-sided and fragmentary notices contained in the histories of literature. Now it has been surprised by the publication of a series of dramas which had remained in his desk, of numerous lyrical and gnomic poems, of prose works, partly

tales, partly criticisms, but especially of his autobiography. The complete edition of his works which, at his special request, was issued after his death, by the firm of Cotta, the publishers of Goethe and Schiller, is in ten volumes. The greater part of the first and sixth volumes, and the whole of the seventh, eighth, ninth, and tenth, consist of matter hitherto unprinted. Besides his tragedies already known, "The Ancestress" ("Die Ahnfrau"), 1817, which established his reputation as a "Schicksalstragöde;" "The Sappho" (1818), which led Byron to utter the prophecy I have mentioned; and the trilogy, "The Golden Fleece," the third part of which, the "Medea," is one of Grillparzer's most remarkable writings; the historico-patriotic plays, "King Ottokar's Fortune and End" (1825), and "The True Servant of his Lord" (1828); the love-tragedy, "The Billows of the Sea and of Love;" the *libretto* "Melusine," written for an opera, of which Beethoven composed the music, but "in his head only;" and the dramas on the Spanish, Grillparzer's favorite model, "The Dream, a Life" (1834), and "Woe to him who Lies;" there are the fragments which have already been played—"Æther," and "Scipio and Hannibal"—and three new and entire dramas—"Libussa," "Ein Bruderzwist im Habsburg," and "The Jewess of Toledo." The subject of the first of these is the legendary Amazonian Princess of Bohemia, whose hatred of the other sex Clement Brentano has commemorated in his romantic drama "The Foundling of Prague," a subject treated by Grillparzer not in the confused, *bizarre*, fantastic fashion of the "Mad Clement," but with fine, if unequal, psychological skill and pathetic power. The foundation of the second is the dispute between the high-spirited but irresolute Emperor Rodolph II., and his equally feeble but intriguing and grasping brother Mathias, the consequences of which helped to bring on the Thirty Years' War. The subject of the third is the same as of Lope de Vega's "Las Pazes de los Reyes y la Judia de Toledo;" but Grillparzer has infused into his play a mystical element peculiarly his own. The "Brother's Quarrel," was brought upon the stage of his native city immediately after his death, and has obtained a popularity, due not only to the increased reverence felt for the writer, but to its own merits. Grillparzer set a great store upon unity and simplicity of dramatic action, and on that point he was an admirer of the Ancients and of the French; and although, owing to his residence in Vienna, he was not influenced by the Romantic school and the Schlegels, to whom he owed his liking for Lope de Vega and Calderon, he disapproved of the Shakespearian historical drama, which he considered portrayed a series of scenes connected only by the unity of the characters. Still, in his "Brother's Quarrel," he produced a set of historical pictures of the time of the

great German religious war, in which almost the only connecting link is Rodolph II., a character the delineation of which was, to Grillparzer, a labor of love. This extraordinary saint, who shut himself up in his observatory, his library, his museum, and, for a change, sometimes in his stable, because he felt himself too weak to resist the innovating spirit he detested, becomes in the play the representative of the dramatist, who attributes to Rodolph his own individuality down to the smallest detail, his silence, his surliness, even his partiality for Lope de Vega. To be unable to go either with or against his time, was Rodolph's tragic fate, and it was also Grillparzer's own. It hindered him from giving an unqualified adherence to the national development of the German nation; and hindered the nation in its turn from fully recognizing his genius. The nation has certainly to atone for past wrongs, for neglecting one of its noblest and most gifted spirits, while it showered honors and compliments upon far inferior men. Yet it is not to be denied that the partly shy, partly bitter manner in which Grillparzer held aloof from the intellectual arena of his day, contributed to this result. That he knew his own merits, is clear from the statement which he makes in his autobiography, a book well worthy of attention, that he considers his plays to be the best contributions to the drama that have appeared since Schiller and Goethe.

In comparison with these rich accumulations, the results of sixty years of Grillparzer's poetic activity, half of which were unknown to the reading public, the productions which living writers have published during the year seem, when taken singly, poor, although that is hardly their fault.

Since Paul Heyse, the novelist and versifier *par excellence*, introduced the "Novel in Verse," this cross between poetry and prose has flourished in Germany. Julius Grosse, a poet, who adheres to a style strictly academic, shows himself punctilious about purity of classification in returning to the simple and suitable title "Narrative Poems." The Italian Idyl, "The Maid of Capri," is particularly noticeable for delineation of character and gorgeous descriptions of Southern scenery. At home and abroad these striking tales will secure for Grosse a sympathetic circle of readers, which his polished but frosty plays failed to attract. Next to these tales in ethical earnestness, and in deep and passionate feeling, stands the story in verse, "Emanuel d'As-torga," by the Countess Wilhelmina Wickenburg, *née* Countess Almásy, a lady whose Magyar origin hardly leads one to expect the German earnestness, penetration, and remarkable objectivity that her work displays. She has before now published poems which surprised the public by the didactic and epigrammatic talent they revealed. Her new production, the joint work of the countess

and of her husband, Count Albert Wickenburg, is a delightful imitation, in easy verse, of Michael Drayton's graceful fairy-tale, "Nymphidia." Hermann Lingg, too, has chosen as a subject that composer of the "Stabat Mater," whose princely father was beheaded as a Sicilian rebel in the presence of his son and his wife, the latter of whom died from the shock. The work appears in his new collection "Dunkle Gewalten." Lingg merely indicates Astorga's tragical fate in a vision at the close of his poem; while the countess has described both the execution and the artist's musical growth in the Spanish cloister whence he derived his name. Another poetess (Betty Paoli) long ago made Astorga's fate the subject of a tale in verse in her "Romancero;" yet, whether from ignorance or intention, she made Peroglese, the composer of what was long regarded as the finest "Stabat Mater," the hero of the tragedy. Lingg's latest productions are rightly named; they are "dark," obscure, and confused: the plasticity which formerly distinguished his conception has disappeared. "Lothar," by Adolf von Schack, the translator of "Firdusi," is a sort of versified book of travels, after the manner of "Ohilde Harold." The verse is sonorous, and the pictures of the East and of Spain are as clear as crystal. No narrative poem, however, has appeared this year that can compare with Hamerling's "Ahasuerus," or "King of Sion" (now in a fifth edition), or W. Hertz's "Hugdietrich's Bridal Journey," of which an illustrated edition has just come out.

Of the older song-writers, T. G. Fischer, little known except to readers of the Augsburg *Allgemeine Zeitung*, and Émile Ritterhaus, have published new volumes of poems.

The commission which bestows the "Emperor's prize," founded on the centenary of Schiller's birth, 1859, has this year made no award. That founded on Grillparzer's eightieth birthday (1871), to be given by the Vienna Academy of Science for the most successful play of the last three years, will not be bestowed till 1875. That this is not owing to any lack of dramas is clear from the fact that T. L. Klein, who is known by his learned but one-sided and ill-arranged history of the dramas, has alone published six volumes of plays.

At the head of the novelists of this year stands an Austrian lately deceased, one whom we were accustomed in his lifetime to meet in quite another sphere. Frederick Halm, the author of "Griseldis," has left behind him novels which appear in the two volumes containing his remains. "The Marchpane-Lissie" will insure its author a permanent place beside H. von Kleist among the few good story-tellers of his nation. Like Kleist, Grillparzer, and Hebbel, he, though a born dramatist, is also an eminent writer of tales. Grillparzer's "Poor Player" has already found a place in Paul Heyse's "Deutscher Novellenschatz," an

excellent collection of the best novelettes, of which four volumes have appeared. There are to be found in it little gems of art like Eichendorff's "Passages from the Life of a Good-for-nothing," Storm's "Inimense," Saar's "Innocens," and Heyse's "La Rabbiana," which the flood of ephemeral novels threatened to drive out of sight.

Our principal romance-writers amuse themselves with publishing new editions of their works. If number of editions be a test of merit, about the first place is due to Gustav Freitag, whose apotheosis of the *bourgeoisie*, "Debit und Credit," has gone through seventeen editions—after all, not so many as Kampe's "Robinson Crusoe," of which, not counting piratical reprints, eighty-one editions have appeared. Next comes Auerbach, whose "On the Heights" (his best work) has reached a tenth edition, while Gutzkow's "Roman Enchanter" is in a fourth. But, if we allow for the short space of time since Frederick Spielhagen made his *début* with "Problematical Natures," and consider the numerous reprints and popular editions of his subsequent works, he stands at the head. He may be regarded as the spokesman of the fourth estate, as Freitag is of the third; but he surpasses Freitag in impartiality and in objectivity of delineation. His characters are natural, and made lifelike by a few strokes. Besides, he possesses a descriptive power which raises some portions of his novels beyond reach of rivalry.

The supremacy of the physicists, hitherto uncontested, has been attacked in a very piquant and, in spite of its objectionable form, very biting book, by the astronomer, Prof. Zöllner, of Leipsic. The work is more especially devoted to the "Nature of Comets," but also treats of the history of the theory of cognition and of a variety of other things, such as the banquet given to Dr. Hoffman, the chemist, on his return to Berlin from England, in a way which will not please everybody. From a philosophical point of view, the book is important only in so far as it is a demand, proceeding from a follower of the natural sciences, for a proper handling of the entire body of the natural sciences, and a protest against the narrow devotion to a small specialty. Darwinism has brought once more into repute the zoological philosophy of Lamarck, and Lamarck, in his turn, the scientific ideas of Goethe, Schelling, and Oken, to which Hückel recurs in his "Natürlichen Schöpfungsgeschichte." The great success of Hartmann's "Philosophy of the Unknown" is due to its relationship to Schelling's "Spirit in Nature," and the growth of a need for philosophy among the representatives of the natural sciences. It forms an apple of discord between the Materialists on the one hand, who acknowledge no spirit, and therefore no unknown in Nature, and, on the other, the followers of Schopenhauer, who acknowledge a will, but not a "rational" will

in Nature. The one party raise, as J. C. Fischer, a "cry of pain from sound common-sense" against the "instinct" that Hartmann supposes. The other party, like Bahnsen, in his remarks on Hartmann and Hegel's "Philosophy of History," deny that there is any rational development. Whatever one may think of Hartmann's own system, he has undoubtedly reviewed philosophy when it was in danger of passing out of notice. Lectures, like Lazarus's "Psychological Glance at our Time," Strümpel's "The Concept of Causality, and its Place in Natural Science," Bona Meyer's speech, in which the Frankfort philosopher is severely censured, and "Schopenhauer as a Man and a Thinker," are proofs of the reawakened interest felt in philosophy. A thick volume, "Philosophy in Outline," by Adolph Steudel, "A Critical History of Æsthetics," by Max Schasler (which, as Hegelian, stands in contrast to the first history of the subject written, that published by Robert Zimmermann in 1858, which belongs to the Herbartian school), and the ingenious attempt of the psycho-physicist, Fechner, to apply the experimental methods of physics to æsthetic, are worthy of notice. A masterly notice of Trendelenburg, by Bonitz, appears in the *Transactions* of the Berlin Academy. The queer book of the philologist Nietzsche, which celebrates, in a cloudy, mystic fashion, "the birth of tragedy from the womb of Music," thanks to Richard Wagner's "Nibelungen," and "Tristan," and "Izolda," by Beelzebub casts out devils.

Of works not referring to the present time, I may mention the twenty-second volume of Ranke's collected works, which contains the "History of England in the Seventeenth Century." Not even the trumpet flourishes at Versailles have induced the most objective of all historians to turn his eye from the past to the present. Ebert's "History of the Prussian State," a well-written work, but not founded on original researches, has reached a sixth volume, which comprises the period from 1806-1815. It will not be easy to supersede Häusser's classical work on that time. The more modern history of Austria is too recent to admit of impartial treatment. Still, the third volume of the history since 1848, which treats of the accession of the Emperor Francis Joseph, is now known to be the work of Freiherr von Holfert, Under-Secretary in the Concordat Ministry, and has caused a sensation, as the author was one of the half-dozen people who were in the secret of what was going on.

Art and the history of literature have been enriched by Freiherr von Alten's edition of the correspondence of the Duchess Amelia of Saxony with the painter Tischbein, and by the printing of Goethe's letters to the philologist Eichstädt, who was editor of the *Jena Journal*. The latter complete the picture of Goethe, by showing his supervising activity losing itself in what was small and personal. The corre-

spondence of the "Frau Rath," Catherine Elizabeth Goethe, *née* Textor, has this year, for the first time, been completely collected, and furnishes a charmingly fresh picture of life in the imperial towns. Unfortunately, the celebrated "Je suis la Mère de Goethe," the reply she is said to have made to Madame de Staël, turns out to be a myth. The two ladies never met.

The most important book comes last. A book like "The New Creed and the Old," by David Strauss, could not have appeared in the days of "German Christianity." That the author dares, without much periphrasis, to ask the question, "Are we still Christians?" of course in the dogmatic, not in the moral sense of the term, and to answer roundly, "No," without being shut up in a fortress, is a proof that the Germany of to-day is not the Germany of earlier times.

GREECE.—In Neo-Hellenic literature incontestably the most important event of the year is the publication of the hitherto unprinted manuscript of a Greek *savant* of the eighteenth century. "The Hellenic Theatre," such is the title of the work, contains the names and works of five hundred Greek *savants*, who lived between the time of the capture of Constantinople and the year 1804; and will throw a vivid light on the history of Neo-Hellenic literature, and of the modern Greek Church.

In the sciences auxiliary to history, the learned numismatist, M. Paul Lambros, has, in a dissertation upon an unpublished seal of Pothos Argyros, a personage of note in the history of the Byzantine Empire, pointed out, with characteristic penetration and clearness, what results history can derive from the publication of Byzantine seals and medals. In another *brochure* he presents to us for the first time the coins of the Duke of Athens, Guy II., only son and successor of Duke William de la Roche. The Senate of the University has issued the first volume of the Manuscript Catalogue of our numismatic cabinet. This work, superintended with great care by the keeper of the cabinet, M. A. Postolakas, has been greatly praised by German *savants*.

A young and meritorious writer, M. Politis, has published the first volume of his studies upon the life of the modern Greeks, from the capture of Constantinople to the present day. This volume is devoted to the mythology of modern Greece. It has been crowned by the Council of the University, and at Paris by the Association "pour l'Encouragement des Études Grecques."

M. J. Papabuas has published a remarkable book on the Canon Law of the Eastern Church, and M. A. Paragopoulos an excellent treatise on Successions. In medicine, the work of the learned Prof. A. Anagnostaki, "Contributions to the History of Ocular Surgery among the Ancients," deserves the attention of foreign *savants*. In theology, the Archimandrite Andronicos has printed at Leipsic, under the

title of "Orthodox Greece," a book full of erudition, in reply to Leo Allatius, a learned Greek of the seventeenth century, who maintained that only ignorant Greek schismatics in his time rejected the authority of the Pope.

M. Sathas, who has long been occupied in discovering unpublished Greek MSS., has just printed at Venice the first and third volumes of his great work, "The Library of the Middle Ages." The first volume contains Byzantine writings, hitherto inedited, of much interest, especially for the history of the Greek Church.

Among academic and periodical publications I may mention: 1. The Neo-Hellenic *Analecta* of the Literary Association, the *Par-nassus*, which contains popular legends, songs, proverbs, riddles, etc., and carefully collected illustrations of the Neo-Hellenic language. The *Litterarisches Centralblatt* and the *Göttinger Gelehrten Anzeigen* have spoken in high terms of this publication. 2. The *Athénée*, a literary and archæological journal, edited by the professors of the university. 3. The fifteenth part of the *Archæological Journal*, edited by the learned ephor of antiquities, M. Eustratiades, and the learned secretary of the Archæological Society, M. Koumanoudes. 4. The *Æsculapius*, the organ of the Medical Society at Athens. 5. The *Bulletin of Pharmacy*, edited by Prof. Zavizanos. 6. The *Journal of Agriculture*, edited by Prof. Orphanides. 7. The *Echo of Orthodoxy*, conducted by Prof. Phocarites. 8. The *Analecta*, or Notes and Memoirs on Mathematical Subjects, edited by Prof. Nicolaides. Finally, the jury of the Olympian Games has just published a large quarto volume upon the Exhibition of the Second Olympiad, 1870. It is astonishing to see the progress Greece has made in the arts and sciences.

HOLLAND.—Seldom has the literature of the Netherlands assumed a character so one-sided as it has during the year now drawing to a close. Not only have such branches been neglected as are not in harmony with the Dutch spirit, but even those which hitherto have always enjoyed a steady amount of attention in Holland. This year philosophy is represented only by Joh. Kinker's "Commentary on Kant's Critique of Pure Reason;" and not a single contribution to the study of the Eastern languages has appeared.

On the other hand, theological literature has not diminished in quantity. J. J. van Oosterzee's "Sermons" ("Leerredenen") are being collected, and are to fill twelve volumes, four of which are to appear annually; while his "Handbook of Christian Dogmatics" is finished. The well-known theologians, B. ter Haar and W. Moll, are editing what is apparently a more popular publication, an illustrated "History of the Christian Church in Holland." To M. A. Kneen we owe a monograph on the Pentateuch. J. Doede's "History of the oldest editions of the New Testament in Dutch" belongs to bibliography rather than

to theology. Dr. B. F. Matthes has written a most meritorious work on the Brissoes, the heathen priests and priestesses of the Bugia. C. P. Tiele's excellent "Comparative History of the Egyptian and Mesopotamian Religions" is completed.

Not less numerous are the contributions to history. The National Festival on the 1st of April, the tercentenary of the capture of Brill, an event regarded as inaugurating the era of Dutch independence, naturally called forth a perfect deluge of works, some short, some lengthy, upon the struggle for liberty in the Netherlands. Of course most of them were merely ephemeral publications; but an idea of their number may be formed when I state that the list of them which the firm of Nijhoff published, as a supplement to their "Bibliography of the Netherlands," contains not less than 400 entries, upon twenty-two octavo pages. Among the more noteworthy of these works are those by H. J. van Lummel, H. F. van Rosmalen, W. J. Hofdijk, etc. In political circles in Holland a good deal of excitement was caused by the publication of J. A. Thijm and J. de Bosch-Kemper. The oration delivered in presence of the King by Dr. M. de Vries, Professor at Leyden, deserves especial attention, as it gave eloquent expression to the enthusiasm of the people, and thousands of copies of it were printed and sold.

Besides this special literature, Holland has, during the year, produced many works on various periods of history which possess a permanent value. An excellent contribution to the history of the rivalry between England and Holland in the seventeenth century, is S. Müller's "*Mare Clausum*," while the well-known law professor, G. W. Vreede, of Utrecht, has made the ministries of the Pensionaries Slingelandt, Steijn, and L. P. van de Spiegel, the subject of an interesting monograph. The work of P. Corstiens on the Prince Bishop of Münster, Bernhard von Galen, also deals with an epoch highly important to the States of the Netherlands.

The second volume has been brought out of the "General History of the People of the Netherlands," by Dr. W. J. F. Nuijens, a work written from a Roman Catholic point of view; while the "History of the Fatherland in the Sixteenth Century," by H. J. van Wees, seems intended solely for young people. Groen van Prinsterer's "Handbook of the History of the Fatherland," which treats matters from the orthodox Calvinistic stand-point, has reached a third edition; while, on the other hand, a new edition has come out of the "Historical Sketches" of Groen's most bitter political antagonist, J. R. Thorbecke.

Branches of history other than the purely political have been in a marked degree neglected. In archæology, heraldry, and genealogy, there is nothing worth of mention. The same may be said of the history of music and fine art, although a new journal of ecclesiastical

tical art has appeared, under the title of *Het Gildeboek*. It is the organ of the St. Bernulf Guild, in Utrecht. Two parts have been issued of a splendid work, edited by O. Ed. Taurel. Besides the letter-press there will be twenty-four copper-plates, intended to illustrate "Christian Art in Holland and Flanders," from Van Eyck's time down to the days of Otto Venius. Among the contributors are the most distinguished writers on art-matters in Holland and Belgium. There is more activity among novelists. Much that is good appears in the *Guldens-Editie*, which still continues. "A Burgher's Daughter in the Seventeenth Century," by J. M. E. Dercksen, has been particularly successful. The first edition of it was exhausted in six weeks. Besides, Madame Elise van Calcar has given to the world the first volume of a story, called "Children of Our Century," and A. Pierson promises a continuation of his romance, "Intimis." J. Keller is preparing a new work, under the title of "Derailleren." J. ten Brink and J. J. Cremer are also busy, while P. A. S. van Limburg Brouwer has published a philosophico-historical novel, "Akbar," the scene of which is laid in the East.

The older Dutch literature is not in a much better condition than the modern. Holland has displayed more energy in the compilation of lexicons. Among these, J. H. van Dale's "New Dictionary of the Dutch Tongue," which had got as far as the letter N when the compiler died at Sluis, on the 19th of May, deserves mention; and there is some prospect of its being continued by a competent hand. A. C. Oudemans's "Middle-Netherlandish Glossary," a useful and thoroughly scientific work, is making rapid progress, and this year has reached the Letter L. Of Von Sicherer's Dictionary, four new parts (down to S) have appeared this year.

Among general histories of Dutch literature we have the useful and comprehensive Handbook of Dr. W. J. A. Jonckbloet, which, properly speaking, is an extract from the writer's large "History of Literature," in two volumes, the second of which also appeared this summer; and the second volume of the German translation, by Madame Pauline Schneider, has left the press.

In natural science, also, there is a dearth of novelty.

I need not speak here of the periodical literature, which is extremely active in Holland. Several new journals have been started and others enlarged during the present year. The number of books and magazines for children is also large.

HUNGARY.—Since the Hungarians have been masters of their own destinies, the rapidity with which enlightenment has spread, the eagerness with which the Parliament votes large sums for educational purposes, and particularly the enthusiasm which animates all classes of society for progress and civilization, are

astonishing. To justify, if but imperfectly, my remark, I must begin with the Official Report of the Ministry for Public Instruction, a careful and elaborate *exposé*. In 1857, i. e., under the Austrian rule, 828,500 children attended the popular schools; in 1869, when self-government was only two years old, the number rose to 1,092,977. In the following year the figures became still higher; and, according to the latest Official Report, 1,287,320 children are taught in the various—partly private, partly governmental—schools of the country. Besides, there has been called into life a second university in the capital of Transylvania, endowed with all the adjuncts required by the age; and this, the most easterly outpost of European learning, will certainly contribute to the propagation of Western life in the hitherto dimly illuminated region of South-eastern Europe. The National Museum, so utterly neglected in former times, is flourishing under the able direction of the zealous and learned Mr. Francis Pulszky, and its valuable library, its gallery of pictures, and its zoological and archæological collections grow from day to day. An ethnographical section has also been opened in the last year, and the immense care bestowed upon the institute has greatly increased the interest felt in it. Since the year 1867, when visitors amounted only to 5,841, their numbers have gradually increased, and during the past year amounted to the astounding number of 180,729. A similar increase is observable in the case of the Exhibitions of Fine Arts, and of the private learned societies, and your readers will learn with interest that a Hungarian Geographical Society has been called into life during the last year.

So much for the conditions of general culture. In literature the foremost place belongs to those minute learned researches in the sphere of the Hungarian language to be found in Mr. P. Hunfalvy's book on the Konda Vogul dialect of the Finn-Ugric branch of languages, which are more cultivated in Hungary than anywhere else; or in "Az Igeidök" ("The Temporal Forms"), by G. Szarvas, where the author tries to settle the still doubtful use of certain temporal forms of the Hungarian verb. M. Szarvas has based his studies upon a diligent perusal of the oldest Hungarian linguistic monuments, and, although his theories cannot be generally accepted, the Academy has done rightly in awarding to the author the linguistic prize. We congratulate this learned society on its endeavors to free the Hungarian language, noted for its fine Oriental, i. e., Altaic, structure, from intruding Germanisms, and the essays of Messrs. Imre and Thewrewk, although far from exhausting this subject, deserve full attention. Surrounded by Teutonic, Romanic, and Slavonian elements, the language of the Magyars has always had a hard fight against foreign intruders, and, when we consider the genuine Altaic spirit of her proverbs, and the syntactical forms pre-

served to modern times, the good sense of her old writers is really to be wondered at. In order to commemorate their merits, the centenary of the revival of Hungarian literature has been celebrated in the person of Bessenyei, a poet of the past century, and a carefully-revised edition of the earliest Magyar poets down to Zrinyi, is planned.

In novels the present year cannot be reckoned fertile, and, as usual, the greater part of those published is due to Mr. Iokai, whose "Golden Man" has become the favorite of the reading public. Equally well received was the novel, "Az én ismerőseim" ("My Acquaintances"). The author, Mr. L. Tolnai, has a predilection for Hungarian topics, and we must acknowledge that his sketches are as clever as they are faithful, and that they are, above all, thoroughly Hungarian.

In history I have to note the continuation of some important works begun during the last few years. The third volume has appeared of "Pázmán és kora" (Pázmán and his Age"), by Dr. Frankel, in which we again encounter many interesting details, hitherto unknown, of the laborious and stormy life of that famous Hungarian prelate, and some new volumes have been issued of "Monumenta Hungarica," containing official documents for the elucidation of single periods, collected and edited by the best writers in history.

I will conclude my report on Hungarian literature with a short list of the best translations of the year. Mr. Iones Arany has successfully rendered into Hungarian Burns's "Tam o' Shanter;" Mr. Dóczy has just finished Goethe's "Faust;" and Mr. Charles Száz, the most fertile of Hungarian writers, has favored his countrymen with a good translation of Dante's "Divina Commedia." His translations and original works have just been published complete in three volumes. Prof. Augustus Greguss has likewise collected his various writings on æsthetics and philosophy, as well as his masterly essays and reviews, which are a good specimen of Hungarian prose, and contain valuable hints on the art of poetry, and on the Fine Arts in general.

Imperfect as this sketch is, it would be much more so were I to omit to mention the scientific investigations laid before the public in such periodicals as the "Ternészettudományi Közlöny," the report of the Geological Society, and the weekly or monthly papers of the Hungarian lawyers, engineers, and medical men.

ITALY.—After a year's silence, I am glad to be able to say that, during the interval, we have made progress. Twelve months ago I complained of the epidemic of verse-making, which seemed to me to have a tendency to produce a general softening of brains. During the past year, this epidemic, though it has not altogether ceased, has at any rate considerably abated. I must ask readers to pardon me if I tell them but little about fine poems or pa-

thetic romances. I shall only mention the drama of "Nerone," written in verse, by Signor Pietro Cossa, of Rome (who has just completed another play on the subject of *Plantus*). Last year I announced the approaching publication of a journal for women, directed by a lady, Aurelia Ciminio, called *La Cornelia*. It has encountered many difficulties and delays in seeing the light, and has only appeared within the last few days. The first number seems to promise well; and, while giving time for this promise to ripen, I will tell you of two excellent Italian publications which relate especially to schools and teachers—"La Storia della Pedagogia Italiana," by Signor Einmanuel Ceesia, the learned historian and librarian of Genoa, and a recent work by Count Charles Belgioioso, of Milan, entitled "La Scuola e la Famiglia." An educational purpose and design may be discerned in many of the works recently published in Italy—the "Cronache del Villaggio," by Antonio Caccianiga, which contains lively pictures of rural life; "I Padroni, gli Operai e l'Internazionale," in which Prof. Ignace Scarabelli has set forth, in an agreeable and popular form, the broadest and healthiest principles of political economy; the "Prediche di un Laico," in which Gerasimo Boccado, the learned political economist of Genoa, preaches morality, and the art of knowing how to live happily, with wit and earnestness combined; "Gli eroi del Lavoro," by Gustave Strafforello, of Porto Maurizio, the history of seven-and-twenty workmen who have made themselves remarkable. I must not omit to mention the great success of another work, by Mr. Smiles, on "Character," translated by P. Rotondi, and edited by Barbera, with an unpublished autobiography, written by Mr. Smiles for the Italian edition. While on the subject of translations from the English, I should mention Dr. Smith's "History of the East," translated by M. J. Carraro; also a new translation of Shakespeare, made under the supervision of Prof. Christophe Pasqualigo. I do not feel sure that I am not committing an indiscretion in telling you that the celebrated translator, Andrea Maffei, has just completed a version of the last canto of Lord Byron's "Childe Harold." Another work well worth mentioning is one that has had some success in Italy, "A Comparative View of the Municipal System in England and our Commercial Law," by Signor Manfrin.

The Professors Paul Mantegazza, of Lombardy, and Paul Liroy, of Venice, do the world of science for us all. The first is a distinguished anthropologist, and the director of our Anthropological Society. He is the Professor of Anthropology at the Institute of High Studies at Florence. Signor Liroy is a naturalist, full of poetical feeling and talent. These qualities shine forth brightly in the curious work he has just published, "Sulla Legge della Produzione dei Sessi." It cannot be asserted

that M. Liroy has found the key to the mysterious law which, from the earliest antiquity to the present time, has perplexed and tormented the brains of the learned; but there is much in the pages of M. Liroy which is valuable as a contribution to science, and his book is extremely witty, and pleasant to read. I must not quit the subject of naturalists without mentioning two works by two distinguished travellers and naturalists, both of Genoa, Prof. Arthur Issel, who has published an interesting narrative of his travels among the Bogos and the Red Sea ("Viaggio nel Mar Rosso, e tra i Bogos"), and the Marquis Jacques Doria, under whose supervision the important work, "Annali del Museo Civico di Storia Naturale di Genova," has been produced. Books of travel naturally lead me to speak of the splendid edition which that young, intelligent, and highly-cultivated Oriental scholar of Lombardy, the Marquis Gian Martino Arconati, has recently published in Turin, at the Bona printing-office. He calls it "Diario di un Viaggio nell' Arabia Petrea." The diary consists only of the notes made by the intrepid and intelligent traveller in his daily journal, but the book reads like a romance, and, by reason of the force and simplicity of the recital, the work ought to find favor with English readers, for it is free from false sentiment, and contains no fabulous adventures, but there is a certain dash of humor which seasons the whole, and makes the work delightful. These travels are in one superb quarto volume, of four hundred pages, illustrated by numerous photographs, and accompanied by a good map. The Marquis Arconati has taken us to the East. Let us delay there for a moment. He has shown us the Arabs of to-day, while Signor Michel Amari, the illustrious President of our little Oriental Society (which is about to issue its first *Annuario*), has now published the third volume of his important work, "Storia dei Musulmani in Sicilia" ("The History of the Mohammedans in Sicily"). The young Orientalist, Italo Pizzi, of Parma, has translated into blank verse the episode of Shahnameh, "Storia di Sohrab." Prof. Antelmo Severini has translated from the Japanese into the best Italian a very curious little romance, entitled "Uomini e Paraventi;" Prof. Fausto Lasinio watches with care over the text of "Averroes;" and, in a word, all the Oriental scholars in Italy have given signs of being alive.

Considerable advance has been made in the study of our language and of our various dialects. A young professor, Signor Napoleon Caix, has just written an excellent essay, "Sulla Storia della Lingua, e dei Dialetti d'Italia;" Prof. R. Fornaciari, upon the traces of the work of Fr. Diez, gives a *résumé* of "La Grammatica Storica della Lingua Italiana;" Dr. A. U. Cannello has published some good articles on Prof. Diez and Romance Philology, and Dr. F. D'Ovidio on Italian Grammar. But the work which will do most service to con-

temporary philological science in Italy is due to Prof. I. Ascoli, of the Academy of Milan. This eminently learned man, this subtle and profound analyst of Indian and Neolatin morphology, has just written a large volume of "Saggi Ladini," in which he gives us the historical grammar of the Ladin's dialect (from Coire, in the Grisons, to the farthest extremity of Friuli). The "Saggi Ladini" form one portion of a new collection which Prof. Ascoli is making, under the title of "Archivio glottologico Italiano," with which the most active and intelligent of the Neolatin philologists are connected, and where they labor on common ground. Prof. J. Flechia will shortly publish in this collection his important essay upon the Dialects of Piedmont.

Historical literature has been by no means neglected during the course of the past year. I need only mention the "Note di Letteratura Italiana," in two small volumes, by Prof. Pietro Corbellini, a study on the condition of contemporary Italian literature in Venetia. (It is by Signora Luisa Codemo de Gerstenbrand, author of "Scene della vita Veneziana.") She is a lady of high cultivation and much intelligence. She also wrote "Scene della Guerra dell 1848.)

As regards biographical monographs, I can recommend one excellent work, by Antonio Mastscheg, of Venice, upon "Cesare e il suo tempo," and the good monograph of Prof. Alberto Errera and Cesare Fingi on Daniele Manin and his time. Auguste Alfani has produced a work, for the use of Catholics, upon the philosopher Horace Ruccella. Federico Odorici, the librarian of Parma, has brought out a book which is rich in curious and hitherto inedited documents upon his illustrious friend the late Count Cibrario, "Il Conte Luigi Cibrario e i tempi suoi." It is full of historiettes, and gives valuable details of the political life of King Charles Albert. While speaking of artistic literature, I must not omit to mention the beautiful book which the Marquis Pietro Selvatico has composed for the use of schools of design, "Il Disegno Elementare e Superiore."

I must call attention to the interesting volume on the family of Leonardo da Vinci, "Ricerche su Leonardo da Vinci," by Signor Gustavo Uzelli; and also the splendid edition, in quarto, of the unpublished designs of the works of Leonardo which forms part of the Code Atlantique of the Ambrosiana Library at Milan.

Father Garrucci has issued a splendid edition of his "History of Christian Art during the First Eight Centuries," published at Prato; and, thorough Jesuit as he is, I can heartily and sincerely recommend it. Several other historical works deserving of notice might be mentioned, and I would especially call attention to the "Inventory of the Archives of Lucca," published by Signor S. Bongi; also to the "Archivio Veneto," which Prof. Adolfo

Bartoli has published in Venice. He is also the author of a "History of Italian Literature during the First Centuries." The "Studi Storici," by Prof. Luigi Mariani, are worth reading; and there are several detached historical studies which would repay attention. As to our philosophers, I have omitted them as designedly as I omitted the poets, although it is possible to speak favorably, in a literary point of view, of two recent works of Catholic philosophy—one by Auguste Conti, "Il Bello nel Vero," and the other by the idealistic philosopher, Francesco Bonatelli, entitled "La Coscienza e il Meccanismo Interiore," belonging to that school of neo-Platonic neo-Pythagorean, which in Rome is represented by the periodical *La Filosofia della Scuole Italiane*, of which the illustrious Count Mamiani is the conductor, and to which Signors J. M. Bertini, Luigi Ferri, and Giacomo Barzellotti, are contributors. In opposition to this, two other schools of philosophy have arisen in Naples—one, Hegelian, which is represented by the *Revue Napolitaine*, edited by Profs. Spaventa and Fiorentino—the other, which is positivist in its tendencies, finds its organ in *La Rivista Critica e di Filosofia Positiva*; and its editors are two young Neapolitans—one of them is the philosopher Andrea Anguilli, the other, the archaeologist, Hector de Ruggiero.

NORWAY.—I propose to give a notice of some publications that have left the press during the course of the year 1872, having first called attention to three literary productions of more than ordinary merit. The first of these is Ivar Aasen's *Norsk Ordboek* (Norse Dictionary, a Dictionary of the Norwegian Dialects)—a comprehensive work, which forms a companion volume to the author's well-known *Norsk Grammar*; the second is the "Samlede Afhandlinger" ("Collected Essays") of the late P. A. Munch. The Storthing having granted the necessary funds, the task of publication was intrusted to a young historian, Gustav Storm, who has lately been honored with the Gold Medal of the Danish Philosophical Society, for his essay on the sources of the historical writings of Snorre Sturlasson. The third work is "En Sommer i Finmarken, russisk Lapland og Nord-Karelen" ("A Summer in Finmark, Russian Lapland, and North Karelen"), by J. A. Friis, Professor of the Lapp Language in the University of Christiania. There can be little doubt but that the author is more intimately acquainted with the language and habits of the Lapps than any person now living.

Theology is represented by the *Theologisk Tidsskrift for den evangelisk-lutherske Kirke i Norge* (*Theological Magazine for the Evangelic-Lutheran Church in Norway*), conducted by Profs. C. P. Caspari, Gisle Johnson, and R. T. Nissen.

Historical literature has been enriched during the past year by several valuable productions. The "Codex Frisianus," a collection

of Norse Sagas, has been given to the world by Prof. C. R. Unger (the well-known editor of the "Heimskringla," "Morkinskinna," "Flateyjarbók," the Saga of Thomas à Becket, etc.). The eighth volume of "Diplomatarium Norvegicum," being a series of ancient epistolary documents throwing light on the social structure of Norway and her foreign relations during the middle ages, embracing language, customs, distinguished families, legislature, the administration of justice, by C. R. Unger and H. J. Huitfeldt, has appeared; also the fifth volume of "Norske Rigsregistranter," by O. G. Lundh and J. E. Sars. The *Historisk Tidsskrift* is published by the Historical Society. This society has likewise published the "Memoirs of the late J. H. Voght, Minister of Finance," and a biography of Jens Bjelke, the Norwegian Chancellor, who flourished in the seventeenth century, edited by Ingvar Nielsen. L. Daae, Librarian to the Norwegian University, is the author of "An Historical Account of the City of Christiania, from 1624 to 1814," and the "Memoirs of the Late Conradine Dunker," edited by H. J. Huitfeldt, give us a lively picture of society in the Norwegian capital in the beginning of the present century. Madame Dunker was a sister of Prof. Hansteen, celebrated for his discoveries in magnetism. A critico-historical work of value, "Ludvig Holberg the Comic Dramatist: his Predecessors and Imitators," by Olaf Skarlan, is in the press. The translation of the Sagas of Norwegian Kings, so ably commenced by P. A. Munch, the historian, has been completed by Prof. Olaf Rygh; and Karl Sommerfelt has given us a Norse version of the Saga of Njaal. The Norwegian Society for the Publication of Ancient MSS., assisted by Prof. C. R. Unger as editor, has completed the publication of the *Mariu Saga*—an extensive collection of legends of the Virgin, and of the miracles she has performed. This society has also continued the publication of *Konunga Sögur*.

In philology, we have to notice a portly volume from the pen of J. Lieblein, "Dictionnaire de noms hiéroglyphiques en ordre généalogique et alphabétique, publié d'après les monuments égyptiens." "Om de romanske Sprog og Folk" ("The Romance Languages and Romance Peoples"), by Johan Storm, contains philological observations made during a sojourn in France, Spain, and Italy. From the pen of Prof. J. A. Friis, we have "Lappisk Mythologi, Eventyr og Folksesagn" ("Lappish Mythology and Folk Lore"). The Bureau for Geographical Surveys publishes an annual Report for the use of the Merchant Navy; also topographical maps of Norway, in three series, and excellent hydrographical charts of the Norwegian coast. Herr Kjær has likewise compiled "A Statistical Handbook of Norway," in a compendious form; and Ch. A. Wulfsburg has sent to press a series of lectures "On the Natural Resources of Norway."

A posthumous work of the late eminent jurist, Prof. A. M. Schweigaard, "On Bankruptcy and the Division of Successions," has lately appeared; and we must not omit to notice "Contributions to Norwegian Criminal Law," by P. O. Lasson, Chief-Justice of the Supreme Court, and D. Schnitler's able work "On the Police Laws of Norway." L. K. Daa, an historical and political author of repute, has started a political and literary review, the *Tids-Tæller* (*Chronicles of the Times*).

In belles-lettres few original works have appeared during the last year. From the pen of Henrik Ibsen, who is still resident in Dresden, we have a volume of poems; and a third edition of "Kongsemnerne" ("The Pretenders to the Crown") has left the press. Bjørnstjerne Bjørnson has completed a new drama, "Sigurd Jorsalafare" ("King Sigurd the Crusader"), the music by Edvin Grieg, a talented young composer. A people's edition of Bjørnson's "Tales of Norwegian Peasant Life," including "Brudeslaatten" ("The Wedding Dance"), not before published, is just ready. Students of Norse literature will be glad to learn that we have now a biography of this versatile author, including a full account of his literary labors during a period of thirty years, by Alfr. Larsen, with a complete bibliographical review by J. B. Halvorsen. There still remain to notice a translation of Sir Walter Scott's "Lady of the Lake," in the metre of the original, by Prof. A. Munch, the poet; and a Norwegian metrical translation of Goethe's "Faust," by Fr. Gjertsen, which, however, had been previously known to the public from the performance of that tragedy in Herr Gjertsen's version, at the Christiania Theatre.

Paul Botten-Hansen, librarian to the University of Christiania, had completed, shortly before his death, in 1869, a valuable work, entitled "La Norvège Littéraire: Catalogue systématique et raisonné de tous les Ouvrages de quelque valeur imprimés en Norvège ou composés par des Auteurs Norvégiens au XIX^e Siècle, accompagné de Renvois, Notes, et Explications littéraires, ainsi que de Notices bibliographiques sur les auteurs, etc., précédé d'une Introduction historique." This book and "Norsk Bogfortegnelse, 1814-'47" ("List of Norwegian Publications"), by Martinus Nissen, and "Norsk Bogfortegnelse, 1848-'65," by P. Botten-Hansen and Siegwart Petersen, furnish complete information for those years on the subject of Norse literature.

PORTUGAL.—The statement that Portuguese literature is "a bad translation from the French" is not far from being correct; and there is reason to fear that, if it be true, the literature of Portugal is the expression of her social state. The Napoleonic rule has passed away, but it will be long before the South throws off the moral infection of the manners of the Second Empire, and the pernicious literature that empire encouraged will, for some years to come, be the intellectual food of our

youth. The "Homme-Femme," of M. Dumas, and the sequel to it, have been translated, read, and enjoyed! A second edition is announced, and some writers have lowered themselves by taking part in the discussion, "a proceeding," says M. Castello Branco, "more discreditable than even the act discussed." Thanks to the combined lack of moral sense and of criticism that prevails among us, all the literary sewerage of France is translated into Portuguese, without respect either for modesty or good taste. I pass in silence the forty and odd novels which have appeared in the last twelve months.

We do not possess a single general history of Portugal. Those which exist have been written in France, England, or Germany; but, of course, the task is a difficult one for any writer who has not access to the documents reposing in the archives. The Government has attempted to supply the defect by commissioning certain *littérateurs* to write the history of particular centuries—a clumsy expedient, which necessarily destroys the unity indispensable to works of this kind. M. Rebello da Silva, to whom was intrusted the history of the seventeenth and eighteenth centuries, has been overtaken by death at the moment that he was giving to the world the fifth volume, which brings the work down to the end of 1641. Half of the fourth volume, and the whole of the fifth, are devoted to the social and economical history of the monarchy at that epoch. M. Latino Coelho, who, as I write, is on the point of publishing the first volume of the "History of the Peninsular War," is likely, if one may judge of a book by the talents of its author, to produce a most remarkable work.

M. Herculano, the first of the Portuguese writers, is just issuing his miscellaneous works. This is good news. It is a pity that, in forsaking literature for agriculture, M. Herculano leaves unfinished his "History of Portugal" (4 vols.), a work which forms his real title to fame, to which he devoted twenty years, and which no one is competent to continue in a proper manner. The "History of the Establishment of the Inquisition in Portugal" (3 vols.), the last of his historical labors, is founded upon authentic documents, and deserves to be read in England.

M. Theophilo Braga, Professor of the History of Literature in the Faculty of Arts, has published his studies upon "Bernardin Ribeiro and Bucolic Poetry," perhaps the best of his books. Now, for the first time, the story of the allegorical romance, "Menina e Moca," which has given rise to so many conjectures, has been cleared up. Camoens has been made the subject of a monograph, "Camoens e os Lusíadas," by M. Leoni. The author has not had access to any documents that had not been previously made known by the Viscount de Juromenha; but, having weighed again the materials already published, M. Leoni has, I

think, succeeded in detecting some mistakes made by the official editor with regard to the amours of the poet, his exile, the shipwreck, etc. About the poem itself he tells us nothing new.

In science there is no novelty. M. Aguiar and M. Bocage, having learned by experience that the public do not care for labors and discoveries in chemistry or in natural history, send their communications to the scientific societies of England and Germany, where they are better known than in Portugal.

The Patriarch of Lisbon (Cardinal Saraiva) left behind him tolerably numerous manuscripts on subjects connected with political and ecclesiastical history, antiquities, etc. The first volume of his works has just appeared: seven volumes are promised.

RUSSIA.—Though the bitter disputes about trifles continue to occupy the newspapers and to disfigure the political literature of the day, there is a better tendency observable in pure literature. One fault is common to Russian literature of every class—an execrable style. Hardly three authors in Russia are capable of writing clearly, concisely, vigorously, and forcibly.

In considering the Russian literature of the past year, the first place belongs by every right to Russia's greatest writer, Tourguénief. His novel, "Spring Floods," which was published early in the year, is, in many respects, one of his best works, and by its freshness, delicacy, and vigor, takes us back to his earlier tales. Another, and still more characteristic, reminiscence of his earlier style is "The End of Tchertopkhanof," the sequel to one of the most striking episodes in the "Memoirs of a Sportsman," which was promised to the world twenty-five years ago, but has only now been published. It is a most touching sketch of a man who, when all he loved have either died or deserted him, concentrates all his affections on a horse. His horse is stolen, but he spares no trouble nor money in the pursuit, and finally, as he supposes, recovers him. But, little by little, suspicions begin to come to him that the horse is not the same, and, when he is finally convinced of it, he kills him for the crime of resembling too closely the horse he so much loved, and soon dies himself from a broken heart. Next on the list comes "A Neglected Question," by B. M. Markevitch, a little-known writer, which, by its tenderness and originality, makes a great contrast to the rest of the works of fiction. Another new writer, Karazin, in his novel, "On the Distant Frontiers of Russia," describes, in a spirited and picturesque manner, the life of the Russian colonists in Toorkestan, an entirely new field for even a Russian novelist. "Alexis Slobodin," by P. Alminsky, apparently an experienced writer, under a fictitious name, is, in some respects, a remarkable book; and "Dilettanti," by Roemer. "The Cathedral Clergy," by Leskof-Stebnitsky, and Melnikof's

sketches of life among the Dissenters, are more or less praiseworthy attempts in the new field on which Russian fiction has entered.

Almost the only poetical book of the year is the collected edition of the poems of Ry-léief, a third-rate poet of the Pushkin epoch, which have been kept out of their proper place in Russian literature by the part the writer took in the revolt at the accession of the Emperor Nicholas.

"The Predecessors of Shakespeare," by N. Storozhenko, is a careful and valuable study of the earlier English dramatists, with the purpose of making clear the development and culmination of the English drama. The present volume is devoted to Heywood, Lilly, and Marlowe. Two new publications of the old Russian Lives of the Saints, with variations and comments, are valuable both for literature and history; and the eighth volume of the "Collection of the Department of Russian Language and Literature of the Imperial Academy of Sciences" is of great worth and interest. One of the greatest of Russian novelists, Count Leo Tolstoi, makes his appearance again this year, but this time as the author of an "Alphabet and Reader," for the use of children and schools. The book is not without its literary merits, for many of the short sketches and tales were written expressly for it by the novelist.

In bibliography we have three important books. The eight volumes of the "Russian Historical Bibliography," for the literature, both books and articles, of the year 1862, has just been published, some nine years behind its time. The "Bibliographical Index to the History of Russian and General Literature," by the painstaking V. Mexhoff, is a complete list, in systematic order, of all Russian books and articles in journals and newspapers which appeared in Russian from 1855 to 1870. It is simply invaluable. The "Catalogue of Russian Engraved Portraits," by D. Rovinsky, is also useful and valuable, and is the only contribution of importance to art history.

In books of travel there is little to record besides Ogorodnikof's hastily-written book on America, a new treatment of the same subject by Zimmermann, and E. Markof's excellent "Sketches of the Crimea," a region which the author has explored far more completely than most travellers, and of which he can speak with authority.

The important book of the year in philosophy is K. Kavelin's "Problems of Psychology," which is calling out a severe criticism on the part of the materialists.

What may be called folk-literature is this year unusually rich. There are the studies of Hilferding, on the "Ballads and Ballad-Singers of Olonetz;" of Kostomarof, on the "Ballad-Poetry of Great Russia," and "South-Russian Songs and Ballads;" of Rudtchenko, on "The *Tchumak* in Popular Songs;" and of Buslaef,

on "The Comparative Study of Popular Life and Poetry;" and the remarkable book of Vesselofsky, "The Slavonic Tales of Solomon and Kitovras."

In political and social science we have two volumes of collected essays on topics of the day, published by two newspapers, the *Citizen* and the *Week*. There is also an interesting and well-written series of studies, by M. T.—of, on "The Eastern Policy of Germany and Russification," which have been sharply and warmly controverted by the ultra-national journals. More important are "The Revenues of Russia" (published also in French), by the Academician Bezobrazof, a work of immense labor, and very useful to the economist and statesman; and the first volumes of "Principles of Political Economy," by Professor J. Babst. Mr. Babst has a clear and lively style, and the art of making himself readily understood. He treats the subject historically, and, in views, is a protectionist, having become converted from his former free-trade principles. Here should be mentioned "Die Industrie Russlands," by F. Matthal, a very detailed and systematic account of the development and present condition of Russian manufactures. The remarkable essays entitled "Ten Years of Reforms," which have appeared during the last two years in the *Messenger of Europe*, are at last issued in complete form. They are by A. Golovatcheff, and not by Grot, as I stated last year. It is a book of the highest importance. The Hebrew question is giving rise to a considerable literature, of which the chief books are the "Hebrews in Russia," by Orshansky; a new volume of the "Hebrew Library;" a collection of the "Laws relating to the Hebrews," containing many specimens of curious and contradictory legislation; and Shershefsky's "Book of Kagal," a refutation of Braphmann's well-known book. The Central Statistical Committee has issued the second series of the "Statistical Annual of the Russian Empire," full of late and new information; and "St. Petersburg," a collection of researches into the history, topography, and statistics of the capital. "Statistical Researches into the Sanitary Condition of St. Petersburg" is an excellent little book, by Dr. Hübner, with a sanitary map attached. Besides this we have "Russian Toorkestan," which treats of the geography and natural history as well as the statistics of that remote province. The "Calendar" of Suvorin is on a new plan, and, as it contains the essence of all information about Russia, must be on the table of every one interested in that country.

Besides numerous publications of historical material, nearly all the best Russian historians have given us something during the past year. Solovief has issued the twelve lectures on Peter the Great, which he delivered in connection with the Moscow Polytechnic Exposition, as well as the twenty-second volume of his "History of Russia," which covers that

period of the reign of Elizabeth between 1745 and 1748. From Kostomarof we have, in addition to the essays mentioned above, another article on the "Confused Period," and the twelfth volume of his "Historical Monographs," containing essays which have appeared before. In style and method Kostomarof is the exact opposite of Solovief. He is an artist as well as an historian. The first volume of Zabiellin's "Essays on Russian Antiquities and History" contains a selection of the labors of twenty years, and we must be thankful that these valuable studies are rescued from the various periodicals in which they were first printed, and are now made accessible. "The Conversion of the Uniates" is published from the manuscripts of the late Father Moroshkin, to which he had not put the finishing touches. It is a painstaking and conscientiously written work, which gives the whole history of the so-called forced conversion of the United Greeks of Lithuania under the Emperor Nicholas, and a translation of it would be very opportune at the present moment. Mr. V. Klyutchevsky has put much research and cleverness in "The Old Russian Lives of the Saints as an Historical Source." The chief independent work is the touching memoir of the Crown-Princess Charlotte, the unhappy wife of the unfortunate Alexis, by Prof. Gerrye. "Russland unter Peter dem Grossen," by Dr. Ernst Herrmann, published at Leipsic, is a selection from the contemporary memoirs of Vockerodt and Otto Pleyer. Among the rich publications of historical material, we must notice the two volumes of the new collection, entitled "The Nineteenth Century," by the indefatigable P. Bartinief; the fourth and fifth volumes of the "Archives of Prince Vorontsoff," by the same editor; the seventh volume of the "Collection of the Imperial Historical Society," containing more than 400 autograph letters and papers of the Empress Catherine II., extending from 1744 to 1764, published by order of the hereditary grand-duke; four large volumes published by the Moscow Historical Society; the "Historical Papers collected by K. Arsenief," published by the Academy of Sciences; "Materials from the Military Archives;" and a new publication of the Archæographical Commission, called the "Russian Historical Library," devoted exclusively to the "Period of Confusion." All this is in addition to the interesting volumes of the two historical journals, the *Russian Archives* and the *Russian Past*.

In memoirs and biography we have the "Journal and Correspondence of Count Speranski," whose hundredth anniversary was on the 1st of January, 1872; the "Memoirs of Prince Shakofskoi," from 1706 to 1777; and the highly-entertaining "Memoirs of a Gendarme," by General Lomatchefsky, which give an inside view of the Polish disturbances between 1837 and 1843. The letters of Alexander

Tourguénief and those of Nicholas Tourguénief are very important for the reigns of Alexander I., and Nicholas, but were published abroad, and are forbidden by the Russian censorship.

In the interests of literature, it is impossible not to feel regret at the new strictness which has been added to the laws of censorship. The literature of the year has apparently been but slightly affected by them as yet, though the September and October numbers of the review *Conversation* are still retained in the censor's office. The changes of the law have rendered necessary an official journal, the *Index to the Affairs of the Press*, the title of which sufficiently denotes its purpose. It is curious in containing an *Index Expurgatorius* of foreign literature, and thus pointing out to the inquisitive the forbidden fruit, which they will, therefore, be most anxious to taste.

SERVIA AND ILLYRIA.—In the literature of the South Slavonians for the past year, we find proofs of considerable progress in all branches of science and art. The three chief agents in our intellectual advancement are: 1. Drushtvo Slovesnosti (the literary union in Belgrade); 2. The South Slavonian Academy in Agram; and, 3. Matica Srbska (the Servian Bee in Neusatz). Their publications are, for the most part, of an historico-philological character, and are calculated to arouse national feeling, by lively pictures of the deeds of former heroes, as well as to enhance the love for the national tongue, by pointing out the spirit and the refinement of the Servian and Illyrian dialects. Among the books published by individuals, and not by societies, we note: Ostrozinsky's "Minor Songs," a volume of spirited lyrics, and his "Elements of Æsthetics." From the same author we have "Prototyp Nedelsko," a national religious epic, much valued by his countrymen. Not less popular are the "Songs" of Peter Peradovic', an Austrian general, whose poetry is placed on a level with the old classics of the Ragusa school. His imagination is genial, his language distinguished by beauty, and he is an ardent patriot. Alexander Popovic' has made himself conspicuous by his "Dzennet" ("The Paradise"). In imitation of Dante, he chooses Hafiz for his *cicerone*, and is, consequently, led through all the delights of the Mohammedan Elysium, until he extends his arms toward a lovely houri, when every thing suddenly disappears, and he discovers that all has been but a dream. Arminius Pavic' has written a "History of the Drama of Ragusa," a work which has met with a warm reception among his countrymen; and Stoyan Novokovich has published his "History of the Servian Literature," in which he exhibits great diligence and knowledge, endeavoring, at the same time, to encourage the idea of a united Serbo-Croatian literature, a project which it would be difficult to realize, as the two nations differ in religion, have hitherto used two different alphabets, and are, besides, separated by essential differences in their dialects.

Giving, for the first time, an account of the South-Slavonian literature, it will not be superfluous to mention some of our principal *savants*. M. Novakovic' is busy with Servian biography; M. Dubrovatz with historical researches; Drs. Pano'ic' and Tchernagoratz with botany and zoology; the same branch is cultivated by Joseph Dusi and Radovanovic'; Dano'ic' is the grammarian; and Gavrilovic' has made himself known by his works relating to the statistics and geography of Servia.

SPAIN.—Political struggles exercise a most unhappy influence upon Spanish literature. However, notwithstanding these difficulties, as many works have appeared during 1872 as in the previous year, and in scientific subjects a decided tendency to progress is visible.

Dramatic literature, although not so copiously represented as in past years, has given, in 1872, signs of vitality, although many of the best dramatic authors, such as Iamayo, Ayala, Egulaz, and others, have not written any thing this year for the stage. Señor García Gutiérrez has brought out two dramatic works, a tragedy and a comedy, which have been justly applauded. The tragedy, which is historical and in verse, is entitled "Doña Urraca." Señor Gutiérrez's drama is remarkable on many accounts, and abounds in effective situations. The characters are admirably drawn, the interest increases as the play goes on, and the versification is brilliant. The other work by the same author, which has just appeared at the Teatro Español, is a comedy, "Crisalida y Mariposa" ("Chrysalis and Butterfly"). It is written in the style of Goldoni; the plot is not important, and the principal merit consists in the general style. This play is full of graceful sayings, and the dialogue is admirable. Among other dramatic works which have been brought out this year, the historical drama, "Doña Maria Coronel," by Señor Retes y Echevarria, deserves a special mention, for its versification and the dramatic situations it contains. Two comedies by Señor Marco, "La Muger Compuesta" ("The Fashionable Woman"), and "La Feria de las Mugerres" ("Women's Fair"), are full of dramatic interest and clever dialogue. Señor Hurtado, a popular dramatic author, is preparing a comedy, "El Wals de Venzano," which is intended to advocate spiritualism. Lastly, an historical drama, by Nufiez de Arce, has been brought out with brilliant success, "El Haz de Leña" ("The Log of Wood"), a work full of interest from beginning to end, and written in admirable verse. The triumph of the author is well merited.

In the lyrical poetry of the year we find a large number of works. We may mention with praise the "Inspiraciones," which Señor Peñaranda has published, with a prologue by M. Victor Hugo, in which he shows the sympathy he feels for the Spanish poet. Señor Peñaranda has also published two other volumes, "Presentimientos," and "Notas de una

Lira," in both of which he shows his good taste in imitating the best Spanish poets. Señor Arnao, a distinguished poet and fervent Catholic, has published a collection of poems on religious subjects, "*La Voz del Creyente*" ("The Voice of the Believer"), intended to celebrate the glories of Catholicism, which, besides being models of purity in form, are full of feeling. Señor Aguilera, one of the best modern Spanish poets, has also published a charming volume, "*La Leyenda de Noche Buena*" ("The Legend of Christmas").

Among the numerous novels which have appeared, Sr. Rodriguez Correa's charming little volume, "*Rosas y Perros*," must be mentioned. It is admirably written, and describes Spanish bureaucracy with most comic exactitude, and is full of interest from beginning to end. Sr. Fernandez y Gonzales, the most fertile of Spanish novelists, has published several novels this year, "*El Albigé de la Gitana*" ("The Gypsy's Well"), "*Los Martires de la Familia*" ("The Family Martyrs"), and "*El Montero de Espinosa*" ("The Huntsman of Espinosa"); and Sr. Selgas a charming novel, "*La Manzana de Oro*" ("The Golden Apple"). By Sr. Sepulveda we have "*En el Sitio*" ("On the Spot"), and "*La Muger de Usted*" ("Your Wife"). The distinguished author of popular tales, Sr. Trueba, has written "*El Gabán y la Chaqueta*" ("The Overcoat and the Jacket"); and Sr. Frontaura, "*El Hijo del Sacristán*" ("The Sacristan's Son"). Sr. Moya has given us "*El Club de los Solteros*" ("The Bachelors' Club"); Sr. Puig, "*Coche y Palco*" ("Carriage and Opera-box"); Sr. Lozano, "*El Criado Modelo*" ("The Model Servant"); Sr. Ruigomez, the pretty novel, "*Silvestre del todo*" ("Silvester Everything"); Sr. Diana, the interesting "*Calle de la Amargura*" ("The Street of Sorrow"); and Sr. Padilla, "*La Semilla del Bien*" ("The Good Seed"). These slight notes render it evident that the number of novels which have appeared during the year is large for Spain.

Señors Castro y Serrano and Juan Garcia, whose works are always received by the Spanish public with delight, have not published any thing this year. A witty anonymous work, and which has been well received, is "*Un Viage á los Infiernos del Sufragio Universal*" ("A Journey to the Regions of Universal Suffrage"). The author describes the intrigues at the elections in country towns in Spain. Great praise is due to Sr. Fastenrath's "*Pasionarias de un Aleman Spaniard*" ("Passion-Flowers by a German Spaniard"), in which he gives a critical account of the well-known Ober-Ammergau play. The author is a German, but he writes throughout in the purest Spanish. "*El Monge Gris*" ("The Gray Monk"), by General Ametller, is an entertaining volume, describing the conduct of the Aragonese and Catalans in the East during the middle ages.

Of books of travels, the only one deserving

especial mention is Sr. Alvarez's "*Viaje al Oriente*" ("Voyage from Manila to the Marianas"). Of a more serious description is Sr. Collé's fine imitation of the old Catalan work, "*Altra Peregrinacio del venturos Peregrini*" ("Another Perigrination of the Happy Pilgrim"); and, lastly, as a specimen of an interesting and instructive work, I may refer to "*Las Mugerres Españolas y Americanas*" ("Spanish and American Women")—a collection of articles written by the best Spanish authors, illustrated with engravings by the best living Spanish artists.

Of critical works, the most important, from the difficulty of the subject and admirable manner in which it is treated, is the first part of the "*Catálogo Descriptivo é Histórico del Museo del Prado de Madrid*," by Don Pedro Madrazo. This instalment includes the Italian and Spanish schools, and represents the work of many years, during which Sr. Madrazo has, by searching in the archives, and by the comparative study of the pictures of Madrid and those of other museums, been able to classify them with due exactitude. This volume is enriched with historical notes of great interest on the pictures and on the artists who painted for the Kings of Spain.

Some slight progress is to be observed in philosophical studies; and it is to be hoped that every day they will be more generally developed, owing to Sr. Fabie's translation of Hegel's "*Logic*," it being indispensable to popularize this study, as it is beginning to have followers in Spain.

The study of the classics is little pursued in Spain; for this reason, Sr. Ascarates's "*Obras de Platon*," "*Oraciones Escogidas de Demostenes*," by Sr. Roda, and Sr. Orellano's "*Grandes Poemas*," merit notice.

As regards historical works, I should mention that the "*Crónica General de España*" has this year been completed, a work which comprehends the history of the different provinces, written by different authors, under the direction of Sr. Rossell. The "*Historia General de Andalucía*," by Sr. Guichot, is also drawing to a close. The "*Documentos Ineditos para la Historia de España*," published by Sr. Salva, will probably end this year, with the fifty-sixth volume, or at any rate there will be an alteration in the form and manner of publication. Sr. Zaragoza has collected a series of interesting notes upon the history of the insurrections in Cuba. A distinguished general of the Spanish army, General Sandoval, has written an extensive historical monograph, a work of many years, on the battle of Aljubarrota, "*La Batalla de Aljubarrota*," which occurred at the end of the fourteenth century, and in which the Spaniards were defeated by the Portuguese. This feat of arms gave rise to the famous monastery, which was built by the Portuguese on the battle-field, and is one of the finest existing monuments of Gothic art. Sr. Guerra, the learned antiquary

and Academician, has written "El Libro de Santaña," a volume full of erudition. The "Historia del General Prim," by Sr. Orellano; the "Biblioteca de Autores Cordobeses," and Navarete's "Life of Sebastian Del Cano," the first navigator who went round the world, are all books worth naming.

Of publications illustrating archæology and the fine arts, the only one which has attracted great attention is *El Museo Español de Antigüedades*, under the direction of Sr. Rada. Several good articles have appeared in it this year, by well-known writers. Each number is illustrated with colored plates.

The Spanish Academies have published less this year, owing to the straitened state of their finances.

Societies whose object it is to reproduce rare books and manuscripts are becoming every day more general. The Society of "Bibliófilos Españoles" has published this year a novel written by Eximeno, a Spanish Jesuit, expelled from Spain during the eighteenth century, in which he ridicules the musicians and music of the time. The title is "Don Lazarillo Vizcardi," and the book is full of interesting musical information. The "Bibliófilos Andaluces" have published "Don Fernando Colon, Historiador de su padre" ("The Life of Columbus, by his Son"), "Relacion sobre las Comunidades de Castilla" ("Description of the Comuneros of Castille"), by Pedro de Alcoer, edited by Sr. Gamero. The "Biblioteca Catalana," edited by Sr. Aguiló, is one of the best reproductions of the day.

Of works on Natural Science there have been few. In the "Anales de la Sociedad Española de Historia Natural" ("Annals of the Spanish Society of Natural History"), there have appeared contributions by Srs. Poey, Perez Arcau, Espada, Colmeiro, and Solano, all of whom are considered in Spain as competent authorities. In Sr. Espada's description of some South American volcanoes he corrects the statements made by Humboldt and others. Sr. Espada is preparing a volume on a "Voyage in Europe and the East, made by a Spaniard in the Middle Ages."

The professors of the University of Granada have distinguished themselves this year by the high tone of their publications. Sr. Maestro has written a "Treatise on Anatomy;" Dr. Crens an "Elementary Treatise on Anatomy;" Dr. Velasco a "Treatise on Organic Chemistry," in which, for the first time, an effort is made to popularize modern ideas on the subject; Dr. Mallo an "Elementary Treatise on Medicine," in which he considers the necessities of the present day; and an interesting explanation has appeared, by Dr. Garcia, of the theories of Dr. Darwin, of which he is a fervent adherent. Dr. Cuestas, in his "General Pathology," impresses on Spanish professors the necessity of original observations. The author says that students out of Spain should

benefit by the local experience and study of Spanish men of science. Srs. Maffei and Figueroa, engineers of mines, continue their important work, "Apuntes." Sr. Vilanova gives us a study "On the Origin of Man," remarkable in its way. The same gentleman edits a volume which is being published in a very costly manner, "The Creation."

The scientific, literary, and artistic reviews which have appeared of late years continue to increase in number, and each group of special studies has a representative in the press, but I cannot mention each of these publications in detail in such a notice as this.

SWEDEN.—On perusing the various publications of this year in different branches of literature (the whole book issue can be estimated at from 1,200 to 1,300, periodicals not included), I find that the number of purely literary works of real merit is small. After the interesting and original development our poetry went through the first decades of this century, production came to a stand-still, and the literary results of the last year seem to have been mostly the collecting and reissuing of older works; while our neighbor-country, Finland, has produced the greatest poet of our day who uses the Swedish language—Runeberg. Among the volumes relating to the study of ancient poetry, the "Works of Bellman until 1772" (after a newly-found original manuscript) undoubtedly ranks foremost. It is Mr. Klemming, the royal librarian, well known as one of our highest authorities in the literary history of former times, who has the honor of this interesting publication.

It may be mentioned that the royal theatres have given, with much success, the "Winter's Tale" and "Romeo and Juliet," and that "Richard III." is just about to be put on the stage." In fact, the influence of English literature in our country is considerable. Of course a mass of sensation novels are translated and devoured; but a more healthy sign is the great admiration for the genius of Dickens. The new and excellent translation of his complete works, now appearing, has a wide circulation. We have capital translations of Shakespeare, Milton, Scott, Byron, Moore, etc., to which the last valuable addition is "Shakespeare's Sonnets," by Mr. Nyblom.

A more than passing attention will be given to the collection of political speeches by Mr. Gripenstedt, who, as a statesman and orator, has exercised a great influence on the development of our constitution during the last thirty years.

In the field of literary history we have to notice the continuation of Mr. Linnström's elaborate bibliographic work ("Svenkst Boklexicon"), and the valuable researches by M. Ljunggren and Eichhorn.

It is not unknown that Sweden shares with Denmark the honor of first having systematized prehistoric archæology. The hero of this science, Mr. Nillson, is now very aged, and sel-

dom publishes any thing new; but younger men have carried on the labor of their master. Among the various publications of this kind some are undoubtedly of great worth. We have, first, a new volume of the valuable "Antiquarisk Tidskrift för Sverige," with a remarkable article not yet finished, by the younger Mr. Hildebrand, about the development of the earlier forms of the fibula ("Bidrag till Spännets Historia"). Then a book of the same author, "The Swedish People during the Time of Paganism" (Svenska folket under Hedna-Tiden), is worthy of perusal, because of the new ethnological system which the writer tries to establish regarding the old inhabitants of the Scandinavian countries. Further may be mentioned "The Antiquity of Sweden" ("Sveriges Fornrid"), first part, with excellent engravings, newly published by Mr. Montelius; the continuation of Mr. Stjernstedt's Numismatic Researches. History is somewhat poorly represented. The most conspicuous productions are, the concluding volume of Mr. Cronholm's "History of Gustavus Adolphus," the forty-first part of Mr. Fryxell's "Tales of Swedish History," treating of the years 1765-'70; and two very laborious historico-statistical treatises, "Sweden in 1571."

As to modern statistics, a new edition of Mr. Fahræus's Handbook has left the press ("Statistisk och Administrativ Handbok för Sverige"). Besides, the public authorities since the middle of the last century have published very exact tables concerning the growth of population and other statistical topics. Such researches even now are encouraged by the Government.

LONSDALE, Rt. Hon. Sir WILLIAM LOWTHER, F. R. S., Earl of, born July 21, 1787; died in London, March 4, 1872. He was educated at Trinity College, Cambridge, where he graduated M. A., in 1808. In the same year he was elected one of the members for Cocker-mouth in the Tory interest, and represented that and another borough until December, 1832, when he was elected both for West Cumberland and Westmoreland, and, having selected the latter, he represented that county until he was called to the House of Peers in his father's barony of Lowther, September 6, 1841. He held several inferior posts in the administration under Lord Liverpool, was First Commissioner of Woods and Forests in the Wellington administration of 1828-'30, Privy Counsellor in 1828, Vice-President of the Board of Trade in Sir R. Peel's first administration in 1834-'35, Postmaster-General in his second administration in 1841-'45, and Lord President of the Council in Lord Derby's first administration in 1852. He succeeded to the earldom March 19, 1844. He maintained throughout his long public career a strong and consistent attachment to the Conservative party, with whom he uniformly acted.

LOUISIANA. The contest between the adherents of Governor Warmoth and the follow-

ers of Geo. W. Carter for the control of the Legislature of Louisiana, which is alluded to in the preceding volume of this work, was kept up amid intense excitement through the greater part of the month of January, 1872. On the third day of the session, Carter descended from the Speaker's chair to defend himself against charges of corruption and extravagance which had been brought against him, and to denounce the conduct of the Governor. As soon as he had resumed his seat, a motion was made, that the Speaker's chair be declared vacant, which he decided to be out of order, as a vote of confidence in him had been adopted the day before. Charges of fraud were then brought against Mortimer Carr and E. W. Dewees, formerly Speaker of the House, and chairman of the Committee on Contingent Expenses respectively, and, while a motion was pending for their investigation, the attempt was renewed, amid great disorder, to unseat the Speaker. This failed, and the charges against Carr and Dewees were indefinitely postponed. On the next day, January 4th, a report of the Committee of Elections was adopted, excluding from their seats four members, on the ground that they did not reside in the parishes which they claimed to represent, and contesting claimants in the Carter interest were admitted in the places of three of them. The seats of three other Warmoth men were also declared vacant, and immediately filled by adherents of the Speaker. Authority was also given to the Speaker to keep the metropolitan police about the hall, and to appoint as many sergeants-at-arms as he might consider necessary to preserve order.

Meanwhile the halls of legislation were surrounded by an excited crowd, kept under control by a large force of metropolitan police, called into special service by the Governor. In the midst of the excitement, it became known that Governor Warmoth and several of his supporters in the Legislature had been arrested by United States officials on a charge of interfering with the organization and conduct of the House of Representatives. They were taken before the United States marshal at the custom-house, and released on \$500 bail each, to appear when cited, and answer the charges. The Governor immediately issued a proclamation, calling an "extra session" of the Legislature, to meet at once, on the ground that a conspiracy had "developed itself to overthrow the government by unlawful and revolutionary means." The Senate assembled the same afternoon, but, no quorum being present, it adjourned after the reading of the Governor's proclamation. Fifty-six members of the House also assembled, chose temporary officers, and adopted the following resolutions:

Whereas, At a meeting of the House, at 12 o'clock to-day, several of the Representatives of the people were unlawfully and unconstitutionally arrested by certain parties styling themselves deputy United States marshals; and whereas, these outrages were committed alone for the purpose of breaking down

the constitutional majority in the House in order to enable the illegal minority to expel from the House certain members of the majority and to effect a revolution in the House and State government: therefore be it

Resolved, by the House of Representatives of the State of Louisiana, That we denounce the arrest of the members of this body as aforesaid, as an outrage upon the representatives of the people, and an insult to the dignity of the State, and a conspiracy to overthrow the government. Be it further

Resolved, That we declare the attempt of a minority of the House, assuming to act in the absence of the members who had been carried away by force, as utterly unconstitutional and revolutionary, null and void. Be it further

Resolved, That the Secretary be instructed to expunge from his minutes all record of the proceedings subsequent to the arrest of the members of this House.

The Speaker's chair was then unanimously declared vacant, and O. H. Brewster chosen to fill the same, and a permanent organization of the House effected. Resolutions were adopted, approving of the course of the Governor, and requesting him "to take all measures necessary to protect the General Assembly and the capitol from violence, and the members from intimidation." After adjournment, an address signed by 65 members of the Legislature was sent to the Governor, requesting him to take measures to prevent the "Carterites" from taking forcible possession of the Assembly halls. During that night and the next day the Mechanics' Institute, in which the meetings of the Legislature were held, was guarded by a large force of soldiers and police, under the control of the Governor. The "extra session" was continued, and, although there was no quorum in the Senate, that body adopted resolutions commending the course of the Governor, and denouncing the action of the "Carterites." It was declared that certain members were kept beyond the jurisdiction of the Senate, on board the revenue cutter *Wilderness*, and the Secretary of the Treasury at Washington was requested to order that vessel to land them at New Orleans. The adherents of Warmoth in the House reseated the members formerly expelled by the "Carterites," and ordered an investigation into the arrest of the Governor and others. The followers of Carter, finding the Mechanics' Institute guarded against them, assembled in a room over the "Gem Saloon," on Royal Street, and styled themselves the "legal House of Representatives." A quorum was not present, and sergeants-at-arms were sent out to arrest and bring in members. On the 6th of January, the rival bodies claiming to be the House of Representatives were both in session, and great excitement prevailed in the streets, hostile collisions being prevented by the police and military. The Governor issued a proclamation, declaring the body assembled at the "Gem Saloon" "revolutionary, unconstitutional, and illegal," and commanded all good citizens not to support or aid it. It further commanded that body to desist from the "illegal and unwarrantable arrests of citizens and members

of the House of Representatives, and its usurpations of authority," and threatened its members with arrest as "rioters, and disturbers of the peace." A writ of *habeas corpus* was also obtained from Judge Dibble, of the Eighth District Court, commanding Colonel Carter and his sergeant-at-arms to produce in court several persons alleged to be deprived of their liberties as citizens and members of the General Assembly. This order was disregarded, as was also another proclamation of the Governor, commanding all representatives in the Assembly legally elected to return to their seats at the Mechanics' Institute, and the body at the "Gem Saloon" to disperse.

On the 7th of January that body was still in session, and, in the excitement which prevailed in the streets, Walter Wheyland, a member of the Warmoth House, was killed. Carter and three of his supporters were charged with the killing, but, when Carter subsequently appeared before the First District Court to answer to the charge, Judge Abell declared the action of the Governor in bringing the charges against him "a clear case of conspiracy," and said that evidence clearly showed that Wheyland was shot by a policeman.

On the 10th a large force of the metropolitan police took possession of the "Gem Saloon," and Carter and his adherents transferred their sittings to the office of United States Marshal Packard, and afterward to the rooms of the Cosmopolitan Club. Attempts at compromise were now made, but without success, and on the 16th "Carter's House" telegraphed to the President of the United States, asking that an "inquisition be had into the revolutionary and illegal action of H. C. Warmoth," and into "the conduct of Major-General Emory, commanding the department, in placing Federal troops at the disposal of the Executive under the circumstances," and further, requesting that the troops be removed from the city pending the present contest, "unless martial law shall be declared." Meanwhile the *Wilderness* had been ordered to New Orleans, and the absent Senators made their appearance, but refused to take their places unless the armed force about the capitol was removed. On the 20th Colonel Carter issued a proclamation, declaring his intention to take forcible possession of the Mechanics' Institute, and calling on the citizens to aid him. On the 22d he appeared at the head of several thousand men with the avowed purpose of carrying out his threat, but was prevented by General Emory, who had orders from Washington to allow no conflict between bodies of armed men.

On the same day, January 22d, a quorum was at last obtained in the Senate, the absentees appearing in a body, and after an exciting debate it was declared, by a vote of 17 to 16, that the extra session of the Senate in December, 1871, and the election of Pinchback as President were constitutional and valid. Some of the Carterites also returned to their

places in the House at Mechanics' Institute, and on the 24th, a quorum being present, "the action of the House in extra session, expelling Geo. W. Carter from the House of Representatives, and the election of O. H. Brewster, Speaker of the House," were confirmed and ratified. On the next day, most of the members of the House presided over by Carter appeared and took their places. With a few exceptions, they were admitted as members, on the understanding that they recognized the House there assembled as the only legal House, and Mr. Brewster as the Speaker.

Immediately after these events, a committee, appointed by Congress to investigate the proceedings of the two factions and the conduct of Federal officials, met at New Orleans to take testimony. They continued their sessions about two weeks and examined upward of fifty witnesses, including all the leading actors in the stormy scenes of the last few weeks. They submitted a report to Congress in the latter part of May, which only stated facts without recommending any action on the part of the national Government. Mr. Scofield, the chairman of the committee, and Mr. McCrary, gave a circumstantial account of the difficulties, stating that the trouble was not between the government and officers of Louisiana on the one side, and the officers of the United States on the other, but between friends and opponents of the administration of Governor Warmoth. It was mainly a division or quarrel among the leaders of the Republican party, in which many of the Federal officials were prominent actors, some upon one side and some upon the other. The leaders of the Democratic party also participated in it, sometimes in alliance with one faction and sometimes with the other, as interest or consideration of duty seemed to require. The part taken by Federal officials in the quarrel, whether wise or otherwise, seemed to have originated entirely with themselves; there was no trace of interference by the Administration at Washington.

Mr. Smith concurred in their report, with additions and qualifications, and said: "It is not to be denied that in the new and disturbed condition of things, some unscrupulous men have got into office in Louisiana. The men who go South to hold office, and return when they lose their office, are not confined to any political party. The troubles in that State are similar in kind, although in perhaps a greater degree, to such as generally follow civil wars. The reconstruction of Louisiana was of necessity an upheaval of the very foundations of society. The State has suffered sorely in the pangs of transformation, but the situation is now being accepted, and confidence between the races restored. If this confidence be not disturbed, there is no reason to doubt that the State will enter upon a new career of prosperity and peace."

Mr. Spear and Mr. Archer said, that the po-

litical rascals and adventurers in Louisiana had quarrelled among themselves; and that the committee had no power to relieve the people of Louisiana. "Under a fair and honest election they will relieve themselves, and if the Federal Administration will intrust the business and interests of the Government in Louisiana to honest men, who care more to perform their official duties and thus serve the country, than to manage politics and control State Legislatures, United States troops will not be needed in New Orleans. With the interests of Louisiana directed by intelligence and guarded by the love of her own people, and with the interests of the national Government there in proper hands, no congressional recommendations will be needed to restore to her the unnumbered blessings of peace and the speedy return of a long-exiled prosperity."

The following statements were also made by the last-named members of the committee:

A series of infamous laws had been passed, placing imperial powers in the Governor's hands, which he had used with a reckless disregard of the interests of the people and with the double purpose of enriching himself and his friends, and of perpetuating his control of the State. Himself but a recent resident of Louisiana, he had gathered around him a swarm of adventurers from all sections, destitute alike of either personal or political integrity, and was fattening himself and them upon the plunder wrung from the property and toil of the people. Under the law, elections were a farce. The Governor appointed the registrars, and through them returned his friends to the Legislature and defeated his enemies. In several cases persons held seats in the House from parishes in which they had never resided and in which they were absolutely unknown. In one case a friend of the Governor was elected in a private room in a New Orleans hotel, at midnight, to represent a parish a hundred miles away. The police and other laws, entailing vast expense upon the people, vest monstrous powers in the Governor, which he has not failed to use in his own interest. The tax in the State is about two per cent., and in the city of New Orleans about five per cent. on a fair cash valuation. In 1868, the debts and liabilities of the State were \$14,000,000; and in 1871, three years later, they were \$41,000,000.

No bill that the Governor favors can fail, and none that he opposes can pass. He frequently appears on the floor of the Senate and House when important measures are pending, and stiffens members, to use his own words, by his "presence, cheerful conversation, pleasant manners, and so on." He terms under oath, his friends in the Legislature, "my crowd," and speaks of them and to them with that contempt which a thorough knowledge of their character amply justifies. The world has rarely known a legislative body so rank with ignorance and corruption. There is no direct evidence that the Governor ever received a bribe for approving or vetoing a bill, and he states, with emphasis, that he has never been corruptly influenced in his official action. He has been Governor four years, at an annual salary of \$8,000, and he testifies that he made far more than \$100,000 the first year, and he is now estimated to be worth from \$500,000 to \$1,000,000.

The session of the Legislature continued until the 29th of February, without further interruption, Mr. Pinchback presiding in the Senate, and Mr. Brewster occupying the chair in the House.

The principal bills of importance which were discussed were known as "reform measures," and included new registration and election laws, a repeal of the constabulary, a reorganization of the police and militia forces, and a thorough revision of the laws providing for the collection and disbursement of the revenues. On the 5th of February the Governor had recommended these and other measures of reform, but they all failed to be enacted, owing, it was said by his opponents, to the opposition of his friends and his own refusal to sign the registration and election laws which actually passed both branches of the Legislature.

A bill funding the indebtedness of the State was signed some time after the Legislature had adjourned. It makes it a duty of the Treasurer to ascertain and classify the public obligations, and creates a "fund for the redemption of the floating debt of the State." The old "redemption of the State Debt Fund," and the "Free-School Fund" are transferred to this new fund, and bonds were to be prepared for which warrants and certificates of indebtedness could be exchanged.

The political affairs of the State continued to be fraught with excitement throughout the year. A committee of fifty-one citizens of New Orleans had been appointed at a public meeting on the 1st of December, 1871, for the purpose of securing reform in the administration of affairs, so far as concerned the city. This committee made a report to a meeting called for the purpose, and held on the 17th of February. They had found that the troubles in the municipal government were due, in a large measure, to "State interference, and the manipulation of municipal affairs by the State authorities," and concluded that it was impossible to secure reform for the city until it was inaugurated in the State administration. "Disheartened," they say, "by the unblushing deceit of the executive and legislative branches of your State government, and convinced that no relief is possible while that government, as now constituted, remains in existence," the committee recommend "the rapid organization of the people of this city and all over the State of Louisiana, not into secret oath-bound associations, but into one grand party of reform." For the purpose of carrying out this recommendation, the committee called a "convention of the people of the whole State," to meet in New Orleans on the 23d of April. A provisional State Central Committee of the Reform party was appointed at the same time. On the 12th of March this committee issued an address, postponing the proposed convention to June 4th, and calling on all the friends of reform, both white and colored, to join the new movement. It attributes the troubles of the State, "the frightful spoliation and robbery, of which she was the victim, to a lack of sympathy and coöperation between the two great races inhabiting

our territory." It declares that "the treachery, duplicity, and tyranny of the present Governor of Louisiana have been established beyond controversy, and are now patent facts before a civilized world." The address concludes thus:

The necessity for a new organization at this time is manifest. The great and sudden changes which have recently taken place in the peculiar institutions of the South, and the manner in which these changes were wrought, left the two great national parties, so far as Louisiana was concerned, divided more upon issues of feeling and prejudice than of abstract reason. The consequence was, that the contest waged between those parties in reference to our local concerns had in them more of bitterness than is ordinarily the case. So that now it would be impossible, in our opinion, to unite the adherents of these parties under either name. The party we are now forming—for home purposes—will not, in truth, be a third party; for, unless we read badly the signs of the times, it will unite all honest men, and leave as the only issue that of virtue against vice. We believe, also, that history will bear us out in the assertion that, whenever such a conjuncture of affairs has arisen as now exists in Louisiana, a new party has necessarily emerged, through which the people have redeemed their State.

This committee, therefore, earnestly recommends that the people of each parish proceed promptly to organize themselves into clubs, and that every effort be made to send representative men to the convention. Your committee would further recommend that the great principle of equality in representation be kept constantly in mind, and that, as nearly as possible, the convention be composed in equal proportions from the two races.

The State Central Committee of the Democratic party adopted resolutions on the 23d of February, calling a State Convention, to be held at New Orleans, on the 18th of April, and issued an address, in which they also condemn the Governor for "the corrupt dispensation of his vast patronage, the boldness and frequency of his usurpation of power to strike down those in his own party who refused to become his personal adherents, his repeated acts of political treachery to the colored race, whose votes had elevated him to office." They claimed that their purpose was reform, and the rescue of the State administration from the corruption into which it had fallen. They say: "At a time when the material interests of the State have been made the object of legislative and executive robbery, when every household in the State is afflicted by the ruin which has resulted from the desolating legislation of the past few years, when the poor man and the rich man are alike made the victims of legislative and executive spoliation, when the absorbing question is that of taxation, and the universal cry of the people is immediate redemption from local and State misgovernment, the duty of patriotic citizenship is to silence the voice of mere party warfare."

Before the meeting of the Democratic Convention, a document appeared signed by some 500 citizens of the State, headed by Governor Warmoth, calling themselves "Liberal Republicans," and urging the people to send delegates

to the National Convention at Cincinnati. They condemn the Administration of President Grant, and accuse it of unwarranted interference in the affairs of Louisiana.

The Democratic Convention, which assembled on the 18th of April, continued in session three days, and finally adjourned to the 8d of June, without making any nominations. The time was taken up chiefly in heated discussions on the condition of affairs in the State and the proper course to be taken by the party. The following address and resolutions were adopted:

The present struggle of the people of Louisiana is for their homes and their liberties.

They are crushed with the weight of taxes; their courts are but a mockery of justice, and their Executive is a tyrant, who exercises an open and boasted control over the Legislature.

It is time, fellow-citizens, to assert your manhood and dignity—to cleanse the Augean stables—to re-establish the rule of law and justice, of economy and constitutional liberty. It is time to put the brand of infamy upon the brows of those who have dishonored and plundered Louisiana; to expel them from their high places, and make them give way to honest and capable men—the only fit representatives of a free and truly republican people.

Citizens of Louisiana! The Democrats of the State here assembled in convention, after deliberation in a spirit of harmony and patriotism, have come to the conclusion that the Democratic party shall confine its action to the selection of proper men for the redemption of the State from political and financial ruin—from tyranny and oppression. Let us, while we do justice to the colored man, do equal justice to the white man, and secure to every citizen the blessings of liberty and good government.

Resolved, That our designation of "Democratic party of Louisiana" is significant of the power of the whole body of the people, and is used to express our determination to secure to every citizen of this State the equal rights guaranteed to him by the Constitution of the United States and the constitution of Louisiana, and the laws made in pursuance thereof, and to effect a thorough reform in every department of the government of the State.

Resolved, That the union and coöperation of all the honest and patriotic citizens of Louisiana are necessary to defeat the unprincipled party now in power in this State, and to place the destinies of the State, the rights, liberties, interests, and honor of the people, in the hands of her noblest sons; and that we do most earnestly and respectfully invite the good people of the State to support the candidates who may be presented to them for the great and necessary work of reform.

Resolved, That the candidates for the offices of the State, whenever selected by this convention, must be honest and capable men, known by the people, and entirely worthy of their support and confidence.

Resolved, That this convention is of opinion that Governor Warmoth is unworthy of the respect and confidence of the people, and that any political connection with him would be dishonorable and injurious to the best interest of Louisiana.

A convention of that portion of the Republican party of the State known as the "custom-house ring," and headed by U. S. Marshal S. B. Packard, was held at New Orleans on the 30th of April. It was in session two days, and chose delegates to the National Convention of the party, and candidates for presidential electors. A long series of resolutions was

adopted, rehearsing the history and achievements of the Republican party, and indorsing the Administration of President Grant, and commending the general policy of the national Government. The resolutions relating to the affairs of the State were as follows:

Resolved, That it is a matter of congratulation that the national Republican party in this State has united to expel from the party H. C. Warmoth, the corrupt Chief Executive of the State, who has fraudulently manipulated the election laws, passed for good and proper purposes, to maintain himself and his minions in power and in order to enable them to plunder the State Treasury; and who has, by revolutionary acts, and by bribery, and by the unscrupulous use of the power vested in him as commander-in-chief of the metropolitan police and militia, controlled the General Assembly, so as to prevent him from being impeached for high crimes and misdemeanors; and who has refused to permit reform measures passed by the last Legislature to become laws by withholding his signature therefrom, among which acts are those guarding and restricting the registration and election laws, so as to prevent election frauds, although the passage of such acts was recommended in his messages to the General Assembly.

Resolved, That this convention approves and adopts the principles of State reform contained in the resolutions passed at the National Republican Convention of this State, on the 9th of August, 1871, and enlarged on by the resolutions adopted by the State Central Executive Committee of the party on the 7th of November, 1871, and which measures were reduced to the form of bills and introduced into the Legislature at its last session, but failed to pass on account of the opposition of the friends of Governor Warmoth, or failed to become laws on account of his withholding his signature. The following are some of those bills:

A bill to amend the registration law.

A bill to amend the election law.

A bill amending the printing law.

A bill amending the law in regard to assessing and collecting State and parish taxes—reducing the expenses thereof.

A bill providing for the general expenses of the State, reducing the expenses of the State government to within \$800,000; whereas it is now more than double this amount.

A bill repealing the constabulary law.

This convention, on behalf of the National Republican party of this State, pledges itself that the above and all similar State reforms meet with its earnest approval, and that this convention recommend that no candidate for State office shall be nominated by our party who is not by his acts and antecedents, as well as by his pledges, fully committed to all such reforms.

Resolved, That while steadfastly maintaining the integrity of the Republican platform and organization, yet, in the interest of reform and good government, in view of the present exigencies of our State, we welcome the coöperation of all honest men in securing the deliverance of our people from their present distresses; and to this end, as far as may be necessary, we are willing to concede such personal considerations to those of our fellow-citizens who may differ from us in political convictions, as will not conflict with our obligations to our party, and as may be needful in compassing the common objects sought by the good people of this State.

Resolved, That, in the opinion of this convention, the only legal remedy left to prevent the repetition of the election frauds, perpetrated under the direction and control of Governor Warmoth at the election of 1870, again at the election next November (inasmuch as he has refused to sign the amended registration and election laws, passed at the last ses-

sion of the Legislature), and which we feel confident he will repeat in favor of any party with which he may act—and we believe it will be the sole object of any party combining with him to obtain this service from him—will be the extension of the act of Congress of the 28th of February, 1871, so as to embrace all the parishes in this State; and we earnestly recommend Congress to so amend this act as to enable the people of this State, as citizens of the United States, fully and freely, and without restraint, to express their sentiments at the ballot-box.

On the evening of the second day Lieutenant-Governor Pinchback visited the convention by invitation and made a speech, in which he urged a reconciliation of the hostile sections of the party. He intimated that there was already an estrangement between his own adherents and those of Governor Warmoth, and said that there were now "three elements of the Republican party—the custom-house element, the Pinchback element, and Governor Warmoth." Two months ago, he had assured them that if they did not keep Warmoth, the Democrats would take him; but his custom-house friends had ridiculed the idea. It was now apparent to all. His opinion of the Democrats was then, and is now, that they will "support the devil to get possession of the State."

A meeting of citizens had been held in New Orleans in the early part of April, at which an association was formed for the resistance of excessive taxation. A second meeting was held on the 6th of May, at which resolutions were adopted, condemning the recklessness and extravagance of the State government, and declaring the purpose of the association to be "to resist by legal means the present exorbitant, illegal, and unconstitutional taxes now attempted to be extorted from us as citizens of the State and city." The preamble to the resolutions contained the following declarations:

The taxes paid are not disbursed in the general interests with economy, or a view to their diminution, but seem to be considered as a species of plunder, to be managed in the interests of the distributors as against the contributors. This being especially the case in the instance of the large sum annually wasted upon the military body known as the metropolitan police, as well as the immense amounts thrown away upon persons pretending to hold office as park, police, levee, and drainage commissioners, assessors, tax-collectors, inspectors, registrars or permanent committee-men, with numerous sinecurists, pluralists, and handy men generally, expensive, useless, and dangerous vampires, corrupted and corrupting. * * * Not only a pretended Legislature, very many of whose members were the creatures of the most corrupt practices of ballot-box stuffing, quadrupled registration, and voting by repeaters, and false counting of votes, have imposed upon us their conception of taxes, but they have passed the tax levies and appropriation bills through their body by notorious bribery, thus vitiating, as we believe, all powers they might have ever had to pass tax-bills, or make money requisitions upon or bargains binding the people, and earning for themselves the infamous notoriety of being, according to the language of the Governor, who ought to know them, the most disgraceful Legislature ever assembled in Louisiana. And further, seeing that such a pretended Legislature, on its own motion, and affect-

ing to empower and appoint a non-representative body calling itself the city administration, has thereby, through assessors who have an unlawful private interest in exaggerating, put an additional percentage on a pretended assessment, which it is endeavored to raise to \$300,000,000, that will make next year confiscations on State account alone to over \$7,000,000, and by multiplying assessments, as has been done beyond all reasonable and former bounds, it sought to extort from an impoverished people an annual taxation, upon these simulated assessments, of nearly 5 per cent. The exact figures being 2½ per cent. for the city and 2½ per cent. for the State, and further existing impositions, large as they are, do not form our only anxiety. They have for the past few years increased with such unexampled rapidity as to startle the most stolid and apathetic man, and arouse to positive resistance the most worthy and law-abiding citizens, for it is well known that still greater burdens are being prepared for us.

Bad goes before, but worse remains behind. We are informed by James Graham, Auditor, that the legislative appropriations for 1873 will demand an increase of eight mills on the dollar, in addition to the enormous amount now wrung from the taxpayers of the State, being 2 and 5 per cent. on an assessment of \$250,000,000, reaching the incredible sum of nearly \$8,000,000, gone for nothing.

Among the resolutions adopted were the following:

Resolved, That in the mean time we will pay no more taxes to State or city, being supported in this view by the opinion of able counsel, learned in law; but will, through our association, invoke the protection of the courts of the State and of the United States, to test our right of resistance to exorbitant and confiscating taxation imposed by a pretended Legislature, self-nominated, corruptly bought and sold by written contract, and sitting in defiance and contravention of the constitution of 1868, which declares that a representative basis shall be established and the representation distributed in accordance therewith, as well as our right to resist exorbitant taxation imposed by an appointed non-representative body of persons styling themselves the Mayor and administrators of the city of New Orleans.

The wing of the Republican party headed by Pinchback held a convention in the Mechanics' Institute, in New Orleans, on the 28th of May, for the nominal purpose of appointing delegates to the National Convention, and nominating candidates for State offices. After two days spent in discussion, the convention adjourned to meet at Baton Rouge on the 19th of June, but not until the following resolutions had been adopted:

Resolved, That we declare the Republican party of Louisiana in full sympathy with the National Republican party; that we indorse the platform of principles as laid down by the Chicago Convention.

Resolved, That we pledge ourselves and our party to the faithful execution of the constitutional and statutory provisions for the public education of all the children without distinction.

Resolved, That we insist upon the enforcement of the constitutional and legal guarantees of the civil and political rights of all men, without distinction of race, color, or previous condition.

Resolved, That a long train of evils must necessarily result from the effort being made by the Democratic party to obtain control of our State government, through dissensions in the Republican party. Among them we may mention the repeal of the civil rights law, the establishment of qualified suffrage, the destruction of our common-school system, repudiation of the State debt, and subjection of the

colored elements to bitter political and commercial proscription; and as abundant evidence is to be found in the tone of the press and in speeches that the sole object of the Democrats and Reformers is a political overthrow, and to this end they are subordinating the presidential and other questions: therefore—

Resolved, That in order to save the State from Democratic rule and to perpetuate free government, it is highly important that all Republican elements in the State should be united upon a ticket to be composed of true and tried Republicans, and to secure this end we recognize and tolerate existing differences of opinion upon material affairs.

Resolved, That we condemn the action of the Federal officials in this State in attempting, through arbitrary and illegal exercise of power, to interfere with the right of the people to peaceably assemble; to overturn our State government, and through combinations with our political enemies to overthrow the Republican party.

Resolved, That we recognize in Governor Warmoth an officer who has combined with an efficient discharge of public duties an unimpeachable fidelity to the principles and the policy of the party by which he was elevated to his high position; that to him the Republican party largely owes whatever of credit may be its due for and the fulfilment of those obligations which it assumed toward the people of the State in carrying out the principles of justice and equality, which are the basis of its organization; that the public owe to him chiefly the preservation and maintenance of public order, in spite of perils which were surmounted only by the exercise of extraordinary wisdom, courage, and discretion; that with his powerful conspiration the State may hope for a deliverance from many evils, the existence of which cannot be disputed, and the continuance of which would be disgraceful to the Republican party; and that he is our first choice for the office of Governor at the next election, that we present him as our candidate, and urge all other Republican organizations to indorse and support him.

Resolved, That in our honored fellow-citizen, Lieutenant-Governor Pinchback, we have a valuable and manly leader in the Republican party, one who can be trusted in the future with its interests as he has been in the past, and that we indorse him and declare him to be our first choice for Lieutenant-Governor, and we present him as our candidate, and urge all other Republican organizations to indorse and support him.

Resolved, That all true Republicans are devoutly desirous of averting the dangers which beset their party, and of reuniting that party for a common purpose: therefore—

Resolved, That when this convention adjourn, it does so to meet at Baton Rouge on the 19th of June next, or at such other time or place as may hereafter be indicated by the State Central Committee, for the purpose of making an effort to assure a union of all Republicans.

Governor Warmoth declined to be the candidate of the party represented in this convention, in a letter in which he says:

It now appears to be the intention of the majority of the members of the convention, on its reassembling at Baton Rouge, to attempt an alliance with the custom-house party, which is to meet at that place on the same day, for the purpose of reuniting with those whom I consider the most dangerous enemies of the country and the State, with the arrogant, dictatorial, and corrupt Administration of General Grant, and with the party which, under the leadership of his followers and agents, would subject this State to a continuance of a rule of ignorance, venality, and corruption, unparalleled in the history of any other community. The success of General Grant at the ensuing presidential election would be

a calamity such as cannot be contemplated without alarm. It would be the perpetuation, perhaps the permanent establishment of personal government in its worst form. It would be the commencement of imperialism in politics, and the utter and hopeless degradation of political morality. It would be the continuance of an odious executive and legislative tyranny which tramples with equal indifference upon the rights of persons and communities; which overturns all the muniments of public liberty, and drags thousands of peaceable citizens to the common jail on a false pretence of secret conspiracy; which uses the bayonets of its soldiery to overawe a convention of the people, and prostitutes the courts of the country, and the officers of the law, to the service of an audacious attempt to overthrow the government of a State.

It was in order to avert these evils, and to join in the general protest against these infamous acts, as well as to save this State from the further depredations of the ring of Federal officials who have persistently used their personal and political power to suborn and corrupt the Legislature, that I went to Cincinnati and participated in the nomination of Greeley and Brown. It is with the view of assisting to prevent the triumph in this State of a party whose success would fill the Legislature with the representatives of organized ignorance and unblushing venality, would cause irreparable injury to our commerce, would irretrievably ruin our credit, and bring contempt and scorn upon even the beneficial results of Republican policy, and upon the whole scheme of Republican reconstruction, that I have resolved to devote all my energies to the service of the Liberal Republican party, and the allies who may act with it in this contest.

The Democratic Convention reassembled in New Orleans on the 3d of June, and the Reform Convention met in the same city on the following day. The former remained in session six, and the latter five days. There was a deal of discussion in both bodies owing to the conflicting views of delegates, and the attempts which were made for coöperation. The Democratic Convention appointed delegates to the national gathering at Baltimore, while the reformers declared their purpose to be to confine themselves wholly to the interests of the State. In the former body, there was an intimation, at first, that certain delegates were in sympathy with Governor Warmoth, but, if this was true, they were in a hopeless minority. On the first day of the session, the Democrats appointed a committee of eleven, to confer with "any similar committee that the Reform party may see fit to appoint, looking to a union with the Democratic party." These overtures were met by the appointment of a smaller committee on the part of the Reform Convention.

Both conventions received a communication signed by a sub-committee of the "Liberal Republican State Executive Committee of Louisiana," a committee of "the German Liberal Republican Committee of Louisiana," and a committee on behalf of "the Executive Committee of the Greeley and Brown mass meeting held at the St. Charles Theatre," asking for "an interchange of views in the interest of an ultimate coalition of all elements of political strength of this State, by the nomination of a proper fusion ticket that will restore honesty and intelligence in the administration of State

affairs, and to return to constitutional government bequeathed to us by its founders in the better days of the republic." The same committees afterward submitted the following proposition, declaring it as their "deliberate opinion" that it is the only solution of the difficulty in the way of an honorable coalition :

In order to effect a thorough and efficient combination of all parties in this State having national and State reform for their object, the following arrangement is proposed by the representatives of the Liberal Republican party :

1. The Democratic and Reform Conventions to approve and accept the platform of principles adopted at Cincinnati, on May 4, 1872, by the Liberal Republican Convention.

2. The delegates chosen by the Democratic State Convention now in session, to represent Louisiana in the National Democratic Convention to be held at Baltimore on the 9th of July next, to be instructed to vote to accept the platform of the Cincinnati Convention, and to indorse and ratify the nomination of Greeley and Brown.

3. Inasmuch as it is necessary to adopt a State ticket on which Democrats, Reformers, and Liberal Republicans can unite, it is agreed that each of the three organizations shall name ten persons to constitute an executive committee, which shall be authorized to call a Liberal Reform Convention, to meet at some future day, to nominate a State, congressional, and electoral ticket.

4. It being absolutely necessary that harmony of action be assured, in order to accomplish the purposes of this arrangement, that national reform may be forwarded, and State reform guaranteed, it is further agreed that the conventions shall respectively adopt the following resolution :

Resolved, That we accept and pledge ourselves to support, in good faith, the State and congressional tickets to be nominated by the convention to assemble in accordance with the above resolution.

This proposition was referred to the conference committees of the two conventions, who replied to it by the following joint resolutions :

Resolved, That the propositions made by the Liberal Republican party be rejected :

1. Because the Reform party, being organized and existing for State purposes only, cannot entertain questions affecting national politics.

2. The committee of conference of the Democratic party have not been intrusted with powers to pronounce itself on any subject affecting national politics.

3. Because the adoption of the proposition would involve the virtual abandonment of the Democratic and Reform parties, and the convention of both these parties, in adopting the report and resolutions of the joint committees of conference under which these joint committees were created, expressly declared that neither party would relinquish its separate organization.

The joint conference committee finally agreed upon the following State ticket, which was submitted to the conventions on the 7th of June : for Governor, George Williamson, of Caddo; for Lieutenant-Governor, B. F. Jonas, of Orleans; for Secretary of State, Samuel McEnery, of Ouachita; for Attorney-General, H. N. Ogden, of Orleans; for State Superintendent of Public Education, R. M. Lusher, of Orleans; for State Auditor, Allen Jumel, of Iberville. There was no nomination made for State Treasurer, as the present incumbent, Mr.

A. Dubuclet, was to hold over for two years, having been elected for four years in 1870.

This ticket was adopted by the Reform Convention with only one or two dissenting voices. In the Democratic Convention the following minority report was submitted, signed by five of the committee appointed by that body :

We, the undersigned, members of the committee of conference, respectfully ask to submit the following minority report :

1. The minority were in favor of ascertaining from the convention its wishes in reference to their further conference with the Liberal Republican or other organizations before going into a nomination for officers.

2. The minority were in favor of continuing the conference with a view of submitting to the committee of Liberal Republicans counter-propositions, in the hope that cooperation could be effected.

3. That the minority were opposed to the committee presenting a ticket to the convention, and, in view of the complications which had arisen, were in favor of remitting the nominations to the Conventions themselves.

The Democratic Convention refused to accept the ticket submitted by a majority of the conference committee, and, after some discussion, nominated the following instead, which was transmitted to the Reform Convention, and by it rejected : For Governor, John McEnery, of Ouachita; for Lieutenant-Governor, B. F. Jonas, of Orleans; for Attorney-General, H. N. Ogden, of Orleans; for Auditor, Allen Jumel, of Iberville; for Superintendent of Education, R. M. Lusher, of Orleans; for Secretary of State, Alexander Boardman, of Caddo.

No platform was adopted by either convention. The Reform Convention adjourned, "to meet at a time and place designated by the Central Executive Committee." The Democratic Convention authorized its president to appoint ten members of the State Central Committee from the State at large, to be increased by one member from each district of the city of New Orleans, and one from each parish of the State, and empowered the committee thus to be constituted to appoint the electors for President and Vice-President of the United States.

The conventions of the two wings of the Republican party, headed respectively by Packard and Pinchback, assembled at Baton Rouge, on the 19th of June. Governor Warmoth was present as a proxy for one of the delegates in the Pinchback Convention. All attempts at cooperation between the two conventions failed; that led by Packard insisting on a repudiation of Warmoth and Greeley, and the other refusing to join it. After an excited session of five days, the Packard Convention completed its State ticket as follows : For Governor, William Pitt Kellogg; for Lieutenant-Governor, C. O. Antoine; for Secretary of State, O. C. Blandin; for Auditor, Charles Clinton; for Attorney-General, Colonel A. P. Field; for Superintendent of Public Instruction, Charles W. Keating. A long series of resolutions was adopted, indorsing the platform and nominations of the National Convention at Philadelphia, approving

the resolutions of the State Central Executive Committee adopted in November, 1871, and lauding the history and achievements of the Republican party. The following were also among the resolutions:

Any system of the civil service under which the subordinate positions of the Government are considered rewards for mere party zeal is fatally demoralizing, and we therefore favor a reform of the system by laws which shall abolish the evils of patronage, and make honesty, efficiency, and fidelity, the essential qualifications for public position, without practically creating a life tenure of office.

The franking privilege ought to be abolished, and the way prepared for a speedy reduction in the rate of postage.

Among the questions which press for attention is that which concerns the relations of capital and labor, and the Republican party recognize the duty of so shaping the legislation as to secure full protection and the amplest field for capital, and for labor, the creator of capital, the largest opportunities and a just share of the mutual profits of these two great servants of civilization.

The Republican party is mindful of its obligations to the loyal women of America for their noble devotion to the cause of freedom. Their admission to wider fields of usefulness is received with satisfaction, and the honest demands of any class of citizens for additional rights should be treated with respectful consideration.

The Republican party propose to respect the rights reserved by the people to themselves as carefully as the powers delegated by them to the State and to the Federal Government. It disapproves of the resort to unconstitutional laws for the purpose of removing evils by interference with rights not surrendered by the people to either the State or national Government.

It is the duty of the General Government to adopt such means as will tend to encourage American commerce and ship-building.

We recommend the establishment by the General Government of a national system of education, and ask our Senators and Representatives in Congress to use their influence in urging upon said body the necessity of establishing such a system as will give proper facilities of education to all children throughout the length and breadth of our great country.

This convention recommends that the next Legislature appoint a committee to investigate the alleged frauds perpetrated against the finances of our State for the last four years, and we pledge the faith of our State to pay all just and legitimate claims against the same under the constitution.

We deprecate and denounce, with all the strength of our nature, the efforts of certain designing men to excite the evil and foul passions of the people in arraying one class of our citizens against the other; and we do hereby denounce and proclaim against any more looking toward "Africanizing" the State on the grounds that the colored vote is largely in the majority, believing that the Republican party is the party of the whole people, regardless of race or nationality.

We pledge the Republican party to use all proper means to make eight hours a legal day's labor in the State of Louisiana, on all public works.

Recognizing the fact now existing in this State, that the different political parties heretofore existing in opposition to the Republican party are dispersed, and the individual members thereof having thereby become political orphans, we tender them a refuge from the storms of political adversity, and invite them to take a place in the ranks of the national Republican party, and assist us in our efforts to redeem our beloved State from its present disgraceful and bankrupt condition.

The Pinchback Convention, after a stormy

session of three days at Baton Rouge, adjourned to New Orleans, where it adopted resolutions recognizing in Lieutenant-Governor Pinchback "preëminent courage, unswerving devotion to Republican principles, fidelity to the interests of his race, and also to the welfare of Louisiana," pointing to him as "one of the most eminent standard-bearers of Republicanism in this State, and pledging to him our undivided and hearty support in carrying to victory the flag of Republican principles in the coming contest;" declaring that "this organization is the sole existing one to which Republicans can look with any hope for maintaining their due proportion of control in the executive, legislative, and judicial departments of the government for preserving the equal rights of all the people of the State, for continuing and increasing the number of free schools for our children, and for delivering our people from the reactionary tendencies and devices of the Democracy;" pledging to the people of the State "an honest and earnest endeavor to stop extravagances, curtail expenditures, diminish the taxes, put down venality and corruptions, oppose usurpation and tyranny from whatever source, and encourage harmony and good feelings between all the people of this State, and the obliteration of all the animosities and distrusts caused by past conflicts, favoring the election to office of honest and capable men, identified with the people of this State, and having their homes and interests with us, laying it down as the will of this convention, in view of the differences of opinion existing among the members upon the expediency of declaring at this time its preferences on national questions, that we recognize the utmost liberty of opinion in the support of candidates for the presidency, leaving to each delegate full liberty to declare preferences with the wishes of his constituents;" and declaring "that the convention assembled under the auspices of the custom-house, at Baton Rouge, have betrayed the Republican party, have annulled with a high hand the will of the people, expelled their legally-elected delegates, and seated men in their places who were not elected, and who do not even live in the parishes they pretend to represent, have used bribery, threats, and all kinds of intimidation to control the organization of the convention against the known will of the delegates, they have outraged every principle of parliamentary law in their proceedings, they have refused to seat in the convention delegates representing the three largest and most populous parishes in the State unless they would first pledge themselves to vote for the candidate selected by the custom-house clique. Their delegates have been openly bought and sold in the public streets. In consequence of the fraud and deception attending the whole history of its career, that convention does not truly represent the Republicans of this State, and we, therefore, declare that we will not be bound by

their acts, and will not support their candidates."

The convention then adjourned till the 9th of August without making any nominations.

The Liberal Republicans of the State met in convention at New Orleans, on the 5th of August, and continued their sessions for six days. On the first day a committee of thirteen members was appointed to confer with the Executive Committees of the Democratic and Reform parties, with a view to agreeing to a "fusion" ticket for State offices. Some days were spent in consultation, and various propositions and counter-propositions were made, but the ultimate object was not attained until some time after the convention had adjourned. As a result of the negotiations between the several State Central Executive Committees, a meeting of conference committees, consisting of seven members from each of those bodies, was held on the 27th of August. The final result of their deliberations was a compromise based upon the acceptance of the following "fusion" ticket: For Governor, John McEnery; for Lieutenant-Governor, D. B. Penn; for Attorney-General, H. N. Ogden; for Auditor, James Graham; for Secretary of State, Samuel Armistead; for Superintendent of Public Education, Robert M. Lusher.

This is the same ticket, with one or two modifications, already accepted by the Democrats and Reformers, the latter having given up their separate ticket. The principal concession to the Liberals was the acceptance of an electoral ticket in favor of Greeley and Brown. The State Central Committees of the Democrats and Reformers had already agreed to the following platform:

The Democratic and Reform parties of the State of Louisiana announce to the people of the State the following platform of principles:

1. We recognize the right of, and will use every endeavor to secure and maintain, every citizen of the State in the enjoyment of all his civil and political privileges laid down in the Constitution of the United States, and the laws made in pursuance thereof.

2. We will insist upon the most strict and rigid examination into the origin and character of the public debt, and, while we are willing to pay the last dollar of indebtedness contracted for the legitimate purposes of government, within the scope of rightful authority, we will advocate the rejection of all that has been contracted fraudulently, and, knowing a reduction of the present excessive taxation to be essential to the restoration of public prosperity; to that end—

3. We will insist upon the abolition of unnecessary offices, reduction of salaries and perquisites in all offices, and the inauguration of a most rigid economy in all departments of government.

4. We will seek to restore the municipal governments and the powers of police to the municipalities, cities, and parishes to which they of right belong, maintaining to the uttermost the principles of local self-government.

5. The abolition of the extraordinary powers now vested in the Executive, the repeal of all obnoxious acts, such as the registration, the election, the printing, the constabulary, militia, and metropolitan police laws, and the enactment of wise, just, and economic laws in their stead.

6. With a view of guarding against the corruptions

and enormities in the State and city governments during the past four years, we will favor and urge the immediate passage of the most stringent and severe penal laws against the offering or receiving a bribe, on the part of legislators, or any other State, city, or parochial official.

7. We will advocate an amendment to the constitution which will exclude from any judicial position men unlearned in the law.

8. We will favor the enactment of a special statute, imposing the severest penalties upon the speculation, directly or indirectly, in State, city, or parochial securities, by the Executive, judicial or other officers of the State, city, or parish, during their term of office.

"Fusion" candidates for Congress were also agreed upon for each of the five districts, as well as one for the State at large.

The Pinchback Convention, which met on the 9th of August, was very much divided, part of the delegates being in favor of accepting overtures which were made by the Liberal Republicans, for coöperation with them, but a majority resisted this course. The result was the withdrawal of a number of delegates, who adopted resolutions indorsing Greeley and Brown, and the Liberal platform and nominations, and formed an executive committee auxiliary to the Liberal committee. The regular convention continued in session four days. A committee was appointed to confer with the State Central Committee, presided over by Marshal Packard, in the hope of securing a union of the two wings of the Republican party. This was not accomplished, but the State Committee was authorized to continue the negotiations, and make such changes in the ticket as might be necessary to secure the desired object. The nominations made by the convention were as follows: Governor, P. B. S. Pinchback, colored; Lieutenant-Governor, A. B. Harris; Secretary of State, George B. Loud; Auditor, W. Jasper Blackburn; Attorney-General, A. P. Field; Superintendent of Education, W. G. Brown, colored. Congressmen, both for the State at large and for the districts, were also nominated. Resolutions were adopted indorsing the platform and candidates of the National Republican Convention at Philadelphia, and making the following declarations:

That we pledge our party to the reduction of taxation, and we insist upon an economical administration of the government; we condemn indiscriminate appropriations to individual enterprises, and we urge upon the Legislature the curtailment of its expenses.

That we will advocate a policy, and will invoke the aid of the national Congress, that will secure to the South its full quota of assistance to the improvement of our harbors and rivers. We believe that we are entitled to an appropriation to assist in opening the mouth of the Mississippi, and in constructing our levees.

That we believe that the congressional measures of reconstruction have proved a complete success in our State. We indorse those measures, and all laws, of Congress enacted in the interests of order and civil liberty. We believe that, if honestly and freely executed, these statutes will conduce to the prosperity of the South, and to the strengthening of republican institutions.

That we especially indorse those planks in the Re-

publican platform which pledge our party to the faithful payment of our public debt.

That we advocate the reduction of national taxation and a redistribution of the imposts in such a manner as to impose the least possible burden upon the people.

That we pledge ourselves and our party to the faithful execution of the constitutional and statutory provisions for the public education of all the children of the State without distinction.

That we insist upon the enforcement of the constitutional and legal guarantees of the civil and political rights of all men, without distinction of race or previous condition.

The fusion with the Packard or custom-house party was finally effected by the State Central Committee, the following ticket being agreed upon: For Governor, Wm. P. Kellogg (custom-house); Lieutenant-Governor, C. C. Antoine, colored (custom-house); Secretary of State, P. G. Deslonde, colored (Pinchback); Auditor, Charles Clinton (custom-house); Attorney-General, A. P. Field (custom-house); Superintendent of Education, —. —. Brown, colored (Pinchback); Congressman at large, P. B. S. Pinchback, colored.

This left but two State tickets in the field, the fusion ticket of the Democrats, Reformers, and Liberals, headed by McEnery, and the ticket of the united Republicans, headed by Kellogg. The election, both for presidential electors and State officers, occurred on the 4th of November, the day previous to the presidential election in the other States of the Union. The election passed off quietly, but a dispute arose at once with regard to the result. According to the election law in force up to this time, the Board of Returning Officers consisted of the Governor, Lieutenant-Governor, Secretary of State, and two other members chosen by these three. The members chosen were John Lynch and T. C. Anderson, and the Board had the power to fill vacancies in its own number. The law required this Board to canvass the returns within ten days after the election, and to publish the result. George E. Bovee, the Secretary of State, had been suspended from office, and F. J. Herron was acting in his stead, and on the 18th of November the Governor removed Herron, on a charge of defalcation, and appointed Jack Wharton. At the meeting of the Returning Board, on the same day, it was decided that Pinchback, having been a candidate for office at the late election, could not act, and he withdrew, and F. W. Hatch was appointed in his place. Mr. Anderson, who was present at the meeting, was pronounced ineligible, on the same ground, and his place was filled by the appointment of Durant Daponte. These changes were made by the votes of Warmoth and Wharton, as a majority of the members of the Board so far as constituted, and the Board, when completed by this process, consisted of Warmoth, Wharton, Hatch, Daponte, and Lynch. Mr. Lynch refused to act with this Board, and he and Mr. Herron, who claimed that Governor Warmoth could not legally re-

move him from the office of Secretary of State, chose James Longstreet and Jacob Hawkins to act with them, thus constituting another Board, consisting of Warmoth, as Governor, *ex officio*, Herron, Lynch, Longstreet, and Hawkins. Subsequently, George E. Bovee, the suspended Secretary of State, took the place of Herron, being reinstated in office by the Supreme Court of the State, on the 4th of December.

It was alleged, by the opponents of Warmoth, that he had, by the appointment of Supervisors of Registration, secured the rejection of the names of many legal voters, and that, in many parishes, the election was null and void, and that his purpose was now to count in and return the McEnery State officers as elected, although that headed by Kellogg was in reality legally chosen. It was also claimed that the Returning Board with which the Governor proposed to act was not legally constituted. William P. Kellogg immediately brought suit in the United States Circuit Court, before Judge E. H. Durell, for an injunction restraining the Warmoth Board from canvassing the returns, except in the presence of John Lynch, Jacob Hawkins, James Longstreet, and Francis J. Herron, and from submitting them at all to Jack Wharton, Frank H. Hatch, and Durant Daponte. A temporary injunction was granted, on the 16th of November, and the defendants, consisting of Warmoth, McEnery, the returning officers in their interest, and the New Orleans Republican Printing Company, were cited to appear before the court on the 19th, to show why injunctions should not be granted, *pendente lite*, until the points at issue should be determined. The Printing Company was included to prevent the printing of any returns, by the Warmoth Board, in the official organ.

The trial of this case began on the 25th of November, and, in the mean time, Governor Warmoth called an extra session of the Legislature to meet on the 9th of December, and promulgated the new election law, which was passed at the last session of the Legislature, but hitherto not approved. The provision of this law as to the Board of Returning Officers was as follows:

SECTION 2. *Be it further enacted, etc.,* That five persons, to be elected by the Senate, from all political parties, shall be the returning officers for all elections in the State, a majority of whom shall constitute a quorum, and have power to make the returns of all elections. In case of any vacancy by death, resignation, or otherwise, by either of the Board, then the vacancy shall be filled by the residue of the Board of Returning Officers.

It was claimed that the promulgation of this law abolished all returning boards acting under the old law, and left it to the Senate at the coming session of the Legislature to choose officers to receive and canvass the votes cast at the late election.

The case of Kellogg against Warmoth and others, was argued at length before Judge

Durell, who gave his decision on the 6th of December. In his complaint, Kellogg declared that the Governor had appointed supervisors of registration who would aid him in a scheme for defeating his (Kellogg's) election, and that 10,000 negroes were refused registration on "various frivolous and unlawful pretences;" that he conspired with the supervisors to cause a false count of the votes cast, and that a large number of votes were not counted; that the Returning Board with which the Governor proposed to act was not legally constituted, but that the other was the only lawful authority to canvass the returns; that it was the purpose of Warmoth and his returning officers to mutilate and change the certificates of returns, and finally destroy them, in order to keep them out of the hands of the lawful Returning Board; that McNery was cognizant of these schemes, and ready to assist in them; and that Warmoth's purpose was to overthrow and destroy Republican government in the State of Louisiana. The defendants denied these allegations, and further claimed that Kellogg, being a Senator of the United States, was not eligible to the office of Governor, and therefore had no interest in the result of the election. They also denied that the court had any jurisdiction in the matter. In his final decision Judge Durell held, first of all, that the court had jurisdiction under the enforcement acts, and sustained his position by elaborate argument; secondly, he undertook to show that the enforcement acts themselves were constitutional; and, finally, he maintained the legality of the Returning Board composed of John Lynch, James Longstreet, Jacob Hawkins, and George E. Bovee. He held that Herron, the acting Secretary of State, could not be removed from office as a defaulter, without judicial inquiry, and that he and Lynch, being a majority of the members of the Board at the time, had power to complete it by filling the vacancies. The new election law, he said, did not change the case, as the returning officers under the old law must continue to perform their duties until their successors were inducted into office. The closing paragraphs of his opinion are as follows:

The court keeps within the acts of Congress and the fifteenth amendment: It does not pretend in any way to make a Governor of the State, or in any degree to interfere with the voice of the people, expressed through the ballot-box. What it does is, to aid in making known the voice of the people in accordance with sections 3 and 23 of the act of Congress, and with section 15 of the amendment thereto, and in its action is only a clearly-needed adjunct of the legal Returning Board. Many propositions were discussed during the argument, which it is not necessary for me to now pass upon. It is enough that I find the statute constitutional, that the court has jurisdiction, and that the Board of Returning Officers, composed of H. C. Warmoth and Messrs. Hawkins, Lynch, Longstreet, and Herron, are the legal Board, and as such entitled to the protection of this court.

As to the question of the ineligibility of the com-

plainant in the bill to the office of Governor, this question cannot arise under the bill, and could only come before this court in a direct action at law to test the title to the office. It is not, therefore, necessary or proper for me to decide it now; but, were it otherwise, I would say that the reason of the thing seems to favor his eligibility, the object of the provision of the constitution being to prevent a man serving two masters, and having a divided allegiance. And the fact that contemporaneously with the adoption of the constitution, which first contained this provision, the then Territorial Governor was by the then Constitutional Convention made Governor of the State provisionally, and at the ensuing election made by the people the first Governor of the State, would seem to indicate that the meaning of the inhibition was understood to be as I above stated.

He then made an order restraining Warmoth, until further order of the court, from canvassing the returns, except in the presence of John Lynch, James Longstreet, Jacob Hawkins, and George E. Bovee, and from submitting them to any other persons; enjoining him from altering, suppressing, mutilating, destroying, or searching any certificate, statement, or proof, of the returns; and ordering him to desist from hindering the legal returning officers from complete access to all such papers. The other members of the Warmoth Returning Board were also enjoined from having any thing to do with canvassing the returns.

Meanwhile Warmoth, apparently assuming that the new election law had abolished the old Returning Board, had appointed a new one nominally to fill vacancies, and on the 4th of December issued the following proclamation:

STATE OF LOUISIANA, EXECUTIVE DEPARTMENT, }
NEW ORLEANS, December 4, 1872. }

Whereas, P. S. Wiltz, Gabriel de Feriet, Thomas Isabel, J. A. Taylor, and J. E. Austin, returning officers appointed by the Governor to fill vacancies existing, in accordance with the constitution and laws of the State of Louisiana, have made declaration of the result of an election held November 4, 1872, and have declared certain persons elected to the Senate and House of Representatives of the State of Louisiana, as will appear from the returns herewith attached and made a part of this proclamation: and—

Whereas, Such returns are compiled from the official returns of commissioners of election and supervisors of registration, on file in this office, and are in fact and in form accurate and correct, and made in accordance with law:

Now, therefore, I, Henry Clay Warmoth, Governor of the State of Louisiana, do issue this my proclamation, making known the result of said election aforesaid, and command all officers and persons within the State of Louisiana to take notice of and respect the same.

Given under my hand and the seal of the State this fourth day of December, A. D. 1872, and of the independence of the United States the ninety-seventh.

H. C. WARMOTH.

By the Governor:

Y. A. WOODWARD, Assistant Secretary of State.

Then follows a complete list of persons alleged to have been elected Senators and Representatives in the Legislature.

On the next day Judge Durell issued an order in the suit then pending before him, which, after characterizing the action of the Govern-

or as a "violation of the restraining order herein," was as follows:

Now, therefore, in order to prevent the further obstruction of the proceeding in this cause, and further, to prevent a violation of the orders of this court, and the imminent danger of disturbing the public peace, it is hereby ordered that the marshal of the United States for the District of Louisiana shall forthwith take possession of the building known as the "Mechanics' Institute" and occupied as a State-house for the assembling of the Legislature therein, in the city of New Orleans, and hold the same subject to the further order of this court, and, meanwhile, to prevent all unlawful assemblages therein under the guise or pretext of authority claimed by virtue of pretended canvass, and returns made by said pretended returning officers in contempt and violation of said restraining order. But the marshal is directed to allow the ingress and egress to and from the public offices in said building of persons entitled to the same.

(Signed) C. H. DURELL, Judge.
NEW ORLEANS, LA., December 5, 1872.

In pursuance of this order, Marshal Packard, obtaining from General Emory two companies of United States troops, took possession of the Mechanics' Institute. On the 7th of December, on the application of C. C. Antoine, who claimed to have been elected Lieutenant-Governor, Judge Durell granted an order restraining Governor Warmoth from interfering with the organization of the Legislature, from doing any thing to hinder those returned by the Lynch Returning Board from convening, or to aid or abet any person not so returned in attempting to take part in the organization of either House of the Legislature. A. S. Badger, Chief of the Metropolitan Police, was also enjoined from interfering with the organization of the Legislature, except to preserve order, and from preventing any person from having access to the two Houses who had a certificate of election signed by George E. Bovee. Writs of injunction were also issued against several persons returned as members elect by the Warmoth Returning Board, restraining them from attempting to take any part in the organization or proceedings of the Legislature; against Chas. H. Merritt, Secretary of the old Senate, and William Vigers, Clerk of the old House, restraining them from placing the names of these persons on the rolls; against Geo. E. Bovee, restraining him from receiving any returns except from the Lynch Returning Board; against Jack Wharton and Samuel Armstead, restraining them from receiving or having any thing to do with the returns; and against both of the Warmoth boards of returning officers, restraining them from attempting to canvass any of the returns.

According to the returns as canvassed and published by the Lynch Board, the Grant and Wilson electors received a majority in the State of 14,624 votes; Wm. P. Kellogg as Governor, a majority of 18,861; and all the other Republican candidates for the State offices were elected. According to the same authority, 28 Republicans and 8 Fusionists were elected to the State Senate, and 77 Republicans and 32

Fusionists to the House of Representatives. The Board counted the ballots attached to the affidavits of thousands of colored men who claimed to have been wrongfully prevented from voting. According to the returns as canvassed by the Warmoth Board, the Greeley and Brown electors received a majority of 6,492 votes; John McEnery as Governor, a majority of about 7,000; and all the Fusionist State officers and a majority of the members of both branches of the Legislature, in the same interest, were elected. The Warmoth Board had obtained from Judge W. A. Elmore, who claimed to have been elected to the bench of the Eighth District Court of the State, and had been forcibly installed thereon, to the exclusion of the former incumbent, Judge Dibble, an order restraining the Lynch Board from canvassing the returns; but this had been disregarded, and Judge Elmore had been cited for contempt by Durell, for refusing to send the record of the case up to his court. Neglecting to obey the summons, he was committed to prison.

A meeting of persons claiming to have been elected to the General Assembly, on the ground of receiving certificates from the Warmoth Returning Board, was held at Lyceum Hall, in New Orleans, on the 7th of December, which drew up a memorial to the President of the United States, claiming that the action of Judge Durell was unwarranted by law, and asking that the national forces be removed from the capitol. Marshal Packard also reported the state of things at New Orleans to the Government at Washington; but the Federal authorities declined to interfere in the matter.

The members of the Legislature, whose election was certified by the Lynch or "custom-house" returning officers, met in the Mechanics' Institute, on Monday, December 9th. The Senate was organized with Lieutenant-Governor Pinchback in the chair, who declared that Governor Warmoth had offered him \$50,000 and the appointment of any number of officers, if he would agree to certain proposed arrangements. The House was organized by the election of Chas. W. Lowell, Postmaster of New Orleans, as Speaker. There were present 20 Republicans and 8 Democrats in the Senate, and 50 Republicans and 14 Democrats in the House. The Democrats entered protests against the organization of the two Houses. Resolutions were adopted on the first day, impeaching Governor Warmoth "for high crimes and misdemeanors in office, committed against the constitution and laws of the State of Louisiana," and suspending him from office, pending his trial. Lieutenant-Governor Pinchback assumed the office of Governor, though forbidden so to do by Judge Elmore, of the Eighth District Court, on the application of Warmoth. He received a dispatch from U. S. Attorney-General Geo. H. Williams, assuring him that he was recognized by the President as the

"lawful Executive of Louisiana," and that the State would be protected from disorder and violence. This recognition was accorded notwithstanding a request from Mr. Odger, Attorney-General of the State, and Mr. McEnery, who claimed to be Governor-elect, that judgment be suspended until the matter could be fully presented, and the claims of both sides set forth. Mr. Odger had already applied to the Supreme Court of the United States for a writ of prohibition restraining Judge Durell from proceeding further in the case of Kellogg against Warmoth. This was refused, after elaborate argument, on the ground that the court had no jurisdiction in the matter, unless it should be brought up on an appeal.

On the 11th of December the "Fusion" Legislature met at the City Hall of New Orleans, which was declared by a proclamation of the Governor to be the State-House, and organized by electing General Hugh J. Campbell for President of the Senate, and H. W. Moncure Speaker of the House. Governor Warmoth submitted a message, in which he claimed that the election in November was honestly and fairly held, and condemned the action of the United States Circuit Court and the proceedings which had been carried on under its protection. He also issued the following proclamation to the citizens of the State:

STATE OF LOUISIANA, EXECUTIVE DEPARTMENT, }
NEW ORLEANS, December 11, 1872. }

Whereas, A revolutionary assemblage, pretending to be the General Assembly of the State of Louisiana, composed mainly of candidates defeated at the election, but who have been proclaimed elected by persons wholly unauthorized to act, which persons have deliberately and wickedly falsified the facts of the election, and have pretended to return the said defeated candidates, without having possession of any legal returns or other documentary evidence, thus setting at defiance the will of the majority of the people; and—

Whereas, The said fraudulent and pretended General Assembly has attempted to impose upon the public by passing pretended resolutions of impeachment, in pursuance of which a person falsely assuming to be Lieutenant-Governor, by virtue of a term of office of Senator, which had expired, has, under the protection of certain unauthorized persons, broken into the Executive office, and declared himself to be the acting Governor of the State, and persists in such claim, in spite of an injunction issued by a competent court; and—

Whereas, The said revolutionary and fraudulent organization has proceeded to declare the results of the late election by proclaiming the election of candidates for Governor and other State officers, who were really defeated by many thousand votes; and—

Whereas, The truly elected members of the General Assembly, being excluded from the capitol by an armed force, temporarily placed at the disposal of the conspirators against the peace and dignity of the State, have met and organized at the City Hall of the city of New Orleans, and are now prepared to enter upon the discharge of their legislative duties:

Now, therefore, I, Henry Clay Warmoth, Governor of the State of Louisiana, do issue this my proclamation, warning and cautioning all good citizens against in any manner recognizing the said revolutionary and fraudulent assemblage, pretending to be the General Assembly of the State, and now in session at the building known as the Mechanics' Institute,

recently used as a State-House, or the person who claims to act as Governor, by virtue of the fraudulent and pretended resolutions of impeachment adopted by the said revolutionary assemblage, and I do hereby command all State officers, tax-collectors, sheriffs, and others, to disregard the pretended official acts of the said revolutionary assemblage, and of the person who falsely and fraudulently claims to act as Governor of the State; to refuse them all countenance or recognition; but to recognize and deal only with the legal officers now in authority, until such time as their successors shall be regularly installed, in accordance with law, and agreeably to the legal returns of the recent election; and I do hereby declare that such officers will be protected in the discharge of their duties by all the authority of which the State government is possessed; and that all the force of the State will be used for the purpose of defeating the machinations of the conspirators who have temporarily occupied the State capitol, of enforcing the laws of the State, of enforcing the writs of the judiciary, and of maintaining the peace and dignity of the State.

Given under my hand and the seal of the State, this eleventh day of December, 1872, and of the independence of the United States the ninety-seventh.

H. C. WARMOTH, Governor of Louisiana.

By the Governor:

Y. A. WOODWARD, Acting Secretary of State.

The "Fusion" Legislature adjourned on the 13th until the regular time of meeting in January, but that assembled in Mechanics' Institute remained in session until the end of the year. The returns made by the Lynch Board were counted, and W. P. Kellogg proclaimed Governor, and C. C. Antoine Lieutenant-Governor for four years, commencing on the second Monday of January, 1873. The Board of Managers of the House presented their articles of impeachment against the Governor, embodying the following charges:

1. The unconstitutional and unlawful ejection of George E. Bovee from the office of Secretary of State.

2. The appointing, in April, 1870, for Tax Collector of the Parish of Tangipahoa, of John Evans, who had been rejected from the same office by the Senate.

3. The commissioning of Ogden as Attorney-General, Harper as Sheriff, and Elmore as Judge of the Eighth District Court, when no legal returns had been made by the legal returning officers; and conspiring with them to forcibly and illegally put out of office Judge Dibble of the Eighth District Court; also commissioning other judges and officers when no legal returns had been made by the legal returning officers.

4. The offering of a bribe of \$50,000 and the dispensation of patronage to Lieutenant-Governor Pinchback if he would organize the Senate to suit the purpose of the accused; and procuring fraudulent registration at the last election in different parts of the State.

5. Offering to R. H. Catlin, State Supervisor of Election in the Parish of St. Charles, a bribe, in the form of an appointment as State Tax Collector, if he would make a fraudulent return of the election in said parish.

6. Exercising the function of Governor after he was notified that he was impeached, in

dereliction of respect to the General Assembly, and putting the peace of the State in jeopardy.

The Governor did not appear to answer, and the trial was postponed. There was considerable legislation, including the abolition of the Seventh and Eighth District Courts, but there is some doubt as to whether the laws passed will hereafter be held valid.

An armed collision was threatened in the streets of New Orleans, growing out of the conflict of authority between Pinchback and Warmoth. Pinchback removed General Hugh J. Campbell from the command of the State militia, and appointed General James Longstreet in his place, but the militia refused to obey the latter, as they did not recognize the authority of the government headed by Pinchback. They were then ordered to surrender their arms and retire to the barracks, and on their refusal the Metropolitan Police were ordered to compel them to do so. The militia put themselves on the defensive, and an armed conflict was threatened, but the officers of the militia finally consented to surrender to one of the commissioned officers of the United States forces.

Meantime the appeal for interference by the Federal Government was renewed. On the 10th of December a public mass meeting was held in New Orleans, at which the affairs of the State were discussed by several prominent citizens, including Governor Warmoth, and a memorial was drawn up to be presented to the President and Congress, containing a statement of the facts as viewed by Warmoth and his adherents. The memorial closed as follows: "The General Assembly, prohibited by the injunction of the United States Court, and by the threatened interposition of the United States soldiery, from discharging their legislative duties, can do nothing—not even effect an organization. That the Congress of the United States will sanction this outrage upon law and justice, and upon the dearest rights of the people of this State, cannot be imagined, and a decent respect for the Chief Magistrate of the nation requires us to believe that, when the facts and the testimony in the case are laid before him, he will not tolerate the perversion of Federal authority, and the abuse of military power, by means of which the conspirators have thus far succeeded in carrying out their designs."

The following series of resolutions was adopted at the same meeting:

Whereas, A body of unscrupulous adventurers have forcibly usurped the government of the State of Louisiana, under guise of unwarranted and unprecedented judicial orders, unheard of before in courts of law or equity, emanating from a corrupt and partisan judge, and have proceeded to organize a pretended Legislature, who hold their positions by virtue of gross falsifications as fraudulent results of an election by an infamous board of illegal canvassers, who have acted without any returns of the same, and have substituted therefor, as the basis of their action, rumors and other unauthenticated proofs,

rejecting at their will and caprice the true and correct results of the election held on November 4, 1872, thus nullifying and stifling the voice of the people of this State, expressed in a fair and free election; and whereas this revolutionary and usurping body, protected by the armed forces of the United States, have proceeded, with indecent haste, to impeach the Governor of the State, and have placed in his stead an ex-Senator, whose office as Senator and presiding officer of the State Senate expired with and was filled at the late election:

Be it resolved by the people of New Orleans, in mass meeting assembled, That the constitutional rights and liberties of this people are in imminent danger of passing away forever, and all protection to life, liberty, and property, has ceased to exist in our midst.

Resolved, That we denounce and hold up to the civilized world this unparalleled outrage against the rights of American freemen, and proclaim that we will not recognize said pretended government in exercising any civil functions, executive or legislative; and that we recommend to our duly-elected representatives not to recognize or sanction, by their presence or participation therein, any authority of said body of usurpers; and in this course we pledge to them our sanction, countenance, and support.

Resolved, That, in order to exhaust all peaceful remedies for redress, the president of this meeting shall appoint a committee of one hundred well-known citizens, representing the interests of the State, who shall prepare an address to the President and the Congress of the United States, setting forth our manifold grievances, together with the requisite proof thereof, with which they shall proceed to the city of Washington, and lay before the national authorities, and ask that the Federal Government shall remove from the State Capitol the Federal troops, in order that the duly elected representatives of the people may have free access thereto, to assemble, organize, and exercise their legitimate duties; or, in the event of the unwillingness of the authorities so to do, that they be requested to establish a military government in our midst, deeming the latter as infinitely preferable to the present irresponsible, illegal, and usurping rule, which is supplemented and sustained by the bayonet.

John McEnery, who claimed to have been elected Governor, at once telegraphed to the President, asking him to delay the recognition of either Legislature, until the Committee of One Hundred, appointed in pursuance of these resolutions, should reach Washington and present the whole matter to the Government. He received the following reply:

WASHINGTON, D. C., December 13th.

To Hon. John McEnery, New Orleans, La.:

Your visit with a hundred citizens will be unavailing so far as the President is concerned.

His decision is made, and will not be changed, and the sooner it is acquiesced in the sooner good order and peace will be restored.

GEO. H. WILLIAMS, Attorney-General.

Forty-five members of the committee proceeded to Washington nevertheless, and on the 19th of December had an interview with the President. The latter expressed his unwillingness to interfere in the matter, but said that the Supreme Court could designate one of its members to go to Louisiana to take charge of the Circuit Court, and pass upon the questions before it, and Congress could investigate the affairs of the State. Application was then made to the Supreme Court to assign Justice Bradley to the Circuit Court in New Orleans. The court held that it had no

power to send Mr. Bradley, but that it was competent for him to go if he chose to do so. He refused to go unless ordered by the President, and the latter declined to interfere in the matter. The committee then issued an address to the people of the United States, dated December 23d, in which the proceedings at New Orleans since the election were recapitulated, and an appeal made for a fair hearing and an equitable judgment on the conduct of the parties to the contest. The address closed as follows:

We submit to the people of the United States that such proceedings reach a point at which the whole theory of popular government is reversed and overthrown. The means by which such results have been reached are enough to startle the public mind, but the results themselves are not less appalling. Aside from the general offices of the State, we find the Legislature of the State delivered over into the hands of men who were not elected, and who are utterly unfit for positions of such responsibility in that body as originally composed. At its organization it comprised sixty-eight persons of color, most of them totally uneducated, with a very small minority of whites. Since that time they have expelled members whose seats were uncontested. They have unseated members returned elected by their own Board and seated their defeated opponents, on the simple ground that the former had not appeared to claim their seats. The result is, that, originally bad as the Legislature was, it makes itself worse day by day, and the prospect is, that soon the conservative element of the State will have no representation whatever. To those who flatter themselves with the hope that Mr. Kellogg would not willingly abet any scheme of outrageous misgovernment, it is now apparent that, even supposing this to be true, the power of restraining has passed entirely beyond his control, and that, should he attempt to thwart the schemes of this Legislature, his own impeachment would be a probable event of the future. In conclusion, we would state that we have attempted to perform the duties of our mission in the purest non-partisan spirit; that we have not sought to furnish capital to any political party, or to excite popular clamor in the interests of any faction; we have laid our case before the President and his Attorney-General, and we willingly testify that we have been courteously received and patiently listened to. While they have refused the specific measures of relief for which we applied, they have given reasons for such refusal, in no manner implying their indisposition to see justice done. They have referred us to Congress, and we feel assured that we shall have the immediate sanction of the President, so far as we invite an impartial investigation of the facts of our case, and that we shall have his coöperation in any measures of relief which Congress may adopt after just investigation. The people of Louisiana, ignoring party, and conscious of an honorable effort to place in office men of tried probity, seek justice, not generosity. They ask for a calm, impartial examination of the recent extraordinary events within their borders, in order that the truth may be known, and that there may be a speedy correction of the dangerous evils now threatening the very life of their State.

Thus the matter stood at the end of the year. Henry O. Warmoth still claimed to be Governor, as his term did not end until the second Tuesday of January, and he denied the legality of the Legislature which had suspended him. Pinchback claimed to be Governor by virtue of his position as President of

the Senate when Warmoth was impeached. The Legislature, made up of persons returned as elected by the Board of Returning Officers, known as the Lynch or Custom-House Board, was in session, passing acts which were signed by Pinchback as Governor. The Legislature, made up of persons returned as elected by the Warmoth Board, had adjourned the extra session, but proposed to meet in regular session in January. Kellogg and McEnery both claimed to have been elected Governor for the new term. Various suits were pending in the State courts and the Federal Circuit Court, and the issues of the contest were to come up in Congress early in 1873, on the appearance of contesting claimants for seats in each branch. These matters and the further progress and final settlement of these difficulties belong to the record for 1873. It may be mentioned here that the electoral vote of Louisiana was thrown out entirely when the count was made, in joint convention of the two Houses of Congress, and that a majority of the Senate Committee on Privileges and Elections recommended in February (1873) that a new election be ordered in the State.

It is impossible to obtain any accurate statement regarding the material condition of the State, or of any of its institutions for the year 1872. Amid the political excitement of the time, there is so much confusion in the public offices and records, that no regular reports are made. The debt, for which the State is actually or contingently liable, was stated in January as \$41,733,752.17, although there is a law limiting it to \$25,000,000. The rate of taxation for the year, based on the assessments of 1871, was as follows:

<i>State Tax, or General Fund.</i> —Four mills on each dollar, "for the support of the government of the State, of paying the public debt, and of promoting the public interest thereof."	4
<i>School Tax, or Special School Fund.</i> —Two mills on each dollar, for the support of the free public schools of the State.	2
<i>Interest Tax.</i> —Six and one-half mills on each dollar, to provide for the payment of the interest to become due in 1872 upon all State bonds, except the interest on levee bonds.	6½
<i>Levee Tax.</i> —One and one-half mill on each dollar, to meet the maturity of the coupons of interest to fall due in 1872, for the benefit of the levee bonds.	1½
<i>Special Levee Tax.</i> —Two and one-half mills on the dollar, for the payment of the interest and part of the principal of the bonds issued under an act of 1870, known as the "special levee tax fund."	2½
<i>Levee Construction Tax Fund.</i> —Two mills on the dollar, as compensation to the Louisiana Levee Company.	2
<i>Levee Repair Tax Fund.</i> —Two mills on the dollar, for the benefit of the Louisiana Levee Company.	2

The whole forming an aggregate of twenty and one-half (20½) mills on each dollar.

The total debt of the city of New Orleans, on the 30th of June, was \$20,763,658.21. The rate of taxation was \$2.62½ on the \$100 assessed valuation, and the estimates for 1873 place it at \$3.03½ on the \$100.

Of the total population (526,892) ten years of age and over, as reported by the census of 1870, there were engaged in all occupations

256,452, of whom 198,168 were males, and 58,284 females. There were engaged in agriculture 141,467, of whom 114,530 were males, and 26,937 females; in professional and personal services, 65,847, including 36,883 males, and 28,464 females; in trade and transportation, 23,831, including 23,496 males and 335 females; and in manufactures and mechanical and mining industries, 25,807, including 23,259 males, and 2,548 females.

The state contained 2,045,640 acres of improved land, 4,008,170 of woodland, and 977,007 of other unimproved land. The cash value of farms was \$68,215,421; of farming implements and machinery, \$7,159,333; total amount of wages paid during the year, including value of board, \$11,042,789; total (estimated) value of all farm productions, including betterments and additions to stock, \$52,006,622; orchard-products, \$142,129; produce of market-gardens, \$176,969; forest-products, \$92,596; value of home manufactures, \$64,416; of animals slaughtered, or sold for slaughter, \$817,831; of all live-stock, \$15,929,188. There were 59,738 horses, 61,338 mules and asses, 102,076 milch-cows, 32,596 working-oxen, 200,589 other cattle, 118,602 sheep, and 338,326 swine. The chief productions were, 1,157 bushels of spring, and 8,749 of winter, wheat, 984 of rye, 7,596,628 of Indian-corn, 17,782 of oats, 1,226 of barley, 260 of buckwheat, 15,541 pounds of tobacco, 15,854,012 of rice, 140,428 of wool, 350,832 bales of cotton, 26,888 bushels of peas and beans, 67,695 of Irish, and 1,023,706 of sweet potatoes; 578 gallons of wine, 322,405 pounds of butter, 11,747 pounds of cheese, 833,938 gallons of milk sold, 8,776 tons of hay, 80,706 hogsheads of cane-sugar, 4,585,150 gallons of cane-molasses, 37,646 pounds of honey, and 2,363 of wax.

The total number of manufacturing establishments was 2,557, using 887 steam-engines of 24,924 horse-power, and 23 water-wheels of 142 horse-power, and employing 30,071 hands, of whom 23,637 were males above sixteen, 4,210 females above fifteen, and 2,224 youth. The total amount of capital invested was \$18,313,974; wages paid during the year, \$4,593,470; value of materials consumed, \$12,412,023; of products, \$24,161,905.

The whole number of newspapers and periodicals was 92, having an aggregate circulation of 84,165, and issuing annually 13,755,690 copies. There were 7 daily, with a circulation of 34,395; 1 tri-weekly, circulation 800; 8 semi-weekly, circulation 8,500; 75 weekly, circulation 39,970; 1 monthly, circulation 500.

There were 2,332 libraries, having 847,406 volumes. Of these, 1,852, with 584,140 volumes, were private, and 480, with 263,266 volumes, were other than private, including 26 circulating libraries, with 20,400 volumes.

The total number of religious organizations was 638, having 599 edifices, with 213,955 sittings, and property valued at \$4,048,525. The leading denominations were:

DENOMINATIONS.	Organizations.	Sittings.
Baptist.....	227	56,140
Congregational.....	9	4,650
Episcopal.....	16	17,100
Jewish.....	5	2,900
Lutheran.....	3	1,650
Methodist.....	218	52,900
Presbyterian.....	37	14,100
Roman Catholic.....	108	62,535

The condition of pauperism and crime is shown in the following statistics:

Number of persons supported during the year ending June 1, 1870.....	590
Cost of annual support.....	\$53,300
Total number receiving support, June 1, 1870....	507
Native.....	409
White.....	379
Colored.....	130
Foreign.....	98
Number of persons convicted during the year.....	1,559
Total number of persons in prison, June 1, 1870.	645
Native.....	518
White.....	460
Colored.....	328
Foreign.....	27

LUTHERANS. The Lutherans in the United States had, in 1872, fifty-one synods. Ten of these are independent, the others are connected with one of four great organizations, called the "General Council," the "Synodal Conference," the "General Synod," and the "General Synod of the South." The table on page 487 exhibits the names of the particular synods (arranged according to their age), the organization to which they belong, with the number of ministers, congregations, and communicants.

The "General Council" has 9 particular synods, 454 ministers, 880 congregations, and 135,602 communicants.

The "Synodal Conference" has 6 particular synods, 824 ministers, 1,348 congregations, and 187,973 communicants.

The "General Synod" has 21 particular synods, 680 ministers, 1,133 congregations, and 103,362 communicants.

The "Southern General Synod" has 5 particular synods, 94 ministers, 163 congregations, and 12,295 communicants.

Ten synods, with 232 ministers, 541 congregations, and 46,428 communicants, were not in connection with any general organization.

The Lutherans have theological seminaries at Gettysburg, Philadelphia, St. Louis, Columbus, St. Sebald, Salem (Va.), Chicago (2), Paxton (Ill.), Buffalo, Minneapolis, Hartwick (N. Y.), and Selinsgrove (Pa.). There are colleges at Allentown, Fort Wayne, Gettysburg, Decorah, (Iowa), Watertown (Wis.), Galena (Ill.), Columbus (O.), New York, Carver (Minn.), Paxton, Marshall (Wis.), Salem (Va.), Walhalla (S. C.), Mount Pleasant (N. C.), Buffalo, Greenville (Pa.), Springfield (Ill.), Springfield (O.), Carthage (Ill.), Chicago. There are Normal Schools at Addison (Ill.), New York, and Toledo.

There are published 16 German periodicals, 8 English, 5 Swedish, and 5 Norwegian.

The sixth annual session of the General Council of the Evangelical Lutheran Church was held in Akron, O., commencing November 7th. The Treasurer reported a balance of funds amounting to \$2,090.65. This officer was instructed to endeavor to procure the necessary legislation to make the corporate title of the General Council as given in its charter conform with its title in the constitution. Reports were received from the synods, stating their proceedings upon the form of a constitution for congregations. No report expressed the definite acceptance of the constitution by the synod: in some, modifications were suggested; by others, it appeared that the subject was under consideration. The New York Ministerium prepared a constitution of its own. A new committee was appointed, to which the form of constitution already framed, with those constitutions already sent in, and others that might be received, were to be referred. The committee were also instructed to prepare

another constitution, of which copies in English and German were to be distributed for examination. In this constitution the parts which are essential are to be distinguished from those parts which may be changed with the various circumstances of the case. The following declaration of doctrine was adopted, and ordered to be embodied in the constitution:

Of the Congregation.—This congregation receives and adheres to the canonical books of the Old and New Testaments as the revealed Word of God and the only rule of faith and life, and the Confessions of the Evangelical Lutheran Church, especially the Augsburg Confession and Luther's Small Catechism, as a correct and faithful exhibition of the Divine Word, to which rule and confessions all instructions in the church, the school, and the family, shall be conformed, and by which all questions of doctrine shall be decided, and all books of worship and instruction used in congregations shall accord with the same.

Of the Pastor.—Every pastor of this congregation must, at his ordination or installation, be obligated

to the Confessions of the Evangelical Lutheran Church, namely: the Apostles', the Nicene, and Athanasian Creeds, the Augsburg Confession, the Apology, the Smalcald Articles, the Catechisms of Luther, and Form of Concord, and solemnly promise to perform the duties of his office in conformity with the same, as a pure and correct presentation of the doctrine of Holy Scripture.

The committee charged with the preparation of an edition of Luther's "Smaller Catechism" reported progress, but stated that their work was not completed. They were directed to go on, and also to prepare an edition of Luther's "German Catechism," with the proof paragraphs given in full, adding to it Luther's "Questions and Answers to those who Propose to receive the Lord's Supper," and to submit it to the next convention.

The Immigrant Mission at Castle Garden, N. Y., was represented as in excellent condition. The council declined to engage, in its capacity as the General Council, in the establishment or administration of the proposed *emigrantenhaus* in New York, or to assume any responsibility as regards its finances, economy, or management, but recommended the object of that institution to the sympathy and support of the people. It advised the Board of Managers of the institution to secure the reversion of its property, in case it should cease to fulfil its object or to exist, to the General Council; and requested it to give to the General Council's Committee of Home Missions the power of confirming the appointment of missionaries in the institution.

Some questions were asked by the Synod of Iowa concerning the interpretation of the rules of the General Council respecting the exchange of pulpits and the admission of members of other churches to the communion; to which the General Council returned the following answer:

1. The rule is: Lutheran pulpits are for Lutheran ministers only; Lutheran altars for Lutheran communicants only.

2. The exceptions to the rule belong to the sphere of *privilege*, not of *right*.

3. The determination of the exceptions is to be made in consonance with these principles, by the conscientious judgment of pastors, as the cases arise.

A constitution was adopted for a theological seminary at Chicago, and a Board of Directors and one professor were chosen. Four acres of ground in Chicago have been given to the General Council as a site for this institution.

A report on home missions was presented, and fully discussed; and a resolution was adopted, urging the district synods to pay in promptly to the Executive Committee one-fifth of their contributions to the home-mission cause, according to a rule previously agreed upon.

The receipts for foreign missions, exclusive of the outstanding balance from the previous year, and of moneys paid for the support of schools, were \$4,047.11; the expenses, to the close of 1872, would be about \$2,800. The mission among the Telooagoos, in India, was

represented as in a prosperous condition. The schools had been actively in operation, and had increased in number. Forty-four inquirers had been baptized, and at the preceding Christmas seventy-four persons had partaken of the Lord's Supper. The Executive Committee was authorized to increase the salaries of the missionaries to \$1,000 a year, and to send additional laborers to India.

The Home Missionary and Church Extension Society had received \$9,190.06, for rebuilding the Church of Mercy in Chicago. This society was commended to the churches.

The *General Synod of the South* met at Charleston, S. C., May 9th. The Synods of South Carolina, Virginia, West Virginia, Georgia, and Mississippi, were represented by fifteen clerical and eight lay delegates. The last-named synod (Mississippi) came with an application for admission, which was granted. The removal of the theological seminary from Columbia, S. C., to Salem, Va., was determined upon. The district synods were advised to address themselves more energetically to the work of missions within their boundaries, and to coöperate fully with the General Synod's committee on home missions. The following declaration was passed unanimously:

To remove all misapprehension of the motives and *animus* of this body, we hereby again, as on a former occasion, disavow any sectional, political, or ecclesiastical animosity in maintaining our existence as a separate and distinctive general organization of our Evangelical Lutheran Church, being moved thereto solely by the firm belief that the glory of God and the prosperity of our Church can be best subserved thereby. We furthermore declare our unanimous conviction that the same pressing wants which prompted its original formation, and the same considerations which rendered its reorganization proper and necessary in 1866, still exist, and most imperatively demand its continuance.

It was designed as a *bond of union* between the synods and congregations, which should be embraced in its organization. As such, it binds us together to-day more firmly than at any former period of our history. Peace and harmony have characterized our present convention, and will be hence diffused throughout our bounds.

It was designed to nurture and secure unity in "the one true faith." To promote this end, it has placed itself unequivocally upon the Ecumenical Creeds and the Augsburg Confession "in its native and original sense." As a consequence, the entire Church within its limits has become more fully identified in sympathy and opinion with the doctrines of the Reformation by Luther and his coworkers.

It was designed to promote *uniformity* of worship. For this purpose it compiled and published a Book of Worship, which has been introduced among our congregations generally, and is daily growing in favor with the majority of our people, and is used by a steadily-increasing number. And we are persuaded that this book has accomplished an amount of good which no one can fully estimate.

It was designed also to secure *coöperation* in the general enterprises of the Church. We, therefore, have kept prominently in view the work of home missions, and the permanent establishment of a theological seminary. And though we have not yet succeeded in accomplishing our purposes in these particulars, and may have adopted some plans therefor which proved to be impracticable, we do not find in that fact any reason for abandoning the

effort; but, learning from experience, are thereby rather stimulated to devise more efficient methods, and to put forth increasing and more concerted endeavors to consummate these worthy aims. And we feel constrained to thank God for the prospects of success. We have never felt more encouraged, and with God's blessing we shall succeed.

The Rev. V. F. Bolton was present as a visiting delegate from the General Synod North. A motion to receive him as such was laid on the table. He was then received as an advisory member, simply in his personal capacity as a Lutheran minister.

The conclusion of the Franco-German War left the Lutheran Church in France in a precarious condition. The cession of Alsace-Lorraine to Germany not only deprived it of three-fourths of its members, but also took away its central administration, and its faculty of theology, both of which were located at Strasbourg. A number of the members doubted the practicability of their continuance as an independent denomination, and the desire was expressed, at Montbéliard, to merge the Lutheran in the Reformed Church. In order to avert the danger of such a fate, and to promote the interests of the Church generally, a synod was called, with the consent of the Government, and met in Paris, on the 13th of July. The Inspection of Paris was represented by fifteen delegates, that of Montbéliard by eighteen. The meetings continued during eight days. A thorough revision of the plan of organization of the Church was effected, with provision for the administrative independence of the two inspections (hereafter to be designated as synods), and for a general synod, to be composed of delegates from the two district synods. The principal provisions of the new organic law are as follows:

As the basis of the organization is the church council, which in each congregation must be composed of at least eight lay members. Above the church council is the consistory, which extends its jurisdiction over several congregations, and is com-

posed of all the pastors of the circumscription, and of twice as many lay delegates, elected by the church councils. Where a minister is to be appointed, the consistory, in connection with the whole church council of the vacant congregation, proceeds to the appointment. The congregation, in case it is not satisfied with the choice, has the right to appeal to the synod.

There will be henceforth two particular or district synods (formerly inspections), each one composed of all the members of the consistories of their district. These bodies will assemble every year, deliberate on the welfare of the Church, and each one will appoint a synodical committee of five members—two ministers and three laymen. These bodies form the executive agencies between the synods and the government, and are charged with the temporalities. The ecclesiastical inspector, who is elected to his office for a period of nine years, and may be reelected, is, by virtue of his office, a member of this committee, and has to take care of the spiritualities.

At the head of the whole organization is the General Synod, composed of representatives, delegated by the district synods, in proportion to their population. This body meets, at least, every three years, and appoints a committee, whose duty it is to attend to the execution of its decisions. This committee is, however, not a permanent one, and ceases to exist as soon as its labors are brought to an end.

Modifications in the constitution of the Church can be made only by a special assembly, called a "constituent synod," which can be called only upon a vote of two-thirds of the delegates to the General Synod.

The following declaration of doctrine was adopted by a unanimous vote—it is to be inscribed as a preamble at the head of the law: "Before proceeding to the reorganization of the Church, the synod, true to the principles of faith and liberty with which the reformers were inspired, proclaims the authority of the Scriptures paramount in matters of faith, and maintains, as the basis of the legal constitution of the Church, the Augsburg Confession."

Resolutions were unanimously adopted expressing brotherly sympathy with the churches of Alsace-Lorraine, and a regret at their separation.

M

MACLEOD, Rev. NORMAN, D. D., an eminent Scotch clergyman, editor, and author, born at Campbeltown, June 8, 1812; died at Glasgow, June 16, 1872. He was the son of the Rev. Dr. Norman Macleod, an honored minister of the Kirk of Scotland, and was educated at Edinburgh, Glasgow, and in Germany. While in the University of Edinburgh he was the favorite pupil of Dr. Chalmers, then Professor of Divinity, and whom he afterward succeeded as Moderator of kirk. Having taken orders, he became minister of London, in Ayrshire, in 1838, and five years later was removed to the more important parish of Dalkeith, near Edinburgh. In 1851, upon the death of the Rev. Dr. Black, he was advanced to the ministry of St. Columba's Kirk, better known as

the barony parish of Glasgow. Here he brought to his labors all the force of his zealous nature, steadily directing his efforts to the erection of new kirks, and to the opening of supplementary schools, to meet the ever-increasing requirements of his enormous parish. He inaugurated a series of meetings to which none but the working-class was admitted, and it became indispensable to wear a fustian jacket in order to gain admittance to these remarkable services. It was his belief that this class had greater need of the instruction of the ablest men in the church than the wealthy. On the death of Dr. Robert Lee, Professor of Biblical Criticism in the University of Edinburgh, he was made Dean of the Royal Chapel. With a view of furthering more energetically the

missionary labors of the Kirk of Scotland, in 1850 Dr. Macleod crossed the Atlantic and traversed the vast domain of Canada on a tour of personal inspection, and in 1867 went out on another and more extensive tour over portions of India. From 1850 to 1860 he edited the *Edinburgh Christian Magazine*, and, upon the establishment of a new periodical entitled *Good Words*, he became the editor, furnishing from his own pen a goodly portion of the articles. Among his published works are "The Earnest Student," or memorials of Mackintosh, 1847; "Reminiscences of a Highland Parish," 1862; "Eastward," a book of Travel, 1866; "The Old Lieutenant and His Son," "The Starling," 1867; "Peeps at the Far East," a familiar account of a visit to India, 1871; "Simple Truth spoken to Working People," "The Gold Thread," and "Wee Davie," also several sermons.

MACOMB, Commodore WILLIAM H., United States Navy, born in Michigan, about 1820; died in Philadelphia, August 12, 1872. He was appointed from New York, April 10, 1834, and was attached to the frigate *Potomac*, of the Mediterranean squadron, until 1837. In 1840 he was in the Naval School at Philadelphia, was promoted to passed-midshipman the same year, and served with the Brazil squadron and at rendezvous, New York, until 1846; was commissioned lieutenant in 1847, and served two years on the steamship *Lexington*, Pacific squadron. In 1849 and 1850 he served on the receiving-ship *New York*, and in 1850-'53 on the brig *Bainbridge*, of the Brazil squadron, and again on the receiving-ship *New York* in 1854-'56. He was attached to the sloop *Portsmouth*, of the East India squadron, 1856-'58, and participated in the engagements with the Barrier Forts, on the Canton River, China, November 16, 20, 21, and 22, 1856, in which the *Portsmouth* and *Levant* attacked and captured the forts. He commanded the steamer *Metacomet*, of the Brazil squadron and Paraguay Expedition, in 1859, the steamer *Pulaski*, Brazil station, in 1860-'61, and the steamer *Genesee*, of the blockading squadron, 1862-'63. He was commissioned commander in 1863. While in command of the *Genesee* he attempted the passage of the batteries at Port Hudson, March 14, 1863, and took part in almost daily engagements with Confederate batteries along the Mississippi during April, May, and June, 1863. He commanded the steamer *Shamrock* in the blockading squadron in 1864-'65, and was in command of the naval force in the bombardment and capture of *Plymouth*, N. C., October 29 and 30, 1864. He also commanded the naval forces in the action with the batteries and infantry on the Roanoke River, near Poplar Point, N. C., during the expedition up that river. For the gallantry and energy displayed in his operations against the enemy while serving in the North Atlantic squadron, Commodore Macomb was advanced several numbers in his grade. After

the close of the war he was attached to the navy-yard at Philadelphia from 1866 to 1868, and was commissioned captain in 1866. He commanded the steam-sloop *Plymouth*, of the European squadron, in 1869. His commission as commodore is dated July, 1870, and his latest employment was as light-house inspector.

MAINE. The fifty-first annual session of the Legislature of Maine began on the 3d of January and closed on the 29th of February. There were few acts passed which have more than a local importance. The law relating to the sale of intoxicating liquors was amended so as to bring cider and wine, made from fruits grown in the State, within the prohibition. The sale of unadulterated cider by the manufacturer or his agents is, however, allowed, and the sale of pure wine for sacramental and medicinal purposes. The following entirely new section was incorporated into the law:

SECTION 32. Every wife, child, parent, husband, or other person who shall be injured in person, property, or means of support, or otherwise, by an intoxicated person, by reason of the intoxication of any person, shall have a right of action in his or her own name against any person or persons who shall, by selling or giving any intoxicating liquors, or otherwise, have caused or contributed to the intoxication of such person or persons; and in any such action the plaintiff shall have a right to recover actual and exemplary damages. And the owner or lessee or person or persons renting or leasing any building or premises, having knowledge that intoxicating liquors are sold therein in violation of law, shall be liable, severally or jointly with the person so selling or giving intoxicating liquors as aforesaid. And in every action by any wife, husband, parent, or child, general reputation of the relation of husband and wife, parent or child, shall be *prima facie* evidence of such relation, and the amount recovered by every wife or child shall be his or her sole and separate property.

These and other amendments of the law had been urged by the Temperance Convention, which met at Augusta, in January.

An act was passed relating to savings-banks which required a semi-annual report to the State Treasurer of the total amount of deposits, and the payment of one-fourth of one per cent. thereon to be appropriated for the use of schools. The trustees must also once in six months, after setting apart the amount required by law for a reserved fund, declare a dividend not exceeding three per cent. among the depositors. Any balance of earnings over these dividends, the reserve funds, taxes, expenses, etc., is to be divided once in four years ratably among the depositors. An examination and a settlement of the Treasurer's account are required twice a year. Savings-banks are prohibited from investing in the bonds of unfinished railroads, or roads the net income of which is not sufficient to pay the interest on their bonded debt, or in the bonds of any town or county out of New England issued in aid of any railroad.

An act to promote immigration and facilitate the settlement of public lands constitutes the Governor, Secretary of State, and Land Agent, a Board of Immigration. It is made

the duty of the Board to appoint a commissioner of immigration and an agent resident in New Sweden. The commissioner is required to collect information regarding the climate, soil, and resources of the State, the amount and location of unsettled lands, and the terms offered by the State to settlers, and to cause the same to be translated into Swedish, and distributed in Sweden and in the United States. The commissioner also has a general oversight over immigrants, and is required to give them all needed information and assistance. The Board of Immigration may expend a sum not exceeding \$8,000 for provisions, tools, etc., to be sold to immigrants, and paid for in labor on public works; and may also assign to each man over twenty-one years of age one hundred acres of land, to which a valid title will be given in four years, if he has made his residence thereon, built a comfortable home, and cleared fifteen acres of the land, ten of which shall have been laid down to grass.

Another act establishes a tax of one mill per dollar on all the property in the State for the support of common schools. The fund so formed is to be distributed on the 1st of January of each year to the several cities, towns, and plantations in the State, according to the number of scholars in each. Each town, city, and plantation, is also required to raise and expend annually for the support of schools not less than 80 cents for every inhabitant.

An act was passed prohibiting the manufacture and sale of prize packages of candy, stationery, or other merchandise, under a penalty of imprisonment for not more than thirty days, or a fine not exceeding \$20. Solitary imprisonment in the State-prison, except for prison discipline, was abolished, and the act relating to the organization of corporations, passed in 1871, was repealed.

The political canvass in Maine excited unusual interest this year, owing to the fact that her State election was the first of those held early in the autumn and preceding the election for President and Vice-President of the United States; and both parties were determined to bring out their full strength and give the key-note of the presidential contest. The Republican Convention was held at Lewiston, on the 18th of June, and Sidney Perham was renominated for Governor by acclamation, and Samuel E. Spring, of Portland, and Alexander Campbell, of Cherryfield, were named as presidential electors for the State at large. The following resolutions were offered:

Resolved, That the Republicans of Maine, assembled by delegates in State Convention, reaffirm the declaration of principles made by the National Republican Convention at Philadelphia, and point with pride to their past record in war and in peace, as the best and only political organization, because of its ability and disposition, to wisely and successfully deal with whatever questions may arise in the future.

Resolved, That the Republicans of Maine most cordially and unitedly indorse the nomination of General Grant as President and the Hon. Henry Wilson

as Vice-President, and pledge to the great soldier and patriot, and the eminent Senator and friend of the working-man, the electoral vote of Maine, by a majority even greater than was given the Republican ticket in 1868.

Resolved, That the thanks of the people of this State are due to Congress and to our own delegation in that body, through whose able and earnest advocacy the measure was secured for the recent legislation to promote ship-building and revive our commerce; and we accept what has been accomplished as an assurance that their efforts in this direction will continue until that great interest is placed upon an equitable basis.

Resolved, That we view with satisfaction the great progress that the cause of temperance has made during the year, and especially extend our cordial sympathy to the temperance-reform movement which is spreading throughout the State.

Resolved, That the presentation of the name of the Hon. Sidney Perham for Governor of the State for the third time is justly due to him for his fidelity to the interests of the State, and for the prudence and care with which he has performed all his public duties.

The following, presented by a minority of the committee, was substituted for the fourth, and then the series was adopted without opposition:

Resolved, That we reaffirm our faith in the principle of prohibition and its impartial enforcement, and we view with satisfaction the popular movement in favor of temperance reform recently inaugurated in this State.

The Democratic State Convention met at Bangor, on the 18th of June. There was some debate on the expediency of accepting the candidates of the Liberal Republicans for President and Vice-President, which was settled by the adoption of a resolution declaring that "the principles enumerated by the late Cincinnati Convention, taken in connection with the letter of Horace Greeley accepting the nomination of that convention, constitute a platform on which all the elements in opposition to the present corrupt administration of the Federal Government can stand." These principles were then set forth in terms from Horace Greeley's letter, and formally adopted as "the platform of the Democracy of Maine." An additional resolution declared "that we believe the great reforms, for which patriotic men of all parties are now laboring, can be best obtained by supporting, as the candidate for our next President, Horace Greeley, and we recommend to our delegates to vote for the Cincinnati candidates."

Delegates to the National Convention at Baltimore were chosen by this body, and Charles P. Kimball was nominated for the office of Governor.

There was a convention of the soldiers and sailors of the State, at Portland, about the 1st of September, at which resolutions were adopted declaring that the continued success of the Republican party was the sole security of reform and progress, and pronouncing strongly in favor of Grant, and against Greeley, for President.

The State election occurred on the 9th of

September, after an excited canvass, in which leading men of both parties from various parts of the country took an active part. The total vote cast for Governor was 126,618, of which Perham received 71,917, and Kimball, 54,701; making the majority for Perham 17,216. Republicans were chosen for representatives in Congress from all of the five districts of the State. At the presidential election in November, the whole vote cast was 90,509, of which 61,422 were in favor of Grant and Wilson, and 29,087 for Greeley and Brown—majority for Grant and Wilson, 32,335. The Legislature now stands, 30 Republicans, and no Democrat, in the Senate, and 128 Republicans, and 23 Democrats, in the House, with one vacant seat in the Senate. The officers of the State government, with the exception of Governor, are chosen by the two branches of the Legislature in joint session. Those chosen at the beginning of 1873 were as follows: Secretary of State, George C. Stacy; Treasurer, William Caldwell; Attorney-General, H. M. Plaisted; Adjutant-General, Benjamin B. Murray; Land Agent, Parker T. Burleigh.

The financial condition of the State is represented as highly satisfactory. The important particulars appear in the following statement:

Receipts for the year.....	\$1,334,859 98
Disbursements.....	\$1,147,544 41
Debt January 1, 1873.....	\$7,187,900 00
Sinking fund in the Treasury.....	1,020,247 00
Debt, deducting sinking fund.....	\$6,167,653 00
Cash in Treasury above immediate liability.....	169,000 00
Debt, deducting sinking fund, and cash in Treasury.....	\$5,978,653 00
Sinking fund January 1, 1873.....	\$798,295 00
Sinking fund January 1, 1873.....	1,020,247 00
Increase of sinking fund in 1873.....	\$221,952 00
Trust funds held by the State exclusive of sinking fund.....	\$789,078 00

The following is the statement of the public debt January 1, 1873:

Due in 1873.....	\$50,000
Due in 1874.....	50,000
Due in 1875.....	30,000
Due in 1876.....	60,000
Due in 1877.....	50,000
Due in 1878.....	30,000
Due in 1880 (bounty loan).....	475,000
Due in 1883 (war loan).....	525,000
Due in 1889 (war loan).....	2,333,500
Due in 1889 (municipal war debt).....	3,084,400
Whole amount of debt.....	\$7,187,900

The sinking fund established by acts of 1865 and 1868, is rapidly accumulating, and will be amply sufficient to meet the debt as it matures.

There are 868.17 miles of railroad in the State. The following is a complete statement of the length of the different roads, with their indebtedness and net earnings for the year, so far as reported:

ROADS.	Length.	Debt.	Earnings.
St. Croix & Penobscot.....	22 miles.....	\$246,304 45	\$27,917 99
Houlton Branch.....	8.....		
European & North American.....	114 in Maine and 88 in New Brunswick.....	3,000,000 00	367,574 19
Portsmouth, Great Falls & Conway.....	4½ in Maine.....		
Boston & Maine.....		504,116 19
Bangor & Piscataquis.....	922,000 00	68,008 46
Atlantic & St. Lawrence.....	83 in Maine and 67 out of the State.....		50,425 30
Portland & Oxford Central.....	27½.....	218,000 00	
Portland & Ogdensburg.....	50 in Maine.....	840,000 00	114,900 00
Portland & Rochester.....	51½.....		38,078 88

Knox & Lincoln.....	48½.....	2,395,000 00	40,972 08
Consolidated Maine Central:			
Portland & Kennebec Division,.....	71½.....	7,069,014 00	1,566,501 25
Maine Central Division,.....	127½.....		
Somerset & Kennebec Division,.....	37½.....		
Androscoggin Division,.....	71½.....		
Belfast & Moosehead Lake.....	38½.....	150,000 00	
Dexter & Newport.....	14.....		

The statistics of insurance for the year are as follows: Amount of fire policies issued by foreign companies, \$48,063,332, on which \$644,257 was received for premiums, and \$221,253.55 paid for losses; amount of fire policies of home stock companies, \$6,163,710; premiums received, \$89,748.18; losses paid, \$49,859.81; policies of mutual fire companies, \$21,110,177; losses, \$41,501.07; policies of marine insurance by foreign companies, \$444,553; premiums, \$11,146.01; losses, \$3,766.17; marine insurance by home companies, \$20,481,277; premiums, \$682,282.09; losses, \$402,607.15; number of life insurance companies, 44; policies, 3,647, amounting to \$4,820,356; premiums, \$1,142,084.93; losses, \$216,680.70; accident insurance premiums, \$12,561.19; losses, \$6,814.55.

There are 54 savings-banks doing business in the State, of which five have been organized during the year. The whole amount of de-

posits is \$26,184,333.03, being an increase of \$3,366,530.58 over the preceding year.

The Insane Asylum of the State has been overcrowded, having 400 inmates, while it is calculated to accommodate only 350. The whole number treated during the year was 570, of whom 299 were males and 271 females. One hundred males and 77 females were discharged, of whom 46 males and 33 females had recovered; 22 males and 23 females died. Of the 202 admitted during the year, 52 men, and 50 women were married; 59 men and 29 women were single; three were widowers, and nine widows. The causes of insanity of those admitted during the year are stated as follows: ill-health, 36; intemperance, 26; domestic affliction, 15; puerperal state, 13; masturbation, 12; over-exertion, 9, critical period of life, 8; decay of old age, 7; disappointed affection, 7; epilepsy, 7; injury of head, 6; reli-

gious excitement, 6; spiritualism, 4; loss of property, 4; embarrassment in business, 3; sunstroke, 2; apoplexy, 1; fright, 1; jealousy, 1; suppressed eruption, 1; unknown, 33. Of the number in the asylum at the end of the year, 49 were supported by the State; 304 received \$1.50 a week each from the State, and forty paid their own expenses, or were supported by friends, at the rate of from \$4 to \$7 a week, according to accommodations.

The State has no institution for the deaf, dumb, or blind, but supports 56 pupils at the American Asylum for the Deaf and Dumb, at Hartford, Conn., at a cost of \$1.75 each per year; three pupils at the Clark Institution for deaf mutes at Northampton, Mass., and eight pupils at the Perkins Institution for the Blind, in South Boston.

There were 174 convicts in the State-prison at the beginning of the year, and 164 at the end. The earnings of the prison for the year amounted to \$36,509.70, and the expenses to \$28,661.77, leaving a profit of \$7,847.95. The principal trades carried on in the prison are the making of shoes, harnesses, and carriages. There are 140 boys in the State Reform School, of whom 46 were committed during the year; 23 of them for larceny. An Industrial School for Girls was incorporated by the last Legislature, but has not yet been established.

The College of Agriculture and the Mechanic Arts has been in operation four years, and graduated its first class in August. The number of students now is 71, of whom 32 belong to the freshman class. There are accommodations for 125 students. The college is located at Orono, and has a farm of 370 acres, with all the buildings and appliances needed for theoretical and practical instruction. The new Normal School building, at Castine, for which \$20,000 was appropriated by the last Legislature, has been completed.

The immigration of Swedes has continued, and the number of immigrants of that nationality is now about 1,300, one-half of whom are at the colony of New Sweden. These colonists have built 100 houses, eight barns, one saw-mill, and two steam-shaft mills. They have a school of 70 or 80 pupils, in which English is exclusively taught. The colony owns 17 horses, 16 oxen, and 76 cows, and has paid the State \$2,040 for supplies during the year.

According to the census of 1870, of the total population (493,847) ten years old and over, there were, engaged in all classes of occupations, 208,225 persons, of whom 179,784 were males and 28,441 females. There were engaged in agriculture, 82,011, including 81,956 males and 55 females; in professional and personal services, 36,092, including 20,688 males and 15,409 females; in trade and transportation, 28,115, including 27,880 males and 235 females; in manufactures and mechanical and mining industries, 62,007, including 49,265 males, and 12,742 females.

The State contained 2,917,793 acres of im-

proved land, 2,224,740 of woodland, and 695,525 of other unimproved land. The cash value of farms was \$102,961,951; of farming-implements and machinery, \$4,809,113; total amount of wages paid during the year, including the value of board, \$2,903,292; total (estimated) value of all farm productions, including betterments and additions to stock, \$33,470,044; orchard-products, \$874,569; produce of market-gardens, \$366,397; forest-products, \$1,581,741; value of home manufactures, \$450,988; of animals slaughtered, or sold for slaughter, \$4,939,071; of all live-stock, \$23,357,129. There were 71,514 horses, 336 mules and asses, 139,259 milch-cows, 60,530 working-oxen, 143,272 other cattle, 434,666 sheep, and 45,760 swine. The chief productions were: 274,593 bushels of spring, and 4,200 of winter, wheat; 24,115 of rye; 1,089,888 of Indian corn; 2,351,354 of oats; 658,816 of barley; 466,635 of buckwheat; 1,774,168 pounds of wool; 264,502 bushels of peas and beans; 7,771,009 bushels of Irish, and 354 bushels of sweet potatoes; 7,047 gallons of wine; 11,636,482 pounds of butter; 1,152,590 of cheese; 1,374,091 gallons of milk sold; 1,053,415 tons of hay; 5,255 bushels of clover-seed; 3,859 of grass-seed; 293,850 pounds of hops; 5,435 of flax, and 227 bushels of flax-seed; 100,805 pounds of maple-sugar; 28,470 gallons of maple-molasses; 155,640 pounds of honey.

The total number of manufacturing establishments was 5,550, using 354 steam-engines of 9,465 horse-power, and 2,760 water-wheels, of 70,108 horse-power, and employing 49,180 hands, of whom 34,310 were males above sixteen, 13,448 females above fifteen, and 1,422 youth. The total amount of capital invested was \$39,796,190; wages paid during the year, \$14,282,205; value of materials consumed, \$49,379,757; of products, \$79,497,521.

The whole number of newspapers and periodicals was 65, having an aggregate circulation of 170,690, and issuing annually 9,867,680 copies. There were 7 daily, with a circulation of 10,700; 1 tri-weekly, circulation 850; 47 weekly, circulation 114,600; 1 semi-monthly, circulation 700; 8 monthly, circulation 42,840; 1 quarterly, circulation 1,500.

There were 3,334 libraries, having 984,510 volumes: of these, 1,872, with 450,963 volumes, were private, and 1,462, with 533,547 volumes, were other than private, including 136 circulating libraries, with 100,278 volumes.

The total number of religious organizations was 1,326, having 1,102 edifices, with 376,038 sittings, and property valued at \$5,196,853. The leading denominations were:

DENOMINATIONS.	Organization.	Sittings.
Baptist.....	490	117,189
Christian.....	44	4,922
Congregational.....	231	53,965
Episcopal.....	25	8,975
Methodist.....	327	82,550
Roman Catholic.....	32	17,622
Second Advent.....	28	3,175
Universalist.....	54	23,910

The condition of pauperism and crime is shown by the following statistics:

Total population.....	696,915
Number of persons receiving support during the year ending June 1, 1870.....	4,619
Cost of annual support.....	\$367,000
Total number receiving support June 1, 1870....	8,631
Native.....	8,188
White.....	8,149
Colored.....	89
Foreign.....	443
Number of persons convicted during the year....	431
Total number of persons in prison June 1, 1870..	371
Native.....	361
White.....	255
Colored.....	6
Foreign.....	110

MARSHALL, HUMPHREY, a lawyer, politician, and brigadier-general in the Confederate Army, born in Frankfort, Ky., January 13, 1812; died at Louisville, March 28, 1872. He was the grandson of Humphrey Marshall, the author of the first history of Kentucky, and son of Judge John J. Marshall. At the age of sixteen young Marshall was appointed a cadet in the United States Military Academy at West Point, from which he graduated July 1, 1832, and was made brevet third-lieutenant of Mounted Rangers. He was immediately ordered on the "Black Hawk" expedition, but was not engaged in active hostilities, being stationed at Davenport, Iowa. In March, 1833, he was transferred, as brevet second-lieutenant, to the First Dragoons, which regiment had just been created by Congress, in lieu of the Mounted Rangers. Soon after, April 30, 1833, he retired from the military service. Preferring civil life, he, in a few months, with marked facility, acquired sufficient legal knowledge to be admitted to the bar. Till 1834 he practised his new profession at Frankfort, Ky., and then at Louisville, till the breaking out of the Mexican War. At the same time, he was an officer of Kentucky militia, as captain, 1836-'38; major, 1838-'41; and lieutenant-colonel, 1841-'46. In 1836 he raised a company of volunteers to march to the Texas frontier, which, however, was disbanded after receiving the news of General Houston's victory at San Jacinto. June 9, 1846, he became colonel of the First Kentucky Cavalry, and, with his regiment, marched from Memphis, Tenn., to join the army of General Taylor at Saltillo, which he reached in time to participate in the battle of Buena Vista. His regiment having been disbanded July 7, 1847, he returned to his native State, and settled on a farm in Henry County, where he continued to reside till 1861, except while in public life. In 1849 he was elected to the United States House of Representatives, became at once an active member, and an ardent supporter of Clay's compromise measures of 1850, and, in 1851, was reelected to Congress. During his second term, he was appointed, by President Fillmore, August 6, 1852, commissioner of the United States to the empire of China, which was immediately raised to a first-class mission. On being recalled, by President Pierce, Octo-

ber 18, 1853, he resumed the practice of law, at Washington, D. C., but, in 1855, was again elected to Congress from Kentucky, by the "Know-Nothing" party, where he continued till 1859, serving, during his latter term, as a member of the Committee on Military Affairs. Though, in 1861, opposed to open secession of the Southern States, and desirous to settle differences with "peaceable weapons," within the Union, he nevertheless joined in the war against the United States, and became a brigadier-general, September, 1861, in the Confederate service. Here he gained little reputation, and, upon resigning his commission, opened a law-office, in Richmond, Va., and subsequently removed to Louisville, where his practice became both successful and lucrative. He was among the first whose disabilities were removed by Congress. General Marshall was a ready and vigorous speaker, a fluent and forcible writer, and stood high in his profession.

MARYLAND. The last biennial session of the Legislature of Maryland began on the 3d of January, and came to a final adjournment on the 1st of April. Four hundred and fifty-two acts and ten joint resolutions were passed, but the great mass of the legislation was of a special or local character. The act of 1870, repealing the education act of 1868, was repealed, and the latter reenacted with amendments. The law as reenacted is added to the code of general laws under the title "Public Education." It provides for a State Board of Education, county commissioners, and district trustees. The studies to be pursued are prescribed in the following section:

In common schools there shall be taught orthography, reading, writing, English grammar, geography, arithmetic, history of the United States, and good behavior, algebra, book-keeping, natural philosophy, the Constitution of the United States, the constitution of the State of Maryland, and the history of Maryland; vocal music, drawing, physiology, the laws of health, domestic economy shall also be taught whenever the Board of District School Trustees shall deem it expedient; and, in districts where there is a considerable German population, the Board of County School Commissioners are authorized to cause the German language to be taught, if they think proper so to do.

Only white youth between the ages of six and twenty-one years are admitted to the public schools. A State Normal School for students of both sexes is to be located in the city of Baltimore. A Teachers' Institute, to continue five days, must be held in each county once a year, at which the county examiner is required to be present each day to give normal instruction. Separate provision is made for the schools of Baltimore, the mayor and City Council having control over them. It is made the duty of the county commissioners to establish "one or more public schools in each election district for all colored youth between six and twenty years of age, to which admission shall be free, and which shall be kept open as long as the other public schools of the par-

ticular county, provided the average attendance be not less than fifteen scholars." A tax of ten cents on each \$100 of taxable property throughout the State is to be levied for the support of the free public schools and the State Normal School.

An Insurance Department was erected in the office of the Comptroller, with a commissioner charged with the execution of the laws relating to insurance, and the various necessary provisions were made to give him supervision and control over the affairs of insurance companies. An act was also passed regulating the licensing of telegraph and express companies not organized under the laws of the State. Every company is required to pay \$300 a year to the Comptroller for a license, and to make an annual report of its affairs.

Another act provides for a State vaccine agency, to be located in Baltimore, which shall keep on hand pure vaccine *virus* for the use of physicians practising in the State, and every parent or guardian is required to have his or her child vaccinated within twelve months after birth, and any other person under their care, not duly vaccinated, must be, "prior to the 1st of November each year."

Another act provides for taxing the gross receipts of railroad companies in the State one-half of one per cent. For this purpose the officers of the various companies are required to make annual reports, and the comptroller is empowered to examine them upon the financial affairs of the companies. Provision was also made for a State tax of two cents per ton on all coal mined in the State and transported over the railroads or canals.

The most important debate of the session was the adjustment of the claims of the State against the Baltimore & Ohio Railroad for one-fifth of the passenger transportation on the Washington branch of the road. A joint committee, appointed to make a report on the subject, recommended:

1. That the Baltimore & Ohio Railroad Company pay forthwith into the Treasury of the State the amount for which judgment has been rendered in the Superior Court of Baltimore City, in the suit of the State against the company to recover one-fifth of the whole amount received by said company for the transportation of passengers between Baltimore and Washington, on its Washington branch, with interest until paid, and costs of suit.

2. That the Governor, Comptroller, and Treasurer, shall ascertain what sum is due the State by the said company for the State's proportion of the money received for the transportation of passengers on the Washington branch road from the 1st day of January, 1870, to the 1st day of January, 1872, and that the company pay the amount so ascertained into the State Treasury on or before the 1st day of July, 1872, with interest.

3. That the company ought to be released by the State from the payment of any portion of the future receipts for passenger transportation on the said branch road, and from all receipts from that source since January 1, 1872, and ought also to be exempted from taxation on said branch road, and the company ought to pay to the State in perpetuity the annual sum of \$25,000, in equal semi-annual payments, on

the first Wednesday in July and January in each year, the first of said instalments to be paid on or before the first Wednesday in July next.

The matter was not brought to a final settlement, though it occupied a considerable share of attention throughout the session.

The revenues of the Baltimore & Ohio Railroad Company, for the year ending September 30th, amounted to \$13,626,677.31, an increase of more than a million dollars over the revenues of the preceding year.

The receipts of the State Treasury, for the fiscal year ending September 30th, amounted to \$2,237,578.26, which, added to the balance of \$452,246.90 on hand at the beginning of the year, made the total resources of the year \$2,689,825.16. Of this amount, \$336,208.87 was derived from the sale of the stock of the Maryland Hospital loan, and \$25,000 was derived from the sale of the balance of the Deaf and Dumb Asylum loan, leaving \$1,878,669.39 as the amount derived from the ordinary sources of revenue, which is greater by \$50,338.67 than the receipts from the same sources for the preceding year. The disbursements of the Treasury for the last fiscal year amounted to \$2,350,654.06, which is less than the amount expended in the previous year by \$362,847.99. Of the disbursements, \$330,000 were expended for the completion and furnishing of the Maryland Hospital at Spring Grove, and \$25,000 for the Deaf and Dumb Asylum at Frederick City. The balance in the Treasury at the end of the fiscal year was \$339,171.10. The receipts of the Treasury for the fiscal year 1872-'73 are estimated at \$1,957,611.65, and the expenditures at \$1,749,416.38. The total debt of the State amounted, at the end of the fiscal year, to \$10,911,678.75, having been increased by the Maryland Hospital loan, and the Deaf and Dumb Asylum loan, by \$355,000, and reduced, by payment of bonds falling due, to the extent of \$1,872,239.93. There was at the same time \$218,750.30 on hand applicable to the further reduction of the debt. The State has productive investments amounting to \$4,794,856.26, and unproductive stocks and bonds amounting to \$21,053,056. Of the latter amount, \$7,000,000 was invested in the stock of the Chesapeake & Ohio Canal Company. The affairs of the Canal Company are improving, and it is thought that this investment will in time become profitable.

The last rail was laid on the Chesapeake & Ohio Railroad in January, 1873, thus completing the communication from Baltimore through Virginia and West Virginia to Huntingdon, on the Ohio River.

The State penitentiary yielded \$3,075.98 over and above expenses, the ordinary expenses amounting to \$71,725.85. The number of inmates at the beginning of the year was 669, and 188 were received during the year. The number at the close of the year was 640. Of the 188 received during the year, 48 were white males, 1 white female, 115 black males,

and 24 black females. Of the 598 prisoners in the institution in 1872, 179 were laborers, 155 farm-hands, 10 draymen, 21 sailors, 12 shoemakers, 2 printers, 3 railroad-men, 8 cooks, 6 hackmen, 6 butchers, and 4 clerks. Of the 598, 8 were convicted of arson, 8 for murder in the first degree, 30 for murder in the second degree, 16 for attempts to commit rape, 2 for attempts to poison, 20 for horse-stealing, 271 for larceny, 71 for stealing, 5 for stealing vessels, 12 for rape, 2 for perjury, 1 for counterfeiting and forgery, and 1 for offering to vote illegally; 7 are committed for life, 1 for 30 years, 3 for 20 and 21 years, 12 for 18 years, 50 for 5 years, and 50 for 1 and 2 years. Of the 598 prisoners, 129 were between 10 and 20 years, 205 between 20 and 25, 10 between 50 and 55, 8 between 55 and 60, 2 between 60 and 65, and 1 between 65 and 70. Of the whole number, 355 could not read or write, 63 could only read, and 180 could read and write. 314 attended Sunday-school in youth, and 255 did not attend. The record of the temperance question is as follows: Strictly temperate, 122; moderate drinkers, 36; occasionally intemperate, 433, and habitually intemperate, 7. Of the 598 prisoners, 207 were married, 376 unmarried, 1 was a widow, and 14 widowers.

A State Convention of those favoring the extension of the right of suffrage to women was held at Baltimore, on the 29th of February and 1st of March. Their claims were set forth in the following resolutions:

Whereas, This Government was founded to promote the common interests of society, is based upon the equal rights of man in its generic sense, founded in reason and justice, and as woman is a component part thereof, and as every civil right grows out of a natural right, we deny any authority to deprive her of those prerogatives which were expressed in the Declaration of Independence, "life, liberty, and the pursuit of happiness."

Resolved, That, as the fourteenth amendment declares that "all persons born or naturalized in the United States, and subject to the jurisdiction thereof, are citizens of the United States and of the State in which they reside, no State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States;" and, as the fifteenth amendment declares that the right of citizens of the United States to vote shall not be denied or abridged by the United States or by any State, on account of race, color, or previous condition of servitude, that the immunities and privileges of American citizenship, however defined, are national in character and paramount to State authority.

Resolved, That justice and equity can only be attained by enacting laws, to govern men and women, based upon the equality of sexes.

Resolved, That we invite the coöperation of all those who have human rights and the righting of human wrongs at heart, and, throwing aside all minor differences, will work as with one mind for measures tending to ameliorate human suffering, and to create powers in society whose exercise shall be peace on earth, good-will toward men.

There was no State election in Maryland this year, but party conventions were held to appoint delegates to the national nominating bodies, and to name candidates for presidential electors. The Republicans met in Baltimore,

on the 24th of April, and appointed delegates to the National Convention to be held at Philadelphia. Presidential electors were nominated at the same time, both for the State at large and for the districts, but no platform was adopted. On the same day a meeting of Liberal Republicans was held in Baltimore, presided over by ex-Governor Bradford, which appointed delegates to the National Convention at Cincinnati.

The Democratic Convention was held at the Maryland Institute, in Baltimore, on the 19th of June, and delegates to the national gathering of the party were chosen. A resolution, instructing the delegates "to oppose the nomination of separate or party candidates for President and Vice-President, as inexpedient in view of existing political complications, and to support instead the indorsement of Greeley and Brown on the Cincinnati platform, as more likely to effect a change in the national Administration, an object of paramount importance, as the first practical step in the great reform movement which we hope to see carried forward to ultimate triumph in every department of the Government," was referred to the Committee on Resolutions; but, before that committee had made any report, a motion to adjourn *sine die* was carried by a vote of 52 yeas to 23 nays.

Another convention of the Democracy was held on the 11th of September, to nominate presidential electors. A committee was appointed to confer with a committee of Liberal Republicans, which resulted in giving to the latter the nomination of one of the electors-at-large and one of the district electors. No platform was adopted.

A convention of colored men was called to meet in Baltimore, on the 19th of June, the objects of which were thus stated:

1. To organize the colored Republicans of the whole State upon such a basis as will secure a complete vote and triumphant victory for the nominees of the Philadelphia Convention:

2. To consider the question of equality of rights for colored citizens, and how to elevate and improve our present condition.

3. To devise the best means to successfully better the condition of the laboring-men of the State, and to make labor profitable to all.

4. To create a more adequate plan for the instruction of colored children in the State.

The convention, after organizing on the 19th of June, adjourned to the 17th of July, when little was done beyond discussion, and the adoption of a resolution indorsing the platform of the Philadelphia Convention and the Administration of President Grant, and pledging the support of those represented in the convention for the election of Grant and Wilson.

The whole number of votes cast for presidential electors in November was 134,464, of which 67,685 were in favor of the election of Horace Greeley for President, and 66,760 for

Grant; Greeley's majority, 925. Charles O'Connor received 19 votes. Democrats were elected to Congress from the first, second, third, and fourth districts, and Republicans from the fifth and sixth.

The present State government consists of: William Pinkney Whyte, Governor; John Thomson Mason, Secretary of State; Levi Woolford, Comptroller; John W. Davis, Treasurer; and William R. Hayward, Land Commissioner. The Legislature is made up of 24 Democrats and 1 Republican in the Senate, and 70 Democrats and 11 Republicans in the House. The city government of Baltimore is Democratic.

According to the census of 1870, of the total population (575,439) ten years old and over, there were engaged in all classes of occupations 258,543 persons, of whom 213,691 were males and 44,852 females. There were engaged in agriculture, 80,449, including 79,197 males and 1,252 females; in professional and personal services, 79,226, including 43,278 males and 35,948 females; in trade and transportation, 35,542, including 34,567 males and 975 females; in manufactures and mechanical and mining industries, 63,325, including 56,649 males and 6,677 females.

The State contained 2,914,007 acres of improved land, 1,435,988 of woodland, and 162,584 of other unimproved land. The cash value of farms was \$170,869,684; of farming implements and machinery, \$5,268,376; total amount of wages paid during the year, including value of board, \$8,560,367; total (estimated) value of all farm productions, including betterments and additions to stock, \$35,348,927; orchard-products \$1,319,405; produce of market-gardens, \$1,039,782; forest-products, \$613,209; value of home manufactures, \$63,608; of animals slaughtered or sold for slaughter, \$4,621,418; of all live-stock, \$18,438,678. There were 89,696 horses, 9,830 mules and asses, 94,794 milch-cows, 22,491 working-oxen, 98,074 other cattle, 129,697 sheep, and 257,893 swine. The chief productions were: 1,095 bushels of spring, and 5,773,408 of winter, wheat, 807,089 of rye, 11,701,817 of Indian-corn, 3,221,643 of oats, 11,815 of barley, 77,867 of buckwheat, 15,785,339 pounds of tobacco, 435,213 of wool, 57,556 bushels of peas and beans, 1,632,205 of Irish, and 218,706 of sweet, potatoes, 11,586 gallons of wine, 5,014,729 pounds of butter, 6,732 of cheese, 1,520,101 gallons of milk sold, 223,119 tons of hay, 35,040 bushels of clover-seed, 2,609 of grass-seed, 280 pounds of hops, 30,760 of flax and 1,541 bushels of flax-seed, 70,464 pounds of maple-sugar, 25,563 gallons of sorghum, and 374 of maple, molasses, 118,938 pounds of honey, and 3,439 of wax.

The total number of manufacturing establishments was 5,812, using 531 steam-engines of 13,961 horse-power, and 937 water-wheels of 18,461 horse-power, and employing 44,860 hands, of whom 34,061 were males above sixteen,

8,278 females above fifteen, and 2,521 youth. The total amount of capital invested was \$36,438,729; wages paid during the year, \$12,682,817; value of materials consumed, \$46,897,032; of products, \$76,593,618.

The whole number of newspapers and periodicals was 88, having an aggregate circulation of 235,450, and issuing annually 83,497,778 copies. There were 8 daily, with a circulation of 82,921; 1 tri-weekly, circulation 5,015; 2 semi-weekly, circulation 1,600; 69 weekly, circulation 127,314; 8 monthly, circulation 18,600.

There were 3,853 libraries, having 1,713,483 volumes. Of these, 2,037, with 1,142,538 volumes, were private, and 1,816, with 570,945 volumes, were other than private, including 30 circulating libraries, with 78,099 volumes.

The total number of religious organizations was 1,420, having 1,869 edifices, with 499,770 sittings, and property valued at \$12,038,650. The leading denominations were:

DENOMINATIONS.	Organizations.	Sittings.
Baptist.....	97	20,720
Episcopal.....	153	61,460
Lutheran.....	88	40,915
Methodist.....	771	231,530

MASON, LOWELL, Mus. Doc., an eminent musical teacher, composer, and author, born in Medfield, Mass., January 8, 1792; died in Orange, N. J., August 11, 1872. His father was a mechanic in what was then a small New-England village, and his early opportunities for education were meagre; but he had from childhood a passion for music, vocal and instrumental, and before he was twenty years of age he had learned to play on every kind of musical instrument which came within his reach, and was such a proficient in vocal music as to be chosen chorister of the village choir while yet a mere lad. He had done more than this; he had, by diligent self-instruction, so trained himself to habits of order, method, and sound reasoning, that, when at twenty years of age he removed to Savannah, Ga., he almost immediately became the superintendent of the first Sunday-school in

that State, and a teacher of music in the churches. His own choir was so successful that he was invited to Boston in 1827, to take a kind of general charge of music in the churches there. He had, for some years before this, entered upon his work of reform in regard to church-music. Finding a strong tendency on the part of most of the churches to adopt the fantastic, artificial, and absurd style of *fugue* music, which had just then taken the place of the old and simple tunes of an earlier day, he immediately put himself in opposition to it, and, by careful selection and adaptation of simple but effective melodies from European collections of music, and the addition of some very sweet and simple tunes of his own, he sought to turn the tide toward a better style of church-music. At first he had great difficulty in finding a publisher for the volume of tunes he had compiled, but at length, in 1821, persuaded the Boston Handel and Haydn Society, of which he was a member, to allow it to be published in their name, as their collection, they receiving half the profits of the publication. The book was a great success from the first, and accomplished in part what was his principal object in its publication, the cultivation of a higher and better taste in church-music. When he removed to Boston in 1827, he began the instruction of classes in vocal music, devoting special attention to the training of children to the performance of the alto part in choral music, and to the introduction of vocal music into the public schools. About 1828, William C. Woodbridge called his attention to the Pestalozzian method of teaching music, and especially to the various improvements upon it; and, after careful and protracted examination, Mr. Mason became a champion of the new method. Juvenile classes were established and taught gratuitously by him for many years, and he was soon compelled, by the extent of his labors, to take G. J. Webb as an associate. Under his influence vocal music received a new and extraordinary impulse in Boston, and throughout New England. Eminent teachers were introduced into the schools; the Boston Academy of Music was established; music was prescribed as a regular branch of instruction in the public schools of Boston, and subsequently very generally throughout the entire country; permanent musical classes, lectures on music, concerts, schools for instrumental music, and teachers' institutes, were also widely established. He became an enthusiastic Pestalozzian, and one of the most successful teachers of the inductive method of instruction, not only in music, but also in general education. In 1837 Mr. Mason visited Europe, and made himself acquainted with all the improvements in music-teaching in the Continental cities. The growing taste for music which he had inspired incited him to prepare about this time numerous text-books for juvenile classes, glee-books, and

collections of church-music. 'The musical text-books were prepared with great care, and in each he sought to bring out and emphasize some particular point, till he had completed the circle of musical instruction. His numerous collections of church-music all had a similar purpose, to multiply the number of simple and effective tunes for public worship. During his later years, he labored diligently to promote what had always been a favorite object with him, the introduction of strictly congregational singing into the churches, laying down two positions as essential to its perfection, viz.: That the tunes used in the churches should be such that all could sing them; and that they should be subordinate to the words used. With these two principles to guide his action, he devoted some of the best labors of his life to the preparation, in connection with Rev. Drs. Park and Phelps, of the "Sabbath Hymn and Tune Book," a work eminently adapted, both in its hymns and tunes, for congregational singing, and he lived to see it a great success, not only in its wide circulation, but in its stimulus to others to follow in the same track. In 1855 the University of New York conferred on him the degree of Doctor of Music, the first instance of the conferring such a degree by an American college, and, though European universities had conferred it on eminent musical composers, they had never honored an American composer with it. The later years of his life were passed at Orange, N. J., and his devotion to musical study and composition continued till his death. Dr. Mason's published works exceed fifty volumes, and many of them have had an immense sale. The aggregate sale of the collections of church-music somewhat exceeded two million copies, and several of the juvenile collections have sold very largely. The following is a list of the principal of these works, those having an asterisk affixed being the joint production of Dr. Mason and Mr. G. J. Webb. "Boston Handel and Haydn Collection," 1821; "Juvenile Psalmist," 1829; "Juvenile Lyre" (first book of school-songs published in this country), 1830; "The Choir, or Union Collection," 1833; "Manual of Instruction in Vocal Music," 1834; "Juvenile Singing-School," 1835; * "The Musical Library" (Glee-Book), 1835; "Sabbath-School Songs," 1836; "The Boston Academy Collection," 1836; "Sabbath-School Harp," 1837; "Lyra Sacra," 1837; "Occasional Psalmody," 1837; "Juvenile Songster," 1838; * "Boston Glee-Book," 1838; "Songs of Asaph," 1838; "The Seraph," 1838; "Juvenile Music for Sabbath-Schools," 1839; * "The Odeon" (Glee-Book), 1839; "The Modern Psalmist," 1839; "Boston School Song-Book," 1840; "Little Songs for Little Singers," 1840; "Carmina Sacra," 1841. Of this and its two revisions, the "New Carmina Sacra" and the "American Tune-Book," more than six hundred thousand copies have been sold; "The

Gentleman's Glee-Book," 1842; "American Sabbath-School Singing-Book," 1843; "Boston Academy Collection of Choruses," 1844; "Song-Book of the School-Room," 1845; * "The Vocalist," 1844; * "The Psalter," 1845; "Primary-School Song-Book," 1846; "The National Psalmist," 1848; * "The Glee-Hive," 1851; * "Cantica Laudis," 1850; * "Boston Chorus-Book," 1851; "The Hand-Book of Psalmody," 1852; "The Hallelujah," 1854; "The Normal Singer," 1856; "Mammoth Musical Exercises," 1857; "Sabbath Hymn and Tune Book," 1859; new do., 1866; with G. J. Root, "The Young Men's Singing-Book," and with W. B. Bradbury, "The Choralist."

MASSACHUSETTS. The Legislature of Massachusetts met on the 3d of January and adjourned on the 7th of May, after a session of one hundred and twenty-six days, the shortest for several years. Three hundred and fifty-nine acts and sixty joint resolutions were passed. A bill, introduced by the Labor Reformers, making ten hours a legal working-day for minors and females in cotton and other manufactories, passed the House after a protracted debate, but was defeated in the Senate. The advocates of female suffrage presented petitions signed by several thousand persons, which were referred to a special committee on that subject. A bill was reported providing for an amendment to the constitution, allowing women the right to vote and hold office, but after much debate it failed to pass the House, by a close vote. No material change was made in the laws respecting the sale of intoxicating liquors, though there was, as usual, a good deal of talk on the subject. The sale of alcoholic liquors is still prohibited, and ale and beer can be sold in any town only with the sanction of a majority of the voters. A general railroad act, carefully prepared and maturely considered, was finally adopted. It allows any twenty-five or more citizens to associate themselves together to build a railroad and to take land necessary for the purpose, subject to the revival of county commissioners. It is intended to do away with special charters for small railroads. A general street railway bill passed the Senate, but was killed in the House. The subject which occupied the largest share of attention was the charter of the Highland Street Railway Company in Boston, which, after an immense deal of discussion and of hearings before committees, was passed. Two new towns were formed, viz.: Holbrook, which was taken from the town of Randolph, and Norwood, which was cut from Dedham. Fitchburg was incorporated as a city. The question of changing the organization of the State police caused an excited discussion, and the two Houses could not agree upon it until conference committees were appointed to reconcile their differences. It was finally settled by placing the terms of office of the police commissioners at the pleasure of the Governor, and authorizing him to

increase the force to one hundred men, whenever he should deem it necessary. The whole purpose of the State police is to secure the enforcement of the liquor laws. The Legislature disposed of a large amount of miscellaneous business of more or less importance to the State. It increased the salaries of the Judges of the Supreme Court, and the salaries of District Attorneys, and in many instances of police justices and clerks; dissolved a large number of corporations, which were not doing business; abolished the head-money which immigrants had to pay; annexed Mount Hope Cemetery to Boston, and straightened the boundary between Boston and Brookline; established district courts in Worcester and Norfolk Counties; changed the time of elections in cities from Monday to Tuesday; joined together in one city Haverhill and Bradford; reformed the almshouse system, and abolished the school-ship; united the Old Colony & Newport and Cape Cod Railroads; gave Boards of Health additional powers over small-pox, so that they can take a patient from his home, if he lives in a house with two or more families; established the office of inspector of provisions; and made it illegal for city officials to make or have a pecuniary interest in contracts with their own city.

Among the resolutions adopted, was one requiring the Inspectors of the State-prison to submit a report at the next session as to the practicability of enlarging and improving the present prison, and as to the policy of selling the present property in Charlestown, and building a new prison at some other point.

On the 30th of September there were, belonging to railroad corporations of the State, 2,194.44 miles of main line and branches, with 524.85 miles of sidings and 534.13 miles of double track, making an equivalent in all of 3,253.417 miles of railroad. Of this amount 1,657.87 miles were within the limits of the State, or one mile to every 4.7 square miles of territory, and to every 879 inhabitants. This proportion of railroad to extent of territory is greater than in any other part of the country, and not exceeded in any country of Europe. The average cost of the roads has been \$51,250 per mile, exclusive of equipment, which has cost \$6,875 per mile. The entire amount invested in the railroads reporting to the Massachusetts Commissioners, is \$135,000,000. Of the 55 corporations making returns, 30 paid dividends averaging nearly seven per cent. on the capital, and 25 per cent. on dividends. The gross income of the roads during the year was 22 $\frac{1}{4}$ per cent. of their cost, but the cost of operation was 72.2 per cent. of the gross earnings, leaving an average net income of 6 $\frac{1}{4}$ per cent. on the investment. The capital stock of these fifty-five corporations is owned by about 29,650 persons, 74 per cent. of whom are residents of the State. The total earnings returned for the year amounted to \$30,878,542.70, being an increase of \$3,692,567 over

the amount of the previous year. The average earnings on each mile of road was \$12,768.87, the amount varying from \$2,058 on the Duxbury & Cohasset to \$34,500 on the Boston and Albany. The cost of operation amounted to \$9,222.31 per mile. During the year 385 miles of steel rails were laid. Reports were made by 24 street railroad corporations, whose aggregate capital stock amounted to \$5,048,534. The length of track, including branches and sidings, was 179.29 miles. The average cost per mile was \$19,350 for building, and \$14,460 for equipment. The number of persons employed on steam-roads during the year was 17,670, on street railways 1,661. There were 16 accidents on the steam railroads during the year, seven of which were caused by displacement of the rails, seven by collision, one by the explosion of a locomotive, and one by the parting of a train. These caused the death or injury of about 40 persons. There were 304 casualties, of which 187 resulted in loss of life. The number of passengers killed or injured from all causes were 63; the number of employes killed and injured, 134; and the number of persons in no way connected with the roads, 136. Most of these last were run over while walking on the roads.

The opening of the Hoosac Tunnel from the eastern portal to the central shaft was successfully accomplished on the 12th of December. There still remained at that time 3,125 feet of rock to penetrate between the shaft and the western portal.

The financial condition of the State is every way satisfactory. At the beginning of the year, her funded debt amounted to \$29,629,364. The changes for the twelve months ending January 1, 1873, of the amounts liquidated, are shown in the following statement:

Funded Debt.....	\$29,629,364 00
State War Fund loan.....	\$2,551,500 00
Union Fund loan.....	363,700 00
State Almshouse loan.....	100,000 00
Loan of 1861 (funding debt).	100,000 00
	<u>3,115,200 00</u>
Balance remaining.....	\$26,514,164 00
Added during the year on account of the Troy & Greenfield Railroad and Hoosac Tunnel loan.....	1,178,540 00
Total.....	<u>\$27,692,704 00</u>
With these changes, the existing debt, all of which is funded, may be thus classified:	
Railroad loans.....	\$13,303,016 00
War loans.....	13,519,688 00
Ordinary loans.....	870,000 00
Funded debt.....	<u>\$27,692,704 00</u>

The only unfunded liabilities remaining consist of small sums, for the payment of which the Treasury is amply provided, and there remain now no funded liabilities for the payment of which the State has not provided a sinking fund. There was in the Treasury, at the end of the year, about \$600,000. The ordinary revenues for 1873 are estimated at \$2,300,000, making the total resources \$2,900,000, while the ordinary expenses are set down at \$4,420,000.

The almshouses at Bridgewater and Monson have been abolished, and the paupers transferred to the institution at Tewksbury, which had, at the end of the year, about 800 inmates, two-fifths of whom were insane or imbecile persons. The Nautical School has also been discontinued, and the school-ship sold, its inmates being transferred to the Reform Schools at Westboro' and Lancaster, which had, on the 15th of October, 575 inmates, against 547 in 1871, and 620 in 1870. These reformatories used appropriations, during the year, amounting to \$96,695, while \$14,000 was paid on their behalf by cities and towns, and \$9,500 was obtained from labor and sales of products. The net cost to the State was \$75,000; to the community, \$87,000.

The three Insane Asylums of the State, at Northampton, Worcester, and Taunton, contained 1,286 patients, on the 15th of October, of whom 342 were maintained by the State, 603 by towns, and 433 by their friends or relatives. The average number, for the year, was: 429 at Northampton, 445 at Worcester, and 408 at Taunton. The State pays \$3.50 per week each for the support of pauper patients at these institutions, and the amount paid, for the year, at Northampton, was \$32,762; at Taunton, \$18,295; and at Worcester, \$9,099. The value of the Worcester property is \$904,929; that at Taunton, \$276,963; and that at Northampton, \$332,655.

There are 172 savings-banks in the State, the statistics of which are as follows:

Number of depositors.....	680,246
Amount of deposits.....	\$184,797,318 92
Number of deposits during the year.....	762,168
Amount of the same.....	\$58,084,129 73
Number of withdrawals during the year.....	889,262
Amount of the same.....	\$48,885,674 16
Number of accounts opened last year.....	148,612
Number of accounts closed last year.....	58,578
Amount of surplus on hand.....	\$3,045,347 21
Public funds.....	21,998,497 89
Loans on public funds.....	1,650,283 24
Bank stock.....	16,772,805 21
Loans on bank stock.....	1,521,715 55
Deposits in banks bearing interest.....	1,739,486 79
Railroad bonds.....	4,602,567 24
Loans on railroad stock.....	545,650 76
Invested in real estate.....	1,968,425 80
Loans on mortgages of real estate.....	59,684,246 17
Loans to counties, cities, and towns.....	12,464,761 52
Loans on personal security.....	33,329,244 27
Cash on hand.....	1,637,499 45
Aggregate amount of ordinary dividends.....	9,622,775 16
Expenses of the institutions.....	469,681 80
Average of ordinary dividends.....	6 1/4 per cent.

The political campaign of the year was less exciting in Massachusetts than in many of the other States. The first important convention was that of the supporters of female suffrage, who met in Boston, on the 31st of January, and set forth their views, after much lively discussion, in the following resolutions:

1. *Resolved*, That we demand suffrage for woman because it is her right, and because its exercise is essential to the progress and well-being of society. That, as negro suffrage was a political necessity in 1870, so is woman suffrage a moral necessity in 1872.
2. *Resolved*, That, while we hail as an indication of progress the recommendation of Governor Washburn, that women be allowed to vote upon the sale

of beer, as a step in the right direction, since the right to vote on one question implies the right to vote on all, we nevertheless demand suffrage for women as a right, to be freely exercised on every question of public interest, and not as a favor, to be accepted with limitations to suit the convenience of men.

3. *Resolved*, That the claim of the recent Republican State Convention, that the Republican party of Massachusetts "is mindful of its obligations to the loyal women of America for their patriotic devotion to the cause of freedom," finds obvious contradiction in the fact that the loyal women of this Commonwealth are still consigned to the political status of paupers, idiots, lunatics, and criminals; and also in the further fact that the women of America, with the consent of that same party, are still held in political vassalage to the very rebels whose treasonable purposes they so heroically aided to frustrate.

4. *Resolved*, That the Democratic party of Massachusetts, by declaring, in State Convention, that "suffrage is a right and not a privilege," and then refusing to indorse woman's suffrage, is false to its principles, and unworthy of the support of the people of the Commonwealth.

5. *Resolved*, That we congratulate the Labor Reform party for the honorable example it has set to the other parties of the Commonwealth, in recognizing woman's full rights of citizenship, and in demanding equal compensation for woman's labor.

6. *Resolved*, That we congratulate Massachusetts upon the honorable record of her congressional delegation this winter—upon Senator Wilson's bill to enfranchise woman in the Territories; upon Honorable George F. Hoar's bill to protect the rights of the women of Utah and Wyoming; and upon Honorable B. F. Butler's speech in support of a woman's suffrage petition.

7. *Resolved*, That the thanks of the convention are cordially given to Governor Campbell, of Wyoming, for vetoing the bill to disfranchise the women of that Territory, and for his vindication of their rights in his recent message.

8. *Resolved*, That we call upon our Legislature to enact a law conferring suffrage upon women in presidential and municipal elections; also, to submit an amendment to the State constitution, abolishing political distinctions on account of sex.

9. *Resolved*, That so long as one-half of our citizens are taxed and governed without consent, every voter is in honor bound to help elect the friends, and defeat the enemies, of impartial suffrage, and to make the enfranchisement of women the cardinal principle of his political action.

The Republican Convention for the appointment of delegates to the national nominating body was held at Worcester on the 10th of April. The platform adopted was as follows:

1. *Resolved*, That we, the delegates of the Republican party of Massachusetts, in convention assembled, congratulate our brethren of the Commonwealth on the national recognition of those great social and civil rights for the establishment of which the Republican party was organized, and for which it has contended earnestly through all the trials of peace and war.

2. *Resolved*, That we see with profound satisfaction the progress of the American Republic on that path which leads to an honorable nationality, guided by the Republican party, which has enforced the doctrine of equality and right, upon which our Government was founded, and given it additional guarantees in the national Constitution; has expunged oppression from the statute-book; has inspired the people with a high and holy purpose in a great war; has cherished the memory of patriotic service and sacrifice; has appealed to a prosperous and honorable people to remember their obligations; has re-

quired strictly republican forms of government in the States rescued from the rebellion; has recognized education as the corner-stone of our institutions; has shown its interest in working-men by destroying slavery, and affirming the right of every man to himself, and to the legitimate fruits of his labor; has placed in our history a chapter of success and renown that wins the admiration of a civilized world; and we now enter upon a national campaign to support this great record against all opponents of national progress, peace, humanity, and prosperity.

3. *Resolved*, That we congratulate the nation that in this great work, the highest civil service known among men, we have an Administration which has developed public opinion in the direction of honor, justice, and philosophy—an Administration which has brought with it peace and a wise adjustment of the violent political controversies which preceded it; which has established our national credit on firm foundations; which has sought wisely and firmly to enforce law against disorder, and complete the work of reconstruction in the restored States; which seeks to enforce a generous and humane policy toward the department of Indian tribes; which has reformed the abuses, exposed corruption, punished offenders, and sought to improve and elevate the character of the civil service. And we, moved by an earnest appreciation of the fidelity and wise patriotism of President Grant, do most cordially recommend that he be renominated and reelected, forasmuch as his Administration has taught the American people all the high obligations of that period of peace which followed a war inspired and elevated by the great declarations of Abraham Lincoln.

4. *Resolved*, That, while recommending strongly the renomination of General Grant for the presidency, we urge also the nomination of Henry Wilson for the vice-presidency, feeling that Massachusetts has earned this distinction by long fidelity to the Republican principles in which Henry Wilson has always been true to her honor and to the best sentiments of her people.

At a subsequent convention for the nomination of State officers the following ticket was agreed upon: For Governor, William B. Washburn; Lieutenant-Governor, Thomas Talbot; Secretary of State, Oliver Warner; Treasurer, Charles Adams, Jr.; Auditor, Charles Endicott; Attorney-General, Charles R. Train.

Conventions of the Democrats and Liberal Republicans were held at Worcester on the 11th of September. General N. P. Banks presided over the latter, at which the following resolutions were adopted:

1. *Resolved*, That we regard the platform adopted by the Cincinnati and Baltimore Conventions as thoroughly Republican, Democratic, and patriotic, and the fact that, in its full recognition of the equality of the colored race, it has been accepted along with the tried and true candidates by an overwhelming majority of the native population of the lately rebellious States, makes it a treaty of peace which, if ratified, as it should be, by the election of the candidates, will forever close and gloriously close the deplorable wave which has devastated the South openly or covertly for the last twelve years.

2. *Resolved*, That the party now in power has violated its pledge, contained in the inaugural of President Grant, to give the country an honest currency on a specie basis: it has robbed the people and wasted the public domain by squandering it upon greedy and fraudulent corporations. It has introduced into the Administration the ideas and practice of personal government to an extent without precedent in the history of the country, and is alike mischievous in its present results and alarming in what it threatens for the future. And that, in its

policy toward the Southern section of the country, in place of promoting that reconciliation which was its obvious duty, it has embittered the hostility between the different classes, and arrayed the white and black races against each other in a manner that is fatal to the best interests of the nation, and, worst of all, pernicious to the welfare of the colored race, of which it assumes to be the especial protector.

3. *Resolved*, That we cordially indorse Horace Greeley and B. Gratz Brown as eminently fit for the posts assigned them by the two great National Conventions, and we denounce the constantly-reiterated pretence that the rights of the freedmen will be less secure under their administration—a wanton insult to the intelligent people of the nation, and a dishonest trick to retain power in bad hands by imposing on the ignorant and credulous.

4. *Resolved*, That the Hon. Charles Sumner, by his efforts to secure to all classes perfect equality before the law, to restore an honest currency, to promote the harmony and reconciliation of the States, and especially by his masterly and unanswerable exposure of the untrustworthiness of the present Administration, has won a new and transcendent title to the veneration and gratitude of the Commonwealth and the country.

5. *Resolved*, That labor is the creator of capital and is what originates the only valid title to the private possession of it, and that the possession of capital, as free civilized society is necessarily constructed, is the only thing besides charity which can prevent the necessity of excessive labor. Therefore, all that the State can do to alleviate labor, unless it should arbitrarily attempt to enforce charity at the expense of capital, which is inconsistent with the rights of property, and would only injure the laborer in the end, is to give him the utmost facility honestly to acquire capital, by seeing that he is not unjustly or unnecessarily taxed, that he enjoys the best means of education and has the benefit of well managed financial and cooperative institutions, whereby his smallest savings of capital may earn the largest profit, and the doing of this is held to be the highest duty of the State.

6. *Resolved*, That the action of the Grant party of this Commonwealth at a recent convention in declaring for a prohibitory liquor law affords the strongest evidence of its corruption and hypocrisy on the temperance question, when we consider that, having for years held the control of the offices of this Commonwealth and had in charge the execution of its laws, they have failed to enforce this law, excepting in particular localities and with venal discrimination.

7. *Resolved*, That the presence of laws upon the statute-book without an attempt to enforce the same, or a partial or corrupt attempt at their enforcement, is demoralizing in its effect on the people. It has a tendency to produce disrespect for the law; therefore all laws existing of this character should, in the judgment of this convention, be either vigorously and impartially enforced or repealed.

In the Democratic Convention "the declaration of principles framed at Cincinnati and approved at Baltimore" was "adopted by the Democracy of this Commonwealth," and the party was pledged to a "heartly support of the candidates there nominated." Conference committees were appointed by the two conventions to make up a joint ticket, which was adopted and was as follows: For Governor, Charles Sumner, of Boston; for Lieutenant-Governor, George W. Stearns, of Chicopee; for Secretary of State, George H. Munroe, of Boston; for Treasurer and Receiver General, Levi Haywood, of Gardner; for Auditor, P. A. Collins, of Boston; for Attorney-General, Waldo Coburn, of Dedham; for electors at

large, Chester W. Chapin, of Springfield, and Frank W. Bird, of Walpole. The following resolution was adopted, ratifying the ticket, after which the two conventions united in the same hall for speech-making and congratulations:

Resolved, That we commend the candidates presented by the concurrent action of the two Conventions this day to the suffrages of the honest voters of the Commonwealth, and their triumphant election will insure a discontinuance of the trifling legislation and corrupt practices which have made odious the existing Administration.

Mr. Sumner, who was out of the country when the nominations were made, declined to stand as candidate for Governor, and the name of F. W. Bird was substituted on the ticket by the State Central Committees.

A Labor Reform Convention had been held on the 21st of August, at Framingham, but it was decided to make no nominations. The committee appointed to draw up a platform of principles failed to agree, and two reports were made, but after some discussion the following brief resolution was adopted as a substitute for both:

Resolved, That the whole power and strength of the Labor party in this State is concentrated in the single issue of reducing the hours of labor for the factory operatives, and that we will not vote for any member of the Legislature who opposes this simple act of justice and humanity.

The only other resolution adopted was this:

Resolved, That we demand that women who do the same kind of work as men shall receive the same wages, and that we demand the ballot for women.

The convention was thinly attended, and rather inharmonious.

At the election on the 4th of November, the total vote cast for presidential electors was 192,782, of which 155,472 were in favor of Grant and Wilson, and 59,260 in favor of Greeley and Brown, making the majority of Grant and Wilson 74,212. The total vote for Governor was 193,526, of which Washburn received 138,900, and Bird 59,626; majority for Washburn, 74,274. The entire Republican State ticket was chosen, and a full Republican delegation elected to Congress from the eleven districts. The State Legislature consists of 89 Republicans and 1 Democrat in the Senate, and 217 Republicans and 28 Democrats in the House of Representatives. In December, Henry L. Pierce, Republican, was chosen Mayor of the city of Boston by a majority of 79 over Wm. Gaston, the Democratic candidate. The Board of Aldermen of Boston consists of 9 Republicans and 3 Democrats, the Common Council of 38 Republicans and 26 Democrats.

On the 9th and 10th of November the city of Boston was visited by a terrible conflagration, which swept through the richest business quarter, destroying large granite stores and warehouses, and vast amounts of merchandise. The fire broke out at about 7 o'clock in the evening of the 9th, at the corner of Sumner and Kingston Streets, and, owing to the

delay of the engines, consequent upon the prevalence of disease among the horses of the fire department, gained considerable headway before any thing was done to check it. It swept to the north nearly to State Street, laying in ruins most of the district bounded by Summer, Washington, and State Streets, and the water-front. The area burnt over was about 65 acres. The number of buildings destroyed was 776, of which 709 were of brick and stone, and 67 of wood. The assessors' valuation of these buildings was \$18,591,900, and it was estimated that it would cost \$18,000,000 to replace them. The amount of personal property destroyed was about \$60,000,000. There were very few dwelling-houses burnt, and only 14 lives lost, 7 being those of firemen. The only important public buildings injured were the old post-office on State Street, and the new unfinished post-office on Water Street.

An extra session of the Legislature was called, to commence on the 19th of November, to devise such measures of relief for the city of Boston as might be deemed expedient. Several insurance companies were hopelessly bankrupt, while others were forced to wind up their business, and a demand was made for new charters, or for a general insurance law. A joint committee on this subject was appointed, to which all petitions and propositions were referred. The result was a general insurance act, which passed both Houses after a thorough discussion. It authorizes any ten or more residents of the State to associate themselves together, by an agreement in writing, for the purpose of carrying on the business of fire or marine insurance. The capital shall not be less than \$200,000. After the company has organized in pursuance of the written agreement, a certificate must be obtained from the Insurance Commissioner, setting forth the names of the parties, the amount of capital, articles of association, etc., which must be filed with the Secretary of State. No policy can be issued until the sum of \$500,000 shall have been offered and subscribed for insurance, and entered on the books of the company. The payment of dividends and losses is regulated by the following section:

The holders of stock in mutual companies with a guarantee capital, organized under the provisions of this act, shall be entitled to a net semi-annual dividend not exceeding 4 per cent. on their respective shares, if the net profit, after providing for all expenses, losses, and liabilities then incurred, including a sum sufficient to reinsure all outstanding risks, is sufficient from time to time to pay the same; and if any such dividend is less than 4 per cent. it shall be made up when such net profit becomes sufficient therefor.

Three-fourths of said net profit, after the payment of said dividends, shall be credited to, and, at the expiration of the policies, divided among the insured, and the remaining one-fourth shall be invested and be a reserve for the security of the insured; but, when from time to time the reserve shall exceed 5 per cent. on the amount insured, the whole of said net profit in excess of said reserve of 5 per cent.

shall, after the payment of said dividends, be divided among the insured at the expiration of their policies.

The guarantee capital shall be applied to the payment of losses only when the other cash funds have been exhausted; and, if the guarantee capital shall at any time be reduced, it shall be replaced from the first accumulation of the reserve, or the directors may at their discretion replace the whole or any part of it by assessments upon the contingent funds in the possession of the company at the time of said reduction.

Among the other acts was one authorizing the city of Boston to issue bonds to the extent of \$20,000,000, to aid the owners of land in the burnt district to restore their buildings within one year from the 1st of January, 1878. The bonds run fifteen years, and bear interest at the rate of 5 per cent. in gold or six per cent. in currency. A bill was also passed providing for a commission of three civil engineers to be appointed by the Governor, to report a comprehensive system of drainage for the city of Boston and the surrounding territory, within a radius of ten miles, the expenses to be borne by the city. A Merchants' Exchange, with a capital of \$2,000,000, to be located in the burnt district, was incorporated, and the Old South Church was authorized to lease its building to the United States Post-Office Department, with the consent of a majority of the pew-owners. The extra session of the Legislature came to a close on the 18th of December.

"The World's Peace Jubilee and International Musical Festival" commenced in Boston on the 17th of June, and continued until the 4th of July, under the direction of Patrick S. Gilmore. It took place in a large wooden building known as the "Coliseum," located near the intersection of the Boston & Albany and Boston & Providence Railroads. The structure was 550 feet long and 350 feet wide, erected without much pretence to ornamentation. The interior was divided into two sections, that occupied by the audience being 300 feet long, and that devoted to the chorus and orchestra being 240 feet of the length of the building. The chorus consisted of 20,000 voices, and the orchestra of 1,000 instruments. Besides these, several musical organizations had been secured by Mr. Gilmore from Europe, including the band of the Grenadier Guards from London, the Kaiser Franz Grenadier Regiment band from Berlin, the Garde Republicaine band from Paris, and the Emperor of Germany's Cornet Quartet. Franz Abt, the eminent German composer, was present, and conducted the performance of several of his own songs, and Johann Strauss, of Vienna, appeared each day and led a select orchestra in the performance of some of his own compositions. There were other special features, and the whole made up a musical festival on a scale hardly equalled in modern times.

According to the census of 1870, of the total population (1,160,666), ten years old and over,

there were engaged in all classes of occupations 579,844 persons, of whom 451,548 were males and 128,301 females. There were engaged in agriculture, 72,810, including 72,756 males and 54 females; in professional and personal services, 181,291, including 75,917 males and 55,374 females; in trade and transportation, 83,078, including 81,077 males and 2,001 females; in manufactures and mechanical and mining industries, 292,665, including 221,793 males and 70,872 females.

The State contained 1,736,221 acres of improved land, 706,714 of woodland, and 287,348 of other unimproved land. The cash value of farms was \$116,432,784, of farming implements and machinery, \$5,000,879; total amount of wages paid during the year, including value of board, \$5,821,032; total (estimated) value of all farm productions, including betterments and additions to stock, \$32,192,378; orchard-products, \$939,854; produce of market-gardens, \$1,980,281; forest-products, \$1,616,818; value of home manufactures, \$79,378; of animals slaughtered or sold for slaughter, \$4,324,658; of all live-stock, \$17,049,228. There were 41,089 horses, 103 mules and asses, 114,771 milch-cows, 24,480 working-oxen, 79,851 other cattle, 78,560 sheep, and 49,178 swine. The chief productions were: 17,574 bushels of spring, and 17,074 of winter, wheat, 239,237 of rye, 1,397,807 of Indian-corn, 797,664 of oats, 183,071 of barley, 58,040 of buckwheat, 7,812,885 pounds of tobacco, 306,659 of wool, 24,690 bushels of peas and beans, 30,254,446 of Irish, and 917 of sweet, potatoes, 10,966 gallons of wine, 6,559,161 pounds of butter, 2,245,873 of cheese, 13,284,057 gallons of milk sold, 597,455 tons of hay, 252 bushels of clover-seed, 464 of grass-seed, 61,910 pounds of hops, 930 of flax, 390,800 pounds of maple-sugar, 2,326 gallons of maple molasses, 25,299 pounds of honey, and 1,195 of wax. The total number of manufacturing establishments was 13,212, using 2,396 steam-engines of 78,502 horse-power, and 3,157 water-wheels of 105,854 horse-power, and employing 279,880 hands, of whom 179,082 were males above sixteen, 86,229 females above 15, and 14,119 youth. The total amount of capital invested was \$231,677,862; wages paid during the year, \$118,051,886; value of materials consumed, \$334,418,982; of products, \$553,912,568.

The whole number of newspapers and periodicals was 259, having an aggregate circulation of 1,692,124, and issuing annually 129,691,266 copies. There were 21 daily, with a circulation of 231,625; 1 tri-weekly, circulation 800; 16 semi-weekly, circulation 41,484; 153 weekly, circulation 899,465; 11 semi-monthly, circulation 45,200; 48 monthly, circulation 462,150; 9 quarterly, circulation 11,400; and 1 annual, circulation 3,000. There were 3,169 libraries, having 3,017,813 volumes. Of these, 1,625, with 1,007,204 volumes, were private, and 1,544, with 2,010,609 volumes,

were other than private, including 186 circulating libraries, with 847,556 volumes.

The total number of religious organizations was 1,848, having 1,764 edifices, with 882,817 sittings, and property valued at \$24,488,286. The leading denominations were:

DENOMINATIONS.	Organizations.	Sittings.
Baptist.....	286	139,085
Christian.....	81	9,675
Congregational.....	500	269,314
Episcopal.....	107	46,945
Methodist.....	247	117,325
Roman Catholic.....	196	130,415
Unitarian.....	180	98,306
Universalist.....	97	35,637

The condition of pauperism and crime is shown by the following statistics:

Total population.....	1,457,351
Number of persons receiving support during the year ending June 1, 1870.....	8,086
Cost of annual support.....	\$1,121,604
Total number receiving support, June 1, 1870..	5,777

Number of persons convicted during the year.	1,598
Number of persons in prison, June 1, 1870.....	2,526
Native.....	1,391
White.....	1,152
Colored.....	129
Foreign.....	1,325

MAURICE, Rev. JOHN FREDERICK DENISON, a popular clergyman of the Church of England, and author, born about 1805; died in London, April 1, 1872. He was the son of a Unitarian clergyman, and entered Trinity College, Cambridge, at an early age. Here he formed an intimacy with John Sterling, afterward distinguished as a scholar and author, and the mutual attachment was subsequently strengthened by their marrying two sisters. Not being able to subscribe to the Thirty-nine Articles, Mr. Maurice did not obtain a Fellowship, and left Cambridge before going up for his degree, but afterward became a member of the Church of England, and entered his name on the books of Exeter College, Oxford, where he took his degree of B. A. in 1831. He was appointed Chaplain and Reader at Lincoln's Inn, and became a Theological Professor in King's College, London, in 1846, retired from the latter a few years ago, in consequence of an outcry against his religious opinions as to the eternity of future punishment, and became incumbent of St. Peter's Chapel, Vere Street, Marylebone. Between the interval of leaving Cambridge and visiting Oxford, he was for a short period editor of the *Athenaeum*, and about the time that he took his degree he wrote a novel called "Eustace Conway." His efforts, in connection with the Rev. Charles Kingsley and others, toward assisting the education of working-men, are well known. He wrote many volumes of lectures, sermons, theological essays, together with other works; the more important of his labors being "Learning and Working," six lectures, published in 1855; and "The Religion of Rome," four lectures, delivered in 1854, at the Philosophical Institution of Edin-

burgh. His volumes of sermons, his treatises on philosophy, and his lectures, have been widely circulated. "What is Revelation?" appeared in 1859; "What is Revelation? Sequel to," in 1860; "Lectures on the Apocalypse, or Book of Revelation," in 1861; "Claims of the Bible and of Science," in 1862; "Gospel of the Kingdom of Heaven: Lectures on St. Luke," in 1864; "Conflict of Good and Evil in our Day," in 1865; and "The Commandments as Instruments of National Reform," in 1866. He was elected Professor of Moral Philosophy in the University of Cambridge in October, 1866, and received the honorary degree of M. A., March 28, 1867. Prof. Maurice was admirably fitted to exert an influence over a certain order of minds. His broad culture and enthusiasm attracted scholarly men; while the dreamy mysticism investing both his thought and language had a singular charm for minds which would have been repelled by dogmatic teaching. He was religious and earnest in his way, honoring Christianity as a religion coming from God, and ready at any time to sacrifice position for truth.

MAYO, RICHARD SOUTHWELL BOURKE, sixth Earl of, K. P., G. M., G. C. S. I., Viceroy and Governor-General of India, born in Dublin, February 21, 1822; was assassinated by a Mohammedan (Wahabee) convict, at Port Blair, Andaman Islands, February 8, 1872. He was descended from an ancient Norman family, the first elevation to the peerage being in 1776. Having graduated from Trinity College, Dublin, he took an extensive tour in the North of Europe, and published a narrative of his observations in St. Petersburg and Moscow, 1845. He was Chief Secretary for Ireland during each of the Earl of Derby's administrations, with whose political views he sympathized. From 1847 to 1867 he sat in Parliament, first for Kildare, then for Coleraine, and finally for Cookermouth. He was made a member of the Privy Council in 1853, being that year appointed Deputy-Lieutenant of County Kildare. In 1867 he was elevated to the peerage on the death of his father, as sixth earl, and took his seat as a Conservative peer in the House of Lords. In November, 1868, he was appointed by Disraeli (then premier) Viceroy of India, and reached Calcutta in the following February. His administration was an admirable one, his executive ability, energy, and purity of character, rendering him a model ruler. He undertook a tour of inspection of every portion of the vast domain over which he ruled, to correct abuses, and perfect the administration of justice, and had reached Port Blair, Andaman Islands, a convict colony, when he became a victim to the fanatical assassin.

MAZZINI, GIUSEPPE, an Italian reformer, statesman, and revolutionist, born in Genoa, June 28, 1808 (or, according to some authorities, 1805); died in Pisa, March 10, 1872. His father was a medical professor in the Univer-

sity of Genoa, a man of wealth, and gave his son a superior education, intending him for a literary life. During his student-life, Italy was passing through a period of severe trial and depression. The overthrow of Napoleon I. was the signal for the revival of all the reactionary measures which, during his sway, had been kept in abeyance. The conquerors made haste to divide the spoils among themselves, and Italy fell to the share of the Austrian, and all its petty states were under Austrian influence and direction. In 1820 there was a revolt in the duchy of Genoa, which was promptly put down by Austrian bayonets; and, in the years that followed, the slightest symptoms of sympathy with liberal opinions were crushed out with the iron hand of despotism. Mazzini, ardent, susceptible to the sorrows or oppressions of others, remarkable for the intensity of his affections, his humanity, his firmness, and his patriotism, was greatly moved by the sad condition of his country, and though his father, a man of conservative habits, did not sympathize with his sentiments, his patriotic enthusiasm gained such absolute control over his spirit that it led him to renounce his cherished idea of a life of literature and contemplative study, for the action and strife of the political arena. His first step in politics was to contribute to a small advertising sheet, named the *Indicatore*, published in Genoa. He persuaded the publisher to admit advertisements of books, accompanied by a few lines, to describe and define their subject. The paper became gradually transformed into a literary journal, in which liberal principles were cautiously but effectively inculcated by Mazzini and his associates. The Government, however, suppressed his journal, as they did the *Sub Alpino*, to which he had contributed his first essay on "Dante's Love of his Country," and the *Atologia* of Florence, in which some of his liberal essays had been published, but not before Mazzini had acquired considerable literary fame, and given a powerful impulse to the national cause.

The *Carbonari*—a revolutionary secret society—at this time was permeating Italy. Mazzini did not fully approve of its rules and ceremonies, but, feeling that he could not then found an association himself, he resolved to join it. He was speedily invested with a preponderating influence in the counsels and missions of this society, and of course became obnoxious to the governments, who determined to entrap him. One Cottin, a Piedmontese spy and police agent, was employed for this purpose, and, professing to be fully imbued with liberal doctrines, he induced Mazzini to initiate him into the brotherhood of the *Carbonari*, and immediately betrayed him, and caused his arrest and imprisonment for six months in the fortress of Savona, from which he was only liberated on condition of his departure from Italy. It was while thus imprisoned that he conceived the plan of the

"Association of Young Italy," *La Giovane Italia*, and sought to surround himself with men as ardent and resolute as himself; but, while this organization was republican and unionist to the core, its tendencies were more humanitarian and universal than those of carbonarism. Liberty, equality, and humanity, were its watchwords; "God and the people" its motto; white, red, and green, its tricolored banner; education and insurrection the great agencies of its operations; assassination was prohibited by its statutes, and the symbolic dagger of the *Carbonari* was replaced by the emblems of a book and the cypress. After his release he repaired to Lyons, where the Italian exiles were organizing for the invasion of Savoy. The French Government suppressed this movement and dispersed its leaders, and he joined republicans who repaired to Corsica, for the purpose of sending thence arms and assistance to the insurrection which existed in the central provinces of Italy. He returned in a short time to Marseilles, and gave his whole thought and effort to the effective organization of his new association, establishing and maintaining a periodical to which he gave the name of *Young Italy*. On the accession of Charles Albert, he addressed him a public letter from Marseilles, wherein he urged the King to place himself at the head of the liberal movement. He prepared also at Marseilles the statutes of the new association, declaring that "Young Italy is a brotherhood of Italians who believe in a law of progress and duty," and that members joined it "in the firm intent of consecrating both thought and action to the great aim of reconstituting Italy as one independent, sovereign nation of freedmen and equals." As a result of his letter to the King of Sardinia, the Sardinian ambassador made application to the French Government, and he was ordered to quit the French territory. For nearly twelve months he succeeded in evading the vigilance of the police, and brought out his journal, which was easily distributed from Marseilles into Italy, and went to Switzerland for the purpose of organizing the expedition into Savoy in 1833, which failed through the treachery of Ramorino, to whom the military command had been given. Driven out of Switzerland, he repaired to London in 1837, where he supported himself by his pen, and established a school and a journal, called the *Apostolato Popolare*, for Italian working-men. In 1844 his name was brought prominently before the English public, in consequence of the disclosure of a practice of opening the letters of refugees in the London post-office by the Government, at the request of foreign ambassadors. Much excitement was caused by this act of the Government, and it called forth an indignant letter from Carlyle, which was scathing in its severity. After the French Revolution in February, 1848, Mazzini went to Paris, to concert measures with the Republican party there, and shortly

afterward took up his abode at Milan, where he opposed the fusion of Lombardy with Piedmont. He remained at Milan until the advance of the Austrians forced him to take refuge in the canton of Ticino, in Switzerland, whence, shortly after the expedition into the Val d'Intelvi, he was again expelled. Rome having declared itself a republic, Mazzini was elected deputy to the Constituent Assembly for the town of Leghorn, where he landed, and was received with acclamations. After spending some time at Florence, in attempting to effect the fusion of Tuscany and Rome, he repaired to Rome, and from that moment became the leading spirit of the Roman Republic, having been, with Armellini and Saffi, appointed, March 30, 1849, a Triumvir, and received with his colleagues the full powers of the young state. He organized an army of 50,000 men, cast cannon, and prepared in every way to govern and defend the republic, and for a time maintained the contest against General Oudinot and his army. A cessation of hostilities having been agreed upon, he protested against it, and resigned his post of Triumvir. Rather than execute the decree of the Assembly, he left Rome, and took up his residence in England, keeping up a correspondence with the Republican party in Italy. After this great epoch in his life, Mazzini continued to occupy the attention of Europe by the unceasing efforts he made in behalf of Italian freedom. He caused risings in Italy in 1858 and 1857, but at length he saw, in 1859, the powerful armies of France and Sardinia accomplishing the first part of the work of his life, and impelled to this course by the enthusiastic and irrepressible ardor which he had inspired. But, though a great advance on the divided and oppressed Italy which had been the chief sorrow of his youth and manhood, it was not yet the Italy for which he had long labored and prayed. His dream had been of Italy, a noble, united, self-governed republic, and he was not, therefore, heartily in accord with the existing state of affairs. In the beginning of 1864 an attempt was made, most unjustly and falsely, to implicate him in the attempt of Orsini and others to assassinate Napoleon III. Mazzini was all his life long a conspirator and a revolutionist, but never directly or indirectly an assassin. Before his death, the evidence was complete that Orsini, who had been earlier a follower of Mazzini, acted in this matter in absolute opposition to his instructions and commands. In 1865 Mazzini was elected to the Italian Parliament, but his election was annulled. In 1866, while still pursuing his labors, the victory of Sadowa insured the freedom of Venice; and in 1870 the Italian army entered Rome, and the unity of Italy was complete. Mazzini, true to his republican faith, labored to the last to make Italy not only united, but republican.

He had returned to Italy after the surrender of Rome to the Italian King, but he would not

enter Rome, because, owing to the pact entered into between Victor Emmanuel and the Pope-King of Rome, that city, which he loved better than all others, could not be free. He resided for a time at Genoa, and subsequently at Pisa, where he died. His best eulogy has been written in these few words by Carlyle: "A man of genius and virtue, a man of sterling veracity, humanity, and nobleness of mind, one of those rare men, numberable, unfortunately, but, as units in this world, who are worthy to be called martyr souls, who, in silence, piously in their daily life, understand and practise what is meant by that." Mazzini's principal works were: "Italy, Austria, and the Pope," published in England in 1845; "Royalty and Republicanism in Italy," in 1850; "Italian Question and the Republicans," in 1861; "Duties of Man," in 1862; "Life and Writings," in 1864-'66; and "Address to Pope Pius IX.," in 1865.

MEADE, GEORGE GORDON, Major-General U. S. A., LL. D., born at Cadiz, Spain, during the consulship of his father, Richard W. Meade, in 1815; died at his residence in Philadelphia, November 6, 1872. At an early age he was sent to the boys' school in Washington, D. C., at that time kept by the present Chief-Justice of the United States Supreme Court, Mr. Chase. Subsequently, he attended the Military Academy near Philadelphia, and, in 1831, entered the Academy at West Point, whence he graduated, in 1835, as brevet second-lieutenant of the Third Artillery. The same year he was made second-lieutenant, and served in Florida, in the Seminole War. The state of his health induced him to resign his commission in 1836, and he became a civil engineer; but, in 1842, he again entered the army, as second-lieutenant in the corps of Topographical Engineers, and in that capacity served in the Mexican War. During this campaign he was attached to the staff of General Taylor, and afterward to that of General Scott, distinguishing himself at Palo Alto and Monterey, and receiving, as an acknowledgment of his gallantry, a brevet of first-lieutenant, dated September 28, 1846, and, also, upon his return to Philadelphia, a splendid sword from his townsmen. During the interval between the Mexican War and the Civil War, having been promoted to a full first-lieutenancy in August, 1851, and to a captaincy of engineers in May, 1855, he was engaged in the particular duties of his department, more especially in the survey of the Northern lakes; but, upon the call of the Government for men, in 1861, he was ordered to report at Washington, and, upon the organization of the Pennsylvania Reserve Corps, was made a brigadier-general of volunteers, and assigned the command of the Second Brigade, with General McCall as division-general, his commission dating August 31, 1861. Subsequently, this corps was joined to the Army of the Potomac, and took part in the advance on Richmond. During the seven days'

fight General Meade was severely wounded, but soon recovered, and, in September, 1862, took command of a division in Reynolds's First Army Corps, which he conducted with great skill and bravery during the Maryland campaign. At Antietam, when General Hooker was wounded, General Meade was placed in command of the corps, and fought bravely the remainder of the day, receiving a slight wound, and having two horses killed under him. He received the appointment of major-general of volunteers on the 29th of November, and took part in the battle of Fredericksburg (December, 1862), and displayed courage and coolness during the engagement. During the same month he was placed in command of the Fifth Corps, which, after being engaged throughout the battle of Chancellorsville, covered the retreat of the beaten army, and guarded the crossings until the whole body was safely over the river.

In June, 1863, when Lee was advancing up the Shenandoah Valley, to invade Maryland and Pennsylvania, General Meade was suddenly and unexpectedly called to succeed General Hooker in the command of the Army of the Potomac, numbering 100,000 men. He advanced through Maryland, on parallel lines with Lee's army, which finally, marching eastward, struck (July 1st) the head of Meade's column, under General Reynolds, near Gettysburg. The fight for position which occurred, and which resulted in the defeat and death of Reynolds, and the retirement of his column through Gettysburg to a strong position south of the town, is generally spoken of as the first day's fight of the great battle which ensued at Gettysburg. The whole army advanced to this position during the night, and the next day Sickles's corps went into action, and was driven back, the day closing with a slight advantage on the side of the Confederates. The third day opened with an advance of the Union right under Slocum, who retook ground he had lost, and rested upon it. Soon after, the Confederate artillery opened, and ploughed the Union lines for two hours, when the great Confederate column of assault, emerging from behind the batteries, pressed swiftly toward the Union lines, and was repulsed with great slaughter. This reverse decided the day, and, when the Confederates regained their lines, the battle had been won by the Union forces. General Meade, who displayed masterly ability throughout the engagement, reported his loss in these three bloody days at 2,834 killed, 13,709 wounded, and 6,643 missing. He took 13,621 prisoners and 24,978 small-arms. Lee promptly retreated, before the detachments sent by Meade in pursuit could arrest his progress. About the 18th of July he moved his army across the Potomac into Virginia, where he had several skirmishes with the enemy in October and November, 1863. He was second in command of the Army of the Potomac in its operations against Richmond in 1864. The

army of which he had immediate command fought great battles at the Wilderness, Spottsylvania Court-House, and Cold Harbor, and was employed many months in the siege of Petersburg. On the 18th of June, 1862, General Meade was promoted to the rank of major of engineers in the regular army, and on the 3d of July, 1863, was advanced, by the several grades of lieutenant-colonel and colonel, to the brigadier-generalship in the regular army. During the session of 1863-'64 he received the thanks of Congress, and was on the 1st of February, 1865, promoted a major-general in the regular army, his commission dating from August 18, 1864. In the reconstruction of the military divisions after the war, General Meade was given the command of the Division of the Atlantic, with headquarters at Philadelphia, where he resided in the house presented to his wife by his fellow-citizens, in grateful recognition of his eminent services. His record is an illustrious one. He was a brilliant soldier, a true patriot, an earnest Christian, ever striving rather to be faithful in the discharge of his duty than to win to himself dazzling honors. He was greatly esteemed by his fellow-citizens, and the funeral honors paid to his remains were only exceeded in their sad magnificence by those bestowed upon President Lincoln.

MEHEMET, DJEMIL PACHA, a Turkish diplomatist, born in Constantinople in 1823; died on a railway train, while on a journey from Paris to Lemberg, Austria, September 23, 1872. He was the oldest son of the late Reschid Pacha, and at the age of eleven years accompanied his father on one of his missions to Paris, and subsequently to London, remaining in Western Europe till he was twenty-two years of age, and acquiring his education there. When his father was called to the Ministry of Foreign Affairs and the office of Grand-Vizier, he received an appointment in the Bureau of Protocols. Shortly afterward he married the sister of Mehemed Ali Pacha, brother-in-law of the Sultan, and in 1849 was attached to the Imperial Palace as secretary of the Sultan. This position he retained until February, 1855, when he was sent to represent the Porte at Paris. In the following year he assisted Ali Pacha as second plenipotentiary to the Paris Congress. Subsequently he was made ambassador to Turin. On August 8, 1861, he was made Chancellor of the Divan, and charged temporarily with the Ministry of Foreign Affairs. In October, 1862, he was again sent as ambassador to Paris, and about the same time, upon the death of his father, he received the title of pacha, and subsequently he was made *muchir*, or marshal. He was afterward recalled from this post, but was again returned in December, 1863, and retained this position until his death. He had been decorated with the Imperial order of the Medjidié, had received the Grand Cross of the order of Saints Maurice and Lazarus of Sardinia, and of the Iron Crown of Austria.

MERLE-D'AUBIGNÉ, JEAN HENRI, D. D., a clergyman of the Reformed Church of France, and historian of the Reformation, born at Eaux Vives, on the left bank of Lake Leman, in the canton of Geneva, Switzerland, August 16, 1794; died in Geneva, October 21, 1872. He was descended, on both his father's and mother's side, from distinguished Huguenots, Matthew Merle, a distinguished general, of the times of Henry of Navarre, being one of his ancestors, and Théodore Agrippa D'Aubigné, wit, scholar, poet, soldier, and historian, another. He received his academic education, and commenced his studies for the ministry, in Geneva, and afterward went to the University of Berlin, where he attended the lectures of Neander. It was while a student in that university, and on a casual visit to the Castle of Wartburg, that he first conceived the idea of writing the history of the Reformation. He was ordained in 1817, and settled in Hamburg, as the pastor of the French Calvinist Church in that city. In 1823 Merle-D'Aubigné removed to Brussels, where, for seven years, he officiated as the pastor of the chief Protestant church, and became at once the court preacher, and the personal friend, of the late King of Holland, then, as King of the United Netherlands, a frequent resident at the Flemish capital. Upon the separation of Belgium from the crown of the house of Orange, Merle-D'Aubigné returned to his native country, and accepted the chair of Ecclesiastical History in a college founded by the Evangelical Society of Geneva, together with the general direction of the institution. This position enabled him to prosecute, with renewed energy, the "great work" of his life, and in 1835 he gave to the public the first volume of the "History of the Reformation in the Sixteenth Century." The translation of this work into English, and its publication in Great Britain and this country, soon followed. The history, from his dramatic mode of presentation, has all the charm of romance. More than two hundred thousand copies of the translation were sold in Great Britain, and more than twice that number, in various forms, in the United States. But, while this work occupied the best part of thirty years of his life, he was never negligent of his duties as professor and director of the theological seminary. No abler instructor has ever been connected with that institution. He was not an extremist in his theological views, although firm and decided in adhering to and advocating the strong doctrines of the Reformation. In addition to his history of the Reformation, he wrote another series of volumes, on the Reformation in the time of Calvin, especially as connected with the life and work of this reformer, having a more limited range, but entering more minutely into the subject, and having the grand characteristics of the author's style. This work, which also extended to five volumes, was not completed when the author ceased his labors.

He was also the author of "The Protector; or, the English Republic in the days of Cromwell;" "Three Centuries of Scottish Struggle; or, Two Kingdoms and Two Kings;" "The Character of the Reformer and the Reformation of Geneva." He published also, in 1848, an interesting account of his personal travels under the title of "Germany, Scotland, and England; or, the Recollections of a Swiss Minister," together with a number of sermons, addresses, and special papers, the latter having been principally contributed to the periodical known as the *Archives du Christianisme*. His personal influence at Geneva was very great, as it was wherever his name and his writings were known.

METALS. Gold in Sea-Water.—Mr. E. Sonstadt recounts in the London *Chemical News* his long-continued endeavors to detect the presence of gold in sea-water, and separate it. All his methods were applied directly to the sea-water, and not to the residue left on evaporation. The water tested by him was obtained at different times from different parts of Ramsey Bay, Isle of Man, and the results in all the cases were in entire accordance. The proportion of gold in sea-water (containing less than a grain in a ton) is much too small to admit of separation or even detection by the ordinary means; and there is another difficulty mentioned by Mr. Sonstadt, namely, the continuous resolution of the gold after it has been separated in the metallic state. The first method he describes is on some accounts the best, as it can be practised on so small a quantity of water as 150 or 200 c. c.

Two or three decigrammes of pure ferrous sulphate are dissolved in the water, which is acidulated by two or three drops of hydrochloric acid. The solution is heated in a *chemically clean* and well-glazed porcelain dish, over a small flame, so managed that the flame may touch the under part of the dish without causing ebullition. Under these circumstances, a lustrous film of ferrie oxide forms in the dish, commencing from the portion directly heated by the flame. The heat is continued, without boiling, until the sea-water is evaporated to about half, or so long as the film increases in extent and in lustre. The liquid is then poured off, the strongly-adherent film is rinsed with a little water, and then about 50 c. c. of strong chlorine-water is allowed to stand in the dish for an hour or two, after which it is slowly evaporated down (over the film) to a few drops, a drop of dilute hydrochloric acid being added toward the end of the evaporation. The liquid, which should be nearly colorless, is then poured into a test-glass, containing a few drops of solution of stannous chloride, when, after a few minutes, the liquid takes a bluish or purplish tint, which may be exactly matched by a drop or two of a suitably diluted solution of gold added to a corresponding portion of tin-salt in another glass. The reaction may, of course, be made more striking by taking for the experiment a larger quantity of sea-water, although the reaction obtainable from the quantity indicated is quite definite. I have repeated this experiment many times, upon different specimens of sea-water, and always with the same result when a film was obtained on evaporation. But the formation of this film depends upon the iron being in a particular degree of oxidation, and I have sometimes failed to obtain it. The best way is, after adding the ferrous

sulphate and hydrochloric acid to the sea-water, to leave it exposed to the air for a few hours, or overnight, before heating the liquid to obtain the film. Corresponding experiments were made, in the same vessels and with the same reagents, upon simple water, and upon water containing chloride of sodium and alkali sulphates in solution, but the films obtained, when treated as described, never gave the slightest coloration with solution of stannous chloride. The chlorine solution off the sea-water films may be dried up in a porcelain crucible with precipitated lead, and gold beads obtained by cupellation, after fusing the lead into a button with borax; but, for this experiment, at least half a litre of sea-water should be taken, and even then the bead obtained is not ponderable.

Assay of Pyrites for Gold.—Mr. J. M. Merrick describes in the *American Chemist* his method of assaying pyrites for gold. He takes 1 lb. or even 18 oz. of fine, smooth dust, and mixes it with 8 oz. of finely-pulverized and sifted pyrites; the whole is then resifted, and put into a Hessian crucible, which should be about one-third filled with the mixture. The crucible is then exposed to a common fire of hard coal, and, during the first half-hour, the contents are stirred once or twice; and, as the fire grows brighter and carbonic-acid gas is evolved, the mixture should be stirred every five or ten minutes. The author continues:

On stirring during this time, the iron rod seems to meet with but little resistance from the light mass; but, at the end of about one and a half hour, the evolution of gas suddenly ceases, the red-hot mass becomes heavy, sinks, and requires considerable force to keep it stirred. It must be stirred well and vigorously, however, for about half an hour, not leaving it unstirred for more than a minute, otherwise the mass will fuse or cake, and the assay will be almost inevitably ruined.

When a sample taken out in an iron spoon gives off no smell of sulphur, the entire contents of the crucible must be turned into a stoneware pot or a wooden bucket half filled with water, and well stirred. When the powder—which should be uniform and free from lumps or fused pieces—has settled, the water must be poured off, the wet mass allowed to drain, and then transferred to a large earthen bowl or porcelain mortar. Here it is to be amalgamated with about 2 oz. of mercury, to which a little bit of sodium amalgam has been added. The amalgamation, as well as the stirring in the fire, is a tedious process, and one which I prefer to do by proxy. It does not consist in merely grinding with a pestle the mercury in among the particles of the roasted ore, but this ore itself must be ground in contact with the mercury, until the particles are so fine that they will float suspended in water for several seconds. At the end of, say, ten minutes' thorough grinding, the contents of the bowl are to be brought into one mass in the bottom of the vessel, the bowl then sunk in a tub of water, and the contents "washed down"—an operation not easily described, but familiar enough to every old Californian. It consists essentially in shaking the bowl half full of ore and water in such a way that the mercury, gold particles, and unground ore, sink to the bottom, while the light and finely-ground ore is floated off into the tub. The ore remaining is reground and rewashed, and these processes are repeated till nothing but the mercury remains in the bottom of the bowl or mortar. This mercury is then dried with filter-paper, and heated in a porcelain capsule, over a Bunsen flame, very gently, until it is sublimed, and the gold remains behind. The film of gold may then be scraped up and melted, with a lit-

the sodic borate and potassic nitrate, in the very smallest-sized Hessian crucible, either with the foot blow-pipe or in a charcoal-furnace, by which means a round, clean button of gold, suitable for weighing, will be obtained.

This method—which I have subjected to a most thorough trial, my experiments having been made almost daily for three and a half months—has its disadvantages and its counterbalancing merits. On the one hand, it must be admitted to be tedious, laborious, and, to a considerable degree, uncertain. Some analysts fail with it altogether, while none who have tried it, so far as I know, get closely-agreeing results.

But, on the other side, it is certain that this method will indicate the presence of gold, and will bring out the gold in a weighable form from pyritic ores, where the assay by smelting will not show a remote trace of the precious metal; and that where the fire assay shows a certain percentage this will invariably bring out a larger amount. I have obtained large returns by this amalgamation method from iron pyritic ores, which have been repeatedly assayed in the ordinary way by chemists of great eminence, with uniformly negative results.

Fusion of Metallic Arsenic.—Mr. J. W. Mallett fuses metallic arsenic by placing the crude metal, in the form of small fragments and coarse powder, in a thick barometer tube of soft glass and small bore, well sealed at both ends, and enclosed in a piece of wrought-iron gas-tube, closed at each end by an iron screw-cap. The space between the tubes is filled with sand, well shaken down, and the whole heated to redness by a charcoal-fire. Arsenic thus treated was found, on cooling, to have fused into a perfectly compact crystalline mass, moulded to the shape of the tube, of steel-gray color and brilliant lustre, of sp. gr. = 5.709 at 19° C. It possessed a considerable degree of cohesive strength as compared with common sublimed arsenic, and even seemed to exhibit faint traces of flattening before crushing under the hammer. It gradually tarnished on exposure to the air, and presented all the chemical properties of ordinary crystalline arsenic obtained by sublimation. The temperature required for fusion lies between the melting-points of antimony and silver. The glass tube used was found greatly distended by the tension of the vapor; and the sand was cemented into a kind of artificial sandstone.

Filiform Silver.—Wherever native silver occurs, it is sometimes found in the form of metallic threads, or wires twisted in every direction, and often bent at sharp angles. Dr. J. H. Gladstone describes, in the London *Chemical News*, specimens of this filiform silver from Königsberg, in Norway, associated with calc-spar, and others from Chili associated with greenstone, and in both cases the metal was tough and non-crystalline. Precisely similar threads of silver were produced under the microscope, by decomposing a solution of nitrate of silver with suboxide of copper. The white filaments shoot forth in every direction, and twist about or double back in their course; while the cuprous oxide becomes black, splitting up, in fact, into cupric oxide and cupric nitrate. Most of these threads are so fine that

their diameter is only $\frac{1}{1000}$ th of an inch, and a gramme of such silver wire would stretch from London to Brighton, and many are much finer still. Sometimes these filaments will end in crystalline knobs, or crystals of silver will form upon them, as is not unfrequently the case in mineralogical specimens. Attempts to prepare them by means of other substances than suboxide of copper had not proved successful; but, as that substance is by no means a rare mineral, it was thought that their formation might result generally from its action on silver salts in solution.

The Copper Process at Agordo.—The copper-ore at Agordo is obtained from an irregular deposit of iron pyrites lying in black, argillaceous schist. The present production of the mines is about 20,000 tons a year, at which rate, it is estimated that it will hold out 150 years. About one-third of the ore is worthless, and the rest carries from two to four per cent. of copper. Mr. John E. Church gives an account of the mode of treatment in the *Mechanics' Magazine*: "The ore is roasted in heaps containing 250 to 300 tons, the temperature being kept very low, and after six to nine months, when the pile was opened, a kernel of unroasted ore was found in each lump. In this kernel is concentrated most of the copper which in the beginning had been distributed throughout the lump. A transmission of solid matter so remarkable as this, illustrating the operations by which metallic matter may be concentrated in veins by mundane fires, could not fail to attract attention, and nearly all writers on the metallurgy of copper, and processes of roasting, have discussed it. These kernels were broken from the surrounding 'shells,' and in this way kernels of a working average of 4.8 per cent. copper were obtained from ore containing 2 per cent. and less; while the shells would contain about 0.7 per cent. The concentration of copper is so perfect that the real kernel often contains 80 per cent., but, in order to make sure that none of the rich kernel shall be lost, a large quantity of shell is left around it, so that the working average is that above given.

"Sulphur is collected in small depressions, stamped in the top of the pile. Fine sifted ore, from the lixiviation vats, is stamped into semi-circular basins, and a small quantity of sulphur, from one-fifth to one-half of one per cent. of the ores' weight, collects in them. This is refined in the usual way. It contains arsenic, and is not a very valuable product. In 1865 the amount made was 50,582 kilogrammes, or 50.5 tons. This is 0.8 per cent. of the ore, or 0.6 per cent. of the sulphur in the ore."

The treatment of the two sorts of concentrated ore herein mentioned is, lixiviation of the shells with precipitation of the copper by iron, and fusion of the kernels.

The Presence of Copper in Plants.—Copper has been found in the plumage of one or more birds, and is now said to have been discovered

in cacao-beans and chocolate. M. G. Duclaux has quantitatively tested some nineteen samples in all of cacao-beans (*Theobroma cacao*), for the quantity of ash and copper therein contained, observing that, unless the incineration is very complete, the copper is retained tenaciously by the carbonaceous matter. As regards the quantity of copper in 1,000 parts of ash, it varies, for cacao-beans, from 0.009 to 0.040; for the outer shell (husks) of the same, for 1,000 parts, from 0.035 to 0.225; for chocolate of various makers, for 1,000 parts, from 0.005 to 0.125. The copper is first precipitated from its acid solution by sulphuretted hydrogen, and this sulphuret, having been redissolved in a platinum crucible, is next reduced to the metallic state by means of zinc put into contact with the platinum. The author further states, at great length, that the platinum crucible employed in this operation becomes to some extent converted into an alloy of platinum and hydrogenium, whereby its weight is altered, and that, in order to counterbalance this effect, it is best to wash, after precipitation of the copper, the crucible with alcohol, next dry it at 100°, then ignite it strongly, and lastly, weigh it with the copper, which is then removed by some nitric acid.

Indium.—A full history of this new and rare metal has been given by Prof. William Odling, in a paper read before the Royal Society. It was first recognized in 1868, by Drs. Reich and Richter, in the zinc-blende of Freiberg, through the agency of the spectroscope, by which instrument Dr. William Crooke detected thallium in 1861. The spectrum of indium consists of two bright indigo bands, the brightest somewhat more refrangible than the blue line of strontium, and the other somewhat less refrangible than the indigo line of potassium. Indium has since been found in one or two varieties of wolfram; but its chief source is metallic zinc—that of Freiberg, smelted from the ore, containing very nearly one-half part of indium to 1,000 parts of zinc. It has been obtained in ingots of over seven ounces. Prof. Odling says:

When zinc containing indium is dissolved not quite completely in dilute sulphuric or muriatic acid, the whole of the indium originally present in the zinc is left in the black, spongy, or flocculent residue of undissolved metal, with which every one, who has prepared hydrogen gas by means of zinc and acid, is so well acquainted. Besides some zinc, this black residue is found to contain lead, cadmium, iron, and arsenic, less frequently, copper and thallium, and in some cases, as that of the Freiberg zinc, a small proportion of indium. From the solution of this residue in nitric acid, the indium is separated by ordinary analytical processes, based chiefly on the precipitability of its sulphide by sulphuretted hydrogen from solutions acidulated only with acetic acid; and on the precipitability of its hydrate both by ammonia and carbonate of barium. From its soluble salts, metallic indium is readily thrown down in the spongy state by means of zinc. The washed sponge of metal is then pressed together between filtering-paper, by aid of a screw press, and finally melted under a flux of cyanide of potassium.

Thus obtained, indium is a metal of an almost sil-

ver-white color, apt to become faintly bismuth-tinted. It tarnishes slowly on exposure to air, and thereby acquires very much the appearance of ordinary lead. Like lead, it is compact and seemingly devoid of crystalline structure. Moreover, like lead and thallium, it is exceedingly soft, and readily capable of furnishing wire, by the process of "squirting" or forcing. The specific gravity of indium, or 7.4, is very close to that of tin, or 7.2; and much above that of aluminum, 2.6, and below that of lead, 11.4, and that of thallium, 11.9. In the lowness of its melting-point, viz., 176° C., indium occupies an extreme position among the metals permanent in air; the next most fusible of these metals, viz., tin and cadmium, melting at 238°, bismuth at 264°, thallium at 294°, and lead at 325°. Though so readily fusible, indium is not an especially volatile metal. It is appreciably less volatile than the zinc in which it occurs, and far less volatile than cadmium. Heated as far as practicable in a glass tube, it is incapable of being raised to a temperature sufficiently high to allow of its being vaporized, even in a current of hydrogen.

Indium resists oxidation up to a temperature somewhat beyond its melting-point, but at much higher temperature it oxidizes freely; and at a red heat it takes fire in the air, burning with a characteristic blue flame and abundant brownish smoke. It is readily attacked by nitric acid, and by strong sulphuric and muriatic acids. In diluted sulphuric and muriatic acids, however, it dissolves but slowly, with evolution of hydrogen. Oxide of indium is a pale-yellow powder, becoming darker when heated, and dissolving in acids with evolution of heat. The hydrated oxide is thrown down from indium solutions by ammonia as a white, gelatinous, alumina-like precipitate, drying up into a horny mass. The sulphide is thrown down by sulphuretted hydrogen as an orange-yellow precipitate, insoluble in acetic, but soluble in mineral acids. The hydrate and sulphide of indium, in their relations to fixed alkali solutions more particularly, seem to manifest a feebly-marked acidulous character. Chloride of indium, obtained by combustion of the metal in chlorine gas, occurs as a white micaceous sublimate, and is volatile at a red heat without previous fusion. The chloride itself undergoes decomposition when heated in free air, and the solution of the chloride upon brisk evaporation, with formation in both cases of an oxychloride.

Treatment of Tinned Scraps.—Dr. Adolph Ott, of New York, has recently applied the Seely process for separating the tin from tin scraps, and thus utilizing a waste product. Chlorine gas is turned upon a pile of the scrap-tin in a proper apparatus, and the metal is dissolved off in the form of bichloride. Dr. Ott describes some of the steps of the process and the general results as follows:

The iron obtained by the action of chlorine upon tin scraps is by no means perfectly free from tin, even if every surface has been exposed to the action of the gas. Dr. H. Endemann, assistant-chemist to the Department of Health of New York, found in such scraps, treated by me, 0.096 per cent. of tin, and I never failed to detect traces of tin on scraps treated in the manner described. While such a small percentage cannot possibly have any injurious effect, especially if the scrap-iron is worked up with other iron, it is rather doubtful, when the clippings are not loosely heaped up, whether the resulting iron will be sufficiently pure for the puddling-furnace. The success of the process depends, indeed, principally upon the careful execution of the "charging." Flat pieces ought to be mixed with bent pieces and strips in such a manner that there will finally be as few pieces as possible covering each other.

Regarding the space which one ton of clippings of 2,000 lbs. occupies, I found it to be on the average

316 cubic feet, and, since the average amount of tin on tin plate is five per cent., it requires 122.4 lbs. of chlorine to treat one ton, or almost twice as much as will fill that space. There are obtained 223 lbs. or 12½ gallons of anhydrous bichloride of tin and 1,900 lbs. of iron. As regards the cost of chlorine gas, 100 lbs. require theoretically 185 lbs. of black oxide of manganese, 165 lbs. of salt, and 310 lbs. of oil of vitriol.

As to the condensation of the vapor of bichloride of tin, five pounds are condensed per square foot per hour. Experience proves that a coil of 50 feet length and 2½ inches diameter will completely condense the vapor cooled from one ton of clippings. The duration of the process is from five to six hours.

Preparation of Tellurium.—The rare metal tellurium is thus obtained by Mr. A. Lowe from the ore Tellur-schliche: He treats it first with dilute hydrochloric acid, and then with strong sulphuric acid, as long as any reaction takes place. The ore is then thrown into water, to which some hydrochloric acid has been added to dissolve all the tellurous acid. Afterward the liquor is decanted from the residue, and the tellurium is precipitated by adding metallic zinc. The residue is fused to a regulus with lead; and this regulus containing all the gold and silver is submitted to the usual treatment for the separation of those metals. Schwelter recommends the following process:

Treat with dilute hydrochloric acid as long as carbonic-acid gas escapes, and then add strong hydrochloric acid with the aid of heat till no more sulphuretted hydrogen is given off. The sulphides of lead, antimony, and arsenic, are acted upon, but not the tellurium, gold, or silver. Decant and wash the residue with hydrochloric acid and hot water till the impurities are removed, and the residue amounts to about 38 per cent. of its original weight. This purified mass is now boiled in aqua regia, which quickly dissolves the tellurium and gold. When the portion remaining undissolved is white, and found on trial to be free from gold, it is well washed in water with the addition of hydrochloric acid. It consists of quartz-sand, chlorides of silver and lead, and oxychloride of antimony with a little tellurous acid which it would require a large excess of hydrochloric acid to remove. From the solution the gold is first precipitated by means of protosulphate of iron, and then the tellurium by metallic zinc. The gold is easily obtained by fusion along with borax and saltpetre.

The white residue is covered with water, to which a little hydrochloric acid is added, and a strip of metallic zinc is placed in the liquid. Reaction begins, and, after a few days, the mass appears black, the chlorides being reduced. Wash by repeated decantation, dry and treat the black mass with sulphuric acid, which dissolves out the silver. The tellurium in the residue can be easily separated out. The attempt to separate the tellurium from its alloys with gold and silver, by the action of alkalis, has proved unsuccessful.

Metallic Printing on Cloth.—The late Mr. Robinson, of the Clifton Vale Print-Works, Yorkshire, made successful experiments in the direction of depositing reduced metals, as printed patterns, on cotton, worsted, and other tissues. He found that lead, tin, bismuth, and copper, could be deposited in given designs in a metallic state on woven fabrics, producing a variety of novel and striking effects. One serious difficulty remains to be overcome—the strong affinity for sulphur of all the metals

capable of easy reduction and deposition, except gold. When exposed in thin films to the action of the air, they are consequently easily tarnished, and lose their beautiful metallic lustre. Vial moistens tissues of cotton, silk, etc., with a solution of nitrate of silver, dries slightly, and then lays upon the cloth a metal plate with an engraved design in raised lines. Wherever this metal touches the cloth, the silver is reduced in fine black metallic powder which adheres very tenaciously to the fibre, and reproduces the design with great sharpness and delicacy. The process is most successful on fine, compact goods. A slight previous dressing or sizing is of use. The designs thus produced are permanent in air, and light, and are not affected by washing in water, soap-lyes, or dilute acid, and alkaline liquids. They are, however, of no value, as they are devoid of that metallic lustre which alone is wanted. Black designs, perfectly permanent, can be produced to satiety with much cheaper materials than the nitrate of silver.

Phosphor-Bronze.—The Russian Government employed Messrs. Montefiore & Künzel, of Belgium, some time ago, to investigate the relative value of the alloys of the gun-metal for ordnance, in order to ascertain the results attainable by various combinations of phosphorous in the tin and copper. The final issue was the invention of "phosphor-bronze." This new alloy, it is said, can be made as tough as wrought-iron, while its hardness may be regulated to equal that of steel; its elasticity is great. It is said to be perfectly homogeneous, with a fine grain and great fluidity. This prepares the way for considerable economy, as in the manufacture of revolvers. The Russian Government have found the utility of phosphor-bronze in the construction of cartridge-cases for small-arms, and gave an order about sixteen months ago for 176,500 pounds of the new alloy to be used for this purpose. The Belgian Government are making rifles of phosphor-bronze. The new Comblain rifle made of this material has endured a succession of rounds rising from 77½ grains of powder with one bullet to 465 grains of powder and 15 bullets. In air the phosphor-bronze does not tarnish, and it is alleged to resist the action of seawater better than any other metallic substance.

Smelting of Manganese Ores.—Mr. Hugo Tamm has made an improvement in the treatment of manganese ores, by which he obtains the metal manganese, not in a pure state, but in a condition analogous to that of cast-iron, by the use of common materials, and at a reduced cost. He takes any crucible that will stand a white heat for several hours without softening, lines it with a mixture of loam and plumbago made into a paste, and then introduces the following mixture:

Native oxide of manganese of good quality.....	} 1,000 parts.	
Lamp-black or soot of good quality.....		91 "
Green flux.....		685 "

Oil in sufficient quantity to merely wet the mixture.

The green flux is formed of three distinct parts: glass, or the dissolving agent, to which lime may be added; fluor-spar, or the fluidifying agent; and protoxide of manganese and lime also, or the refining agents. The author says:

Any kind of oil is good enough for the purpose. The mixture must be made shortly before introducing into the crucible; for, if it is left standing for some hours, especially in an open vessel, it is apt to catch fire, and is then unfitted for smelting. Should this occur, the addition to the burnt mixture of about 45 parts of lamp-black or soot and some more oil would remedy the accident. But it is only after standing some eight hours that the mixture takes fire. The mixture is introduced into the crucible and slightly pressed in, and a round cover of thick wood is placed over it. It is carbonized during the smelting, and forms a charcoal cover which protects admirably the mixture from oxidation, and it can be used several times. The clay or plumbago cover is then placed over the crucible, and the joint is luted with a little thin fire-clay. A small aperture is kept to allow the gases to escape. The crucible is then placed in a wind or blast furnace, and slowly heated so long as fumes escape from the crucible. The heat is then rapidly increased until it reaches white heat, and the furnace is maintained at that high temperature for several hours, the time required depending, of course, on the quantities operated upon. When it is thought that the operation is done, the fire is allowed to burn away and the crucible is left to cool. The cover is then removed by means of a chisel introduced in the joint. The crucible is turned upside down, and shaken until the slag and metal fall down. The button of metal is detached from its slag with a hammer, and introduced in well-corked or stoppered vessels, perfectly dried. The slag, which has a fine olive-green color, breaks up in fragments with large faces affecting a pseudo-crystalline structure, but the grain is really crystalline. It is ground and used as flux in a second smelting. It is advisable after each smelting to add to the slag, in order to make it more fusible, about $\frac{1}{4}$ of the white flux. The mixing of manganese ore, flux, and lamp-black is not an indifferent operation, and to insure perfect success it should be done in the following way: The oxide of manganese should be first of all thoroughly mixed with the lamp-black. Then this mixture should be pretty roughly mixed with the flux, and then oil should be added. By so doing, lamp-black and oxide of manganese remain united during the mixing, and act upon each other during the smelting, before the flux begins to melt, so that the oxide is reduced to the metallic state before the flux can dissolve any portion of it. The residue of carbon left by the burnt oil assists in reducing the oxide of manganese, and in preventing the flux from acting upon it before it has been reduced to the metallic state.

The Manufacture of Malleable Iron.—The *Mechanics' Magazine* for November contains a paper by Mr. R. W. Davenport, on the results of a chemical investigation on some points in the manufacture of malleable iron. His object was, to ascertain the precise effects of the annealing process, and he made analyses of samples both before and after annealing. The iron used was a fairly good charcoal-iron. The unannealed castings, when broken, showed a white fracture, all the carbon being in the combined state; a property essential to secure the success of the annealing process. Mr. Davenport's principal conclusions are thus given:

First, that the silicon, phosphorus, and manganese are in no way affected by the annealing process; sec-

ond, that the amount of sulphur is not diminished, and may be slightly increased; and third, that the amount of carbon is reduced by each annealing, until finally a mere trace remains. The slight increase of sulphur shown by both sets of analyses is probably due to the presence of that substance in the coal used for fuel. The castings before annealing, containing 84 per cent. of combined carbon, showed, on breaking, a white fracture, and were too hard to be cut by a drill; after the first annealing an interesting change showed itself in the fracture; a whitish surface extended in about $\frac{1}{4}$ of an inch on all sides, surrounding a dark core of dull-black color; the line of change from the light to the dark was quite distinct, and the whole was easily cut by a drill. A portion of this white outside layer was filed off, and the carbon determined to be present only in traces, while analyses show the presence of a considerable amount of carbon, when a sample of the entire cross-section was taken. After the second annealing the black core had entirely disappeared, the whole fracture being of the same appearance as the white border. The amount of carbon in a sample of the whole cross-section, as shown by the analysis, was reduced to a trace. It would appear from the above that, when a casting does not much exceed $\frac{1}{4}$ of an inch in thickness, the carbon is approximately eliminated throughout the whole mass by the ordinary annealing process; when, however, the casting is thicker, the elimination only extends from the surface into the mass for a certain distance, but may be carried farther in by a repetition of the process. It would also seem that in the interior of a thick casting, where the amount of carbon is at all events only partially reduced, that which remains is, by the high heat and subsequent slow cooling, changed in its state of occurrence from combined carbon to a species of uncombined or graphitic carbon; for, where the iron before annealing is white and very hard, after annealing it shows a dark fracture and is quite soft. Its behavior, too, with nitric acid would lead to the same conclusion, for while the white, unannealed iron dissolved perfectly in that reagent, upon standing a few hours, and gave to the solution the same clear brown color that is noticed when a high steel is so treated, the annealed black heart, as it is technically called, gave a dirty-green color to the solution, and a black carbonaceous residue remained.

The manufacturers of malleable iron are occasionally troubled by a lack of toughness in the annealed castings when these are exposed to a sudden blow or to a bending strain. This weakness is at times, doubtless, caused by the natural rottenness of the iron, owing to the presence of an excessive amount of silicon, phosphorus, or sulphur; but it also must frequently be due to a crystalline structure which the iron, under certain unknown conditions, assumes while being annealed. This structure shows itself in the fracture of an annealed casting in the form of bright crystalline faces, which occasionally extend entirely across the fracture.

Pure Wrought-Iron.—By the Henderson process, according to the *London Chemical News*, pure wrought-iron has been made on the commercial scale, at the Bowling Works, Bradford. The analysis of the pig-iron used was:

	Per cent.
Graphitic carbon.....	2.155
Combined carbon.....	0.581
Silicon.....	1.646
Sulphur.....	0.070
Phosphorus.....	0.685
Manganese.....	1.473
Iron.....	92.644
Total.....	100.203

The wrought-iron from the above analyses:

	Per cent.
Carbon.....	0.273
Silicon.....	none.
Sulphur.....	the barest trace.
Phosphorus.....	none.
Manganese.....	none.
Iron, by direct determination.....	99.500
Total.....	99.773

New Smelting and Puddling Furnaces.—The *Mechanics' Magazine* notices approvingly a furnace for smelting, puddling, and heating, with a new description of fireplace, the invention of Mr. J. M. Stanley, of Sheffield. Furnaces of his pattern are in successful operation at nearly all the iron and steel works in that city and neighborhood, and are said to effect a saving of from 30 to 50 per cent. of fuel, and a reduction of 80 per cent. in the quantity of ashes made.

The fireplace is generally constructed of brickwork, and has no fire-bars, but is provided with a lateral opening for the admission of a forced blast, obtained by means of a jet of steam, injected into the centre of a pipe, inducing a strong current of air; the steam-blast is conducted through channels provided in the brickwork, and passes directly into the fire, producing combustion at any required rate that may be necessary for the purpose of melting or heating. The blast is regulated by means of a valve, under the control of the furnace-man, and the heat of the furnace may be raised or lowered at pleasure, quite independently of the draught of the chimney.

A cross-bridge is also provided in the middle of the fireplace, having about an equal space above and below, with one or more apertures at the back for the passage of heated air and steam into the fire at a point just above the incandescent fuel lying in the lower part of the fireplace, and the volatile gases passing from the upper part. The space between the first and second bridge forms a combustion-chamber, where the gases meet in a highly-heated state and produce thorough combustion. By this means it is found that the whole of the fuel is consumed in the fireplace, and nothing but incombustible refuse left, and, by the arrangement of the combustible gases in a highly-heated state, the whole of the heat is evolved from the fuel that it is capable of giving out, and is forced directly into the heating or melting chamber, as may be required.

Rotary Puddling.—At the Morgan Iron-Works, Marquette, Mr. C. Donkersley has erected a rotary puddling-furnace of his own invention. It has a combustion-chamber about 4 feet square and 30 inches high. New fuel is introduced in the form of pulverized charcoal, by means of a No. 2 Sturtevant blower. Here the fuel is entirely consumed, and its results, in the form of heated gas, pass over an arch into the puddler, and through that into the chimney-stack.

It is found, by various severe tests, that this fuel, thus applied, will generate sufficient heat to act upon ores or pig-metal very quickly; the intensity of the

heat depending upon the amount of fuel and the quantity of oxygen introduced through the blower. And there appears, too, to be so perfect a combustion, that by the time the flame has reached the stack it has lost its vitality and emits no gases. Besides, the coal used is the waste of coal-kilns and furnace-yards, which has not heretofore been utilized.

The puddler is four feet in diameter and five feet long, lined with a conglomerate and fettled with ore. It revolves upon four bearings, one set under each quarter, and is driven by a connection with the principal engine of the works through a shaft and gear which engages with toothed segments, which pass around its circumference at either end. A chamber is stationed between the puddler and the chimney-stack, which is raised at right angles with the axis of the puddler by a counter-weight, and gives access to the interior of the puddler.

The puddler is charged directly from the blast-furnace, and handles a half-ton ball with perfect facility. The balls for the present are bloomed under a powerful hammer, but it is the intention to erect a Siemens reheating furnace, and carry the stock to the rolls without losing its virgin heat.

Dormoy's Mechanical Puddler.—This arrangement has been introduced into about forty furnaces in Austria and France, and is highly spoken of in European scientific journals. Its chief novelty consists in placing a rabble, rotated by steam-power, directly in the hands of the puddler. The crowning furnace is left unchanged, except that the riders of the bed are set on an angle instead of being vertical. The *Mechanics' Magazine* says:

To adopt the plan to any common existing puddling furnace, a shaft conveying power from any prime mover is carried about six feet above the furnace. A belt from a pulley transmits the rotation of the shaft to another pulley or sheave below, which rests on the belt a little in front of the furnace-door. One end of the boss of the pulley is so jointed to a handle held by the puddler, that the pulley can rotate without carrying around the handle. The other end embraces the outer end of the rabble, to which it is held by a cross-pin. The belt is thus made to rotate the rabble in any required position, in a somewhat similar way to the well-known rotating hair-brush. The number of revolutions employed is from three to five hundred per minute for white pig-iron, and from eight hundred to one thousand for gray pig-iron. The belt, while carrying and rotating the rabble, endows it with mechanical energy, and allows the stirring and puddling action to be directed to any portion of the molten metal. The rapidity with which the tool can be worked round gives the metal such an impulse that it turns horizontally on the bed, continually renewing the surfaces in contact with the atmosphere. The point of the rotating rabble, instead of being hooked, carries a disk. When the iron has come to nature, this is replaced by a rabble having a short twisted point. The following are figures giving the work done at Rimacourt by one of these furnaces, during the first two weeks of last December:

Working day of 24 hours.....	1	2	3	4	5	6	7	..
Number of charges.....	23	23	23	24	24	24	25	..
Days of 24 hours.....	8	9	10	11	12	13	14	15
Number of charges.....	23	26	25	26	26	25	24	23

Total 369 charges, during which the furnace was fettled only nine times, or on an average of one fettling to 40 charges. The charges of pig and of hammer-slag for the furnace-bed amounted to 97,060 kilogrammes. The amount produced is, 81,921 kilog., with an expenditure of coal of 45,240 kilog., which gives 1,185 kilog. of pig per 1,000 kilog. of wrought-

iron, with an expenditure of only 552 kilog. of coal per metric tonne. Briefly, the result of different trials shows an increase of at least 30 per cent. in the yield, with a proportionate diminution in the consumption of fuel. In spite of the greater number of charges, the puddler is very little fatigued. This process, both in Austria and France, is found to eliminate phosphorus and sulphur to such an extent, that inferior brands of pig produce iron equal to charcoal-iron.

The Warner Process.—The refining of cast-iron and its conversion into steel or wrought iron, are the objects sought for in a process invented by Mr. A. Warner, of Lee, Kent, England, which is thus described :

In order to remove the silicon, sulphur, and phosphorus, any carbonate of lime is used, alone or in connection with aluminous clay, alumina, peroxide of manganese, oxide of iron, or other oxidizing agent. Carbonate of manganese or carbonate of iron (spathe-ore) may be employed. When the iron is greatly charged with sulphur and phosphorus, hydrochloric acid, chloride of sodium, or a hyperchlorite, is employed in addition. The alloys of potassium and sodium are found to change materially the character of the iron, and are most beneficially used after the removal of the silicon. Salts of ammonia also improve and toughen the iron. Salts of alkalis are beneficial, preferably the carbonates, sulphates, and chlorides of potash, soda, or ammonia. Small quantities of prussiate of potash are also used alone or in connection with the above salts for giving the iron a steely character. The materials are kept down at the bottom of a deep receiver until it is charged with molten metal, and above them a cupola or other furnace is erected so that the metal can run into each receiver by a trough lined with suitable materials. In the cupola there is a depth of red-hot coke of not less than six or seven feet. The cupola is also used for containing, as well as coke or charcoal, chemicals or ingredients. For the conversion of iron, refined as hereinbefore described, into steel or wrought iron, the purified iron is granulated or reduced to powder and oxidized at the surface by watering it with a solution of chloride of lime, or powdered hæmatite or other oxide is mixed therewith. In this state it is thrown into a reverberatory furnace, where it very quickly comes to a welding heat, when it is so acted upon by the oxide that it does not require to melt, but may be balled up, squeezed, and rolled. Or the mixture can be melted together either in crucibles to make steel, or in a Siemens regenerating gas-furnace or Bessemer furnace, and then run out into ingot-moulds. Or the refined pigs are melted in a suitable furnace, such as Siemens's, Bessemer's, or other furnace, and add either wrought, scrap, puddled, bar, or the mixture of powdered oxidized iron before referred to, but which has been previously brought to a bright-red heat in another furnace, where it has been formed into a spongy wrought-iron.

The Haseltine Process.—This, the invention of Mr. G. Haseltine, of London, England, is for the production of malleable iron, steel, or cast-iron, direct from the ore. The author claims the following advantages :

The peculiar construction and arrangement of the hearth of a furnace-stack kiln, or a curb wall on any open plane, in its relation to the blast, the surrounding wall or curb, and any suitable runout opening or channel for the passage of the fluid metal and slag, whereby the malleable iron, steel, or cast-iron produced, may be immediately and suitably disposed of. The peculiar construction of the water tuyere, for an intensified or other hot blast, in ore-reducing furnaces, whereby a copious and effective supply of cool water can be maintained at the fire end of the

tuyere. The combination of a partition or division and a special blast-pipe with the gravity-vessel, or deepened pool, the exit portion of which is open to the main blast-channel that communicates with the stack, so that a very powerful special blast of atmospheric air can at any time be driven through the liquid metal and slag, passing downward on one side of the partition or division, under its lower edge, and upward on the opposite side into the main-blast channel, where provision is made for its escape through an adjustable opening in the roof when it is not desirable that the rising blast shall accompany the main blast into the stack; the object being to decarbonize the liquid in the gravity-vessel, and thus produce steel or malleable iron when desirable, and to utilize the intensified heat produced thereby as the blast passes with the main blast into the stack.

New Metallic Alloy.—To avoid the danger to health, resulting from the employment of all alloys containing copper in the manufacture of cooking-utensils, M. Helonix proposes the use of a platinum bronze, which is inoxidizable. It is a nickel alloy, prepared from nickel made pure by various processes and macerations in concentrated nitric acid. The proportions are, nickel 100, tin 10, and platinum 1; the latter two metals being added to the fused nickel in the proportion of 4 of tin to 1 of platinum, and the remaining six parts of tin added subsequently. For bells and sonorous articles, the proportions are, nickel 100, tin 20, silver 2, and platinum 1.

METEORS. Brilliant meteoric displays were seen throughout the Northern and Western parts of the United States, on the nights of November 24th, 25th, and 27th, and in Great Britain and portions of the Continent November 27th. The exhibitions were studied with much interest, on account of the supposed connection of the meteoric stream with Biela's comet (*see* COMET, *BIELA'S*). The *American Journal of Science* gives an interesting summary of observations, taken at many points far apart in this country. The meteors were first seen at New Haven, about 7.30 P. M., November 24th, and fell at a rate of about 30 an hour until after midnight, when the counting ceased. About three-fourths of the flights were conformable to a radiant region near Samma Andromedæ—though several darted from the eastern heavens, perhaps from near Orion. The latter were so like the other meteors in appearance that they were supposed to belong to a group of themselves. On the night of the 25th many meteors were seen, although clouds obscured a portion of the sky. At least one-half of the meteors belonged to the Andromedæ group. A storm prevented further observation until the night of the 27th, when a true star-shower occurred. At least 1,000 meteors per hour were visible. One flight was noticeable for its length and brilliancy, being 12° long. The flights generally were slow-moving and faint, the luminous lines narrow, often unstable, and not in well-established right lines. The position of the radiant was clearly defined, its centre being

about 43° N. Decl. and 25° R. A., but the area of emanation seemed to be as much as 8° long. At Rochester, N. Y., the night of the 27th, 51 meteors were counted in an hour and a half, all but one radiating from Samma Andromedæ. They were mostly small, and moved more slowly than ordinary meteors. At Philadelphia, the same night, meteors were observed at the rate of 300 an hour. The color of the larger ones was yellowish, and brilliancy moderate, few, if any, equalling a star of the first magnitude; trains scarce, and none of them persistent. The observers at Haddonfield, N. J., the same night, made out about 20 a minute. At Greencastle, Ind., 110 were noted in 40 minutes. Government observers at Washington carefully studied the phenomenon. Rear-Admiral Sands made the following report to the Secretary of the Navy, of the work done on the night of the 27th of November:

I have the honor to report that last night, being clear, a fine display of meteors was observed by Prof. Eastman and Mr. Horrigan, watchman of the observatory. In the early evening, Prof. Eastman being occupied in other duties, Mr. Horrigan observed 485 meteors between $6^h 15^m$ and 8 p. m. From 8 to 9^h p. m., Prof. Eastman observed part of the time, and 181 were seen; after 9^h p. m., 100 more were seen, and at 10^h p. m., the display seemed to cease. The maximum flight appears to have been between the hours of $6^h 15^m$ and $6^h 30^m$, reaching an hourly rate of 102 in 15 minutes, and of 400 in 8 minutes. Mr. Horrigan saw 10 before he commenced the above record, making the whole number observed 720. They appeared to radiate, by Prof. Eastman's observation, from a space which might be enclosed by a circle of eight degrees in diameter, having its centre at μ Andromedæ. Prof. Harkness also observed, but differs a little as to the point of radiance, placing it about half-way between μ and γ Andromedæ. As there was but a single observer in the early evening, whose attention was confined to one portion of the heavens, there were probably four and a half times as many fell as were observed. According to Prof. Harkness's observations, the most of the meteors were about of the fourth magnitude. The color to the naked eye was generally faint blue, but some of the larger were reddish. The tracks were generally very short, not exceeding from four degrees to six degrees. The average time of flight was from one to two-tenths of a second. Prof. Eastman succeeded in catching the spectra of two small ones. The first had a faint continuous spectrum, with an excess of yellow or greenish yellow; the second had a faint green spectrum, the first glimpse of which appeared perfectly white. They were both very faint and moved rapidly. This display is a very remarkable one, and exceeds that ordinarily seen on the 14th and 15th of November. The radiant point seems to indicate that they are moving in the orbit of Biela's comet.

Prof. A. Hall, of Washington, computed the parabolic orbit of the stream by the formulas of Dr. Weiss, and found the elements of the meteors and of Biela's comet nearly identical.

Prof. H. A. Newton, author of the paper in the *American Journal of Science*, makes the following general remarks, among others, on the display:

Dr. Weiss, of Vienna, who first pointed out, in 1868, the probable connection between Biela's comet and the meteors seen December 6, 1798, by Brandes,

and December 6, 1838, by Mr. Herrick, gives the radiant, for meteors following the path of that comet, as R. A., $28^h 4$, N. Decl., $48^{\circ} 0$. I assigned a point 3° from Samma Andromedæ as the centre of the radiant of the meteors, or about R. A., $25^h 3$, N. Decl., $48^{\circ} 3$. The longitude of the node of Biela's comet was in 1852, according to Hubbard, $245^{\circ} 51'$, and the comet would pass about a million of miles from the earth's orbit, between it and the sun. We passed that place of the node early Wednesday evening, November 27th. There can hardly be a doubt, therefore, that these meteors were once fragments, or companions, of that comet.

Any theory that shall explain the formation of the present grouping of meteoroids must account for the magnitude and shape of the radiant areas. If the members of a group have nearly the same orbit, the radiant should be a point. But the area of the radiant, November 24-27th, was at least 8° long. This implies that the orbits differ considerably, either—(1) in their inclinations to the ecliptic; (2) in their major axes; (3) in the longitude of perihelion; or, in two or three of these elements combined.

The shower ended abruptly, Wednesday evening, and in the clear evenings that followed nothing special was to be seen. Similarly marked limits are not uncommon in other showers. The orbits must then either lie approximately in a plane, or there must be a common node in the ecliptic, where the earth meets them. Such a node would point unequivocally to the earth as the body that originally scattered the comet.

The exhibition in England was far less brilliant than in the United States. At Birmingham, the highest number of flights per minute was 12 to 15. Near Durham, almost 1,000 were noted in two hours. An overcast sky at London prevented favorable observations. The duration of the shower in England was estimated at about 44 hours.

The most striking displays of which accounts have been published were those in Southeastern Europe, on the night of November 27th. The British consul at Athens says that at ten o'clock, when the storm was at its height, meteors fell at about the rate of 120 a minute, after which they diminished to 60 a minute. They seemed to drop perpendicularly from the zenith in all directions, and were most numerous at a point a little to the southwest of the Pleiades, and were of all sizes, from a slender, thread-like line of light to a brilliant rocket-like stream of fire. The shower at Alexandria reached a maximum of 200 a minute, and many of the meteors appeared as large as Jupiter in apposition, and left long trains of light behind them. Mr. W. B. Shasto gives the following graphic description of the exhibition at Suez, in a letter to the *London Times*:

A meteor-shower of great splendor was seen here on the night of the 27th of November, between the hours of 6 p. m. and midnight.

The sky at the time was remarkably free from cloud and mist, and, as there was no moon, the display was witnessed under the most favorable circumstances. Soon after dark, attention was attracted to the unusual number of shooting-stars visible in every direction, and it soon became apparent that our earth was passing through a meteor-stream almost equal in grandeur to that observed in November, 1866. From 7 to 7.15 p. m. the number appearing in the southwest alone was reckoned at 410, and, as this was scarcely a quarter of the number which was falling in other parts of the sky, it can be well imagined

what a beautiful effect was produced by such an unusual appearance. The meteors all radiated from a general centre, situate between Aries, Perseus, and Cassiopeia, and from this point a continuous shower was maintained in all directions. At half-past eight they had multiplied so much that upward of 100 a minute could easily be counted, which, giving an average, say, of 6,000 an hour, would still be considerably less than the actual number visible during that time. From half-past nine to a quarter to ten the shower had increased to such an extent, that it was quite hopeless attempting to estimate the number. The sight was then, indeed, grand, and the phenomenon was viewed with feelings of wonder and awe at such a marvellous and brilliant display of Nature. The majority of the meteors were moderate in size, of a bluish-white tint, and each left a streak of faint white light behind, which in the larger ones remained visible for a considerable time. The streak on one or two occasions was distinctly seen to change its form and position, resembling a delicate white cloud drifting slowly away. In the eastern sky a few of them took an irregular or special course in their journey downward. Near the radiant point they all appeared as if travelling slowly, and did not extend to any great distance. This, I believe, is always observed in similar radiating showers, and is usually attributed to foreshortening. In the northern sky many were seen of great brilliancy, changing from violet to red, and passing downward from Cassiopeia to the horizon. The shower lasted until after midnight, when the number rapidly lessened, and by four o'clock in the morning only a few stray ones were visible at intervals. The few which I was fortunate enough to observe by means of the spectro-scope (a Browning's direct vision) exhibited a pale-blue line, but in those of the larger variety I was enabled to detect violet and yellow.

From a rough calculation I should estimate that at least 80,000 meteors must have been visible between the hours of 6 p. m. and midnight. I do not imagine they are in any way connected with the ordinary November meteors of the 18th and 14th, as the radiant point of the latter is in the constellation of Leo, and there is also a difference of nearly fourteen days between the dates of the two showers.

Dr. C. T. Jackson, State Assayer of Massachusetts, sends to the *American Journal of Science* his analysis of a meteoric iron found at Los Angeles, Cal. The original mass weighed about 80 pounds.

The following are the results of the analysis per cent.:

Metallic iron.....	80.74
Metallic nickel.....	15.73
Metallic tin.....	0.01
Phosphorus and other undetermined matters.....	3.53
	100.00

The specific gravity of this iron is 7.9053.

Dr. Charles U. Shepard, Sr., reports, to the same magazine, his analysis of a piece of meteoric iron (weighing, in original mass, about 85 pounds), picked up in Eldorado County, Cal. The fragments sent to him were free from all traces of sulphur, and had a specific gravity of 7.80. The proportion of iron in the specimens was 88.02, and of nickel, 8.88.

July 23d, a meteorite fell near Lancé, France, penetrating the ground to the depth of about 5 feet 9 inches, and weighing nearly 103 pounds. A second and smaller meteorite, which belonged to the same body before its explosion, fell about $7\frac{1}{2}$ miles from the former place. August 8th, a meteoric stone fell at Af-

file, Italy. The luminous body from which it came was seen over a large part of Italy, and is described as a globe of fire moving slowly at first, and leaving behind a train like a cloud lit up by the sun. Suddenly it brightened up to the size of the full moon, and then disappeared, and, three or four minutes afterward, a tremendous detonation was heard, causing houses to rattle. The noise of the explosion differed from that of thunder, resembling more the explosion of a mine, and followed by a rolling sound, like file-sawing. The vapor-like residue of the meteor remained visible for some minutes after the disappearance of the main body.

Prof. J. W. Mallet, of the University of Virginia, in a paper read before the British Royal Society, gives the results of his search for gases occluded in specimens of meteoric iron found in Augusta County, Va. In the following table he compares his analysis with that made by the late Prof. Graham (Master of the British Mint), upon a piece of meteoric iron discovered in Lenarto, Hungary:

GASES.	Augusta Co. (Va.) Iron.	Lenarto Iron.
Hydrogen.....	85.68	85.38
Carbonic oxide.....	4.46	31.33
Carbonic anhydride.....	9.75
Nitrogen.....	9.96	14.99
	100.00	100.00

The gases obtained by Prof. Mallet, in his experiment, agree more nearly with those of common wrought-iron (clean horseshoe-nails) as found by Prof. Graham, viz.:

Hydrogen.....	85.0
Carbonic oxide.....	50.3
Carbonic anhydride.....	7.7
Nitrogen.....	7.0
	100.00

The author says:

Although the proportion of hydrogen found is so much less in the Virginia than in the Lenarto iron, it yet represents for the former about 1.14 times the volume of the iron itself, whereas common terrestrial iron occludes but about 0.42 to 0.46 of its own volume under ordinary pressure. I am quite satisfied, from the condition of the masses of iron as they came into my hands, and especially from the character of the crust, that the metal has not been subjected to any heating in a blacksmith's fire or otherwise by human hands since it was found, as has sometimes happened to similar specimens in the endeavor to discover their nature, or to make use of them. Whether or not this analysis be considered as furnishing presumptive evidence of the Virginia iron having come to our earth from a different atmosphere to that of which the Lenarto meteorite brought us a sample, the result differs so far from that of our sole previously-recorded determination of the kind as to make it a matter of much interest that a larger number of meteoric irons, from various localities, should be subjected to careful examination in the same direction, thus supplementing our knowledge of the fixed constituents of these curious bodies by a study of their gaseous contents.

In a communication to *Nature*, Prof. Le Conte, of the University of California, estimates the heat of meteoric stones, when mov-

ing with the greatest rapidity through the atmosphere, at not less than 492,184° F. He says:

Of course, by far the larger portion of the heat generated by the loss of energy of the moving stone would be imparted to the air along its trajectory; but, assuming that only *rather* part of it is retained by the stone, it would be more than sufficient to account for the phenomena of fusion and detonation which frequently accompany the transit of such bodies through our atmosphere.

In the case of small masses, it is clear that their high velocities would be more rapidly extinguished by the resistance of the air than is the case with large masses. In the small mass the transformation of energy into heat being accomplished in a shorter time, a greater amount of the evolved heat would be retained by the stone than in the large mass whose velocity is more gradually checked by the resisting medium.

Hence, when the smaller masses plunge into the upper atmosphere, the matter may be volatilized or utterly dissipated by the intensity of the suddenly-evolved heat. In this minutely-divided condition the material of the stones would float about in the atmosphere, and ultimately reach the surface of the earth in the form of meteoric dust.

It is well known that the observations of Benzenberg, Quetelet, Herrick, Newton, and others, assign to the so-called "falling-stars" velocities equal to, if not surpassing, the velocities of meteoric stones. According to the foregoing suggestion, these may be nothing more than small meteoric stones which are volatilized in the upper regions of the atmosphere long before reaching the surface of the earth.

METHODISTS. I. METHODIST EPISCOPAL CHURCH. In the following table is given a summary of the statistics of this Church, as compiled from authentic sources, for the year 1872:

CONFERENCES.	Travelling Preachers.	Members.	Probationers.	CONFERENCES.	Travelling Preachers.	Members.	Probationers.

The increase in the members, over the number reported in 1871, is 41,498. The total number of members and probationers is 1,458,441. The number of local preachers is 11,964; number of Sunday-schools, 17,471; of officers and teachers, 193,691; of scholars, 1,278,559. Number of churches, 14,008; value, \$62,893,237; number of parsonages, 4,484; value, \$3,575,877.

The benevolent contributions for 1872 were reported as follows: For Conference claimants, \$150,140.62; for the Missionary Society, \$671,000.21; for the Woman's Foreign Missionary Society, \$18,753.84; for church extension, \$94,572.63; for the Tract Society, \$21,585.67; for the Sunday-School Union, \$22,674.15; for the American Bible Society, \$42,528.35; for the Freedmen's Aid Society, \$12,048.97; for education, \$6,660.42.

The following statistics are given of the German department of the work of the Methodist Episcopal Church. The German Churches in America are organized into five Conferences, which are known as the *Central German*, the *Chicago German*, the *East German*, the *North-west German*, and the *Southwest German* Conferences. Those in Germany are organized into the *Germany and Switzerland* Conference.

	America.	Germany.	Total.
Probationers.....	4,843	1,729	6,573
Full members.....	23,665	6,220	29,885
Local preachers.....	349	27	376

Churches.....	502	46	548
Probable value.....	\$1,625,050	\$231,313	\$2,016,363
Parsonages.....	219	26	245
Probable value.....	\$302,755	\$2,863	\$305,617
Sunday-schools.....	599	229	828
Scholars.....	22,996	10,071	40,067

The receipts of the Missionary Society of the Methodist Episcopal Church, for the year ending November 1, 1872, were \$661,056.60, to which should be added a balance from the previous year of \$23,987.88, making a total of \$685,044.48. The disbursements for the same period were \$598,647.68, leaving a balance in the treasury of \$86,396.85. The annual meeting of the Missionary Committee was held on the 14th of November. The committee determined to establish new missions in Mexico, in Japan, at Bombay, India, and in that part of the interior of Africa which adjoins Liberia, to reënforce the mission in Italy, and to reinvigorate that in Bulgaria. The following appropriations were made:

I.—FOR FOREIGN MISSIONS:

1. Liberia.....	\$10,000 00
Interior Africa.....	9,000 00
2. South America.....	12,912 50
3. China.....	68,186 25
4. Germany and Switzerland.....	87,500 00
5. Scandinavia.....	24,080 00
6. India Conference.....	111,310 00
Other Missions in India.....	12,500 00
7. Bulgaria.....	6,350 00
8. Italy.....	12,500 00
9. Mexico.....	12,500 00
10. Japan.....	31,250 00

Total for foreign missions..... \$373,823 75

II.—DOMESTIC MISSIONS—FOREIGN POPULATION IN THE UNITED STATES:

1. Welsh Missions.....	\$150 00
2. Scandinavian Missions.....	17,150 00
3. German Missions.....	46,250 00
4. Chinese Missions.....	7,000 00

Total foreign populations..... \$70,550 00

III.—DOMESTIC MISSIONS, INDIAN..... \$6,650 00

IV.—DOMESTIC MISSIONS, AMERICAN..... \$381,000 00

V.—MISSIONS IN TERRITORIES OF THE UNITED STATES, TO BE ADMINISTERED AS FOREIGN MISSIONS (Arizona and New Mexico)..... \$13,000 00

The total sum of the appropriations, including those for contingent, incidental, and office expenses, was \$885,025.75.

The Society employed, in 1872: In Africa, 21 missionaries, 87 local preachers, 15 Sunday-school teachers; in China, 12 missionaries, 71 native helpers; in Denmark, 4 missionaries; in Norway, 9 missionaries; in Germany and Switzerland, 51 missionaries, 14 helpers; in India, 31 missionaries, 142 school-teachers; in Bulgaria, 1 missionary, 2 helpers; in Italy, 1 missionary: total number of foreign missionaries, 448; 2,307 missionaries were employed in the domestic work.

The receipts of the Woman's Foreign Missionary Society for 1872 were \$48,500. It sustains six missionaries in India and six in China; supports Bible-women, girls' schools, and *zenana* work, in 25 stations, and maintains two orphanages in India.

The Sixteenth General Conference of the Methodist Episcopal Church met in Brooklyn, N. Y., on the first day of May. Its first business was to concur in the alteration of the second restrictive rule of the *Discipline* of the Church (which alteration had already been approved by the requisite majority of the ministers voting in the Annual Conferences), so

that the lay delegates could be admitted. The expression of concurrence was given in the following resolution, adopted by a vote (including absentees who afterward recorded their votes) of 283 in favor, and 6 against it:

Resolved, That this General Conference does hereby concur with the Annual Conferences in changing the second restrictive rule so as to read as follows: "They shall not allow of more than one ministerial representative for every fourteen members of an Annual Conference, nor allow of less than one for every forty-five, nor more than two lay delegates for any Annual Conference."

The plan of lay delegation proposed by the General Conference of 1868, and approved by the votes of more than three-fourths of the ministers voting in the Annual Conferences, was then ratified and adopted by a vote (including absentees) of 242 to 86. Afterward, by a vote (including absentees afterward recording their votes) of 288 to 1, the lay delegates were invited to take their seats as members.

The missionary and other societies, to which the charge of the educational and benevolent enterprises of the Church is committed, were reorganized and brought more directly under the control of the General Conference. For the formation of the Missionary Committee, the Annual Conferences are divided into twelve districts, from which a corresponding number of members of the committee are elected by the General Conference, for terms of four years. The contributors of mission funds, who constitute the members of the Missionary Society, are represented by the Board of Managers. This Board appoints annually twelve other members of the committee, who are chosen from among the members of the Society. The secretaries and treasurers of the Society and the Board of Bishops are members *ex officio* of the committee. This committee has entire control of the appropriation of the funds of the Society, and of the selection of mission-fields. Three secretaries are elected by the General Conference, for terms of four years, who are to have charge of the executive duties pertaining to the work of the Society, devoting their whole time to its interests, by travelling, correspondence, and otherwise. They are declared to be equal in authority. The Woman's Foreign Missionary Society was fully recognized, and recommended to the Church. The Board of Education (organized in 1868) was directed to organize its work at once throughout the Church, and to give special attention to the needs of the people of the South, and of the destitute parts of the West. The office of corresponding secretary of this Board was established, for the performance of the executive duties pertaining to its work which are necessary to promote its interests. A Bureau of Educational Statistics, which shall also act as a medium between teachers seeking employment and institutions seeking teachers, was provided for. A collection was directed to be taken annually, in each society, for the

educational work, and the second Sunday in June was designated as "Children's Day," and appointed for the collection for the "Sunday-school Fund of the Board." The Freedmen's Aid Society was recognized as a regularly-constituted society of the Church, and the office of corresponding secretary was established as a General Conference office. A Board of Church Extension was organized, to take the place of the previously-existing Church Extension Society. It consists of twenty-one ministers and twenty-one laymen, to be chosen by the General Conference for terms of four years. They are invested with the power of filling vacancies in their body. A corresponding secretary was provided for, who is to be chosen by the General Conference. He is expected to give his exclusive attention to the affairs of the Board. He may have one or more assistants. It was provided that the General Committee of Church Extension shall consist of the General Superintendents (bishops), the officers of the Board of Church Extension, and twelve members, one of whom is appointed from each of the districts denominated General Conference districts, as is provided in the plan for the organization of the Missionary Committee. The functions of this committee are, to act in an advisory capacity to the Board of Church Extension, and to determine the amounts to be asked from the churches, and the distribution of the grants. The organization of an auxiliary Board of Church Extension, in each Annual Conference, was directed. Hitherto the bishops of the Methodist Episcopal Church had been supported from the profits of the Book Concern. As a large increase in the number of bishops was contemplated, by which the expense of their support would be rendered much greater than this establishment could afford, it became necessary to devise another method of maintaining them. A plan was adopted by which their support is thrown almost directly upon the members of the churches. The bishops are to be classified as effective and ineffective; the ineffective class comprises those who have become incapacitated, by reason of age or infirmity, from performing regular work. It is made the duty of the committee who have supervision of the affairs of the Book Concern—called the Book Committee—to estimate the amount necessary to furnish a competent support for each effective bishop, the amount necessary for the comfortable maintenance of the ineffective bishops, and the amount necessary to assist the widows and children of deceased bishops. The aggregate sum required for these purposes is to be divided by the Book Committee among the Annual Conferences, according to their several ability, and to be apportioned among the districts and charges in the Annual Conferences. The funds thus raised shall be forwarded to the agents of the Book Concern, who will pay all drafts for episcopal support. If there be any deficiency in the amounts col-

lected, the General Conference will provide for the reimbursement of the Book Concern. Provision was made for the gradual establishment of a fund to be called the "Permanent Fund," the interest of which is to be applied to the expenses of the General Conference, to the payment of deficiencies in the salaries of the bishops, and to the support of worn-out preachers, and their widows and orphans. Eight new bishops were elected, as follows: Thomas Bowman, William L. Harris, Randolph S. Foster, Isaac W. Wiley, Stephen M. Merrill, Edward G. Andrews, Gilbert Haven, and Jesse T. Peck. The residences of the bishops were fixed as follows: The old bishops to reside at their present homes; the newly-elected bishops to reside at or near the cities of San Francisco, St. Louis, Boston, Atlanta, Chicago, Cincinnati, Council Bluffs or Omaha, and St. Paul; they are to choose in the order of the priority of their election.

The troubles in reference to the accounts and business of the Book Concern, at New York, which have been referred to in previous volumes of the *ANNUAL CYCLOPEDIA*, received a final and unexpectedly harmonious settlement. The subject was presented to the General Conference, in majority and minority reports of the Book Committee, in reports of the Book Agents, and in reports of experts who had been employed by the committee and agents to examine the accounts of the Concern. Their different reports involved contradictory views which it seemed almost impossible to reconcile. On the ninth day of the session (May 10th) a special committee, of one delegate from each Annual Conference, was appointed to take the several documents into consideration, and examine into the validity of the charges. This committee, after making "as thorough and searching investigation as the limited time allowed would permit," reported on the twenty-sixth day (May 30th). In their report, they announced the conclusion:

That repeated frauds have been practised upon the Book Concern. These frauds are found in the manufacturing department, and are located chiefly, if not wholly, in the bindery. Mr. Hoffman was superintendent of this department at the time of the perpetration of these frauds, and the evidence indicates that for a series of years he carried on a system of frauds by which the Concern sustained very considerable losses, the amount of which it is impossible to indicate with accuracy.

1. We are of the opinion that the business methods of this department were formerly such as to afford opportunities for frauds and peculations by subordinates, which these investigations show have been taken advantage of.

2. Your committee concur with Mr. Kilbreth in the statement made by him in his report before us, in which he says that "in former years it is apparent that there was a great lack of system in the business transactions of the house, as shown on the books, and a great deal of confusion and careless book-keeping," as also in his further statement that "the business entries of the years 1862 and 1864, including also the bindery and periodical account of 1861, are totally inexcusable as specimens of accounts."

3. Your committee also find that the losses sus-

tained by frauds and irregularities are not of such magnitude as to endanger the financial strength of the Book Concern, nor to materially impair its capital.

4. That there are no reasonable grounds or proofs to justify an assumption that any agent or assistant agent is or has been implicated or interested in any frauds which have been practised on the Book Concern.

5. That the present methods of accounts and modes of conducting the business are such as to insure reasonable and ordinary protection against frauds and irregularities, yet they are not altogether perfect.

6. In reference to the purchasing of paper through Mr. James F. Porter, we concur with Mr. Kilbreth, "that, under all the circumstances of the case, we unhesitatingly regard it as a decided business impropriety."

The report of the committee was adopted by the General Conference May 31st, without debate, and almost unanimously. The modifications made in the government of the Book Committee aim essentially to secure a more strict accountability on the part of the agents, and to promote better systems of management and of book-keeping. Both the old agents at New York retired. New men were elected in their place, and an entirely new Book Committee was appointed. Provision was made for the establishment of judicial conferences for the trial of appeals. Provisions were also made for the trial of a bishop on impeachment by a presiding elder and four travelling elders, before a Judicial Conference constituted of the triers of appeals of five Annual Conferences. The Judicial Conference may for cause suspend the bishop from his functions, or expel him from the Church. He has a right of peremptory challenge within limits, and may appeal to the ensuing General Conference.

Rules were made for the organization of district conferences whenever it may be desired by the majority of the Annual Conferences in any presiding elder's district. They are to take general oversight of the spiritual and temporal affairs of the district; to take cognizance of local preachers and exhorters, and arrange appointments; to hear complaints against, and try local preachers, to issue licenses, and recommend candidates to the Annual Conferences; to promote the success of the financial interests of the Church and of the Sunday-schools; and to look up and provide for opportunities for missionary and Church extension enterprises.

The subject of the election of colored bishops was brought up several times, and was disposed of by the adoption of resolutions that there is nothing in race, color, or condition, to bar election or ordination to the episcopacy of colored persons, but that such elections must depend upon considerations of qualities personal to each candidate, and that colored men presented as candidates should receive consideration equally with others, according to their qualifications.

The commissioners of the African Methodist Episcopal Zion Church reported that the opposition in that Church to union with the

Church had assumed such strength that it would be of no use to prosecute the movement further. A commission was appointed to confer with commissions from any Methodist bodies in America, in respect to union with the Methodist Episcopal Church.

A report, fraternal in its spirit, was adopted with reference to the work of the Church in the South, and its relations with the Methodist Episcopal Church, South. A delegation was appointed to visit the next General Conference of that Church. Fraternal delegates were received and heard from the British Wesleyan Conference, the Wesleyan Conference of Canada, the Wesleyan Conference of Eastern British America, the Methodist Episcopal Church of Canada, the Methodist Church, the Methodist Protestant Church, the Evangelical Association, the Presbyterian General Assembly, the National Congregational Council, the Free Church of Italy, and the American Baptist Home Mission Society. Fraternal greetings were received from the General Conference of the African Methodist Episcopal Church, in session at Nashville, Tenn.

The ratio of representation was changed, so that hereafter one clerical delegate shall be elected for every forty-five members of each Annual Conference, instead of one delegate for every thirty members, as heretofore.

II. METHODIST EPISCOPAL CHURCH, SOUTH.—The following are the statistics of this Church as published officially in June, 1872:

CONFERENCES.	Travelling Preachers.	Local Preachers.	Total Min's and Memb's.
1. Baltimore.....	187	104	29,538
2. Virginia.....	163	163	43,616
3. West Virginia.....	44	87	10,630
4. Holston.....	190	264	31,576
5. North Carolina.....	134	210	47,872
6. South Carolina.....	131	135	36,338
7. North Georgia.....	150	419	45,305
8. South Georgia.....	107	215	24,791
9. Florida.....	42	74	7,191
10. Alabama.....	122	190	24,830

33. Pacific.....	45	9	2,171
34. Columbia.....	17	5	1,055
35. Illinois.....	51	56	5,552
China Mission.....	74
Bishops.....	9	..	9
Total in 1871.....	2,858	4,898	631,138
Total in 1870.....	2,735	4,714	596,438
Increase.....	123	184	34,710

The number of white members is 600,909, an increase of 39,322: colored members, 7,841; decrease, 5,422: Indian members, 4,433; increase, 481. The decrease of colored members is caused by their going over into the Colored Methodist Episcopal Church, in accordance with provisions made by the General Conference of 1870. One hundred and ninety-nine superannuated preachers are reported. The number of infant baptisms is 23,221; of adult baptisms, 41,289; Sunday-schools, 6,520; teachers, 45,417; scholars, 300,523; amount of collections for Conference claimants, \$60,082.51; collections for missions, \$78,831.58.

The annual meeting of the Board of Missions was held in Nashville, Tenn., in May. A favorable report was presented of the mission in China. Two missionaries, with their families, had labored in that country during the year. The Board advised that a third missionary should be sent there. One of the present missionaries is connected with an institution of learning, supported by the Government, and is editor of the Chinese *Christian Advocate* and other publications. The Domestic Missions and the Indian Missions were represented as prosperous. Provision was made for the enlargement of the work among the Germans in Texas, Louisiana, Virginia, and Maryland. An increase which afforded encouragement had taken place in the memberships among the four Indian tribes which are served by the missionaries—the Cherokees, Creeks, Choctaws, and Chickasaws. The Board appropriated \$43,050 for the ensuing year. Of this amount \$7,000 were allotted to China, \$12,000 to the Indian Mission Conference, \$5,450 to the German work and German publishing interests, \$900 to the new mission in Mexico, and the remainder to the domestic work and incidental expenses.

III. AFRICAN METHODIST EPISCOPAL CHURCH.—The General Conference of the African Methodist Episcopal Church met at Nashville, Tenn., May 6th. A rule was adopted requiring the bishops to reside within the limits of the respective districts to which they may be assigned for each four years. Their salaries were fixed at \$2,000 a year. Another rule was adopted, requiring those bishops who may be hereafter elected, to wear a surplice, or robe, when in the exercise of their official functions, if time and place do not forbid. No new bishops were elected. A court of appeals was constituted to hear cases of appeal previous to the assembling of the General Conference. It is to be composed of members selected from each Annual Conference. Provision was made for the appointment of State missionaries, to visit the people, organize societies, and disseminate information respecting the African Methodist Episcopal Church, with a view of counteracting the efforts and correcting the misrepresentations of persons hostile to it. The General Conference recommended that a metropolitan church be built at Washington

City, and that each Annual Conference be requested to contribute \$100 to the object. Conferences giving more than \$100 will have the privilege of naming pews in the church, those giving the largest amounts in excess of this sum having the first choice of pews to be named. Much interest was manifested in a proposed mission to San Domingo, for which a young man, a native of St. Thomas, West Indies, offered himself as a missionary. The Book Concern was reported in debt some \$6,000. Its removal to Washington was directed to be made as soon as the debts are paid. An address on Church Union, which was adopted, expresses the belief that the African Church has a work to perform, not only in the elevation and religious training of the colored people in the United States, but in the more perfect evangelization of Africa and the isles of the sea, and that its mission as a separate organization will not be at an end till prejudice on account of color shall have been swept from the Church. It feels the importance of all colored Methodists uniting in one common band. The Rev. Morris Hamilton was appointed to complete a statistical report of the denomination and to attend to its publication. Mr. Hamilton died before accomplishing this work, and nothing has been done since regarding it.

IV. AFRICAN METHODIST EPISCOPAL ZION CHURCH.—An account of the progress of negotiations for a union of the African Methodist Episcopal Zion Church with the Methodist Episcopal Church was given in the *ANNUAL CYCLOPEDIA* for 1868. The commissions of the two bodies, which met that year and accepted the preliminaries for union, adjourned to meet in the city of New York, May 15, 1872, concurrently with the meetings of the General Conferences of the two bodies. Before the time came for this meeting, however, a strong opposition to the union had arisen in the African Zion Church, with which four of the bishops participated. As a means of preventing the consummation of the proposed union, the majority of the Board of Bishops of this Church determined to change the time and place of holding the General Conference, which had been appointed to be held at New York on May 1st. They accordingly called the General Conference to meet at Charlotte, N. C., on the third Wednesday of June. Bishop Jones, who was most prominent in the negotiations for union in 1868, adhered to the original appointment, and called the General Conference to meet in New York in May. For this action he received the censure of the New York Annual Conference, which met in April. A small number of delegates met with Bishop Jones in New York on the 1st of May. The session was a stormy one. The only action undertaken was the attempt to remedy a defect in the tenure of the episcopal office, by which the Church was likely to be left for a time without bishops. The four years for

which the six bishops were elected in 1868 would end on the 19th of May. From that time till the contemplated meeting of the General Conference on the 17th of June, their offices would be vacant, unless some special provision were made to fill them. This the Conference undertook by the passage of a resolution giving Bishop Jones episcopal oversight over the whole Church until other bishops should be legally chosen. Immediately after passing this resolution the General Conference adjourned, to meet in Charlotte, N. C., in accordance with the call of the majority of the bishops. After the adjournment, Bishop Jones, and those who had cooperated with him in advancing the movement for union with the Methodist Episcopal Church, made the following communication respecting the condition in which their affairs stood to the General Conference of the Methodist Episcopal Church, which was read in that body on the 13th of May:

We sincerely appreciate the respect shown our Church in the distinguished character of the commission appointed by you to conduct the negotiations for a union, with the commission appointed on our part, and we desire to bear grateful testimony to the uniform kindness, patience, and Christian bearing of your commission during these negotiations. The mutual spirit of accommodation and agreement which characterized the proceedings of the joint meeting of the commissions in 1869 inspired the hope that the work of unification, so far at least as these two Churches are concerned, would be happily consummated during the present session; but we regret to say that a wide-spread disaffection, originating, we fear, through misrepresentation of the commendable objects mutually sought to be obtained by the friends of the proposed union in both Churches, now exists among the membership we represent, precluding, for the present at least, the possible consummation of the union in any manner likely to prove satisfactory to either body, and we most respectfully ask that further negotiations be postponed until the pending effort, with a view to harmony in our own ranks, shall have been successful, or the developments shall warrant further action; and we pray that, in any event, the mutual feeling of friendship and fraternal regard hitherto existing between us as members of the great family of the Redeemer may be perpetuated.

S. E. JONES,
GEORGE H. WASHINGTON, } Committee.
SAMUEL SHERMAN,

An exciting discussion took place in the General Conference at Charlotte respecting the administration of Bishop Jones. He made an effective defence of himself, and so impressed the Conference that his character was passed on a nominal confession by him of the irregularity of his conduct, and a complete reconciliation of the two factions took place. The proposals of the representatives of the Methodist Episcopal Church for union were very coolly received. The most important action of the Conference was the determination to establish a high-school at Fayetteville, N. C.

V. THE METHODIST CHURCH.—The following is a summary of the Conference statistics of the Methodist Church:

ANNUAL CONFERENCES.	Ministers and Preachers.	Members.	Probationers.
Boston and Maine.....	10	500	...
New York.....	43	1,896	242
New Jersey.....	16	1,491	156

Missouri.....	43	2,100	...
North Missouri.....	26	1,300	...
Kansas.....	15	425	...
Oregon.....	5	350	...
California.....	5	100	...
Total.....	766	52,000	1,736

The number of unstationed ministers and preachers is 482; of churches, 595; of parsonages, 143. The value of church property is \$1,609,425.

VI. PRIMITIVE METHODISTS IN THE UNITED STATES.—The Primitive Methodists have now in the United States two Conferences. The Western Conference met last at Platteville, Wis., May 24, 1872. It has nineteen circuits and missions. The number of members is 1,888; of travelling preachers, 17; of local preachers, 96; of churches, 35; of other preaching places, 41; of Sunday-schools, 44; of teachers, 474; of scholars, 2,559; value of church property, \$50,538; amount of missionary contributions, \$1,225.82; contributed to the superannuated preachers' fund, \$2,280.07. The Eastern or Atlantic Conference has been set off as a separate and distinct conference within the year 1872. It met at Tamaqua, Pa., May 1st. It has twelve circuits and missions. The number of members is 963; of travelling preachers, 9; of local preachers, 71; of churches, 11; of other preaching places, 27; of Sunday-schools, 22; of teachers, 310; of scholars, 1,970; value of churches, \$56,278; missionary collections, \$190.79. Total number of members in the two Conferences, 2,851.

VII. METHODIST EPISCOPAL CHURCH IN CANADA.—The number of members of the Church in the three conferences in 1872 was 21,103; increase from the previous year, 226; number of travelling preachers, 225; of local preachers (estimated), 225; of circuits and stations, 145; total value of church property, \$637,300; amount collected for missionary purposes, \$12,419; for Sunday-schools, \$4,277; for the superannuated ministers' fund, \$2,871; for colleges, \$1,018.

VIII. WESLEYAN CONNECTION IN CANADA.—

The Wesleyan Conference of Canada met at Montreal, June 5th. Senator James Ferrier and other gentlemen of Montreal had offered a gift of from \$40,000 to \$50,000 as an endowment for a theological school, to be under the entire control of the Conference. This offer was accepted, and provision was made for the appointment of a board of management for the proposed institution. A committee was appointed to consider the subject of employing evangelists to aid ministers on occasions of special emergency. Another committee was appointed to consider the expediency of organizing a connectional fire-insurance company. The report of the committee on the educational fund showed a total of receipts of \$3,599; of payments, \$795. A measure was adopted, looking to the division of the conference into several Annual Conferences, which, together, shall form a General Conference, to meet at stated periods. A committee was appointed to hold this subject under consideration. The committee on the union of Methodist churches reported on the lay vote of the Quarterly Meetings on certain questions which had been submitted to them, to the effect that the number of Quarterly Meetings voting was 864. On the first question submitted, whether, in view of the contemplated union, they would prefer direct representation in a General Conference to the power which was already in their hands, the vote was 187 yeas and 168 nays. On the second question, whether, if a majority of them should entertain weighty objections to such a proposal in itself, they would be willing to waive them for the sake of union, the vote was 132 yeas, 50 nays. A two-thirds majority was required. The vote on the second question showed this majority, and a surplus of 77 votes. The Conference was addressed on the subject of union by a deputation from the New Connection Conference, who expressed the hearty desire of their constituency for the proposed measure. The conference unanimously adopted a resolution as follows:

While we rejoice in the substantial oneness of New Connection Methodism with ourselves, we earnestly express a hope that the day is not far distant when Wesleyan Methodism and New Connection Methodism shall not only be one in spirit, faith, and purpose, but one also in organized unity of effort in the great work of spreading scriptural holiness through this vast Dominion.

The anniversary of the Wesleyan Methodist Missionary Society of Canada was held at Brockville, on the 8th of October. The receipts for the year were reported to have been \$93,882.28; the expenditures, \$87,710.46. The increase of receipts over those of the previous year was \$10,897.25. The Society maintains eleven missions among the settlers of British Columbia and Manitoba, with nine missionaries; thirty-four missions to the Indians of the Saskatchewan, Hudson's Bay Territory, Brit-

ish Columbia, and the provinces of Ontario and Quebec, with 28 missionaries and 4 assistants; 188 domestic missions in the provinces of Ontario and Quebec, with 153 missionaries; four missions to the Germans, with 4 missionaries; five missions to the French, with 4 missionaries and one paid agent: total, 192 missions and 208 missionaries. The total number of church-members under the care of the Society is 17,883.

The Wesleyan Conference of *Eastern British America* met at Halifax, Nova Scotia, in July. The most important action of the Conference related to the projected union with the Canada Conference. Resolutions were unanimously adopted, expressing the opinion that the formation of one Wesleyan Methodist Conference for the whole of British North America was exceedingly desirable, and a committee of eight persons was appointed to act with the committee of the Canada Conference "to devise a plan of federal union, and to draft a constitution for the proposed United Church, to be submitted to the Conference at its next annual session."

The Committees on Union of the Wesleyan Conferences of Canada and of Eastern British America met in October, and agreed upon a plan of union, to be submitted to their respective conferences for ratification. It was withheld from publication, but it is understood that it contemplates the division of the Canadian Conference into three Annual Conferences, and of the Eastern Conference into two; and the organization of a separate Mission Conference in Newfoundland.

IX. PRIMITIVE METHODISTS IN CANADA.—

The following are the statistics of the Canadian Conference of the Primitive Methodist Connection, for the year ending in June, 1872. Ministers, 91; local preachers, 266; class-leaders, 817; connectional churches, 204; other preaching-places, 228; parsonages, 29; Sabbath-schools, 135; Sabbath-school teachers, 1,208; Sabbath-school scholars, 8,351; church-members, 6,710; value of church property, \$221,948.

The Conference met at London, Ontario, June 7th. Visiting delegates were in attendance from the Primitive Methodist Conference of the Western States (United States), who reported that about 500 additions had been made to the number of members of their churches during the year. The Conference fixed the salaries of the married ministers as follows: "In addition to house-rent, a part of the furniture in the house, and the children's allowance, ministers in cities will be allowed \$650 a year; in towns, \$550; and in country stations, \$450 and their fuel." The question of organic union with the other Methodist bodies in Canada was fully discussed. A motion was offered to appoint a committee to confer upon the subject, with committees appointed by other Methodist bodies, but it was withdrawn. Finally, a com-

mittee was appointed to draw up such a basis of union as, in their judgment, would be acceptable to the people of the Church; their report to be presented to the next Conference for confirmation or rejection. It was understood that negotiations would not be entered into with other bodies without the consent of the parent Church in England.

X. METHODIST NEW CONNECTION IN CANADA.—The Conference of the Methodist New Connection in Canada met at Hespeler, Ontario, May 22d. It adopted unanimously the following resolution on the subject of union with other Methodist bodies in Canada:

Having considered the subject of Methodist union, this conference would renew its expressions as to the desirableness of union of the various Methodist bodies in Canada. And, while adhering to the action of our last Conference, in regard to the basis recommended by the united committees, we feel bound to say that we could not accept any scheme of union by which restrictions would be imposed upon the legislative powers of General Conference or upon the rights of the laity to coöperate with the ministry in such Conference in all its legislation and discipline.

An address of advice on this subject from the English Missionary Committee was read. It recited that several of the denominations which had entered into the project of union had since withdrawn from it, and that the only bodies now left to negotiate were the New Connection and the Wesleyans; that the Wesleyan Conference had not adopted the principle of the equality of the rights of the laymen to sit with the ministers in all the courts of the Church, and to coöperate with them in all acts of legislation, administration, and discipline, which principle is fundamental with the New Connection, and cannot be removed or compromised; it expressed the opinion that there was no reasonable ground at that time to hope for an honorable union,

and advised a discontinuance of the negotiations; and it advised that no part of the Church, whether in Canada or elsewhere, should assume the right of acting independently on the subject, but that all parts should be allowed an opportunity of joining in the ultimate decision and action. The Conference responded to this address with a pledge that any action it might take should be with due regard to the principles of the present body, and the obligations it was under. The most weighty objections urged by the Missionary Committee, against the continuance of the negotiations, appear to have been substantially removed by the action of the Wesleyan Conference in reference to the representation of the laity in the courts of the Church.

Committees of the Wesleyan and the New Connection Conference met on the 1st and 2d of October, and agreed provisionally upon a basis of union, to be submitted to their respective conferences for ratification. Only unofficial general accounts of its purport have been published. It provides for a General Conference, to be composed of equal numbers of clerical and lay delegates. It leaves the Annual Conferences composed entirely of ministers, as is now the case in the Wesleyan Conference, but requires that the committees, who prepare the business for the Annual Conference, and perform a large share of their executive duties, shall be composed partly of laymen. Thus, by the operation of this plan, if it is adopted, the Wesleyans will concede the principle of lay representation, while the New Connection will accept the Wesleyan plan of constitution in the Annual Conference. This plan was held subject to revision at subsequent meetings of the committee.

XI. THE WESLEYAN CONNECTION.—The following are the general statistics of this body for 1872:

CONFERENCES.	Members.	On Trial.	Ministers.	On Trial.	Superannuated.
I. British Conference:					
Great Britain.....	346,850	30,058	1,393	175	217
Ireland and Irish Missions.....	19,696	566	130	25	22
Foreign Missions.....	73,031	6,480	240*	92*	10*
II. French Conference.....	1,916	99*	24	2	2
III. Australasian Conference.....	59,649	7,535	261	70	22
IV. Canada Conference.....	65,512	3,735	451	116	87
V. Conference of Eastern British America.....	15,374 †	1,331	111	29	19
Totals.....	581,508	39,804	2,505	509	379

The Conference of the Wesleyan Methodist connection met in London on the 31st of August. Luke H. Wiseman, D. D., was elected President, George T. Perks, D. D., Secretary.

The most important discussion in the Conference took place on the education question. While the other nonconformist bodies in England had assumed an attitude of more or less active opposition to the acts of 1870, relating

to education, the Wesleyan body had stood with the Established Church in support of the plan of utilizing the denominational schools, and giving them state support as a part of the great national system of schools, provided for by that act. Early in the session of the Conference (August 13th), Mr. William Arthur offered the following resolution:

Resolved, That considering the difficulties of the denominational system of education, the Conference judges it desirable that it should be gradually merged in a system of united unsectarian schools, with the Bible, under school boards.

* These numbers are those of 1871, the minutes of the Eastern British American Conference of 1872 not having been received.

† Exclusive of missionaries in Ireland.

Subsequently, Mr. Arthur modified his motion by adding a provision that, if the resolution were adopted, the laymen at the subsequent district meetings should be invited to express their views on the system of national education which the Conference ought to favor. The resolution was debated during three sittings. While a considerable number of the younger members were in favor of unsectarian education, a large majority, including most of the older and more influential members, were strongly attached to the denominational system with state aid. But, as the Government had signified an intention to propose alterations in the act, it was thought advisable to secure the means of ascertaining and expressing the views of the Wesleyan body on the subject. Mr. Arthur's resolution gave way to the following substitute, which was carried by a large majority:

Resolved, That this whole subject be referred to a committee to meet during the autumn and before the meeting of Parliament, to consist of the General Education Committee, the Committee of Privileges and Exigencies, and a layman and a minister to be elected at the September meeting of each district, with power to act.

The candidates who were ordained to the ministry were questioned as to their views in enforcing attendance upon class-meetings. They were expected to answer that they regarded the subject as obligatory. A plan for the formation of a company for the insurance of connectional trusts was approved. The profits are to be applied—1. To the support of the worn-out ministers' and ministers' widows' auxiliary fund; and, 2. For the benefit of chapel trusts insuring with the company. The subject of making a protracted effort to increase the contributions to the home mission and contingent chapel and theological institute funds was referred to a committee for consideration. The resolution passed by the Conference two years previously, calling for a reform in temperance legislation, and recommending that rate-payers be authorized to control the issue of licenses within their respective districts, was readopted. A memorial was presented from the French Conference asking permission to introduce lay delegation. It was referred to a committee appointed to sit during the year. A declaration was adopted unanimously:

That, in view of the demand lately put forth in regard to national education by the Roman Catholic bishops of Ireland, the Conference resolves to use every legitimate means in its power to oppose those demands as contrary, not only to every interest of Protestant Christianity, but to the principles of civil and religious liberty.

A resolution was offered for a committee to be appointed:

1. To obtain legal opinion as to whether lay representation in Conference is non-permissible under the provisions of the poll-deed; 2. If permissible, whether it is desirable, and, if so, in what form; 3. If lay representation is not legal, or is not desirable, to prepare a scheme by which the Committees of

Review may be consolidated, and made more truly representative.

This resolution was withdrawn, together with another looking to a modification of the plan of stationing the ministers, on account of the want of time to consider them. Both these resolutions were referred, with some other unfinished business, to a special committee, to be reported upon early in the next session of the Conference.

The number of new members received during the year was 84,852; total number on trial in March, 20,058; total number of members, 346,850; net decrease from the previous year, 240.

The preparatory meetings of the Committee of Review, which are always held before the opening of the session of the Conference, began on the 26th of July. The Educational Committee reported the number of day-schools to be 910, being an increase of 21 over the number for the previous year; number of scholars, 166,405; year's increase, 15,640; number of Sunday-schools, 5,612; teachers and officers, 107,727; of scholars, 654,577, of whom 40,218 are in Society or on trial. The cost of the schools was £40,429.65. The income of the Chapel Committee was £8,616; capital of the loan fund, £42,080; local contributions for new erections and the reduction of debts, £219,286, new sittings provided, 49,000. Five of the proposed fifty new chapels for the metropolis had been opened, and fifteen new sites had been secured. The amount of money actually promised in response to the offer of Sir Francis Lycett was £57,072 1s. 1d. This gentleman had proposed to give £50,000 for the erection of chapels in London, on condition that the members of the connection in the provinces should give a corresponding sum. A large contribution, which was really offered before the proposition of Sir Francis Lycett was announced, is not included in this amount. The Missionary Committee reported that £28,279 had been received toward the fund for the payment of the debt of £17,000, and for the evangelization of Rome and Naples. The cost of the home missions, and of Methodist work in the army and navy, was £10,707. One hundred and twenty-three chapels, providing sittings for 55,071 persons, had been built in connection with home-mission stations since the home-mission work was revived. Fifteen more chapels had been commenced.

The committee appointed, in pursuance of the resolution of the Conference, to meet in the fall and consider questions in relation to secular and denominational education, met in Centenary Hall, London, early in December. After a full and free discussion of the subject, it adopted by a large majority the following resolution:

That this committee, while resolving to maintain in full vigor and efficiency our connectional day-schools and training colleges, is of opinion that,

with due regard for existing interests, all future legislation for primary education at the public cost should provide for such education only upon the principle of unsectarian schools, under school boards.

The report of the Wesleyan Missionary Society was made on the 29th of April. It showed the home receipts to have been £110,763 0s. 3d.; and the foreign receipts, as those from the affiliated conferences and mission districts are called, to have been £37,822 14s. 10d.; making the total receipts £148,585 15s. 10d. The advance from the previous year was £1,181 10s. 10d. The expenditures were £14,789 9s. 9d. In the Irish missions 32 ministers were employed. The Continental missions occupy station positions in France, Switzerland, Germany, Italy, Spain, and Portugal. In the Continental and Irish missions together, 97 missionaries were employed. They reported 6,803 members of the churches and 634 pupils in the schools. The following returns were given from the colonial missions: British America, 358 ministers, 32,672 members, 71,363 pupils in the schools; Cape Colony, Orange River Territory, and the Transvaal Republic, in South Africa, 81 missionaries, 12,888 members, 14,042 scholars; the Australasian colonies, Polynesia, and New Zealand, 344 ministers, 45,154 members, 28,727 scholars; Sierra Leone, the Gambia, and the Gold Coast missions, 21 missionaries, 8,424 members, 5,042 scholars; Ceylon, 38 missionaries (of whom only 8 are Europeans), 2,187 members, 6,100 scholars; the Madras, Mysore, and Calcutta districts in India, 39 missionaries, 680 members, 5,873 scholars; China, 9 missionaries, 147 members, 338 scholars. The total number of members in the foreign missions under the immediate care of the British Conference was 72,129, showing an increase from the previous year of 1,661. The number of members under the care of the affiliated Conferences of Eastern British America, Canada, and Australasia, exclusive of the societies in the home-work of the Canada Conference, was 96,475.

The *Irish Wesleyan Conference* met in Dublin, June 19th. The Missionary Committee reported that the previous year had been the most prosperous one in the history of the Society. The reports of the Educational Committee and of the committee on the chapel fund were satisfactory. The income of the Home Mission and contingent fund was £3,137 9s. 6d., the largest ever returned for one year. Numerous memorials having been presented on the subject of lay delegation, the Conference passed a resolution declaring that "the difficulties which lie in the way are too numerous and serious to permit any immediate action upon the subject," and that "it is desirable to ascertain, as soon as possible, the legal bearing of the question in regard to the poll-deed."

The twentieth conference of the *French Methodist Church*—the first Conference held since the war of 1870—met in Paris in May.

The statistics were reported as follows: Chapels and preaching-places, 182; ministers, 28; other salaried agents, 19; members, 1,916; local preachers, 99; members on trial, 99; day-schools, 10; pupils, 375; Sunday-schools, 53; teachers, 311; scholars, 2,399; stated hearers, 8,942. A decrease appeared in the number of members, wholly due to the war.

The *Australasian Wesleyan Conference* met at Melbourne, January 18th. It resolved upon a division into four Annual Conferences: The Eastern Conference, to include New South Wales and Queensland; the Western Conference, to include Victoria and Tasmania; a Conference in South Australia; and a New Zealand Conference. These four conferences will compose a General Conference, which shall meet every three years. The South Sea Missions are to be assigned, during the interval between the sessions of the General Conference, to the Eastern Conference. The statistical returns showed for the colonies 27,585 members, 1,836 persons on trial; and in the mission districts (the Friendly Islands, Feejee, and Samoa), 32,064 members, 5,699 on trial, and 128,772 attendants on public worship. Sixty-four native missionaries and assistant missionaries were reported as connected with the Conference: 6 in New Zealand, 1 in Samoa, 10 in the Friendly Islands, and 47 in Feejee.

XII. PRIMITIVE METHODIST CONNECTION.—The following are the statistics of this body: Number of members, 161,464: Africa, 81; Adelaide, 2,103; Melbourne, 2,197; Sydney, 1,132; New Zealand, 359; Canada (1871), 6,493—increase, 121—(a report subsequently received from Canada raised the increase to 347); ministers, 962; local preachers, 14,587; class-leaders, 9,942; chapels, 3,710; other preaching-places, 2,697; Sunday-schools, 3,454; teachers, 43,776; scholars, 290,141; day-schools, 50; teachers, 77; scholars, 3,784; missionary receipts, £32,258.

At the Primitive Methodist Conference, which met at Yarmouth, England, June 5th, it was reported that 126 chapels had been built during the year, at a cost of £74,516. They contained sittings for 26,803 persons. The total value of chapel property was estimated at £1,319,810; amount of debt on the same, £593,946. The educational institutions of the Conference are the Sunderland Institute and Elmfield College.

The report of the Primitive Methodist Missionary Society was made April 30th. The time for the meeting of the Society having been changed, it embraced a period of thirteen months. The total amount of moneys collected for missionary purposes was £32,280. The Primitive Methodists in Canada had 43 missionaries employed under the direction of the committee. The number of missionaries in Australasia was 49; in the missions of West Africa, 2; and in the South African Mission, 1.

XIII. UNITED METHODIST FREE CHURCHES.—The following are the statistics of this body for

1872: Connectional ministers, 818; local preachers, 8,418; leaders, 4,847; members, 66,907; chapels, 1,289; Sunday-schools, 1,222; Sunday-school scholars, 158,005; Sunday-school teachers, 24,064; day-schools, 96.

The Assembly of the United Methodist Free Churches met at Bristol, July 31st. The Connectional Committee reported that arrangements had been made for the commencement of the theological institute. A case came up early in the session which was thought to involve the permanency of the circuit system, and excited discussion for that reason. The Cleckheaton Society, which is connected with a circuit, had invited a minister to become its pastor for the ensuing year. The Assembly hesitated to give consent to the consummation of this plan, fearing it might be made a precedent which would result in the disintegration of many circuits. The consent was given, and a rule was passed discountenancing in future such arrangements with ministers as contemplated the division of circuits, until the consent of the Assembly had been first obtained. The following resolution was adopted in reference to the Education Act:

That this Assembly fully recognizes the importance of the religious training of the young, not deeming any education complete which ignores the religious element; but, as the teaching of theological tenets peculiar to any denomination in schools assisted by public money tends to confound truth and error, and is hurtful to the consciences of many of her Majesty's subjects, this Assembly is strongly of opinion that the Elementary Education Act should be so amended as to give secular education only during school-hours, and that it be left to Christian churches to teach religion at their own cost, and in their own places.

XIV. BIBLE CHRISTIANS.—The fifty-fourth Conference of the Bible Christians met at Bideford, Devon, July 31st. The statistical reports show that the connection numbered 253 itinerant and 1,737 local preachers, and 26,209 full members. It had 858 chapels, 9,453 teachers and 48,351 scholars in its Sunday-schools. A considerable increase in all departments was remarked since the previous Conference. The income of the Missionary Society was nearly £5,900; the expenditures more than £7,200. Chapel debts to the amount of £5,346 had been paid.

XV. WELSH CALVINISTIC METHODISTS.—The conference of the Welsh Calvinistic Methodists met in June. The following statistics were presented: Number of churches, 1,050; places of worship, 1,146; ministers, 449; preachers, 843; deacons, 8,446; communicants, 93,190, an increase from the previous year of 365; children, 43,247; Sunday-school teachers, 20,005; scholars, 148,044; hearers, 245,166. Total collections, £110,657. The collections for mission purposes were £4,449; toward payment of chapel debts, £21,087; and for the poor, £2,203. Two missionaries labor in Brittany—at Quimper and L'Orient—where are reported 79 communicants, 28 candidates, 115 hearers, and collections of £34. Five mis-

sionaries labor in India (in Bengal), and report 400 members, and 60 schools on the hills, in which 1,100 children were taught.

MEXICO (REPÚBLICA MEXICANA), a federative republic of North America, bounded on the north by the United States; on the east by the Gulf of Mexico; southeast by British Honduras and the Republic of Guatemala; and south and west by the Pacific Ocean. It extends from latitude 15° 26' to 33° 32' north, and from longitude 86° 30' to 116° 50' west.

The republic has an estimated area of 1,008,442 square miles, and it is divided into 28 States, one Federal District, and one Territory, which, with their respective populations and capitals, are as follows:

STATES.	Population.	Capitals.
Sonora.....	109,388	Ures.
Chihuahua.....	179,971	Chihuahua.
Coahuila.....	98,897	Saltillo.
Nueva Leon.....	174,000	Monterrey.
Tamaulipas.....	108,778	Victoria.
San Luis Potosí.....	478,600	San Luis Potosí.
Zacatecas.....	397,945	Zacatecas.
Agua Calientes.....	140,690	Agua Calientes.
Durango.....	185,077	Durango.
Sinaloa.....	168,095	Cullacan.
Jalisco.....	324,680	Guadalajara.
Colima.....	68,338	Colima.
Michoacan.....	618,240	Morelia.
Guanajuato.....	874,048	Guanajuato.
Querétaro.....	153,386	Querétaro.
Hidalgo.....	404,307	Pachuca.
Mexico.....	650,668	Toluca.
Morelos.....	150,384	Cuernavaca.
Guerrero.....	800,029	Tixtla.
Tlaxcala.....	121,665	Tlaxcala.
Puebla.....	697,788	Puebla.
Vera Cruz.....	459,362	Vera Cruz.
Oajaca.....	646,725	Oajaca.
Chiapas.....	188,987	San Cristobal.
Tabasco.....	88,707	San Juan Bautista.
Campeachy.....	80,866	Campeachy.
Yucatan.....	422,365	Mérída.
Lower California (ter'y). ..	21,645	La Paz.
Federal District.....	275,996	Méjico.
Total.....	9,178,053	

Of the total number of inhabitants, about one-half are computed to be Indians, some 1,190,000 mestizos, 6,000 negroes, and the remainder whites.

The population of the chief cities is shown in the annexed table:

Cities.	Population.
Mexico.....	200,000
Puebla.....	75,600
Guadalajara.....	70,000
Guanajuato.....	68,000
Querétaro.....	47,570
San Luis Potosí.....	35,581
Colima.....	31,000
Oajaca.....	25,000
Vera Cruz.....	10,000

President, Don Sebastian Lerdo de Tejada, elected President of the republic November 2d, as successor to Benito Juarez, who died July 18th. At the time of the death of Juarez the ministry was composed as follows: Interior, Gomez del Palacio; Foreign Affairs, J. M. Lafragua (June 13, 1872); Justice, R. Alcaraz (March, 1871), Director; Finance, F. Mejía (June 13, 1872); War and Navy, General J. Mejía (July, 1867); Public Works, B. Balcarcel. In the office of President of the Supreme

Court of Justice, occupied by Don S. Lerdo de Tejada until the 18th of July, the latter was succeeded by P. Ogazon. The generals commanding the respective *corps d'armée* of the republic were: North, Rocha; Centre, A. Garcia; East, Alatorre; and West, R. Corona. Archbishop of Mexico, P. A. de Labastida (1863); of Michoacan, Dr. Arciga; of Guadalajara, Dr. P. Loza (1870). Mexican Minister Plenipotentiary to the United States, Don Ignacio Mariscal.

The Mexican army, according to the "Almanaque de las Oficinas," etc., published by J. E. Perez, Mexico, 1871, was made up of 28 battalions of infantry, 1 battalion of chasseurs, 15 cavalry corps, 4 brigades of artillery, 8 siege batteries, and 1 corps of engineers; but the exact number of men in each corps is not known.

More than two-thirds of the total trade of Mexico is carried on with the United States. The chief articles of export are silver, copper-ores, cochineal, indigo, and other dyes, hides, Sisal hemp, mahogany and other woods; and the principal imports, cotton, linen and woollen fabrics, wrought and unwrought iron, machinery, etc. The value of the entire commerce of the republic for the fiscal year ending June 30, 1870, is computed at: imports, \$23,174,729; exports, \$24,000,000. Of the exports, \$18,000,000, approximately, were in coin.

The value of the imports from the United States in the same year was \$5,381,959.65; and that of the exports to the United States, \$8,580,812.01. The exports to Great Britain in 1876 amounted to \$1,499,065; and in 1871 to \$1,986,870. The imports from Great Britain in 1870 reached \$4,554,410; and in 1871 \$5,245,065.

The port movements show for the year 1869-'70 a total number of 635 vessels, with an aggregate of 542,044 tons; 238 were vessels from the United States, with an aggregate tonnage of 870,675. The following table shows the lines of railways in the republic at the end of 1871, with their respective lengths:

	Kilometres.
Mexico to Puebla.....	186
Vera Cruz to Paso del Macho.....	75
Vera Cruz to Loma Alta.....	35
Vera Cruz to Medellin.....	12
Mexico to Tlalpam.....	24
Mexico to Tacubaya.....	8
Mexico to Guadalupe.....	7
Total, about 190 miles, or.....	347

The line from Vera Cruz to Mexico was completed in 1872, and the total length of railway was brought to 892 kilometres.

The telegraph-lines open to the public service at the same time were:

	Kilometres.
Mexico to Vera Cruz, Tehuacan, Tlaxcala, and Tulancingo.....	1,048
Vera Cruz to Tampico.....	289
Tehuacan to Oajaca.....	373
San Luis Potosi to Zacatecas.....	184
Mexico to Cuernavaca.....	84
Mexico to Toluca.....	67
Zacatecas to Durango.....	54
Leon to Guadalajara and Mansanillo.....	645
Total, 1,653 miles, or.....	2,648

In 1872 the total length of telegraph-lines was 5,200 kilometres.

About two-thirds of the public revenue are derived from customs duties, on exports as well as imports; and nearly one-half of that revenue is appropriated to the maintenance of the army. For a number of years the financial affairs of the country have been in great disorder, the expenditures nearly always being in excess of the receipts; deficits have been the rule for upward of twenty years, and amounted at times, during the French occupation, for instance, to more than the entire revenue. The year 1869-'70, however, offers an exception to this rule.

The sources and amount of the revenues of the Government of Mexico for the fiscal year ending June 30, 1870, are given in the following table:

Customs duties.....	\$9,029,573 94
Indirect taxation.....	1,310,536 34
Stamped paper.....	1,919,615 22
Sale of national property.....	222,308 43
Direct taxation.....	563,500 22
Mint duties.....	126,578 94
Assaying and smelting duties.....	45,738 87
Department of Public Instruction.....	98,323 74
Carriage-taxes.....	12,263 66
Post-Office Department.....	417,247 79
Sundries.....	540,630 10
Total.....	\$14,420,574 67

The expenditure for the same period comprised the following branches:

Executive.....	\$31,186
Legislature.....	572,359
Supreme Court of Justice.....	210,761
Ministry of Foreign Affairs.....	100,335
Ministry of Justice.....	728,233
Ministry of Public Works.....	466,082
Ministry of the Interior.....	1,306,870
Ministry of Finance.....	661,146
Ministry of War.....	4,673,871
Provincial expenditure.....	1,880,714
Cost of collecting revenue.....	1,196,965
Arrears.....	561,530
Total.....	\$13,046,743

No official returns of the national debt have been published since the reign of Maximilian, at which time the total debt was computed to be \$317,857,250, bearing an annual interest of \$19,725,370. The amount of the debt of Mexico to England in 1862 was \$100,000,000, which had increased by 1873 to \$300,000,000; but this, together with the amounts due to France for war expenses, is entirely repudiated by the present Government of the republic. Indeed, the interest on the recognized internal debt, which is about \$35,000,000, has not been paid for many years past.

Public instruction is gaining more and more importance each year; in most of the States each municipality has primary schools for both sexes, the teachers being paid out of municipal funds. The Lancasterian Society of the city of Mexico furnishes examined teachers for the elementary branches of those schools, and, by its untiring efforts for the advancement of the cause of education generally, is establishing a firm basis for the future welfare of the country.

Official information of the defeat of the

Diaz brothers, and the taking of the city of Oajaca, was published on the 8th of January, 1872. The city of Saltillo was taken by the rebels, through the treachery of some officers in command of important positions. In consequence of the victory at Oajaca, the port of Salina Cruz was by decree again opened to commerce. It was generally hoped that the triumph just alluded to would put an end to the revolution, at least for the time being. The remains of Felix Diaz were taken to Puchutla; some averred that he had been killed in action; others that he had fallen under the knife of an assassin. The power assumed by Juarez was becoming more and more dictatorial each day; in spite of the protestations of the Governors, Oajaca, San Luis, and Hidalgo, were placed under military government, while Nuevo Leon, Durango, Zacatecas, and Sinaloa, were under revolutionary governors. Aguascalientes surrendered to the revolutionary troops, 30,000 in number, and the Government forces had been repulsed, with much loss, in Sinaloa. Generals Guerra and Naranjo attacked San Luis, February 16th, and obliged the garrison to take refuge in the city, cutting off all communication between the garrison and the Government troops. On February 23d the rebel governor, Gomez Portugal, invested the city of Aguascalientes. On the 25th a rumor was circulated that Porfirio Diaz had died of dysentery at Querétaro, and that his partisans had proclaimed Lerdo de Tejada, or Guzman, President; this report was, however, not believed by the revolutionary party. Treviño was said to have 10,000 men under his orders.

The city of Zacatecas was recaptured by the Juarist General Corella, acting in conjunction with Government troops from the State of Guanajuato, and the command of General Sanchez Ochoa. It was likewise stated that Treviño had been defeated and wounded, and that his colleagues, Generals Martinez, Naranjo and Cadena, were prisoners, having lost their artillery and ammunition. Canales, the Governor of the State of Tamaulipas, ordered the rebel General Quiroga to evacuate the State, threatening, in case of refusal, to compel him to do so.

Early in March the revolutionists, by their tardy movements, had ruined their operations against San Luis de Potosí, and greatly compromised their prospects of ultimate success, dissensions among the leaders having no doubt contributed much to their discomfiture. Donato Guerra and Barrios favored one plan of campaign, while Treviño and Naranjo desired another; and Pedro Martinez, La Cadena, Governor Portugal, and Juan García, were equally as strong in their advocacy of a third. The final decision of these leaders seems to have been to unite their forces at San Felipe, a town south of their objective point, of great strategic importance, twenty leagues from Lagos, twenty-two from San Luis, and about forty from Zacatecas City. Thence they ex-

pected to attack the Government troops in detail, placing their army between the Government garrison at San Luis under General Corella and the advancing division of General Rocha, and yet in a position to isolate the Government forces of General Sanchez Ochoa at Lagos, and at a given moment fall upon them with superior numbers and crush them. They also expected material support from Guanajuato, the disloyalty of whose governor was strongly suspected at the capital. The revolutionary leaders no doubt counted upon his desertion to their side, together with the 2,500 State troops of Guanajuato; the accession of which force would have rendered their success certain. Results, however, differed much from expectations, and therefore the success anticipated was turned to disappointment and failure.

In order to combine the revolutionary plans, General Guerra left Zacatecas City with a large force, apparently bent upon marching to Guadalajara; while General Pedro Martinez moved with 2,000 men in a contrary direction, and toward San Luis, to unite near San Felipe with the forces of Generals Treviño and Naranjo, coming from Matehuala. The object of Guerra's feigned march was to draw Sanchez Ochoa and his troops from Lagos to the succor of Guadalajara, so apparently menaced by the revolutionists; but Ochoa was not deceived, and, to the chagrin of Guerra and his companions, remained at Lagos. This first disappointment to the revolutionists was quickly followed by the occupation of San Felipe by General Rocha and his division.

In the mean time, Guerra, unable to draw off Sanchez Ochoa from Lagos toward Guadalajara, retraced his steps to Zacatecas and then followed in the tracks of Martinez. Between the combined forces of the Government and the revolution there was, in truth, no great disparity of numbers, and, if the revolutionists' reports are to be credited, their forces were even somewhat more numerous; but in discipline, drill, armament, artillery, and general efficiency, the Government possessed so incontestable a superiority, that to risk a decisive battle near San Luis was by no means prudent for the revolutionary leaders; so they decided to adopt a new plan of attack, namely, to dislodge Ochoa from Lagos. Rocha, hearing of the new movements, hastened toward Lagos with over seven thousand men, taking Corella with him as second in command, and arrived before the place thirty hours after its occupancy by Guerra, Treviño, and Martinez. At first these proposed giving him battle, and actually drew up their forces in line in front of the town; but night arriving without an engagement, and learning in the mean time that Ochoa had effected a junction with Rocha, they prudently changed their minds, and, under cover of the darkness, commenced a retreat, and fell back to the north of Aguascalientes, which city was reoc-

occupied by the federals. To these successes of the latter may be added several smaller triumphs in the State of Vera Cruz.

A brother-in-law of Porfirio Diaz, Vicente Lebrija, a deputy to Congress from Oajaca City, died there in March. The demise of another member of Congress was reported in the same month, that of Colonel T. G. Alba, of Vera Cruz, by small-pox, which disease prevailed in an epidemic form in Mexico City, Tacubaya, San Luis, and half a dozen other places. In San Luis there were over six hundred deaths from it in January, in Mexico City five hundred persons perished per month, and in other places the mortality was, relatively to their populations, nearly as large. Vaccination was shamefully neglected in this country, as a general rule, and this accounts in part for the frightful ravages of small-pox at the national capital and elsewhere.

Meantime the long strain upon the strength of the country, consequent upon thirty years of revolutionary struggle, had almost reduced it to a state of chronic debility; continued intestine commotions were further undermining its remaining vitality; social disorders and moral depravity were still on the increase, and robberies, kidnappings, and murders, became more and more frequent. Stage robberies were of much more than daily occurrence, and the inquiry was no longer what stages have been robbed, but what ones have been so fortunate as to escape. Kidnappings, the worst form of Mexican rascality, were committed with incredible boldness. In the suburbs of Mexico City a young girl of thirteen years was kidnapped in broad day by three men, taken to the mountains, and not returned to her parents until a ransom of \$1,200 had been paid to her kidnappers. In the city of Guadalajara a druggist was kidnapped in his own garden on the 2d of March, and released only upon the payment by his wife of \$1,500 ransom. Near Pachuca, a rich Frenchman, named Masse, while riding on horseback, was also kidnapped, and, as the ransom of \$30,000 asked for his release had not been paid, it was feared by his friends that he had been put to death. The Government's energies were too much taken up by the revolution to allow of its dealing with bandits and malefactors with the required determination and vigor, so that these persons enjoyed considerable immunity from prosecution, only occasional measures being taken against them.

On March 2d a battle for the possession of Zacatecas City was won by the Government troops; the action lasted five hours, and the revolutionists lost about 1,800 men killed and wounded, and over 1,200 were taken prisoners. But in the States of Puebla, Tlaxcala, and Hidalgo, the Government fared worse. Negrete, unquestionably the most bitter, untiring, and dashing of President Juarez's enemies, surprisingly extended the sway of the revolution. A number of vil-

lages and towns were taken in rapid succession, principally in Hidalgo, by General Manuel Gonzalez, one of the ablest of the revolutionary leaders, acting under Negrete's orders. And under the latter's immediate directions those important places for a struggle for the mastery in the Puebla Sierras and large portions of Tlaxcala and Hidalgo—Tlatlanqui, Zantla, and Tepeacuilco—were occupied and garrisoned, he having with him over 1,600 men. Several times the trains of the Mexico City & Vera Cruz Railroad, upper division, had been interfered with by his lieutenants, Torrentera and Carrillo, at and near Apizaco, and at one time a constructor of the road, Mr. John Queen, an American, was taken prisoner and marched off to the mountains. He was, however, soon afterward released and allowed to go to Mexico City. Negrete assessed the road for \$40,000, payment of which having been refused, he in consequence resolved to annoy the company and interfere with its trains to the utmost of his abilities. To strengthen his cause as much as possible, he incorporated into his army such bandits as Sotero Lozano, Juan Garcia, Canuto Sandoval, and their desperate followers, and these men, while warring for the revolution, also murdered, robbed, and kidnapped, in furtherance of their adopted calling.

On March 9th, died at Mexico City, at the age of 77 years, Doña Carmen Fagoaga de Mariscal, mother of (then) Prime-Minister Don Ignacio Mariscal, now minister plenipotentiary at Washington.

About April 1st, the revolutionists still held Saltillo and Monterey in the interior, and Camargo, Mier, Guerrero, Nuevo Laredo, and Piedras Negras on the frontier, at which places they had some 12,000 troops.

On April 22d the National Congress passed the law granting extraordinary faculties to the President, which furnished an additional element of strength for securing peace. Although the votes were 72 against 68, that circumstance did not indicate the strength of the Juarez members; for many of them voted "no," for the alleged reason that they did not consider that, as the revolution was in great part put down, it was necessary to confer further power upon the Executive, especially as Congress, with which he could consult, was then, and would continue for some weeks, in session. A large number of Americans were at this time in Mexico City, inquiring into railway and other interests in the republic. Mr. E. L. Plumb, formerly *Chargé* of the United States to Mexico, as representative of the Texas International Railroad Company, was seeking from the National Congress a concession for the construction of a railroad from some point on the Rio Grande south of San Antonio, to the Pacific Ocean, with a branch from the main line at about San Luis Potosi, and terminating at Mexico.

General Rosecrans arrived in the same

month, as representative of a road to connect the Gulf of Mexico with the Pacific, starting from Tuspan and terminating at the nearest and most convenient point on the west coast. The general had also in contemplation a scheme for the general construction of railroads throughout the republic.

Mr. Robert B. Garsuch had already applied for the concession for a railway from the Rio Grande to the Mexican capital, with a branch to the Pacific.

The period for the completion of the submarine telegraphic cable from Cuba to Yucatan was extended in April; and the Government granted also an extension of the time fixed for the establishment of a line of steamers to ply between Sisal and New Orleans, along the Mexican coast of the Gulf.

Although the country was still under the depressing influence of the revolution, the Government manifested a disposition to do all in its power to favor the investment of foreign capital in national improvements, and especially in railways, which it regarded as the most efficient peace-makers and most powerful agents of civilization in countries like the Mexican Republic.

Such was the state of exhaustion of the national Treasury, that Minister Romero was, in order to raise funds for the prosecution of the civil war, constrained to rent anew some of the principal mints of the country for a period of years.

Among a number of prisoners captured by the Government forces in April, and sentenced to be shot, was a Mr. Mayer, who had served as an officer in the United States Army during the late war. The Mexican press were unanimous in petitions for his pardon.

After an unsuccessful attempt on the part of the rebel Generals Diaz and Galvar to raise an army in Jalisco, the former repaired, for the second time, to the United States for safety; and the revolutionists were driven from all their strongholds south of San Luis Potosi, dispersed and disarmed. In the States of Vera Cruz, Guerrero, Puebla, Michoacan, Querétaro, and the Federal District, there no longer existed any movement worthy of the name of revolution; while disturbances in Tabasco and Yucatan were of a purely local character, being directed against the persons of the governors, and were soon quelled.

The order issued by President Grant, concerning cattle-thieving on the Rio Grande, gave rise to warm discussion, and various speculations, among the journals of the capital; it being surmised, in Mexico, that the United States troops would not, in their pursuit of thieves, stop at the banks of that river.

The construction of a line of telegraph, to connect the States of Campeachy, Tabasco, and Yucatan, was commenced in May.

A band of revolutionists captured and plundered the custom-house, and other public buildings, at Alvarado, Yucatan, carrying off

the employés as prisoners, several of whom they were said to have killed. Juarez declared martial law in the State of Coahuila, and appointed General Zapata Military Governor.

General Palmer and Governor Hunt, with their engineers, left the capital, divided into two parties, one to survey the country in the direction of Morelia, and the other by way of Zacatecas.

The Government of the republic announced that no Mexican consuls were appointed to France, and that consequently the acts of persons assuming to discharge the functions of such office were null. Señor Romero went to the United States to obtain colonists for his estates in Chiapas. A direct line of steamers from Progreso to England is projected.

General Corella arrived at Saltillo on the 26th of May, and was prepared to march on Monterey. On the 30th he routed the revolutionists, under Treviño, at San Barnabé (near Monterey). At the first fire of the Juarists, the revolutionists fled in great disorder, without offering any thing like an organized resistance, and left the Government troops in possession of the field. The latter were so highly elated with their advantage that they neglected the necessary precautions against surprise. General Corella, imagining that he had given a crushing blow to Treviño, and that he was therefore secure from further attack, sent dispatches to the Juarez Government, announcing his victory, and the total annihilation of the revolutionists.

But, on the following day, Treviño rallied all his forces, which had been purposely scattered, in order to avoid the concentrated fire of the Government troops, and attacked Corella in the suburbs of Monterey. The Juarists were completely taken by surprise, and made hasty preparations for resistance; but, before they could recover from the shock of the sudden attack, the revolutionists dashed in upon them, and made a fearful slaughter. In this action, Corella lost every thing: guns, ammunition, siege-trains, and even personal baggage, and the army-chest, containing \$10,000.

On June 10th, General Corella, staff, and twenty men, all that escaped of 4,000, arrived at Brownsville, Texas. General Ceballos met the advance of Quiroga's army, at Cevallo, on the 7th, and, after a slight engagement, retreated to Mier, and thence upon Camargo, closely pursued by the revolutionists, which place he abandoned on the 9th, and was compelled to retreat on Matamoras, with less than 2,000 men, while Quiroga's revolutionists were said to exceed 4,000.

Business was entirely suspended again in Matamoras, and the greatest anxiety prevailed as to the result of the defeat of the Government forces. Thus ended the campaign against the revolutionists on the northern frontier, after two months spent in preparations. General Treviño's retreat on May 30th was evidently a *ruse* to lull the Juarists into a con-

viction of security, and then renew the attack.

About the same time, General Ceballos, who was advancing northward, was checked by the rebels, defeated, and driven back near Mier, with a small remnant of his army. These reverses were, however, partially compensated by the occupation of Mazatlan by the Juarist troops, about the 1st of June, and the consequent pacification of all the western part of the republic. The Congress adjourned early in June, after having passed the tariff bill, reducing the rate ten per cent., and the export duty on coin from eight to five per cent., and the bill granting "ample facilities" to the President. About June 18th, General Rocha, with 3,000 Government troops, reached Saltillo from Sinaloa, uniting with General Fuero and Colonel Leurillo, and forming an army of 5,000 men, to advance on Monterey, where Quiroga and Treviño, with the revolutionists, were intrenching. General Ayala, with 400 Government cavalry, routed Vargas, at Tulo, who had "pronounced," not many days before, at the head of a few hundred men.

The revolutionary leader, Gomez Portugal, had taken up position outside of Matamoras, capturing the mails, levying twenty-five per cent. on the merchandise passing out of the city, and committing other depredations. Many merchants in Matamoras suspended their business, for the purpose of avoiding the new ten per cent. State tax, and an anticipated forced loan by the Government.

Early in July, owing to some unexplained difficulties which occurred in the affairs of the State of Jalisco, Vallarte, the Governor, was compelled to resign. The journals of the capital were full of complaints against the usurpation of the Government, which had imposed extra taxes upon the citizens. Business throughout the republic was stagnant; the revolutionary movements still continued in various parts of the country, and assassination and kidnapping were everywhere prevalent. The rebel Colonel Salazar captured the town of Hanuco, near Tampico, with its garrison, and shot the commander. General Palacios was appointed Military Governor of Coahuila.

The Government forces, under General Ceballos, entered Monterey on the morning of July 10th—the revolutionists, under Treviño and Quiroga, having abandoned the place precipitately on the approach of two columns of Government troops, under General Rocha, from Saltillo, and General Ceballos, from the frontier. Treviño, with a considerable force, was at Salinas, whence the combined cavalry force of Generals Rocha, Revueltas, and Monclova, had gone in pursuit. The infantry remained in Monterey, recuperating from their late severe forced marches.

Monterey presented a most pitiable appearance. Business had been suspended under the revolutionists, in consequence of forced loans,

and many families and merchants had fled. The last act of Treviño was a *préstamo*. The United States consul was imprisoned for refusing to pay, and his place of business seized. Another American citizen was summoned to pay \$12,000 or to receive 500 lashes, and only got off by paying \$5,000. The entrance of the Government forces was hailed with joy by the population remaining in Monterey. It was feared that the revolutionists had carried off many prominent citizens who are missing, to hold as hostages, or for further robberies.

The inhabitants of the capital were in a continual state of alarm at the immense numbers of abductions by kidnappers, who exacted heavy ransoms for the restitution of their victims. One of the latter, a leading citizen, was found in a subterranean vault, and, in the house above, some documents, confirming the existence of a secret society called *Italia roja*, and composed of criminals of all nations. The society was usually known, however, as the *sociedad terrible*. Numerous arrests were made, and several of the prisoners received prompt and condign punishment, having been shot on the very evening of their apprehension. Much uneasiness was caused by the apine indifference and non-attention of the American officials to the murder of Dr. Yoe, and the imprisonment of Thiele, an American citizen.

The postal authorities had again intercepted correspondence addressed to the American minister. The authorities at Oaxaca suppressed letters, directed to him, which contained statements regarding the murder of an American. This was overlooked by the minister, owing, it is said, to his very friendly relations with the Mexican Government. After discovering that the author of the letters was an American, the authorities imprisoned him, and, although he remained long in jail without being informed of his crime, no efforts were made to obtain his release.

Negrete captured the Pachuca and Real del Monte mines, the richest in the world. This capture gave a new impetus to the revolution. Pachuca is fifty miles from the capital.

The people were growing tired of the anarchy prevailing, and believed it impossible for Juarez to maintain peace. They demanded that he should resign, and enable Lerdo de Tejada, his legal successor, to assume the presidency.

On the night of the 18th of July, President Benito Juarez died of an attack of apoplexy, which had seized him in the evening of the same day. General Rocha directed that the national flags and all the Government ensigns should be placed at half-mast in token of respect to the memory of the deceased Chief Magistrate.

Awaiting the order of Congress for an election to fill the vacancy, the presidency of the republic devolved upon Don Sebastian Lerdo de Tejada, President of the Supreme Court,

and, until recently, Minister of Foreign Affairs, in President Juarez's cabinet, but lately in opposition to the Government, and regarded as sympathizing with the revolutionists. Although he had remained in the city of Mexico, he had taken no active part with the insurgents.

The revolutionists had already resolved upon making Lerdo de Tejada President, and were confident they would succeed.

The following is a translation of President Lerdo's proclamation:

Sebastian Lerdo de Tejada, Constitutional President ad interim of the United States of Mexico, to his fellow-citizens:

The unexpected and lamentable death of the illustrious President, Benito Juarez, a calamity which has plunged the nation in mourning, accompanied with sentiments of the most just and most profound regret on our part, has, in conformity with the law, made me, for a brief period, depository of the Executive power of the Union.

The duties of my short administration are contained in the oath taken by me before the Permanent Committee of Congress, and are in complete harmony with my most sincere sentiments, and my most profound convictions. My constant rule of conduct shall be a deep and inviolable respect for the Constitution and the exact fulfillment of the law, in order to the discharge of the solemn obligations I have contracted, and to follow the only course which can lead to the welfare and prosperity of the nation.

I regard it as my especial duty to enforce the observance of the laws of reform which have strengthened and perfected our institutions. Those laws made for the purpose of eradicating the capital vices contained in the old organization of our society, thus opening up the way to a most happy future, have been, in their application and development, a remedy for the most complicated evils, and the triumphal inauguration of true civilization.

Besides the obligation which rests upon me of keeping and enforcing the laws of reform, the conviction that they constitute the most solid foundation of our social and political organization will increase my zeal to the end that they may not be infringed by any one.

In pursuance of the provision made by the fundamental code on the occurrence of an absolute vacancy of the presidency, I deemed it convenient that my first act should be to initiate the promulgation of the decree this day issued, calling for a new election. In this election the rights of the people shall be respected, and free suffrage in its fullest form preserved and guaranteed, without any obstacles or restrictions whatever. All citizens and all parties shall be enabled to act freely in the elections, and the result will be acknowledged as the genuine expression of the public will.

Animated by this spirit, I have considered it my duty to issue this day a decree granting amnesty, without exception of persons, to all guilty of political offences committed up to the present time. The principal efforts of the rebels having been suppressed, the amnesty may be granted without fear of prejudice to the law or the authorities, and is in accordance with the general desire for the pacification of the country, and with the deeply-grounded opinion of all those who behold the disasters caused by anarchy and the ruin and desolation produced by civil war. A new electoral period being now inaugurated, amnesty is the only means of securing free suffrage to all in the coming election, whether as voters or as candidates. I have thought that I could not more profitably exercise the ample powers bestowed upon the Executive; and that if, unfortunately, some still remain who wish to afflict their country with the

plague of war, and so necessitate the using further energy to subdue them, public opinion will acknowledge that the sincere desire of the Executive has been to leave nothing undone in order to obtain the supreme blessings of peace, and establish absolute freedom in the electoral campaign.

And, besides, several of the States are under martial law, a grave matter likewise connected with these important subjects; and there existing already certain circumstances for the decision of the larger number of cases, the Executive will use his utmost and most earnest endeavors to prevent the continuance of that abnormal situation, except when the absolute lack of constitutional authority should require it, and this only until an election can be held, or until the imperious necessity of restoring peace should render it indispensable. The Executive having been invested with ample powers by the Congress of the Union, he intends to make use of them only in extreme cases, or when some urgent measure must be accomplished. He sincerely hopes, however, that he will not be constrained to exercise them to the prejudice of individual rights, which can never be too deeply respected.

The most precious of all, that of the freedom of the press, which protects and guards the rest, shall be considered by me as inviolable, as it was without exception during the long term of my service as minister of the illustrious President whose loss we lament. If the liberty of writing should at all times be unlimited, still more zealously should it be preserved during an electoral struggle. For the excesses committed by the press, the most efficacious remedy is the press itself, if it be enlightened and free, and disposed to be the echo of all opinions and of all parties.

In administrative affairs I shall see that the principles of order and of morality be preserved; and I shall do my utmost to observe in the public expenditure that economy rendered so necessary by the scarcity of the public funds. In making appointments I shall take into consideration honesty, ability, and real merit; and I shall be governed by this rule, in my actions toward the present employés of the Government, without entertaining or having the right to entertain any prejudice in view of former political opinions or parties. In the exercise of the supreme power I shall not be the instrument or the representative of any political clique, but the representative of the nation at large; nor shall I be the chief of a party, but the impartial and disinterested administrator of the law.

After the elections shall have taken place, and the choice of the people be proclaimed by the national representatives, I shall consider myself honored in delivering the government into his hands, thus showing my obedience to the sovereign will of the nation, in returning the trust confided to me by the Constitution. My acts will prove the sincerity of my sentiments, and I shall take care not to depart in the least from the principles herein expressed; and that at the termination of my short administration I may aspire to the testimony from my fellow-citizens that I have endeavored to do my duty.

SEBASTIAN LERDO DE TEJADA.

Mexico, July 27, 1872.

General Porfirio Diaz's private secretary, when in Brownsville, early in July, denied the authenticity of the alleged proclamation of Diaz, which was published in the Juarez papers some time before, purporting to modify the plan of *La Noria*, by making Lerdo de Tejada, in his capacity of President of the Supreme Court, the constitutional President of the republic. General Diaz thus defined his position: "Benito Juarez not being legally elected, therefore Lerdo is President *ex officio*."

"The adherents of Lerdo," added Diaz's secretary, "agree to this definition of the pact, but are reluctant to rise in arms, as they wish to avoid the extension of civil war, and would only engage in active hostilities as a last resort against the growing despotism of the Juarez government. The Lerdistas represent the wealth and intelligence of the country, and, if they can only be induced to pronounce, will dictate terms to the government of Juarez. They would probably not see and endure the complete triumph of Juarez without pronouncing against him. Meanwhile, the revolutionists, now under arms are willing to fight their battles."

The Legislature of Sonora ratified a concession to a California company, for a railroad from Guaymas to Tucson, Arizona, and United States Consul Willard proceeded to the city of Mexico with the documents, for the signature of the President.

The Government forces having been generally withdrawn from San Luis Potosi when General Rocha advanced on Monterey, the revolutionary General Martinez took the opportunity to attack San Luis with about 600 cavalry; but, after a fight of several hours, he was repulsed by the National Guards and citizens, with considerable loss. General Rocha dispatched a cavalry force in pursuit of Martinez. Both parties at Monterey were inactive.

The revolution in the State of Tamaulipas having been suppressed, the whole frontier of the States of Nuevo Leon and Coahuila in possession of the Government, leaving the insurgents without a port or single point of importance, and the country being practically pacified, the military authorities issued, July 23d, a proclamation raising the state of siege, annulling martial law, abolishing the passport system and other military restrictions, which had prevailed for several months, and restoring the civil rule.

Guadalajara pronounced against Governor Corona, who was driven out by the inhabitants.

General Rocha levied a forced loan of \$80,000 on the merchants of Monterey, payable with his drafts, principally on the treasury balance of dues recorded against the Monterey custom-house.

At the end of July the country was in a more deplorable condition than ever before. The custom-house at Vera Cruz was indebted to the merchants in the amount of half a million dollars; Tampico also owed a large sum to the same class; and Matamoras had a like difficulty and money burden.

General Rocha issued a proclamation at Monterey favoring peace and amnesty to the late insurgents. Numbers of prominent revolutionists, who had been refugees in Texas, obtained permission to return with their families to Mexico.

The stage-coach and mail services were resumed before the end of July.

The new tariff, increasing the rate of duties,

was suspended on the Matamoras frontier for two months, counting from July 24th, and goods imported were permitted to enter under the old rates for that time. The change was made on account of the suspension of business caused by the recent revolution.

Juarez's remains were interred in the Pantheon. The funeral was an imposing spectacle; the houses were draped with mourning; and fully 100,000 spectators lined the streets through which passed the *cortège*, with numberless emblems of grief. The greater portion of the foreigners in the capital were present at the ceremonies, as were likewise all the foreign diplomats and public officers, and suitable addresses were made by Mr. Nelson, the United States minister, and by Señor Vigil, for the editorial fraternity of the Mexican capital.

Angel Iturbide, a son of the ex-Emperor, died at Mexico on the same day as Juarez, leaving a widow and one son.

President Lerdo issued a decree of general amnesty to all political prisoners, save those having held the rank of lieutenant-general under the empire of Maximilian. He likewise voluntarily ordered an investigation of the outrages committed on American citizens in Chiapas.

A commission was appointed by the United States Government to inquire into the cause and nature of the excesses committed on the American frontier by Mexican soldiery. At a meeting which took place, August 1st, at Brownsville, Texas, the following facts were elicited: That Cortina had been sent to the Rio Grande with full power, and the civil authorities were powerless under him. Palacios, the military commander at Matamoras, acknowledged last year the fact of serious depredations, but was overridden by Cortina. Juarez was fully aware of the studied misconduct of Cortina, and of his feeding his troops on stolen beef, taking stolen herds from civil authorities without accountability. Seven herds had been sold in Camargo, and the proceeds applied to school funds of the Mexican Government. Civil law was a mere farce. Cortina's regular soldiers were receiving cattle on the Mexican side, and organized agents of Cortina were driving cattle to the bank, there to receive the assistance of the soldiers in crossing. Eighty miles of a rich frontier were vacant under the scourge of the Kickapoos. Texan rancheros were obliged to fortify and barricade. Well-known brands of cattle had been and were still sent into the interior, and others sold openly in Camargo. Cortina himself had been seen in the corral receiving stolen herds, and selling the hides and beef, and pocketing the money. Cortina became suddenly rich by the robbery of several well-stocked ranches; he had at that time \$300,000 deposited in England. Full copies of the official reports were in Juarez's possession, including the acknowledgment of General Palacios of the disgraceful implication of agents of the Mexican

Government. It was in evidence that the cattle crossed over the river near Brownsville and stolen from American citizens numbered 60,000, and were valued at \$1,000,000. Custom-house inspectors testified that they had distinctly recognized officers in Cortina's army directing the operations. Herds of cattle, to the number of from 4,000 to 6,000, had been hurried across the river in open daylight. Cattle had been driven three days without rest, to reach the river, and 1,000 perished in the sand. On one occasion the thieves picketed the road, and made passing travellers assist them in crossing the cattle.

Early in the same month the revolutionary chiefs began to lay down arms and accept of amnesty. Negrete, Aravarrite, José Postillo, Mariano, and Gonzáles, were the first to take the step, and their example was immediately followed by all the others, except Garcia de la Cadena, who, holding out defiantly, was captured, and sent a prisoner to Trinidad. As a member of Congress, he was tried by that body, who acquitted him, and restored him to his seat. Martial law was revoked in the States of Zacatecas, Tlaxcala, San Luis, Puebla, and Hidalgo, and the State governments restored to their full powers.

Efforts were made to organize Juarez's supporters at the last presidential election into a political party, entitled "Radical Reformers." Ex-Governor Baez was mentioned as their candidate. Juan José Baez was also prominently spoken of as another candidate.

All the formalities attending the concession granted to Colonel Lever for establishing a steamship-line from the Gulf ports to New Orleans were completed, and a commissioner proceeded to New York to organize the service immediately.

A fire which occurred in Mexico City in August, and destroyed the palace of the National Congress, was caused by the negligence of a tinsmith while repairing the roof. The powder and other explosive and inflammable materials stored in the building were removed the moment the fire was discovered. The archives of the Congress were saved. The utter uselessness of the fire-engines made it impossible to stay the progress of the flames, and they were not extinguished until there was nothing left of the palace for them to feed upon.

It was reported that the historic sword of General Iturbide, the hilt of which was thickly studded with diamonds and other precious stones, was stolen in the confusion incident to the fire.

The death of President Juarez was made the occasion by the masonic fraternity for holding a Lodge of Sorrow in the Iturbide Theatre, where, on the centre of the stage, was raised a heavily-draped catafalque. The ceremonies were of a very imposing character, and were witnessed by a large concourse of citizens. President Lerdo and other high dignitaries of the state and municipality were pres-

ent, and ladies dressed in deep mourning filled the boxes.

The soldiers of the regular army, stationed at Guanajuato, mutinied, assassinated their commandant, and robbed the public treasury of \$50,000.

Florez, the federal Governor of Sinaloa, while riding in the suburbs of Mazatlan, was seized by a gang of kidnappers, composed of late rebel soldiers, and carried into the mountains. A large ransom was demanded for his release.

The election for President took place November 1st, and resulted in the almost unanimous choice of Lerdo de Tejada; the votes against him were few and scattering.

Porfirio Diaz sent in his own submission to the government, and the surrender of the forces under his command. The paper was dated October 23d, near Durango, and the general promised to present himself at the capital. With this act the pacification of the republic was complete.

Señors Mendoza, Bliss, and Manfred, were appointed by the Geographical Society to visit the Pyramids of Teotihuacan.

An Italian journal is to be published in the city of Mexico.

The railroad war continues rife.

The supporters of General Rosecrans were ready to furnish the security necessary to insure the completion of their road, and promised to begin work immediately.

A heated discussion took place in Congress between the advocates of the rival roads. Private correspondence represents that the friends of the plan urged by General Rosecrans were hopeful that they would be ultimately successful. The road projected by Mr. Plumb seemed to be preferred, because it will make a direct line to the United States and will be a broad-gauge road.

Congress intended granting a subvention to the line of steamers proposed to be run between New Orleans and Mexican ports.

Astonishment was manifested at the persistency of the new President in retaining in high office the appointees of the late President Juarez.

Señor Rojo, the new President of Congress, is a Juarist, and Señor Zamacona, the new Vice-President, an adherent of General Porfirio Diaz.

The sacrificial stone of the Aztecs was removed to the National Museum.

President Lerdo's inauguration took place on December 1st.

The President contracted a loan of \$1,000,000, the first instance of the Government enjoying credit for a long time.

Mr. Nelson, the American minister to the republic, speaks in enthusiastic terms of the agricultural resources of Mexico. "It can," he says, "supply the world with sugar of a quality superior to that of Cuba." Its coffee is unsurpassed in quality and in the quantity

which can be raised; while the article of tobacco, if not equal to that raised in Cuba, closely approximates it. That the needs of Mexico heretofore mostly supplied from Europe will, at no distant day, be obtained in the United States, for which will be returned the articles mentioned, Mr. Nelson regards as certain. In commenting upon the development of Mexico, Mr. Nelson places railroads as the first among her great needs. This is especially the case, from the entire absence of navigable rivers throughout her borders. The incipient step in the supplying of this need is the completion of the railroad from Vera Cruz to Mexico, which will be followed by the speedy construction of others of great importance, some of which are already begun.

Mr. Nelson regards the relations between the two republics as very satisfactory. The Lerdo Administration is desirous to remove all cause of complaint on the Rio Grande, and has dispatched thither Señor Don Emilio Jalasco, an able lawyer and statesman, long a resident upon both sides of that river, and thoroughly acquainted with the people, to investigate and report upon the alleged depredations, with a view to putting a stop to them.

Evidences of the vast mineral wealth of Mexico are becoming manifest from day to day.

MICHIGAN. The result of the November election in this State was as follows: For Grant, 188,808; Greeley, 78,651; O'Connor, 2,878; Black, 1,278. Grant over Greeley, 60,157. This includes two counties the vote in which was not received in time for the official canvass. On Governor, the vote was: For John J. Bagley, Republican, 189,259; Austin Blair, Liberal, 82,149; William M. Ferry, Democrat, 2,732; Henry Fish, Temperance, 1,232. Bagley over Blair, 57,110. The following persons, all Republicans, were chosen to the several State offices named, by majorities varying but slightly from that of the Governor: Henry H. Holt, Lieutenant-Governor, over John O. Blanchard, Democrat and Liberal; Daniel Striker, Secretary of State, over George H. House; Victory P. Collier, Treasurer, over James A. Hollow; William Humphrey, Auditor-General, over Neal O'Hearn; Byron D. Ball, Attorney-General, over D. Darwin Hughes; Leverett A. Clapp, Commissioner of the State Land-Office, over G. H. Murdoch; Daniel B. Briggs, Superintendent of Public Instruction, over Willard Stearns; Edward Dorsch, member of State Board of Education, over E. Feldner. The proceedings of the nominating conventions have failed to reach us.

At the same time three constitutional amendments were voted upon. The first was to authorize municipalities, that had issued bonds in aid of railroads, to provide for their payment. This was voted down: yeas, 44,684; nays, 70,893.

The second proposed to increase the salaries of circuit judges from \$1,500 to \$2,000.

This was voted down: yeas, 57,326; nays, 58,987.

The third was to limit the number of judicial circuits to ten. This also was not adopted: yeas, 47,972; nays, 65,848.

The salt manufactured and inspected in the State for the year was 724,481 barrels, being a slight decrease as compared with the preceding year. All of this was manufactured in the Saginaw Valley, except 30,615 barrels, made in Huron County, and 792 barrels made in Macomb County. The manufacture was also begun at East Tawas, and will be continued the succeeding year. Dr. S. S. Garrigues, the State Inspector, says, in his annual report: "From all points reached by Michigan salt, we are having the most favorable reports of its quality, and it is rapidly taking the precedence in all the markets of the West." Rock-salt is reached at White Rock, in Huron County, at a depth of 1,700 feet, and at Alpena at a depth of 1,130 feet, and the brine from this is purer and stronger than that now used in manufacture on the Saginaw.

Messrs. Lewis & Headley, in their annual statement of the business of Saginaw Valley, make the following estimate of pine-lumber cut in the State for the year—that part relating to Western Michigan being taken from the *Muskegon News and Reporter*:

	Feet.	Fet.
Saginaw Valley and Huron Shore	874,169,480	
Genesee County.....	114,000,000	
Lapeer County.....	84,500,000	
Huron County.....	49,000,000	
St. Clair County.....	52,000,000	
Sanilac County.....	19,000,000	
Detroit.....	37,500,000	
Miscellaneous in Eastern Michigan.....	35,000,000	
Total in Eastern Michigan.....	1,215,169,480	
Muskegon County.....	407,338,747	
Manistee County.....	161,900,000	
Mason County.....	74,000,000	
Ottawa County.....	95,000,000	
Oceana County.....	40,000,000	
Grand Traverse, St. Joseph, etc.	95,000,000	
Menominee County.....	126,115,360	
Miscellaneous in Western Michigan.....	40,000,000	
Total in Western Michigan.....	1,049,353,107	
Total in the State.....	2,264,522,587	

This is exclusive of shingles, lath, square timber, etc. The most diverse estimates are made of the probable continuance of the supply of pine-timber; some intelligent parties considering it incapable of exhaustion for a long period, while others believe it will soon disappear. One important change in the mode of bringing the logs to market is introduced by the extension of railroads. Formerly the logs were hauled to streams, and then floated down to the mills with the spring floods; and in a dry season they might lie over for want of water to float them. Now, where railroads are convenient, they are transported to the mills on cars.

The production of copper for the year was: in Houghton County, 12,543 tons; Keweenaw

County, 1,916; Ontonagon, 797—total, 15,166 tons. Over 905 tons less than in 1871.

Assessments were made by copper-mining companies in 1872 amounting to \$190,000, and dividends amounting to \$3,390,000. The following is given as an approximate statement of ingot-copper produced, and its value:

YEAR.	Tons.	Value.
1845 to 1858.....	13,955	\$9,000,500
1858.....	3,500	1,886,000
1859.....	3,500	1,890,000
1860.....	4,800	2,610,000
1861.....	6,000	3,387,500
1862.....	8,000	3,402,000
1863.....	6,500	4,480,000
1864.....	6,500	6,110,000
1865.....	7,000	5,145,000
1866.....	7,000	4,760,000
1867.....	6,300	4,140,000
1868.....	9,985	4,598,000
1869.....	12,300	5,365,000
1870.....	12,945	5,698,940
1871.....	12,857	6,171,560
1872.....	12,182	7,774,790
Total.....	185,975	\$76,806,890

The following table shows the growth of the iron production in the Lake Superior iron-region, as given in the *Marquette Mining Journal*:

YEAR.	Tons Iron-Ore.	Pig-Iron.	Total Value.
1856.....	700	\$38,000
1857.....	21,000	60,000
1858.....	31,035	1,639	249,302
1859.....	65,679	7,258	575,539
1860.....	116,908	5,690	736,496
1861.....	45,430	7,973	419,501
1862.....	116,731	8,590	964,977
1863.....	185,267	9,813	1,416,985
1864.....	235,123	12,832	1,897,215
1865.....	196,266	12,268	1,590,430
1866.....	296,973	18,437	2,406,960
1867.....	466,076	30,911	3,473,620
1868.....	507,818	38,246	3,992,413
1869.....	633,238	36,203	4,968,435
1870.....	856,471	49,296	6,300,170
1871.....	813,379	51,225	6,115,695
1872.....	952,065	62,195	9,188,055
Total.....	5,537,973	287,680	\$44,373,883

Auditor-General William Humphrey makes the following exhibit of the State finances. The financial period covers the twelve months closing September 30, 1872. During this period the financial transactions were as follows:

Gross receipts to the State Treasury.....	\$2,181,498 22
Add balance in Treasury October 1, 1871....	694,122 66
Total in Treasury during twelve months	\$2,875,620 88
Gross expenditures from State Treasury....	1,898,396 85
Balance in Treasury, September 30, 1872,	\$977,224 03
The gross Treasury receipts are stated above at.....	\$2,181,498 22
Which cover the price of State swamp-lands expended during the period for the construction of swamp-land State roads, being (net cash).....	\$363,975 73
Amounts of expenditures recovered (not cash).....	400 46
Giving for cash receipts.....	\$1,915,122 01
Of the cash, there was paid into the State Treasury, in trust.....	666,040 58
Leaving for net cash revenue receipts..	\$1,249,081 43

And these net cash general revenue receipts were from the sources and of the amounts as follows:

From specific taxes.....	\$340,326 75
From trust funds (sale of lands).....	227,683 84
From direct taxes.....	577,117 95
From miscellaneous sources.....	\$45,111 39
Reimbursed by United States (war expenses).....	58,892 00
Total, as above.....	\$1,249,081 43

The general revenue receipts (net cash) were through the following funds:

From the General Fund.....	\$619,948 99
From the Specific Tax Fund.....	340,326 75
From the Internal Improvement Fund.....	840 00
From the University Fund.....	5,521 40
From the Normal School Fund.....	419 67
From the Primary School Fund.....	154,697 59
From the five per cent. Primary School Fund.....	33,447 39
From the Agricultural College Fund.....	33,447 39
From the war expenses—reimbursed by United States.....	58,892 00
From escheats.....	100 00
Sale of ordnance and stores.....	1,440 85
Total.....	\$1,249,081 43

The cash receipts in trust were through funds as follows:

Through the General Fund.....	\$495,481 53
Through the Educational Funds, Through the Educational Interest Funds.....	574 84
Through the St. Mary's Falls Ship-Canal Fund.....	63,252 70
Through the Swamp-land Interest Fund.....	30,923 30
Through the Swamp-land Fund.....	4,004 96
Through the Asylum Fund.....	33,556 04
Through the State Building Fund.....	2,384 71
Through the Internal Improvement Fund.....	1,747 12
Through the Sundry Deposits.....	14,356 74
Through the Specific Tax Fund.....	963 87
Total.....	\$666,040 58

As above stated, the gross expenditures were for the fiscal period.....	\$1,898,396 85
Which covered of swamp-land warrants.....	\$365,995 75
And rent recovered.....	250 00
Total.....	\$266,225 75

Leaving for cash expenditures..... \$1,632,171 10

There was expended, of cash in trust..... 608,559 89

Giving for amount expended from revenue proper..... \$1,023,611 21

The cash expenditures from revenue proper were through the several funds as follows:

Through the General Fund.....	\$515,572 68
Through the Primary School Interest Fund.....	137,401 79
Through the University Interest Fund.....	30,038 70
Through the Normal School Interest Fund.....	22,370 52
Through the Agricultural College Interest Fund.....	3,551 99
Through the University Aid Fund.....	15,000 00
Through the Asylum Fund.....	184,976 74
Through the Two Million Loan Sinking Fund.....	112,000 00
Through the War Fund.....	32,915 00
Through the State Building Fund.....	11,298 82
Through the Military Fund.....	9,189 97
Through the Soldiers' Aid Fund.....	4,000 00
Total.....	\$1,023,611 21

The purposes of the above expenditures were the following:

Salaries of State officers, deputies, and principal clerks.....	\$38,687 86
Salaries of extra clerks.....	25,091 12
Awards of Board of State Auditors.....	118,957 86
Salaries and expenses of Judiciary.....	\$182,706 84
Expenses—Bureau of Insurance.....	45,788 94
Trustees of Asylums.....	431 49
Inspectors of State Prisons.....	1,111 20
Coroners' fees.....	1,416 11
Wolf bounties.....	88 00
Advertising State salt-spring lands.....	14 50
Military expenses.....	\$9,189 97
Relief to Soldiers.....	4,000 00
Bounties to Soldiers.....	750 00
Interest upon Bonded Debt.....	\$187,666 30
Interest upon Trust Funds.....	112,000 00
Paid principal of bonded Debt.....	331,039 20
General Fund Appropriations.....	112,000 00
Asylum Fund Appropriations.....	\$173,771 95
State Building Fund Appropriations.....	134,976 74
University Aid Appropriation.....	11,233 83
	15,000 00
	335,042 51

Aggregate, as above..... \$1,023,611 31

The cash expenditures, in trust, were through the several funds as follows:

Through the General Fund.....	\$495,481 53
Through the Internal Improvement Fund.....	16,971 83
Through the Canal Fund.....	6,619 88
Through the Swamp-land Fund.....	5,635 25
Through the Swamp-land Interest Fund.....	52 88
Through the Educational Funds.....	574 54
Through the Educational Interest Funds.....	63,252 70
Through the Asylum Fund.....	3,334 71
Through the State Building Fund.....	10,461 63
Through sundry deposit accounts.....	1,125 01

Total.....	\$608,559 89
The bonded State debt, September 30, 1871, was.....	\$2,355,392 73
Of which there was paid prior to September 30, 1872.....	112,000 00

Giving for amount of debt at last date.....	\$2,243,392 73
Of this amount there becomes due, January 1, 1873.....	\$370,000 00
The credit balance of the two-million loan sinking fund, September 30, 1871, was.....	\$608,315 73
To which was added, during the fiscal period.....	323,457 45

Available during period.....	\$930,773 23
From which there was expended in the purchase of bonds of this State.....	112,000 00

Leaving a credit balance, September 30, 1872, of.....	\$818,773 23
In addition to the above indebtedness is the canal loan, the payment of which is guaranteed by the State—of.....	\$81,000 00
Pledged to the redemption of this loan stands the surplus earnings of the canal, amounting, on September 30th, to.....	64,654 99

Leaving unprovided for but.....	\$16,345 01
The canal loan matures July 1, 1879.	

The State tax for the year was of amounts and for purposes as set forth in the following:

Military Fund.....	\$37,976 05
University Aid.....	15,000 00
University Buildings.....	37,500 00
Reform School.....	35,000 00
Asylum for the Insane.....	152,000 00
Institution for Deaf, Dumb, and Blind.....	47,500 00
General purposes.....	300,000 00
State Public School (charitable).....	15,000 00
New Capitol.....	200,000 00
Total.....	\$829,976 05

Mr. Cortlandt B. Stebbins, Deputy Superintendent of Public Instruction, gives the following statistics from that office: Number of organized counties in the State, 70; number of townships and cities, 902; number of school districts, 5,375; districts having no school, 50; children between the age of five and twenty, 404,972; children between the age of eight and fourteen subject to the law for compulsory attendance, 174,934; average time public schools were taught, seven and a half months; number of male teachers, 3,035; number of female teachers, 8,624—such of these as taught in two different districts are counted twice; the number teaching at any one time was a little over 7,000. Average monthly wages of male teachers, \$49.11; of female, \$26.72. Total wages paid male teachers, \$639,282; female, \$1,020,944; total to both, \$1,660,226. Number of school-houses, 5,418; value, \$7,470,339. Number of volumes in school libraries, 158,025. The primary-school receipts were as follows:

On hand at beginning of year.....	\$530,220 22
Received from two-mill State tax.....	421,971 29
Received from primary school fund.....	187,253 64
Received from foreign scholars.....	23,530 47
Received from district taxes.....	1,977,739 96
Received from tax on dogs.....	23,573 65
Received from fines.....	20,222 77
Received from all other sources.....	455,717 17

Total resources for the year.....	\$3,675,630 30
Total expenditures.....	3,115,417 30

On hand at end of year.....	\$560,222 00
Indebtedness of districts.....	\$1,234,896 35

The cost of schools per month for each child between the ages of five and twenty, was, for teachers, 55 cents; for all expenses, 99 cents.

The educational funds are as follows: Primary-school fund, mostly drawing interest at 7 per cent., \$2,775,561.16; University fund, drawing 7 per cent., \$542,794.49; Normal School fund, drawing 6 per cent., \$69,284.54; Agricultural College fund, drawing 7 per cent., \$154,968.21. The University and Normal School funds have reached their maximum; the primary-school fund will probably be increased \$1,500,000, and the Agricultural College fund will reach \$700,000.

The following are statistics of the higher institutions of learning: State University—Professors and teachers, 38; students in academic department, 517; in medical, 854; in law, 853; total (64 ladies), 1,224; degrees conferred, 341. Agricultural College—Professors and teachers, 10; students (4 ladies), 131. State Normal School—Instructors, 10; students, 446. Hillsdale College—Professors and teachers, 15; students, 606. Kalamazoo College—Professors and teachers, 10; students, 247; Olivet College—Professors and teachers, 13; students, 307. From Adrian College and Albion College reports have not been received.

The earnings of the State-prison for the year were \$89,396.01. Current expenses, \$89,122.57. Convicts in prison at beginning of year, 627; received, 222; discharged by expiration of sentence, 230; by reversal of sen-

tence, 2; on pardon, 15; died, 7; escaped, 6. Total remaining, 589; decrease, 88. Average expense of convicts per annum, \$48.31; per day, 13 $\frac{2}{3}$ cents. The sentences for the year were for the following offences: Arson, 8; adultery, 5; abduction, 1; felonious attempts, 2; felonious assaults, 14; bigamy, 5; burglary, 38; burning buildings to defraud insurance companies, 2; breaking jail, 1; embezzlement, 2; forgery, 15; false pretences, 9; fraudulent disposition of property, 1; incest, 2; larceny, 95; malicious trespass, 1; manslaughter, 2; murder, 3; murder in second degree, 4; rape, 4; receiving stolen property, 1; robbery, 6; resisting officer, 2; seduction, 3. Of the sentences, 54 were one year or less, 55 were over one and not exceeding two, 52 were over two and not exceeding three, 81 were over three and not exceeding five, 9 were over five and not exceeding eight, 8 were ten years, 8 were fifteen years, 1 was seventeen years, 2 were twenty years, 3 were twenty-five years, 1 was thirty years, and 8 for life; 28 were on second convictions, and one on a fifth conviction. The agent reports general good behavior among the convicts, with mild treatment and few punishments. The convicts have been encouraged to give up tobacco, and accept popular magazines instead, and the most of them have voluntarily done so.

The regular session of the Legislature not occurring this year, a special session was called for the purposes of the congressional appointment. But little other legislation was had. April 11th, the Senate met as a court of impeachment to try Charles A. Edmonds, Commissioner of the State Land-Office, on articles preferred by the House of Representatives. The substance of the several articles was as follows:

ARTICLE 1. Corruptly withholding lands from sale for pecuniary considerations to himself, his deputy and clerks.

ART. 2. Corruptly, by himself and with his deputy and clerks, engaging in the purchase of lands from the State, contrary to law.

ART. 3. Corruptly and for pecuniary gain to himself, his deputy and clerks, deciding that certain licensed lands were subject to sale without the proofs required by law, thereby perpetrating a gross fraud upon the persons to whom licenses had been issued.

ART. 4. Unlawfully conspiring with certain persons to withhold from sale, for the benefit of the conspirators, and mark as sold, large quantities of State lands.

ART. 5. Engaging in the purchase and sale of swamp-land scrip, to the prejudice of the primary school fund.

ART. 6. Appointing and keeping in office clerks of dissolute habits and character, and allowing them, in violation of law, to deal in State lands, and to have advantages in his office over other purchasers.

ART. 7. Receiving payment for State lands in current money, and entering the lands on the books of his office as paid for in depreciated scrip, and accounting for the purchases accordingly.

ART. 8. Publishing and circulating an obscene paper, with criminal intent.

ART. 9. Sending an obscene paper through the mails, with like intent.

ART. 10. Making himself intoxicated at the seat of government and elsewhere.

ART. 11. Committing adultery.

Ira R. Grosvenor, Lyman Cochrane, and B. W. Huston, Jr., appeared as managers of the impeachment on the part of the House, and John B. Shipman and Jonas H. McGowan acted as counsel for the defendant. The trial lasted until the 24th day of May, when the Senate proceeded to vote on the several articles with the following result:

Article 1, guilty, 16; not guilty, 11. Art. 2, guilty, 4; not guilty, 28. Art. 3, guilty, 12; not guilty, 15. Art. 4, guilty, 0; not guilty, 27. Art. 5, guilty, 8; not guilty, 19. Art. 6, guilty, 16; not guilty, 11. Art. 7, guilty, 1; not guilty, 26. Art. 8, guilty, 14; not guilty, 18. Art. 9, guilty, 8; not guilty, 19. Art. 10, guilty, 0; not guilty, 27. Art. 11, guilty, 1; not guilty, 26.

Two-thirds not having pronounced the respondent guilty on any one of the charges, he was declared acquitted on all, and the court adjourned without day.

According to the census of 1870, of the total population (878,768) ten years old and over, there were engaged in all classes of occupations, 404,164 persons, of whom 346,717 were males, and 57,447 females. There were engaged in agriculture, 187,211, including 187,086 males, and 75 females; in professional and personal services, 104,728, including 52,754 males, and 51,974 females; in trade and transportation, 29,588, including 29,498 males, and 95 females; in manufactures, and mechanical and mining industries, 82,687, including 77,484 males and 5,203 females.

The State contained 5,096,939 acres of improved land, 4,080,146 of woodland, and 842,057 of other unimproved land. The cash value of farms was \$398,240,578; of farming implements and machinery, \$13,711,979; total amount of wages paid during the year, including value of board, \$8,421,161; total (estimated) value of all farm-productions, including betterments and additions to stock, \$81,508,628; orchard-products, \$3,447,985; produce of market-gardens, \$352,656; forest-products, \$2,559,682; value of home manufactures, \$338,008; of animals slaughtered or sold for slaughter, \$11,711,624; of all live-stock, \$49,809,869. There were 228,302 horses, 2,353 mules and asses, 250,859 milch-cows, 36,499 working-oxen, 260,171 other cattle, 1,985,906 sheep, and 417,811 swine. The chief productions were, 268,810 bushels of spring, and 15,996,968 of winter, wheat, 144,508 of rye, 14,086,288 of Indian-corn, 8,954,466 of oats, 834,558 of barley, 436,755 of buckwheat, 5,885 pounds of tobacco, 8,726,145 of wool, 849,865 bushels of peas and beans, 10,318,799 of Irish, and 3,651 of sweet, potatoes, 21,882 gallons of wine, 24,400,185 pounds of butter, 670,804 of cheese, 15,284,057 gallons of milk sold, 597,455 tons of hay, 252 bushels of clover-seed, 464 of grass seed, 828,269 pounds of hops, 240,110 of flax,

and 5,528 bushels of flax-seed, 1,781,855 pounds of maple-sugar, 94,686 gallons of sorghum, and 23,637 of maple, molasses, 280,325 pounds of honey, and 14,571 of wax.

The total number of manufacturing establishments was 9,455, using 2,215-steam-engines of 70,956 horse-power, and 1,500 water-wheels of 34,895 horse-power, and employing 63,694 hands, of whom 58,347 were males above sixteen, 2,941 females above fifteen, and 2,406 youth. The total amount of capital invested was \$71,712,283; wages paid during the year, \$21,205,355; value of materials consumed, \$68,142,515; and of products, \$118,394,676.

The whole number of newspapers and periodicals was 211, having an aggregate circulation of 253,774, and issuing annually 19,636,978 copies. There were 16 daily, with a circulation of 27,485; 3 tri-weekly, circulation 5,000; 174 weekly, circulation 192,839; 2 semi-monthly, circulation 1,800; 16 monthly, circulation 27,100.

There were 26,763 libraries, having 2,174,744 volumes. Of these, 23,761, with 1,596,113 volumes, were private, and 3,002, with 578,631 volumes, were other than private, including 116 circulating libraries, with 53,704 volumes.

The total number of religious organizations was 2,289, having 1,415 edifices, with 456,226 sittings, and property valued at \$9,183,816. The leading denominations were:

DENOMINATIONS.	Organizations.	Sittings.
Baptist	366	74,100
Congregational	156	88,321
Episcopal	103	26,750
Lutheran	95	23,150
Methodist	664	140,290
Presbyterian	187	49,625
Roman Catholic	167	62,921
United Brethren in Christ	69	4,325

The condition of pauperism and crime is shown by the following statistics:

Total population	1,134,059
Number of persons receiving support during the year ending June 1, 1870	3,151
Cost of annual support	\$369,693
Total number receiving support, June 1, 1870	2,042
Native	853
White	708
Colored	85
Foreign	1,189
Number of persons convicted during the year, 1870	835
Total number of persons in prison, June 1, 1870	1,095
Native	679
White	617
Colored	63
Foreign	416

MINNESOTA. The last session of the Minnesota Legislature, which began on the 2d of January, continued until the 1st of March. In accordance with the recommendation of Governor Austin, four amendments to the State constitution were submitted to a vote of the people, to be taken at the next general election. The first authorized an increase of the public debt, for the purpose of completing the Hospital for the Insane, the Deaf, Dumb, and Blind Institute, and the State-prison. The existing constitution forbade the contrac-

tion of a public debt exceeding \$250,000, while the institutions named were all left in an uncompleted condition for want of funds. The second proposed amendment limited the liabilities of stockholders in corporations, organized for the purpose of carrying on manufacturing or mechanical business, to the amount of stock held or owned by them. The third prohibited any county, city, or other municipal corporation, from issuing bonds or becoming indebted in any manner to aid in the construction or equipment of railroads to any amount that shall exceed 10 per centum of the taxable property within the corporation. The fourth authorized the sale of the internal improvement lands in the manner provided for the sale of the school lands, the proceeds not to be appropriated to any purpose whatever until the enactment for that purpose shall have been approved by a vote of the people.

The vote on the first, third, and fourth of these propositions was canvassed, and their adoption proclaimed before the end of the year, but the result on the second had not been announced, although it was understood to have been adopted.

A general insurance law was enacted, which provides for the appointment of an insurance commissioner by the Governor, with the consent of the Senate, who is charged with seeing that the various provisions of the act are carried out. It contains stringent regulations for ascertaining the condition of all corporations engaged in the business of insurance, and holding them to a strict responsibility.

An act was also passed establishing a State Board of Health, consisting of seven physicians appointed by the Governor from different sections of the State, who are required to make sanitary investigations, and collect and disseminate information concerning the causes of disease, and the effects of localities, occupations, etc., on the general health. They are required to "devise some scheme whereby medical and vital statistics of sanitary value may be obtained, and act as an advisory Board to the State in all hygienic and medical matters, especially such as relate to the location, construction, sewerage, and administration of prisons, hospitals, asylums, and other public institutions." They are required to hold regular meetings at least once in three months, and to make an annual report to the Legislature of "their doings, investigations, and discoveries, with such suggestions as to legislative action as they may deem proper." They are also charged with all matters pertaining to quarantine, and authorized to "enact and enforce such measures as may be necessary to the public health."

The law relating to the sale of intoxicating liquors was amended, so as to incorporate the following provision:

It shall be unlawful for any person to sell, give, barter, furnish, or dispose of in any manner, either directly or indirectly, any spirituous, vinous, fer-

mented or malt liquors in any quantity whatsoever, to any minor person, pupil or student in any public school, seminary, academy, or other institution of learning, within this State, or to any intemperate person or habitual drunkard; and any person violating any of the provisions of this section shall be guilty of a misdemeanor, and on conviction thereof, by any court having jurisdiction, shall be punished by fine of not less than fifty nor more than one hundred dollars, or by imprisonment in the county jail, not less than thirty nor more than ninety days, or until such fine is paid; and if any person so convicted holds a license for the sale of such liquors, said license from and after the date of such conviction shall be null and void in addition to the penalties hereinbefore provided, and no license granted in accordance with the provisions of this chapter, or the provisions of any city or village charter, ordinance, or by-law, shall be construed so as to authorize the sale of any of the liquors aforesaid, to the classes of persons named in this section.

Provision was also made for a thorough geological and natural history survey of the State, to be carried on under the supervision of the regents of the State University, who shall cause a report of progress to be made on or before the second Tuesday of December in each year. The survey is to include investigations into the geology, mineralogy, botany, and zoology of the State; and maps, charts, specimens, and whatever else may illustrate the subject, are to be duly collected and kept for inspection at the university.

The appropriations made by the Legislature were as follows:

Legislative.....	\$65,000 00
Executive—salaries.....	30,091 11
Executive—contingent.....	7,750 00
Judicial.....	38,850 00
Public printing.....	27,600 00
State institutions.....	250,766 76
Miscellaneous.....	90,816 90
War claims.....	1,362 50

Grand total.....\$511,737 27

The Supreme Court of the State in October rendered a decision affirming the legality of taxes levied to pay the interest and principal of bonds issued by the city of St. Paul to aid in the construction of the Lake Superior & Mississippi Railroad.

The financial condition of the State is reported as satisfactory. The public debt, which, at the beginning of the year was \$350,000, has been reduced to \$250,000, which is entirely invested in bonds, due to the school-fund. On the 30th of November, 1871, there was a surplus in the Treasury of \$196,180.87, and the receipts during the fiscal year amounted to \$783,481.28, making the available funds for the year \$979,661.65. The disbursements, during the same period, amounted to \$736,361.59, leaving a balance at the close of the year of \$243,300.06. The estimated receipts for 1873, including this surplus, are \$618,022, while the expenditures are estimated at \$505,350. The assessed valuation of property in the State is \$102,373,826, an increase of \$16,000,000 in two years.

The common-school fund of Minnesota now amounts to \$2,780,559.35, which has been

wholly created in the last twelve years from the sale of lands granted by the General Government, being one-eighteenth of all the public lands of the State. If the remainder is disposed of to as good advantage as that already sold, the school-fund will be raised ultimately from this source to \$15,000,000. The amount derived from this fund during the past year was \$162,264, while \$791,918.96 was raised by taxation for the support of schools. The total amount received for this object was \$954,182.96, and the total expenditures amounted to \$990,936.08. There are 180,000 children of school-age in the State, 120,000, or 67 per cent., of whom attended the public schools during the year, and 5,000, or 8 per cent., attended private schools, leaving 30 per cent. who did not attend school at all. The number of teachers employed was 4,712, of whom 3,056 were females and 1,656 males. The average wages of teachers per month was \$37.89. During the year 229 new school-houses were built, at an aggregate cost of \$150,155.62.

There are three normal schools in the State, located at Winona, Mankato, and St. Cloud. These graduated 71 teachers during the year, 29 of whom were graduated at Winona, 22 at Mankato, and 20 at St. Cloud. The cost of supporting these institutions was \$24,980.20. The State University, which was founded in 1851, and reorganized in 1867, has a rich endowment of public lands, amounting in all to 202,083 acres, the minimum estimated value of which is \$920,000. Of this only about 86,000 acres have been sold, and the permanent fund now amounts to but \$119,765.74. The university is under the government of a Board of Regents, of which the Governor and Superintendent of Public Instruction are members *ex officio*. On the reorganization of the institution five departments were established, namely, a Department of Elementary Instruction; a College of Science, Literature, and Art; a College of Agriculture and the Mechanic Arts; a Department of Medicine, and a Department of Law.

Considerable progress has been made toward rendering the various departments efficient, but the need of greater resources is severely felt. The number of students in attendance during the year was 245. This institution is absolutely free to all who pass the required preliminary examinations.

The railroad system of Minnesota was begun in 1862, and at the end of 1872 there were 1,906 miles of road completed, equipped, and in successful operation, 856 miles having been built and equipped during the year. The companies have very generally disregarded the legislation of the last two years concerning the rate of the tariff on freights, and suits have been brought against the Winona & St. Peter Railroad Company for violations of law, which are still pending in the Supreme Court. Commissioners appointed by the Secretary of the

Interior to examine the completed road and telegraph-line of the Northern Pacific Railroad Company, from its junction with the Lake Superior & Mississippi Railroad near Thomson, to the Red River of the North, made a favorable report in December.

A convention of the Republican party of the State was held at Minneapolis, on the 8th of May, for the appointment of delegates to the national nominating body, and the nomination of a State Auditor, Clerk of the Supreme Court, and presidential electors. O. P. Whitcomb was nominated for Auditor, and Sherwood Hough for Clerk of the Supreme Court, and the following platform was adopted:

The Republicans of Minnesota, in State Convention assembled, make the following declaration:

1. The Republican party of the United States had its origin in the necessities of the nation, and since it came into power has decreed and executed measures by which liberty has been preserved and the Union saved from dismemberment and overthrow. Since the close of the rebellion it has substantially accomplished the work of complete reconstruction, and freedom and equal rights have been secured to all our people by irrevocable guarantees. In this great work the Republican party has shown its wisdom and patriotism; and by its unswerving good faith toward the nation's creditors it has fully vindicated our national honor and integrity.

2. With such a record, unequalled by that of any other political party known to history, it can proudly challenge the confidence of the people, and we declare that the best interests of the country demand that the Republican party should continue to administer the government.

3. We renew our expressions of confidence in the present administration of the General Government. Since it came into power the taxes upon the people have been reduced, and the public revenue faithfully collected and honestly applied, so that the burden of taxation has been very materially diminished both in the amount of principal and rate of interest. The Ku-klux disorders and violent persecutions of loyal citizens in the South have been suppressed in a prompt and efficient manner, meeting the approval of every friend of justice. The liberal system of pensions and bounties provided for our brave soldiers and sailors, and the homes founded and maintained for such as were disabled in the service of the country, are referred to with pride and satisfaction. The administration of President Grant, as illustrated by his philanthropic management of Indian affairs, by his efforts to reform the civil service, and purify the same, and by his management of our foreign relations, has exhibited rare humanity, wisdom, courage, and dignity, which fully entitles it to the continued confidence and support of every patriot.

4. The Republican party of Minnesota, reposing implicit trust in the integrity, faithfulness, and patriotism of President Grant, would therefore request the delegates representing Minnesota in the National Republican Convention to be held next June, in Philadelphia, to cast their votes and exert all their influence in favor of his renomination for a second term, and also for the renomination of Vice-President Colfax, who has proved himself eminently worthy of his high office.

A convention of Democrats was held at St. Paul on the 19th of June, to name delegates to the National Convention at Baltimore. Ten delegates were appointed, and were "distinctly instructed to vote for and use all honorable

endeavors to confirm the nominees of the Cincinnati Convention for President and Vice-President." The platform of the Cincinnati Convention was also indorsed, and declared to express "the true Democratic idea upon every living political issue of the day."

On the 2d of September, separate conventions were held by the Democrats and Liberal Republicans at St. Paul, for the purpose of unifying, if possible, on nominations for presidential electors. Committees of conference were appointed, who agreed upon a ticket afterward accepted in both conventions. Albert Scheffer was named as candidate for Auditor, and James George for Clerk of the Supreme Court. No platform was adopted, but the declaration of principles adopted at Cincinnati and reaffirmed at Baltimore was again accepted, and the two conventions then coalesced, to ratify the work of the day.

The election, which occurred on the 5th of November, resulted in the success of the Republican ticket. The whole vote cast for presidential electors was 90,920, of which 55,709 were in favor of Grant and Wilson, and 35,211 for Greeley and Brown, making the majority of the former 20,498. Republican members of Congress were also chosen in the three districts. The State government is entirely Republican, Governor Austin, chosen in 1871, holding over another year; and the Legislature consists of 30 Republicans and 11 Democrats in the Senate, and 78 Republicans and 28 Democrats in the House.

According to the census of 1870, of the total population (305,568), 10 years old and over, there were engaged in all classes of occupation 182,657 persons, of whom 121,796 were males and 10,860 females. There were engaged in agriculture, 75,157, including 74,668 males and 429 females; in professional and personal services, 28,830, including 18,920 males and 9,410 females; in trade and transportation, 10,582, including 10,559 males, and 23 females; in manufactures and mechanical and mining industries, 18,588, including 17,655 males and 933 females.

The State contained 2,322,102 acres of improved land, 1,336,299 of woodland, and 2,825,427 of other unimproved land. The cash value of farms was \$97,847,442; of farming implements and machinery, \$6,721,120; total amount of wages paid during the year, including value of board, \$4,459,201; total (estimated) value of all farm-productions, including betterments and additions to stock, \$33,446,400; orchard-products, \$15,818; produce of market-gardens, \$115,234; forest-products, \$311,528; value of home manufactures, \$174,046; of animals slaughtered or sold for slaughter, \$3,076,650; of all live-stock, \$20,118,841. There were 93,011 horses, 2,350 mules and asses, 121,467 milch-cows, 43,176 working-oxen, 145,736 other cattle, 182,343 sheep, and 148,476 swine. The chief productions were 18,789,188 bushels of spring, and

76,885 of winter, wheat, 78,088 of rye, 4,743, 117 of Indian-corn; 10,678,261 of oats, 1,032, 024 of barley, 53,438 of buckwheat, 8,247 pounds of tobacco, 401,185 of wool, 46,601 bushels of peas and beans, 1,943,063 of Irish, and 1,594 of sweet, potatoes, 1,750 gallons of wine, 9,522,010 pounds of butter, 233,977 of cheese, 208,130 gallons of milk sold, 695,053 tons of hay, 3,045 bushels of grass-seed, 828, 269 pounds of hops, 240,110 of flax and 5,528 bushels of flax-seed, 1,781,855 pounds of maple-sugar, 94,686 gallons of sorghum, and 23,637 of maple, molasses, 280,325 pounds of honey, and 14,571 of wax.

The total number of manufacturing establishments was 2,270, using 246 steam-engines of 7,085 horse-power, and 434 water-wheels of 13,054 horse-power, and employing 11,290 hands, of whom 10,892 were males above sixteen, 259 females above fifteen, and 139 youth. The total amount of capital invested was \$11, 993,729; wages paid during the year \$4,052, 837; value of materials consumed, \$13,842, 902; of products, \$23,110,700.

The whole number of newspapers and periodicals was 95, having an aggregate circulation of 110,778, and issuing annually 9,543,656 copies. There were six dailies with a circulation of 14,800; five tri-weekly, circulation 4,200; 79 weekly, circulation 79,978; five monthly, circulation 11,800.

There were 1,412 libraries, having 860,810 volumes. Of these, 825, with 200,020 volumes, were private; and 587, with 160,790 volumes, were other than private, including 23 circulating libraries, with 16,601 volumes.

The total number of religious organizations was 677, having 582 edifices, with 158,266 sittings, and property valued at \$2,401,750. The leading denominations were:

DENOMINATIONS.	Organizations.	Sittings.

MISSISSIPPI. The last session of the Mississippi Legislature began on the 8d of January and continued until the 5th of April. There was much discussion on the subject of re-

trenchment, and some earnest efforts to secure the passage of measures which should reduce the expenses of the government. A proposition, made at the outset, to reduce the compensation of members to \$4 *per diem*, was defeated. Several investigations were ordered, with a view to ascertaining wherein retrenchment could be effected, and a number of bills, which came to be designated as "reform measures," occupied a large share of attention during the session. These reduced the number of officials employed, the number of terms of courts held, and cut down salaries very generally, but most of them failed to receive the approval of the Governor. A funding act was passed, which provided that the Treasurer should issue bonds, bearing 8 per cent. interest, for the redemption of State warrants, a large amount of which had been issued from time to time without any provision for their redemption. There were generally no funds wherewith to pay them when presented at the Treasury, and they were constantly held at a discount. A tax of one-half of one mill on the dollar for the year 1872-'73, and of one and one-half mill thereafter, was to be levied on real and personal property of the State subject to taxation, for the payment of the principal and interest of these bonds. The first series is made payable on the 1st of January, 1875, and one series at the beginning of each year thereafter, until all are paid, \$150, 000 constituting a series, and a sufficient number being issued to fund all outstanding warrants. The same act provided for the collection of a tax, for general purposes, of seven-tenths of one per cent. on all property subject to taxation, and restricted the power of county supervisors to levy taxes for all purposes, so that the tax of any one year, with the State tax added, shall not exceed \$25 on \$1,000 of assessed valuation.

A law providing for the management of the penitentiary, which had been repeatedly urged by the Governor, was passed near the end of the session, after a long discussion. It authorized the Governor to appoint a Board of Three Inspectors of the Penitentiary—one from the northern, one from the southern, and one from the middle section of the State—to hold office, one for two, one for four, and the other for six years, their successors in each case being appointed for six years. It is made their duty to investigate, from time to time, the condition of the prison and its management, and make an annual report to the Governor. Provision is also made for a superintendent and other officers of the penitentiary. The act prohibits cropping the hair of female convicts, or punishing them by blows or stripes. Full and explicit provisions are made for the regulation of the institution, and the inspectors are directed to select and purchase, with the approval of the Governor, "a suitable site for a penitentiary and farm of not less than five hundred acres, situated at some convenient

point to all sections of the State, having reference to the greatest inducements offered by donations or otherwise, as to the point of locality and convenient to a railroad: *Provided*, The cost of such site and farm shall not exceed the sum of ten thousand dollars; and the said Board shall, with the assistance and advice of a competent architect and engineer, prepare plans for the improvement of such site; and the buildings to be erected thereon shall have capacity to confine, safely keep, and properly work at suitable manufacturing and industrial occupations, at least four hundred convicts, and the same shall be so planned as to permit of portions being erected, from time to time, as demand for capacity occurs: *Provided*, That the buildings necessary to confine all the convicts sentenced to the penitentiary within the walls thereof, shall be completed on or before the 1st day of April, 1876."

A report on the subject of the new penitentiary is required to be made at the next session of the Legislature, and, pending the construction of the new institution, provision is made for the support and employment of the convicts by temporary contract.

The act apportioning the State into six congressional districts was passed by the Republican members alone, the Democrats having absented themselves to prevent a quorum. Many of them entered a protest against the act becoming a law, on the ground that it so divided the State as to give a very unfair representation of the two parties, and that a majority did not vote for it.

A joint resolution was adopted, submitting to a vote of the people an amendment of the constitution, authorizing a reduction of the number of Chancery Court districts. This will be voted on at the State election in November, 1878. In his message to the Legislature of 1873, the Governor recommended other amendments which should bring the biennial elections for State and county officers and members of Congress together in the same year, and make the regular sessions of the Legislature biennial. He also recommended the submission of an amendment, limiting the amount of debt which a county, city, town, or other municipal corporation could contract for any purpose, to 5 per cent. of the value of taxable property therein.

There was no election for State officers this year; but the political parties held conventions for the nomination of presidential electors. The Republicans favored the reelection of General Grant to the presidency, and placed themselves on the regular platform of the party, which has failed to reach us. The Democrats, whose convention was held at Jackson, on the 26th of June, declared their position and purposes in the following resolutions:

Resolved, That, to defeat the Administration of President Grant, and restore the Government to the path of freedom, peace, honesty, and economy, we are prepared to lay down all prejudices upon the

altar of our common country; and, in obedience to the promptings of duty and patriotism, to clasp hands with the friends of constitutional liberty in the North across the bloody chasm made by the war, and help to the presidency of the United States Horace Greeley and B. Gratz Brown.

Resolved, That our policy should aim at local self-government and not at centralization; that the civil authority should be supreme over the military; that the writ of *habeas corpus* should be zealously upheld as the safeguard of personal freedom; that the individual citizen should enjoy the largest liberty consistent with public order, and that there shall be no Federal supervision of the internal policy of the several States and municipalities, but that each shall be left free to enforce the rights and promote the well-being of its inhabitants by such means as the judgment of its people shall prescribe.

Resolved, That it is our solemn conviction that the overthrow of the Administration of President Grant is the one vital necessity of the hour. For the accomplishment of so necessary an object there is no sacrifice, short of personal honor, that we will not cheerfully make.

Resolved, That we declare our deliberate opinion that it is unwise and inexpedient for the Baltimore Convention to nominate candidates in opposition to the nominees of the Cincinnati Convention.

Resolved, That our delegates to the National Convention be and they are hereby instructed to vote as a unit in favor of the nomination of Greeley and Brown. But should the Baltimore Convention, in opposition to these our solemn convictions, make other and different nominations, we pledge ourselves to their support.

At the election on the 5th of November there were 129,107 votes cast, of which 81,916 were for the Grant and Wilson electoral ticket, and 47,191 for the Greeley and Brown ticket, making Grant's majority 54,725. A Democratic Representative in Congress was chosen in the first district, and Republicans in the other five districts. The present Governor of the State is Ridgley C. Powers, who, by virtue of his office as Lieutenant-Governor, succeeded Alcorn on the latter's resignation. The Legislature consists of 25 Republicans and 13 Democrats in the Senate, and 61 Republicans and 55 Democrats in the Lower House.

With regard to the general condition of affairs of the State, the Governor says in his message to the Legislature of 1873:

Since the adjournment of your honorable body, profound quiet has prevailed everywhere within the State. An earnest determination has been manifested by the people to uphold the laws and repress crime. Officers have been faithful and zealous in the performance of their duties, and a new era of good feeling has sprung up, which promises soon to remove every vestige of oppression that lingers in the wake of the terrible revolution, which but lately blackened the land with the monuments of war. Mississippi stands among her sister States of the South as an example of reconstruction based upon reconciliation, by a full and just recognition of the rights of all her citizens. Having already realized the benefits of a liberal policy, wherein all are alike protected, and the opinions of all are accorded a decent respect, it is not probable that any prejudice of caste, or blind devotion to exploded or impracticable theories of government, will ever again be suffered to imperil individual safety and destroy the prosperity of the State.

Some improvement has been made in the financial condition of the State during the year,

but much remains to be done to put it on a satisfactory basis. The present debt of the State is \$2,707,152.76. Of this, \$1,319,613.72 is included in trust funds. Deducting this and \$37,534.08 to be paid for interest in January, 1873, the amount of the debt demanding payment will be \$1,351,004.96. Of this, \$358,000 constitutes the bonded debt, bearing 8 per cent. interest, \$406,500 has been deposited by insurance companies and for bonds, and \$471,025.66 consists of warrants still outstanding. The disbursements of the Treasury for the year amounted to \$1,596,828.64, which shows a reduction of \$132,217.70 from the expenses of the previous year. In the expenses of the Legislature and public printing alone there was a reduction of \$112,553.35. There was an increase of expense in the Judiciary Department, the cost of the courts being \$484,798.43. Among what may be classed as extraordinary expenditures, were \$96,527.15 for additions to the Lunatic Asylum, 37,720 for making and publishing the Revised Code, \$105,804.28 paid on the principal and interest of the public debt, and \$81,968.20 of railroad subsidy—or \$371,938.73 in all. There remains for the ordinary expenses of the government \$1,224,889.91, or \$233,982.65 less than was expended for the same purposes during the preceding year. All these disbursements are calculated on the basis of the State warrants, the average value of which was not more than eighty cents to the dollar. If we allow for the discount on the value of the warrants, the ordinary expenses amounted to about \$979,911 in currency. The total receipts of the Treasury for the year amounted to \$1,249,276.28, or \$88,874.21 less than those of the previous year. This falling off is attributed to the dilatory action of the collectors, as the tax levy had been increased from five-tenths of one per cent. in 1871 to seven-tenths of one per cent. in 1872.

Several railroads are still owing the State for money loaned to them in 1857 and 1858, originally amounting in the aggregate to \$800,000. Up to the breaking out of the civil war the interest had been regularly paid, and, under an act of the Legislature passed in 1863, the companies, with the exception of the New Orleans, Jackson & Great Northern Railroad Company, paid their indebtedness, and withdrew their collateral securities; but the Constitutional Conventions of 1865 and 1868 refused to recognize the validity of this settlement, and the courts have since held that the State is entitled to recover the amount of the debts, with interest. The Legislature, at the last session, authorized the Governor to settle with the railroad companies on easy terms, accepting State warrants in payment of their indebtedness. Under this provision, the New Orleans, Jackson & Great Northern Railroad Company placed in the hands of the Governor an accepted draft on New York for the full amount due from them, to be held until the necessary amount of warrants should be turned over to

the Treasury. Before the end of the year, warrants to the amount of \$151,897.99 had been paid. The other railroads which are indebted to the State—namely, the Mobile & Ohio, the Mississippi Central, and the Mississippi & Tennessee—have failed to make any payment under the act of April last. The time for making settlements under this act expired with the end of the year. Under an act granting aid to encourage internal improvements, \$81,968.20 in State warrants was issued to the Ripley Railroad. After many of these had passed into the hands of traders and workmen, the State Treasurer, under advice of the Attorney-General, refused to accept them in payment of dues to the State, and they were in danger of becoming worthless, when an arrangement was made with the New Orleans, Jackson & Great Northern Railroad Company to buy them up, and pay them over to the Governor on account of their indebtedness to the State. The act granting subsidies to railroads expired by limitation on the 1st of September, and the Governor recommended to the Legislature of 1873 that it be not renewed, in view of "the present financial condition of the State, and the large demands which it is necessary to make upon the Treasury for other purposes.

Considerable activity has been shown during the year in developing a railroad system for the State. A large number of projected roads have been surveyed, and a good deal of progress has been made in the construction of some of them. Eighty miles of the Memphis & Selma road have been graded, and on 60 miles of it bridges have been built and cross-ties delivered. On 80 miles of the Mobile & Northwestern the grading has been completed, bridges built, and ties distributed. Twenty miles of the Vicksburg & Ship Island, 8 miles of the Vicksburg & Memphis, and 13 miles of the Natchez, Jackson & Columbus roads, have been brought to the same stage of progress. Twenty miles of the Vicksburg & Nashville and the whole of the Prentice & Bogue Phalia are ready for the rails, while the Ripley Railroad has been entirely completed and equipped.

The subject of improving the harbors along the Gulf coast is attracting attention, and is of considerable importance, on account of the vast quantities of timber along the streams which empty into the Gulf. If harbor facilities were afforded, a large export trade in lumber might be built up. As it is, fifteen sawmills have been established on the Pascagoula River since 1865, and during the past year 35,236,500 feet of timber have been shipped from that district alone. The improvements asked for are the widening and deepening of the channel of the Pascagoula near its mouth, the construction of a light-house at the east end of Horn Island, and a custom-house at Bay St. Louis.

The public-school system of Mississippi is represented as improving in value and efficiency, but statistics for the year have not yet

been published. The State University at Oxford, which celebrates its twenty-fifth anniversary in June, 1873, is in a tolerably flourishing condition, and has 280 students. The trustees provided in June for the organization of an Agricultural Department by establishing the proper professorships, and choosing a superintendent of the farm. The Alcorn University was opened on the 7th of February, and before the end of the year had 117 students. The Oakland College property, situated about five miles east of Rodney, on the Mississippi River, was purchased for its use at a cost of \$40,000. It consists of 240 acres of good land, with fine brick buildings, capable of accommodating 500 students. An Agricultural Department has been established there also, and it is proposed to give special prominence to industrial training.

The Governor has purchased with the proceeds of the sale of land-scrip, granted by Congress for the benefit of agricultural colleges, \$190,000 of State bonds, and deposited them in the Treasury for the benefit of the Agricultural Departments of the Oxford and the Alcorn Universities.

Under the act of the last Legislature for the "regulation, control, and support of the penitentiary," a full corps of prison officials was promptly appointed, and entered upon their duties on the 3d of May. Under the new management not only has the State been relieved of an annual expense of about \$30,000, but, up to the 30th of November, \$1,350.62 had been paid into the public Treasury. The number of convicts in the penitentiary, from May 3d to November 30th, was 331, of whom 19 were discharged, 35 were pardoned, 28 escaped, and 38 died, leaving 211 at the latter date. Since then 48 have been admitted. On account of the limited capacity of the prison, it has been found necessary to employ the convicts outside of its walls, on contract and otherwise, but measures have been set on foot for the construction of new buildings, with workshops, etc., in which the inmates may be employed directly for the State. For this purpose 500 acres of land have been purchased four and a half miles north of Jackson, on the New Orleans, Jackson & Great Northern Railroad, and plans and specifications for the new buildings were ready for submission to the Legislature of 1873.

The Insane Asylum has been enlarged by the construction of two wings, and will now accommodate 300 patients. There are State Hospitals at Vicksburg and Natchez, into which the sick and insane are received indiscriminately. The Legislature made no appropriations for these institutions at its last session, but they have nevertheless continued their work. At the Vicksburg Hospital 1,234 patients were treated during the year, and a debt amounting to \$19,924.77 had been incurred. At Natchez 204 patients were received, and \$7,911.03 of debt incurred.

The enrolled militia of the State numbers 30,000, but from this enrolment only four regiments have been organized and equipped.

The fourth Annual Fair of the Planter's, Manufacturers' and Mechanics' Association of the State of Mississippi was held in November, and continued six days. The expenses of the exhibition, including premiums paid to exhibitors, amounted to \$6,597.15, and there was a very creditable display of the products of the State.

According to the census of 1870, of the total population (581,206), ten years old and over, there were engaged in all classes of occupations, 318,850 persons, of whom 232,349 were males and 86,501 females. There were engaged in agriculture, 259,199, including 193,725 males and 65,474 females; in professional and personal services 40,522, including 20,430 males and 20,092 females; in trade and transportation, 9,148, including 9,076 males and 72 females; in manufactures and mechanical and mining industries, 9,981, including 9,118 males and 863 females.

The State contained 4,209,146 acres of improved land, 7,959,384 of woodland, and 952,583 of other unimproved land. The cash value of farms was \$81,716,576, of farming-implements and machinery, \$4,456,633; total amount of wages paid during the year, including value of board, \$10,326,794; total (estimated) value of all farm-productions, including betterments and additions to stock, \$73,137,953; orchard-products, \$71,018; produce of market-gardens, \$61,735; forest-products, 39,975; value of home manufactures, \$505,298; of animals slaughtered or sold for slaughter, \$4,090,818; of all live-stock, \$29,940,238. There were 90,221 horses, 85,886 mules and asses, 173,899 milch-cows, 58,146 working-oxen, 269,030 other cattle, 232,732 sheep, and 814,381 swine. The chief productions were: 66,638 bushels of spring, and 207,841 of winter, wheat, 14,852 of rye, 15,637,316 of Indian-corn, 414,586 of oats, 3,973 of barley, 1,619 of buckwheat, 374,627 pounds of rice, 61,012 of tobacco, 288,285 of wool, 564,938 bales of cotton, 176,417 bushels of peas and beans, 214,189 of Irish, and 1,743,432 of sweet potatoes, 3,055 gallons of wine, 2,613,521 pounds of butter, 3,099 of cheese, 17,052 gallons of milk sold, 8,324 tons of hay, 67,509 gallons of sorghum, and 152,164 of cane, molasses, 199,581 pounds of honey, and 9,390 of wax.

The total number of manufacturing establishments was 1,731, using 384 steam-engines of 10,019 horse-power, and 225 water-wheels of 2,453 horse-power, and employing 5,941 hands, of whom 5,500 were males above sixteen, 191 females above fifteen, and 250 youth.

The total amount of capital invested was \$4,501,714; wages paid during the year, \$1,547,428; value of materials consumed, \$4,364,206; and of products, \$8,154,758.

The whole number of newspapers and periodicals was 111, having an aggregate circulation of 71,868, and issuing annually 4,703,336

copies. There were 3 daily, with a circulation of 2,300; 6 tri-weekly, circulation 3,650; 3 semi-weekly, circulation 2,400; 92 weekly, circulation 60,018; 2 semi-monthly, circulation 700; 5 monthly, circulation 2,800.

There were 2,788 libraries, having 488,482 volumes. Of these, 2,251, with 400,106 volumes, were private, and 537, with 88,376 volumes, were other than private, including seven circulating libraries, with 2,430 volumes.

The total number of religious organizations was 1,829, having 1,800 edifices, with 485,398 sittings, and property valued at \$2,360,800. The leading denominations were:

DENOMINATIONS.	Organizations.	Sittings.
Baptist.....	625	174,970
Christian.....	80	7,325
Congregational.....	2	300
Episcopal.....	23	8,650
Lutheran.....	10	2,450
Methodist.....	787	208,308
Presbyterian.....	222	71,100
Roman Catholic.....	27	8,250

The condition of pauperism and crime is shown by the following statistics:

Total population.....	827,922
Number of persons receiving support during the year ending June 1, 1870.....	921
Cost of annual support.....	\$96,707
Total number receiving support, June 1, 1870.....	809

Colored.....	298
Foreign.....	28

MISSOURI. The public debt of Missouri, falling due in 1873 and subsequent years to 1892, amounts to \$17,848,000. Concerning the bonds falling due in 1872, the Legislature on the 8th of February passed the following resolution over the veto of Governor Brown:

Whereas, Four hundred and twenty-two bonds of the State of Missouri, of one thousand dollars each, issued during the year 1852, become redeemable the present year, and whereas the following words occur in each of such bonds, to wit: "Said State promises to pay in gold or silver coin," and whereas an act approved February 22, 1851, entitled "An act to expedite the construction of the Pacific Railroad and the Hannibal & St. Joseph Railroad," under which said bonds were issued, which is printed on the back of each of said bonds, does not specify that the words "gold and silver coin" shall be inserted in said bonds, and whereas section seven of said act sets forth the following language: "And is redeemable at the pleasure of the Legislature at any time after the expiration of twenty years from the date thereof," therefore, be it

Resolved, by the Senate, the House of Representatives concurring therein, That the fund commissioners are hereby directed to instruct the financial agent of the State, the National Bank of Commerce, of New York City, to redeem the bonds, as they become respectively redeemable in the year 1872, in legal-tender notes.

Soon after, a holder of one of these bonds brought suit in the Supreme Court for a mandamus compelling the fund commissioners to

make payment in specie, which was refused on the 22d of April. The court was of opinion that the bonds were payable in gold and silver coin prior to the passage of the resolution given above, but, said Judge Bliss in rendering the decision, "The law-making power of the State has interfered and given positive directions in the matter, and the commissioners, as servants and agents of the State, are imperatively bound by their directions. It is not enough to say that the State cannot impair the obligation of contracts, for there is no way of enforcing such as those under consideration. It is purely a matter of public faith: no suit can be instituted against the State, and no executive officer can redeem its obligations further than furnished with money expressly appropriated for that purpose.

"It is said that the appropriation was once made. True, but the same power may withdraw it in whole or in part, or may prescribe conditions upon which it shall be used. The whole matter is under the control of the Legislature, and it would be simple usurpation for the fund commissioners to act other than as directed by that body. We consider the joint resolution as a modification of the previous appropriation.

"These are axioms of political law, and cannot be made plainer than by a simple statement; and, that body that peculiarly represents the State having determined to pay in Federal paper the bonds due in 1872, we cannot interfere to require its servants to pay in any other manner, although of the opinion that it has thereby failed to meet the State's obligations. The wrong, if any there be, must be remedied by the Legislature itself."

Judge Wagner gave a separate opinion, in which he said: "No money can be paid out of the State Treasury without a specific appropriation for that purpose, and the same power that makes the appropriation has the sole and exclusive right to determine how and in what manner it shall be paid. It was competent for the Legislature to repeal the law appropriating the money to make the payment, or to modify it in such way as they thought proper. And their action in this respect is not liable to superintendence or control by the judicial department of the government. The joint resolution prescribed the kind of money in which the obligations shall be paid, and the fund commissioners, who are mere ministerial officers, must obey the law and cannot discharge the liability in any other funds. The State may say in what manner its debts shall be paid or that they shall not be paid, and it may amount to a breach of faith, but there is no power to coerce it."

The effect of the action of the Legislature was a serious depreciation in the value of the State bonds, and Governor Brown, in his message to the Legislature of 1873, undertakes to show that the loss from this cause is far greater than the gain from making payments

in currency. The remote and consequential damage he thinks cannot be estimated, and says: "Had the State not felt itself prepared to assume the initiation of specie payment on promises unequivocal in their language, it would certainly have been wiser to have offered sufficient inducement to fund early-maturing bonds, rather than repudiate their face."

The receipts of the Treasury for the year, including a surplus of \$742,626 from the preceding twelve months, amounted to \$3,638,749.55. The disbursements were, \$3,044,219.98, leaving a surplus at the end of the year of \$594,529.57.

According to the assessment returns from the several counties for the year, there are in the State of Missouri 36,092,023 acres of land, valued at \$427,533,142; 553,378 horses, valued at \$24,718,878; 119,077 mules and asses, valued at \$6,535,447; 1,248,632 neat-cattle, valued at \$15,998,589; 1,097,294 sheep, valued at \$1,291,815; 2,964,520 hogs, valued at \$5,915,168; money, bonds, and notes, valued at \$14,565,368, and other personal property to the amount of \$67,039,415; total personal property, \$140,622,360; entire taxable wealth, \$568,155,502. These are the figures of the assessors; but the Governor in his message to the Legislature of 1878 declared that the return was very "unequal as well as inaccurate," and that there was within the limits of the State "more than \$1,000,000,000 of property that should rightly share in the support of the government." "The deficit," he added, "represents evasion, neglects of duty, transfers elsewhere of securities owned here, and a general inadequacy of the revenue law to the purpose it is intended to effect." The principal railroads making reports put the aggregate of their taxable property as follows:

Hannibal & St. Joseph	\$5,627,061 42
Missouri Pacific	2,819,498 65
Atlantic & Pacific	2,819,498 00
North Missouri	2,948,551 25
St. Louis & Iron Mountain	2,071,485 00
Missouri, Kansas & Texas	642,390 05
St. Louis & Santa Fe	191,595 81
Kansas City, St. Joseph & Council Bluffs	1,269,094 17
Missouri, Iowa & Nebraska (41 miles, road-bed not included)	27,650 00
Missouri River, Fort Scott & Gulf	87,140 00
Mississippi Valley & Western	29,500 00
Quincy, Missouri & Pacific	456,540 00
Total	\$30,514,654 35

The session of the Missouri Legislature which began in January continued until the 19th of April. The resolution mentioned above, providing for the payment of State bonds in currency, excited considerable discussion, but was passed by a strong vote of both branches, 74 to 45 in the House, and 21 to 11 in the Senate, after the veto of the Governor. In his veto-message the Governor used the following language, after expressing his reasons for regarding the proposed action as invalid, on the ground that it impaired the obligation of a contract:

But while these considerations sufficiently answer any objections to the validity and sufficiency of the

obligation to pay in coin, the sovereignty of the State places the whole question on a different and higher ground. The credit of the State must repose upon an abundant good faith. Its contracts are not subject to the technicalities of the law, or the ruling of courts; it is an axiom of political science, that the strictest public faith is the wisest public policy. No State can afford to answer her creditors with quibbles, or to challenge them in the name of tribunals before whom she herself can never be summoned. And in Missouri especially every consideration of public policy demands that we cherish the public faith above the least suspicion of dishonor. We are now, and must for long years to come continue to be, a borrowing people, dependent largely upon the money-markets of the world for the development of our resources. A heavy local indebtedness is in the market, in many cases negotiated only by a large discount. Counties, municipalities, and all the forms of corporate and private enterprise, will find the surest guarantee of their credit when the credit of their State is above suspicion. At such a time, if only for such considerations, Missouri cannot afford to allow the slightest question of her good faith.

The policy of the resolution is disastrous to the finances of the State. It involves the continued depreciation of the very means in the Treasury provided by law for this payment. The statutes regulating the sinking fund require that its accumulating surplus shall be invested in bonds, which are to be sold in the market, when means are needed to pay the maturing debt. This is illustrated by the fact that the provision for the debt, falling due this year, consists in a large part of bonds thus purchased, which must be sold at their market value. Thus what this repudiation of the contract would save to us in the redemption would be lost in the sale of the bonds provided for the payment. The resolution also necessitates a heavy increase in the burdens upon our people in the terms of the new loan, which we should be obliged to negotiate with depreciated credit within the next five years. It also involves the continued handling of our securities in the interest of rings, for they cannot be rescued from speculative control until by their appreciation in value they pass into the hands of permanent investors. No rings control the securities of the gold-paying States.

A new revenue bill was passed, which made very few changes in the law. It exempted from taxation \$300 of personal, household furniture, or other property, and provides "that all property personal, by the laws of this State, situate in any county other than the one in which the owner resides, shall be assessed in the county where such owner resides." The State Board of Equalization, composed of the State Senate as before, is retained. The County Board of Equalization is also retained, and county assessors, instead of township assessors, are provided for.

A proposition to aid in the construction of railroads by loaning to them the bonds of the State to the amount of \$18,000,000, after occupying considerable time and attention, was defeated, and the following resolution was adopted by the Senate:

Resolved, That, in the judgment of the Senate, it is alike unconstitutional and inexpedient for the Legislature of Missouri to increase the present State debt, and thereby impose additional burdens of taxation upon the people, by either directly or indirectly giving or loaning the credit of the State or its bonds or money to any railroad company or other private corporation or association.

A bill, proposing to make dealers in intoxicating liquors liable for the damage done by intoxicated persons, was introduced, but failed to pass, after occupying a good deal of time. Various changes in the school laws were proposed and debated, but were not consummated. A bill, providing that treason against the State and murder in the first degree should be the only crimes prosecuted by indictment, and that grand-juries should not be summoned unless by order of a judge, was among the measures discussed but not passed. A bill, dividing the State into congressional districts in accordance with the new apportionment law, was not passed before the adjournment, which fact induced the Governor to call an extra session, to begin on the 19th of June. The redistricting of the State was necessary, in order to provide for the election of the presidential electors which the State was entitled to choose. The new apportionment of Congress increased the number of these electors by four. The Legislature was in session only a few days in June, and the passage of the bill redistricting the State was the only important action taken.

Two amendments of the constitution were submitted by the Legislature to a vote of the people at the election in November, both of which were ratified at that time. One of these provides for the investment of the school fund, and the other increases the number of the judges of the Supreme Court by two. The question of a complete revision of the constitution is beginning to be agitated.

The last Legislature provided for the construction of a new Insane Asylum, and appropriated \$200,000 for the purchase of a site and the erection of the necessary buildings. Under this act five commissioners were appointed by the Governor, to select a location and obtain plans and specifications for the buildings. The site chosen is near the city of St. Joseph, and provision has been made for the immediate establishment there of the proposed institution.

There were at the end of the year 821 convicts in the State-prison. The expenses of this institution for the year amounted to \$109,696.42. When, against this, credit has been made for various supplies on hand, and the amount paid for the support of United States prisoners, the actual cost is reduced to about \$90,000. The labor which was done by the prisoners, under contract, brought in \$37,654.01, and the work done for the State, in extending and improving the buildings and grounds of the prison, is estimated at outside prices as worth \$111,723.35. About 300 prisoners have worked under contracts, at forty cents a day, and new contracts have been entered into, for the employment of 500 more, at 45 and 50 cents a day.

The State University is in a flourishing condition, being entirely free from debt, and having nearly 400 students. The policy of admit-

ting women to all departments of the university has been adopted. A medical department has just been established. The Normal Schools and School of Mines are also reported as in a very favorable condition. The number of children in the State between the ages of five and twenty-one is 702,901, an increase of 68,458 over the number in 1871. The other important school statistics are as follows:

Children attending public schools, 1873...	362,179
Children attending public schools, 1871....	390,070

Increase.....	32,109
Teachers in public schools, 1873.....	9,565
Teachers in public schools, 1871.....	8,816

Increase.....	449
Number of public schools, 1873.....	7,585
Number of public schools, 1871.....	6,943

Increase.....	643
Number of private schools reported.....	439
Number attending private schools.....	13,124

Two serious disturbances of the public peace occurred in the State during the year: one in Lafayette County, in February; the other in Cass County, in April. In the former case, a man named Douthitt, accused of stealing some mules, was killed by a party of about forty men in open daylight, and without any disguise. The Governor interfered in this case only to secure the action of the officers of the law according to the usual processes. Several persons have been indicted for participating in this affair, and will be brought to trial during the coming year (1873).

The outrages committed in Cass County, and known as the Gunn City tragedy, originated in a feeling of great exasperation among the people against officials who were charged with corruptly issuing bonds and contracting obligations to certain railroads to an amount inflicting heavy burdens upon tax-payers. It culminated in the stoppage of a train, in which certain of the parties were travelling, in the firing upon it by an armed and masked body of men, in the killing of a Mr. Dutro, Circuit-Attorney Hines, and Judge Stevenson, the two latter of whom were charged with complicity in the bond transaction. For some days great excitement prevailed over the neighboring townships, and extended into adjoining counties. Popular feeling had been very much aroused against those who were thus murdered, and, in consequence, was largely enlisted in the suppression of all evidence against those who executed this summary vengeance. Governor Brown at once ordered Captain Phelan's company, of Kansas City, to the vicinage, dispatched the Adjutant-General to the scene of the crime, to report upon the facts, and organized a commission, composed of Colonel Phillips and Colonel Cockerell, who were authorized to visit the county for the purpose of uniting those who were willing to act together in sustaining the execution of the laws. No further disturbance occurred, protection was offered, to enable those who

had fled to return, and civil order was reestablished. Rewards were at once offered, to the full extent authorized by law, for the apprehension of every one implicated, and steps were taken to discover the persons and elicit the evidences necessary for prosecution. Indictments have been found against 54 persons, charged with being engaged in the Gunn City murders, all of whom were bailed in the sum of \$100,000, and their trials set for the February term of the Cass County Circuit Court, in 1878.

The political campaign of the year in Missouri was one of unusual interest. The movement in national politics known as the "Liberal Republican" movement had its inception in a convention at Jefferson City, held on the 24th of January. It was one of the largest conventions ever held in the State. Besides the delegates representing the various counties, there were many persons present from other parts of the country. The convention was called to order by Colonel Grosvenor, chairman of the State Central Committee, and speeches were made by Governor Brown, James M. Scovill, of New Jersey, and others, while Senator Carl Schurz and others sent letters expressing their sympathy with its objects. Those objects are set forth with sufficient clearness in the following resolutions:

Resolved, That we, the Liberal Republicans of Missouri, faithful now, as we were in the dark days of civil war, to the vital principles of true republicanism, by no act or word will endanger rightful sovereignty of the Union, emancipation, equality of civil rights, or enfranchisement. To those established facts, now embedded in the Constitution, we claim the loyalty of all good citizens.

Resolved, That a true and lasting peace can come only from such proposed reconciliation as enfranchisement has wrought in this State, nor can those governments be pure or just in which the tax-payers have no active part. We therefore demand, with equal suffrage for all, complete amnesty for all, that the intelligent and experienced of every State may be welcomed to active service for the common welfare.

Resolved, That no form of taxation is just or wise which puts needless burdens upon the people. We demand a genuine reform of the tariff, so that those duties shall be removed which, in addition to the revenue yielded to the Treasury, involve increase in the price of domestic products, and a consequent tax for the benefit of favored interests.

Resolved, That the shameless abuse of government patronage for control of conventions and elections, whether in the interests of an individual, a faction, or a party, with the consequent corruption and demoralization of political life, demands a thorough and genuine reform of public service. Those who would suppress investigation forget that they owe a higher duty to the country than to any party. We honor those Senators whose courageous course has compelled the disclosure of grave misdeeds, and they deserve the thanks and the hearty support of all good citizens.

Resolved, That local self-government, with impartial suffrage, will guard the rights of all citizens more securely than any centralized authority. It is time to stop the growing encroachment of executive power, the use of coercion or bribery to ratify a treaty, the packing of a Supreme Court to relieve rich corporations, the seating of members of Congress not

elected by the people, the resort to unconstitutional laws to cure Ku-klux disorders, irreligion, or intemperance, and the surrender of individual freedom to those who ask that the pleasure, practice, or creed of some shall be the law of all. We demand for the individual the largest liberty consistent with public order, for the State, self-government, and for the nation, return to the methods of peace, and the constitutional limitations of power.

Resolved, That true Republicanism makes it not less our duty to expose corruption, denounce usurpation of power, and work for reforms necessary to the public welfare. The times demand an uprising of honest citizens to sweep from power the men who prostitute the name of an honored party to selfish interests. We therefore invite all Republicans, who desire the reforms herein set forth, to meet in national mass convention at the city of Cincinnati, on the first Wednesday of May next, at 12 M., there to take such action as our convictions of duty and the public exigency may require.

Delegates of the regular Republican party met at Jefferson City, on the 22d of February, to appoint representatives to the National Convention, to be held in Philadelphia, in June, and set forth the principles in accordance with which they professed to act. These principles were embodied in the following declarations:

We, the representatives of the Republican party of the State of Missouri, in convention assembled, declare as follows:

1. We congratulate the people of Missouri, and of the United States, that the principles of the Republican party, as enunciated by the National Convention of 1868, and which have determined the internal and foreign policy of the United States Government, have realized the blessings of peace and prosperity at home, and vindicated the honor, stability, and power of the American republic among the nations of the world, and we reaffirm our adherence to those principles.

2. That we heartily indorse the present national Administration in its conduct of national affairs, and point, with patriotic pride, to its great and lasting achievements. It has given to the country peace and prosperity; it has fulfilled its pledge that the will of the people should be the paramount law of its action; it has established the credit of the country upon a firm financial basis. By a steady adherence to its obligations, and to its plighted faith, it has enhanced the value of public securities, and appreciated the national currency to the verge of a gold standard. It has reduced the public debt beyond all precedent, and, at the same time, relieved the industry of the country from vast burdens of taxation which were necessarily imposed upon the people for the preservation of the republic. It has rebuked corruption and dishonesty wherever found to exist, and, with firm, unsparing justice, it has meted out punishment wherever the law has declared punishment to be due. It has corrected abuses and chronic evils inherited from the past. It has inaugurated and made zealous endeavors to secure practical and efficient civil-service reform. It has adopted a successful and humane Indian policy. It has executed, with a firm hand, the will of the people as expressed in the Constitution and the laws of Congress; and, finally, negotiated a treaty with Great Britain in the settlement of intricate and threatening complications, which is not less glorious as a vindication of the honor of the American flag, than it is distinguished in establishing a great and Christian principle of international law.

3. That, inasmuch as the disorganizing elements of other States are now looking to Missouri for a confirmation of their hopes of a division in our ranks, we take occasion to proclaim to the Republicans of

the nation that the party, in this State, is now united, vigorous, and enthusiastic. There is no cause for schism, and there is no schism in it; that it will poll the full Republican vote of the State for the nominees of the National Republican Convention; that the so-called Liberal Republican faction, if considered apart from the Democratic party (as it should not be), is contemptible in numbers, too feeble to organize, and too cunning to expose its weakness by a separate organization—a mere clique of disaffected persons seeking to perpetuate a division which is now utterly groundless, without the indorsement of a respectable minority of Republicans, and powerless to embarrass the party.

4. We declare our unswerving confidence in the integrity, patriotism, and zealous devotion to public interests of the present Chief Magistrate of the nation. We pledge ourselves and the Republican party to abide by, support, and carry to victory, the platform and candidates presented to the people by the National Convention to be assembled at Philadelphia, on the 6th of June next.

5. That in our opinion the true policy of the Government toward those lately in rebellion against its authority is general and universal amnesty, and, to this end, we indorse the recommendations of the President of the United States, in his last annual message to Congress.

A Democratic Convention was held at Jefferson City, on the 12th of June, to appoint delegates to the national convention of the party at Baltimore, in July. At this the following resolutions were unanimously adopted:

The Democratic party of Missouri cannot be unmindful of the fact that, prior to the last general election in this State, while tyranny, oppression, and plunder, prevailed, the large majority of citizens were powerless to rid themselves of these terrible evils, or accomplish any political result; that large numbers of them were disfranchised, and by the wicked machinery of the registration laws, and their more wicked execution, and by unscrupulous and systematic frauds, the people were doomed to hopeless subjection to the corrupt rule of an unprincipled minority; and it was by this patriotism and sense of justice of the Liberal Republican party, in aid of the heroic struggles of the Democracy, that the State of Missouri has been redeemed, and all of her citizens stand forth to-day freemen once more. The same radical party now in power in the nation, animated by the same spirit of hate and oppression, have, for a long series of years of profound peace, subjected the people of many of the States of this Union to a system of tyranny, spoliation, and plunder, even more aggravated than that under which the people groaned and suffered in Missouri. By frauds the most gigantic, force most unlawful and oppressive, they now hold the reins of power, and wield the machinery of government. They have established a military despotism in many of the States, and may, under the legislation of a subservient Congress, establish the same military rule in other portions of this country, at the will of the President, who has required them to make him the candidate for reelection. The Liberal Republican party of the country, impelled by the same sense of justice, offers, in cooperation with the Democracy, to reestablish, throughout the entire country, the liberty of all citizens and their local self-government; to overthrow military rule, to establish justice, and to restore fraternal relations between the different sections of our entire country. The Democracy of Missouri declares that it is our duty to cooperate with them in this great national achievement, and we will earnestly discharge that duty. The Liberal Republicans have already placed their ticket in the field, pledged to carry out the great and controlling objects above referred to, and, to the support of that ticket, a large portion of both the Liberal

Republican and Democratic parties of the country are already committed. It would be not only unwise, but, in our solemn judgment, a wicked trifling with the dearest interests of the people, should the Democracy place another ticket in the field, for the presidency and vice-presidency, and thus insure the reelection of Grant, the continued oppression and plunder of the people, and the destruction of liberty and constitutional government throughout the land: therefore—

Resolved, That the delegates appointed to the convention to be held in Baltimore, in July, are instructed to vote as a unit against the nomination of any candidates for President and Vice-President at the approaching election.

On the 21st of August the Democrats and Liberal Republicans met in separate conventions at Jefferson City, for the purpose of nominating presidential electors and candidates for the State offices. They were in session two days, and a joint committee of conference agreed upon a plan of dividing the nominations, which was approved by both conventions. This gave to the Democrats one of the two electors at large, six of the thirteen district electors, and the Governor, Treasurer, Auditor, Attorney-General, and the four judges of the Supreme Court; and to the Liberal Republicans the rest of the electoral ticket, the Lieutenant-Governor, Secretary of State, and Registrar of Lands. Each convention made the nominations allotted to it, and then the whole ticket was ratified in a joint meeting. The State ticket was as follows: for Governor, Silas Woodson, of Buchanan County; Lieutenant-Governor, Charles P. Johnson, of St. Louis; Secretary of State, Eugene F. Weigel, of St. Louis; Treasurer, Harvey W. Salmon, of Henry; Auditor, George B. Clarke, of Washington; Attorney-General, H. Clay Ewing, of Cole; Registrar of Lands, Frederick Salmon, of St. Charles; Judges of the Supreme Court, Washington Adams, of Cooper, for the residue of an unexpired term of two years; Henry M. Vories, of Buchanan, for a full term of six years, and Ephraim B. Ewing, of St. Louis, and Thomas A. Sherwood, of Green, for additional judges under the proposed amendment to the constitution. The platform of the National Convention at Cincinnati was accepted, but no additional declaration of principles was made.

The Republican Convention, for the nomination of an electoral ticket and candidates for the State offices, was held at St. Louis, on the 4th and 5th of September. The State ticket, as finally agreed upon, was as follows: for Governor, John B. Henderson; Lieutenant-Governor, Colonel J. H. Stover; Secretary of State, F. W. Voorde; Treasurer, D. Q. Dallmeyer; Auditor, Daniel O'Conner; Attorney-General, Jefferson Chandler; Registrar of Lands, F. A. Nichy; Judges of the Supreme Court, Henry A. Clover for the two years' term, George H. Shields for six years, and J. P. Ellis and Ira E. Leonard for the proposed additional judgeships. A platform was adopted, which was as follows:

Resolved, 1. That the rightful purpose of the government is to assure the security of life, individual liberty, property, and equality before the law; that the return to power, under any pretence, of the party practically opposing this proposition, would necessarily imperil that security and destroy the general confidence which has steadily increased under a Republican Administration.

2. In the profound conviction that the success of the Republican party is the sole security of reform and progress, we heartily approve the general principles declared by the late Republican Convention of Philadelphia, and gladly ratify the nomination of U. S. Grant and Henry Wilson, pledging our most earnest and honorable efforts for their triumphant election.

3. That the modesty, the patriotism, the earnest purpose, the sagacious judgment, practical wisdom, incorrupted integrity, and the illustrious services of Ulysses S. Grant have commended him to the hearts and judgments of the American people, and that in Senator Henry Wilson, our nominee for Vice-President, we present a statesman, who, by the force of his own character and efforts, made his way from an humble condition in life to the front rank of American citizens, and who, during a long career, has been always the able advocate and defender of the rights of the people and of every just and benevolent purpose. With these nominees for the platform adopted at Philadelphia by the Republican National Convention, we confidently await the verdict of the American people.

4. That universal suffrage demands universal education; that, as republicans, believing that intelligence and virtue are the pillars of our government, we advocate the necessity of a common-school education for every child in the State.

5. That any conflict between labor and capital should be avoided by proper legislation; but, in the event of such conflict, labor, the prime ground and foundation of capital, has paramount demands upon consideration.

6. That while we are in favor of internal improvements, and the fullest and speediest development of the great resources of the State, as far as the same can be accomplished by lawful means, we denounce every attempt to accomplish either by an evasion of constitutional provisions, in loaning or donating the credit or money of the State.

7. That the Republicans of the State of Missouri in convention assembled—a convention largely composed of those who aided in elevating, to his present position, the Governor of this State—do declare that, as an executive, he has failed to discharge the solemn obligations devolved upon him by the constitution; he has not enforced the laws, but anarchy and confusion reign in many parts of the State, murderers and outlaws go unwhipped of justice, and innocents stand defenceless and powerless before its enemies, while he, in neglect of duty, and in violation of this solemn oath, plots and intrigues for personal political preferment; that his continued exhibitions of inefficiency and lack of official integrity have destroyed all confidence ever reposed in his administrative ability, and his safety as an executive officer, and we emphatically condemn every effort looking to his elevation to a position where, by the remotest possibility, the enforcement of the laws of the nation may depend upon his will and efforts.

8. That we call attention of all good citizens to the history of the Republican party in this State. It came into power at a time when the State was disorganized, the authority of the law defied, the collection of the revenue imperilled, the Treasury of the State bankrupt, the securities of the State dishonored. Within a period of six years it reduced the indebtedness of the State from \$38,500,000 to less than \$21,000,000. Without increasing the burdens of the citizens, it discharged all financial obligations entailed upon it by an expensive civil war, and

promptly met all obligations of the Commonwealth. It raised the value of State bonds from less than fifty to ninety-seven cents on the dollar, and by legislation attracted capital and encouraged immigration from sister States and foreign lands, until Missouri, as a State, in wealth, population, and prosperity, ranks among the foremost in the Union.

9. That we also call the attention of all good citizens to the history of the self-styled party of Reform in this State. It came into power at a period of profound peace and prosperity, and when all the departments of government were thoroughly organized. Within a period of two years it has increased the debt of the State, by the emission of bonds and certificates, \$1,800,000. It has depleted the Treasury by extravagant and reckless appropriations until the current expenses of the government can no longer be paid. It has failed to protect the citizen, and it has failed to originate a single measure tending to improve either the government of this State or the prosperity of its people.

10. That, in view of the foregoing facts, we call upon all good citizens, irrespective of former party affiliations, to aid in our endeavor to rid Missouri of a government which came into power under the pretext of reform, but which, for incompetency, profligacy, and corruption, stands unparalleled in the history of the State.

The State election occurred on the same day with the presidential election, November 5th. The total vote cast for presidential electors was 273,058; of these, 151,433 were in favor of the election of Greeley and Brown, and 119,196 for Grant and Wilson; Greeley's majority over Grant, 32,257. Charles O'Connor received 2,429 votes for President. The total vote cast for Governor was 277,985, of which Woodson received 156,715, and Henderson 121,271; Woodson's majority, 35,443. The remainder of the ticket nominated by Democrats and Liberal Republicans was elected. In the thirteen congressional districts Democrats were chosen as representatives in Congress in the second, third, fourth, fifth, seventh, eighth, eleventh, twelfth, and thirteenth, and Republicans in the first, sixth, ninth, and tenth. The Legislature consists of 19 Democrats and Liberals and 15 Republicans in the Senate, and 82 Democrats and Liberals and 49 Republicans in the House.

According to the census of 1870, of the total population (1,205,568) ten years old and over, there were engaged in all classes of occupations 505,556 persons, of whom 466,845 were males and 38,711 females. There were engaged in agriculture, 263,918, including 262,595 males and 1,323 females; in professional and personal services, 106,903, including 75,079 males and 31,824 females; in trade and transportation, 54,885, including 54,583 males and 302 females; in manufactures and mechanical and mining industries, 79,850, including 74,588 males and 5,262 females.

The State contained 9,130,615 acres of improved land, 8,965,229 of woodland, and 3,611,376 of other improved land. The cash value of farms was \$392,908,047; of farming implements and machinery, \$15,596,426; total amount of wages paid during the year, including value of board, \$8,797,487; total (estimated) value of all farm-productions, includ-

ing betterments and additions to stock, \$103,035,759; orchard-products, \$2,617,463; produce of market-gardens, \$406,655; forest-products, \$793,343; value of home manufactures, \$1,737,606; of animals slaughtered or sold for slaughter, \$23,626,784; of all live-stock, \$84,285,278. There were 493,969 horses, 111,502 mules and asses, 898,515 milch-cows, 65,825 working-oxen, 689,355 other cattle, 1,352,001 sheep, and 2,308,430 swine. The chief productions were 1,093,905 bushels of spring, and 13,222,021 of winter, wheat, 559,532 of rye, 66,034,075 of Indian-corn, 16,578,313 of oats, 269,240 of barley, 36,252 of buckwheat, 12,329,483 pounds of tobacco, 3,649,390 pounds of wool, 1,246 bales of cotton, 43,936 bushels of peas and beans, 4,288,361 of Irish, and 241,253 of sweet, potatoes, 326,173 gallons of wine, 14,455,825 pounds of butter, 204,090 of cheese, 615,611 tons of hay, 2,494 bushels of clover-seed, 12,246 of grass-seed, 19,297 pounds of hops, 2,816 of hemp, 16,613 of flax and 10,391 bushels of flax-seed, 116,980 pounds of maple-sugar, 1,730,171 gallons of sorghum, and 116,817 of maple, molasses, 1,156,444 pounds of honey, and 35,248 of wax.

The total number of manufacturing establishments was 11,871, using 1,638 steam-engines of 48,418 horse-power, and 388 water-wheels of 7,644 horse-power, and employing 65,354 hands, of whom 55,904 were males above sixteen, 3,884 females above fifteen, and 5,566 youth. The total amount of capital invested was \$80,257,244; wages paid during the year, \$31,055,445; value of materials consumed, \$115,533,269; of products, \$206,213 429.

The total number of newspapers and periodicals was 279, having an aggregate circulation of 522,866, and issuing annually 47,980,422 copies. There were 21 daily, with a circulation of 86,655; 5 tri-weekly, circulation 13,800; 225 weekly, circulation 342,861; 3 semi-monthly, circulation 22,000; 23 monthly, circulation, 53,650; 1 annual, circulation 1,500.

There were 5,645 libraries, having 1,065,638 volumes. Of these, 3,903, with 566,642 volumes, were private, and 1,742, with 498,996 volumes, were other than private, including 28 circulating libraries, with 112,450 volumes.

The total number of religious organizations was 3,230, having 2,078 edifices, with 691,520 sittings, and property valued at \$9,709,358. The leading denominations were:

DENOMINATIONS.	Organizations.	Sittings.

MOORE, NATHANIEL F., LL. D., an eminent scholar, and former President of Columbia College, born at Newtown, L. I., December, 1782; died in the highlands on the Hudson, April 27, 1872. He was a nephew of Bishop Benjamin Moore, and graduated from Columbia College in 1802. Having completed a course of law-study, he was admitted to the bar in 1805, and, after following his profession for a few years, was appointed, in 1817, Adjunct Professor of the Greek and Latin Languages in his *alma mater*. In 1820 he was chosen professor, and was president from 1842 to 1849. In 1839 he visited Egypt and the Holy Land. Dr. Moore was a man of rare scholarly attainments, and was greatly beloved for his gentle nature and purity of character. Besides many pamphlets and occasional essays, he published "Remarks on the Pronunciation of the Greek Language," New York, 1819; "Ancient Mineralogy," New York, 1834; "Lectures on the Greek Language and Literature," 1835; and "An Historical Sketch of Columbia College," 1846.

MORAVIANS. The latest statistical reports of the Moravian Church give the number of communicants in the American and European provinces as 16,631, and the total number of communicants, non-communicants over thirteen years of age, and children, as 27,201. It is estimated that about 100,000 persons are in spiritual connection with the Church in the "diaspora," or missions on the Continent of Europe. To these numbers should also be added the number of members and adherents reported from the mission-fields.

The statistics of the American provinces, reported December 31, 1872, give, in the Northern District, churches, 57; communicants, 6,856; total of communicants, non-communicants, over thirteen years of age, and children, 12,387; officers and teachers in Sunday-schools, 651; Sunday-school scholars, 5,481; in the Southern District, churches, 11; communicants, 1,194; total of communicants, non-communicants over thirteen years of age, and children, 1,877; officers and teachers in Sunday-schools, 79; Sunday-school scholars, 653. Total for the United States: Communicants, 8,050; communicants, non-communicants over thirteen years of age, and children, 14,268; officers and teachers in Sunday-schools, 730; Sunday-school scholars, 6,106. The increase in the number of communicants for the year was 168, and in the entire number of persons enrolled in the churches, 860. The rate of increase (two and one-half per cent.) was much smaller

than the rate which had prevailed for several years previous, the average rate of increase for six years having been six per cent.

The following are the statistics of the Moravian missions as reported December, 1872:

MISSIONS.	Stations.	Missionary Agents.	Native Assistants and Overseers.	Occasionally holding Religious Meetings.	Communicants.
Greenland.....	6	24	45	14	948
Labrador.....	6	44	36	..	434

The number of out-stations is ten. The number of baptized adults is 14,489; of candidates, "new people, etc.," 9,644; of baptized children, 23,986; total number of persons connected with the missions, 69,865. The entire receipts for missions for the year were £15,478 3s. 11d.; the expenditures were £18,786 9s. 11d.

A monument in memory of the massacre of Moravian Indians at Gnadenhütten, Ohio, in 1782, was unveiled at that place on the 5th of June. It bears the inscription: "Here triumphed in death ninety Christian Indians, March 8, 1782." The act of withdrawing the veil was performed by four Christian Delaware Indians of Canada, one of whom was a lineal descendant of one of the victims of the massacre. A tablet has been placed at the spring in Tuscarawas County, Ohio, where Zeisberger and five families of Christian Indians encamped, on the 3d of May, 1772, and erected the mission-station at Schönbrunn, the first house of a Christian town in the State. Several other memorials of early Moravian missionaries, and of events in the history of the Church in America, have been erected.

The mission in Bohemia has been prosecuted with a persevering spirit against many obstacles arising from the hostility of local officers. Although it is under the more immediate care of the German Province, its affairs have been regarded with interest by the churches in the American Province. In the month of August, the judge of the circuit in which the church at Pottenstein is situated, issued an order forbidding all further Moravian services at that station. A protest against this order was immediately sent by the Unity's Elders' Conference to the provincial government at Prague. At the same time a memorial, praying for religious liberty, was drawn up to be presented to the Imperial Government at

Vienna, and two deputies were selected to take it to the capital and give it personal attention. The deputies reached Vienna on the 24th of September. Their cause was espoused by General de Schweinitz, the Prussian ambassador, and by Herr de Bose, the Saxon ambassador. M. de Bose conferred with the Imperial Minister of Public Worship on the subject of the memorial. The minister replied that a favorable time had not yet arrived for presenting such a memorial; that there existed, as yet, no law in Austria defining the conditions on which religious liberty may be granted to a church; that such a law was then being prepared and would be laid before the next Diet; that he could not, therefore, consider any memorial on this subject until that law had been adopted; that, however, in so far as the prohibition of the public services at Pottenstein was concerned, if the provincial government at Prague should decline to uphold the protest of the Unity's Elders' Conference, and should sustain the judge, the Conference should report to him, and he would order the circuit judges not to interfere with the religious services of the Moravian Church.

In consequence of this response of the Minister of Public Worship, and by the advice of the two friendly ambassadors, the deputies did not send in the memorial, but withheld it, waiting for the passage of the law spoken of by the imperial minister. When they reached Prague on their return, the deputies found that the provincial government was about to decide against the protest of the Elders' Conference; they therefore informed the authorities of the favorable character of the response which the Minister of Public Worship had given on the subject of their petition, and succeeded in forestalling the anticipated adverse decision.

MORSE, SAMUEL FINLEY BRESEE, LL. D., the inventor of the Electric Telegraph, a painter of acknowledged merit, and an author, born in Charlestown, Mass., April 27, 1791; died in New York City, April 2, 1872. He was the eldest son of Rev. Jedediah Morse, D. D., a Congregationalist clergyman, famous in his day for his geographical text-books and his historical works. Samuel received his early education in Charlestown, under his father's direction, graduated from Yale College in 1810, selected painting as his profession, and in 1811 sailed for England, in company with Washington Allston, to study art under his tuition and that of Sir Benjamin West. He made rapid progress in his profession, and in 1813 exhibited at the Royal Academy his picture of "The Dying Hercules," of colossal size, and the plaster model which he made of the same subject to assist him in his picture received the prize in sculpture the same year, from the Adelphi Society of Arts. On his return to the United States, in 1814, he settled in Boston, but met with so little encouragement that he removed to New Hampshire, where he found employment in painting por-

— — — — —

Sam^l. P. B. Morse

traits at fifteen dollars a head. Then he went to Charleston, S. C., and there his art proved more profitable. About 1822 he took up his residence in New York, where his talents were better appreciated, and, under a commission from the city, he painted a full-length portrait of General Lafayette, who was then on a visit to the United States. He was one of the founders of the National Academy of Design in 1846, and was its first president; he was about the same time lecturer on the fine arts at the New York Athenæum; and during his second residence abroad was elected to the professorship of the Literature of the Arts of Design in the University of the City of New York. He made a second voyage to Europe in 1829, to complete his studies in the chief cities of the Continent, where he produced a number of paintings which are held in high repute. It was on the voyage home in 1832, to enter upon the duties of this position, that he conceived the great invention to which he owes his world-wide fame. The new discoveries in the science of electro-magnetism had a special attraction for him, and he had discussed them, over and over again, with his friend Prof. J. F. Dana. On board the Havre packet *Sully*, which brought him home in October, 1832, the subject formed one day a topic of conversation among the passengers. Dr. Charles S. Jackson, of Boston, described an experiment recently made in Paris, by means of which electricity had instantaneously been transmitted through a great length of wire. "If that is so," said Morse, "I see no reason why messages may not be instantaneously transmitted by electricity." Before the packet reached New York, the invention of the telegraph was virtually made, and even the essential features of the electro-magnetic transmitting and recording apparatus were sketched upon paper. Of course, in reaching this result, Prof. Morse made use of the ideas and discoveries of many other minds. It is not sufficient that a brilliant project be proposed, that its modes of accomplishment are foreseen and properly devised; there are, in every part of the enterprise, other minds and other agencies to be consulted for information and counsel to perfect the whole plan. Various forms of telegraphic intercourse had been devised before; electro-magnetism had been studied by *savans* for many years; Franklin even had experimented with the transmission of electricity through great lengths of wire. It was reserved for Morse to combine the results of many fragmentary and unsuccessful attempts, and put them, after years of trial, to a practical use; and, though his claims to the invention have been many times attacked, in the press and in the courts, they have been triumphantly vindicated by the law and the verdict of the people, both at home and abroad. The Chief-Justice of the United States, in delivering the decision of the Supreme Court, said: "It can make no differ-

ence whether he" (the inventor) "derives his information from books or from conversation with men skilled in the science;" and "the fact that Morse sought and obtained the necessary information and counsel from the best sources, and acted upon it, neither impairs his right as an inventor nor detracts from his merits." Part of the apparatus was actually constructed by Mr. Morse in New York, before the close of the year 1832, but it was not until 1835 that he succeeded in putting up an experimental line, consisting of half a mile of wire stretched around and around a room, and exhibiting a telegraph in actual operation. In 1837 he gave greater publicity to his scheme by an exhibition at the University. The invention attracted a great deal of interest, but very few persons could be persuaded of its financial value. The same year he abandoned his profession, and filed his caveat at the Patent-Office in Washington; and it is somewhat singular that, during the same year, Wheatstone in England, and Steinheil in Bavaria, both invented a magnetic telegraph, differing from the American and from each other. But Morse's was superior to either, and at a convention held in 1851 by Austria, Prussia, Saxony, Württemberg, and Bavaria, for the purpose of adopting a uniform system of telegraphing for all Germany, his was, by the advice of Steinheil, selected. At the close of 1837 Mr. Morse went to Washington and asked Congress for an appropriation to build a telegraph-line from Washington to Baltimore. The House Committee on Commerce, at the head of which was F. O. J. Smith, of Maine, gave him an attentive hearing, and a favorable report, but the session passed without further action, and the disappointed inventor went to England and France. He met with no encouragement in Europe, and struggled on for four years longer, renewing his appeal at Washington year after year, and still hopeful in the midst of poverty and trouble. On the last night of the session in March, 1843, he left the Capitol entirely disheartened, after patiently waiting through the long day. But the next morning, to his amazement, he learned that in the hurry and confusion of the midnight hour the expiring Congress had voted \$30,000 for his experimental essay. The difficulties, however, were not yet surmounted. Mr. Morse purposed enclosing the wires in lead pipes buried in the earth—a plan which soon proved impracticable. The expense far exceeded his expectations, and he was endeavoring, with the aid of his friend Mr. Smith, of the Committee on Commerce, to devise a sort of plough, that would both open and cover a trench for the pipes, when accident brought him into association with Ezra Cornell, afterward so intimately connected with the progress of the telegraph in the United States. Mr. Cornell devised a machine drawn by a yoke of oxen, which, as it moved along, opened the ground,

laid the pipe, and covered it with earth; and with this, superintended by Cornell himself, the work was begun at Baltimore. Ten miles had been laid when Mr. Morse was convinced that the pipe would not answer, and the story runs that Cornell saved him the embarrassment of confessing failure, by purposely driving the machine at full speed against a rock and breaking it to pieces. The whole year was consumed in fruitless experiment. At last, when only \$7,000 of the appropriation remained, Mr. Morse gave the mechanical execution of the work entirely into Cornell's hands; the pipe system was abandoned, and the wires were insulated upon poles.

The first message was sent on the 24th of May, 1844. Every part of the apparatus worked imperfectly, but the feasibility of the project was established, and the long struggle was over. This first message was dictated by Miss Annie G. Ellsworth, a daughter of the late Henry L. Ellsworth, then Commissioner of Patents. Miss Ellsworth had been the first to apprise Prof. Morse of the congressional appropriation, and he had promised her that she should send over the wires the first message. It was the sentence: "What hath God wrought," and was sent by Prof. Morse at Washington to his associate, Mr. Vail, at Baltimore. The first public messages were a notice from the Democratic National Convention, then in session, in Baltimore, to Silas Wright, announcing to him his nomination for Vice-President of the United States, and his response declining it; and it is a remarkable fact that, though the dispatch from Mr. Wright was read to the convention, the great majority of the members were so incredulous of the possibility of conveying information by the telegraph, that they adjourned over to the next day in order to send to Washington, and obtain *reliable* information on the subject. One episode of these five years of waiting was his making the acquaintance of Daguerre, in Paris, in 1839, and receiving from him the details of his process for preparing photographic, or, as they were at first called, daguerreotype pictures. From the drawings furnished him by M. Daguerre, Prof. Morse constructed the first daguerreotype-apparatus, and took the first sun-pictures ever taken in America. To him, and to his friend Prof. John W. Draper, we owe the introduction of this process in a state of such perfection that subsequent steps of improvement have been easy.

After his first successful demonstration of the telegraph's capacity, there came a long series of vexatious lawsuits. Morse's patents were violated, his honors disputed, even his integrity was assailed, and rival companies devoured, for a while, all the profits of the business. But these troubles were finally overcome, and no inventor has ever had higher satisfaction in the acknowledgment of the benefits which he had conferred upon his race. His *alma mater*, in 1846, conferred on him the

degree of LL. D. All the principal nations of Europe gave him tokens of distinction. So early as 1848, the Sultan presented him the decoration of the Nishan Itfihar, or Order of Glory, set in diamonds. Gold medals were awarded him by Prussia, Austria, and Württemberg. France made him a Chevalier of the Legion of Honor. Denmark gave him the cross of Knight-Commander of the First Class of the Order of the Dannebrog; Spain, the cross of Knight-Commander of the Order of Isabella the Catholic; Italy, the cross of the Order of SS. Maurice and Lazarus; and Portugal, the cross of the Order of the Tower and Sword. At the instance of the Emperor of the French, representatives of the European states—France, Russia, Sweden, Belgium, Holland, Austria, Sardinia, Tuscany, the Holy See, and Turkey—met at Paris, in 1858, to decide upon a collective testimonial to him, and the result of their deliberations was a vote of 400,000 francs (\$80,000). Scores of learned societies, all over the world, admitted him to membership. In 1856 the telegraph-companies of Great Britain gave him a banquet in London. In 1858 the American colony in France entertained him at a grand dinner in Paris. On the 29th of December, 1868, the citizens of New York gave him a dinner at Delmonico's. In June, 1871, a bronze statue of Prof. Morse, erected in the Central Park, by the voluntary contributions of telegraph-employés throughout the country, was formally unveiled, with an address by William Cullen Bryant; and, in the evening, a reception was held at the Academy of Music, where one of the first instruments used on the original line between New York and Washington was placed upon the stage, and connected with the wires, that Prof. Morse might send, with his own hand, a word of greeting to all the cities of the United States and Canada. It should not be forgotten that to Prof. Morse we also owe the invention of the submarine cable. One moonlight night, in October, 1842, he laid, in New York Harbor, the first submarine telegraph, anticipating thus by more than a year and a half the actual construction of the first land-line. It was only an experiment, but it enabled Prof. Morse to predict, the next year, in a letter to the Secretary of the Treasury, the certainty of the great project which so long afterward was carried out by the energy of Cyrus W. Field.

The last public service which he performed was unveiling the statue of Franklin, in Printing-House Square, January 17, 1872, in the presence of a vast concourse of citizens. He had cheerfully acceded to the request that he would perform this act, remarking that he would do so if it were to be his last. It was eminently appropriate that the inventor who had made the electric current his secretary should thus honor that earlier discoverer who had brought it from the clouds to the earth, and protected dwellings from its violence.

Prof. Morse's later days were spent in comfort and happiness, in literary and artistic pursuits, at his beautiful summer residence at Locust Grove on the Hudson, near Poughkeepsie, and his winter residence in the city of New York.

His tastes were rather artistic than literary, yet he had written several books, and numerous scientific and literary papers. In 1829 he

published a collection of the poems of Lucretia Maria Davidson, with a memoir, under the title of "Amir Khan, and other Poems: Remains of Lucretia Maria Davidson." In 1835 appeared "Foreign Conspiracy against the Liberties of the United States," by S. F. B. Morse. He also published, in 1868, a series of papers giving reminiscences of his early struggles in behalf of his great invention.

N

NAVY OF THE UNITED STATES. The navy of the United States, according to the report of Secretary Robeson, dated November 28, 1872, comprised 178 vessels, carrying 1,378 guns, exclusive of howitzers. Of these there were 68 steamers, 929 guns, 31 sailing-vessels of all classes, 322 guns, 51 iron-clads, 127 guns, and 28 tugs. There were 45 vessels in commission for sea-service (including three used as store-ships), carrying 462 guns. These were distributed as follows:

STATION.	No. of Vessels.	Guns.
North Atlantic.....	11	77
South Atlantic.....	3	83
European.....	6	110
Asiatic.....	11	116
North Pacific.....	5	65
South Pacific.....	5	51
Special service.....	8	10

This shows an active force slightly increased in strength since the date of the preceding report, with improved efficiency on account of its better distribution in a greater number of smaller and more active vessels. "The limit of our power is, however," says the Secretary, "almost reached in this direction, since we have no more small cruisers which can be put in commission without repairs of an extent and at an expense wholly inadequate to the results to be obtained. It would be the wisest economy at once to afford the means and the authority to build a number of small, active cruisers, of live-oak or of iron, which, adapted to the duties and the means of our navy in time of peace, and fitted with the more modern and economical machinery which has succeeded that in use at the commencement of the decade, could be maintained and employed with more effect, and, for some years, with very little expense for repairs."

In urging these recommendations upon Congress, President Grant said: "In addition to its regular service, it is evident that, unless steps are taken to preserve our navy, in a very few years the United States will be the weakest nation upon the ocean of all great powers."

The Pacific station has recently been divided into the North Pacific and the South Pacific stations. The former embraces all that portion lying north of the equator, except so much of the west coast of South America and of the Isthmus as lies between the equator and Pan-

ama; the latter embraces the west coast of the Isthmus and of South America lying between Panama and the equator, and the west coast of South America and the islands and waters of the Pacific lying south of the equator as far west as the 150th meridian, and includes, in addition, the coasts and seaports of Australia.

The appropriations made by Congress for the fiscal year ending June 30, 1872, amounted in the aggregate to \$20,964,717.25; the actual expenditures for the same period charged to that appropriation amounted to \$17,694,685. This last amount will be increased by the discharge of existing contracts and liabilities in distant parts of the world, but it is believed that the expenditures will be more than \$2,000,000 less than the amount appropriated. The appropriations for the fiscal year ending June 30, 1873, amount to \$19,704,558. The estimates for the year ending June 30, 1874, are as follows:

Pay of officers and seamen of the Navy....	\$6,500,000 00
Pay of civil establishment in navy-yards, etc.....	388,321 00
Ordnance and Torpedo Corps.....	821,507 00
Coal, hemp, and equipments.....	1,500,000 00
Navigation, supplies, etc.....	184,500 00
Hydrographic work.....	217,800 00
Naval Observatory, Nautical Almanac, etc.	64,600 00
Repairs and preservation of vessels, etc....	2,775,000 00
Steam-machinery, tools, etc.....	2,400,000 00
Provisions.....	1,587,600 00
Repairs of hospitals and laboratories.....	40,000 00
Surgeons' necessaries.....	40,600 00
Contingent expenses of various departments and bureaus.....	1,312,000 00
Naval Academy.....	193,458 22
Support of Marine Corps.....	1,177,311 25
Printing and binding.....	108,000 00
Naval Asylum, Philadelphia.....	51,660 00
Total.....	\$30,256,747 50

And to these is added the sum of \$2,146,810 for permanent improvements, current repairs of buildings, docks, and incidental expenses in navy-yards, etc.

The number and yearly amount of pensions of the navy on the rolls, November 1, 1872, and the amount which was paid the last fiscal year, were:

PENSIONERS.	On the Rolls, Nov. 1, 1872.	Yearly amount of Pensions on the Roll, Nov. 1, 1872.	Amount paid for Pensions during the fiscal year ending June 30, 1872.
Navy invalids.....	1,495	\$142,237 50	\$149,442 85
Navy widows and others.....	1,765	275,706 00	295,186 87
Total.....	3,260	\$417,943 50	\$444,629 42

A special increase of pensions was made by act of Congress passed June 8, 1872, of 20 per cent. to those having lost a limb, or otherwise disabled in a manner equivalent thereto. This increase, amounting to \$9,237, is not included in the above statement.

The Secretary dwells upon the importance of improving the torpedo system of the navy as a means of attack and defence, and much attention has been bestowed upon this subject in the service. "Torpedo warfare," says Secretary Robeson, "is still in its infancy; but it is the infancy of a most powerful development, and it is especially the policy of the United States to foster its growth as a weapon adapted to our situation. These cheapest but most powerful weapons of defence, called torpedoes by Fulton, who invented them, were at first little regarded, but their use is now established as a necessity of naval warfare. England, Germany, Austria, and even China, are devoting much attention to their preparation and employment. This weapon seems to have an especial value to the United States. Our separation from the political complications of Europe produces a security which has resulted in notorious unreadiness to meet any sudden hostile emergency, which can come only from the sea, by an armed navy in proportion to our strength or to the extent of our coasts. A well-developed system of torpedo warfare would, to some extent—possibly to a large extent—meet this condition of unreadiness. Naval construction has not yet even remotely indicated any floating structure, which can withstand the destructive power of the modern fulminate, skilfully applied. While torpedoes are the cheapest of naval weapons, and within the means of the poorest nations, they are irresistible to the strongest and best prepared. The idea, even, of their employment appeals so strongly to the imagination, that powerful fleets have been kept aloof simply by their supposed presence."

The preparations and outfits for the hydrographic survey in the Pacific Ocean have been completed, and every facility has been given by the Department to insure its success. The United States ship Portsmouth, detailed for this survey, has already sailed and will commence operations upon her arrival in the Pacific Ocean, where she will be joined by the U. S. steamer Narragansett.

The whole number of students in the Naval Academy at Annapolis, at the beginning of the academic year, 1872-'73, was 260, viz.: 222 cadet-midshipmen; 34 cadet-engineers, and 4 Japanese students.

In the early part of the year, Commander R. W. Meade made, in the Narragansett, an extended cruise among the islands of the South Pacific Ocean, in the course of which he visited the group known as the Navigator or Samoan Islands, which lies northeast of Australia, and almost north of New Zealand, and consists of nine islands, the largest of which is

called Upola. These islands are capable of producing in abundance cotton, sugar, and all the ordinary tropical productions. They are inhabited by a fine, muscular race, mostly Christianized, and of a higher order of intellect and cultivation than almost any natives of the Pacific Archipelago. The island of Tutuila, though by no means the largest, is the central island, and, possessing the beautiful harbor of Pago-Pago, is the key of the group. These islands lie directly in the track of commerce and steam-navigation between the west coast of America and the islands and semi-continents of the East; and the bay of Pago-Pago, situated about midway between Honolulu and Sydney, affords not only far the best and safest, but absolutely the only land-protected harbor among the islands of the South Pacific. Its position, in relation to New Zealand, Australia, the Sandwich Islands, the ports of South America, and the Isthmus, and to San Francisco, makes it almost the necessary harbor for supplies, coaling, and repairs, for all the trade and travel westward to Australia and Southern Polynesia, or returning thence to the shores of America. Its great advantages for the United States are to be found in these conditions, and in the fact that it is in the direct line of trade from San Francisco, through the Sandwich Islands, to the East; that its location is plainly marked by the surveys of our exploring expedition, and those more recently made; that it is easy of access, night and day, with a deep, land-locked harbor, well protected from the force of the hurricanes which sweep that portion of the Pacific, and from the dangerous ocean-swell resulting therefrom. The native chiefs and people are well-disposed and exceedingly anxious to secure the benefits of intercourse with the United States, and the recognition of the Government. As an available station for coaling and supplies for our national and commercial marine in that part of the world, this island is regarded as by far the best to be found within a sweep of many thousand miles.

"It is by no means," says Secretary Robeson, in his late annual report to the President, "the province of this report to discuss questions of foreign policy, or to present any event even of the plainest interests or requirements of national commerce, but I cannot forbear to say that, if we are not prepared to ignore wholly the imperative commercial needs, as well as the splendid commercial opportunities of our Pacific States, and to yield also the opening avenues of Pacific trade to the comprehension and courage of more liberal, though more remote peoples, we should not neglect the opportunities thus afforded, at least to protect, if not to encourage, some of the American interests which are there struggling to establish themselves."

During the year two expeditions have been engaged upon surveys for the interoceanic canal across the Isthmus of Darien. One, un-

der the command of Commander E. P. Lull, has been examining the route *via* Lake Nicaragua. Several lines have been run from Lake Nicaragua to Brito, on the Pacific coast, one of which is regarded as particularly favorable; also, a line to the Bay of Salinas.

Commander Selfridge, who has conducted the previous surveys of the Isthmus of Darien, was engaged at the close of the year in completing the final exploration of that isthmus between Panama and South America. The route by the way of the Atrato and Nipipi Rivers (the former of which is navigable at all seasons for vessels drawing twenty-five feet of water) was found to possess fewer difficulties than any route previously examined. This route requires a canal of about 32 miles in length, the estimated cost of which amounts to \$75,000,000; but it is hoped that further surveys will shorten the distance four or five miles and reduce the cost to \$60,000,000. Recent information at the close of the year favored the examination of the valley of the river Bojaya, lying about ten miles south of, and, in general, parallel to, that of the river Nipipi. When this is completed, the entire isthmus lying south and east of the line of the Panama Railroad will have been sufficiently examined to establish the relative difficulties of constructing a ship-canal, as well as the lines lying farther south, between the river Atrato and the Pacific Ocean.

The following table, prepared by Lieutenant Collins for the forthcoming report of Commander Selfridge, shows the probable gain in time and distance to be effected for sailing-vessels to and from the port of New York by a ship-canal across the Isthmus of Darien over the route proposed by Commander Selfridge, United States Navy:

FROM NEW YORK TO HONG-KONG.	BY PRESENT ROUTE.		BY CANAL.		GAIN.

The distance by present route is in nautical miles, measured on the routes now generally

pursued. The days are actual averages obtained from trustworthy sources.

NEBRASKA. The Legislature met in adjourned session on the 9th of January. The charges pending against John Gillespie, the State Auditor, who had been impeached in the preceding May, were withdrawn by the House. The only important measure that passed both Houses was a bill reassembling the Constitutional Convention of the previous year. This bill, which was regarded as setting at defiance the will of the people, who had already rejected the work of that convention, was vetoed by Governor James.

A difference having arisen between the two Houses on a bill relating to the saline lands of the State, the Senate, on the 20th, adjourned to December, and the majority left for their homes. But a portion of the Senate and the House continuing to meet, Governor James, authorized by the Constitution, sent a message the same day to the House adjourning the Legislature without day. This message the House refused to entertain, and adjourned to the 22d, and on that day the following preamble and resolution were passed in the Senate:

Whereas, Heretofore and since the 2d day of June, A. D. 1871, a vacancy in the office of Governor of the State of Nebraska has existed, the duties of which said office have been temporarily performed by the Secretary of State; and—

Whereas, The said Secretary of State, in the capacity of acting Governor of said State, has attempted to usurp powers not conferred on him by the Constitution of said State; and—

Whereas, The said Secretary of State, in the capacity of acting Governor thereof, has refused to recognize the acts of the Legislature of said State as valid and binding: now, therefore—

Be it resolved by the Senate of the State of Nebraska, the House of Representatives concurring therein, That the said Legislature meet in convention in the hall of the House of Representatives, on Wednesday, the 24th day of January, A. D. 1872, at two o'clock P. M., to elect a Governor to fill said vacancy, by joint ballot of said Senate and House of Representatives, which (said election) shall be conducted in manner and form following, to wit: When the roll of each House is called by the Clerk thereof, each member present shall name one man, *viva voce*, as his choice for Governor, and the person receiving a majority of all the votes cast shall be declared elected Governor of the State of Nebraska to fill said vacancy.

No further steps, however, were taken, as the two Houses, failing to obtain a quorum, dispersed on the 24th of January. Early in February a peculiar state of affairs arose, owing to the absence of Governor James from the State. The constitution provides that "if, during the vacancy of the office of Governor, the Secretary of State shall be impeached, displaced, resign, die, or be absent from the State, the powers and duties of the office of Governor shall devolve upon the President of the Senate; and, should a vacancy occur by impeachment, death, resignation, or absence from the State, of the President of the Senate, the Speaker of the House of Representatives shall act as Governor till the vacancy be filled."

had fled to return, and civil order was reestablished. Rewards were at once offered, to the full extent authorized by law, for the apprehension of every one implicated, and steps were taken to discover the persons and elicit the evidences necessary for prosecution. Indictments have been found against 54 persons, charged with being engaged in the Gunn City murders, all of whom were bailed in the sum of \$100,000, and their trials set for the February term of the Cass County Circuit Court, in 1873.

The political campaign of the year in Missouri was one of unusual interest. The movement in national politics known as the "Liberal Republican" movement had its inception in a convention at Jefferson City, held on the 24th of January. It was one of the largest conventions ever held in the State. Besides the delegates representing the various counties, there were many persons present from other parts of the country. The convention was called to order by Colonel Grosvenor, chairman of the State Central Committee, and speeches were made by Governor Brown, James M. Scovel, of New Jersey, and others, while Senator Carl Schurz and others sent letters expressing their sympathy with its objects. Those objects are set forth with sufficient clearness in the following resolutions:

Resolved, That we, the Liberal Republicans of Missouri, faithful now, as we were in the dark days of civil war, to the vital principles of true republicanism, by no act or word will endanger rightful sovereignty of the Union, emancipation, equality of civil rights, or enfranchisement. To those established facts, now embedded in the Constitution, we claim the loyalty of all good citizens.

Resolved, That a true and lasting peace can come only from such proposed reconciliation as enfranchisement has wrought in this State, nor can those governments be pure or just in which the tax-payers have no active part. We therefore demand, with equal suffrage for all, complete amnesty for all, that the intelligent and experienced of every State may be welcomed to active service for the common welfare.

Resolved, That no form of taxation is just or wise which puts needless burdens upon the people. We demand a genuine reform of the tariff, so that those duties shall be removed which, in addition to the revenue yielded to the Treasury, involve increase in the price of domestic products, and a consequent tax for the benefit of favored interests.

Resolved, That the shameless abuse of government patronage for control of conventions and elections, whether in the interests of an individual, a faction, or a party, with the consequent corruption and demoralization of political life, demands a thorough and genuine reform of public service. Those who would suppress investigation forget that they owe a higher duty to the country than to any party. We honor those Senators whose courageous course has compelled the disclosure of grave misdeeds, and they deserve the thanks and the hearty support of all good citizens.

Resolved, That local self-government, with impartial suffrage, will guard the rights of all citizens more securely than any centralized authority. It is time to stop the growing encroachment of executive power, the use of coercion or bribery to ratify a treaty, the packing of a Supreme Court to relieve rich corporations, the seating of members of Congress not

elected by the people, the resort to unconstitutional laws to cure Ku-klux disorders, irreligion, or intemperance, and the surrender of individual freedom to those who ask that the pleasure, practice, or creed of some shall be the law of all. We demand for the individual the largest liberty consistent with public order, for the State, self-government, and for the nation, return to the methods of peace, and the constitutional limitations of power.

Resolved, That true Republicanism makes it not the less our duty to expose corruption, denounce usurpation of power, and work for reforms necessary to the public welfare. The times demand an uprising of honest citizens to sweep from power the men who prostitute the name of an honored party to selfish interests. We therefore invite all Republicans, who desire the reforms herein set forth, to meet in national mass convention at the city of Cincinnati, on the first Wednesday of May next, at 12 m., there to take such action as our convictions of duty and the public exigency may require.

Delegates of the regular Republican party met at Jefferson City, on the 22d of February, to appoint representatives to the National Convention, to be held in Philadelphia, in June, and set forth the principles in accordance with which they professed to act. These principles were embodied in the following declarations:

We, the representatives of the Republican party of the State of Missouri, in convention assembled, declare as follows:

1. We congratulate the people of Missouri, and of the United States, that the principles of the Republican party, as enunciated by the National Convention of 1868, and which have determined the internal and foreign policy of the United States Government, have realized the blessings of peace and prosperity at home, and vindicated the honor, stability, and power of the American republic among the nations of the world, and we reaffirm our adherence to those principles.

2. That we heartily indorse the present national Administration in its conduct of national affairs, and point, with patriotic pride, to its great and lasting achievements. It has given to the country peace and prosperity; it has fulfilled its pledge that the will of the people should be the paramount law of its action; it has established the credit of the country upon a firm financial basis. By a steady adherence to its obligations, and to its plighted faith, it has enhanced the value of public securities, and appreciated the national currency to the verge of a gold standard. It has reduced the public debt beyond all precedent, and, at the same time, relieved the industry of the country from vast burdens of taxation which were necessarily imposed upon the people for the preservation of the republic. It has rebuked corruption and dishonesty wherever found to exist, and, with firm, unsparing justice, it has meted out punishment wherever the law has declared punishment to be due. It has corrected abuses and chronic evils inherited from the past. It has inaugurated and made zealous endeavors to secure practical and efficient civil-service reform. It has adopted a successful and humane Indian policy. It has executed, with a firm hand, the will of the people as expressed in the Constitution and the laws of Congress; and, finally, negotiated a treaty with Great Britain in the settlement of intricate and threatening complications, which is not less glorious as a vindication of the honor of the American flag, than it is distinguished in establishing a great and Christian principle of international law.

3. That, inasmuch as the disorganizing elements of other States are now looking to Missouri for a confirmation of their hopes of a division in our ranks, we take occasion to proclaim to the Republicans of

the nation that the party, in this State, is now united, vigorous, and enthusiastic. There is no cause for schism, and there is no schism in it; that it will poll the full Republican vote of the State for the nominees of the National Republican Convention; that the so-called Liberal Republican faction, if considered apart from the Democratic party (as it should not be), is contemptible in numbers, too feeble to organize, and too cunning to expose its weakness by a separate organization—a mere clique of disaffected persons seeking to perpetuate a division which is now utterly groundless, without the indorsement of a respectable minority of Republicans, and powerless to embarrass the party.

4. We declare our unwavering confidence in the integrity, patriotism, and zealous devotion to public interests of the present Chief Magistrate of the nation. We pledge ourselves and the Republican party to abide by, support, and carry to victory, the platform and candidates presented to the people by the National Convention to be assembled at Philadelphia, on the 5th of June next.

5. That in our opinion the true policy of the Government toward those lately in rebellion against its authority is general and universal amnesty, and, to this end, we indorse the recommendations of the President of the United States, in his last annual message to Congress.

A Democratic Convention was held at Jefferson City, on the 12th of June, to appoint delegates to the national convention of the party at Baltimore, in July. At this the following resolutions were unanimously adopted:

The Democratic party of Missouri cannot be unmindful of the fact that, prior to the last general election in this State, while tyranny, oppression, and plunder, prevailed, the large majority of citizens were powerless to rid themselves of these terrible evils, or accomplish any political result; that large numbers of them were disfranchised, and by the wicked machinery of the registration laws, and their more wicked execution, and by unscrupulous and systematic frauds, the people were doomed to hopeless subjection to the corrupt rule of an unprincipled minority; and it was by this patriotism and sense of justice of the Liberal Republican party, in aid of the heroic struggles of the Democracy, that the State of Missouri has been redeemed, and all of her citizens stand forth to-day freemen once more. The same radical party now in power in the nation, animated by the same spirit of hate and oppression, have, for a long series of years of profound peace, subjected the people of many of the States of this Union to a system of tyranny, spoliation, and plunder, even more aggravated than that under which the people groaned and suffered in Missouri. By frauds the most gigantic, force most unlawful and oppressive, they now hold the reins of power, and wield the machinery of government. They have established a military despotism in many of the States, and may, under the legislation of a subservient Congress, establish the same military rule in other portions of this country, at the will of the President, who has required them to make him the candidate for reelection. The Liberal Republican party of the country, impelled by the same sense of justice, offers, in cooperation with the Democracy, to reestablish, throughout the entire country, the liberty of all citizens and their local self-government; to overthrow military rule, to establish justice, and to restore fraternal relations between the different sections of our entire country. The Democracy of Missouri declares that it is our duty to cooperate with them in this great national achievement, and we will earnestly discharge that duty. The Liberal Republicans have already placed their ticket in the field, pledged to carry out the great and controlling objects above referred to, and, to the support of that ticket, a large portion of both the Liberal

Republican and Democratic parties of the country are already committed. It would be not only unwise, but, in our solemn judgment, a wicked trifling with the dearest interests of the people, should the Democracy place another ticket in the field, for the presidency and vice-presidency, and thus insure the reelection of Grant, the continued oppression and plunder of the people, and the destruction of liberty and constitutional government throughout the land: therefore—

Resolved, That the delegates appointed to the convention to be held in Baltimore, in July, are instructed to vote as a unit against the nomination of any candidates for President and Vice-President at the approaching election.

On the 21st of August the Democrats and Liberal Republicans met in separate conventions at Jefferson City, for the purpose of nominating presidential electors and candidates for the State offices. They were in session two days, and a joint committee of conference agreed upon a plan of dividing the nominations, which was approved by both conventions. This gave to the Democrats one of the two electors at large, six of the thirteen district electors, and the Governor, Treasurer, Auditor, Attorney-General, and the four judges of the Supreme Court; and to the Liberal Republicans the rest of the electoral ticket, the Lieutenant-Governor, Secretary of State, and Registrar of Lands. Each convention made the nominations allotted to it, and then the whole ticket was ratified in a joint meeting. The State ticket was as follows: for Governor, Silas Woodson, of Buchanan County; Lieutenant-Governor, Charles P. Johnson, of St. Louis; Secretary of State, Eugene F. Weigel, of St. Louis; Treasurer, Harvey W. Salmon, of Henry; Auditor, George B. Clarke, of Washington; Attorney-General, H. Clay Ewing, of Cole; Registrar of Lands, Frederick Salmon, of St. Charles; Judges of the Supreme Court, Washington Adams, of Cooper, for the residue of an unexpired term of two years; Henry M. Vories, of Buchanan, for a full term of six years, and Ephraim B. Ewing, of St. Louis, and Thomas A. Sherwood, of Green, for additional judges under the proposed amendment to the constitution. The platform of the National Convention at Cincinnati was accepted, but no additional declaration of principles was made.

The Republican Convention, for the nomination of an electoral ticket and candidates for the State offices, was held at St. Louis, on the 4th and 5th of September. The State ticket, as finally agreed upon, was as follows: for Governor, John B. Henderson; Lieutenant-Governor, Colonel J. H. Stover; Secretary of State, F. W. Voerde; Treasurer, D. Q. Dallmeyer; Auditor, Daniel O'Connor; Attorney-General, Jefferson Chandler; Registrar of Lands, F. A. Nichy; Judges of the Supreme Court, Henry A. Clover for the two years' term, George H. Shields for six years, and J. P. Ellis and Ira E. Leonard for the proposed additional judgeships. A platform was adopted, which was as follows:

insane, so that the counties shall bear their proportion of expense of maintenance; the erection of an asylum by the State, where idiots and imbeciles may be kept at the expense of the counties from which they are received, or of the parents and guardians of the patients; and, with a view to the proper protection of capital, a revision of the collection laws, and the repeal of the law against usury.

On the 9th of January, Governor Furnas was inaugurated, and delivered his address. He renewed the recommendations of Governor James, respecting the collection laws and immigration, and recommended encouragement to railroads and other internal improvements, the utilization of the saline and bituminous deposits of the State, and the passage of measures that will insure the proper representation of Nebraska at the Vienna Exhibition, and at the Centennial Celebration at Philadelphia. In urging a revision of the revenue laws, Governor Furnas says: "Uniform valuation and assessment of all property at its actual present cash-value, with prompt payment, is the only true system of taxation, is alone just and equitable, can alone lighten the burdens and render satisfaction. Taxes as now assessed and collected in this State are unjust and actually oppressive. With proper distribution they would not be felt. The simple fact that nearly \$300,000 delinquent State taxes are uncollected, and in some counties more than that amount of a local character, is evidence that our existing revenue laws are either inadequate or improperly administered." He also recommends the repeal of the laws exempting lands from taxation by reason of tree-planting, and the encouragement of that branch of agriculture by the payment of premiums.

The following is an exhibit of the indebtedness and resources of the State June 21, 1871:

STATE INDEBTEDNESS.	
Outstanding warrants (general fund).....	\$130,000
Outstanding warrants (building fund).....	40,000
Territorial militia bonds, etc. (held by school-fund).....	36,000
Interest on bonds and floating indebtedness.....	25,000
Loan of "University fund" (act approved February 6, 1871).....	16,000
Annual expenses on general fund.....	200,000
Total indebtedness.....	\$447,000
RESOURCES.	
Tax levy of 1870 ("general fund").....	\$123,500
Tax levy of delinquent general fund taxes.....	60,500
Tax levy of sinking fund, 1870.....	26,800
Tax levy of delinquent State railroad loan taxes.....	18,000
Total resources.....	\$228,800
Amount of liabilities over resources.....	\$219,200

An encouraging condition of the State for the past two years is exhibited by the report of the Treasurer.

There remained in the State Treasury, at the date of the last official report, January 18, 1871, \$37,547.08; receipts to December 31, 1872, \$1,183,074.27; total, \$1,220,621.35. Disbursements, \$1,022,233.70; balance in the

Treasury to the credit of the several funds, \$198,287.65.

The accounts of the State, on account of the sales of the public land, have been adjusted up to the 31st of December, 1871, and the sum found to be due the State at that time, amounting to \$78,377.12, has been received and deposited in the Treasury.

The Insane Asylum has been completed, and the work on the new penitentiary building is progressing rapidly.

According to the census of 1870, of the total population (88,265) ten years old and over, there were engaged in all classes of occupations 43,837 persons, of whom 41,948 were males and 1,894 females. There were engaged in agriculture, 23,115, including 23,083 males and 32 females; in professional and personal services, 10,331, including 8,667 males and 1,664 females; in trade and transportation, 4,623, including 4,623 males and 5 females; in manufactures and mechanical and mining industries, 5,763, including 5,570 males and 193 females.

The State contained 647,031 acres of improved land, 213,374 of woodland, and 1,213,376 of other unimproved land. The cash value of farms was \$30,242,186; of farming-implements and machinery, \$1,549,716; total amount of wages paid during the year, including value of board, \$882,478; total (estimated) value of all farm-productions, including betterments and additions to stock, \$8,604,742; orchard-products, \$9,932; produce of market-gardens, \$30,649; forest-products, \$36,307; value of home manufactures, \$36,951; value of animals slaughtered or sold for slaughter, \$854,850; of all live-stock, \$6,551,185. There were 30,511 horses, 2,632 mules and asses, 28,940 milch-cows, 5,931 working-oxen, 45,057 other cattle, 22,725 sheep, and 59,449 swine. The chief productions were: 2,109,321 bushels of spring, and 15,765 of winter, wheat, 13,532 of rye, 4,786,710 of Indian-corn, 1,477,562 of oats, 216,481 of barley, 8,471 of buckwheat, 5,988 pounds of tobacco, 74,655 of wool, 3,333 bushels of peas and beans, 739,984 of Irish, and 762 of sweet, potatoes, 470 gallons of wine, 1,539,535 pounds of butter, 46,143 of cheese, 95,059 gallons of milk sold, 169,354 tons of hay, 77,598 gallons of sorghum molasses, 707 pounds of wax, and 28,114 of honey.

The total number of manufacturing establishments was 670, using 63 steam-engines of 1,865 horse-power, and 67 water-wheels of 1,446 horse-power, and employing 2,665 hands, of whom 2,568 were males above sixteen, 81 females above fifteen, and 26 youth.

The total amount of capital invested was \$2,169,963; wages paid during the year, \$1,429,913; value of materials consumed, \$2,902,074; of products, \$5,738,512.

The whole number of newspapers and periodicals was 42, having an aggregate circulation of 31,600, and issuing annually 3,388,500 copies. There were 7 daily, with a circulation

of 6,850; 1 tri-weekly, circulation 500; 30 weekly, circulation 22,400; 4 monthly, circulation 1,850.

There were 390 libraries, having 147,040 volumes. Of these, 219, with 95,125 volumes, were private, and 171, with 51,915 volumes, were other than private.

The total number of religious organizations was 181, having 108 edifices, with 82,210 sittings, and property valued at \$386,000.

The leading religious denominations are as follows:

DENOMINATIONS.	Organizations.	Sittings.
Baptist.....	28	5,400
Christian.....	9	1,550
Congregational.....	10	2,150
Episcopal.....	15	3,500
Lutheran.....	14	2,000
Methodist.....	50	10,150
Presbyterian.....	24	3,125
Roman Catholic.....	17	2,935

The condition of pauperism and crime is shown by the following statistics:

Total population.....	122,928
Number of persons receiving support during the year ending June 1, 1870.....	28
Cost of annual support.....	\$11,161
Total number receiving support, June 1, 1870.....	28
Native.....	54
White.....	54
Colored.....	88
Foreign.....	53
Number of persons convicted during the year.....	69
Total number of persons in prison, June 1, 1870.....	69
Native.....	44
White.....	35
Colored.....	9
Foreign.....	25

NETHERLANDS, THE, a kingdom in Europe. King, William III., born February 19, 1817; succeeded his father, March 17, 1849; heir-apparent to the throne, his son William, Prince of Orange, born September 4, 1840. The area and population of the kingdom, according to an official statement, dated December 31, 1870, were as follows:

PROVINCES.	Square Miles.	Population.
Drenthe.....	1,028	108,066
Friesland.....	1,254	304,703
Gelderland.....	1,964	439,713
Groningen.....	865	224,903
Limburg.....	851	228,785
Brabant.....	1,960	440,302
North Holland.....	1,054	711,487
South Holland.....	1,155	602,019
Overijssel.....	1,232	260,690
Zealand.....	699	181,471
Utrecht.....	524	175,668
Total.....	12,679	3,668,337

Ball and Lombok.....		200,000
New Guinea.....		200,000
Total.....	614,907	23,237,629

The foreign-born population of these colonies included 13,820 Europeans in the army, 35,541 other Europeans, 1,280 descendants of Europeans, 219,560 Chinese, 12,721 Arabs, and 15,609 Hindoos. The largest cities are: Batavia, 65,000 inhabitants; Surabaya, 90,000; Samarang, 50,000; Surakarta, 50,000; Djoejakerta, 45,000. The revenue in the budget for 1872 amounted to 119,758,388 florins; the expenditure to 109,862,752; surplus, 10,895,586. The budget for 1872 fixes the expenditures at 96,878,092 florins, and the revenue at 88,877,159 florins, showing a deficit of 8,495,938 florins. The public debt, in 1872, amounted to 995,837,326 florins, and the interest payable on the same to 28,120,088 florins.

The army of the Netherlands, in Europe, in 1872, numbered 61,864 men, of whom 1,999 were officers.

The navy, on January 1, 1872, consisted of 67 steamers, with 603 guns, and 42 sailing-vessels, with 486 guns. The imports, in 1870, amounted to 394,970,000 florins; the exports to 357,760,000 florins.

The movement of shipping was as follows:

aggregate length of telegraph-lines was 8,121 kilometres, of telegraph-wires 10,770 kilometres.

The religious statistics of the kingdom, according to the census of 1869, were as follows:

PROVINCES.	PROTESTANTS.		CATHOLICS.		Jews.	Other Sects.

According to their birth places, 3,515,360 were born in Holland, 4,892 in the Netherlandish colonies, 33,766 in Germany, 19,147 in Belgium, 1,007 in England, 5,156 in other countries; of 201 the birthplace was unknown.

The treaty for the cession to Great Britain of the Dutch possessions on the Guinea Coast* met with violent opposition in Holland, and was by many stigmatized as dishonorable. Gradually, however, the excitement subsided, and the treaty was adopted by both Houses. In reply to Mr. Heemskirk, who questioned the Government as to whether there was any intention of using force, in case the Elminois refused to recognize the English protectorate, the Minister for Foreign Affairs, on March 9th, replied that the Government desired the consecutive execution of the treaty, and not wish to use forcible means, any more than England. After a long debate, the Government declared that it would at a convenient time present a report on the execution of the treaty.

The Second Chamber, on March 9th, by 37 votes against 34, adopted a bill rescinding the prohibition against working-men's coalitions, but inflicting penalties upon any attempt to prevent men from accepting work. The debate on the bill lasted four days, in the course of which several deputies sought to demonstrate the dangers of coalitions, and their pernicious effects in other countries, especially in France.

On April 1st the tercentenary anniversary of the beginning of the war of independence against Spanish rule was celebrated throughout Holland with great enthusiasm. The greatest festivities took place in the little town of Brielle, the capture of which, on April 1, 1572, by the patriots, gave the signal to a general insurrection. The King, with the entire court, was present, and laid the foundation of a monument which is to commemorate that event. At various points, the celebration of independence was attended with disorders and breaches of the peace. The most considerable disturbances occurred at Oosterhout, in North Brabant, where a mob collected, broke the windows of houses, and committed other outrages. The demonstrations became so threatening that the town authorities found it necessary to call upon the military to suppress the riot. Upon the appearance of the troops the mob dis-

persed, but several persons had previously been seriously injured. The cause of the outbreak was supposed to be dissatisfaction with the ministry.

In April the Minister of Finance, Blussé, brought in a bill introducing an income-tax similar to the one which exists in England. Although several chambers of commerce and several electoral colleges declared their agreement with the ministerial measure, and fully recognized its appropriateness, the privileged classes of renters and of the large estate-owners organized a violent resistance to the bill, and when, after a ten days' debate, the vote was taken on an amendment favorable to the object, it was lost by a small majority. The entire ministry, consequently, offered its resignation, but, at the special request of the King, they consented to close the current public business (among which was the war budget) by the 1st of July. The president of the ministry, Thorbecke, died before the new ministry was formed, on June 4th.

On July 5th the new cabinet, with the formation of which M. De Vries had been charged, entered upon office. It was composed as follows: Dr. J. G. De Vries, Minister President and Minister of Justice; Dr. J. Geertsema, Minister of the Interior; Dr. J. D. Franssen van de Putte, Minister of the Colonies; L. G. Broer, Minister of the Navy; Major-General Count de Limburg-Stirum, Minister of War; Dr. J. L. H. A. Baron Gericke de Kerwgen, Minister of Foreign Affairs; Dr. A. van Delden, Minister of Finance.

Soon after the formation of the new ministry, the Chambers adjourned to September 15th. At the beginning of September the Congress of the International Society was held in the Hague, and the Government deemed it the best policy not to prohibit the meeting. It was on that account violently attacked by the Conservative party, but public opinion throughout Europe emphatically approved this course of action. The Chamber approved the budgets of the several ministers without serious opposition, and the Colonial Minister succeeded in carrying through a radical modification of the import tariff for the East India Colonies. A bill introduced by the Minister of the Interior, which provided that no child be admitted into school without being vaccinated, called forth a very large number of protests, which designated such precautionary

* See ANNUAL CYCLOPEDIA for 1871.

measures as derogatory to Divine Providence; but both Chambers adopted the bill by large majorities. Among other bills laid before the Chambers, toward the close of the year, was a new electoral law which, if adopted, will increase the number of voters from 100,000 to 180,000.

NEVADA. Nevada was one of the first States in which the Democrats joined in what was known as the Liberal Republican movement. The State Central Committee adopted the following resolutions on the 20th of February:

Whereas, In view of the early meeting of the National Democratic Central Committee, to decide upon the future policy of the national Democracy, it becomes appropriate for the Democracy of the several States to express their opinion as to the course most conducive to the speedy and permanent success of the Democratic party; that said committee may act intelligently and in full harmony with the Democracy throughout the country: therefore—

Resolved, That in the opinion of this committee the elements of opposition to the present Administration, whether they exist within or without the organization of the Democratic party, should be consolidated in the approaching campaign, that the united people may be afforded one more opportunity to express and enforce the convictions of a majority of the republic, and that, in furtherance of this purpose, we invite the cooperation of all who entertain similar views, irrespective of past partisan associations.

Resolved, That in the opinion of this committee the adoption of what is known as the Missouri policy in the nomination for President of the United States is expedient and advisable, and promotive of the best interests of the Democratic party, both nationally and in the State of Nevada; and we therefore recommend to the consideration of the National Democratic Central Committee, and to the National Democratic Convention, the adoption of that policy, should the Cincinnati Convention evince, by its proceedings, a similar desire for mutual cooperation and action.

Resolved, That, reposing faith in the wisdom and patriotism of the National Democratic Convention, we shall give the candidates nominated or endorsed by that body our hearty support.

Resolved, That, animated by an earnest desire for the preservation of constitutional principles, economy in the administration of public affairs, and the restoration of this Government from the corruption and misrule which pervades every department, the committee recommend an earnest, aggressive contest during the approaching campaign, and the thorough organization of the Democratic party in every county and township of Nevada, being confident that we have only to make a united and determined effort to successfully complete the political revolution commenced in 1870.

There was no State election this year, but unimportant conventions were held by both political parties to nominate a Representative to Congress and a board of presidential electors. The whole vote cast at the presidential election numbered 14,649, of which 8,418 were for Grant, and 6,236 for Greeley, giving the former a majority of 2,177. Charles W. Kendall, Democrat, was elected to Congress over C. C. Goodwin, Republican, by a majority of 701. The Legislature, which meets biennially, is at present Republican in both branches. The Governor of the State, elected in November, 1870,

for a term of three years from the following January, is L. R. Bradley, a Democrat; the Lieutenant-Governor is Frank Denver, Democrat; Secretary of State, James D. Mine, Republican; Treasurer, J. Schooling, Democrat; Comptroller, W. W. Hobart, Republican; Attorney-General, L. A. Buckner, Democrat; Chief-Justice of the Supreme Court, B. C. Whitman, Republican.

One of the principal interests of Nevada is silver-mining. With regard to its condition, a well-informed writer said, in May: "During the last two years so many new mines have been opened, and the mechanical details of reducing ore so much improved and enlarged, that success in gold and silver mining in Nevada and California is now the rule, failure the exception. Capital is seconding mining enterprises in the West with a freedom never before experienced. In the Comstock Lode, at Virginia City, which is the greatest vein of silver ever developed, immense bodies of rich ore have been found at a depth of 1,500 feet, and what lies beyond may be judged from the fact that no fissure-vein in the world has ever been exhausted. The shares of one company (Crown Point), which sold in November, 1870, for \$2.50 per share, were quoted in April, 1872, at over \$1,000 per share. During the first three months of 1872 the market value of mines at Virginia City alone has increased from \$15,318,000 to \$40,518,000. Mines elsewhere in Nevada are yielding largely, that at Pioche to the extent of \$10,700 per day."

According to the census of 1870, of the total population (36,655) ten years old and over, there were engaged in all classes of occupations 26,911 persons, of whom 26,468 were males and 443 females. There were engaged in agriculture 2,070, including 2,063 males and 7 females; in professional and personal services, 7,481, including 7,152 males and 279 females; in trade and transportation, 3,621 being exclusively males; in manufactures and mechanical and mining industries, 13,789, including 13,632 males and 157 females.

The State contained 92,644 acres of improved land, 13,415 of woodland, and 102,451 of other unimproved land. The cash value of farms was \$1,485,505; of farming implements and machinery, \$165,718; total amount of wages paid during the year, including value of board, \$438,850; total (estimated) value of all farm productions, including betterments and additions to stock, \$1,659,713; orchard-products, \$900; produce of market-gardens, \$31,235; forest-products, \$86,700; value of home manufactures, \$2,329; value of animals slaughtered or sold for slaughter, \$104,471; of all live stock, \$1,445,449. There were 7,520 horses, 990 mules and asses, 6,174 milch-cows, 2,443 working-oxen, 22,899 other cattle, 11,018 sheep, and 3,295 swine. The chief productions were 147,987 bushels of spring, and 80,879 of winter, wheat, 310 of rye, 9,660 of Indian-corn, 55,916 of oats, 295,452 of barley, 985 of buck-

wheat, 106 bales of cotton, 27,029 pounds of wool, 129,249 of Irish potatoes, 711 gallons of wine, 110,880 pounds of butter, 63,850 gallons of milk sold, 33,855 tons of hay, 3,651 gallons of sorghum molasses, and 363 pounds of honey.

The total number of manufacturing establishments was 380, using 120 steam-engines, of 6,007 horse-power, and 84 water-wheels, of 2,538 horse-power, and employing 2,859 hands, of whom 2,856 were males above sixteen, and three females above fifteen.

The total amount of capital invested was \$5,126,790; wages paid during the year, \$2,493,473; value of materials consumed, \$10,315,984; of products, \$15,870,539.

The whole number of newspapers and periodicals was 18, having an aggregate circulation of 11,800, and issuing annually 2,572,000 copies. There were 5 daily, with a circulation of 7,500; 2 semi-weekly, circulation 950; 5 weekly, circulation, 2,850; 6 monthly, circulation 67,000.

There were 314 libraries, having 158,040 volumes. Of these, 286, with 116,100 volumes, were private, and 28, with 41,940 volumes, other than private, including 8 circulating libraries, with 15,140 volumes.

The total number of religious organizations was 82, having 19 edifices, with 8,000 sittings, and property valued at \$212,000.

The leading denominations were:

DENOMINATIONS.	Organizations.	Sittings.
Episcopal.....	5	1,100
Methodist.....	11	2,550
Mormon.....	1
Presbyterian.....	5	1,100
Roman Catholic.....	10	3,250

The condition of pauperism and crime is shown by the following statistics:

Total population.....	42,461
Number of persons receiving support during the year ending June 1, 1870.....	106
Cost of annual support.....	\$22,722
Total number receiving support June 1, 1870.....	54
Native.....	29

Total.....	139	2,780	44	50	2	2,866	82,253,400	11,166,422

NEW HAMPSHIRE. The Liquor-Sale Prohibition party in this State met in convention at Concord, on the 6th of December, 1871, for the purpose of nominating their candidates for Governor, Railroad Commissioner, and Councillors, to be voted upon at the general election of March 12, 1872. Forty-nine delegates from different sections of the State represented the party at this meeting, which was said to have had "a fair attendance." At the opening of the convention an "Address to the People" was read, and subsequently adopted, pointing to the growing evils produced by the sale of intoxicating beverages, and appealing to them for united action to stop such sale by absolute prohibition.

Among other things relating to the character and magnitude of this evil, the address states, apparently from official documents, that, with regard to the United States in general, liquor-selling "keeps up in our country a standing army of 700,000 confirmed drunkards; it hurries more than 100,000 men into untimely graves with every rolling year; it is the chief cause of taxation, disease, pauperism, and crime." And, with regard to New Hampshire in particular, it avers: "We have a liquor-seller to each 265 of the population of the

State. The United States Government taxed 1,191 liquor-dealers in our State last year, and collected of them \$32,668. It is the liquor-trade that fills our Orphan Home and Insane Asylum, our Reform School and poor-houses, our jails and State-prison; and burdens honest trade and toil with unjust taxation."

For the office of Governor, John Blackmer, of Sandwich, received 42 out of the 49 votes. A. S. Kendall, of West Swanzy, was nominated for Railroad Commissioner without ballot. The nominations for councillors, etc., were intrusted to the State Committee.

The following preambles and resolutions were adopted by the convention:

Whereas, The great object of government is to insure domestic tranquillity, provide for the common defence, promote the general welfare, and secure the blessing of liberty to ourselves and our posterity; and—

Whereas, The sale and use of intoxicating liquors is the greatest obstruction to the attainment of these ends, inasmuch as it enormously increases expenditure, taxation, pauperism, and crime: therefore—

Resolved, That, while we advocate the most rigid economy in the administration of the Government, the strictest honesty in official as well as in private life, the purity of the ballot, the development of the industrial capacities of the people, and as speedy a resumption of specie payment as practicable, we

make the prohibition of the sale of intoxicating liquors, and the faithful and impartial execution of the prohibitory law, the paramount issue of the present day.

Resolved, That a political party that does not meet this issue, and pronounce unequivocally against this monster evil, is unworthy the support of temperance men, and undeserving of government honors.

Resolved, That the State government, having the same power to enforce the criminal laws of the State as to enact them, should be held responsible for the violation of the same and the results growing out of that violation, while it does not use all its constitutional power for the faithful execution of said laws.

A Prohibition Press Association, devoted to the promotion of the interests of the temperance party, was also formed.

The Labor Reform party of New Hampshire assembled in State Convention at Concord, on the 7th of December, 1871, the number of delegates present being 187, and representing 37 towns. Their candidates were nominated as follows: Lemuel C. Cooper, of Croydon, for Governor, and Levi B. Tucker, of Plaistow, for Railroad Commissioner.

The sentiments and purpose of the Labor Reform party are embodied in the following resolutions:

Resolved, That the political events which have occurred since the last State Convention of the People's Reform party confirm the declaration then made, that the public welfare demands a new political party, freed from the extravagance, dishonesty, and corruption of the old organizations.

Resolved, That we adhere to our distinctive principles as heretofore avowed, demanding a reform in the revenue service, a reduction in the number of revenue officers, a decrease of the expenses of collecting duties and district taxes, and a more rigid responsibility and economy in all the departments of public service.

Resolved, That we still maintain that which has always been our policy, and is now indorsed by President Grant in his message, that the reduction of the tariff upon articles of general use is demanded by the people, and we call upon Congress no longer to resist, but to ratify the recommendation.

Resolved, That we call upon the President and Congress for the immediate repeal of that unjust monopoly, the present national banking system, which is a fraud upon the industry and enterprise of the nation, imposing upon the laboring masses an annual tax of more than \$20,000,000, for the sole benefit of the bondholder and capitalist, and the issue of a sufficient amount of greenbacks to meet the demands of trade under a free banking system, and thereby make a saving of more than \$50,000,000 annually in the item of interest alone.

Resolved, That we demand not promises, but a thorough, positive reform in the civil service, so that appointment to office will no longer depend on party patronage, and cannot be used as a means of corrupting the politics of the country, and perpetuating unworthy men in office.

Resolved, That we deprecate the levying of blackmail upon clerks and other public officers for political party purposes, as degrading and debasing the public service.

Resolved, That we congratulate Senators Sumner, Schurz, Trumbull, and Patterson, and their coadjutors in the Senate, upon their triumph in opposing and squelching the dangerous and corrupt scheme of the President for annexing San Domingo.

Resolved, That the thorough rebuke administered to the Tammany thieves by the freemen of New

York is cheering to every true reformer, and that the same spirit of action ought to be followed up until all plunderers and thieves, whether high or low, in both the State and national Government, are driven from their positions and punished as they deserve; to the end that this government of the people may truly be a government of the people, by the people, for the people.

Resolved, That the recent discovery of forgeries and defalcations among officials in New Hampshire justifies the inference that, if a thorough investigation could be made, too many would be found to exist in our midst.

Resolved, That, while we welcome immigrants of all nationalities who come hither of their own free-will and accord for the purpose of becoming citizens, we are utterly opposed to the importation of Chinese by corporate capital, for the purpose of creating a species of slavery, and reducing the wages of American working-men.

Resolved, That the present system of taxation in New Hampshire is defective, unequal, and wanting in that uniformity among the various towns which justice and impartiality demand, and that we call upon the coming Legislature to pass a law having the essential features of the one defeated at the last session.

Resolved, That the thanks of this convention are due to the Hon. Horace Greeley, of the *New York Tribune*, for his efforts to expose and reform the abuse, frauds, corruption, iniquities, and usurpations of the Grant Administration.

The Democratic party held its State Convention at Concord, on December 13, 1871. James A. Weston, of Manchester, who was then Governor, was renominated by acclamation. The Railroad Commissioner nominated was Henry Colony, of Keene.

The following platform was adopted:

Resolved, That the Democracy of New Hampshire firmly adhere to the principles hereby enunciated:

1. The perpetuity of the Union, a strict obedience to the Constitution, and an honest enforcement of the laws.
2. The protection of the rights of every citizen, in accordance with the fundamental law.
3. Opposition to every species of corruption in all departments of municipal, State, and national Governments.
4. No privileged classes and no privileged capital.
5. A tariff that raises money for the necessary expenses of the Federal Government, and not for the benefit of monopolists.

Resolved, That the recent declaration of martial law over a portion of the republic is an atrocious use of an unconstitutional enactment; and we hereby denounce that enactment as subversive of every principle of civil liberty, false in its pretenses, and in its enforcement and outrage demanding earnest remonstrance and rebuke; and we invite all patriotic citizens of New Hampshire, who are opposed to the present national Administration, to join with us in efforts to stay the tide of corruption and centralization which threatens to destroy the civil liberties of the people.

Resolved, That we pledge ourselves to a reform of the civil service of the General Government, to a vigorous prosecution of reform in our own State, the reduction of its expenditures to the lowest practicable limit, the elevation of the courts of justice above the influence of any personal or partisan considerations, and the enactment of all necessary laws which public sentiment will sustain and public officers be required to enforce.

Resolved, That we reaffirm our confidence in Governor James A. Weston, as personally and officially above reproach; and we pledge our united efforts to secure his reelection.

The Republicans of New Hampshire assembled in State Convention at Concord, on January 8, 1872, there being 662 delegates present. For Governor, Ezekiel A. Straw, of Manchester, was nominated. For Railroad Commissioner, Albert S. Twichell, of Gorham, was nominated.

The following platform was adopted by the convention :

Resolved, That the Republican party is still, as it ever has been, the party of freedom, improvement, retrenchment, and reform, that, having during its past short but eventful career secured and established the right of every man to his own limbs and sinews and earnings, the equality of all men before the law; the inability of a State to enslave any portion of its people, and the duty of the Union to guarantee to every citizen the full enjoyment of his liberty and rights until he forfeits them by crime; its mission henceforth is one of peaceful but actual progress to protect the weak and humble from violence and oppression, to extend the boundaries and diffuse the blessings of civilization, to promote universal education and the general diffusion of knowledge; to see that all laws are faithfully executed, and justice impartially administered, to stimulate ingenuity in the discovery of new inventions of economizing labor and thus enlarging production, the only real source of individual or national wealth, to encourage agriculture as well as manufactures, mining, and the mechanic arts, thereby bringing nearer together the producers of food and fabrics, and furnishing both with a home market, thus exchanging the gains of industry and the wages of labor by reducing the cost of transportation and diminishing the expense of exchanges between farmers and citizens; retrench unnecessary expenditures, reduce taxation to the lowest point consistent with the maintenance of the national credit, abolish all unnecessary offices, rebuke venality and expose and punish corruption and robbery; to wrest power from the hands of mere politicians by trade and confide it to those most worthy and best qualified to wield it, by electing and appointing to office only honest and faithful men, so to administer every department of the Government with the most rigid economy and the strictest fidelity, that its burdens may bear as lightly and its benefits be as generally diffused as possible, and thus make a happier and brighter future for the toiling masses and contribute to the welfare, enlightenment, and happiness of the whole people.

Resolved, That the success of the present national Administration in reducing the public debt, diminishing and equalizing taxation, administering every branch of public affairs with economy and efficiency, forming and improving the civil service, enforcing the laws without fear or favor, protecting the nation's wards with paternal care against the cruel avarice of speculation and fraud, and maintaining friendly relations with foreign powers, has been such as to command the approbation of the great majority of the American people and justly entitle it to the confidence and commendation of every true Republican.

Resolved, That, while not unwilling to let the dead past bury its dead, we cannot forget, and the American people can never forget that to the so-called Democratic party and its leaders, South and North, we owe all the calamities of the late slaveholders' rebellion and the burden of debt now resting upon the industry of our State and nation.

Resolved, That so long as a single soldier, disabled in the war for the Union, remains to be provided for; so long as one dollar of the National debt incurred in the prosecution of the war remains unpaid; so long as loving hands do not cease to garland with flowers the graves of our heroes fallen in the defence of liberty and country—so long should not the gov-

ernment of that country be surrendered to the control of those who sought or would have permitted its destruction.

Resolved, That the Republican party, while justly proud of its past history, is not unmindful of its duties to the present, or of its obligations to the future. In its name, therefore, and the name of the people of New Hampshire, we inscribe upon our banners, "Honesty, economy, retrenchment, and reform—honesty in the public service, economy in the public expenditures, retrenchment of all unnecessary offices, and reform, moral, social, and political, everywhere."

Resolved, That, one of the primary objects of civil government being the protection of property, the wealth of the country should bear its full proportion of the expenses of the Government, and all taxation to be just must be equal.

Resolved, That we call upon Congress to abolish the franking privilege, give the people the cheapest practicable postage, make no more grants of the public lands except as free homesteads to actual settlers, reduce the expenses of the army and navy, encourage every department of honest industry, secure to labor everywhere its just reward, and promote universal education.

Resolved, That the Democratic party, in the course of its brief and accidental control of our State government, by its wanton expenditure of the public money and consequent increase of the State debt, by its greed for office and recklessly partisan legislation, by its complete subserviency to demagogues, and the appointment of incapable and inefficient men to office, has shown itself to be signally unworthy of the confidence and support of the people, and that particularly the course of the leaders of that party in attempting to gerrymander senatorial districts and ward lines, thus outraging the most sacred rights of the people, and in prolonging the session of the Legislature for weeks after the public business was completed, for no other purpose than to secure the offices of the State for its adherents by a resort to bribery, fraud, intimidation, and revolution, has merited the rebuke and should receive the condemnation of every honest man in New Hampshire.

Resolved, That President Grant, by the wisdom, prudence, skill, honesty, sagacity, and abundant success with which he has administered the affairs of the nation as its executive head, has fully justified the confidence reposed in his integrity and ability as a statesman by the Republican party, and richly merits a renomination and reelection at their hands, and we confidently propose him as the Republican standard-bearer in the presidential campaign of 1872.

The election was held on March 12, 1872. The entire number of votes polled was 76,840, which is 785 less than in 1868. Straw (Republican) received 38,621; Weston (Democratic), 36,585; Cooper (Labor Reform), 540; Blackmer (Temperance), 478; scattering, 16. The majority of the Republican candidate over the Democratic was 2,036; over all his competitors together, 1,002. In the Council, there were 4 Republicans to 1 Democrat; in the Senate, 8 Republicans to 4 Democrats; and in the House of Representatives, the Republican majority was 56.

The members returned to the Lower House were 365, which was the largest number ever elected to it in New Hampshire. There were five vacancies, a full House consisting of 370 members. The large increase in the number returned was the effect of a law enacted at the previous session, which declared that "every

voter and every person in the State, who is twenty-one years of age and upward, and who is liable or subjected by law to a poll-tax, should be considered a ratable poll." By the working of this law, twenty among the towns in the State returned 29 more representatives at the election of 1872 than they had done in 1871; the increase in their numbers ranging between one and six, in proportion to their populations, respectively.

On the 8th of May the Republicans met in State Convention at Concord, for the purpose of electing delegates to the General Convention, to be held at Philadelphia, on the 5th of June. The meeting was fully attended, and the deliberations were harmonious, there being unanimity of sentiment among the members present. Four delegates at large were elected.

The committee on resolutions reported the following, which were adopted:

Resolved, That in General Ulysses S. Grant we recognize a statesman as well as a general; a man patriotic and wise in peace as brave and skilful in war; a man who, by a judicious administration, has gained the confidence of and endeared himself to the American people; and, as expressive of the sentiments of the Republicans of New Hampshire indicated in the recent election, we sincerely desire his renomination and reelection.

Resolved, That while we fully and cordially acknowledge the great merits and services of the Hon. Schuyler Colfax and of other Republican statesmen whose names have been presented in connection with the vice-presidency, we cannot refrain from expressing our preference for the Hon. Henry Wilson, an early, faithful, and untiring champion of freedom and humanity, and a statesman of signal ability, spotless integrity, and unswerving fidelity to Republican principles.

The Convention then adjourned.

The Democratic party assembled in convention in June, and chose delegates to represent them at the Baltimore Convention on the 9th of July.

The State Legislature met on the 5th of June, 1872. In the Senate, Charles H. Campbell, of Nashua, was chosen President. In the House of Representatives Asa Fowler, of Concord, was elected Speaker.

The election of the Secretary of State and other public officers, by the Legislature, took place on the 13th of June, with the following result: For Secretary of State, Benjamin F. Prescott, of Concord, was elected; for State Treasurer, Solon A. Carter, of Keene, was elected; Owen O. Moore, of Nashua, was elected State Printer; and Charles F. Montgomery, of Stratford, Commissary-General.

The public debt of New Hampshire was reduced by \$427,658.70 during the fiscal year ending May 31, 1872, and also increased by more than \$2,000,000; although this increase does not represent a new debt, but only the assumption by the whole community of a portion of the debts which the single cities and towns had respectively contracted for war expenditures, and which recent legislative enactment authorized the State to reimburse to

a limited amount. In order to carry this measure into execution, commissioners were appointed to examine the amounts of such expenditures in the several cities and towns concerned, and apportion the relative sums of reimbursement among them. Having concluded their investigation, the commissioners awarded the said local reimbursements, amounting in the aggregate to \$2,205,695.44; for which sum the State, on the 1st of January, 1872, issued her bonds to the cities and towns.

The financial condition of New Hampshire in regard to the public revenue and expenditure during the last fiscal year, and her indebtedness on the 1st of June, 1872, was as follows:

Total revenue of the State for the year ending May 31, 1872, was.....	\$782,154 45
The total expenses of the State for the same period, including the payment of interest on liabilities of one year since, were.....	304,495 75

Surplus of revenue.....	\$477,658 70
-------------------------	--------------

A brief statement of this debt is as follows:

Total liabilities, June 1, 1871.....	\$2,457,847 13
Reimbursement bonds issued, January 1, 1872.....	2,205,695 44

Total.....	\$4,663,542 57
Less assets in Treasury, June 1, 1871.....	97,759 61

Net.....	\$4,565,783 96
----------	----------------

Old liabilities remaining, June 1, 1872.....	\$2,075,733 07
Reimbursement bonds.....	2,205,695 44

Total.....	\$4,281,428 11
Assets in Treasury, June 1, 1872.....	143,308 85

Liabilities of State, June 1, 1872.....	4,138,124 26
---	--------------

Reduction of debt.....	\$427,658 70
------------------------	--------------

The levy of the State tax, which for several years had steadily amounted to \$600,000, was reduced for 1872 to one-half that sum by legislative enactment. The current expenditure of the State being now increased by \$182,000, annual interest on the reimbursement bonds—besides that State bonds to the amount of \$350,000 will mature in 1873, and as much more in 1874—the Governor recommended that, in order to meet these additional yearly payments, the levy of the State tax for 1873 should be raised to the former amount of \$600,000, and to continue for some time, to be then proportionally reduced as the affairs of the State would permit, saying: "With such a tax continued during the next five years, together with the other revenues of the State, and the aid of such temporary loans as can always be readily obtained, we should be able to redeem the bonds of the State as they mature, pay the interest on our debt, and meet the current expenses of the State; after which time the same could be done with a tax of \$450,000 per annum, or less." An act was passed at this session, providing that the State tax for 1873 should be assessed and collected to the amount of \$600,000.

The valuation of the State has largely increased within four years, although made

"under a system of local valuation well understood to grossly underrate the value of property."

The Legislature passed two acts, both approved July 4, 1872, one of which relates "to the appraisal of taxable property," and amends general statutes by inserting in it a few words which enjoin the public appraisers so to value property for taxation "as they would appraise the same in payment of a just debt from a solvent debtor." The other act is "to establish a new proportion for the assessment of public taxes," and sets down the specific sum of "the proportion of every thousand dollars of public taxes hereafter to be raised, which each town and place shall pay;" the list of these towns and places in every county of the State, and the sum to be paid by each of them, being inserted in the act. It ordains also that "this same shall be the proportion of assessment of all public taxes, until a new proportion shall be made and established."

Two banks of discount still remain in New Hampshire doing business under a charter of the State. One of them had its charter renewed last year by act of the Legislature. The capital of this one is \$50,000.

There are, in New Hampshire, 54 savings-banks, with deposits amounting in the aggregate to \$24,700,744.47, and an accumulated surplus of \$1,038,624.01; so that their total assets belonging to depositors are \$29,739,368.48. Two of these banks went into operation last year. The number of depositors returned is 86,290, embracing more than one-fourth of the whole population of the State. The increase in the number of depositors, as compared with the previous year, was 9,818, or 12½ per cent., and in the amount of deposits it was \$3,228,623.47, or 15 per cent.

The education of youth appears to be carefully and successfully attended to in New Hampshire. The number of public schools in the State, of pupils attending them, and the cost of their working during the last year, are exhibited in the following summary statement:

Whole number of school-districts.....	2,334
Whole number of schools.....	2,453
Graded schools.....	335
Whole number of boys.....	37,906
Whole number of girls.....	31,784
Average attendance.....	49,293
Number reported between four and fourteen years of age not attending any school.....	4,602
Whole number of male teachers.....	585
Average wages per month, including board.....	\$37 56
Whole number of female teachers.....	3,241
Average wages per month, including board.....	\$34 33
Estimated value of school-houses and lots with appurtenances.....	\$1,870,000 00
Amount of money raised by town taxes for support of schools.....	\$68,538 73
Amount raised beyond what the law requires.....	\$43,466 92
Entire amount appropriated for support of schools.....	\$568,527 77
Appropriations for each scholar.....	\$6 43

The operation of the existing law concerning school-districts was modified by an act of the Legislature at the session of 1870, "enabling towns to abolish school-districts by

a vote at a legal meeting." Of all the towns in the State, Milford alone availed herself of the power given by the act; and the chairman of her Board of Education states that "the working of the new system since its adoption in March, 1871, has been more satisfactory than was anticipated." The Superintendent of Public Instruction, in his last report, recommends a trial of the same plan in the towns generally.

The State Normal School, which has been recently established to qualify teachers for the common schools, seems to have fully realized the object intended in its institution, as appears from the following statement: "During the opening short term of eight weeks, in the spring of 1871, more than 80 normal pupils were present. The fall session numbered 130 pupils, six of whom graduated. During the winter 70 of these were employed in teaching, mostly in the schools of New Hampshire, and 60 returned to the Normal School. The present spring session numbers 132 normal pupils, and has been a very successful term. Two model schools, the Primary and Intermediate, are connected, for the benefit of the Normal Department."

The State Reform School for the correction and education of wayward boys was as prudently and successfully managed last year as it had been before. Its financial condition was more prosperous than in the previous year, as, with about the same number of inmates, the current expenses of the establishment were less, and the earnings of the boys by their labor considerably larger.

The affairs of the State-prison appear to have been in a satisfactory condition. "Its business management for the past year has resulted in a profit to the State of more than \$5,000, and the books of the treasurer show a balance, in favor of the prison, of more than \$12,000 cash in hand."

The Asylum for the Insane was established in 1842. The report of the Superintendent shows that "on the 1st day of May last there were 225 persons under treatment in the institution—114 males and 111 females. During the year 102 have been discharged, and 21 have died. Of these, 55 were fully restored, 31 partially restored, and 16 not improved. There have been, in all, 8,091 persons at the institution since its start. Of these, 1,261 have been restored to reason; and 637 others, without being fully restored, have so far improved as to be tolerable members of general society, and, as such, gone to their homes. The whole number of patients supported by towns, any part of last year, was 65."

Manufacturing establishments have been considerably increased in various portions of the State, and the towns and villages in their neighborhood have thereby sensibly increased in wealth and prosperity.

The railways were largely extended during the year, and new lines opened to the use of

important sections, which had before been deprived of the advantages resulting from them. The aggregate length of railroads within New Hampshire, at the beginning of 1872, was 799.32, built at a cost of \$25,750,-817.

Among the great interests of the State the agricultural seems to have made remarkable progress since 1860, as appears from the following comparative statistics: "In 1860, the census gave the valuation of farms in New Hampshire at \$69,689,761; farming-implements, \$2,682,412; and live farm-stock, \$9,832,164; making the total amount of capital invested in farming, \$82,204,337. The productions from these farms for the year 1860 amounted to over \$19,000,000, and the expense of labor and taxes about \$15,000,000, being a net income of over \$4,000,000, or over 5 per cent. on the entire capital invested in farming. This does not include productions of gardens or poultry, which would amount to several hundred thousand dollars, or nearly one per cent. By the ninth census, taken in 1870, the farms had increased in value to over \$80,500,000; farming-implements to \$3,459,000; and live-stock to over \$13,721,000; making the whole capital invested in farming over \$97,771,000, a gain in ten years of over \$15,500,000, or 19 per cent., or nearly two per cent. per annum. The productions amounted, for the year 1870, to over \$22,475,000, and labor and taxes to about \$17,000,000, leaving a net income of over \$5,000,000, or 5½ per cent. on the capital invested in farming. Add the increase of two per cent. per annum, in the value of farms for the past ten years, and it makes the income of 7½ per cent. per annum on the capital invested in agriculture."

The establishment of a State Board of Agriculture, created by an act of the session of 1870, has met the unanimous approbation of the farmers, and very beneficial results are anticipated from its operations. This body consists of ten members, one from each county in the State. They hold their meetings at different places in turn, thus coming into close contact with the farmers residing in various sections, and disseminating among them the information of the best methods of agriculture, and of measures necessary to render it profitable. The members of the Board receive no compensation for their services, but only the reimbursement of their expenses, which seem to be inconsiderable, as, in the case of one among them, they amounted to \$21 for eighteen months. Its Secretary receives \$400 a year, which sum the Governor and Council might, in their discretion, increase to \$1,200.

The work of the Geological Survey of New Hampshire, which was authorized by legislative enactment in 1868, for the purpose of ascertaining and defining the resources of the State, has been steadily pursued, and its results last year seem to be of unusual importance toward determining geological facts.

With a view to ascertain her natural resources by water also, a joint resolution has now been adopted by the Legislature, authorizing "the appointment of three commissioners to make a hydrographical survey of the State."

Among the acts passed by the Legislature was one in behalf of women, allowing them to hold school-offices; and a more important one which provides "that a widow whose husband dies intestate, leaving or not leaving lineal descendants, by waiving her right of dower and homestead, or releasing her distributive share, shall be entitled to receive instead thereof one-third of all the estate remaining after the payment of the debts and the expenses of the administration, if no provision is made for her by the will of the deceased, or if she shall waive such provision. If settlement has been made upon the wife before marriage, this act shall not be in force."

The Democrats and Liberal Republicans of New Hampshire, in pursuance of arrangements previously made, assembled separately at Concord on the 11th of September, 1872. The following resolution was proposed to the Democratic Convention, and unanimously adopted:

Resolved, That this convention approves the platform of principles adopted by the Cincinnati and Baltimore Conventions, and pledges its hearty support to the nominees of said Convention—Horace Greeley and B. Gratz Brown—for President and Vice-President.

The Liberal Republicans, on their part, adopted the following platform:

We, Liberal Republicans of New Hampshire, in mass convention assembled, satisfied that the Republican party, as now organized and controlled in our State, is not the party of the people, but instead an instrument in the hands of office-holders and political adventurers, whose selfish ends are accomplished by base means, and the best interests of the country are sacrificed to the personal profit and greed of the worst men; and having full confidence that the time has arrived when true patriotism demands an effort for permanent and honorable reconciliation between patriotic men of all sections and of all parties, to the end that we may restore the Government to its proper and legitimate purposes, we declare the following platform of principles:

1. We accept the platform adopted at Cincinnati as embodying the true political theories applicable to the present condition of the country; and, believing that their honest administration can only be had at the hands of honest men, we heartily indorse the nomination of Horace Greeley and B. Gratz Brown for President and Vice-President; and we hereby pledge them the hearty support of the Liberal Republicans of New Hampshire.

2. We recognize in the position of the Liberal Democracy a consistent and honorable endeavor to cement fraternal relations among all citizens who desire reform in civil service, economy in public affairs, a recognition of the just rights of the people, and a return to sound principles of government, and we pledge them our full cooperation on these bases to secure these vital and essential results.

3. Public officials should be the servants of the people, not the tools of party; and we denounce all interference of office-holders, State and Federal, in our elections, the use of money, and all unjustifiable agencies to control votes, and the whole system under which fealty to party is made the test of political orthodoxy.

4. We recognize the gentlemen this day nominated by the Liberal Democracy and the Liberal Republicans of New Hampshire for electors, as every way worthy of confidence, and we will give them our hearty support at the polls in November next.

The total vote for President, in November, was 68,592, of which General Grant received 37,168, and Mr. Greeley 31,424. The total vote in 1868 was 69,415. The O'Connor ticket, in 1872, received 100 votes, and the Temperance ticket 200 votes.

According to the census of 1870, of the total population (260,426) ten years old and over, there were engaged in all classes of occupations, 120,168 persons, of whom 96,038 were males and 24,135 females. There were engaged in agriculture, 46,573, including 46,562 males and 11 females; in professional and personal services, 18,528, including 8,821 males and 9,707 females; in trade and transportation, 8,514, including 8,126 males and 388 females; in manufactures and mechanical and mining industries, 46,553, including 32,524 males and 14,029 females.

The State contained 2,884,487 acres of improved land, 1,047,090 of woodland, and 224,417 of other unimproved land. The cash value of farms was \$80,589,318; of farming-implements and machinery, \$3,459,943; total amount of wages paid during the year, including value of board, \$2,319,164; total (estimated) value of all farm-productions, including betterments and additions to stock, \$22,473,547; orchard-products, \$743,552; produce of market-gardens, \$110,997; forest-products, \$1,743,944; value of home manufactures, \$234,062; value of animals slaughtered or sold for slaughter, \$3,720,243; of all live-stock, \$15,246,545. There were 39,095 horses, 37 mules and asses, 90,583 milch-cows, 40,513 working-oxen, 91,705 other cattle, 248,760 sheep, and 33,127 swine. The chief productions were: 189,222 bushels of spring, and 4,399 of winter, wheat, 47,420 of rye, 1,277,768 of Indian-corn, 1,146,451 of oats, 105,822 of barley, 100,034 of buckwheat, 155,334 pounds of tobacco, 1,129,442 of wool, 58,375 bushels of peas and beans, 4,515,419 of Irish, and 160 of sweet potatoes; 2,446 gallons of wine, 5,965,080 pounds of butter, 849,118 of cheese, 2,352,884 gallons of milk sold, 612,648 tons of hay, 99,469 pounds of hops, 1,800,704 of maple-sugar, 16,864 gallons of maple molasses, 56,944 pounds of honey, and 2,668 of wax.

The total number of manufacturing establishments was 3,842, using 280 steam-engines of 8,787 horse-power, and 2,312 water-wheels of 68,291 horse-power, and employing 40,783 hands, of whom 25,829 were males above sixteen, 12,775 females above fifteen, and 2,179 youth.

The total amount of capital invested was \$36,023,743; wages paid during the year, \$18,823,091; value of materials consumed, \$44,577,967; of products, \$71,038,240.

The whole number of newspapers and periodicals was 51, having an aggregate circulation of 173,919, and issuing annually 7,237,588 copies. There were 7 daily, with a circulation of 6,100; 37 weekly, circulation 75,819; 1 semi-monthly, circulation 25,000; 6 monthly, circulation 67,000.

There were 1,526 libraries, having 704,269 volumes. Of these, 856, with 379,876 volumes, were private, and 670, with 324,393 volumes, were other than private, including 29 circulating libraries, with 47,217 volumes.

The total number of religious organizations was 633, having 624 edifices, with 210,090 sittings, and property valued at \$3,303,780. The leading denominations were:

DENOMINATIONS.	Organizations.	Sittings.
Baptist.....	184	51,925
Christian.....	19	4,600
Congregational.....	169	67,951
Episcopal.....	21	7,475
Methodist.....	118	36,351
Second Adventist.....	21	4,403
Unitarian.....	23	7,330
Universalist.....	24	8,612

The condition of pauperism and crime is shown by the following statistics:

Total population.....	318,300
Number of persons receiving support during the year ending June 1, 1870.....	2,685
Cost of annual support.....	\$335,135
Total number receiving support, June 1, 1870.....	2,129
Native.....	1,734
White.....	1,730
Colored.....	13
Foreign.....	355
Number of persons convicted during the year.....	182
Total number of persons in prison, June 1, 1870.....	267
Native.....	201
White.....	199
Colored.....	2
Foreign.....	66

NEW JERSEY. The Legislature, which was strongly Republican in both branches, was in session from January 7th to April 4th, without passing any important measures of public interest, with one or two exceptions. A measure, exciting much local attention, was the local option law, which provided for elections every year in every town, city, borough, and township, in the State, at which it should be determined by popular vote whether licenses should be granted to sell certain liquors in the town, etc.; and, in case such license should not be granted it was made unlawful to sell such liquors, and any person so offending was made guilty of a misdemeanor, and liable to a fine of from \$50 to \$100 for the first and not less than \$100 for any subsequent offence. This measure was pronounced unconstitutional by the Attorney-General of the State, and failed to become a law. Bills were passed consolidating the several railroads leased to the Pennsylvania Central Railroad Company (see ANNUAL CYCLOPEDIA, 1871), and reducing the number of directors to thirteen, and giving the State one instead of two directors; also consolidating the branch lines, ferries, turnpikes, etc., owned by the Pennsylvania Central Railroad Company in New Jersey, into a subordinate

corporation, with \$5,000,000 capital stock. A supplement was added to the law for the prevention of bribery passed the preceding year, extending its provisions to the election of electors for President and Vice-President of the United States.

By the Federal census of 1870, New Jersey is entitled to seven representatives in Congress, instead of five, as formerly; it became, therefore, the duty of the Legislature to reapportion the districts.

There seems to have been unusual interest manifested throughout the State during the summer in national politics, owing to the novel attitude of the national political parties. No less than seven State Conventions were held, at which resolutions were passed embodying the various phases of political sentiment throughout the State, both before and after the action of the national conventions. The Republican Convention, called to choose delegates to the Philadelphia National Convention, assembled at Trenton May 23d, and adopted the following resolutions:

The Republicans of New Jersey, in State Convention assembled, at Trenton, May 23, 1872, make the following declaration of principles:

1. We recognize the great principles laid down in the immortal Declaration of Independence as the true foundation of democratic government, and we hail with gladness every sincere effort toward making these principles a living reality on every inch of American soil.

2. The wisdom of the passage of the thirteenth, fourteenth, and fifteenth amendments to the Constitution having been fully demonstrated by their operation, we are opposed to any repeal or modification thereof.

3. We favor the removal of the disqualifications and restrictions imposed upon the late rebels in the same measure as their spirit of loyalty will direct, and as may be consistent with the safety of the loyal people, and we approve the recent action of Congress in the passage of the amnesty bill as a wise step in that direction.

4. We are heartily in favor of such a reformation in the civil service that good character and ability shall be the chief recommendations to office, and not political service rendered or to be rendered; therefore, we cordially indorse the appointment and labors of the Civil Service Commission, and the messages of President Grant thereon.

5. We desire the early and total repeal of the income-tax and franking privilege.

6. While remembering we have a large national debt which must be paid, with accruing interest, we nevertheless desire that the burdens of taxation should be removed from the people as rapidly as the national faith will permit.

7. We take especial pride in commending the economy of the national Administration in all its branches, and with gratification we point to the fact that since the inauguration of President Grant the national debt has been reduced \$328,000,000.

8. We are in favor of such legislation as will secure to all men equal and exact justice under the laws, without regard to color, creed, or race.

9. We earnestly invite all those who for any cause are temporarily alienated, and yet believe in republican doctrines, to unite in mutual concessions with us in preserving intact the ever-living principles of that great party that saved the nation, crushed rebellion, freed the slaves, enfranchised the bondmen, and brought peace and prosperity out of rebellion and discord.

10. We acknowledge our gratitude and deep obligation to the soldiers and sailors of the republic, who on land and sea fought the nation's battles against the armed hosts of the South; as they have proved their devotion and fealty in the past when the life of our country was in danger, and as combinations are forming which may jeopardize the great results of the war, we call upon them again to give us their powerful aid and support in maintaining our republican principles and the priceless legacies of the war against all and every combination whatsoever.

11. We fully indorse the Administration of President Grant, and believe that the best and highest interests of our country demand the renomination and election of General Grant as President, and Schuyler Colfax as Vice-President.

On the 26th of June the Democracy assembled in convention at Trenton, and, having elected delegates to the National Democratic Convention in Baltimore, expressed the sentiments of their party in the following resolutions:

Whereas, During the greater portion of the time since the organization of the States of the Union the Democratic party has administered the affairs and declared the policy of the national Government under its administration, constitutional liberty prevailed throughout the country, individual rights were protected and prosperity characterized all our material interests, to restore the Government to its former condition under Democratic rule, and particularly to reestablish a sound financial policy, the paramount importance of personal liberty, and the decentralization of power, is the first duty of every citizen: therefore,

Resolved, That the true interests of our country require the establishment of the principles, the policy, and the administrative experiences of the Democratic party.

Resolved, That we cordially invite the coöperation of all of our fellow-citizens who are opposed to the pernicious principles and conduct of affairs of the present Administration, and who are in favor of the decentralization of the Government, the remission of local self-government to the several States, the relief from existing taxation by restricting the expenses of the collection and the enormous expenditures of the Government, the inviolability of the personal freedom and a return to those principles of government which distinguished the Administrations of Jefferson, Madison, and Jackson.

Resolved, That local self-government is a right inherent in the people, and essential to liberty; that in creating a central government, with grand powers for general purposes, the people did not surrender their right, but reserved to themselves the control of their home affairs; that any attempt on the part of Congress to interfere, under any pretext, with a full and free exercise of this right, is a usurpation which the people ought not to tolerate, because its toleration leads to the destruction of the personal liberties and municipal privileges of the citizen, and the abandonment of all that renders free government valuable.

Resolved, That so far as the Cincinnati platform agrees with the above principles set forth it meets our approval.

Resolved, That we do authorize and instruct our State Executive Committee to unite and coöperate with any other committee or organization in this State opposed to the present national Administration.

Resolved, That we pledge ourselves to abide by and support the nominees of the Democratic National Convention.

Prior to these conventions, however, early in April a State Convention of colored voters

was held in Trenton, and resolutions passed, thanking President Grant for his economical policy and his devotion to the colored people, and pledging him their support for the presidency. After the renomination of President Grant, the Republicans again assembled in convention, to choose presidential electors, and adopted resolutions as follows:

Resolved, That the Republican party of New Jersey, in convention assembled, do hereby declare anew their adherence to the principles of republicanism, as so often proclaimed in former conventions, and acted out wherever power has been intrusted to us by the people—in the General or State governments: equal rights for all men before the law and at the ballot-box; a thorough and economical administration of public affairs; the intrusting of places of honor or power only to worthy men; and the prompt removal of those who have proved themselves unworthy; and we cordially indorse the platform adopted at the Philadelphia Convention in June last, and commend the same to our fellow-citizens of New Jersey for their support.

Resolved, That the best interests of New Jersey demand the continuance in power of the present Administration, under which all our material interests have prospered beyond all precedent, and of a Congress that will be in harmony with that Administration, and will carry out its policy of peace at home and abroad; a thorough enforcement of the laws, and the removal of abuses that have gathered about civil service during the last forty years.

Resolved, That the great political parties of the country to-day are substantially the same as they were four years ago, whatever attitude the Democratic party may to-day assume, or whatever candidates it may put in nomination; and we confidently point to the present prosperous condition of our country as a strong argument for the continuance in power of the Republican party, and we cordially invite all honest voters of the State to coöperate with us to this end.

Resolved, That we pledge our best endeavors to imitate the example of our gallant brethren in North Carolina, and to roll up for the whole Republican ticket a handsome majority in November next, and cast our nine electoral votes for Grant and Wilson.

The following from the State Committee was adopted after a lengthy discussion:

Resolved, That the basis of representation in all future Republican State conventions in New Jersey be one delegate for each 200 votes cast for the Republican candidate for President at the preceding presidential election, and one delegate for each fraction of 200 votes exceeding 100, and that each township and ward shall be entitled to one delegate.

Conventions for the selection of presidential electors were held in Trenton on the same day, September 11th, by the Democratic and by the Liberal Republican parties. The principles affirmed by the former were:

Whereas, We believe that the present Administration at Washington has destroyed the trusts committed to its charge by the people of this nation, by ceasing to regard the power and service of the Government as agencies to be employed for the good of the nation at large, and the well-being of each individual citizen, and by prostituting them to promote personal profit and party advancement; by openly and defiantly disregarding the express provisions of the law, when found antagonistic to the success of schemes for partisan aggrandizement; by pursuing a course of reckless and improvident expenditure of the public funds; and by the whole tendency and effect of the Administration, which has been to weak-

en the minds of the people, the respect for and the binding authority of legal and moral obligations: therefore—

Resolved, That in Horace Greeley and B. Gratz Brown, our national standard-bearers, we recognize true and unflinching patriots, who, if elected, will administer the Government upon strictly constitutional and economical principles; recognizing the just limitations of power imposed upon all officers of the Government, and the reserved rights of the States in the control of their internal affairs; who will maintain the proprieties and dignity of the exalted positions which they occupy; preserve the honor and influence of the nation at home and abroad; and secure the rights and privileges of each individual citizen, and the best interests of the whole nation.

Resolved, By the Democracy of New Jersey, in convention assembled, that the salvation and perpetuity of our free institutions, in which are involved all our dearest interests as American citizens, demand a change of the administration of the Government, and we call upon all patriotic citizens to unite with us in a sincere, unselfish, and non-partisan effort to effect it.

Resolved, That the open and shameless use of money to control conventions and elections, of which the General Government and local candidates in its interest afford numerous instances, is an alarming and growing evil of the times, tending to the utter extinction of all principle of political morality among the people, and we hereby protest against it in the present campaign, and pledge our sincere and continuous efforts for the eradication of so great an abuse from our politics.

Resolved, That the principles enunciated at the Cincinnati Convention, and reaffirmed at Baltimore, meet the cordial approval of the Democracy of New Jersey.

The sentiments of the Liberal Republicans were thus stated:

Be it resolved by the Liberal Republicans of the State of New Jersey, in convention assembled, That we reaffirm the principles set forth in the Cincinnati platform, and the letter of acceptance of the Honorable Horace Greeley, and do hereby adopt them as the platform of the Liberal party of New Jersey.

Resolved, That we recognize the Honorable Horace Greeley and the Honorable B. Gratz Brown as the candidates of the great union elements of the nation and the representatives of a union of all the States, in spirit and in truth as well as in name; as a union cemented by genuine peace and the prosperity and well-being of our entire country, and of all its citizens.

Resolved, That the creation of commissioners by the Legislature, for the regulation and government of municipal corporations, is hostile to the principles of republican government.

Resolved, That we are in favor of a system of general laws for the creation of corporations.

There was, however, a class of Democrats who were styled "straight-outs," who did not indorse the course of the Democratic party with reference to the nominations made by the Baltimore Convention. These held a convention in Trenton, October 11th, and, after choosing an electoral ticket, adopted resolutions as follows:

1. *Resolved*, That the sight of a Democratic party without Democratic principles, which is attempting to conduct a Democratic presidential campaign without Democratic nominees, is not more ridiculous than it is abhorrent to the sense and judgment of every true Democrat.

2. *Resolved*, That the natural and just consequences of such an illogical and degrading policy are fully

seen in the defeat and disgrace which have almost everywhere fallen upon that party in the late elections, and that the same ought to convince every Democrat, who has not lost his reason and his love of truth, that it is a crime against his party and his country to continue the already defeated and condemned alliance with the Greeley-Sumner radicalism another hour.

3. *Resolved*, That, as those exalted statesmen O'Connor and Adams are the only Democratic candidates now before the people for the office of President and Vice-President, they ought to receive the support of every honest Democrat, or of every one who does not consent to the surrender of the name or the principles of Democracy to the enemy.

4. *Resolved*, That, inasmuch as there is now no Democratic party in New Jersey, except that which is represented in this convention, we earnestly recommend the immediate and permanent organization of the party in every county in the State.

5. *Resolved*, That no Democratic nominations for Congress having been made in the first, fifth, and sixth districts of New Jersey, we recommend to the Democracy of those districts to put candidates in the field if convenient.

Owing to the great importance of the approaching election, and the prevalence of rumors that the wealthy corporations of the State intended to control the votes of their employes as far as possible, Governor Parker, on the 21st of October, issued the following proclamation :

Whereas, On the thirty-first day of March, in the year of our Lord one thousand eight hundred and seventy-one, the Legislature of this State passed an act relative to bribery, whereby it was enacted that, in addition to any punishment then imposed by statute or the common law, any person convicted of the offences named in said act should be deprived of the right of suffrage; that any corporation, whose managers, officers, or agents, with the consent of said corporation, should use its money or property for the unlawful purposes therein specified, shall forfeit its charter; and that the party to an act of bribery who first complained of the other party should be exempt from the pains and penalties of law; and—

Whereas, On the twenty-sixth day of March, in the year of our Lord one thousand eight hundred and seventy-two, a supplement to said act was passed extending its provisions to the election of the electors for President and Vice-President of the United States; and—

Whereas, The maintenance of the purity of the elective franchise is necessary to the preservation of a republican form of government;

Therefore, I, Joel Parker, Governor of the State of New Jersey, enjoin upon all officers of the law within this State the utmost vigilance in enforcing the statute relative to bribery at the elections, by promptly causing the arrest and prosecution of all who shall violate the same.

And I exhort all good citizens to give their influence and assistance to the public authorities in their efforts to maintain the purity of the ballot.

The Executive will, by the use of all the legitimate means, cooperate with officers and citizens in bringing to justice all who may incur the penalties prescribed by said laws.

JOEL PARKER.

For the purpose of giving effect to this proclamation, the Democratic and Liberal Republican parties, through their respective State Central Committees, offered a reward of \$200 for every person who should be convicted of fraudulent voting, of procuring fraudulent voting, or of making fraudulent returns of the

election. Such rewards, to the amount of \$10,000, were offered to whoever should be instrumental in detecting the frauds, and arresting the offenders.

At the election, 91,656 votes were cast for the Republican electors, and 76,456 for the combined Democratic and Liberal parties. The following members of Congress were elected, all of whom, except the representative from the fourth district, are Republicans:

Districts.	Majority.
I. John W. Hazleton.....	6,864
II. Samuel A. Dobbins.....	2,405
III. Amos Clark, Jr.....	2,176
IV. Robert Hamilton.....	2,464
V. William W. Phelps.....	2,715
VI. Marcus L. Ward.....	5,658
VII. Isaac W. Scudder.....	1,269

The ordinary monetary transactions of the State are conducted through the State Fund. The securities now comprised in this fund are as follows:

2,887 shares of stock of Joint Companies.....	\$288,700 00
Bonds of United Companies.....	500,000 00
Bonds of Joint Companies.....	24,060 00
Bonds of Jersey City and Bergen R. R. Co.....	10,000 00
Bonds of the several counties for surplus revenue of the United States.....	764,670 44
Total.....	\$1,587,370 44

The following statement shows the income of the State Fund, during the last fiscal year, and the sources whence it was derived:

RECEIPTS.	
Tax on United Companies.....	\$296,139 05
Tax on capital stock of railroads.....	186,164 14
Interest and dividends on stocks.....	79,001 50
Assessments on private acts.....	10,675 00
Insurance companies of other States.....	7,120 60
Pedlers' licenses.....	948 00
Civil commissions.....	697 00
Attorneys and counsellors.....	210 00
Fines and forfeited recognizances.....	2,327 50
Commissioners of deeds for other States.....	715 00
Earnings of State-prison.....	20,000 00
State taxes (including money for Library Fund).....	174,025 43
Balance in bank to credit of this fund, October 31, 1871.....	116,394 38
Total.....	\$896,447 59

In his message to the Legislature, the Governor calls attention to the fact that it will be necessary to devise means of increasing the revenue, in order to meet the current expenses of 1873.

During the year the public schools were kept open on an average of about nine and a half months, which is believed to be more than the average time in any other State. The total number of children between the ages of five and eighteen years, as returned by the school-census, is 279,149, being an increase in one year of 13,191. Of these about 35,000 attend private schools, and 178,826 are enrolled in public schools. The number of teachers in the public schools is 3,075, being an increase during the year of 144. The value of school property in the State is estimated at about \$5,000,000. The total amount expended for school purposes, during the year, was \$2,263,070. The average daily attendance of the State Normal School was 640. Every county of the State was represented among the pupils, and

there were pupils present from thirteen other States who either paid tuition fees, or pledged themselves to teach in the public schools of New Jersey. At the close of the school year in June, 38 pupils were graduated, nearly all of whom became teachers in the State. Fifty-three students have been in attendance in the Agricultural College during the year. The students of this institution received instruction that fits them for the practical work of engineers, surveyors, architects, chemists, or farmers.

A hall for the use of the Scientific and Agricultural Departments has recently been finished at a cost of \$60,000, and other buildings are now in course of erection. The Experimental Farm, containing nearly 100 acres, and costing about \$30,000, is used to test various methods of underdraining, fertilizing, cultivation, and rotation of crops.

During the year, \$36,596 was paid for the education and maintenance, in the institutions of other States, of the deaf and dumb, blind, and feeble-minded of the State.

The Lunatic Asylum at Trenton is crowded to such an extent as seriously to interfere with its usefulness, and the attention of the Legislature has been urgently called to the necessity of increased accommodations for the insane. Two hundred and twenty-nine patients were received during the year, and the same number discharged, making the number of inmates at the close of the year 700, being 200 in excess of the proper accommodations of the building. Four hundred acres of land have been purchased at Morristown, at a cost of about \$78,000, for the erection of a new asylum. The site is on elevated ground, commanding a magnificent view.

The average number of convicts in the State-prison, during the year, was 527. The discipline of the prison is excellent, and its financial management satisfactory. For the first time in many years a surplus of earnings has been paid into the State Treasury. The law of 1868, which authorizes remission from the sentence for the faithful performance of assigned labor and good conduct, has produced most beneficial results. The number of boys in the Reform School, October 31st, was 120, being an excess of 82 over the number of the preceding year.

An Industrial School for neglected, wayward, and criminal girls, has been opened during the year. Convenient buildings and grounds have been leased in a secluded spot near the city of Trenton, where on October 31, 1872, there were 17 young girls well cared for and instructed. They are employed in making their own clothing, and assist in sewing for the Boys' Reform School.

The State Library contains 18,407 volumes. In March, 1872, the Legislature appropriated \$3,000, to be expended, under the direction of the New Jersey Historical Society, to procure copies of colonial documents, papers, and minutes of council, directly referring to the pro-

vincial and colonial history of New Jersey, from the State-Paper Office in the city of London. Arrangements were at once perfected for having copies made from the public archives in England.

According to the census of 1870, of the total population (680,687) ten years old and over, there were engaged in all classes of occupations, 296,086 persons, of whom 251,625 were males and 44,411 females. There were engaged in agriculture, 63,128, including 62,943 males and 185 females; in professional and personal services, 83,880, including 54,275 males and 29,105 females; in trade and transportation, 46,206, including 45,242 males and 964 females; in manufactures and mechanical and mining industries, 103,822, including 89,165 males and 14,157 females.

The total number of manufacturing establishments was 6,636, using 984 steam-engines of 32,807 horse-power, and 1,132 water-wheels of 25,832 horse-power, and employing 75,552 hands, of whom 58,115 were males above sixteen, 11,198 females above fifteen, and 6,239 youth.

The total amount of capital invested was \$79,606,719; wages paid during the year, \$32,648,409; value of materials consumed, \$103,415,245; of products, \$169,287,732.

The whole number of newspapers and periodicals was 122, having an aggregate circulation of 205,500, and issuing annually 18,625,740 copies. There were 20 daily, with a circulation of 88,030; 95 weekly, circulation 120,670; and 7 monthly, circulation 46,800.

There were 2,413 libraries, having 895,291 volumes. Of these, 777, with 859,612 volumes, were private, and 1,636, with 535,679 volumes, were other than private, including 14 circulating libraries with 75,250 volumes.

The total number of religious organizations was 1,402, having 1,384 edifices, with 573,303 sittings, and property valued at \$18,347,150.

The leading denominations were:

DENOMINATIONS.	Organizations.	Sittings.
Baptist.....	168	68,113
Episcopal.....	123	34,800
Friends.....	63	26,730
Lutheran.....	19	6,730
Methodist.....	518	196,800
Presbyterian.....	251	123,300
Reformed (late Dutch).....	97	54,800
Roman Catholic.....	107	45,400

The condition of pauperism and crime is shown in the following statistics:

Total population.....	906,096
Number of persons receiving support during the year ending June 1, 1870.....	2,256
Cost of annual support.....	\$232,341
Total number receiving support, June 1, 1870.....	3,830
Native.....	1,869
White.....	1,268
Colored.....	301
Foreign.....	721
Number of persons convicted during the year.....	1,040
Total number of persons in prison, June 1, 1870.....	1,079
Native.....	640
White.....	463
Colored.....	167
Foreign.....	439

The important movements and changes that have taken place in the railroad interests of New Jersey during the past year have attracted earnest attention throughout the country, and have become of almost national importance. The leasing of the united New Jersey railroad and canal companies to the Pennsylvania was noted in the *ANNUAL CYCLOPEDIA* for 1871. The lessees took possession December 1, 1871. The united companies, including the Philadelphia & Trenton, owned 65 miles of canal, connecting the Delaware with the harbor of New York, and navigable for vessels of 250 tons; two main lines of railroad, forming two routes between New York and Philadelphia, consisting of 165 miles of railroad, of which 104 are double track, and with which are connected 60 miles of sidings and terminal tracks; rolling and floating stock, including more than 30 steamboats; and a controlling interest in 260 miles of auxiliary railroads, of which 35 miles are also leased, and in bridges, ferries, horse-railroads, etc., used in connection with the main lines. They also lease and operate 31 miles of other railroad, including the "Connecting Railroad" to West Philadelphia, and the line from Camden via Pemberton to Hightstown, New Jersey. The railroads owned, operated, or controlled, by the united companies, are exhibited in the following statement:

1. *Owned directly by the Companies.*

	Miles.	Miles.
Philadelphia (Kensington), Pa., to Trenton, N. J., all double track.....	26.6	
Trenton, N. J., to Jersey City, N. J., all double track.....	57.1	
Camden, N. J., to South Amboy, N. J., 20 miles double track.....	61.2	
Bordentown, N. J., to Trenton, N. J.....	6.1	
Jamesburg, N. J., to Monmouth Junction, N. J.....	5.5	
Monmouth Junction, N. J., to Kingston, N. J.....	4.0	
Princeton Branch, 8 miles; other branches, 1.5.....	4.5	

Total owned directly..... 165.0

2. *Railroads in which the Companies have a Controlling Interest.*

	Miles.
Rocky Hill to Kingston.....	2.5
Burlington to Mount Holly.....	7.1
Mount Holly to near Camden.....	16.5
Pemberton to Mount Holly.....	5.9
Vincenttown Branch.....	3.0
Glassboro' to Bridgeton.....	37.0
Millville to Glassboro'.....	32.0
Cape May to Millville.....	41.0
Salem Branch.....	17.0
Freehold to Jamesburg.....	11.5
Millstone to New Brunswick.....	6.6
Perth Amboy to Woodbridge.....	6.4
Belvidere-Delaware Railroad.....	68.7
Flemington Branch Railroad.....	11.4

Total in which the companies have a controlling interest..... 259.0

3. *Other Leased Railroads.*

Connecting Railroad, 6.8 miles; Pemberton & Hightstown Railroad, 24.5.....	31.3
--	------

Total railroad line owned, leased, and controlled.. 455.9

The Delaware & Raritan Canal, forming an important part of the united companies:

	Miles.
Bordentown (Delaware River), N. J., to New Brunswick (Raritan River), N. J.....	43.0
Bull's Island (Delaware River), N. J., to Trenton, N. J.....	22.5
Total.....	65.0

Thus the united companies own, operate, or control, 65 miles of canal and 456 miles of railroad, and, including double track, 181 miles, and sidings, etc., 97 miles, in all, 684 miles of track.

An action was brought contesting the legality of this lease, on the ground, among other things, that it had not been filed with the Secretary of State for record within thirty days, as required by statute. Its validity having been affirmed by the Chancellor, an appeal was taken to the Court of Error and Appeals, where the matter was pending early in 1878.

The proposed union of the Central Railroad of New Jersey and the Delaware, Lackawanna & Western Railroad, which was negotiated early in 1872, was an event of unusual importance in railroad and financial circles. The magnitude of the interests involved in this great bargain was threefold larger than that in the transfer of the united railroads, which excited attention in all parts of the country, and was regarded as one of the most important consolidations that had been effected. The property placed by this consolidation under one management amounts to nearly \$120,000,000—the Delaware, Lackawanna & Western representing \$72,000,000 of property, and the Central Railroad Company nearly \$50,000,000.

The Delaware, Lackawanna & Western Railroad consists of a double-tracked road, running from "The Junction," near Washington, N. J., through Scranton, Pa., to Binghamton, and includes the roads formerly known as the Warren Railroad and the Valley road. Its length is 145 miles; capital, \$20,000,000; outstanding bonds, \$11,000,000. It owns the newly-built Boonton branch, 32 miles in length; the Syracuse & Binghamton Railroad, 80 miles long; and the Lackawanna & Bloomsburg, also 80 miles in length. It controls by lease the Morris & Essex Railroad, from Hoboken to Easton, 71 miles of which is double-tracked, with the Newark & Bloomfield and Chester Railroads. The Utica Division, leased and purchased lines, extends from Binghamton to Utica, 98 miles; the Oswego & Syracuse Railroad, 35 miles; and the Cayuga & Susquehanna road from Oswego to Ithaca, 33 miles. The cost of each road is represented in the following table:

RAILROADS.	Miles.	Amount.
Delaware, Lackawanna & Western.....	145	\$31,000,000
Morris & Essex and branches.....	131	26,000,000
Syracuse & Binghamton.....	80	4,000,000
Lackawanna & Bloomsburg.....	80	4,000,000
Oswego & Syracuse.....	35	1,500,000
Utica Division.....	98	4,000,000
Cayuga & Susquehanna.....	33	1,500,000
Total.....	602	\$72,000,000

The New Jersey Central Railroad is a double-tracked road extending from Communipaw to Phillipsburg, N. J., branching out to Flemington on the south, through Newark on the north, and connected at its western terminus

with the Lehigh & Susquehanna Railroad. The latter road, which was leased last year by the Central Railroad, is 105 miles in length, extending from Phillipsburg through the Lehigh Valley, across the mountains, into the great Wyoming Valley coal-region. The road, with its branches, consists of 252 miles of track. The Central Railroad is of about equal length, counting its Flemington and Newark branches.

The two companies have agreed to unite upon equal terms. The capital stock of each being the same, \$20,000,000, each shares alike in the profits. By carrying through-passengers over one line, instead of two, by avoiding, as far as possible, the delays incident to passing the Bergen Tunnel, and by uniformity of tariffs, the companies hoped to save millions per annum, and to add in so much to the wealth of the concerns. The roads were to be under the direction, as before, of their presidents, while a joint board, to be composed of these gentlemen, with five directors from each company, would control the general policy of the companies.

Subsequently, the Central road declined to perfect the union, and the Lackawanna sought to enforce it in court. The union is still in abeyance.

A suit, involving large interests and important questions of law, was pending during the year between two powerful railroad corporations. The defendant was the National Railway Company, which had been incorporated by the State of Pennsylvania, and had for its object the construction of a railroad connecting New York and Philadelphia. It claimed to be invested with power, by virtue of its charter, to construct a railroad from Philadelphia to the middle of the Delaware River, and to be entitled to extend its line through New Jersey, by contracts with corporations of that State. To effect this purpose, a contract was made on the 1st of July, 1872, between the National Railway Company and the Stanhope Railway Company, by which the latter and other New Jersey corporations were made part of the through-line between Philadelphia and New York. The Stanhope Company had been incorporated by an act of the New Jersey Legislature, approved March 13, 1872, for the construction of a railroad from Walkill Mountain to Stanhope. The eighth section of the act, among other things, contained this remarkable provision:

And it shall be lawful for the said corporation, at any time during the continuance of its charter, from time to time, to unite and consolidate, as well as merge its stock, property, franchises, and road, with those of any other corporation or corporations heretofore or hereafter incorporated within or without this State; and such other corporation and corporations are hereby authorized to unite, consolidate, and merge their stock, property, franchises, road and roads with this corporation, and, after such merger into this corporation, this corporation may from time to time lease its roads, franchises, and property, or any part thereof, to any other corporation or corpo-

rations within or without this State, and such other corporation and corporations are hereby authorized to take such lease or leases; and this and the other corporation or corporations may use and operate this road or their own roads, or all or any of them, according to the provisions and restrictions contained in the charter of this corporation, or in the charter of such other corporation or corporations, or both; and this and the other corporations may make contracts and engagements with any other corporation or corporations, or with individuals, for operating this road or said other roads, or parts of either or both, as well as for transporting passengers, freight, and trains over this road and said other roads, or any part thereof, or over any road, and demand and receive, for the transportation of passengers, freight, and trains over their roads and the roads of such other corporations as are above mentioned, and over any other roads, the same rates of fare, freight, and toll as are authorized to be charged by this corporation for like services over this road; and this corporation may be known by such new name as its directors shall, by certificate filed in the Secretary of State's office, declare to be its name; and to build this road and the road of any other corporation which may lease the same, it and its lessees may make the bonds and mortgages hereinafter authorized; and it and its lessees, successors, and assigns, may exercise and possess all the railroads, franchises, and property, so as aforesaid merged into it, without restriction as to the gauge of tracks, in the same manner and with like effect as if it had been specially created by act of the Legislature of this State, to exercise the same; and the Legislature shall have power to alter, revoke, or annul this charter whenever the courts shall have decided it to be injurious to the citizens of this State, by reason of a misuse of the powers herein granted, and not otherwise.

After the passage of this act, the Millstone & Trenton Railroad Company, the Peapack & Plainfield, the Elizabeth & New Providence, the New Jersey Trust Company, and the Narrow Gauge Railway Company, all of which were New Jersey corporations, were consolidated into the Stanhope Company, together with all their charters and franchises; and on the 1st of July, 1872, the contract above mentioned was entered into between the Stanhope Company and the National Railway Company, by which the latter became entitled to use all the privileges granted to the above-named corporations. These connections were to form the through-line between New York and Philadelphia. But no sooner was this consolidation effected, than the United New Jersey Railroad and Canal Company and the Pennsylvania Railroad Company moved in the Chancery Court of New Jersey for an injunction to restrain the fulfilment of its purposes, and thus prevent the completion of the new competing through-line. Among other things, it was charged that the passage of the Stanhope charter by the Legislature had been procured by the National Railway Company through bribery and corruption; and further, that the eighth section of that act, above quoted in part, had been fraudulently interpolated into the bill after its passage by the Legislature. Whether this charge was founded in truth or not, it seems to have led the Governor to recommend the additional safeguards against the possibility of corrupt

Legislation. The case was contested with great force in court, and resulted in the granting of a perpetual injunction restraining the National Railway Company from constructing their through-line as proposed. This decision, rendered early in February, 1873, was based on the ground that the original intention of the Stanhope charter was, the construction of a road from Walkill Mountain to Stanhope, and could not be construed, even by implication, to give the right of a through-road.

Many important railroad enterprises are projected in New Jersey, and are to be completed at a future day. The New Jersey West Line Railway will run to Newark by the way of the New Jersey Railroad; thence it will pass through Essex and Union Counties by the way of Lyons Farms, Millburn, and Summit, crossing the Morris & Essex Railroad at each of the two last-named places; thence proceeding through New Providence, Bernardsville, and Lebanon, where it will cross the Central Railroad of New Jersey, and thence to Sydney, in Hunterdon County, where it will join the Bound Brook and Easton Railroad. The length of this line is fifty miles, and most of the country it penetrates has now no railway facilities.

The National Railway begins at Jersey City, and passes between Newark and Elizabeth, crossing the Newark & New York and New Jersey Railroads. It runs in a straight line by the base of First Mountain north of Westfield and Scotch Plains, until it reaches a point north of Bound Brook, where it takes a southerly direction, and, crossing the Central Railroad of New Jersey, runs in a direct line to the Delaware River.

The Watchung Railroad begins on the line of the Montclair Railway, near Woodside, and runs in a straight westerly line to Llewellyn Park, Orange, a distance of about five miles.

The Perth Amboy & Elizabeth Railroad starts from the Elizabethport Station, in the latter city, and runs southward to the Raritan River at Perth Amboy, a distance of twelve miles. Thence it will be continued through Monmouth County to Long Branch to connect with the New Jersey Southern road.

The Mendham & Chester Railroad starts at Montclair, on the line of the Montclair Railroad; thence it crosses First and Second Mountains, and passes through Caldwell and Morristown to Mendham, a distance of twenty-five miles.

The Bound Brook & Easton Railroad begins at Perth Amboy, and, running northwesterly, crosses the New Jersey Railroad at Metuchen, and, reaching the line of the New Jersey Central at West Dunnellen, runs parallel with it to Bound Brook; thence to Phillipsburg on the Delaware River, a distance of about ninety miles.

The Somerset and Mercer Railroad begins at Millstone, on the New Jersey Railroad, and runs southerly through the fine farming coun-

ties of Somerset and Mercer to the Delaware River.

In his message to the Legislature, January, 1873, Governor Parker recommended that steps be taken for amending the constitution of the State. After referring to other needed amendments, he added:

If general laws be not required, and special laws be allowed, the constitution should be so amended as to prohibit and declare void all acts that shall pass which are included in the following classes of legislation, viz.:

Acts which purport to make irrevocable grants of special privileges or immunities to individuals or corporations.

Acts that violate the principle of equal and uniform taxation, by exempting property of individuals or corporations (except that always exempted by the general tax law) from State or local taxes of any description which the people at large are required to pay; or by prescribing a rule of assessment different from the general rule, and making discrimination as to the subjects of taxation.

Acts chartering railroad, turnpike, or transportation companies, that do not require the rates of travel or transportation to be uniform, and which allow differential rates that tend to build up one city or section of the State, to the injury of another.

Acts authorizing a municipality to tax the people for subscriptions to the capital stock of railroad or turnpike corporations, or for donations or loans of its credit thereto.

Acts which appoint and authorize persons named therein and not chosen by the people, to project and construct public improvements, or exercise governmental power in a city or other municipality.

NEW YORK. The Legislature of New York, which met on the 8d of January, came to a final adjournment on the 14th of May. The chief portion of the work done in this long session was made up of private, local, and special acts, and the measures of general importance were very few. A very large share of attention was given to a new charter for the city of New York. It was prepared by a "Committee of Seventy," and was intended to secure and complete the reform in the administration of the government of the city which was begun in 1871. One of its peculiar features was the method proposed for the election of the Board of Aldermen. This Board was to consist of 45 members, 9 of whom were to be chosen in each senatorial district, and were to be elected by the "cumulative" method, that is, each voter would be entitled to cast all his nine votes for one candidate, or to distribute them in any desired proportion among the nine candidates. The Board thus constituted was to have the power of appointing most of the heads of departments in the executive government of the city. There were prolonged consultations on this instrument in the committees of the two Houses, and hearings were allowed to various delegations from the city. In was then for some time under discussion in the two branches of the Legislature, and was finally passed by a considerable majority. It was, however, vetoed by the Governor, who set forth his objections at length, and concluded with the following suggestions:

I do not admit that misgovernment in this city is proof of the failure of republican government. Republican government, under a wise and well-considered charter, with a proper distribution of power, has not yet been tried in the great metropolis. When the Legislature gives to New York municipal government in conformity with the general idea of American institutions, it performs its whole duty. All further responsibility is on the people of New York City themselves. The people there have recently proved themselves capable of righting their own wrongs. If they culpably neglect their own affairs, if they will not give to their own political affairs the same attention which the rest of the people, in their several localities, are in the habit of giving, they must suffer the consequences. No self-acting machinery can be devised which will suffice to do the work which the people themselves are bound to do. Complicated machinery will serve only to invite combinations of designing men, whose operations can be concealed under it. Give to the city a chief executive, with full power to appoint all heads of administrative departments. Let him have power to remove his subordinates, being required to publicly assign his reasons. The people will try the question whether he abuses this power of removal. Make him the head of the police, in the same manner as the Governor is head of the National Guard, with proper protection for the members of the force against removal while faithful to duty. Make him responsible, personally, for all waste or improper expenditure, by requiring from him, through the Department of Finance, an estimate of what money is needed for the support of the government and its various departments, before any appropriation is made. Give to the people full representation in the Common Council, and confine it to legislative duties, and exclude it from administrative. Give to it the power to reduce estimates of expenditure, but not to increase them; the power to limit expenditure, but not to originate appropriations. Give full power to the Common Council and the mayor to regulate the local taxes, to expend each year what money they think fit in cash expenditures, but limit rigidly by law their power to incur debts. If the expenditures be wasteful, let the people feel it in their taxes, and let them apply the corrective. Make the mayor removable for misconduct by the Governor. All other provisions of the charter could be drawn by any one. They are mere matters of routine and precedent. Then the mayor can rightfully be held, as this charter says he should be, "responsible for the good order and efficient government of the city," and would feel himself to be so. Add such provisions as shall secure frequent publication of the expenditures and transactions of the city government, ready access of tax-payers to the city accounts, and opportunities to the people to change their chief magistrate at short intervals, and all the safeguards of good government are furnished.

With such a charter, the people of the city of New York should be told in plain terms by the Legislature that they must do their share, as the people do elsewhere, in looking after their local affairs, and so contributing their part to the maintenance of republican government. From special legislation on the subject, and from applications from year to year for amendments to the charter, the Legislature should resolutely turn away. I am aware that this charter has been prepared under the auspices of a committee of seventy prominent citizens of New York, who have recently done good public service in another way, some of whom have been conversant with public affairs, but many of whom are of the class that has heretofore neglected giving any time or attention to such matters. I have entire respect for the intentions of this committee, but cannot let its judgment control mine. So convinced am I that great and disastrous evils to the city are likely to grow out of the enactment of this charter, that, if I knew every man

in the city of New York were clamoring for it, I would not give it my approval.

Another charter was shortly after introduced, and passed rapidly through the forms of legislation. It was known as the "Palmer Bill," and was vetoed by the Governor after the session had closed. In giving his reasons for withholding his approval, the Governor said:

Without discussing the merits or demerits of the general provisions of the bill, and both are very marked, it is sufficient to say that it orders the municipal election for the mayor, Common Council, school-officers, etc., on the 31st day of the present month, and in my judgment it is unwise and extremely dangerous to precipitate upon the people of New York so important an election on such short notice; second, the election, if held, would be conducted by inspectors and canvassers heretofore chosen under the operation of the registry and election law passed this session. The laws under which they were chosen expire, and the official existence of the officers terminates, June 1, 1872. If for any reason the canvass of any part of the vote should not be completed on the night of election, May 31st, it is, to say the least, very doubtful if it could be completed at all, for the reason that the canvassers would be, after that day, by the operation of the law, out of office. Serious litigation would be likely to ensue between those who are now in office and those who would claim under the new election; third, assuming as I think must be the case, that no person who is not registered could vote at the proposed election, and that he must be registered in the election district in which he resides, a very large number of the citizens of New York would, under the operation of the said chapter 675 of the laws of 1872, be disfranchised at that election. No citizen, who since the last registry has moved into another election district than that in which he then lived (and many thousands did so move on the 1st of May last), could vote; for section 87 of said chapter (which section takes effect immediately) provides that no person registered in one district can be registered in another in any other manner than is provided in said chapter. No registry can, therefore, be had under any other law, and none can be had under the law of 1872, for the reason that the sections which provide for a registry do not take effect until June 1, 1872, the day after the proposed election. There is no provision for a new registration for the election proposed to be held May 31st, and no time to make it if there was. No voter, therefore, who has moved into a new election district since the last fall election, can by any possibility vote this spring. An election, which directly affects for good or evil the welfare of a million of people, and which affects indirectly the whole State, to be held on a fortnight's notice, and at which many thousands of citizens are thus disfranchised, cannot be held with my consent.

Several other acts affecting the city of New York were considered, and some of them passed. Among the latter were two charters intended to secure rapid transit to and from and within the city. One provided for a railroad above, below, or on the surface, according to the requirements of the route selected, and the other incorporated a company for the construction of what was known as the "Gilbert elevated railroad." Neither of the companies thus incorporated has made use of its franchises, or done any thing toward effecting the object for which it was formed. A bill, providing that the Court of Appeals might assign justices from other districts to courts of

Oyer and Terminer, when cases of official misconduct, or of fraud and peculation in the management of public funds, were to be tried, was vetoed by the Governor. A bill, providing for the audit and payment of claims against the city government of New York, created during the year 1871 to an amount not exceeding \$8,500,000, and for the appropriation and apportionment of money to carry on the local government of the city for the first four months of the year, was also vetoed by the Governor, who gave his reasons as follows:

The power to audit and pay last year's claims up to a fixed amount and to make appropriations for the expenditures of the current year up to the 1st of May next, without limit as to amount, is conferred upon the three persons who now are, or may hereafter be, heads of certain departments of the city government, to wit, the Comptroller, the President of the Department of Parks, and the Commissioner of Public Works, all of whom are appointees of the mayor, none of them having been elected by the people. The bill ignores the chief executive officer of the city and the legislative branch of the local government.

A bill which seeks to carry on the government of a great city and county, without the concurrence of its mayor and Common Council and Board of Supervisors, or any of them, and which places this great duty in the hands of certain subordinate officers appointed by the mayor, without associating with them in it either the mayor or the legislative branch of the local government, or some representative of the latter, can be justified only by an extraordinary condition of affairs.

This "extraordinary condition of affairs" he thought did not exist.

The resolution passed in 1870, "purporting to withdraw the assent of the people of the State, previously given, to the fifteenth amendment of the Federal Constitution," was rescinded, the vote in the Assembly being 71 yeas to 13 nays.

"An act for the protection of tax-payers against frauds, embezzlement, and wrongful acts of public officers and agents," was passed in the following terms:

SECTION 1. All officers, agents, commissioners, and other persons, acting for or on behalf of any county, town, or municipal corporation, in this State, and each and every one of them, are hereby declared trustees of the property, funds, and effects of such county, town, or municipal corporation, respectively, so far as such property, funds, and effects have been, are, or may be committed to their management or control; and every person residing in such county, town, or municipal corporation, and assessed to pay taxes therein, who shall pay taxes therein, is hereby declared to be a *cestui que trust* in respect to the said property, funds, and effects, respectively; and any co-trustees, or any such *cestui que trust*, shall be entitled as against such trustees, and in regard to such property, funds, and effects, to all the rights and remedies provided by law of any co-trustee or *cestui que trust*, to prosecute and maintain any action to prevent waste and injury to any property, funds, and estate held in trust. Such trustees are hereby made subject to all the duties and responsibilities imposed by law on trustees, and such duties and responsibilities may be enforced by any co-trustee or *cestui que trust* aforesaid.

In regard to this the Governor submitted

these two questions to the judges of the Court of Appeals:

1. Whether the bill, if it become a law, in the words now used, may not operate to divest every municipal corporation of the title to its property, and to vest the legal title thereof in the various officers, commissioners, agents, and other persons who may have control and management of such property, or of separate and distinct portions thereof.

2. Whether it may not operate to give to tax-payers the exclusive right to sue for wrongs done, or in order to prevent wrongs by municipal officers, taking away the right of action in such cases from the corporation itself, and from all public officers; and may not, in fact, interfere with suits now pending.

The judges agreed that "serious questions might arise upon the bill in its present form both as to the title of the property covered by the terms of the act, and as to whether the municipalities are not divested of all title; and also as to the right of a corporation itself, or any of its officers, or any public officer, or any person whatever, other than a tax-payer, to bring an action in respect to the property, funds, or effects mentioned in the act." The Governor, therefore, vetoed the act, warning the Legislature that "in times of unusual excitement about abuses in the administration of public affairs, and when the demand for correction and reform is urgent and loud, it is especially important that those charged with the responsibility of legislation should move with great caution, and that the most careful consideration should be given to every bill providing new remedies, or making great changes in existing laws."

An act was passed, the object of which is expressed in the title, as follows:

An act to supply deficiencies in former appropriations and to pay the indebtedness of the State on account of the canals, which deficiencies and indebtedness have been changed into liabilities for money borrowed to pay them, or into certificates of indebtedness on which the State is now paying interest, and to pay the floating indebtedness of the State and the estimated liabilities for the present fiscal year not yet provided for by law, and to raise money therefor, by an issue of the bonds of the State, and to provide for submitting the question thereon to the people.

The debt created by this act is not to exceed \$6,600,000. The question of raising it was submitted to a vote of the people at the election in November, and the proposition was approved by a light vote. An act was also passed to "perfect an amendment of the constitution relative to the Court of Appeals, and for the extension of the services of the Commissioners of Appeals." The amendment in question had been adopted by the preceding Legislature, and consisted of the following section to be added to article sixth:

Sec. 28. The Court of Appeals may order any of the causes, not exceeding 500 in number, pending in that court at the time of the adoption of this provision, to be heard and determined by the Commissioners of Appeals, and the Legislature may extend the term of service of the Commissioners of Appeals, for a period not exceeding two years.

Provision was made for submitting it to a

vote at the election in November, at which time it was ratified.

A bill was passed near the end of the session directing the Governor to designate thirty-two persons, four from each judicial district, "who shall constitute a commission for the purpose of proposing to the Legislature, at its next session, amendments to the constitution, provided that no amendments shall be proposed to the sixth article thereof." This commission was duly appointed, and met at Albany, to perform the work assigned to it, soon after the meeting of the Legislature in January, 1878.

Several investigations were set on foot by the Legislature, which were carried on both before and after the adjournment. The Insurance Commissioner, George W. Miller, having been charged with receiving fees and perquisites for his own personal use, which should be paid into the State Treasury, the Assembly Committee on Insurance was instructed to inquire into the matter. A large amount of testimony was taken, and two reports were made, one of which recommended the removal of the commissioner, and the other of which vindicated his conduct. A resolution effecting his removal was passed by the Assembly, and was pending in the Senate when Mr. Miller, on the 18th of May, sent his resignation to the Governor, "having become convinced," as he said, "that partisan designs and personal malice have so conspired and combined as to secure the concurrence of the Senate" in the resolution of removal, although every charge against him had been "emphatically disproved, and no cause for such a course can be shown, except a deliberate, foregone conclusion by the exercise of the power of an overwhelming party majority to seize" his place.

The Bar Association of the city of New York having made specific charges against Judges George G. Barnard and Albert Cardozo, of the Supreme Court, in the First Judicial District, and asked for their impeachment and removal, the matter was promptly taken up in the Assembly, and it was decided to bring them to trial before the Senate. While the resolution ordering the impeachment of Judge Cardozo was still pending, he resigned his position, and the proceedings against him were abandoned. Articles of impeachment, thirty-nine in number, were presented against Judge Barnard before the adjournment of the Legislature. They charged him with corrupt conduct in granting injunctions and appointing receivers in various suits, in most of which railroad companies were concerned. He was accused of exercising his judicial functions corruptly, receiving presents or other personal benefits, and of unseemly and indecorous conduct in open court. After the organization of the Court of Impeachment at Albany, it was adjourned to meet at Saratoga on the 17th of July for the trial.

This lasted for several days, and resulted in the conviction of the accused, and his removal and disqualification to hold office in the State in future.

Charges had also been brought against Judge John H. McCunn, of the Superior Court of the City of New York, for misdemeanor and corrupt conduct in office, which charges were referred to the Judiciary Committee of the Assembly for investigation. This investigation having been made in the city of New York, the committee reported the following preamble and resolution, which were unanimously adopted:

Whereas, The Judiciary Committee of this House has made an investigation in the city of New York, relative to charges of official misconduct against Justice John H. McCunn, and has submitted the testimony there taken to this House; and whereas, in the opinion of this House, said testimony sustains said charges to an extent showing mal and corrupt conduct in office; and whereas, the constitution, by the 11th section of Article VI., provides that all judicial officers except judges of the Court of Appeals and justices of the Supreme Court, and except justices of the peace and judges and justices of inferior courts, not of record, may be removed by the Senate, on the recommendation of the Governor, if two-thirds of all the members elected to the Senate concur therein: therefore—

Resolved, That the charges and testimony taken in connection therewith, reported to the House by the Judiciary Committee, be transmitted to his Excellency the Governor, with the request on the part of the House, that he recommend to the Senate to take proceedings for the removal of said John H. McCunn from his office of Justice of the Superior Court of the City of New York.

The Governor accordingly transmitted to the Senate a printed copy of the charges and specifications against Judge McCunn, and of the testimony taken by the Judiciary Committee, and recommended that inquiry be made into the truth of the charges, and that, if they should be established, "the said John H. McCunn be then removed from office." An extra session of the Senate was called to consider the case, and met on the 17th of June. The counsel of Judge McCunn claimed that, as the Governor had not directly recommended his removal, the Senate had no jurisdiction in the case, the provision of the constitution being that "all judicial officers, except those mentioned in this section (judges of the Court of Appeals and justices of the Supreme Court), and except justices of the peace, and judges and justices of inferior courts, not of record, may be removed by the Senate, on the recommendation of the Governor, if two-thirds of all the members elected to the Senate concur therein." This point was overruled, and on the 26th of June Mr. McCunn's counsel withdrew from the case, and advised him to pursue his defence no further. In so doing they declared that they were satisfied of his innocence, but believed the Senate had no jurisdiction in the case. They furthermore said:

The determination of the Senate to investigate charges for acts alleged to have been done by you prior to the time of the election under which you

now hold your office, involves of necessity a mere review of the propriety of your election by the people, a power which, we believe, is not conferred upon the Senate. If it can be done in one case, it can be done in all cases of the election of officers coming within the provisions of the constitution which we have quoted, without reference to the conduct of the officers after their election.

Notwithstanding these convictions we were willing to aid you as far as our assistance could be of service; and the Senate having determined that "all the rules legal and usual in courts of record in this State, in regard to the introduction of evidence and the examination and cross-examination of witnesses" should be observed, we hoped not only that the investigation might lead the Senate to the conclusion that you ought not to be removed from office, but that nothing for which you were not properly and legally responsible would be admitted in evidence, to operate elsewhere than before the Senate to your prejudice. We beg leave, however, to state, without intending any reflection upon the Senate or upon the gentlemen conducting the proceedings against you, that our views, in regard to the admissibility of much of the evidence produced against you, differ so widely from the ruling on the subject, that we are disposed to question the propriety of our continuing longer in the position we have occupied, and to doubt whether our doing so would be of any essential service either in your defence, or in excluding, from the record of the proceedings against you, of what we deem irrelevant and improper evidence. We, therefore, with your approbation, are disposed (and we would advise you to that course) to leave it to the Senators, unimpeded by you or by us in your behalf, to make such disposition of the charges against you as in their judgment of their power and duty shall seem just and right.

A few days later, Judge McCunn was removed by the necessary two-thirds vote of the Senate, and shortly after died of a disease caused or greatly aggravated by the proceedings against him.

Similar proceedings were begun against Horace G. Prindle, Judge of Chenango County, who was accused of official misconduct. The investigation into his case was not concluded till near the end of the year, when it was carried on by a committee of the Senate, and resulted in an acquittal.

Judge George M. Curtis, of the Marine Court of New York City, was impeached before the Legislature adjourned, on charges presented by the Bar Association of that city. His case was not disposed of until after the beginning of the session of 1878, when he was acquitted.

The first political convention of the year was that of the Colored Republicans, at Troy, on the 8th and 9th of May. An address to the colored voters of the State was issued, in which the "unwise and unreasonable movement of the Liberal Republicans" was deprecated; and support recommended for "the great Republican party, which has not only been true to us in the past, but is also the casket of our deepest hopes for the future." The following resolutions were also adopted:

Resolved, That the duty of every colored American lies within the lines of the Republican party, and that any departure therefrom must inevitably lead into the camp of the common enemy.

That we are greatly endeared to the Republican

party, because in its ranks are to be found all that remains true of the ever-to-be-revered liberty and abolition parties, and because the Republican party, true to its baptismal vows, have, during the twelve years of its existence, not only suppressed the most cruel and most wicked rebellion that ever cursed a land, and established the supremacy of republican institutions all over the country, but have forced traitors, great and small, wherever and whenever found, to bow in honorable submission to the majesty of the law. And not only because this great party has, through its legislators, executives, and its judiciary, emancipated the American slave and clothed him with citizenship and political rights, but because it also has and does guarantee and vouchsafe to him and to his, despite the opposition and protest of the Democratic party and its allies, the recognition of their manhood, and a liberal share of the Federal patronage under its control.

That we indorse the Administration of President Grant; that we regard it as being eminently wise, liberal, and statesmanlike, and as fulfilling our expectations of what a Republican Executive ought to be.

That we will in the future, as we have in the past, support the regular Republican nominees when made, both State and national.

That we recommend to the Republican State Convention, to be held at Elmira on the 15th inst., the propriety of sending a representative colored man to the National Convention at Philadelphia as a delegate at large; and we respectfully but earnestly appeal to that State Convention to recognize the respectability and influence of the colored Republicans of the State of New York by naming as such delegate William F. Butler, of New York, our chosen representative.

That this convention demand of the Philadelphia Convention the recognition and the enforcement of our civil rights.

The Democrats held a convention at Rochester, on the 15th of May, for the purpose of choosing delegates to the National Convention. The following resolutions were adopted:

1. That we recognize the changes in the nature and the Constitution of the Government which have taken place, and, without reopening questions of the past, are now ready to cooperate with those, whatever their previous affiliations, who favor limited and localized governments, who seek to restrain the exercise by Congress of absolute and general powers; to prevent its entering on private legislation; to restrain the growth of vast corporations, and to work permanent civil service reform.

2. That recent declaration of political principles by the Convention at Cincinnati is evidence of the progress of public opinion toward sound and wholesome views of government, and we believe that all patriotic citizens may unite upon that platform for the purpose of restoring the honest administration of national affairs, and enforcing the obligations of the Constitution; and our delegates to Baltimore are instructed to take the course best calculated to secure the triumph of these principles and the selection of any candidate representing them who shall meet the approval of the Democracy in the National Convention assembled.

The Republicans met at Elmira on the same day, and appointed delegates to their National Convention, and adopted resolutions, indorsing the Administration of President Grant, favoring a tariff for revenue only, and urging complete union and harmony in the ranks of the party.

There was a Convention of Soldiers and Sailors at Utica, on the 20th of August, at

which resolutions were adopted declaring that they had "no sympathy with that political party which has among its earnest supporters the Tammany Democracy and the Ku-klux Klan," and that they discovered, in "the present remarkable alliance between the enemies of republican institutions and the followers of Horace Greeley, an attempt to wrest the Government from the control of men of tried and undoubted loyalty." They declared their sympathy with the Republican party, and pledged their support to its candidates for national and State offices. Finally, they approved of the proposition to establish a Soldiers' Home in the State, and urged a full representation of the soldiers and sailors of the State at the National Convention, to be held at Pittsburg, on the 17th of September.

The Republican Convention, for the nomination of State officers, was held at Utica, on the 22d of August. A platform was unanimously adopted, embracing the following principal resolutions:

Resolved, That the rightful purpose of government is the security of individual liberty and equality before the law; that the return to power, under any pretence, of the party which nurtured slavery, brought on the war and resisted reconstruction, would necessarily imperil that security and destroy the general confidence which has steadily increased under Republican administration; we hold that the lawlessness which has disturbed some parts of the Southern States, and which has been checked firmly, but gently and constitutionally, by the national Government, is due mainly to a feeling naturally embittered by the issue of the war and by the overthrow of old institutions, and constantly excited by the hope of a Democratic restoration; we believe, therefore, that the defeat and disorganization of the Democratic party are indispensable to complete national harmony.

Resolved, That the welfare of the State imperatively requires that the reform, in the interest of honesty and economy, which was so auspiciously begun last year, and which has broken the Tammany Ring and purified the Bench, shall be continued and extended to every branch of the Government.

Resolved, That the principles and history of the Republican party, with the spotless character of the candidates we present, are the guarantees that their election would secure a wise, faithful, and efficient administration of the State government; that the modest patriotism, the earnest purpose, the sagacious judgment, the practical wisdom, the incorruptible integrity and the illustrious services of Ulysses S. Grant, have commended him to the hearts and judgments of the American people; and that, with him for a leader we cannot in the future, any more than in the past, fail of success.

Resolved, That in Senator Henry Wilson, our nominee for Vice-President, we present a statesman who, by force of his own character and efforts, without adventitious aids, has made his way from an humble condition in life to the front rank of American citizens, and who, during a long public career, has been always the able advocate and defender of every just and benevolent purpose. With these nominees, and on the platform adopted at Philadelphia by the Republican National Convention, we confidently await the verdict of the American people.

Resolved, In the profound conviction that the continued success of the Republican party is the sole security of reform and progress, we heartily approve the general principles declared by the late Republican Convention at Philadelphia, and gladly ratify

the nomination of Ulysses S. Grant and Henry Wilson, pledging our most earnest and honorable efforts for their triumphant election.

Resolved, That the increase of the State debt, by the amount of \$6,600,000, is an index of the extravagance and looseness of the Democratic management of our State finances, and is in striking contrast with the reduction of the national debt by the amount of \$337,404,808 since March 1, 1869, and the constant and repeated abolition of the national taxes of more than \$150,000,000, for which we are indebted to the Republican Congress and Republican Administration.

Resolved, That we appeal with assured confidence to the electors of New York to sustain a national Administration whose fruits are prosperity and peace, and to establish a State administration which shall bring back an honorable name and a creditable government to this Commonwealth.

Resolved, That we welcome to our ranks honest Democrats, who spurn the unprincipled coalition which seeks to ally them with the discarded elements of the Republican party.

Resolved, That the time has come when the main canals of the State of New York should be adapted, by an enlargement of their locks, to steam-navigation, and made as free to the commerce of the nation as an economical maintenance of them in good repair will permit, and that both of these results should be secured without burdening the tax-payers of the State—the first, by accepting an appropriation from the General Government to improve one of the national highways of commerce; and the second, by refunding the canal debt of the State in bonds having a long period to run and bearing a low rate of interest.

Resolved, That we point with pride to the prosperity that has attended the canal commerce since it has been in the control of the Republican party.

The ticket put in nomination was as follows: For Governor, General John A. Dix; Lieutenant-Governor, General John C. Robinson; Canal Commissioner, Reuben B. Stroud; State-prison Inspector, Ezra Graves; Congressman at large, Lyman Tremain; presidential electors at large, Frederick Douglas, Emil Sauer, and Stewart L. Woodford. District electors were also nominated, and a State Central Committee chosen.

Conventions of the Democrats and Liberal Republicans were held at Syracuse, on the 4th and 5th of September. Conference committees were appointed to secure joint action in the matter of nominations, and a common electoral ticket was agreed upon. The candidates nominated for State officers were the following, the Liberal Republicans naming the Lieutenant-Governor and State-prison Inspector, and accepting the Democratic nominees for other offices: For Governor, Francis Kernan; Lieutenant-Governor, Channcy M. Depew; Canal Commissioner, John F. Hubbard, Jr.; State-prison Inspector, Enos C. Brooks; Congressman at large, Samuel S. Cox. A series of resolutions was adopted in each convention. The following were the principal ones adopted in the Democratic Convention:

Resolved, That the condition of the country is such as to demand the sacrifice of past prejudices. The tone of administration has been lowered; the civil service has grown corrupt; the military power is too readily resorted to; the bureaux at Washington have become the centres of favoritism and jobbery; and the Southern States, under a system of

military repression and dictation, have been subjected to robbery and waste, which have already imposed upon them nearly four hundred millions of debt, oppressing industry and hindering immigration, and, by destroying their credit, exposing the country to the shame and contagion of repudiation.

Resolved, That the Republicans of this State, who secured power by pretence of sympathy with reform, deserve the severest judgment of the people for their falsity to their pledges. The record of the last session shows that they condoned alike the offense of a Senator who sold his vote, and of the Senator who purchased it; passed over, without censure, the extortions of their clerk; violated their oaths by making a false and unjust apportionment of congressional districts; encouraged personal and local legislation; obeyed, without resistance, the dictation of great moneyed corporations; refused to enact reforms essential to the general good, and laid themselves open to the grossest charges of venality and corruption.

Resolved, That a pure judiciary is the essential foundation of a free State. We congratulate the people upon what has been done to purify our existing system; and that we demand that the work of reform shall go on, without regard to party, until our judiciary shall stand, acknowledged by the world, free and pure and independent.

Resolved, That the canals of New York are the property of the people of the State; and that we repel all propositions to subject them to the manipulation and control of the Federal Government. The policy which the people should enforce, in their management, is economy in expenditures, and the lowest tolls adequate to meet their annual obligations, with a view to their speedy and final exemption from debt, and free navigation to all comers.

Among those adopted by the Liberal Republicans were the following:

4. That we welcome the cordial acceptance of both platform and candidates by a great party heretofore antagonistic to us, and embracing wellnigh one-half of the voters of the Union, as the most cheering omen of better times. We value party organizations only so far as they secure the triumph of first principles, and whoever, in good faith, accepts these, are our political brothers.

5. We recognize the two great political duties of the hour to be—reform in national and State administration, and reconciliation and reunion with the South. We look for both in the triumph of the national and State ticket. We rejoice in the partial success of the first in New York, and the choice of reform candidates, Republican and Democratic, at the last election.

6. We deplore the failure of our last Legislature to carry forward the reform movement to its legitimate results, and we charge that failure largely upon the custom-house and other Federal interference. We condemn especially the neglect of the Legislature to purify itself by expelling its own corrupt members, and to inflict adequate punishment upon all other corruptionists within its reach; but we thank it, and congratulate the State for the partial purification of the judiciary, and we demand that this reform, and a more rigid system of economy and accountability, be extended to every department of the civil service.

7. That, in view of the fact that every producer and consumer is affected by the cost of the transportation of breadstuffs and merchandise between the grain-fields of the West and the cities of the East, the business interests of our State demand a fostering and generous canal policy, looking alike to the placing and maintaining in the most efficient condition of our great arteries of communication, and to the diminishing of taxation upon their traffic by reducing the tolls as far as possible.

The Democrats who did not approve of join-

ing with the Liberal Republicans held a convention at Albany on the 8d of October, and nominated an independent electoral ticket. A proposition to name candidates for State offices was voted down after some warm discussion. The following resolutions were unanimously adopted:

Whereas, Those illustrious men who achieved our independence, and who have written their names on a glorious immortality, established our Government for the benefit of the many instead of the few; and whereas, by the power of political patronage and the corrupt use of money, all this has been changed, and the Government, as now administered, tends directly to the benefit of the few instead of the many: therefore, be it

Resolved, That, in order to maintain the Government as originally established by the fathers of the Republic and cemented by their blood, we pledge our best energies to accomplish the great work of reform inaugurated by our illustrious chief, Charles O'Connor, of New York, and his associates.

Resolved, That the betrayal of the Democratic party by the Baltimore Convention, in the adoption of the platform of principles and the candidate of a faction of a hostile political party, is deserving of our abhorrence and execration.

Resolved, That the Democratic party is a party of principle, and as a party organization cannot exist without a maintenance of its principles, and that the selection of candidates not representatives of its principles is not to be tolerated, and absolves every Democrat from giving a ticket so selected his support or sympathy.

Resolved, That a coalition of parties for the sake of office and the patronage of the Government is at the sacrifice of principle, iniquitous in its conception, dishonorable in its nature, and must result in inevitable discomfiture and disgrace.

Resolved, That in the early history of our Government, without the intervention of convention or platform, the most eminent and worthy men were selected for the highest offices of the Government, whose well-known principles and consistency were sufficient guarantee for their fidelity, and that in presenting the names of Charles O'Connor for President, and John Quincy Adams for Vice-President, the Louisville Convention have not been actuated by any sectional consideration, but by the motive to present men of national reputation, whose great abilities and purity of character eminently fit them for the highest offices of the Government, and for whom the Democratic party can consistently cast their suffrages.

The whole vote cast for presidential electors in November numbered 829,693. Of these, 440,759 were in favor of the election of Grant and Wilson for President and Vice-President, and 387,279 for Greeley and Brown, making Grant's majority over Greeley 53,480. There were also 1,454 votes for Charles O'Connor for President and 201 for Jeremiah S. Black, temperance candidate. Grant's majority over all was 51,825. The total vote for Governor was 840,151, of which Dix received 447,801, and Kernan 392,350; Dix's majority, 55,451. Tremain received 438,456 votes for Congressman at large and Cox 400,697, making the majority of the former 37,759 in a total vote of 839,153. The Republicans chose 23 Representatives to Congress and the Democrats 9. The Legislature now stands 24 Republicans and 8 Democrats in the Senate, and 91 Republicans, 85 Democrats, and 2 Inde-

pendents in the Assembly. The total vote for President in the city of New York was 182,471, of which 77,814 were for Greeley and 54,657 for Grant, giving the former a majority of 23,157. The vote for Governor was 184,205, of which Kernan received 77,915, and Dix 56,290; Kernan's majority, 21,625. Wm. F. Havemeyer, nominated by the Citizens' Committee of Seventy and accepted by the Republicans, was elected mayor of the city over Abraham R. Lawrence, the candidate of the Tammany Democracy, and James O'Brien, Independent Democrat, the vote being 53,081 for Havemeyer, 47,133 for Lawrence, and 84,714 for O'Brien. Noah Davis, Republican, was chosen Judge of the Supreme Court in the city, over Leonard, Tammany Democrat, who had been appointed in place of Cardozo, and Anderson, Apollo Hall Democrat; Josiah Sutherland, a nominee of the Republicans and Apollo Hall Democrats, was chosen City Judge over Gunning S. Bedford, Tammany Democrat; Henry G. Van Vorst, Republican, was chosen Judge of the Superior Court, and Benjamin K. Phelps, Republican, District Attorney. This result was brought about by a coalition of the Republicans and Democratic opponents of the Tammany organization, under the lead of the Committee of Seventy. Of the 15 Aldermen chosen, four were Tammany nominees, and the rest coalition candidates. Eight Tammany Democrats, seven Republicans, and six Apollo Hall Democrats, were chosen Assistant Aldermen.

The reform in the administration of the affairs of the city of New York, which was begun in 1871, was well sustained during the year. The Committee of Seventy issued an address near the end of May, in which they reviewed what had been accomplished, and deprecated the failure of the new charter in the Legislature, attributing its defeat to the hostility of Governor Hoffmann. Practically, nothing has been done to bring to punishment those accused of official corruption in the previous year. A. Oakey Hall, the mayor of the city, was brought to trial for alleged misdemeanor in auditing accounts in which the city was overcharged for work and supplies, but his trial resulted in a disagreement of the jury. William M. Tweed, the former head of the Department of Public Works, charged with the principal share in the conspiracy to plunder the public treasury, was tried on one indictment near the end of the year, and acquitted. Several suits, both criminal and civil, are still pending against him. Richard B. Connolly, the former Comptroller, who is also under indictment and awaiting trial on bail, has remained unmolested, and is supposed to be out of the State, if not out of the country. Peter B. Sweeney, formerly head of the Department of Public Parks, and one of the organization known as the "Tammany Ring," has been in Canada, and no action has been taken against him. Thomas C. Fields, formerly Corporation

Counsel, and a member of the Legislature, charged with corrupt conduct in office, is believed to have fled the country. Mr. Tweed remained a member of the State Senate until 1873, although he did not appear in his seat during the last session. Early in the session of 1873, an investigation into his conduct was set on foot by the Senate, and in March he sent in his resignation. The Committee of Seventy took a leading part in making up the tickets for local offices in the fall, and their candidates, who were generally supported by the Republicans and "Anti-Tammany" Democrats, were very generally elected. In an appeal to the voters of the city, at the opening of the political campaign in September, the committee gave the following picture of the corruption that had prevailed in the management of municipal affairs:

We appeal especially to the vast reserve force of voters through whose criminal indifference to their political duties the shame and disgrace that we are now enduring has come upon us. At least one-third of the best classes of people are habitually absent from the polls. The forces of evil are active, crafty, and resolute. The honest people of this State have never had such an inspiration to redeem themselves from the wiles of corruptionists, and to teach them a lesson that will be remembered for generations to come. Never has the proud motto of our State been so appropriate as it will be if we do our duty this fall.

In our glorious resurrection of public virtue the humiliations of the past will be forgotten as a hateful dream, and every institution of our society and politics will feel the elevating influences of revived confidence in honesty and justice.

Official corruption has grown up as the result of the enormous expenses of a gigantic war, of an inflated currency, of the magnificent chances offered to private ambitions, of stock and gold gambling, and a universally spread passion for sudden wealth and idle display.

It is an evil which has afflicted both parties, and dragged them down from the high principles that gave them origin. Honest and earnest patriots will feel the common woes and humiliations that have been brought on us by the representatives of both parties, and will be enkindled to a doubly bitter hatred of the Achan's that are in their own camps, and that have dragged their own banners in the mire of corruption.

In this city, where millions could be stolen from tax-payers without imposing extra burdens that were felt as enormous by so wealthy a constituency, it is not strange that prevailing corruption should have broken out in aggravated forms, nor that all the evil elements in our community should have finally been combined into an apparently irresistible phalanx.

No such mass of bad material was elsewhere to be found waiting such a masterly alliance of corrupt leaders to develop all its resources of evil.

Given these elements, opportunities, and leaders, and the natural result was the ring which, until lately, has robbed and stolen itself into power; which has bought Legislatures, controlled governors, corrupted newspapers, defiled courts of justice, violated the ballot-box, threatened all forms of civil and religious liberty, awed the timid rich, bribed the toiling masses, and cajoled respectable citizens, and which has finally grown so strong and reckless as to openly defy the intelligence and virtue which is believed to be inert, voiceless and powerless to stay its aggressions, or to assert the supremacy of honesty and justice.

A labor-"strike" of unusual proportions occurred in the city of New York in the spring and early summer. Near the end of April the painters demanded the adoption of eight hours as a working-day, without any corresponding reduction in their wages. This was refused by their employers, and they immediately ceased work. Their example was soon followed by the carpenters, bricklayers, and others in the building-business, and the movement gradually spread until it included nearly every class of artisans. There were organizations in the various trades, and the employers also formed an association to resist the demands of the "strikers." The strike lasted until after the middle of June, and occasioned heavy losses both to employers and employed, and caused much suffering and hardship among the latter class. The number of laborers engaged in the movement was estimated at about 40,000, and the loss for one month has been thus stated:

Direct loss to working-men, in wages, one month.....	\$1,400,000
Direct loss to employers, in profits, one month.....	1,152,000
Total loss to working-men and employers.....	\$2,552,000
Add to this, indirect loss to industry and taxable values, equal.....	\$5,760,000

The strike was brought to an end gradually in June, some of the men having gained the object aimed at, and others returning to work at ten hours a day, but it is believed that in most cases there was an ultimate return to the old basis.

Some trouble was occasioned in the public schools of Long Island City in the early part of the year by the refusal of certain Roman Catholic pupils to be present during the reading of the Scriptures. The Board of Education of the city had directed the reading of some portion of the Bible as an opening exercise in the schools and had excluded the pupils altogether who refused to be present during such exercise. An appeal was made to the State Superintendent of Public Instruction for a decision in the matter, and he declared the course of the City Board of Education to be "without warrant of law." He said that religious training formed no part of the object of the public schools, and that no discrimination should be made on the ground of religious belief. He quoted with approval a former decision to the following effect:

A teacher has no right to consume any portion of the regular school-hours in conducting religious exercises, especially where objection is raised. The principle is this: Common schools are supported and established for the purpose of imparting instruction in the common English branches; religious instruction forms no part of the course. The proper places in which to receive such instruction are, churches and Sunday-schools, of which there is usually a sufficient number in every district. The money to support schools comes from the people at large irrespective of sect or denomination. Consequently, instruction of a sectarian or religious denominational character must be avoided, and teachers must confine themselves, during school-hours, to their legitimate and proper duties.

An important decision was rendered in the Superior Court of the City of New York on the 14th of June, affecting the right of the Governor of the State to surrender to a foreign power a person charged with crime within the jurisdiction of such power, and arrested in this State. One Carl Vogt had been arrested in New York at the instance of the Belgian minister, charged with having murdered a nobleman in Belgium. He had been retained in custody, and a warrant for his extradition to the Belgian authorities had been issued by Governor Hoffmann, when he was brought before Judge Curtis of the Superior Court, on a writ of *habeas corpus*. The court held that the Governor had no power to deliver up any person to a foreign power, as the Constitution of the United States prohibits any State from entering into "a treaty, alliance, or confederation" with such a power without the consent of Congress. The language of the court was as follows:

The Constitution of the United States regarded the substance of things and not forms, and it is difficult to find in that brief instrument a superfluous word, or one without a distinct meaning. When it declares that no State shall, without the consent of Congress, enter into agreement or compact with a foreign power it prohibits any arrangement by which, at the request of a foreign power, a State can deliver up a person charged with a crime to such foreign power. The request of the minister is the request of the foreign Power he represents, and the acceding to it on the part of the State, acting through its agent, the Governor, constitutes an agreement between the State and the foreign power, precisely such as the Constitution of the United States prohibits by the use of the words "agreement or compact," thereby meaning any arrangement between the two not embraced by the terms "treaty, alliance, or confederation," previously therein forbidden. The exercise of such a power by a State is also inconsistent, and at variance with the powers conferred on the Federal Government. It would prejudice the treaty-making power, and the power to entertain diplomatic relations solely conferred upon the latter. There could be no useful concurrent exercise of these powers, but, on the contrary, when the individual States entertain the requests and enter into agreements with the ministers of foreign powers, a labyrinth of confusion and disasters is opened. It was doubtless to avoid this that all relations between the several States and foreign governments were so carefully watched and restricted by the Constitution at the very formation of the Government.

It is to be regretted that this country shall be the refuge of a criminal from any nationality. Treaties, with provisions for the extradition of persons charged with crime after an examination before a judicial officer, exist between the General Government and many foreign states. It is difficult to conceive why such an arrangement does not exist with a government like Belgium, whose liberal legislation and enlightened administration of justice are reflected in its marked developments of material prosperity. It is true that the States may, as a part of their ordinary police powers, reserved to them, remove any person guilty or charged with crimes; but it is to be observed that in this the States act simply with a view to their own protection and welfare, and totally irrespective of the foreign governments in which the crimes were committed. In this contingency the person removed may still assert before our courts any rights that have been infringed upon, but when delivered over to a foreign power he may be de-

prived of all redress, however wronged by the act of surrender. I am thus led to the conclusion that the warrant of the surrender of the prisoner to the Belgian authorities is unconstitutional and void, and is of insufficient authority for his detention and imprisonment by the warden of the City Prison.

The total funded debt of the State at the beginning of the fiscal year, September 30, 1871, was \$38,121,606.40, classified as follows:

General Fund.....	\$4,040,036 40
Contingent.....	68,000 00
Canal.....	11,966,680 00
Bounty.....	23,047,000 00
Total.....	\$38,121,606 40

On the 30th September, 1872, the total funded debt was \$36,574,206.40, classified as follows:

General Fund.....	\$3,988,526 40
Contingent.....	68,000 00
Canal.....	11,966,680 00
Bounty.....	21,121,000 00
Total.....	\$36,574,206 40

The actual reduction, by cancellation of matured stocks, and those purchased on account of bounty debt sinking fund, was \$1,547,400.

The following statement shows the amount of the State debt on the 30th September, 1872, after deducting the unapplied balances of the sinking funds at that date:

	Debt on the 30th Sept., 1872.	Balance of Sinking Fund, Sept. 30, 1872.	Balance of debt, after applying Sinking Funds.
General Fund.....	\$3,988,526 40	\$2,787,567 49	\$1,200,958 91
Contingent.....	68,000 00	19,710 50	48,289 50
Canal.....	11,966,680 00	1,449,978 15	9,946,701 85
Bounty.....	21,121,000 00	16,930,234 43	14,190,775 58
Total.....	\$36,574,206 40	\$11,187,480 56	\$25,386,725 84

The debt at the beginning of the year, after deducting the unapplied balances of the sinking funds, was \$29,482,702.52; at the end of the year, \$25,386,725.84; which shows a reduction of \$4,095,976.68. What is known as the general fund debt, amounting to \$3,988,526.40, consists of \$561,500 of "Astor stock," issued under laws of 1827 and 1832, \$3,257,887.77 of "deficiency loans," issued under laws of 1848, "Comptroller's bonds" amounting to \$66,443.76, and "Indian annuities" to the amount of \$122,694.87. It is payable as follows:

On demand.....	\$30,443 76
1875.....	900,000 00
1878.....	800,000 00
At pleasure.....	2,358,033 64
Total.....	\$3,988,526 40

The receipts from the general fund debt sinking fund for the year amounted to \$1,864,168.89, from which payments were made amounting to \$279,172.75:

Of the canal debt, amounting to \$11,966,680 on the 30th of September, \$1,106,580 was incurred under section 1 of the constitution, and is redeemable January 1, 1874; \$9,285,000 was incurred under section 3 of the constitution, bears 6 per cent. interest, and is

redeemable at various dates, prior to July 1, 1887, the larger portion falling due in 1873 and 1874; \$880,000 was incurred under section 12 of the constitution, for the payment of the floating fund, and is redeemable in 1877. The following statement shows the tolls received on each canal, and the total expenditures for ordinary and extraordinary repairs and new work, during the fiscal year ending September 30, 1872.

CANALS.	Income.	DISBURSEMENTS.			
		Ordinary Repairs.	Extraordinary Repairs and New Work.	Total.	All Disbursements in Excess of Income.
Erie Canal.....	\$4,700,147 50	\$1,023,079 09	\$661,942 02	\$1,685,021 11	\$3,015,118 39
Champlain Canal.....	150,644 26	295,211 47	251,871 61	547,083 08	953,064 42
Oswego Canal.....	90,796 57	171,794 52	141,073 94	312,868 46	587,935 11
Cayuga & Seneca Canal.....	17,883 58	85,287 53	26,319 00	111,606 53	67,281 05
Chemung Canal.....	4,120 81	58,434 80	35,550 15	93,984 95	89,864 14
Black River Canal.....	6,690 67	123,297 40	\$10,860 20	\$33,747 60	\$98,056 93
Genesee Valley Canal.....	10,888 86	87,640 18	\$1,839 17	\$19,479 35	\$88,440 91
Onondaga Lake Canal.....	18,896 26	\$10,023 63	19,590 68	\$29,613 30	\$10,640 94
Baldwinsville Canal.....	5,710 00	5,710 00
Seneca River Improvement.....	690 00	150 00	840 00
Cayuga Inlet.....	154 86	154 86
Crooked Lake Canal.....	804 66	804 66
Total.....	\$3,000,888 80	\$1,949,705 19	\$1,854,906 77	\$3,804,611 96	\$1,196,276 84
					Total disbursements on all canals in excess of all income..... \$1,196,276 84
					Total income in excess of disbursements for ordinary repairs..... 1,070,068 70

The bounty debt on the 30th of September consisted of \$19,861,000 registered stock and

\$1,260,000 coupon bonds. The receipts from the bounty debt sinking fund for the year amounted to \$8,928,848.02, from which payments were made amounting to \$2,500,250.19. The balance is made up largely of uncollected taxes, payable by the city and county of New York. This sinking fund, including the unexpended balance for the year, amounts to \$7,399,841.92.

The contingent debt, amounting to \$68,000, was incurred for the Long Island Railroad Company, and the interest is paid and the payment of the principal provided for by that corporation.

The expenditures of the State Treasury for the fiscal year amounted to \$22,295,343.50, while the actual receipts were only \$13,146,506.58. This leaves an apparent deficiency of \$9,148,836.92, which is reduced to \$4,808,922.95 by the application of various sums due to the Treasury. The most important items of public expense are \$3,083,585.55 for educational and charitable purposes, and \$822,258.20 for the support of asylums and hospitals for the deaf, blind, insane, and idiotic, not including the sums appropriated for building purposes. The amount expended for the erection and improvement of buildings and for maintenance of each of the insane asylums was: \$21,589.06 for the State Lunatic Asylum at Utica; \$190,225.01 for the Willard Asylum for the Insane near Ovid; \$203,166.66 for the Hudson River Hospital for the Insane at Poughkeepsie; \$230,000 for the Buffalo State Asylum for the Insane; \$15,000 for the Monroe County Insane Asylum; and \$44,000 for the Homœopathic Asylum for the Insane at Middletown.

The expenses and earnings of the three State-prisons for the year ending September 30th were as follows:

PRISONS.	Advance from the Treasury.	Received from Earnings.	Excess of Expenditures.
Auburn	\$213,969 94	\$126,335 87	\$87,634 63
Clinton	201,372 73	202,385 70	83,987 02
Sing Sing	357,341 98	97,088 47	260,753 51
Miscellaneous expenditures not distributed, including \$21,066.69 for transportation of convicts..			29,106 69
Total	\$863,184 69	\$426,409 54	\$465,881 84

The excess of expenditures over income was about 45 cents per day for each convict. At Auburn there were 1,113 prisoners at the end of the year, and their cost to the State was about 21 cents each per day. At Clinton the number was 531, and the cost of each per day 48 cents. At Sing Sing the number was 1,188, and the expense of each convict per day a little over 60 cents. It is generally admitted that the system of prison management in the State is a bad one, and an agitation for its reform has been begun.

The State Reformatory at Elmira was chartered in 1870, and \$75,000 was appropriated

toward its establishment. In 1871 \$204,000, and in 1872 \$200,000 more, was appropriated for the same purpose. Of the entire sum of \$479,000, about \$320,000 had been expended or paid over to the commissioners to September 30th. The institution is still far from completed.

There was paid for the construction of the new Capitol at Albany during the fiscal year the sum of \$856,106.92.

The rate of taxation in the State has increased in ten years from 5 mills to 9½ mills on a dollar of the assessed value of property. The total amount of the State tax in 1862 was \$6,884,193.77; in 1872 it was \$19,580,882.30. In 1862 the tax for all purposes in the State amounted to \$19,456,288.40; in 1872 it was \$63,511,936.12. The gross valuation of taxable property in 1862 was \$1,449,803,948; in 1872 it was \$2,088,627,445. The State tax levy for the current fiscal year is distributed as follows:

	Mills.
For schools	1½
For general purposes	1½
For bounty debt	2
For new Capitol	¾
For canal floating debt, under chapter 371, Laws of 1869	9.20
For new work on canals and extra repairs	7-10
For academies and union schools	1-16
For canal and general fund deficiencies	3½
Total	9½

This tax on the present valuation will yield \$19,580,882.30.

The system of taxation in the State is acknowledged to be very imperfect. The valuation is scarcely an index of the actual amount of property, and the assessments are unequal.

A commission has been appointed to inquire into the whole matter, and report such changes as may be deemed expedient in the revenue laws. The report of the commissioners was to be submitted to the Legislature of 1873.

There were on the 1st of July 157 savings-banks reporting to the banking department of the State, with assets amounting in the aggregate to \$292,305,329. The number of open accounts in these at the beginning of the year was 776,700, an increase of 64,591 over the preceding year. The amount deposited at that time, including interest credited during the preceding year, was \$190,788,157, an increase in one year of \$26,330,864. The amount withdrawn during the year preceding was \$152,956,496, and the amount of interest or profits \$16,849,911. The average of each deposit was \$344.92. On the 1st of October 70 banks of discount were doing business under the banking laws of the State. The amount of circulation outstanding, including that of incorporated banks, banking associations, and individual bankers, was \$1,902,001.50. The number of insurance companies subject to the supervision of the Insurance Department on the 1st day of December was 264, as follows:

New York joint stock fire insurance companies.....	96
New York mutual fire insurance companies.....	7
New York marine insurance companies.....	9
New York life insurance companies.....	33
Fire insurance companies of other States.....	73
Marine insurance companies of other States.....	1
Life insurance companies of other States.....	36
Casualty insurance companies of other States.....	3
Foreign insurance companies.....	13

Total..... 264

The total amount of stocks and mortgages held by the Department for the Protection of Policy-holders of Life and Casualty Insurance Companies of the State, and of foreign insurance companies doing business within it, was \$9,107,498.54, as follows:

For protection of policy-holders generally, in life insurance companies of this State,	\$3,961,143 54
For protection of registered policy-holders exclusively.....	2,515,350 00
For protection of casualty policy-holders exclusively.....	1,000 00
For protection of fire policy-holders in foreign insurance companies.....	2,027,000 00
For protection of life policy-holders in foreign insurance companies.....	308,000 00

Total..... \$9,107,498 54

The public-school statistics for the year ending September 30th are as follows:

Total receipts, including balance on hand, September 30, 1871.....	\$11,463,906 26
Total expenditures.....	10,853,690 98
Amount paid for teachers' wages.....	6,953,318 53
Amount paid for school-houses, repairs, and furniture.....	1,998,460 34
Estimated value of school-houses and sites.....	23,633,967 00
Total number of school-houses.....	11,740
Number of school districts (exclusive of cities).....	11,369
Number of teachers employed at the same time for the full legal term of school.....	18,031
Number of teachers employed during any portion of the year.....	28,496
Number of children attending public schools.....	1,010,343
Number of persons attending normal schools.....	5,657
Number of children of school-age in private schools.....	131,519
Number of volumes in school district libraries.....	575,173
Number of persons in the State between five and twenty-one years of age.....	1,530,638

The number of foreign immigrants landing at the port of New York during the year was 293,603, an increase of 63,964 over the number of the preceding year. The Commissioners of Emigration have under their charge a landing-depot at Castle Garden, in New York City, and hospitals, refuges, and other buildings, on Ward's Island, sufficient for 2,500 sick and destitute immigrants. The commutation fee paid by each person on landing, which was reduced in 1871 from \$2.50 to \$1.50, is declared by the commissioners to be insufficient to provide for the expenses of the department.

The militia of the State, known as the National Guard, consists of eight divisions and twenty-five brigades, distributed among the different arms as follows, namely: One regiment, one battalion, and nine separate troops of cavalry; twelve batteries of artillery, thirty-seven regiments, and six battalions of infantry; making an aggregate of 23,672 officers, non-commissioned officers, musicians, and pri-

vates. It is reported as in a fine state of discipline, and is held in high esteem by the people.

The quantity of salt produced from the Onondaga Springs during the year was 7,999,799 bushels, or 579,394 bushels less than the yield of the previous year. The revenue from this source was \$54,622.12, or \$7,965.33 less than in 1871.

The Commissioners of Fisheries of the State caused to be hatched and turned loose more than 7,000,000 shad during the year, most of them in the Hudson River. Large numbers of black and other bass, and other varieties of fish, were also collected from places in which they abound, and distributed to other waters in which they were wanting.

According to the census of 1870, of the total population (3,378,959), ten years old and over, there were engaged in all classes of occupations, 1,491,018 persons, of whom 1,233,979 were males and 257,039 females. There were: engaged in agriculture, 374,323, including 373,455 males and 868 females; in professional and personal services, 405,339, including 233,569 males and 171,770 females; in trade and transportation, 234,581, including 229,789 males and 4,792 females; in manufactures and mechanical and mining industries, 476,775, including 397,166 males and 79,609 females.

The State contained 15,627,206 acres of improved land, 5,679,870 of woodland, and 883,734 of other unimproved land. The cash value of farms was \$1,272,857,766; of farming implements and machinery, \$45,997,712; total amount of wages paid during the year, including value of board, \$34,451,362; total (estimated) value of all farm productions, including betterments and additions to stock, \$253,526,153; orchard-products, \$8,347,417; produce of market-gardens, \$3,432,354; forest-products, \$6,689,179; value of home manufactures, \$1,621,621; value of animals slaughtered or sold for slaughter, \$28,225,720; of all live-stock, \$175,882,712. There were 536,861 horses, 4,407 mules and asses, 1,850,661 milch-cows, 64,141 working-oxen, 630,522 other cattle, 2,181,578 sheep, and 518,251 swine. The chief productions were: 1,834,330 bushels of spring, and 10,344,132 of winter, wheat, 2,478,125 of rye, 16,462,825 of Indian-corn, 35,293,625 of oats, 7,434,621 of barley, 3,904,030 of buckwheat, 2,349,798 pounds of tobacco, 10,599,225 of wool, 1,152,541 bushels of peas and beans, 28,547,593 of Irish, and 10,656 of sweet, potatoes, 82,607 gallons of wine, 107,147,526 pounds of butter, 22,769,964 of cheese, 135,775,919 gallons of milk sold, 5,614,205 tons of hay, 98,837 bushels of clover-seed and 57,225 of grass-seed, 17,558,681 pounds of hops, 6 tons of hemp, 3,670,818 pounds of flax, 92,519 bushels of flax-seed, 6,692,040 pounds of maple-sugar, 46,048 gallons of maple-molasses, 7,832 of sorghum, 896,286 pounds of honey, and 86,333 of wax.

The total number of manufacturing establishments was 36,206, using 4,664 steam-engines of 126,107 horse-power, and 9,011 water-wheels of 208,256 horse-power, and employing 351,806 hands, of whom 267,878 were males above sixteen, 63,795 females above fifteen, and 20,627 youth. The total amount of capital invested was \$366,994,820; wages paid during the year, \$142,466,758; value of materials consumed, \$452,065,452; of products, \$785,194,651.

The whole number of newspapers and periodicals was 885, having an aggregate circulation of 7,561,497, and issuing annually 471,741,744 copies. There were 87 daily, with a circulation of 780,470; 5 tri-weekly, circulation 5,800; 22 semi-weekly, circulation 114,500; 518 weekly, circulation 3,888,497; 21 semi-monthly, circulation 216,800; 163 monthly, circulation 2,920,810; 19 quarterly, circulation 185,120.

These were further classified as follows:

NEWSPAPERS.	Number.	Copies annually issued.	Circulation.
Advertising.....	17	1,378,800	89,900
Agricultural and horticultural.....	10	7,681,800	307,150
Benevolent and secret societies.....	12	1,161,200	47,600
Commercial and financial.....	50	12,778,600	596,950
Illustrated, literary, and miscellaneous.....	108	72,448,180	2,047,865
Devoted to nationality.....	6	1,806,800	33,900
Political.....	487	323,171,734	2,968,538
Religious.....	90	40,798,340	2,095,120
Sporting.....	4	2,780,000	65,000
Technical and professional.....	56	6,996,400	289,580

The total number of libraries of all classes was 20,929, containing 6,310,352 volumes. Of these, 7,158, with 2,785,488 volumes, were private, and 13,771, with 3,524,869 volumes, were other than private. The latter were distributed as follows:

LIBRARIES.	Number.	Volumes.
State and territorial.....	2	66,019
Town, city, etc.....	130	173,286
Court and law.....	26	77,585
School, college, etc.....	9,875	1,165,158
Sabbath-school.....	3,105	994,637
Church.....	436	253,168
Charitable and penal institutions.....	1	5,000
Circulating.....	144	790,181

The total number of religious organizations was 5,625, having 5,472, and 2,280,876 sittings, and property valued at \$66,055,755. The leading denominations were:

DENOMINATIONS.	Organizations.	Sittings.
Baptist.....	902	333,066
Congregational.....	268	111,785
Episcopal.....	475	204,290
Lutheran.....	190	70,138
Methodist.....	1,745	606,096
Presbyterian.....	736	349,870
Reformed (late Dutch).....	304	147,082
Roman Catholic.....	455	271,235

The condition of pauperism and crime is shown by the following statistics:

VOL. XII.—38 A

Total population.....	4,382,759
Number of persons receiving support during the year ending June 1, 1870.....	26,153
Cost of annual support.....	\$2,661,385
Total number receiving support, June 1, 1870.....	14,100
Native.....	5,953

Foreign.....	2,046

NICARAGUA, an independent state of Central America, extending from latitude 10° 48' to 15° north, and from longitude 83° 30' to 87° 35' west. It is bounded on the north by Honduras, on the east by the Caribbean Sea, on the south by Costa Rica, and on the west by the Pacific Ocean. The area of the republic is 47,090 square miles; and it has a population of about 400,000; that of Managua, the capital, being 10,000; and that of Leon, the former capital, 25,000. President of the Republic, Vicente Quadra (February 1, 1871); Minister of Foreign Affairs, Anselmo H. Rivas; Minister of Public Instruction, Fr. Barbarens; Minister of War and the Interior, Antonio Salla; Minister of Finance, T. Miguel Cárdenas. President of the Senate, S. Chamorro; President of the Chamber of Deputies, J. E. Quadra. Consul-General of Nicaragua in New York, Alexander J. Cotheal. Bishop of Nicaragua, M. Ulloa y Calio.

The articles most extensively exported from Nicaragua are gold-dust, indigo, cedar and Brazil-wood, cheese, coffee, cotton, sugar, India-rubber, hides, and deer-skins. According to official returns, the value of the exports and imports of the republic in the year ending November 30, 1871, was as follows:

IMPORTS.	
Port of Corinto.....	\$368,337 05
Port of Templeque.....	4,320 30
Port of San Juan del Sur.....	106,163 29
Port of San Juan del Norte.....	424,223 67
Total.....	\$915,043 31
EXPORTS.	
Port of Corinto.....	\$438,492 85
Port of Templeque.....	37,975 80
Port of San Juan del Sur.....	152,619 15
Port of San Juan del Norte.....	562,610 89
Total.....	\$1,186,698 79

These figures show an increase of \$162,667.89 in the exports as compared with the year 1870; and a decrease of \$8,803.69 in the imports. The amount of the imports and exports by the custom-house of Corinto, during the third quarter of the fiscal year of 1872, is \$125,074.55. That by the port of San Juan del Sur, from 1st of March to the 31st of May last, was \$45,457.54. San Juan del Norte for the months of June, July, and August, produced, as the state of its imports and exports, \$93,066.74.

A marked increase has also been observed for the last few years in the production of coffee, sugar, cotton, and indigo; indeed, cof-

fee in 1872 brought a higher price than had ever before been obtained for that article, namely \$15.04 (soft) per quintal.

In the course of the year 1871 the shipping movements, at the port of Corinto, were as follows:

Entered—Steamers.....	65	tons,	79,288
“ Sailing-vessels.....	24	tons,	5,548
Cleared—Steamers.....	66	tons,	79,188
“ Sailing-vessels.....	14	tons,	8,804

And at the port of San Juan del Norte:

Entered—Steamers.....	12	tons,	36,963
“ Sailing-vessels.....	12	tons,	2,647
Cleared—Steamers.....	12	tons,	36,886
“ Sailing-vessels.....	11	tons,	2,457

All kinds of merchandise imported for sale or consumption, at the port of San Juan del Norte, pay duties to the governor of the port; while duties on goods imported *in transitu*, for the interior, are collected at the custom-house located at the Castillo Rapids, or “El Castillo Viejo,” 80 miles up the river San Juan.

The navigation of this river, and of Lake Nicaragua, under the direction of a company composed of foreigners and natives, who, some three years ago, entered into a contract with the government for the exclusive right to navigate the waters of the republic by steam for a term of twenty years, has so far proved successful, and is paying very handsome profits. There is an iron steamer on the lake, and half a dozen excellent boats on the river; besides which, an iron steam-tug is constantly plying with freight between the wharves and such vessels as cannot cross the bar at the entrance to the port, where there are but seven feet of water. No precise statement of the national revenue and expenditure has been published for a number of years. The outlay in 1868 was given at \$517,709.

The public debt is estimated at \$4,000,000.

The Government organ published, about the beginning of the year, a number of documents relative to the Central American Congress, held at San José, Costa Rica, for the purpose of forming an offensive and defensive alliance between the Central American republics, the result of which was the establishment of the Central American Union (*see* CENTRAL AMERICA).

Although the conference had taken place, and the pact been signed without the attendance of a representative from Nicaragua, it was urged that the latter republic should, nevertheless, not be deprived of the benefits accruing from the union, and separated from the “Central American family.” Accordingly, the minister plenipotentiary from Costa Rica, Don Rafael Ramirez, was commissioned to place the terms of the pact before the Nicaraguan Government, for the purpose of obtaining its adherence in case the cabinet should deem it convenient. Señor Ramirez was, however, by a sudden indisposition, impeded from proceeding to Managua; but he forwarded the document to Don Vicente Navas, who at a late hour had been appointed to represent the

Nicaraguan Government. Señor Navas replied that, not having had an opportunity to present his credentials, nor the honor of taking part in the deliberations which preceded the treaty, he could not then interfere personally, but that he would inform his Government of the matter.

On February 16th Mr. J. Simpson made his first experiment in raising water from Lake Masaya by the aid of steam. The occasion was solemnized by three days of feast, with bull-fights at the expense of the municipality. In Masaya was also celebrated, at the same time, the hundredth anniversary of the eruption of the volcano of the same name, traces of which still remain, formed by the incandescent lava in its downward course to the lake. The place, still bare of vegetation, is known by the name of *Piedra Quermada* (burnt stone).

President Quadra received an autograph letter from Dom Pedro II., Constitutional Emperor and Perpetual Defender of Brazil, congratulating him upon his elevation to the presidency.

The steamer on Lake Nicaragua was wrecked under circumstances which excited suspicions of foul play having been used. A new steamer has been built to replace the one that was lost.

Riots took place at Satiaba and Chinandega, but they were characterized as mere local effervescences, that did not affect the general tranquillity of the country.

The relations between Church and State were also on a cordial footing.

In March last an expedition set out from New York to survey the Sapoá and Child's routes, from Lake Nicaragua to the Pacific, for the purpose of determining a practical route for a ship-canal between the Atlantic and Pacific. The expedition, in charge of Commander Crossman, consisted of Lieutenant Schetkey, U. S. Navy; Lieutenant W. W. Rhodes, U. S. Navy; Lieutenant Noël, U. S. Navy; Lieutenant Leutze, U. S. Navy; Master J. F. Moser, U. S. Navy; Midshipmen Hughes, Winslow, and Keeler; Civil Engineer Menocal; and Assistant Civil Engineer Crowell.

Early in April, Commander Crossman, Lieutenant Forée, and four men from the Kansas, while crossing the bar at Greytown, were drowned. This melancholy occurrence was dispiriting to the expedition, and considerably damped the ardor of the whole party. Commander Crossman was a gentleman much esteemed for his professional capabilities as well as for his personal qualities, and his death was much regretted as a loss to his comrades and on account of the valuable services the survey was deprived of by his untimely end. His place was taken by Commander Hatfield, of the Kansas, who continued to lead the expedition during the survey.

The expedition proceeded up the San Juan

River, and across the lake to Virgin Bay, at which point the headquarters were established. The party was here divided; one half, under Lieutenant Noël, taking the Sapoa route; and the other, under Lieutenant Rhodes, taking the Child route. Both left Virgin Bay about May 1st, continuing the work until about the 9th of June, when it became necessary to stop, owing to the heavy rains which fall on the isthmus in that season. During these five weeks, a thorough survey of Child's route was made, and two supplementary lines were run in connection with it. Child's route commences at the mouth of the Las Lagas River, which runs into the lake on its western shore, and continues across the isthmus, following its course to Brito, on the Pacific. The main feature sought for by the expedition was the lowest elevation on either route, and on Child's it was found that the highest elevation was about 45 feet, while on the Sapoa route the lowest elevation found was about 700 feet. The great essential for the proposed canal lay, therefore, in the Child route. That of Sapoa is one continuous range of mountain-peaks, without a gap anywhere. The contrast between the two routes was so apparent, and so much in favor of the Child route, that the labor of the expedition, after a comparison of the surveys of both, was easy.

In seeking still further for the lowest elevation, that part of the expedition which had charge of the Sapoa route proceeded up to the northern part of the lake, Lieutenant Leutze commanding in place of Lieutenant Noël, and commenced a survey of the Ochomogoro route, following the bed of the river of that name. They had scarcely gone six miles when the heavy rains set in, and rendered further progress impossible.

This part of the expedition then returned to Virgin Bay, where they were joined by those who had been along the Child route, about the 14th of June, and the entire expedition left Virgin Bay on the 22d, arriving at Greytown on the 8d of July. The next day they embarked for Key West on board the Kansas, and arrived there on the 14th, bringing with them Señor Bernard, the minister to the United States from Nicaragua, who was on his way to New York.

The subject of the projected interoceanic canal gave rise to a somewhat angry controversy between the Governments of Costa Rica and Nicaragua, the cordial relations between which republics were already soured by a decree issued by the authorities at San José, prohibiting the further extraction of India-rubber from the national forests by Nicaraguans. It was suggested to the Nicaraguan Government that, by way of reprisal, the exportation of cattle from that republic should at once be suspended. More and more exacerbated, the authorities of Costa Rica declared null and void a treaty which had been concluded some time before between the two re-

publics. President Guardia now invited the President of Nicaragua to a personal conference on the subject; but, although the result of the meeting appeared likely to be an early and amicable arrangement, a certain evident reserve on the part of Nicaragua foiled all attempts to bind the two countries for the common weal. Nicaragua not only wants the canal to be made through her own territory, but, in order to secure that advantage, attempts to push Costa Rica, in the line of limits, as far back as possible from the border of the lake and the margins of the river San Juan, and also would like to take back Guanacaste. When the wish exists reciprocally between two neighboring nations to come to a good understanding on the important question of limits, and one in which the whole world is interested, like that of an interoceanic ship-canal, there would be no need to fall back on legal technicalities, based on the *uti possidetis* issued by Spain as far back as 1874, or any other antiquated records of territorial division suitable for the governors and captains-general of the time.

It is, at all events, very doubtful whether any part of the Mosquito coast can be fashioned into a suitable harbor for the entrance to the canal on that side, even if its practicability in other respects were regarded as certain. Capitalists would be apt to hesitate before embarking their funds in an enterprise dependent upon a treaty with Nicaragua, and unfavorable to the interests of Costa Rica.

A treaty of commerce and navigation was concluded between Nicaragua and Italy.

The streets of the city of Nicaragua were to be lighted with gas, the cost of which was to be paid by a gas-tax imposed upon the citizens.

A band of Jesuits, seventy-six in number, expelled from Guatemala, took refuge in Nicaragua, and endeavored to establish themselves at Managua.

On the 6th of October an attempt was made to overrule the elections by mob law; but the Government troops succeeded in quelling the disturbance.

On the island of Omotepe similar riots took place, produced, it was reported, by the question concerning the Jesuit refugees. Some other villages had likewise been the scene of election excitements.

But, spite of these and other perturbations of a like character, the desire on the part of the people of the republic for peace and progress grows apace, and the civil rule of the Government becomes daily more efficiently and more earnestly supported by the citizens.

NICHOLSON, Commodore WILLIAM CAR-MICHAEL, U. S. N., born in Maryland, in 1800; died in Philadelphia, July 25, 1872. He was appointed a midshipman in 1812, and was on board the President, commanded by Decatur, in the desperate action off Long Island, and, having been surrendered to the British fleet, was carried to England and not released until

after the war. In March, 1821, he was commissioned lieutenant, and in 1827 was attached to the frigate United States, Pacific squadron, and, after his return, stationed at Baltimore. In 1840 he commanded the schooner Boxer, and the following year was commissioned commander. In 1843 he commanded the sloop Preble, Mediterranean squadron, and from that time until 1854 was on shore duty at Boston, New York, and Memphis, when, upon receiving his captain's commission, he was, in 1855, ordered to the Pacific squadron as fleet-captain. He served in the East India squadron from 1858 to 1861, and, on special service, in 1862; was commissioned commodore, July 16, 1862, and retired under the act of 1861, and its amendment of 1864. When the civil war broke out, he was in command of the Naval Asylum in Philadelphia, and, having been a Marylander, his Southern friends expected him to join the South. But he promptly offered his services to the Government, considering that they were due to the United States, and not to any State. He was given an important command, and did his duty faithfully. His term of active service was longer than that of any other officer in the navy.

NORRIS, EDWIN, Ph.D., D. C. L., an eminent English ethnologist and linguist, born at Taunton, in 1795; died in London, December 10, 1872. He was trained for the service of the Honorable East India Company, and held a position in the India House from 1826 to 1836. In 1836 he was elected Assistant-Secretary to the Royal Asiatic Society, of which, in 1856, he became principal secretary, and, in 1847, was appointed, by Government, translator to the Foreign Office. He was widely known as the author of many valuable articles in the "Transactions" of the Royal Asiatic Society, among which may be mentioned those on "The Kapur-di-Giri Rock Inscription," "The Assyrian and Babylonian Weights," and "The Scythic Version of the Behistun Inscription." He also contributed to the "Transactions" of other learned societies numerous papers on philological, ethnological, paleographical, and other subjects, and had edited the "Ethnographical Library" since it was founded in 1853. He was the author of grammars in the Fulah and Bornu languages, translated portions of the Bible into Tahitian, and edited and translated "The Cornish Drama." But the principal work of his life lay in the direction of cuneiform studies. It was he who first assisted Sir Henry Rawlinson in bringing out, through the liberality of the trustees of the British Museum, the first two volumes of the "Cuneiform Records," principally those of the British Museum, but including also many others, such as the well-known monolith of Sargon, from Cyprus. Mr. Norris also, alone and unaided, undertook the stupendous labor of compiling and completing the first Assyrian dictionary, of which the third part has but recently been issued.

NORTH CAROLINA. The Legislature, which convened on the third Monday of November, 1871, adjourned on the 13th of February, having in the mean time taken a recess for Christmas. Near the close of the session, Matthew W. Ransom, Democrat, was elected United States Senator in the place of Zebulon B. Vance, resigned, whose political disabilities had not been removed. One of the most important measures was a bill proposing amendments to the constitution, introduced before the beginning of the year (see ANNUAL CYCLOPEDIA for 1871), which was passed on the 19th of January, and referred, according to the requirements of the constitution, to the Legislature to be chosen at the August election. The most important sections proposed for adoption were the following:

The members of the General Assembly shall each receive three hundred dollars as a compensation for their services during their term; but, they may have an additional allowance when they are called together in special session, and mileage shall be ten cents per mile for each session.

The judicial power of the State shall be vested in a court for the trial of impeachments, a Supreme Court, Superior Courts, such inferior courts as may be established by law, and Courts of Justices of the Peace.

The Supreme Court shall consist of a Chief-Justice and two Associate-Justices. (At present there are four Associate-Justices.)

The State shall be divided into nine (there are now twelve) judicial districts, for each of which a judge shall be chosen; and in each district a Superior Court shall be held at least twice in each year, to continue for such time in each county respectively as may be prescribed by law. The General Assembly may reduce or increase the number of districts, to take effect at the end of each judicial term.

The General Assembly shall prescribe a proper system of rotation for the judges of the Superior Courts, so that no judge may ride the same district twice in succession, and the judges may also exchange districts with each other, as may be provided by law.

The General Assembly shall have no power to deprive the judicial department of any power or jurisdiction which rightfully pertains to it as a co-ordinate department; but the General Assembly shall allot and distribute that portion of this power and jurisdiction, which does not pertain to the Supreme Court, among the other courts prescribed in this constitution, or which may be established by law, in such manner as it may deem best, provide also a proper system of appeals, and regulate by law when necessary the methods of proceeding, in the exercise of their powers, of all the courts below the Supreme Court, so far as the same may be done without conflict with other provisions of this constitution.

The judicial officers and the clerks of any courts which may be established by law, shall be chosen by the vote of the qualified electors, and for such term as may be prescribed by law. The voters of each precinct, established as is elsewhere provided for in this constitution, shall elect two justices of the peace for such term as may be fixed by law, whose jurisdiction shall extend throughout their respective counties. The General Assembly may provide for the election of more than two justices of the peace in those precincts which contain cities or towns, or in which other special reasons render it expedient. The chief magistrates of cities and incorporated towns shall have the judicial powers of justices of the peace.

The General Assembly shall make suitable provision by law for the management and regulation of the public schools, and for perfecting the system of free public instruction.

An act was also passed providing "for an exchange of the stocks held by the State in any railroad or other corporation, for the bonds by which the State acquired such stocks; or any other bonds of the State (not special tax) where the stock is not specially pledged for the redemption of bonds issued to such corporation." This act contains the following important features:

To facilitate the exchange proposed in this act, the State does hereby relinquish all claim for stock in the Western Railroad above one million one hundred thousand dollars, and surrender to the said company two hundred and twenty-five thousand dollars coupons, now in the State Treasury, withheld on a former exchange of company bonds for stock in said railroad; and also the State does hereby relinquish all claims to stock in said company above six hundred thousand dollars upon the return to the Treasury of the five hundred thousand dollars of Wilmington, Charlotte & Rutherford Company bonds, and coupons heretofore issued to said Western Railroad Company. The State also relinquishes all claims to stock in the Western North Carolina Railroad above four millions of dollars.

Owing to some constitutional defects in the existing law, and the inability or disinclination of the people to support the expensive system contemplated by it, a new school law was passed, which took effect on the 14th of March. Of this law the Superintendent of Public Instruction, in his report of November 1st, says:

It was framed upon the idea that education is not a charity for the poor, but a debt which the State owes to the young; that all the children of the State have an equal right to the privilege of education, and that it is the duty of the State to guard and maintain that right. It was intended to combine public assistance with private enterprise; to secure the cooperation of that class of people who are willing and able to do something for the education of their own children. Instead of having two systems of schools, the one private and supported entirely by subscription, and the other public, supported entirely by taxation, it was intended to unite the two systems to the advantage of both parties. It was intended that the public schools should take the place of private schools; that all the primary and grammar schools in the State should become public schools.

If the people of any neighborhood desire to avail themselves of the public-school money, they must make up, by subscription, an additional sum sufficient to satisfy the teacher and then employ the teacher. The school must then be free to all pupils, subject only to the restriction of section twenty of the school law.

If any neighborhood refuses to make up a school in this way, it can have no claim whatever to any part of the public-school funds. The law intends to aid those who aid themselves.

The present school law is not, and was not intended to be, a complete system. It is but the germ of a system to be developed by future legislation.

Bills were passed providing for the completion of the penitentiary, and redistricting the State for legislative purposes. An act was also passed dividing the State into eight congressional districts.

The political campaign of the year, the

most exciting that had ever occurred in the State, was opened by the assembling of the Republican State Convention at Raleigh, on the 17th of April. This body, which was the largest, most respectable, and decidedly the most intelligent Republican State Convention ever held in the South, consisting of over seven hundred delegates, about half of whom were colored, resulted in the renomination of Tod R. Caldwell for Governor, and the nomination of Curtis H. Brogden for Lieutenant-Governor, Dr. William H. Howerton for Secretary of State, Colonel Tazewell Hargrave for Attorney-General, David A. Jenkins for Treasurer, John Reilly for Auditor, Rev. James C. Reid for Superintendent of Public Instruction, and Silas Burns for Superintendent of Public Works. The following resolutions were adopted:

1. The principles of the Republicans of North Carolina, as heretofore enunciated in the conventions, are hereby reaffirmed, and events have proved that their practical enforcement is essential to the welfare of the country and to the maintenance of the rights, interests, and liberties of the people.

2. That the Administration of General Grant meets with our hearty and unqualified approval, and our delegates to the National Republican Convention, to assemble at Philadelphia on the 6th day of June, are instructed to vote for his renomination to the presidency of the United States.

3. That the Republican party of North Carolina favors as rapid a diminution and as early an extinction of internal revenue taxation as the exigencies of the Government will permit, for the reason that the details of its collection are necessarily offensive, and in many respects oppressive to the people, and that such taxation should not be continued for the purpose of paying any part of the principal of the national debt.

4. That all internal revenue taxes on the distillation of fruit ought to be abolished.

5. That the Republican party of North Carolina recommend to the Congress of the United States the passage of a general amnesty bill, and the adoption of all necessary measures for the enforcement and protection of the civil and political rights of all classes of American citizens.

6. That in a free and representative government we recognize the paramount obligation to provide efficiently for the general education of the people, and we favor such legislation as will accomplish that end; that we respectfully recommend and ask of the national Government such aid, by the provision of a public fund or the donation of public land to the purposes of establishing schools in the several States, as will secure to the masses of the people of all classes the benefits of a liberal education.

7. That we fully indorse the acts of Congress passed to secure equal rights and protection to the citizens of the United States in the several States; and we respectfully recommend a continuance of the present laws and the adoption of such further legislation as will more certainly secure to the citizens full and practical enjoyment of all their rights, privileges, and liberties.

8. In the opinion of the convention, the Democratic majority of the last Legislature, by consolidating into one act its numerous propositions to amend the State constitution, endeavored to force upon the people a false issue and to coerce them into the adoption of obnoxious amendments; and inasmuch as all these propositions must be submitted to the next Legislature for ratification before the same can be referred to the people: therefore—

Resolved, First, that the amendments proposed as

a whole do not meet the approval of the Republican party, because their adoption would subvert essential principles of the existing constitution; second, that Republicans can indorse a portion of said amendments, and the next General Assembly may adopt such of them as shall seem best for the general welfare.

9. That we cordially indorse the administration of Governor Caldwell, and recognize the fact that our people may rely upon his firmness in upholding their interests and defending their rights, and we heartily thank him for resisting the revolutionary purposes of those who design to deprive the citizen of the protection afforded by the State constitution.

10. That, forgetful of personal preferences, we pledge ourselves to support earnestly and without reserve the candidates presented by this convention, believing that in unity alone is strength, and that principles are more important than men to the Republicans of North Carolina.

The Democratic State Convention, which consisted of nearly two thousand delegates, representing every section of the State, assembled at Greensboro', on the 1st of May, and nominated Judge A. S. Merrimon for Governor, Major John Hughes for Lieutenant-Governor, Major J. W. Graham for Treasurer, Judge William M. Shipp for Attorney-General, J. A. Womack for Secretary of State, General C. Leventhorpe for Auditor, Dr. Nevins Mendenhall for Superintendent of Public Instruction, and J. H. Separk for Superintendent of Public Works. The resolutions, which are very important as expressing the views of the Southern Democracy on the issues involved in the presidential canvass, were as follows:

The Democratic Conservative party of North Carolina, in convention assembled, do declare:

That all experience proves that, in a free government, those to whom power has been delegated are prone to enlarge its sphere and by usurpation and abuses encroach upon the rights and liberties of the citizen.

The present condition of our country demands a union of all parties by whatever name heretofore designated, to avert perils greater than any with which our Government has been menaced since its organization.

Constitutional government and civil law are threatened with annihilation, and military government and bayonet law substituted in their stead.

Immense sums, not needed for any legitimate purpose, are drawn from the people by means of a system of taxation vexatious in the extreme, and as unequal as the ingenuity of the maker could fashion it, imposing heavy burdens upon the people, not only to support extravagance and waste by Government officials, but also to meet the demands of wealthy monopolists, who seek to convert the whole Government into an immense machine, by which the public is to be plundered for their benefit.

This system has produced an amount of official corruption that has astonished the country, and which will, if not soon checked, demoralize the people.

The Administration at Washington not only fails to correct these evils, but by its conduct encourages extravagance, speculation, and corruption.

In order that the patriotic men of the North may not be aided in their efforts to reform the Administration by the Southern States, a large number of the men of most experience in those States are disfranchised and prohibited from taking efficient part in the management of political affairs.

In addition to this, and to keep those States under the control of mere retainers and instruments of the

central power at Washington, oppressive and tyrannical laws have been passed, and large bodies of troops distributed to overawe the citizens, and prevent a fair expression of public opinion at the ballot-box.

Resolved, Therefore, that the time has arrived when it becomes the duty of all patriots, without distinction of party, to unite in an honest effort to restore constitutional government, an equal and moderate system of taxation, economy in expenditures, honesty among the officials, and universal amnesty, and thus secure the permanent peace and prosperity of our common country.

Resolved, That the present system of internal taxes on spirits and tobacco is unequal, vexatious, and tyrannical, ought forthwith to be abolished, and thus, by its extinction, relieve the country from the curse of a numerous horde of officers, whose conspiracies and frauds demoralize the public mind, and who are harassing and plundering the people, and by their extortions fattening on the hard earnings of a helpless, impoverished, and oppressed community.

Resolved, That the late radical convention of this State, by recommending J. C. Abbott to a seat in the Senate of the United States, though he did not receive one-third of the votes cast, manifested an utter disregard of the rights of the people of the State, a contempt of the Constitution of the United States, and a plain act of Congress made in pursuance thereof, and a preference for the laws of Great Britain, where the minority rule prevails, and the rights of majorities are habitually disregarded.

Resolved, That their indorsement of W. W. Holden, who was deposed from office for gross violations of the constitution and laws of the State, squandering its funds, and making illegal arrests of its citizens, is well calculated to alarm our people with the dread that, in the event of the return to power of his associates, the State is again to be oppressed with military arrests, penitentiary and railroad swindles, and general waste, profligacy, fraud, and corruption.

Resolved, That the general tendency, both at Washington and in our own State, of radical action is entirely in the interest of monopolists and the wealthy classes, and for the oppression of the masses of our countrymen, and that, instead of such conduct, it is the duty of the Government to aid, elevate, and dignify, the laborer, to whose efforts, mainly, we must look for our prosperity.

Resolved, That education and enlightened public virtue are indispensable essential in a government of and for the people; and we insist that a fair and just proportion of the public lands or their proceeds, which belong in common to all the States of the Union, shall be given to them for the education of all classes of the people, without distinction of race or color, instead of being granted by Congress, as they have hitherto been, under the most corrupting influences, and in vast quantities, to overpowering railroad corporations and other monopolies of accumulated wealth, so dangerous to the rights and liberty, the labor and welfare of the people.

Resolved, That, while we accept and faithfully abide by the Constitution of the United States as it is, with all its amendments, including emancipation and equality before the law, thus conferring equal civil and political rights upon all who are citizens of this Federal Republic, we oppose and denounce that latitudinous construction which makes the discretion of Congress or the President superior to the Constitution, and, under pretence of enforcing the laws, destroys the most important provisions securing the personal liberty of the citizen, and dwarfs the States themselves into mere provinces or corporations under the control of a central government, with no rights "reserved" to them or the people, except such only as that central government may confer.

Resolved, That we desire a real and not merely a pretended civil-service reform, and that we believe the "one-term principle" for the presidency would greatly tend to produce that desirable result.

Resolved, That the amendments to the constitution proposed by the last Legislature will, if adopted, tend materially to benefit the State, and we unhesitatingly recommend their support to all citizens, without distinction of party.

Resolved, That all secret political societies are dangerous to a free government, engender violence, combinations against the peace of society, insecurity of person and property, and ought to be discountenanced by all good citizens.

The campaign, thus opened, excited intense interest throughout the country, and was pursued with the utmost ardor by both parties until the election, which took place on the first Thursday of August. North Carolina being the first State to vote after the making of the presidential nominations, the result was expected, not only to indicate how her electoral vote would be cast, but also to exercise a marked influence upon the elections that were to follow in other States, in September and October, and, finally, upon the general result in November. Another point of great importance to be determined by this election was the manner in which the colored citizens would vote. The ablest speakers of both parties, including on the side of the Administration several members of the Cabinet, were sent into the State, and a most thorough canvass was made in every section. The colored vote, as elsewhere in the South, was cast almost unanimously for the Republican candidates, and Caldwell, with the other executive officers on the same ticket, was elected by a small majority. A majority of both branches of the Legislature, however, and of the Congressmen, were Democratic. The vote for Governor was as follows: Republican, 98,630; Democratic, 96,731: Republican majority, 1,899. The Legislature stands as follows:

LEGISLATURE.	Senate.	House.	Joint Ballot.
Democrats.....	32	66	98
Republicans.....	13	54	73
Democratic majority...	14	12	26

Of the Republicans, 4 Senators and 13 members of the House are colored. At the election in November, 94,769 votes were cast for Grant, Republican, and 70,094 for Greeley, Liberal Republican and Democrat; majority for Grant, 24,675.

The new Legislature convened on the 18th of November, and remained in session until December 19th, when it took a recess to the 15th of January, 1873. The Governor, in his annual message, recommended the passage of measures for an adjustment of the State debt, and to increase the efficiency of the school system, expressing the hope that Congress will lend some aid to the cause of education in the South. Changes in the election law are advocated, and the Legislature urged to provide for the establishment of a branch insane asylum in the western part of the State, for the organization of the militia, for the supervision of insurance companies doing business

in the State, and to make an appropriation for the completion of the Marion & Asheville Turnpike, traversing the counties of McDowell, Mitchell, Yancey, Buncombe, Watauga, Ashe, Alleghany, Wilkes, and Caldwell. He refers at length to the unfairness of the action of the last Legislature in apportioning Senators and Congressmen. For senatorial purposes the State was divided into 42 districts, of which 8 were entitled to two Senators each, and the residue to one each.

Very few acts were passed before the recess, the principal one being a bill reducing the salary of the Governor from \$5,000 to \$4,000, and fixing that of the Treasurer at \$3,000. Augustus S. Merrimon, Democrat, was elected U. S. Senator for the term commencing March 4, 1873. The Legislature, in April, 1871, passed an act authorizing the President of the Senate, and the Speaker of the House of Representatives to appoint proxies and directors for the State in all corporations in which the State was a stockholder. This act being regarded by Governor Caldwell, who claimed the power of appointment for himself, as unconstitutional, a suit was brought to test the question, and in February a decision was rendered by the Supreme Court, sustaining the position of the Governor. This decision was also regarded as settling the outstanding controversy as to the appointment of the trustees and directors of the charitable institutions. In June the U. S. Circuit Court decided that the dividends accruing on the \$3,000,000 stock, owned by the State in the North Carolina Railroad Company, could not be applied to the ordinary governmental expenses, but must be reserved for the payment of the coupons of the bonds issued in payment of the stock.

Reports from eighty counties show the number of children of school age (six to twenty-one) to be 267,938, of whom 85,240 are colored. As far as reported there were in the public schools, from March 14th to October 1st, 50,681 children, of whom 16,887 were colored; in private schools, 7,055. The number of teachers examined and approved was 2,132, of whom 1,261 were white males, 418 white females, 317 colored males, and 141 colored females. There are 1,627 public school-houses, 89 private school-houses, and 93 colleges and academies; 8 teachers' institutes, attended by from 37 to 50 teachers each, were held during the year. The receipts of the permanent school-fund, for the year ending September 30th, amounted to \$18,285.14; disbursements, \$16,218.75; balance, October 1st, \$7,088.51. The receipts of the income fund were \$32,715.67; disbursements, \$157,057.17; balance, \$54,182.05. For the same period the total sum in the hands of county treasurers for the support of schools was \$332,019.56, of which \$155,893.96 were received from the State, \$45,840 from property-tax, donations, etc., and \$130,785.60 from poll-tax. Fifty-five

counties reported \$104,164.17 paid for teachers' wages during the year. If the average for the other counties is the same, the total amount paid in the State is about \$171,000. In forty-counties, \$71,861.85 were paid for white schools, and \$27,256.19 for colored schools. This indicates about the ratio in which the school-fund is applied throughout the State. The condition of the Insane Asylum is shown by the following table:

INSANE ASYLUM.	Male.	Female.	Total.
Patients in the Asylum, Nov. 1, 1871.	127	118	245
Received during the year.....	94	19	43
Under treatment during the year.....	151	137	288
Discharged during the year.....	83	92	55
Remaining, November 1, 1872.....	119	114	233

The expenditures, on account of this institution, amounted to about \$70,000. During the year, an investigation was had into the management of the penitentiary, by a committee of the Legislature, who found that for about a year the convicts had been suffering from an insufficiency of clothing, and of good and wholesome food, particularly from lack of vegetables. They recommended the passage of an act regulating the daily rations of the prisoners.

According to the census of 1870, the population, over ten years of age, was 769,629. The number of persons engaged in all occupations was 851,299. There were 269,238 engaged in agriculture, including 168,978 agricultural laborers, 98,290 farmers and planters, 886 turpentine-farmers, and 1,332 turpentine-laborers; 51,290 in professional and personal services, of whom 861 were clergymen, 26,659 domestic servants, 16,880 laborers not specified, and 1,143 physicians and surgeons; 1,798 teachers not specified; 10,179 in trade and transportation, including 2,175 clerks in stores; 2,175 employes (not clerks) of railroad companies, and 1,574 traders and dealers not specified; and 20,592 in manufactures, mechanical and mining industries, including 3,154 carpenters and joiners, and 1,508 millers.

In 1870 the State contained 5,258,742 acres of improved land, 12,026,894 of woodland, and 2,549,774 of other unimproved land. The cash value of farms was \$78,211,088; of farming implements and machinery, \$4,082,111; total amount of wages paid during the year, including value of board, \$8,842,856; total (estimated) value of all farm productions, including betterments and additions to stock, \$57,845,940; orchard-products, \$394,749; produce of market-gardens, \$48,499; forest-products, \$1,089,115; home manufactures, \$1,603,518; value of animals slaughtered or sold for slaughter, \$7,988,132; of all live-stock, \$21,998,967. There were 102,763 horses, 50,684 mules and asses, 196,731 milch-cows, 45,408 working-oxen, 279,023 other cattle, 468,435 sheep, and 1,075,215 swine. The chief productions were, 405,238 bushels of spring, and 2,454,641 of winter, wheat, 352,006 of rye, 18,454,215 of Indian-corn, 3,220,105 of oats,

8,186 of barley, 20,109 of buckwheat, 532,749 of peas and beans, 738,803 of Irish, and 3,071,840 of sweet, potatoes, 83,540 tons of hay, 144,985 bales of cotton, 2,059,281 pounds of cotton, 11,150,087 of tobacco, 799,667 of wool, 4,297,834 of butter, 75,185 of cheese, 59,552 of flax, 21,257 of maple-sugar, 1,404,040 of honey, 109,054 of wax, 35 hogsheads of cane sugar, 62,348 gallons of wine, 33,888 of cane, 621,855 of sorghum, and 418 gallons of maple molasses.

The total number of manufacturing establishments in 1870 was 3,642, having 806 steam-engines of 6,941 horse-power, and 1,825 water-wheels of 26,211 horse-power, and employing 13,622 hands, of whom 11,389 were males above sixteen, 1,422 females above fifteen, and 861 youth. The capital invested amounted to \$8,140,473; wages paid during the year, \$2-195,711; value of materials used, \$12,824,693; products, \$19,021,327.

The total number of libraries reported by the census of 1870 was 1,746, with 541,915 volumes. Of these 1,090, containing 339,264 volumes, were private, and 656, with 202,651 volumes, other than private; among the latter were 3 State libraries, with 16,303 volumes; 3 town, city, etc., 2,316 volumes; 24 court and law, 4,119 volumes; 14 school, college, etc., 77,050 volumes; 500 Sabbath-school, 74,160 volumes; 109 church, 26,951 volumes, and 3 circulating, with 1,752 volumes.

The total number of newspapers and periodicals was 64, having an aggregate circulation of 64,820, and issuing 6,684,950 copies annually. Of these, 8 were daily, with a circulation of 11,795; 3 tri-weekly, circulation 800; 5 semi-weekly, circulation 5,750; 44 weekly, circulation 43,825; 1 semi-monthly, circulation 1,250; and 3 monthly, circulation 1,900.

The total number of religious organizations was 2,688, having 2,497 edifices with 718,310 sittings, and property valued at \$2,487,877. The principal denominations were:

DENOMINATIONS.	Organizations.	Sittings.
Baptist.....	965	949,765
Christian.....	66	16,200
Episcopal.....	77	22,925
Friends.....	23	11,250
Lutheran.....	73	22,290
Methodist.....	1,198	300,045
Presbyterian.....	204	77,155
Reformed (late German).....	31	9,200

The condition of pauperism and crime is shown by the following statistics:

Total population.....	1,071,361
Number of persons receiving support during the year ending June 1, 1870.....	1,708
Cost of annual support.....	\$136,470
Total number receiving support June 1, 1870....	1,632
Native.....	1,647
White.....	1,119
Colored.....	528
Foreign.....	6
Number of persons convicted during the year.....	1,211
Total number of persons in prison June 1, 1870..	468
Native.....	462
White.....	132
Colored.....	330
Foreign.....	6

OBITUARIES, AMERICAN. *Jan. 1.*—**GREGORY, J. W.**, a distinguished agriculturist, reformer, and pioneer in many great enterprises; died in New York City, aged 70 years. He was born in England, but had resided in the United States for nearly forty years. In his youth he was a skilful agriculturist. During the early days of California he established *Gregory's New York & California Express*. For many years he had been a member of the Farmers' Club. Of late he was an agent for the introduction of the ramie-plant and the castor-bean in the South. He helped to establish the Cosmopolitan Conference, and was its first secretary. He was also intimately connected with the International Workingmen's Association in New York City.

Jan. 1.—**WADSWORTH, CRAIG W.**, a brigadier-general of volunteers in the late war, and son of the brave Major-General James Wadsworth who fell in the battle of the Wilderness; died at his residence in Geneseo, N. Y., in the 30th year of his age. He was distinguished for his brilliant and daring gallantry during the war, and since the death of his father had been the head of the great Wadsworth family, whose domains were larger than some of the German principalities.

Jan. 3.—**BRITTAN, NATHAN**, a distinguished teacher and inventor; died at Adrian, Mich., in the 65th year of his age. He was born in Spencer, Mass., September 2, 1808, and received his early education at the academy in Hawley, Mass., whence he entered Brown University and graduated in 1837. After his graduation he engaged in the teacher's profession, at Rochester, N. Y., where he was associate principal of the Collegiate Institute then under the charge of Dr. Chester Dewey. He remained there till 1845, when he removed to Lyons, N. Y., where he taught with eminent success for five years, when he established himself in Adrian, Mich. In 1851 his attention was called by an impressive occurrence to the inadequacy of the lightning-rods in use in that part of the country, for the purposes of protection. He immediately devoted himself to the study of the laws of atmospheric electricity, and invented a new conductor, known as the "continuous copper strip," which was patented and received with very general favor. This led him to abandon his profession and to engage in the business of promoting the adoption of his invention. In this occupation he spent the remaining years of his life, residing at different periods in Lockport and Rochester, in Detroit and Chicago, and returning in 1868 to Adrian. In each of his places of residence he was actively engaged in religious efforts and in enterprises of social improvement. His death was

almost instantaneous, and was occasioned by slipping and falling on the ice as he was walking in the street.

Jan. 4.—**CLARK, REV. PERKINS KIRKLAND**, a Congregational clergyman and teacher, born in Westfield, Mass., December 8, 1811; died in Charlemon, Mass., aged 60 years. He graduated from Yale College in 1838, having previously taught for some years, and soon after his graduation engaged as a teacher in Savannah, Ga. Returning in the autumn of 1840, he entered the Theological Seminary at Andover, but the next year transferred himself to the Yale Theological Seminary, whence he graduated in 1843, but was a tutor in Yale College from 1842 to 1845 inclusive. In 1846 he was a teacher in the Normal School at Westfield, Mass., but resigned to enter the ministry at Huntington, Mass. He continued in the pastorate in Western Massachusetts from this time till his death.

Jan. 4.—**NAUDAIN, ARNOLD, M. D.**, a prominent citizen and political leader in the State of Delaware; died at Odessa, in that State, aged 82 years. He was born in Appoquinnimink Hundred, Del., January 6, 1790. He was of Huguenot stock, his grandfather having emigrated to Lower Delaware at an early period in the history of that colony, and having been known there as "Huguenot" Naudain. Dr. Naudain graduated at Princeton College in 1806, and completed his medical studies at the University of Pennsylvania in 1810. In 1826 he was Speaker of the House of Representatives in the Legislature. In 1830 he was elected to the United States Senate, to succeed Hon. Louis McLane, who had been appointed minister to England, and resigned in 1836. In 1841 he was appointed collector of customs at Wilmington. He enjoyed a high reputation, and attained great success as a physician. He was many years an elder in the Presbyterian Church.

Jan. 5.—**PORTER, Brigadier-General ANDREW**, a gallant officer long and favorably known in the army; died in Paris, aged about 52 years. He entered the Military Academy at West Point from Pennsylvania in 1836, but remained only through a part of the course, though he bore there as everywhere else the reputation of an agreeable companion and a cultivated gentleman. Leaving the Academy in 1837, he returned to civil life, from which, in 1846, he was appointed a first-lieutenant in the Mounted Rifles, and greatly distinguished himself during the Mexican War, winning, for gallant and meritorious conduct, successive brevets up to that of lieutenant-colonel, gaining meanwhile his promotion to a captaincy. At the commencement of the late civil war he was promoted to the command of one of the

new regular regiments—the Sixteenth Infantry—and soon received his commission as brigadier-general of volunteers, standing number three on the list. As provost-marshal-general during McClellan's peninsular campaign, he was active and efficient. His health was seriously affected while serving in this capacity, and his visit to and long sojourn in Europe were undertaken in the vain hope of regaining it. He had resigned his commission in the army, soon after the close of the war.

Jan. 5.—**SHERWOOD, Rev. JOHN M.**, a Presbyterian clergyman and journalist, for some years editor and proprietor of the *North Carolina Presbyterian*; died at Fayetteville, N. C.

Jan. 5.—**TODD, General JOHN BLAIR SMITH**, a grandson of the late venerable President J. B. Smith of Union College, and himself Delegate in Congress, Speaker of the House in the Territorial Legislature, and Governor of Dakota Territory; died at Yankton, D. T., aged about 57 years. General Todd was born in Kentucky, but appointed to the Military Academy from Illinois. He graduated in 1837, and was assigned to the Sixth Regiment of Infantry, with which he served through the Florida and Mexican Wars, and subsequently on frontier duty till September 1856, when he resigned and went into trade at Fort Randall, Dakota Territory. During the late civil war he was a brigadier-general of volunteers, and for a time in command of the Sixth Division of the Army of the Tennessee. He was a Delegate in Congress from Dakota, 1861-'65; Speaker of the House in the Territorial Legislature, 1867-'69; and Governor of the Territory, 1869-'71.

Jan. 8.—**MALONEY, Lieutenant-Colonel MAURICE**, U. S. A. retired list, a gallant officer who had risen from the ranks to his position, who was widely and creditably known throughout the army, and was finally placed on the retired list after thirty-five years of faithful service. He was born in Ireland, but came to this country in early life and enlisted in the army as a private in 1834 or 1835; was a non-commissioned officer of the Fourth Infantry from November, 1836, to November, 1846. Served in the Florida War; in the Cherokee nation, to 1841; in Florida, to 1842; and at Fort Scott, to 1845. In the Mexican War he participated in the battles of Palo Alto and Resaca de la Palma. He was commissioned as second-lieutenant in the Fourth Infantry, November, 1846, and took part in the battles of Monterey, Vera Cruz, Cerro Gordo, Churubusco, El Molino del Rey, Chapultepec, and the city of Mexico, where he was wounded; was regimental adjutant, 1847, and brevetted first-lieutenant U. S. Army, for gallant and meritorious services at the battle of El Molino del Rey; was likewise brevetted captain for similar services at the battle of Chapultepec, Mexico; was commissioned first-lieutenant Fourth Infantry, and in November, 1854, promoted to a captaincy; served with the regi-

ment on the Western frontier, and in the war with the South to September, 1862, as colonel of the Thirtieth Wisconsin Volunteers; after which he served as major of the First U. S. Infantry in the field during the war; was brevetted lieutenant-colonel U. S. Army during the siege of Vicksburg, and afterward colonel for meritorious services during the war; June 16, 1867, was commissioned lieutenant-colonel of the Sixteenth U. S. Infantry, and afterward commanded the post of McPherson Barracks, Atlanta, Ga. Colonel Maloney was presented a gold medal by the citizens of New Orleans, La., for his gallant record in the Mexican War.

Jan. 9.—**THAYER, JOSEPH**, an eminent lawyer and political leader, of Uxbridge, Mass.; died in Worcester, Mass., aged 82 years. He was born in Douglas, Worcester County, Mass., February 13, 1790, and received his early education there. He graduated from Brown University in 1815, studied law, and was admitted to the bar in 1818. He settled in Uxbridge, and was widely known for more than fifty years as an able lawyer, an influential politician, and an intelligent and skilful agriculturist. He was often a member of the Legislature and was a delegate to the Constitutional Convention of 1853.

Jan. 9.—**TODD, Colonel WILLIAM W.**, an eminent and venerable merchant of New York for more than a half-century, prominent in public and private enterprises of benevolence; died in New York City, at the age of 90 years.

Jan. 10.—**ATKINSON, ARCHIBALD**, a prominent politician and Congressman of the Isle of Wight, Va.; died there, in his 80th year. He was born September 13, 1792, received his early education in his native county, studied law at William and Mary College, was at the battle of Craney Island in 1813, practised law in Smithfield, Va., was a member of the General Assembly from 1815 to 1817, and also of the House of Delegates and State Senate for several years. In 1848 he was elected a Representative in Congress from Virginia, and served until 1848, and was a member of the Committees on Naval Affairs and Commerce. He was prosecuting attorney for his county twenty years, mayor of Smithfield, and a magistrate.

Jan. 10.—**LEAVITT, DAVID**, a journalist of Boston, for more than twenty-five years connected with the *Boston Journal*; died in Boston, aged 55 years.

Jan. 11.—**REYNOLDS, WILLIAM A.**, a prominent and esteemed citizen of Rochester, N. Y., the builder and proprietor of the "Arcade" and Reynolds Hall; died in Rochester.

Jan. 11.—**ROGERS, JOHN**, a centenarian of Boston, said to be the oldest man in that city; died from the effects of a fall, aged 103 years.

Jan. 12.—**BRADFORD, Captain and Brevet Major THOMAS C.**, Ordnance, U. S. A.; died at West Point, N. Y., aged 84 years. Major Bradford was a native of Rhode Island, and

was appointed from that State to the Military Academy, whence he graduated in 1861, ranking sixth in his class. He was assigned to the Ordnance Department and served as ordnance officer on the staff till after the battle of Bull Run, then as assistant-ordnance officer at the Washington Arsenal from August, 1861, to August, 1863, being wounded by the bursting of a cannon; was promoted to be captain of ordnance in March, 1863; was Assistant Professor of Mathematics at West Point for six months; in charge of the construction of Columbus (Ohio) Arsenal for three or four years subsequently; brevetted major in March, 1865, and in 1868 assigned to duty as Assistant Professor of Mathematics at West Point.

Jan. 13.—RICH, ISAAC, a wealthy and benevolent merchant of Boston, who, having acquired an immense fortune in the fish business, gave largely to educational purposes during his life, and bequeathed by will over a million dollars to found and endow a Wesleyan University in Boston. He died in that city, aged 71 years.

Jan. 14.—BOGUE, Rev. HORATIUS PUBLIUS, a Presbyterian clergyman, a graduate of Hamilton College (Clinton, N. Y.) in 1820, and of Andover Theological Seminary in 1823. He was a pastor in Central New York for twenty-eight years, and, for some years after 1851, agent of the Society for Ameliorating the Condition of the Jews. Of late years, though without a regular charge, he had preached almost constantly. He died at Buffalo, of congestion of the lungs, in the 76th year of his age.

Jan. 14.—MCGILL, Right Rev. JOHN, Roman Catholic Bishop of Richmond, Va.; died there, aged 63 years. He had a fine reputation as a scholar and author, before his consecration as bishop in 1850. Among his published works were "Faith our Victory," and "The True Church."

Jan. 15.—HANNA, JAMES M., a prominent jurist of Indiana, one of the Justices of the Supreme Court from 1858 to 1865, and for some years State Senator; died at his residence near Curryville, Vigo County, Indiana.

Jan. 15.—HEMENWAY, Mrs. DIANA H., a zealous and active promoter of Sunday-school instruction in Missouri for nearly twenty years past; died at Chambersburg, Mo. Though partially disabled by paralysis, she had accomplished a vast amount of labor in this direction. In one year (1870) she had either organized or revived eighty-seven Sunday-schools in the section of the State in which she resided, writing more than 500 letters in the accomplishment of this work.

Jan. 15.—LINTNER, Rev. GEORGE A., D. D., an eminent Lutheran clergyman and controversialist, born at Minden, Montgomery County, N. Y., February 15, 1796; died at Schoharie, aged 76 years. He was educated at Union College, graduating thence in 1817, and from the Hartwick Theological Seminary about

three years later. A man of deep and earnest religious convictions, thoroughly orthodox in his views, and a born leader, he took the front rank in his synod in opposition to the rationalism which was even then very prevalent in the Lutheran Church. At length, finding all other means unavailing, he and a considerable number of the younger men of the Synod went out from it and formed the Hartwick Synod, of which he was for some time president. In 1837 the rationalistic members of this Synod withdrew and formed the Franckean Synod, on the widest latitudinarian basis, and a new controversy sprung up. Dr. Lintner remained in the pastorate at Schoharie till 1849, and was subsequently engaged in promoting the work of foreign missions, and of the American Bible Society.

Jan. 15.—WOOD, Mrs. ELIZA LOGAN, better known to the public as Eliza Logan, a popular actress from 1841 to 1859; died in New York City, in the 42d year of her age. She was a daughter of Cornelius A. Logan, a poet and dramatist, and, like her sisters Olive and Cecilia, early made her *début* on the stage. Her first appearance was in the character of *Normal*, at the age of eleven years. She was from 1850 to 1859 one of the most popular actresses on the New York stage, in such characters as *Pauline* (in "The Lady of Lyons"), *Julia* (in "The Hunchback"), *Bianca*, *Eoadne*, *Lucrezia Borgia*, etc., etc. In 1859 she married George Wood, a theatrical manager; bought Wood's Theatre, Cincinnati, and retired from the stage. Her husband subsequently bought Wood's Museum in New York, and she removed to that city. Her last illness was protracted, and she had borne much pain with patient fortitude.

Jan. 17.—SEDLLEY, WILLIAM HENRY, better known to the theatre-going public as W. H. Smith, an actor of great ability, for more than fifty years connected with the stage; died in San Francisco, in the 66th year of his age. He was born December 4, 1806, near the town of Montgomery, in Wales, and was the son of a brave officer in the British Army, killed in the Peninsular War. He left his home to escape from the persecutions of his step-father, at the age of fourteen, and joined a company of strolling players. The early part of his career was full of vicissitudes and troubles, but he adhered to his determination to learn his profession by hard study and faithful work, and he had achieved a fair reputation before coming to this country in 1827. His first appearance here was at the Walnut Street Theatre in Philadelphia. His highest reputation was won in Boston, where he first appeared in 1823, at the Tremont Theatre, as *Rolando* in "The Honey-moon." In 1836 he managed Palby's National Theatre, in that city; and from 1843 to 1860 he was stage-manager of the Boston Museum. His first performance in New York took place at the old Chatham Street Theatre, November 3, 1840, when he acted *Edgar*, to the *Lear* of Junius Brutus Booth. Local play-goers also

saw him at this time as *Laertes*, *Gratiano*, and *Mark Antony*. His last professional appearance in New York was made at the Winter Garden, May 6, 1865, on which occasion he acted for his daughter's benefit. During the last few years he has been acting, and managing the stage, at the California Theatre, and he had become a favorite in San Francisco. He deserved his reputation. His art was intellectual, truthful, conscientious, significant with thought and purpose, and warm with emotion. His life was that of a gentleman—and he wore the "grand old name without dishonoring it."

Jan. 18.—BERGEN, Rev. JOHN G., D. D., a Presbyterian clergyman, who had been a pioneer settler of Illinois, and had largely contributed to its growth and development, both in secular and religious matters; died at Springfield, Ill., aged 81 years. He was a native of New Jersey, a graduate of Princeton College in 1808, and a tutor in that college in 1810. He was licensed to preach in 1811, and soon became the pastor of the Presbyterian Church of Madison, N. J. From this place he removed with his family to Springfield, Ill., in 1823, where he became pastor of the First Presbyterian Church, and in which place he resided for more than forty-eight years. He resigned the pastorate at Springfield in 1845, but had been unceasingly active in promoting all good causes from that time to his death.

Jan. 19.—ELDER, Rev. ALEXIS JOSEPH, a venerable Roman Catholic priest, professor and seminary officer of St. Mary's Seminary and College for more than fifty years; died at the seminary in Baltimore, in the 81st year of his age. He was born at or near Emmitsburg, Md., October 15, 1791, came to Baltimore in 1815, and in 1817 commenced his theological studies in St. Mary's Seminary. He received the clerical tonsure at the hands of Archbishop Carroll, the first bishop of the Catholic Church in the United States; was ordained priest by Archbishop Marechal, was admitted into the Society of St. Sulpice in 1822, and retained his connection with the college and seminary of that society (St. Mary's) till his death, being one of its instructors, treasurer, etc.

Jan. 19.—LYMAN, Rev. O. A., D. D., a Presbyterian clergyman, pastor of the Euclid Avenue Presbyterian Church, in Cleveland, Ohio, who died from apoplexy induced by excessive labor in his profession, in that city, in the 48th year of his age. He was born in Northern Ohio, in 1824, graduated from Western Reserve College in 1844, studied law, and was admitted to the bar in 1846, and commenced a brilliant career as a lawyer in Dayton, Ohio, the same year. He practised law there with great success for nearly twelve years; removed to New York City, and was converted in the great revival of 1858. He then decided at once to enter the ministry, and, after an abbreviated course of study at Lane Seminary, took the position of chaplain successively to two Ohio

regiments; at the close of the war he was pastor from 1865 to 1868 of the Seminary Church at Walnut Hills, near Cincinnati, and was called thence to Cleveland. He had won a high reputation for ability, eloquence, and faithfulness, in that city, and his excessive labors hastened his untimely death.

Jan. 21.—BRAGG, THOMAS, a political leader and Governor of North Carolina; died in Raleigh, N. C., aged 62 years. He was of humble parentage, and was born in Warrenton, Warren County, N. C., November 9, 1810. He was educated at the military academy at Middletown, Conn., studied law, and was admitted to the bar in 1831, and entered the North Carolina House of Commons in 1842. In 1854 he was elected Governor of North Carolina, and held that position two terms. He was elected U. S. Senator in 1859, but withdrew in 1861, on the pretext that his State had seceded. Pres. Davis made him Attorney-General in his Cabinet, February 22, 1861, and he acted in that capacity two years. In July, 1861, he was expelled from the U. S. Senate for having taken part in the civil war. Having lost all his means by the war, Governor Bragg resumed the practice of his profession, and also mixed in politics. He was very active in the impeachment proceedings against Governor Holden. He was a brother of General Braxton Bragg of the Southern army. He was chairman of the State Democratic Committee of North Carolina, and exercised considerable influence in directing its course of action.

Jan. 22.—WASHINGTON, Colonel BENJAMIN F., a Californian journalist and politician, a Virginian by birth; died in San Francisco. He was editor of the *San Francisco Examiner*, and had been mayor of the city, collector of the port of San Francisco under President Buchanan, and State Tide-Land Commissioner.

Jan. 23.—CONEY, JABEZ, an eminent engineer and iron manufacturer of Boston; died there, aged 67 years. He had commenced business, just before attaining the age of twenty-one, in Mill Village, Dedham, Mass., his first work being the construction of a large water-wheel. He had planned and constructed many manufacturing establishments previous to 1837, when his machine-shop was burned. He then moved to South Boston, and entered upon a much more extensive business—building machinery for boring and finishing cannon, constructing the first iron vessel ever built in New England, and the first marine engine of large size, the first gravel excavator, and many other great enterprises. He had suffered from a paralytic affection for more than twenty years before his death.

Jan. 24.—DAVIS, Mrs. JOHN, a venerable lady of Worcester, Mass., widow of the late Governor and U. S. Senator John Davis, and sister of George Bancroft, the historian and diplomatist; died in that city, aged 80 years.

Jan. 24.—HOPKINS, Rev. ERASTUS, a former

Congregationalist clergyman, and an influential political leader in Western Massachusetts; died at Northampton, Mass., aged 62 years. He had represented Northampton for several years in the Legislature, and had been particularly active in the Free-soil and early Republican times.

Jan. 25.—**BUTTLES, ALBERT BARNES**, a distinguished lawyer of Ohio, a graduate of Yale College in 1842, admitted to the bar in Ohio in 1845, Clerk of the Supreme Court and Court of Common Pleas of Ohio, from 1854 to 1858, and subsequently engaged in a large and successful practice in Columbus, O., till his death there, at the age of 50 years.

Jan. 28.—**EDDY, NORMAN**, a political leader, and at his death Secretary of State for Indiana; died at Indianapolis, Ind., aged 61 years. He was born in Scipio, Cayuga County, New York, December 10, 1810, and removed in 1836 to Mishawaka, St. Joseph County, Ind., where he remained until 1847, when he settled at South Bend, in the same State. He was elected a member of Congress in 1852, over Vice-President Colfax, then the candidate of the Whig party. In 1855 he was appointed by President Pierce District Attorney for Minnesota, and in 1857 he was made Commissioner of the Indian Trust Lands in Kansas. He afterward served as a member of the State Senate, and in 1859-'60 was appointed by the Legislature a member of the commission "in relation to the settlement, adjustment, and collection of dues to the State from various persons and officers indebted thereto." In the fall of 1861 Mr. Eddy took the principal part in organizing the Forty-eighth Regiment, Indiana Volunteers, of which he was commissioned colonel, and continued in personal command until July, 1863, when he was compelled to retire from the service by reason of ill health, and disability resulting from severe wounds received in the battle of Iuka, Miss., while at the head of his troops. In that engagement the Forty-eighth lost 119 killed and wounded out of a total of 420 who entered the fight. After his retirement from the army, Colonel Eddy lived in comparative quiet at his home in South Bend, practising his profession, until he was appointed Collector of Internal Revenue for the Eleventh District by President Johnson, an office he continued to hold until relieved by Mr. Chestnutwood, under the present Administration. At the Democratic State Convention in 1870, Colonel Eddy was nominated for the office of Secretary of State over Jason B. Brown, receiving 634 votes on the first ballot. The Democrats carried the State that year, and he was elected. From the time he entered on the duties of his office, he was a resident of Indianapolis.

Jan. 28.—**LYMAN, JOSEPH BARDWELL, LL. B.**, an American journalist, agriculturist, and author; died at Richmond Hill, Long Island, of small-pox, aged 42 years. He was born in Chester, Mass., October 6, 1829, educated at

Yale College, whence he graduated in 1850, and after teaching for three years commenced the study of law, teaching, meanwhile, in Nashville, Tenn. He graduated from the New Orleans Law-School in 1856, and practised his profession in New Orleans till 1861, when he removed to Stamford, Conn., and engaged in horticulture, writing for the *Agriculturist* and other papers meanwhile. During this period he wrote, conjointly with Mrs. Lyman, "The Philosophy of Housekeeping." In 1865 he became agricultural editor of the *World*, in 1867 managing editor of *Hearth and Home*, and a few months later agricultural editor of the *Tribune*, where his remarkable abilities found full scope. He was cut off in the prime of his active and useful life.

Jan. —.—**LORMAN, ALEXANDER**, a wealthy and benevolent citizen of Baltimore, died in that city. He left by will nearly \$200,000 to benevolent objects connected with the city which had been for so many years his home.

Jan. —.—**PULLEN, Major JOHN A.**, one of the pioneers in the express business in this country, the associate of Wells, Adams, Harnden, and Butterfield, and, at the time of his death, the manager and leading director of the National Express Company; died at Tarrytown, N. Y.

Jan. —.—**WILLIAMS, Miss BETSY**, a descendant of Roger Williams, the founder of Providence, R. I., a woman of great eccentricity, both in her habits and her religious beliefs. She left a fortune estimated at two million dollars to the city of Providence, on condition that a suitable monument should be erected at a designated point to her illustrious ancestor, but the heirs-at-law contested the will on account of her alleged unsoundness of mind.

Feb. 1.—**MILLER, EDWARD, C. E.**, a Philadelphia civil engineer, a graduate of the University of Pennsylvania; died in West Philadelphia, aged 62 years. Mr. Miller was a native of Philadelphia, and had attained so high a rank in his profession, that for many years he had held important and responsible positions in connection with the public works of Pennsylvania and other States. He was also a man of very active piety, and of great benevolence.

Feb. 4.—**BRENT, ROBERT J.**, an eminent jurist of Baltimore, Attorney-General of Maryland for several years, and subsequently a judge in one of the higher courts; died in Baltimore, aged 61 years.

Feb. 5.—**BAKER, CHARLES M.**, an eminent lawyer and jurist of Wisconsin; died at Geneva, Wis., of apoplexy, aged 67 years. He was a native of the city of New York, but spent his early years and received his education in Vermont. He established himself in Geneva, Wis., in 1838, and soon attained distinction as a lawyer and counsellor. He was a member of the Territorial Council, and of the first Constitutional Convention, and, in 1848, one of the revisers of the statutes of the State. He was subsequently for some years circuit judge, and,

during the war, United States draft commissioner. He was also a man of great piety and benevolence.

Feb. 5.—**ELY, WILLIAM MATHER**, a prominent citizen of Binghamton, N. Y.; died there, aged 54 years. He was born in Binghamton, in 1818, educated at Amherst College, and after his graduation followed mercantile pursuits for some time, but, his health becoming impaired, he turned his attention to farming, in which he attained great success, and was for several years President of the State Agricultural Society. In 1868 he was elected a member of the New York Legislature, and served his constituents with such fidelity that he was reelected till his death.

Feb. 5.—**THOMSON, REV. GEORGE W.**, a Presbyterian clergyman and teacher; died in Buffalo, N. Y., in his 61st year. He was born near Clinton, N. Y., graduated from Hamilton College in 1833, and from Auburn Theological Seminary in 1837, was ordained in 1838, and became a pastor in Stockbridge, N. Y. After a few years, he was induced by ill-health to turn to the profession of teaching, in which he was for many years very successful, and impressed upon his pupils his own high aims and thorough scholarship. Compelled at length by bodily infirmities to abandon this profession, he entered upon pursuits less congenial, but better adapted to restore his health, in which he continued until his death.

Feb. 7.—**BURNS, JOHN**, better known as the "Hero of Gettysburg;" died in that town, in the 78th year of his age. He was a resident of Gettysburg from his youth, had been a soldier in the War of 1812, and, at the battle of Gettysburg, he was living in a small cottage in the village, and, when the Confederates entered the town, though nearly seventy years of age, he could not be dissuaded from going out to fight them "on his own hook." Taking an old State musket, which had seen service, he went out, joined a Wisconsin regiment, and soon exchanged his musket for a rifle. He did good service. Late in the day, he received several flesh-wounds, one, in the ankle, disabling him so much that he was left on the field, and he was in the habit of saying, was brought home by some of the Confederate soldiers, to whom he had told a mythical story, to account for his presence there among the wounded. After the battle, he became quite noted for his adventure, and possibly it was somewhat embellished in the frequent repetition. He received a pension from the national Government, and another from the State, for his services in 1812, and many small sums of money from individuals. He had husbanded his receipts very carefully, and purchased a farm in Mount Pleasant township for \$1,800; but for the last year or two his intellect had been somewhat impaired, and he had spent much time in Philadelphia and New York, telling his story very pitifully to whoever would listen, and receiving alms; but his exposure to the severe

cold in New York brought on pneumonia, and, though tenderly cared for and sent home as comfortably as possible, he had not strength to rally from the disease.

Feb. 7.—**KINGSLEY, LEWIS**, an eminent jurist, journalist, and scholar, deputy naval officer of the port of New York; died in Brooklyn, aged 47 years. He was born in Cincinnati, New York, in 1825, and, after an academic education, was admitted to the bar. In 1850 he represented Cortland County in the State Assembly, and in the ensuing year was elected judge of that county, serving until 1855, when he declined a reelection, and moved to Norwich, Chenango County, entering into a law-partnership with his relative, the Hon. Benjamin Rexford. In addition to his legal labors, Judge Kingsley was the editor and one of the publishers of the *Norwich Telegraph*, the leading Republican paper of the county. In the presidential campaign of 1868, he was a member of the Republican State Committee, and an earnest worker during the campaign. In 1869 he was nominated to the State Senate by the Republicans, but was not elected. On the 1st of May, 1870, he was appointed Deputy Naval Officer by General Merritt, retaining that position under Messrs. Grinnell and Lafin. Judge Kingsley was a man of large ability and fine intellectual culture. He was the compiler of several standard law-books, and a contributor to *Harper's Magazine* and other periodicals. His death occurred from hæmorrhage of the lungs.

Feb. 9.—**SEYS, REV. JOHN, D. D.**, a Congregationalist clergyman of Ohio, who had been a missionary and a diplomatist; died at Springfield, Ohio, aged 75 years. He was a missionary in Western Africa for many years, making occasional visits to the United States, to recruit his health. In this way, he had crossed the ocean ten times. In 1866 he was appointed minister resident from the United States to the Republic of Liberia, and remained there till 1870.

Feb. 12.—**LAPSLEY, REV. ROBERT A., D. D.**, a clergyman of the Presbyterian Church, South; died at New Albany, Ind., in the 78d year of his age. He was a native of Kentucky, and was educated in Transylvania University, pursuing his theological studies at the Princeton Seminary, whence he graduated in 1821. He was for many years pastor of the Second Presbyterian Church in Nashville, Tenn., but had latterly been preaching in Kentucky and Indiana. He was a man of great ability and fine scholarship.

Feb. 18.—**BULKLEY, ELIPHALET ADAMS**, a lawyer, political leader, and underwriter, of Hartford, Conn.; died there, aged 68 years. He was born in Colchester, Conn., June 29, 1803. He graduated from Yale College, in 1824, and studied law and was admitted to the bar in Lebanon, but soon after settled in East Haddam, where he practised his profession, and was president of a bank. He represented the

town in the General Assembly, and was twice a member of the Senate from the Nineteenth District. In 1847 he removed to Hartford, and filled the office of school-fund commissioner. In 1857 he was elected, with Nathaniel Shipman, to the Legislature, from Hartford, and was chosen Speaker of the House of Representatives by the Republicans. In the practice of law he formed a partnership with the late Judge Henry Perkins, the firm being Bulkley & Perkins. His later years had been devoted to the business of life insurance. He was the first President of the Connecticut Mutual Company, which he assisted in organizing, and subsequently, in 1850, organized the *Ætna Life Company*, taking its presidency at the start, and holding it to the time of his death. In public positions and responsibilities he has been conspicuous for many years. He accumulated a large fortune, amounting to a million of dollars or more.

Feb. 13.—CUTLER, SAMUEL C., a prominent and honored citizen of Wayne County, N. Y.; died in Pultneyville, N. Y., in his 64th year. He was born in Aurora, in 1808, was for some years State Senator for the Wayne and Cayuga District, and occupied a prominent position in the civil affairs and in the philanthropic movements of the region in which he resided.

Feb. 13.—MÖLLER, Captain BARNARD J., U. S. N. retired list, a gallant naval officer; died at Detroit, Mich., aged about 62 years. He was a native of Pennsylvania, from which State he received an appointment as midshipman in the navy, April 1, 1827, being promoted to passed midshipman, 1838; lieutenant, December 8, 1839, on which rank he was retired September 13, 1855, subsequent to which he received a commission as commander, July 10, 1861, and captain, 1867. His first service was in the West India squadron, 1828-'30, and he afterward served in the Mediterranean, at the Naval School, Norfolk, on the Coast Survey, and on several occasions at the Brooklyn Navy-yard, New York.

Feb. 17.—HERVEY, Rev. HENRY, D. D., an able and eminent Presbyterian clergyman of Ohio; died at Martinsburg in that State, in the 74th year of his age. He was distinguished for his fine scholarship, his thorough theological attainments, his independence of thought, and his excellence and faithfulness as a preacher and pastor.

Feb. 17.—MC CARTER, JAMES J., an eminent publisher and bookseller in Charleston, S. C., for more than fifty years; died in Columbia, S. C., in the 72d year of his age. He was a native of Morris County, N. J., learned the printing and bookselling business in Morristown, N. J., and established himself in Charleston about the year 1826. He was greatly esteemed for his integrity and fine social qualities, and during the late civil war was a generous and noble friend to the Union soldiers who were prisoners there.

Feb. 18.—COVERT, JOHN M., M. D., an emi-

nent physician, and accomplished scholar and poet; died in Brooklyn, N. Y., in the 40th year of his age. He was a native of St. Augustine, Fla., and was born July 25, 1832. He was educated in Charleston, graduating from Charleston College in 1853, and from the South Carolina Medical College in 1855. Soon after taking his medical degree he went to Norfolk, Va., as a volunteer in the epidemic of yellow fever there. He settled there in practice soon after, and married. In 1861 he volunteered as a surgeon to the First Louisiana Volunteers, and was subsequently a medical director on General Lee's staff, and was distinguished for his gentleness, kindness, and professional skill. He returned to Norfolk after the war, but in 1867 volunteered to go to Galveston, Texas, to combat the yellow fever there. In 1869 he removed to Brooklyn, where other members of his family had preceded him, and had attained to a fine practice at the time of his death, and was just becoming known in literary circles for his remarkable attainments. He was an excellent *belles-lettres* scholar, and possessed poetical talent of a high order.

Feb. 21.—WOOD, WILLIAM, an enterprising and able journalist; died in Brooklyn, N. Y., aged 37 years. He was born in Cheddar, Somerset County, England, December 18, 1835, and was the son of a Methodist clergyman and missionary. He came to the United States at the age of eighteen, and was connected as a reporter with a Williamsburgh paper; in 1859 removed to Rome, N. Y., and became editor for four years of the *Rome Sentinel*. Returning to England, he remained there till 1867, as editor of the *Cardiff* (Wales) *Times*. On his return he connected himself with the *Williamsburgh Times*, but in 1868 joined the staff of the *Brooklyn Eagle*, of which he had latterly been managing editor.

Feb. 23.—BROWN, Rev. JOHN H., D. D., a Presbyterian clergyman, eminent for his scholarship; died in Chicago, Ill., aged 77 years. He was a native of Green County, Ky., and had been for some years pastor of the First Presbyterian Church in Lexington, Ky., and subsequently for a long time was settled in Springfield, Ill. He had removed to Chicago in 1869.

Feb. 24.—LOCKWOOD, LE GRAND, an eminent banker and railway director; died in New York City, aged 51 years. He was a native of Norwalk, Conn., but came to New York, in 1838, as a clerk for Jasper Corning & Co. In 1843 he became a member of the firm of Genin & Lockwood, and in 1856 the senior partner of the house. The banking-house had always been one of the most prominent and esteemed in the street, and, although they were embarrassed in the gold panic of September, 1869, they had regained very nearly their old position. Mr. Lockwood was a man of great benevolence, and of a genial and generous disposition.

Feb. 24.—SALTER, Rev. THOMAS G., an Epis-

copal clergyman and chaplain in the U. S. Navy; died at Charlestown, Mass., aged 62 years. He was born in Connecticut, educated at Trinity College, Hartford, and was for a number of years rector of the Episcopal Church in Dover, N. H. He entered the navy as chaplain, in March, 1861, had had four years' sea-service, and was at the time of his death stationed at the Charleston Navy-yard. He ranked as commander.

Feb. 25.—**DYSAERT**, Captain **ROBERT M.**, a Pennsylvanian officer of volunteers, on the staff of General Starkweather in the Army of the Cumberland; died in New York City, of illness resulting from wounds received in action during the late war, aged 35 years. He was born in Lancaster, Pa., January 18, 1837, and entered the Union Army, October 8, 1861, as a first-lieutenant in Company I, Seventy-ninth Pennsylvania Volunteers, Colonel Hambricht. He was afterward promoted to the captaincy of Company C, in the same regiment, and then transferred to the staff of General Starkweather, of the Army of the Cumberland, with whom he served until the close of the war. His residence since the war had been at Lebanon, Pa., but he had come to New York on business when stricken down by his last illness.

Feb. 27.—**COSKERY**, Very Rev. **HENRY BENEDICT**, D. D., Vicar-General and Administrator of the Roman Catholic Archdiocese of Baltimore; died in that city, of pneumonia, in the 64th year of his age. He was a native of Frederick County, Md., and has been Vicar-General of the archdiocese since 1849. In 1854 he declined the appointment by the Pope of Bishop of Portland, Me. He was the intimate friend and the heir by will of the late Archbishop Spalding, whom he had buried about three weeks before his own dissolution.

Feb. 29.—**CRIPPEN**, **SCHUYLER**, a New York jurist, for eight years one of the Judges of the Supreme Court of the State of New York; died at his residence at Cooperstown, N. Y., aged 77 years.

Feb. 29.—**JEFFREY**, Rev. **WILLIAM**, D. D., a Presbyterian clergyman, more than fifty years in the ministry, for forty-five years stated Clerk of the Synod of Pittsburg, and for thirty-five years pastor of Bethany Church; died in West Fairfield, Pa., aged 77 years.

Feb. —**BRIGGS**, **JOSEPH WILLIAM**, a special agent of the Post-Office Department, and the originator of the system of free delivery of letters in cities, which he had organized in fifty-two cities; died in Cleveland, Ohio.

March 1.—**CROSBY**, **THOMAS RUSSELL**, M. D., an eminent physician of Hanover, N. H.; died there, aged 55 years. He was a son of Prof. Dixie Crosby, a graduate of Dartmouth College, and of the Hanover Medical School in 1841, and had been himself Professor of Anatomy, Physiology, and Natural History, in the Norwich University for some years.

March 3.—**ROULSTONE**, **SAMUEL**, an ingenious

and skilful mechanic, for twenty years the gun-carriage maker at the Charlestown Navy-yard; died in Charlestown, Mass., aged about 55. During the late war his position was one of great care and responsibility, and his gun-carriages were noted for excellence, becoming the recognized standards to which other manufacturers were obliged to conform.

March 4.—**DANA**, Commander **WILLIAM H.**, U. S. N., a gallant naval officer; a native of Ohio, and a resident of that State, who entered the naval service in 1850, was promoted to be lieutenant-commander in 1862, and distinguished himself during the war, made commander in 1869; died in Boston, suddenly, aged about 40 years.

March 5.—**GORDON**, **CHARLES**, M. D., an eminent physician and surgeon of Boston; died in that city, aged 68 years. He was born in Hingham, Mass., in 1809, and came of a family of physicians, his father and elder brother being both members of the profession. He was educated at the Derby Academy, Hingham, and at Brown University, graduating from the latter in 1829. He took his medical degree in 1832, and commenced practice in Lowell. After three or four years' practice, he laid aside a sufficiency to enable him to spend two years in medical study in Paris, and, on his return, he settled in Boston, where for more than thirty years he was a leading and successful physician and surgeon. He was a rapid and skilful operator, and remarkable for his accuracy in diagnosis, his carefulness in observation, and his promptness and courage in the management of difficult cases. He made repeated visits to Europe, both on account of his health, and the education of his daughters. Dr. Gordon had also taken a lively interest in military matters, and was a member, and for some years commandant, of the New England Guards. His death was the result of an attack of pneumonia.

March 5.—**LOOMIS**, Colonel and Brevet Brigadier-General **GUSTAVUS**, U. S. A. retired list, a brave and faithful officer of the Regular Army, sixty-four years in the service; died in Stratford, Conn., aged 88 years. He was born in Thetford, Vt., in 1789, entered the Military Academy at West Point in 1808, and graduated in 1811, was assigned to artillery service, distinguished himself in the War of 1812, and was made captain in the staff; took part in the Black Hawk, Seminole, and Mexican Wars, though seldom called into battle, was promoted to be colonel of Fifth Infantry in 1851, and was mostly on frontier and garrison duty till the commencement of the late war, when he was assigned to mustering and recruiting service. He was brevetted brigadier-general, U. S. A., in 1865, for long and faithful service, and had already, in 1863, been placed upon the retired list as "having been borne on the army register for more than forty-five years." In private life General Loomis was one of the most exemplary, conscientious, and benevolent men in his profession.

March 7.—SMITH, Mrs. REBECCA, an aged and venerable lady of Killingworth, Conn., the widow of a Revolutionary soldier, and a woman of great activity and piety; died in that town, aged 106 years, lacking 14 days.

March 7.—YOST, JACOB S., a prominent citizen and political leader of Montgomery County, Pa., born in Pottsgrove Township, Montgomery County, Pa., July 29, 1801; died in Pottstown, Pa., aged 71 years. Mr. Yost was of German stock, and, like his father and grandfather, was an agriculturist, but, having received a good education, he early took an active interest in political matters; represented his county in the State Legislature from 1836 to 1840, and in 1842 was elected to Congress, and reelected in 1844. At the close of his second term in Congress he returned to his farm, and devoted himself to the interests of his town, being active and useful in both secular and religious matters. In 1857 he was appointed by his life-long friend, President Buchanan, U. S. Marshal for the Eastern District of Pennsylvania, at Philadelphia. He held this place till the close of 1860, when he resigned in consequence of the infirmities of declining years, and returned to his home.

March 10.—GARFIELD, Rev. JOHN METCALF, an Episcopal clergyman, and for thirty-three years an eminent and successful teacher, born in Grafton, Mass., July 21, 1790; died in New Haven, Conn., aged 82 years. He graduated from Yale College in 1816, and had commenced teaching even during his college course, spending nearly two years in that occupation. After graduating, he studied law for a time, and in 1819 established a Female Seminary in New Haven, which he conducted successfully till 1831, when he was appointed Principal of the Albany Female Seminary, of which he was the able manager until 1849, when he resigned, and returned to New Haven. While teaching in New Haven he had pursued theological studies, and was ordained deacon in the Episcopal Church in 1822, and priest in 1823. From 1849 until his death, he resided in New Haven, and preached, for the greater part of the time, to a church of colored people in that city.

March 12.—GOODWIN, Captain WILLIAM J., U. S. A. retired list, a brave and gallant soldier of the late war; died in Concord, N. H., aged 49 years. He was born in Limington, Me., in the year 1823, was graduated at Bowdoin College in the class of 1848, and had studied law and devoted himself to literary pursuits for a number of years before the war. He was appointed first-lieutenant of the Sixteenth Infantry, May 14, 1861. He was brevetted captain for gallant conduct at the battle of Chickamauga, May 14, 1864, in which battle he was severely wounded, and was afterward promoted to the full grade. Captain Goodwin was distinguished for his antiquarian and historical researches, and was a large contributor to the *Historical Magazine*. He was the author of several historical works, among which was a

history of Buxton, Me., and a work on the Constitution of New Hampshire.

March 16.—WHITING, JAMES R., an eminent lawyer and jurist of New York; died at Spuyten Duyvil, Westchester County, N. Y., aged 69 years. He was born in Brooklyn, April 20, 1808, received his early education there and in New York, to which city he removed while yet a lad, and at the age of eighteen commenced the study of the law. He was admitted to the bar in 1824, and soon became distinguished both in his profession and in politics. He was elected alderman at an early age, and in 1836 was appointed District Attorney for the county of New York, which office he filled with singular ability for many years. It was while he was in this office that he had occasion to try John O. Colt for the murder of Adams, and Monroe Edwards for his extensive and skilful forgeries. On his retirement from the district attorneyship, he was elected one of the Supreme Court Judges, but resigned after a few months, finding its duties too irksome for his nature. He subsequently became independent candidate for mayor, but was defeated by a large majority. Since that time he had been quietly practising his profession, but was engaged more in chamber than court practice, seldom appeared as counsel in a suit, and in a great measure had retired from political life. A few years ago he purchased the street-cleaning contract awarded to Brown, Devoe & Knapp for ten years, but afterward resold it to the original owners. Judge Whiting was a man of large wealth, his fortune being estimated at \$2,000,000.

March 18.—HEWLETT, SAMUEL M., an eminent and eloquent temperance lecturer, a native of England, but for many years past an efficient laborer in the cause of temperance in Canada and the United States; died suddenly, in Meriden, Conn.

March 20.—MOULTON, CHARLES, a musical composer and scholar of high culture, and exquisite taste, the husband of the eminent vocalist, Mrs. Clara Moulton; died in New York City. He had composed many of the romances and ballads which had attracted such admiration when sung by Mrs. Moulton.

March 20.—WYLIE, Rev. SAMUEL, D. D., an eminent clergyman of the Reformed Presbyterian Church, fifty-four years in the ministry; died in Sparta, Ill., aged about 80 years. He was a native of Ireland, but came to the United States when a lad, and was educated under the supervision of his uncle, the late Rev. D. B. Wylie, D. D., of Philadelphia. He graduated from the University of Pennsylvania, and the Theological Seminary of the Reformed Presbyterian Church, was ordained in 1818, and, going out first as a domestic missionary, was finally settled about 1820 as pastor of a congregation in Randolph County, Ill., with which he remained until his death, a period of fifty-two years. This congregation had sent out in that period about a dozen colonies to form

other churches. Dr. Wylie was a thorough scholar, an eloquent and able preacher, and exerted a powerful influence in the Reformed Presbyterian Church.

March 21.—DODS, JOHN BOVER, LL. D., an American author and psychologist, born in New York, in 1795; died in Brooklyn, N. Y., aged 77 years. He had published "Thirty Sermons," 8vo, "Philosophy of Mesmerism," 1847; "Philosophy of Electrical Psychology," 1849; "Immortality Triumphant," 1851; "Spirit Manifestations Examined and Explained," 1854.

March 23.—GREGORY, SAMUEL, a philanthropic reformer, a graduate of Yale College in 1840, who devoted himself for twenty-five years to the work of securing a medical education for women who sought to enter the profession; died in Boston, aged 59 years. He was born in Guilford, Vt., April 19, 1818, and for several years after his graduation was engaged in teaching, lecturing, and writing on educational and sanitary subjects. In 1847 he began the special work, to which his attention was devoted for the rest of his life—the medical education of women, and their introduction into the profession. In 1848, he succeeded in founding the New England Female Medical College in Boston, which is said to have been the first institution for the exclusive medical education of women in the world. He had the satisfaction of seeing this college firmly established, and was its secretary until his death.

March 23.—NELSON, Mrs. ELIZABETH KEY, wife of Hon. Thomas H. Nelson, United States minister to Mexico; died at Maltrata, Mexico, of disease of the heart, aged about 46 years. Mrs. Nelson was a daughter of the late Colonel Marshall Key, a conspicuous and able political leader and lawyer of Washington, Mason County, Ky. She was well educated, and early in life married Thomas H. Nelson, then a youth just entering upon his career as a lawyer, and who has since become distinguished both as a political leader and a diplomatist. Soon after their marriage, Mr. and Mrs. Nelson removed to Indiana, where she shared with her husband all the trials, and contributed her full proportion to all the triumphs of the active, eloquent, and successful lawyer, who had become one of the founders of the Republican party. Mr. Nelson was sent to Chili as United States minister resident almost at the outset of the late war, and remained there, at a post which the course of events rapidly invested with a peculiar and almost vital importance to the commercial and political interests of the republic then battling for its life, during the whole of Mr. Lincoln's Administration, and a full year of that of his successor. In 1869 he was appointed minister plenipotentiary to Mexico, where he still remains. How large and effective a part Mrs. Nelson took in the labors of her husband, throughout this entire period, the archives of the State Department

attest. She had been a student, without pretence as without parade, all her life long. Her knowledge of foreign languages, of history, and of political economy, enabled her to afford her husband an assistance as intelligent as it was assiduous; and none of those of her sex who clamor most loudly in public for the "equality of woman with man" have done or can ever do so much to prove the truth of their doctrine in its true appreciation, as this tender, modest, and devoted wife. Her union with her husband was as the Shakesperian "marriage of true minds." Those alone who knew her well and intimately can estimate its beauty and its worth, and estimating these, come near to measure the depth and bitterness of a sorrow which present sympathy the most sincere may soothe, but years can never adequately assuage. President Juarez, who had recently experienced a similar affliction, and whose lamented wife had been an intimate and strongly-attached friend of Mrs. Nelson, manifested the most profound sympathy with Mr. Nelson, and throughout the social and diplomatic circles of the Mexican capital her loss was deeply and unaffectedly mourned.

March 25.—RICHARDS, Rev. ELIAS J., D. D., an eminent Presbyterian clergyman and author, pastor for twenty-six years past at Reading, Pa.; died there, aged about 60 years. He was a native of Llangollen, in the valley of the Dee, in North Wales, but migrated to the United States when five years of age. He was educated at Bloomfield Academy, N. J., Princeton College and Princeton Theological Seminary, graduating from the college in 1831, and from the seminary in 1837. From April, 1838, to October, 1846, he was a pastor: at Ann Arbor, Mich., for one year, at Paterson, N. J., for three years, and over the Western Presbyterian Church four years. In 1846 he was settled at Reading, where he remained till his death, being by common consent the ablest clergyman of that thriving city. He was an eloquent and finished speaker, a chaste and vigorous writer, and a man of a lovely and amiable character. He was a frequent contributor to the *Presbyterian Quarterly Review*, and had published a memoir of Mrs. Morrison, a missionary in India, and one or two other works. The degree of D. D. was conferred on him by Lafayette College, at Easton, Pa., in 1870.

March 29.—WALKER, ISAAC P., United States Senator from Wisconsin for one term; died in Milwaukee, Wis., of apoplexy. He had been a prominent political leader in the early history of Wisconsin, was presidential elector in 1841, and in 1848 was elected United States Senator. He served from 1849 to 1855, and was chairman of the Committee on Revolutionary Claims.

March 30.—OLIVER, Major-General JOHN M., a gallant officer of volunteers from New York, who served under General Sherman in his Western campaigns; died in Washington, D. C.

March.—ECKARD, Mrs. Dr. —, the wife of the Rev. Dr. Eckard, now a professor in Lafayette College, Easton, Pa., and sister of Rev. John Leighton Wilson, D.D., of Columbia, S. C.; died there. Dr. and Mrs. Eckard were for many years active and zealous missionaries of the American Board in the island of Ceylon, and her health was finally so much impaired by the climate and her labors that she was compelled to return to the United States.

March.—TROUSDALE, General WILLIAM, a veteran soldier and political leader in Tennessee; died in Nashville, Tenn., aged 82 years. He was born in Sumner County, Tenn., in 1790, and served as a private soldier and as a lieutenant in the Creek War, and participated in the battles of Tallahatchie and Talladega. He again served as a private during the latter part of the last war against Great Britain, taking part in the capture of Pensacola and the battle of New Orleans. In 1836 he again entered upon an active military career, serving as a major-general of militia in the Seminole War. He also participated in the Mexican War as a colonel of infantry, taking part in all the battles in the valley of Mexico, being wounded in the battle of Molino del Rey, and also sustaining two severe wounds in the attack on Chapultepec. In 1849 he was elected Governor of Tennessee, and continued in that position till 1851, since which time he had not taken an active part in public affairs.

April 1.—FOSTER, Rev. LEMUEL, a Presbyterian clergyman, home missionary, and teacher, whose field of labor had principally been in Illinois; died at Washington Heights, Ill., in the 78d year of his age. He was born in Hartland, Conn., November 24, 1799, graduated from Yale College in 1828, and from the Yale Theological Seminary in 1831; was commissioned by the American Home Missionary Society as a missionary in 1832, and for forty years continued in his work, as a preacher and teacher, gathering churches and establishing academies, with great success.

April 5.—GALLOWAY, SAMUEL, a prominent citizen and political leader in Ohio, for some years a professor and teacher there and in Indiana, and subsequently Secretary of State and Representative in Congress; died in Columbus, O., aged 61 years. Mr. Galloway was of Scotch-Irish parentage, and was born in Gettysburg, Pa., in 1811. He removed to Ohio in 1819, and was educated at Miami University, graduating thence, with its highest honors, in 1838. The next year he taught a classical school at Hamilton, O., and in 1835 was elected Professor of Ancient Languages in Miami University, but resigned, in consequence of ill health, in 1836. In 1838 he resumed teaching, first at Springfield, O., and in 1839 as Professor of Ancient Languages at South Hanover College, Indiana. His health being again impaired, he returned to Ohio in 1841, studied law, and was admitted to the bar in 1842, and removed to Chillicothe. In 1844 he was elected Secretary

of State, and removed to Columbus. He was Secretary of State for eight years, and then, declining a reelection, resumed the practice of his profession, and took an active part in politics, for which his genius for oratory peculiarly fitted him. In 1854 he was elected to Congress, and served through the Thirty-fourth Congress, taking an active part in the political conflicts arising out of the Kansas question. He declined a reelection, and since that time had held no office, though he had taken a deep interest in political questions. As an attorney and advocate, or a political or platform speaker, he had no superior in his mingled humor and pathos, and his magnetic power over an audience. He was also very active in religious matters, having been for thirteen years ruling elder in the Presbyterian Church, and several times a commissioner to the General Assembly.

April 5.—HUTCHINSON, Rev. ELIJAH, a Baptist clergyman, scholar, and pulpit orator, for thirty-eight years in the ministry; died at Windsor, Vt., aged 62 years. He was born in Warren, N. Y., June 7, 1810; removed with his parents to Newport, N. H., four years later, was educated at the New Hampton Literary and Theological Institution, and subsequently pursued his studies privately with Rev. Dr. Baron Stow, at Portsmouth, N. H. In 1831 he entered Newton Theological Institution, and graduated thence in 1834 with honor. The same year he was settled at Windsor, Vt., where he remained to the end of his life, being an active pastor for twenty-five years of the time. He was repeatedly called to city churches, which his reputation as a scholar and pulpit orator had reached, but he refused to leave his people, who were warmly attached to him. He published little—a few sermons of remarkable pathos and eloquence, and some able review articles, were all; but whatever came from his pen was admirable in its quality.

April 5.—JACKSON, SAMUEL, M. D., a distinguished physician, medical professor, and author, of Philadelphia; died in that city, aged 85 years. He was born in Philadelphia, March 22, 1787, was educated at the University of Pennsylvania, but took his medical degree at the Rutgers College medical department in 1813, and settled in Philadelphia. He was appointed professor of the Institutes of Medicine in the University of Pennsylvania in 1835, and retained his professorship till 1868. At his resignation he was made *Emeritus* professor, and retained the title till his death. Dr. Jackson was the author of "Principles of Medicine," 8vo, 1832; Discourse Commemorative of Professor Nathaniel Chapman, 1854; Introduction to J. C. Morris's Translation of "Lehman's Chemical Physiology," 1856; and "Occasional Medical Essays."

April 5.—PITCHER, ZINA, M. D., an eminent physician, medical professor, and author, of Detroit, Mich.; died there, aged about 75 years.

He was a native of Washington, Litchfield County, Conn., and, having received a very thorough academical and medical education in New York City, removed to Detroit, where for more than forty years he was greatly distinguished in his profession. For many years he was a professor in the University of Michigan, and was the author of several medical works.

April 6.—**RICHARDSON, Captain EDWARD**, an active and useful philanthropist and reformer, who had for almost half a century been actively engaged in promoting the welfare of seamen, and of the poor, ignorant, and degraded generally; died in Brooklyn, N. Y., aged 88 years. He was a native of Massachusetts, was bred to the sea, was for many years captain of packet-ships plying between New York and Liverpool, and was very popular. In February, 1833, he organized the Marine Temperance Society, and lived to see 52,000 names signed to its pledge. He retired from sea-service about 1837, and was for some years superintendent of The Seamen's Home. He was also vice-president of the New York Port Society for many years. At the age of seventy-three he originated the Water and Dover Street Missions, for sailors and the poor and vicious classes who haunt that portion of New York, and had established a day-school and Sunday-school for the children of that vicinity, and held religious meetings for them two evenings in the week, never failing to be present himself in all weathers. He had also aided in 1867 in founding the Van Buren Street Mission in Brooklyn, with its day and Sunday schools, and religious services, and to the end of his long life was active in every effort for the temporal and spiritual benefit of those around him.

April 7.—**CORWIN, MOSES B.**, a prominent political leader in Ohio many years ago, a member of Congress for two terms; died in Urbana, Ohio, in his 83d year. He was an elder brother of the late Governor Thomas Corwin, and was born in Bourbon County, Ky., January 5, 1790, removed to Ohio in childhood, received an excellent education, studied law, and was admitted to the bar in 1812. He was a member of the State Legislature in 1838 and 1839, was a Representative in Congress from 1849 to 1851, and from 1853 to 1855, and was a member of the Committee on the Post-Office Department. Two of his sons, the late John A. Corwin and Jacob Corwin, have been distinguished in political affairs.

April 7.—**WALSHE, JOHN T.**, an Alabama journalist, scholar, and professor, born in Ireland; died in Mobile, Ala., aged 58 years. He received his education in Trinity College, Dublin, but came to the United States at the age of twenty, and in 1837 became the editor of the *Montgomery Advertiser*, which he conducted with great ability for eleven years, when he retired from it to accept a professorship in Spring Hill College, near Mobile. The

approach of the late civil war again brought him into editorial life as an able and brilliant advocate of the "State Rights" doctrines. His later years had been spent in literary and editorial pursuits.

April 9.—**HARTSHORN, Rev. CHANCELLOR**, a Baptist clergyman and teacher, for some time a professor in Hamilton Literary and Theological Institution, now Madison University; died at Ann Arbor, Mich., aged 71 years. He was a native of Central New York, and had received his early education at Hartwick Academy and Hamilton Institution, and was so able a classical scholar that he was, immediately after his graduation, employed as a teacher and professor at Hamilton; but, after about three years, he felt so strongly called to become a preacher, that he gave up all other pursuits to enter upon his chosen work. His pastorates were mainly in Central New York, but in the decline of life, worn down by excessive labor, he made his home with his son-in-law in Ann Arbor, and died there.

April 12.—**CROSMAN, Commander ALEXANDER F.**, U. S. N., a brilliant and capable naval officer, son of Brevet Major-General George H. Crosmen, U. S. A., was drowned in the harbor of Greytown, Nicaragua, aged 34 years. Commander Crosmen was born in Missouri, June 11, 1838, and entered the Naval Academy from Pennsylvania, October 1, 1851. He served before the war in the Mediterranean squadron in 1856-'58, and in the Brazil squadron, Paraguay Expedition, in 1858-'59. During the war he was attached to the East Gulf squadron—first to the gunboat *Tahoma*, and was subsequently in command of the steamer *Somerset*. From 1863 to 1865 he was in the South Atlantic squadron attached to the frigate *Wabash*, and did gallant service in various expeditions and minor engagements. Since the war he had been attached to the Naval Academy, the U. S. steamers *Ossipee* and *Onward*, and to the Portsmouth yard—his last orders being to the command of the Isthmus Surveying Expedition in January, 1872. His last hours in New York were occupied in preparing for publication a book on seamanship, in which he had embodied the ripened results of professional study and experience.

April 12.—**MAHONEY, First-Lieutenant ANDREW**, U. S. A., a gallant officer of the regular army, who had been an active and efficient officer of Volunteers, during the late war, volunteering among the first in Massachusetts; had repeatedly been wounded, and had risen to the rank of lieutenant-colonel and brevet-colonel in the volunteer service. He was appointed lieutenant in the regular army, March 7, 1867, and joined the Fourteenth Infantry in July, 1869, and had been with his regiment at Fort Laramie, Wyoming Territory, but was absent on sick-leave, and died in Boston, Mass.

April 13.—**CLARKE, NATHANIEL B.**, a well-known and popular actor, whose real name

was Nathaniel H. Belden; died in New York City, aged 64 years. He was a native of Connecticut, where he was born in 1808. The son of a clergyman, he was brought up under pious influences, and it was designed that he should pursue the calling of his father. His taste, however, led him to adopt the profession of the stage, and he came out at the Chatham Garden, in 1830, as Lord Rivers, in "A Day after the Wedding." His career, extending over a period of more than forty years, was chiefly fulfilled in the theatres of the Bowery. He was stage-manager of the New Bowery, under Mr. Lingard's management, during the entire existence of that establishment. Of late years he has been often seen at the Old Bowery. His last performance, given there last autumn, was in the play of "Bertha, the Sewing-Machine Girl." Mr. Clarke was esteemed in his profession, and enjoyed a fair measure of popularity. He was a thoroughly well-trained actor, and very useful in every company that he joined. Worth of character and a copious stock of reminiscences made him an esteemed friend, and an entertaining companion.

April 14.—BENEDICT, JESSE W., an eminent lawyer of New York City, formerly a partner of Charles O'Connor; died at his residence in Audubon Park, New York City, aged 62 years. He was a native of Connecticut, and had long been eminent alike for his legal ability and his eminently pure and exemplary life.

April 14.—POINDEXTER, REV. A. M., D. D., an eminent Baptist clergyman, formerly secretary of the Foreign Mission Board of the Southern Baptist Convention, and one of the founders of Richmond College; died near Gordonsville, Orange County, Va. Dr. Poinexter was widely known to Christians of all denominations in Virginia. He was a man of fine and highly-cultivated intellect; a faithful pastor, a zealous laborer in the causes of Christian benevolence; an eloquent and powerful preacher, and withal, an humble Christian.

April 15.—VAN WINKLE, PETER G., late U. S. Senator from West Virginia; died at Parkersburg, W. Va., aged 64 years. He was born in the city of New York, September 7, 1808, removed to Parkersburg in 1835; was a member of the Virginia Constitutional Convention in 1850; of the Wheeling Convention in 1861; and of the convention which formed the constitution of West Virginia in 1862. He was a member of the Legislature of the new State from its organization to June, 1863, and in November of that year was elected U. S. Senator for the term ending March, 1869. In the Senate he was chairman of the Committee on Pensions, and a member of several other important committees, and on the impeachment trial of President Johnson was one of the eight Republican Senators who voted against the impeachment articles. He was a member of the Philadelphia "Loyalists" Convention in 1866.

April 15.—WHELPLEY, JAMES DAVENPORT, M. D., an accomplished physician and scientist; died in Boston, aged 55 years. He was born in New York City, January 23, 1817, was educated in New Haven, and graduated from Yale College in 1837. After graduation he acted as assistant in Rogers's Geological Survey of Pennsylvania for two years, and then, returning to New Haven, entered the medical department of Yale College, whence he graduated M. D. in 1842. He remained in New Haven until 1846, engaged in the study of the sciences, and in literary pursuits. He then went to Brooklyn, N. Y., and began to practise his profession, but was soon obliged to relinquish it from ill-health. In 1847 he removed to New York City, and became the editor and one of the owners of the *American Whig Review*, to which he had been a frequent contributor since 1845. While thus engaged, in 1849, he formed a project of establishing a commercial colony in Honduras, and, in furtherance of this enterprise, spent two years in San Francisco, purchasing and editing one of the daily papers there. His arrangements were disturbed by the presence of the filibuster Walker in Honduras, and on going thither he was detained by Walker for nearly a year, enduring great privation, and being impressed into service as a surgeon. Escaping to San Francisco, he returned early in 1857 to the East, and again devoted himself to literature and to scientific studies. For the last ten years of his life he was a great sufferer from asthma, which gradually developed into pulmonary consumption, of which disease he died. Dr. Whelpley's publications show a most original mind, and his unpublished papers are even more remarkable. He was a member of the American Academy. His scientific researches were chiefly in physics and metallurgy.

April 16.—BUCHANAN, MCKEAN, a well-known tragedian, very popular in the West; died in Denver, Col., aged 49 years. He was the son of Paymaster Buchanan, and nephew of Admiral Buchanan, U. S. N., and was born in Philadelphia, February 28, 1823. He was educated for the navy, and served three years as midshipman on the sloop-of-war *St. Louis*. His *début* as an actor was made at the St. Charles Theatre, New Orleans, in the character of *Hamlet*, in which rôle he made his appearance in New York in 1850, but with little success. He visited England twice, and was not unsuccessful there. His sombre and antiquated style did not, however, please the American metropolis, and during the latter years of his professional life he confined his labors to the Western towns, in many of which he was highly esteemed. Mr. Buchanan was not devoid of sterling merit as an actor, and as a gentleman made many warm friends in and out of the profession.

April 18.—CLARKE, REV. CHARLES RUSSELL, an active and useful Presbyterian clergyman, teacher, and writer; died at San Diego, Cal.,

aged 40 years. He was born in Albion, N. Y., February 29, 1832, prepared for college in Rochester, N. Y., under Prof. Dewey, and graduated from Princeton College, N. J., with high honor in 1852. After a year of teaching at Newtown, L. I., and another at Geneseo, N. Y., he returned to Princeton and graduated at the Theological Seminary. During this latter period he acted as college tutor during the absence of Prof. Hope, and taught privately in the family of Commodore Stockton. He ministered for a year to the recently-organized Second Presbyterian Church. In January, 1861, he came to California, and was for several years principal of the "City (San Francisco) Female Seminary." His health failing, he removed to San Diego in May, 1869, to obtain the benefit of a milder climate. The disease of which he died—consumption—was then deep-seated, and it was marvellous to himself and friends that his life was prolonged during the last three years. Mr. Clarke was an active, earnest worker to the time of his last illness. As a teacher he was eminently successful, loving the profession with warm attachment. He was the author of "Clarke's Geography," which is extensively used, and his writings in periodicals were instructive and graceful. As a citizen Mr. Clarke was devoted to the prosperity of his new home, San Diego, his pen being often employed in behalf of churches and schools, in suggesting the beautifying of its homes with shrubs and flowers, and promoting the good order and steady habits for which the place is notable to-day.

April 18.—PRESTON, ANN, M. D., an eminent physician and professor in the Women's Medical College of Philadelphia; died in that city, aged 58 years. She was born in December, 1814, at West Grove, Chester County, Pa. Her father was Amos Preston, a member of the Society of Friends, and a man of unusual ability. Her mother was an intellectual woman, but in delicate health, and Miss Preston in early life had the chief care of a large family. Miss Preston evinced intellectual tastes at an early age, which were stimulated by the lyceum of her native town. In maturer years she retained her love for study, and medical subjects were peculiarly interesting to her, yet she had not shaped for herself the course which she should permanently take. The Women's Medical College of Philadelphia, founded in 1850, however, realized her desires, and without hesitation she became one of the first applicants for admission as a student. This was the first institution established that afforded woman an opportunity of acquiring instruction in all the departments of medical learning. Miss Preston, with thorough enthusiasm and the calm steadiness of a refined mind, pursued her studies, and was graduated with credit. She began practice in Philadelphia without ostentation, and gradually acquired many friends, who,

perceiving her abilities, aided her advancement. Meanwhile changes occurred in the college faculty, and in 1854 she was elected to the chair of Physiology and Hygiene, which, as well as the position of "dean," she held ever afterward. Her lectures and valedictory addresses were replete with striking thoughts and practical knowledge. In the course of years her sphere of usefulness widened. The "Woman's Hospital of Philadelphia" was incorporated, an essential auxiliary to the college, and an invaluable charity. She was at the outset appointed one of its board of managers, corresponding secretary, and consulting physician. Besides her important duties in connection with this institution, Miss Preston attended numerous private patients, although her frail health compelled her to limit her practice. In 1867 the Philadelphia County Medical Society having made objections to the practice of medicine by women, Miss Preston defended the claims of her sex so ably and temperately as to disarm much opposition. Irrespective of the deeds of charity she performed, her influence has been as great in removing the prejudices entertained against the admission of women into the medical profession as it has been effective in demonstrating the capacity of her sex for that pursuit.

April 19.—BLACK, JOHN, an Alabama journalist, for more than twenty-five years an editor and publisher in Eufaula, Ala., and, at the time of his death, editor of the *Eufaula News*; died in that city.

April 20.—WALL, WILLIAM, an esteemed citizen of New York, a Representative in Congress, 1861-'68; died in New York City, aged 71 years. He was born in Philadelphia, March 20, 1801; served seven years as an apprentice to a rope-maker; removed in 1822 to Kings County, L. I., where he engaged in the pursuit of his handicraft with such energy and success, that in 1856 he was able to retire with a large fortune. Meantime he had been called to fill a great number of local offices, and had always acquitted himself with honor. In 1860 he was elected to Congress from New York, and was a member of important committees during his term of service. He declined a reelection, but was a delegate to the Philadelphia "Loyalists" Convention in 1866.

April 21.—LACY, MRS. FRANCES COOPER, a well-known actress on the London stage, under her maiden name of *Frances Cooper*; died in London, aged 53 years.

April 22.—FORT, GEORGE FRANKLIN, M. D., an eminent citizen and physician of New Jersey, Governor of the State from 1851 to 1854, and subsequently one of the Judges of the Court of Errors and Appeals; died in New Egypt, Ocean County, N. J., aged 68 years. He was born in Pemberton, Burlington County, N. J., in May, 1809; was educated in his native county, studied medicine in Philadelphia, graduating M. D. from University of Pennsylvania, in 1830. While actively engaged in the practice of his

profession in Burlington and Monmouth Counties, he was elected to the House of Assembly from Monmouth County, and in 1844 was a member of the State Constitutional Convention. He was subsequently elected to the State Senate from Monmouth County, and in 1850 was chosen Governor. He was subsequently a Judge of the Court of Errors and Appeals, and an active member of the Prison Reform Committee. Princeton College conferred on him the honorary degree of A. M.

April 23.—**HOWE, EDMUND G.**, a banker and manufacturer of Hartford, Conn., largely identified with the manufacturing, financial, and railroad enterprises of that city; died there, aged about 63 years.

April 23.—**ROBINSON, ALEXANDER**, an Indian, chief of the tribe of Pottawatomies; died at the Indian Reserve, in Illinois, aged 100 years. He was always a steadfast friend of the whites, and in 1818 paddled the Kinzie family, the earliest settlers in Chicago, across the lake from Michigan in his canoe. He had lived on the reserve for forty years.

April 25.—**CLARKE, WILLIAM COGSWELL**, a New Hampshire jurist, Attorney-General of the State since 1863; died in Manchester, N. H., aged 62 years. He was born in Atkinson, N. H., in 1810, prepared for college at Atkinson Academy, and graduated from Dartmouth in 1832. On leaving college, he taught an academy at Gilmanton for some time, after which he studied law and graduated at the Dane Law School, at Cambridge, Mass. He commenced the practice of his profession at Laconia, and was Solicitor of Belknap County for several years. In the spring of 1844 he removed to Manchester, where he had resided ever since that time. He soon took a high rank at the Hillsborough County bar, and held the office of City Solicitor during the years 1849-'50. He was appointed Judge of Probate of Hillsborough County, in 1852, and held the office four years. In July, 1863, Governor Gilmore appointed him Attorney-General, and reappointed him in 1868. He was a trustee of the City Library many years, a trustee in the Manchester Savings-Bank, and a director in the City Bank. He was the first treasurer of the Manchester & Lawrence Railroad corporation, and he was clerk of the corporation many years. He held the latter office at the time of his death. He was a man of superior intelligence and ability, and discharged the duties of Attorney-General, with which he was intrusted, with great credit to himself and the State.

April 25.—**McFERRAN**, Lieutenant-Colonel and Brevet Brigadier-General JOHN C., U. S. A., Deputy Quartermaster-General, Department of the South, a very able and conscientious army officer; died suddenly, at Louisville, Ky., aged about 52 years. He was a native of Kentucky, and entered the Military Academy from that State in 1838, graduating in 1843. After graduating, he was assigned to duty as second-lieu-

tenant of the Third Infantry. During the Mexican War he was with the Seventh Infantry, and engaged at Palo Alto, and Resaca de la Palma. After that war he was transferred back to his old regiment, and in 1856 entered the Quartermaster's Department of the army, in which he had served ever since. During the civil war, he was in New Mexico and in Washington Territory; received his brevet in 1865, and his lieutenant-colonelcy in 1866. Since then, he had had charge of the eighth division of the Quartermaster's Department. General Terry well said of him in his general order announcing his death: "As an officer, he was distinguished for his able and conscientious discharge of every duty; as a man, for stainless honor and exalted worth. Dying, he leaves behind him a reputation for purity and integrity which reflects honor upon the service in which he was an officer, and upon the profession of arms."

April 25.—**WALKER, A. J.**, an Alabama jurist, Chief-Justice of the Supreme Court of the State from 1856 to 1862, a member of a family conspicuous for their activity in the Confederate movement, and eminent commander of the Knights Templars of the State; died in Montgomery, Ala., aged 53 years.

April 27.—**COLE, Mrs. FLORENCE FRANCES**, better known to the public by her stage name of *Florence Stanley*, a popular actress, being connected with the Holliday-Street Theatre Company, in Baltimore, but who had left the stage about two years since; died in Baltimore.

April 27.—**KIDWELL, ZEDEKIAH, M. D.**, a prominent Democratic politician and member of Congress from Northwestern Virginia; died in Fairmount, W. Va., aged 58 years. He was born in Fairfax County, Va., January 4, 1814; was educated by his father, who was a civil engineer; studied medicine, and graduated from the Jefferson Medical College, Philadelphia, in 1839. After practising medicine for some years, Dr. Kidwell studied law, and was admitted to the bar in 1849, served a number of years in the Virginia Legislature; was a member of the Constitutional Convention in 1849, a presidential elector in 1852, and a representative in Congress from 1853 to 1857. In 1857 he was elected one of the three commissioners who formed the Virginia Board of Public Works, and retained his position for several years. He was always a Democrat, and personally popular with his party. He sympathized with the Confederacy, and went off South early in 1861, and remained about Richmond, in some official position most of the time, till the end of the war, coming back to his old home after it was over, wrecked in his political fortunes and broken down in health.

April 27.—**STEVENS, PARAN**, a prominent and well-known hotel proprietor; died in New York City. He was the first proprietor of the Revere House, Boston, and was, at the time of his death, the principal proprietor of the Revere and Tremont Houses, in Boston; of the Fifth

Avenue Hotel, in New York, and of the Continental Hotel, in Philadelphia. Before the war he was also the proprietor of the Battle House, in Mobile, Ala. Mr. Stevens was a man of great energy and enterprise, and had just completed one of the finest apartment houses in the world. He was a liberal patron of art, and a kind and genial gentleman.

April 28.—GRAVELLY, JOSEPH J., Lieutenant-Governor of Missouri and former member of Congress from the Fourth Missouri District; died at Stockton, Cedar County, Mo., aged 44 years. He was born in Henry County, Va., in 1828, and after receiving an ordinary education studied law, and, possessing a ready and captivating style of oratory, he soon distinguished himself in politics. He was a member of the Virginia Legislature in 1853, and took strong ground against the act proposing the sale of free negroes under certain circumstances. In 1854 he removed to Cedar County, Mo., and there plunged again into political life. He was elected a member of the State Convention in 1861, and to the State Senate in 1862, as an emancipationist, and was re-elected to the same position in 1864. Although favoring the call for a new convention, he opposed the adoption of the work of that convention—the "Drake Constitution." In 1866 he was elected a member of Congress from the Fourth District. In 1870, falling in with the tide of the Liberal progressive movement, he was elected on the ticket with Governor B. Gratz Brown as Lieutenant-Governor, a position which he held at the time of his death. As a presiding officer in the Senate, he exhibited unusual tact, and, being perfectly posted in parliamentary law, his rulings were seldom appealed from, nor were his honesty and impartiality questioned even by his political opponents. In addition to the various responsible positions which he held in civil affairs by the favor of his constituents, he also received promotions in the military service. He entered the Home Guards in 1861, served as second-lieutenant in the Thirteenth Missouri State militia, also as captain, and was appointed colonel in March, 1863. He was subsequently commissioned lieutenant-colonel of the Fourteenth Veteran Cavalry, and was mustered out in 1865.

April 29.—HARDENBERGH, JACOB, a Democratic politician and political leader in New York, serving his second term as State Senator, the keenest and most effective debater in the Senate; died in Albany, aged 49 years. He was born in New Paltz, Ulster County, in 1823, and educated at the New Paltz Academy and at Rutgers College, New Brunswick, N. J., graduating from the latter in 1844. He immediately commenced the study of the law, teaching meanwhile in the academy in Fonda, Montgomery County, N. Y. He was a very successful and popular teacher, and distinguished in that, as in every thing else, by his thoroughness in all that he undertook. In 1849 he was admit-

ted to the bar, and commenced practice at Kingston, Ulster County, where he had ever since resided. He almost immediately entered upon a large and lucrative practice, for which his thorough preparation admirably fitted him. His early affiliations were with the Whigs, but in 1856 he avowed himself a Democrat, and very soon became a leader in that party in Ulster County. He was a member of most of the State Democratic Conventions, and for several years of the State Central Committee, in which he did much to shape the policy of the party in the State. But, while thus active in his efforts for the promotion of the welfare of his party, he manifested little or no ambition to hold office himself. He was nominated for Judge of the Supreme Court in his district, during the war, but some of the active peace Democrats of his section bolted his nomination, and he was defeated. In 1867 he was elected one of the members at large of the State Constitutional Convention and there made for himself a State reputation. In that body he was influential in securing the passage of the judiciary article which was subsequently adopted by the people, and also active in seeking to secure reform in the management of the canals. Mr. Hardenbergh was elected to the Senate in the fall of 1869 from the Fourteenth Senatorial District, comprising the counties of Greene and Ulster, and ran ahead of the State ticket. He was placed at the head of the Canal Committee by the Lieutenant-Governor, the wisdom of which selection has been more than justified. He inaugurated some of the reform measures for the management of the canals which have made those thoroughfares so efficient. He was instrumental in securing the adoption of the system of low tolls, which has in a measure brought back to the canals a large portion of their trade and commerce. In the fall of 1871 he was re-elected to the Senate, and on taking his seat it was soon evident that he was one of the ablest members of that body. But in the fourth week of the session he was attacked by inflammatory rheumatism in so violent a form that he soon succumbed to it.

April 29.—KING, WILLYS, an old and prominent citizen of St. Louis, and State Superintendent of Insurance; died in that city.

April 30.—MARSHALL, REV. GEORGE, D. D., a leading clergyman of the Presbyterian Church in Western Pennsylvania; died at Bethel, near Pittsburg, Pa., aged 66 years. He was a native of Western Pennsylvania, a graduate of Jefferson College, and had entered upon his ministry at Bethel in 1832. His ability as a preacher and writer, and his sound judgment and kindly disposition, had given him a high reputation throughout the region in which he labored.

April —.—BAKER, JEREMIAH, a centenarian of Northfield, Mass., a soldier of the War of 1812; died there, aged 101 years.

April —.—HUNTINGTON, WILLIAM S., a young

banker of Washington, D. C., of great ability and promise; died there, aged 81 years. He was born in Geneva, N. Y., in 1841, and in 1861 received from Hon. S. P. Chase a position in the loan branch of the Treasury. His great aptness and skill in financial matters attracted the attention of Messrs. Henry D. and Jay Cooke, and in 1863, when they organized the First National Bank in Washington, they made Mr. Huntington its cashier, and from that time till his death he had filled the position with distinguished ability. His death was caused by congestive chills.

April.—MACY, JOSIAH, Sen., an eminent merchant and former shipmaster of New York, a member of the Society of Friends; died at his residence in Rye, N. Y., aged 88 years. He was a native of Nantucket, Mass., born in 1784, and in early life was a commander of packet-ships plying between New York and Liverpool, and was so popular that berths were engaged on his ships for many passages ahead. Upon leaving the sea he went into the sperm-oil trade, in which he continued with great success for many years.

April.—MARTIN, ARNOLD, an enterprising but never successful journalist, who, in the course of thirty-two years, had started eighteen different newspapers, in New England, the South and the Northwest; died in great poverty at San Diego, Cal., aged 52 years.

April.—SMITH, MRS. MARY, a venerable lady of Morristown, N. J.; died there, at the advanced age of 101 years and 6 months. She was a member of the Presbyterian Church, and attended services in the churches up to within a few years back.

April.—STURGIS, RUSSELL, one of the most eminent and respected shipping-merchants of New York City; died there, aged 68 years. He was a native of Barnstable, Mass., born in 1804, came to New York when a young man, and was for years captain of a merchant-ship, trading to the East Indies. Subsequently he established a shipping-house in New York, of which he remained the head until his death. He was, from their organization, at the head of the Pilot Commissioners; he was for some time chairman of the Harbor-Masters, and took the most lively interest in every thing pertaining to the welfare of the merchant marine of New York. During the war he rendered efficient service to the Government in procuring and fitting out vessels. His youngest son was killed in Virginia while with the Army of the Potomac. Since the war Mr. Sturgis had been the chief proprietor of one of the lines of steamers to Savannah.

April.—TUFTS, QUINCY, a philanthropic citizen of Boston, a grandson of the distinguished Dr. Cotton Tufts, of Weymouth; died in Boston. He left by his will \$10,000 to Harvard College for the education of indigent students; \$2,000 to Amherst College, and \$2,000 to Atkinson (N. H.) Academy, for a like purpose; \$10,000 to the town of Weymouth

for a free library, lectures, etc.; \$10,000 to the Massachusetts General Hospital for free beds; and some \$40,000 to be distributed among the city charitable institutions.

May 2.—DAVIS, THOMAS T., a prominent and enterprising citizen and lawyer, of Syracuse, N. Y., member of Congress from that district for two terms; died there, aged 62 years. He was the son of Rev. Henry Davis, D. D., first president of Hamilton College, Clinton, N. Y., and was born at Middlebury, Vt., August 22, 1810; graduated from Hamilton College in 1831; studied law, and was admitted to the bar in Syracuse in 1838. From the time of his settlement in Syracuse he took a deep and active interest in the various manufactures, and railroad and mining enterprises of that thriving and growing city; was connected with its great salt-manufacture, and was counsel for most of the manufacturing establishments of the city. He was elected in 1862 to the Thirty-eighth Congress, and in 1864 re-elected to the Thirty-ninth. Since the conclusion of his second term he had remained in private life, attending to his large legal business.

May 6.—SWIFT, ROBERT, an American merchant and conchologist, long resident at St. Thomas, West Indies; died there, aged 73 years. He had established himself on the island in 1831, and, being a man of fine culture and great fondness for scientific pursuits, his house was ever open to distinguished American visitors. He was constantly in communication with our ablest conchologists, in regard to his favorite study, and his collection of shells was said to be the best in the West Indies.

May 7.—ROOKWOOD, REV. LUBIN BURTON, a Congregationalist clergyman, secretary of the New England Branch of the American Tract Society; died in Boston, aged 60 years. He was a graduate of Dartmouth College, and studied theology at Andover and Union Theological Seminaries. He had been settled for several years in the pastorate, but for twelve or fourteen years had been engaged in the service of the Tract Society, and with great success.

May 8.—KITCHEN, JOHN S., M. D., a surgeon in the United States Navy; died in Philadelphia, in his 42d year. He was born in New York, in November, 1830, was commissioned an assistant-surgeon in the navy, May 1, 1855, and made his first cruise on the coast of Africa in the sloop-of-war *St. Louis*. His next service was aboard the steam-frigate *Wabash*, Mediterranean squadron. In 1859 he was promoted to passed assistant-surgeon, and was attached to the receiving-ship *Ohio*, at Boston, and the naval hospital at Chelsea, Mass., until 1861, when he was commissioned a surgeon, and ordered to the steamer *Pocahontas*, but subsequently transferred to the sloop-of-war *Mohican*, on board of which latter he participated in the battle of Port Royal.

During the war, he served principally in the North Atlantic blockading squadron, on board the steam-sloop *Sacramento*, and at its close had charge of the naval hospital, Port Royal, S. C., after which he was ordered to duty at the rendezvous, and on board the receiving-ship at Boston. In 1869 he was ordered to the iron-clad *Dictator*, and while attached to her manifested the first symptoms of the disease of which he died. In 1870 he was ordered as a member of the Naval Medical Examining Board, at Philadelphia, thence to the frigate *California*, and, upon the arrival of that vessel upon the Pacific station, was transferred to the charge of the naval hospital at Mare Island, Cal., from which duty he was invalided in September, 1871, and returned to his home in Philadelphia, where he subsequently resided. During the whole seventeen years of his connection with the service, Dr. Kitchen was actively and honorably employed, and even served with zeal and fidelity long after he was suffering his mortal illness, induced by long-continued and arduous service.

May 8.—**SANGER, WILLIAM W., M. D.**, an American physician and author; died in New York City, aged 53 years. Dr. Sanger enjoyed a high reputation as a physician, and was, for a number of years in charge of the Blackwell's Island Hospital and Almshouses. He had made very careful and thorough investigations into the history, causes, and status of the social evil in New York, and had published the result of his observations in a volume of great professional value, entitled "The History of Prostitution."

May 9.—**LIVINGSTON, HERMAN**, an old and eminent merchant of New York; died at his residence in Catskill, in the 79th year of his age. He was one of the pioneers of steam-navigation on the Hudson River, and, after a prosperous business career, retired to his estate at Catskill, about 1850.

May 13.—**DALTON, EDWARD BARRY, M. D.**, a young physician of great promise; died at Santa Barbara, Cal., of consumption, aged about 38 years. He was educated at Harvard College, whence he graduated in 1855, and, after devoting some time to the study of physical science, came to New York, and, attending the medical lectures of the College of Physicians and Surgeons, graduated M. D. in 1858. He was gaining a good practice, when, at the commencement of the war, he volunteered as a surgeon, and remained in the service as assistant-surgeon, surgeon, and medical director, from April 30, 1861, to May 13, 1865. His health was impaired by his active service in the army, but he returned to New York, and resumed his scientific investigations with great zeal and energy, and found time to prepare for the press some papers and monographs which indicated the possession of rare talents. Soon, however, his health began to fail, and, after trying other resorts for the relief of pulmonary disease, he was at last induced to test the mild

and genial climate of Southern California. It was too late, however, to arrest the disease, and he sank gradually until his death, in May.

May 14.—**HUGER, ALFRED**, an old and estimable citizen of Charleston, S. C., a native of the city, and postmaster for thirty-five or thirty-six years; died there, in the 84th year of his age. He was conspicuous for his attachment to the Union, both in the old nullification times of 1832, and in the more recent display of secession sentiments during and before the late war.

May 17.—**WOLFE, JOHN DAVID**, a wealthy and philanthropic merchant of New York City; died there, in the 80th year of his age. Mr. Wolfe gave largely of his great wealth to all objects of true benevolence; but he was especially generous in his gifts for the relief of orphans, the aged and infirm, the poor, the unfortunate, and prisoners.

May 20.—**O'ROURKE, Captain MICHAEL**, a brave and gallant officer of Volunteers in the late war, and, subsequently, identified with the Fenian movement; died in New York, aged 33 years. He was born in Roscommon, Ireland, but emigrated to the United States at an early age. He joined the Union army at the outbreak of the civil war, and served with distinction in Corcoran's Irish Legion. When peace was proclaimed, he actively engaged in the Irish revolutionary movement, and assisted in sending aid to his countrymen in Ireland. When the time for the contemplated uprising was at hand, he returned to his native land, and, at great personal risk, promoted the arming and organization of his countrymen there and in England. He was in the confidence of the leaders, and never failed, under the most trying circumstances, to act the part of an Irish patriot. When he subsequently returned to this country, he took a leading part in movements calculated to advance the political and social welfare of his people. He assisted in organizing the Irish District Reform League, and was elected president.

May 23.—**CLARKE, REEDER WRIGHT**, a politician and political leader in Ohio, member of Congress for two terms, Third Auditor of the Treasury, etc.; died at Batavia, Clermont County, Ohio, aged 60 years. He was born in Bethel, Clermont County, Ohio, May 18, 1812, received a good academical education, and, at the age of fifteen, commenced learning the printer's trade, in which he became an adept. He subsequently studied law, and was admitted to the bar in 1836. In 1840 and 1841 he was a member of the Ohio Legislature; was a delegate, in 1844, to the Baltimore Convention; and a presidential elector at the ensuing election. From 1846 to 1852 he was Clerk of the Supreme and Common Pleas Courts for his native county. He was a delegate to the Chicago Convention, in 1860, and, from March, 1865, to March, 1869, a Representative in Congress from his district. He was also a delegate to the Philadelphia "Loyalists' Con-

vention," in 1866. In 1869 he was appointed Third Auditor of the Treasury, and subsequently Supervisor of Internal Revenue for the Southern District of Ohio. He had been an invalid for two or three years past.

May 25.—ROBIE, Rev. JOHN E., a Methodist clergyman and religious journalist, editor for many years past of the *Buffalo Christian Advocate*, and a man of great influence in his denomination in Western New York; died at Cowlesville, N. Y., of apoplexy.

May 31.—HASKELL, LLEWELLYN, an enterprising and highly-esteemed merchant of New York, the founder of Llewellyn Park, an exquisite suburb of Orange, N. J.; died in Santa Barbara, Cal., aged about 60 years. Mr. Haskell was of Welsh ancestry, but was a native of Maine. He had resided in New York and its vicinity for many years, and was well known and cherished for his strict integrity, large public spirit, and unswerving devotion to liberal ideas. He had been suffering from pulmonary disease for some years, and had visited Santa Barbara in the hope of a complete restoration to health in that genial climate.

May 31.—PITCHER, WILLIAM H., M. D., an eminent physician of Hudson, N. Y. a son of Governor Nathaniel Pitcher; died in Hudson, from the effect of poison introduced into his system while making a *post-mortem* examination in a case of erysipelas.

May —.—COLEMAN, Prof. BENJAMIN B., a member of the Faculty of the University of Virginia, who was a candidate for a vacant professorship in Miami University, Oxford, Ohio; was killed by being run over by the railroad-cars at Charlottesville, Va., as he was attempting to mail a letter to allow his friends to present his name as a candidate for the vacancy.

June 2.—COLTON, Rev. HENRY MARTYN, a Congregationalist clergyman and teacher; died in Middletown, Conn., aged 45 years. He was born in Royalton, Niagara County, N. Y., November 5, 1826; graduated at Yale College in the class of 1848, and, after a year devoted to a select course of study, entered the Yale Theological Seminary, and in November, 1852, was ordained pastor of the First Congregational Church in Woodstock, Conn. Resigning this charge in January, 1855, he removed to East Avon, Conn., where he supplied the pulpit of the Congregational Church two years. In May, 1857, he established a classical school in Middletown, which he continued for eleven years. In September, 1868, he opened the "Yale School for Boys," in New York City, which he was still conducting at the time of his death.

June 2.—MARTIN, Rev. GEORGE W., a Presbyterian clergyman; died at Denver, Col. He graduated at the Union Theological Seminary in the class of 1868, and, after preaching at Saugerties one year, was settled over the Presbyterian Church at Schaghticoke, N. Y. In the spring of 1871, his health becoming im-

paired, his people gave him a vacation, and he went to Denver in the vain hope of recovery. He was an eloquent preacher, and his talents gave promise of great usefulness.

June 2.—NICHOLSON, Colonel JOSEPH HOFER, a lawyer and politician of note; died at Annapolis, Md., aged 66 years. He was a native of Baltimore, and second son of Judge Joseph H. Nicholson, of the Court of Appeals of Maryland; graduated at Harvard University, and commenced the practice of law in his native city. For many years he was Clerk of the Senate of Maryland, and was acting Secretary of State under Governor Veazy. He was appointed Clerk of the Circuit Court for Anne Arundel County by Governor Pratt, and, by President Fillmore, United States consul at Tunis. The office of Principal Executive Clerk of the United States Senate was created for Colonel Nicholson, and he continued to perform his duties until 1861, since which he had held the position of Secretary of the Annapolis and Elk Ridge Railroad Company, of which he had long been a director. Colonel Nicholson was widely known as an influential politician and a vigorous writer.

June 2.—PLUMMER, Hon. GEORGE, a prominent citizen of Glastenbury, Conn.; died there, aged 87 years. He was born in Glastenbury, December 7, 1785; graduated at Yale College in the class of 1804, which numbered many eminent scholars, studied law at New Haven with his uncle, Judge Mills, and was admitted to the bar in 1807. Until 1812 he continued to practise his profession in his native place, attending constantly the courts at Hartford. The death of his father at this time devolved upon him the charge of a considerable estate, and, with naturally a strong taste for the quiet life of the farm, he at once abandoned the law, and, as he often used to emphasize it, "without the least regret." Though never afterward making a writ, he often acted as magistrate and brought in many ways to the service of his townspeople his legal acquisitions and skill. Near the close of the War of 1812 he entered the military service. Under Brigadier-General Lusk, who commanded a brigade of 1,800 men at New London, he acted as brigademajor and inspector, and remained in the service so long as the exigencies of the coast defence required. In politics Deacon Plummer was Whig and Republican. In 1844 he represented the Second District in the Senate, and again in 1851. He was twice a member of the corporation of Yale College, for which, as an alumnus, he cherished very strong attachment. In matters ecclesiastical and religious he held a special prominence. For nearly half a century he served the church as deacon, and acted as its treasurer, and for thirty years was continuously chosen treasurer of the town, his name being entered upon all tickets alike. Warmly enlisted in all movements for the public good, he was especially interested in educational and religious matters.

June 3.—**COLVOCORESSIS**, Captain **GEORGE M.**, U. S. N., a distinguished naval officer, of Greek birth; was murdered at Bridgeport, Conn., aged about 60 years. He was born in Missolonghi, Greece, and saw his father and mother murdered by the Turks in the massacre of that city in 1824. Seeing that he would fall a victim to the revengeful Turks, he ran to the shore with another boy and jumped into a skiff. They paddled off toward the United States man-of-war Constitution, which lay in port, under Commodore Elliott. As soon as it was discovered that they were escaping from the Turks, Commodore Elliott ordered a boat to their rescue and they were taken on board the Constitution and brought to America. Soon after young Colvocoressis landed he entered the Naval Academy at Annapolis, Md., being appointed from Vermont in February, 1832. In 1836-'37 he was attached to the frigate United States in the Mediterranean squadron. He was promoted to passed midshipman June 23, 1838; was lieutenant October 7, 1843, and served on various ships till July 1, 1861, when he was commissioned commander, commanding the sloop Saratoga, of the South Atlantic blockading squadron, till 1864, and the sloop St. Mary's, of the Pacific squadron, from 1865 to 1866. He chanced to be on duty in Valparaiso when that port was menaced by a powerful Spanish squadron, under the command of Admiral Pinzon, and was exceedingly active in his efforts to protect the rights and property of American citizens. For his success, as well as for a famous correspondence with the Spanish admiral, he will be long remembered there. He was retired with the rank of captain in 1867. Captain Colvocoressis was a gallant and deserving officer, and took an active part in the late war of the country, receiving a large amount of prize-money from various captures in which he participated. The circumstances of his death were peculiarly distressing. Leaving his home in Litchfield, Conn., upon a business-trip to New York City, he reached Bridgeport in the evening, with the intention of taking the boat for New York, but was waylaid, murdered, and robbed of a large amount of property upon his person. Captain Colvocoressis was a man of remarkable courage, and was widely esteemed for his many virtues.

June 4.—**PLATT, ISAAC**, a veteran political editor and journalist; died at Poughkeepsie, N. Y., aged about 70 years. In 1828 he established the *Dutchess Intelligencer*, a strong anti-Jackson paper, surrendered mostly to politics. The county, however, went heavily for Jackson, remaining on that side until 1837, when it became Whig. Subsequently, one of the old papers, changing its views, was united with Mr. Platt's paper, *The Eagle*, which still survives. His editorial career extended over a period of forty-four years.

June 5.—**BIRMINGHAM**, Very Reverend T., D. D., a Roman Catholic clergyman, Vicar-

General of the Diocese of South Carolina; died in New York City, aged 75 years. He was born in the county of Tipperary, Ireland, in 1797; left his country in 1827, and, after a brief sojourn in Canada, went to Charleston, S. C., in 1829, and took his ecclesiastical course at the seminary of Bishop England, by whom he was ordained in 1831. His first mission was to Columbus, Ga., and thence he was transferred to Columbia and Edgefield, S. C., in which latter mission he was engaged until the commencement of the late war. It was while in the charge of this mission that he erected the granite church in Edgefield, raised at a cost of over \$30,000, and gathered in small sums from his friends in different parts of the country. At the close of the war, upon his return to Charleston, he was appointed, by the Right Reverend Bishop Lynch, Vicar-General of the Diocese of South Carolina, and this dignity, with which he was then invested, he retained to the day of his death. The last two years of his life he chiefly devoted outside of the charge of his spiritual duties—to the erection of a worthy edifice of Catholic worship, on Sullivan's Island, suitable to the growing population and importance of this sea-side summer resort, which building is not yet wholly completed.

June 5.—**SHORTER, JOHN GILL**, an Alabama jurist and political leader, a native of Georgia, but long resident in Alabama; died in Eufaula, Ala. He was a son of Hon. Eli Shorter, of Georgia, but removed to Alabama while yet a young man, and, from his wealth, his learning, and his high character, he speedily became prominent in political circles. He was for several years a State Senator; was circuit judge for his district, from 1855 to 1861; was a member of the first Provisional Confederate Congress; and in the autumn of 1861 was elected Governor as successor of Governor Andrew Moore, and through the succeeding two years, though the war raged within portions of his State, he maintained his authority and control of the State in such a way as to give general satisfaction. He was a man of the most estimable private character, an active and devoted Christian, and greatly esteemed for his amiable and generous nature.

June 7.—**BEERS, WILLIAM F.**, a New York journalist; died in that city, aged 35 years. He was born in Ireland, but came to this country at a very early age. When only ten years old, he entered the office of the *Sun*, and remained there for four or five years; after which he spent about six years in the book-office of Smith & McDougall. He next went into the composing-room of the *Times*, where he remained until the beginning of the war. While here, he became a prominent and respected member of the Typographical Union. When the call for volunteers was sounded, he enlisted as a private in the Tenth New York Volunteers, and served with credit until the

battle of the Wilderness, where he was dangerously wounded in the thigh. While lying in hospital, he was twice captured by guerrillas, but was retaken by the United States forces, and removed to the hospital at Washington. When he recovered from his wound, he rejoined the army before Petersburg, and received his commission as second-lieutenant, and for gallant and meritorious conduct was shortly afterward promoted to be first-lieutenant, and given the command of Company C. He remained with the army until Lee's surrender. When he returned from the war, he entered the composing-room of the *Tribune*, and there exhibited such skill and efficiency that in 1869 he was assigned to the position of night news editor, and was gradually advanced to that of night editor in charge, which place he held at the time of his death.

June 8.—JOHNSON, MRS. MARY A. W., an able writer, wife of Oliver Johnson, Esq.; died in New York City. She was a woman of brilliant intellect, and deeply interested in every movement for freedom, happiness, and the elevation of the human race.

June 9.—WALL, JAMES W., formerly a United States Senator from New Jersey; died at Elizabeth, N. J., aged 52 years. He was born in Trenton, N. J., in 1820, and was a son of the Hon. Garrett D. Wall, United States Senator. He graduated at Princeton, in 1839, studied law, and entered upon the practice of his profession in his native place. His first position was that of a commissioner in bankruptcy. In 1847 he removed to Burlington, and devoted his attention chiefly to literary pursuits, in which he became eminent. In 1850 he was elected Mayor of Burlington, and in 1854 visited Europe, and subsequently published a volume entitled "Foreign Etchings, or Visits to the Old World's Pleasant Places." During the early part of the civil war, he wrote against the Administration in power, for interfering with the freedom of the press, and was imprisoned for a few weeks in Fort Lafayette. In January, 1863, he was elected a Senator in Congress, from New Jersey, for the unexpired term of John W. Johnson, deceased. In 1869 he removed to Elizabeth, and gave himself mostly to literary pursuits.

June 9.—WILLIAMS, THOMAS, formerly member of Congress for the Twenty-third District of Pennsylvania; died at Pittsburg. He was born in Greensburg, Westmoreland County, Pa., August 28, 1806; graduated at Dickinson College, in 1825; studied law, and was admitted to the bar, in 1828. Having settled in Pittsburg, he was sent from that place as Senator to the State Legislature in 1838, and the three following years; was reelected in 1860 to the Lower House of the Legislature; and in 1862 was a Representative from Pennsylvania to the Thirty-eighth Congress, serving on the Committee on the Judiciary. He was reelected to the Thirty-ninth Congress, and again to the Fortieth, in which he was

one of the managers of the impeachment of Andrew Johnson.

June 12.—SWAN, Colonel WILLIAM, formerly an army officer; died at Cummington, Mass., in his 96th year. He was in the service from 1798 to 1815, received several promotions, was in the battles of Little Fork, New Toronto, and Sackett's Harbor, and passed safely through many perils. He was a comrade of General Winfield Scott, in New Orleans, both at that time being captains, one of infantry, and the other of artillery.

June 20.—REESE, WILLIAM J., Lieutenant Sixth Cavalry, United States Army; died at Nashville, Tenn., in the 27th year of his age. He entered the Volunteer service in June, 1862, before he was sixteen years of age, and served until February, 1865, leaving his regiment at that time to accept an appointment at West Point. He entered the Military Academy the same year, and graduated with credit, in the class of 1869. While a cadet, his genial disposition, his self-denying liberality, and unquestioned honor, made him the friend and favorite of all who knew him. After graduation, he served with his regiment, principally in Texas, until his health compelled him to return home. Lieutenant Reese had just been promoted to be first-lieutenant.

June 22.—RICH, Captain CHARLES OTIS, U. S. Volunteers; died at Yokohama, Japan. He was a son of Mr. Otis Rich, of Boston, and was a captain in the Forty-fifth Massachusetts Regiment, which served under General Foster, in North Carolina, in the civil war. He was present at the battles of Kinston and Goldsborough. After the war, he became a partner in an East India house with which his father was connected, and went as its representative to Yokohama, where he died.

June 26.—KELLOGG, Miss MARY, an eminent teacher; died in Great Barrington, Mass., aged 83 years. She was one of three sisters who conducted a seminary for young ladies in that village, and for a period of twenty-five years devoted themselves untiringly to its interests, rendering it an institution of the highest order.

June 29.—CRABBE, THOMAS, Rear-Admiral, U. S. N.; died at his residence in Princeton, N. J., aged 84 years, sixty years of which had been spent in the service. He was born in Maryland, in 1788, and afterward removed to Pennsylvania, from which State he entered the Naval Academy in 1809. He was made captain in 1841, and from 1850 to 1855 had charge of various foreign squadrons. In 1862 he was made commodore, and in 1866 rear-admiral.

June —.—SKINNER, General ST. JOHN B. L.; died in Washington, D. C., aged 75 years. He was a native of Washington County, N. Y., served in the War of 1812, and, during the administration of President Pierce, was made First Assistant Postmaster-General, a position which he retained under Presidents Buchanan, Lincoln, and Johnson.

July 1.—ROBERTS, SALLIE, formerly a col-

ored servant in President Madison's family; died in St. Louis, Mo., aged 107 years. Her mother lived to the age of 115 years.

July 8.—**FURMAN, CHARLES M.**, a prominent citizen of Charleston, S. C., and at one time Comptroller-General of the State; died in that city, aged 75 years. He was a son of Rev. Richard Furman, D. D., of Charleston; was born and educated there, admitted to the bar in 1819, and practised his profession with signal success until 1832, when he was elected treasurer of the lower division by the Legislature of the State. In this place he gave evidence of that financial ability for which, in after-years, he was so signally noted, and was subsequently elected to the important office of Comptroller-General of the State. The duties of this office he discharged with fidelity, and he was afterward chosen one of the Masters in Equity for Charleston District, an office at that time of grave and serious responsibilities. When Judge Colcock was elected Treasurer of the Bank of the State, having a high estimate of Mr. Furman's financial abilities, he prevailed upon him to undertake the duties of cashier of the bank. He continued to discharge the duties of this office until 1850, when he was elected President of the bank, and continued to hold this position until the close of the war. Mr. Furman had frequently been called to fill offices of honor and trust. In 1824 he was elected a member of the lower branch of the Legislature, and was also a member of all the city Boards. He was connected with the South Carolina Railroad for many years as a director, and was sent to England for the purpose of conducting an important and delicate trust for that company; was a member of the Secession Convention in 1860, and of the National Democratic Convention which nominated Seymour and Blair for the presidency in 1868. Mr. Furman was also a prominent member of the Masonic fraternity.

July 4.—**PHELPS, ZENAS MONTAGUE, A. M.**, formerly associate principal of the Mount Pleasant Military Academy, at Sing Sing, N. Y.; died at Amherst, Mass., aged 61 years. He was educated at Williams College, graduating thence in 1839, and devoted his whole life to the profession of teaching, in which he had achieved a good degree of success.

July 10.—**MCCHESNEY, REV. WILLIAM E.**, a Presbyterian clergyman and missionary at Canton, China; was killed by pirates at a little village called Kam-Kai, aged 28 years. He had been connected with the mission at Canton but two years and a half, and had made commendable progress in the acquisition of the language. Anxious to commence preaching, he, in company with a fellow-missionary, took a short trip into the country for that purpose, and had proceeded about fifteen miles, preaching by the way, when they anchored their boat for the night, near the above-mentioned village. A cargo-boat being attacked near them by pirates, they found themselves

under fire, and Mr. McChesney was killed instantly. He was a favorite with both natives and foreigners, and gave promise of great usefulness.

July 12.—**TRAPIER, REV. PAUL, D. D.**, an Episcopal clergyman, and professor in the Theological Seminary of South Carolina; died in Baltimore, Md., aged nearly 70 years. As a theologian, he ranked among the highest in the diocese, and in the conventions of the Church, both diocesan and general, he was recognized as an able counsellor and debater. For many years he was Rector of St. Michael's Church, Charleston, and for a time was a city missionary in charge of St. Stephen's Chapel, where he wielded a great influence for good.

July 14.—**STEPHENS, JUDGE LINTON**, a Georgia jurist and politician, brother of Alexander H. Stephens; died at Sparta, Ga., aged 49 years. He was born in Taliaferro County, Ga., in 1823, and was left an orphan at the age of three years. But friends took charge of his education, and, like his brother, he studied law, and in due time was admitted to practice. He evinced great legal ability, and ultimately rose to the bench. He took an active part in the politics of Georgia, and was a delegate from the county of Hancock to the Georgia Secession Convention of 1861. Judge Stephens voted therein against the ordinance of secession, but subsequently proposed a preamble and resolution declaring that the lack of unanimity in the convention was in regard to the (proposed) remedy, and its application before a resort to other means of redress, and not as to alleged grievances. This was adopted, and he signed the ordinance. He had acted all along with the Union party, who were styled "Cooperationists," in contradistinction to secessionists, and wrote in November, 1860, an important public letter, explaining and defending his views. During the war, he was a member of the Georgia Legislature, and introduced therein the peace resolutions of 1864, and also vigorously denounced the suspension of the privilege of the writ of *habeas corpus* by the Confederate Congress. After the war, Judge Stephens continued to take an active interest in politics, and, about a month before the Baltimore Convention, spoke at a public meeting in favor of the adoption of a straight Democratic presidential ticket.

July 16.—**DEXTER, GEORGE**, a well-known news-dealer of New York; died at Geneva, Switzerland, in the 68d year of his age. He was born in Cambridge, Mass., in 1809, learned the printing business in Boston, and about the year 1843 removed to New York City, where he continued to work at his trade. He and his early partner, Mr. Tuttle, were the first to conceive the idea of the newspaper brokerage business, which they established in Ann Street, about twenty years ago. After years of success and several changes, the "American News Company" was originated, embracing the business of several competing

establishments which had sprung up, Mr. Dexter and his brother Henry being large proprietors of the stock. At the time of his death Mr. Dexter was travelling in Europe, in the hope of regaining his enfeebled health.

July 16.—FLAKE, FERDINAND, a Texas journalist, editor and proprietor of *Flake's Bulletin*, of Galveston; died at New London, Conn. He was a native of Germany, and, emigrating to this country, went to Galveston, where he continued to reside, until, upon the failure of his health, he started for his home in Germany, but, his disease progressing rapidly, he died upon the way. Mr. Flake was a man of unflinching courage, and as editor and proprietor of the *Bulletin* was conspicuous prior to and during the late war, from his determined opposition to secession. Since the war, he has been identified with the Republican party, and was an advocate of its principles.

July 16.—STEWART, ANDREW, formerly member of Congress from Pennsylvania; died at Uniontown, Pa., aged 80 years. He was born in Fayette County, Pa., in June, 1792, studied law, and was admitted to the bar in 1815, soon after which he was elected to the State Legislature, and served three years. He was appointed, by President Monroe, District Attorney for Western Pennsylvania, and was a Representative in Congress from 1821 to 1829, from 1831 to 1835, and from 1843 to 1847. Both in Congress and out of it, he was a warm advocate of what is known as the "American protective system." The latter portion of his life was devoted chiefly to the (to him) congenial pursuit of agriculture, though paying some attention to the business of manufacturing.

July 17.—BOOCOCK, Rev. JOHN HOLMES, D. D., an eminent Presbyterian clergyman, of Lexington, Va.; died there, aged 60 years. He was a native of Virginia, graduated from Amherst College in 1835, pursued his theological studies in the Hampden Sydney Theological Seminary, and settled soon after his ordination at Lexington, where he early achieved distinction for his intellectual ability and eloquence. He received the Master's degree from Hampden Sydney College in 1847, and that of D. D. from Washington (now Washington and Lee) College, Lexington, Va.

July 19.—THATCHER, SAMUEL, formerly member of Congress, from Massachusetts; died in Bangor, Me., aged 96 years. He was born in Cambridge, Mass., in 1776, graduated at Harvard University in 1793, adopted the profession of law, and was a Representative in Congress from 1802 to 1805. He also served eleven years in the Massachusetts Legislature, and was Sheriff of Lincoln County from 1814 to 1821. In 1866 he was a resident of Bangor, and was the oldest Mason in the United States.

July 19.—WEST, W. H. G., First-Assistant Engineer, U. S. N.; was drowned at Cape May. He was born in Cornwall, England, but came to this country with his parents when a mere child. He educated himself as an engineer,

and entered the navy, May 18, 1861. The department records show that he served on the following vessels during the war: Paul Jones, Wabash, Keokuk, Nahant, and Brooklyn. He participated in the attacks on Roanoke Island and Fort Fisher, and was on the Keokuk, at the time she was destroyed in battle off Charleston. For three years immediately after the war, he was on duty at the Naval Academy as instructor in the department of Steam Engineering, after which he made a cruise as acting chief-engineer of the flag-ships Pensacola and Saranac in the Pacific. At the end of this cruise, in July, 1871, he was again ordered to duty at the Naval Academy, where he was attached at the time of his death, as assistant Professor of Mathematics. Mr. West was spending a few days of his summer leave at Cape May, and while bathing off the beach near Congress Hall, in a sea almost calm, he was suddenly swept off by the strong undertow of the ebb-tide and drowned before assistance could reach him.

July 23.—MOTT, SAMUEL R., an old inhabitant of Syracuse, N. Y.; died in that city, aged 115 years. His father lived to be one hundred and twenty-nine years of age.

July 24.—PORTS, JOHN, Chief Clerk of the War Department for thirteen years, and connected with it for twenty-six years; died in Washington, D. C. He was a native of Central Pennsylvania. His long official life, conducted with faithfulness and honor, gave evidence of the highest integrity, and most thorough devotion to duty. He disbursed millions without an error, and thousands of those who were brought into contact with him officially bear witness to the promptness of his action, and his uniform courtesy. During the late war, in addition to his other duties, he performed delicate and important services, in regard to which the late Secretary Stanton spoke of him to the present Secretary of War as "a perfectly incorruptible man."

July 26.—STANLEY, EDWARD, a lawyer and statesman of North Carolina; died in San Francisco, Cal. He was a son of Hon. John Stanley, M. C., and was born in Newbern, N. C.; received a part of his education at the Military Academy at Middletown, Conn.; studied law; represented Beaufort in the State Legislature three years, during one of which he was Speaker, and in 1847 was Attorney-General of the State. He was a member of Congress in the Whig interest in 1836-'42, and 1849-'53, serving on the Committee of Ways and Means, and as a leader of his party in debate; voted for the compromise measures of 1850, but was not thought in the South to be sufficiently devoted to the defence and preservation of slavery. In 1853 he went to San Francisco, where he practised law, but in 1862 was recalled thence by President Lincoln to assume the position of Military Governor of North Carolina, which he held for some months, and, resigning, returned to California.

July 27.—HIBBARD, HARRY, formerly member of Congress from New Hampshire; died at Somerville, N. H., aged about 57 years. He was born in Vermont, and was graduated at Dartmouth College in 1835. After being successively Assistant Clerk and Clerk of the House in the New Hampshire Legislature, he was elected a member of the House, and was Speaker in 1844 and 1845. He was a member of the State Senate from 1846 to 1849, officiating two years as President. In 1849 Mr. Hibbard, who was a Democrat, was elected from the Fourth Congressional District of New Hampshire a Representative in Congress by a large majority over his Whig opponent, and served, in all, three terms.

July 29.—HARDING, REV. FRANCIS A., a clergyman of the M. E. Church, before the division in 1844, and since, of the Methodist Church South; died in Baltimore, aged 59 years. Mr. Harding was a slaveholder and a delegate to the General Conference of 1844, and it was the objections to his reception, as a slaveholder, contrary to the "Discipline" prepared by Wesley, which was the moving cause, quite as much as the objections to Bishop Andrew, which led to the division of the Methodist Episcopal Church in that year.

July —.—GREENE, REV. JOHN SINGLETON COPLEY, died at Longwood, near Boston, Mass., aged 61 years. He was the son of the late Gardiner Greene, formerly a prominent and wealthy merchant in New York; a grandson of the celebrated portrait-painter, after whom he was named, and a nephew of the late Lord Chancellor Lyndhurst.

July —.—RAMSAY, STERRETT, the oldest paymaster in the United States Navy, died at Gettysburg, Pa., aged 82 years. He was born in Pennsylvania, and appointed to his first commission from that State. He entered the service of the Union on the 18th of November, in the year 1830, and was last at sea in May, 1853. His total registered sea-service was thirteen years, and his employment on shore or other duty eleven years and six months. He was rated as unemployed during sixteen years and eleven months, and credited with a total service to the country of forty-one years and one month.

July —.—TOLLEFSON, LARS, a man of giant stature, died in Chicago, Ill., aged 38 years. He was a native of Norway, and measured seven feet nine inches in height, weighing three hundred and seventy-five pounds. He was frequently importuned to exhibit himself publicly, but his constitutional modesty induced him to decline all offers, and seek a less munificent livelihood by selling beer.

July —.—VANDERHORST, —, Bishop of the colored Methodist Church; died in Charleston, S. C., in the 64th year of his age.

Aug. 1.—RITTER, Captain and Brevet Lieutenant-Colonel JOHN F., Eighth Regiment Infantry, U. S. A.; died at Catskill, N. Y., aged 36 years. He was born in Pennsylvania, edu-

cated at the Military Academy, West Point, and entered the army in 1856. He served in Florida against the Seminole Indians; was on frontier duty during the Utah Expedition; served during the civil war, and for meritorious services was rapidly promoted. He was made colonel of the First Missouri Cavalry Volunteers in 1862; brevet lieutenant-colonel in 1863; resigned the volunteer commission in 1864, and in 1866 was transferred to the Thirty-third Infantry, U. S. A., having previously been Acting Inspector-General of the Department of the Mississippi. Subsequently he was transferred to the Eighth Infantry.

Aug. 3.—LELAND, SIMEON, an eminent hotel-proprietor; died in New Rochelle, aged 55 years. He was the eldest and the founder of the firm of Leland Brothers, who have been connected with the management of many hotels in this country. Simeon Leland, however, confined his attention more particularly to New York City, and in 1845 purchased, in connection with Preston Hodges, the Clinton House, on Beekman Street, near Printing-House Square, which was formerly occupied by the Park Bank. Mr. Leland continued in the management of the Clinton House till 1852. In 1851 he obtained from A. T. Stewart a twenty years' lease of the Metropolitan Hotel, which he opened in partnership with his brothers in September, 1852, continuing in charge till March, 1871. Since that time he had been living in retirement with his family, at his residence in New Rochelle.

Aug. 5.—CRANE, Captain GEORGE H., Twenty-second Infantry, U. S. A.; died at Ponsa Agency, Dakota Territory.

Aug. 6.—CLARK, JASON, an eminent citizen of Jefferson County, N. Y.; died in Plessis, aged 71 years. He was born in Greenfield, Saratoga County, in 1801, and early removed to Jefferson County, then known as the Black River country, being comparatively new and unsettled. Taking charge of the survey and sale of land as agent for several landed proprietors, he at once became largely identified with the business interests of the community in which he had selected his home, retaining a local influence rarely enjoyed, as shown by the various positions of public trust to which he was almost uninterruptedly chosen in the magistracy of the town, and which continued till his death. He was also, although not in the legal profession, at times honored with a position on the bench of the county. At different periods his prominence in public estimation had given him (unsought) the candidacy for the State and national Legislatures, and once also he received the suffrages of his party throughout the State for Canal Commissioner, but to these offices he failed of election, as the party was in the minority.

Aug. 7.—GREY, Captain THOMAS, U. S. A. (retired); died at San Francisco, Cal.

Aug. 9.—ECKFELDT, JACOB R., Chief Assayer of the United States Mint for many years; died in Philadelphia, Pa., aged 70 years. His father,

Adam Eckfeldt, long filled one of its most responsible offices—that of chief coiner, to which he was appointed by General Washington in 1794. His own education, if not having a direct reference to the station he was to occupy, certainly enabled him to make a remarkable proficiency in those branches of science which most eminently fitted him for it. This, added to his integrity of character, secured for him as rapid an advance to the head of the department as the occurrence of vacancies would allow. A few years later, when great quantities of English sovereigns came to the United States Mint to be recoined, he reported them below the standard claimed. This was confidently denied at the London Mint, which had always prided itself on the accuracy of its assays. They said, "It is impossible; the London Mint makes no mistakes." Mr. Eckfeldt still insisted that he was right, and when, not long after, there was a change of directorship in London, a closer investigation followed, and the case was found as stated by him. The excitement in monetary circles that followed, gave rise to a parliamentary law ordering the closest possible examination of the weight and fineness of all the coins in the world. The result was, that the coins of the United States were found to be more uniform than those of any other country, and from that time onward Mr. Eckfeldt's reputation as an assayer has been world-wide. The result, as regarded his continuance in the important trust, involving the purity of all our metallic currency, was what it should have been. Advanced to it under the Administration of President Jackson, he held it undisturbed through all the changes of party, and left it only as he left the world.

Aug. 9.—MAYO, JOSEPH, a prominent citizen, lawyer, and for many years Mayor of Richmond, Va.; died there, aged 77 years. He was born at Fine Creek Mills, Powhatan County, Va.; in 1795, studied law in Richmond with Abel P. Upshur, and, after his admission to the practice of his profession, formed a copartnership with him. He was attorney to the Commonwealth in the Hustings Court of Richmond for twenty-nine years; was a member of the House of Delegates, Mayor of Richmond for fifteen years, from the 11th day of April, 1853, till removed by the Federal authorities; author of "Mayo's Guide to Magistrates," and was, at the time of his death, Commonwealth's Attorney for New Kent County. As a lawyer he ranked high. He had a vast store of practical information, his mind being of an elevated judicial order, and he would have worthily filled any bench in the State. His "Mayo's Guide" has been the *code mecum* of the lawyers and magistrates of Virginia for twenty years, and is still held in high repute, though the condition of things under which it was written has so greatly changed.

Aug. 11.—DRAYTON, HENRI, a celebrated opera-singer, actor, and author; died in New York

City, aged 50 years. He was born in Philadelphia, in 1822, finished his musical education at the Paris Conservatoire, and soon afterward was engaged as *primo basso* in the Italian Opera at Antwerp. Subsequently he was associated with an English opera company in London, where he played for many years with great success, excelling in such character parts as Devilshoof in "The Bohemian Girl," and making a reputation by his Bertram in "Robert," and Peter the Great in "*L'Étoile du Nord*." He came to the United States with his wife in 1859, and gave a series of popular entertainments, which he styled parlor operas, but in 1861 returned to England. In 1869 he was engaged by the Richings English Opera Company, and sang with them for two seasons in New York and other cities. Mr. Drayton was not only a good musician, but an actor of ability and earnestness, and the author of several plays and operas.

Aug. 11.—TRACY, REV. THOMAS, a Unitarian clergyman; died in Newburyport, Mass., aged 91 years. He was born at Haverhill, Mass., March 26, 1781; graduated at Harvard College in 1806, and was settled at Biddeford, Me., preaching there and at Saco for about eight years. In 1828 he returned to Newburyport, and had resided in the same house up to the time of his death. He was a man of fine scholarly attainments.

Aug. 12.—RAY, MARTIN M., a Democratic politician and political leader in Indiana; died in Shelbyville, Ind., aged about 52 years. He was born in Butler County, Ohio, studied law for a time in the Law School of Harvard University, and also with his uncle, Governor Ray, of Indianapolis, and entered upon the practice of his profession in Shelbyville. In 1861 he had a seat in the Senate of the State, and at first favored a compromise between the North and South; but when the war began, and it became perfectly clear that the questions must be fought out, he, like Mr. Douglas, took bold ground for the Government against the seceders, and made some of the ablest speeches of his life in support of the war. He was a true and devoted patriot, and regretted with all his heart whatever tended to the injury of the cause of the country. Mr. Ray was an able lawyer, and a speaker of decided eloquence.

Aug. 14.—BROUGHTON, REV. PETER, a Presbyterian clergyman, and for many years secretary of the Western and American Seamen's Friend Societies; died in Titusville, Pa., aged 69 years. In 1834 he engaged himself as lay missionary of the New York City Tract Society, and subsequently entered the Theological Seminary connected with Western Reserve College, Ohio. Having preached eleven years in Niles and Port Huron, Mich., he entered the service of the Western Seamen's Friend Society, in which he continued fourteen years as chaplain, agent, and secretary. He was then called to the American Seaman's Friend Society of New York, as travelling

agent; acting part of the time also as chaplain and Southern secretary. During the war he was of great service as naval chaplain at New Orleans, where he took upon himself double duty, by acting also for the Christian Commission. He remained with the American Seaman's Friend Society until laid aside by ill-health in the spring of 1871.

Aug. 15.—RUST, Colonel RICHARD, an early California journalist; died at Mokolumne. He was a native of Vermont.

Aug. 18.—DAVENPORT, Captain HENRY K., U. S. Navy; died at Frangensbad, Bohemia. He was a native of Georgia, and was appointed from that State, entered the service February 19, 1838, and remained in it nearly twenty-nine years, leaving a record of rare faithfulness and devotion to duty. At the time of his death he was captain of the Congress, on the European station.

Aug. 18.—SPIER, THOMAS J., member of Congress from the Fourth Congressional District of Georgia; died in Barnesville, Ga.

Aug. 19.—ANDERSON, Rev. H. T., a clergyman of the "Disciples," or Campbellites, an eminent scholar and author; died in Washington, D. C., aged 61 years. He was the author of an interlinear translation of the New Testament, and, during the last five years, had been engaged in revising his work, taking for his basis the Tischendorf text, which he had almost concluded.

Aug. 19.—JONES, Rev. EVAN, a Baptist clergyman, for fifty years missionary to the Cherokees; died at Tahlequah, Indian Territory, aged 83 years. He was a native of Wales, born in May, 1789, engaged in mercantile business in London for a few years, but removed to America in early manhood. Having received an appointment as missionary to the Cherokees, he gave his whole soul to the work, and his labors were not only largely instrumental in the preservation of peace among that tribe, but were blest to the conversion of several thousand of the sons and daughters of the forest.

Aug. 23.—CURTIS, Rev. THOMAS F., D. D., a clergyman, professor, and author; died in Cambridge, Mass., aged 56 years. He was born in England in 1816, and was a son of Rev. Thomas Curtis, who was the publisher of the "Encyclopædia Metropolitana." The elder Curtis emigrated to the United States in 1829, and became a Baptist clergyman and author of some repute in South Carolina. The son (Rev. T. F. Curtis) was educated in one of the Southern colleges, and studied theology there. He was subsequently settled for several years in the ministry near Boston, and was called thence to a professorship in Lewisburg University, Pa., where he served for ten or twelve years as Professor of Theology in the Theological Department. He had published two works of general acceptance in the denomination, "Communion," and "Progress of Baptist Principles in the last Hundred Years." In 1865 he resigned

his professorship, and in 1867 published a work on "Inspiration," in which he took similar views with Bishop Colenso, going beyond him in some particulars, repudiating both the inspiration and authenticity of much of the Old Testament and part of the New. He removed to Cambridge, Mass., in 1867, where he was soon after attacked with softening of the brain, and died after a protracted illness.

Aug. 26.—LELAND, Z. A., an eminent lawyer and jurist of the State of New York; died at Strachan Place, Saratoga, aged 76 years. He was a native of Vermont, and received a liberal education, which was completed at Middlebury College, under the auspices of Governor Leland, who was then one of the officers of that institution. He was admitted to the bar of New York in 1820, and in a professional career of over thirty years held a distinguished position, in a range of practice which brought him in frequent contact with B. Davis Noxon, John C. Spencer, John A. Collier, Dudley Marvin, and others of like distinction as jurists and advocates. He was a strong and vigorous thinker, a thoroughly-trained lawyer, and an able and effective debater. Though he was an ardent politician, he had no taste for public office. In 1838 he yielded to the wish of the bar and the personal request of Governor Marcy, in accepting the place of presiding judge of the Steuben County courts; and it was his singular good fortune to have almost every judgment he rendered, from which an appeal was taken, during a term of five years, unanimously affirmed by the appellate tribunals. He was a member of the Legislature in 1842 and 1843, but from that time declined all official positions, and after an honored and successful professional career in the city of Auburn, to which he had removed from Bath in 1843, retired from active life and spent his later years at his home on the Hudson.

Aug. 26.—MATTHEWS, Mrs. —, mother of Schuyler Colfax, Vice-President of the United States; died at South Bend, Ind. She was a lady of gentle, dignified, and refined manners, and was held in high esteem by a very wide circle of friends and acquaintances. Her first husband, Schuyler Colfax, father of the Vice-President, was an officer of the Mechanics' Bank in New York City, where he lived and died, his only son being born four months after his death. Mrs. Colfax several years afterward married Mr. Matthews, and removed to the village of New Carlisle, in Northern Indiana. During the minority of Vice-President Colfax the family lived together, and, when Mr. Colfax became Speaker of the House of Representatives, Mrs. Matthews and daughter accompanied him to Washington, his wife being then a confirmed invalid. Mrs. Matthews was a woman of more than usual intelligence, a fond but firm mother, and had the entire confidence, esteem, and filial devotion of her distinguished son during all the trying years of his early life and his later manhood.

Aug. 26.—**PHELPS, NOAH A.**, a prominent political leader in Connecticut; died in Simsbury, aged 84 years. He was born in Simsbury, October 16, 1788, graduated at Yale College in 1808; studied law, and was admitted to the bar about 1811. He served in the Democratic interest in the State Legislature and Senate; was Sheriff of Hartford County, from 1820 to 1828; Collector of Customs at Middletown from 1829 to 1841, under the Administrations of Jackson and Van Buren; and Secretary of State of Connecticut in 1843 and 1844. About the year 1845 he compiled and published, at great labor and expense, a "History of Simsbury, Granby, and Canton, from 1642 to 1845," a work replete with facts and incidents worthy of preservation.

Aug. 27.—**STEWART, REID T.**, second-lieutenant Fifth Cavalry, U. S. A.; was killed by the Apache Indians, aged 22 years. He graduated the first in his class of seventeen in the High School of Philadelphia, in June, 1867. Soon after, he entered the Military Academy at West Point, from the Erie District, Pa., and graduated No. 8 in a class of forty-three in June, 1871, and was assigned to Company F, Fifth Cavalry. He joined his regiment on the march to Arizona, November 30, 1871. He was transferred to Company M, and at last reports was at Camp Crittenden, some sixty miles from the post of Tucson, and in the absence of the captain and first-lieutenant had charge of the company. His last letters from this extreme outpost of our Army spoke of our scarcity of troops, and of the proximity of the savages of that region. Lieutenant Stewart was a young man of remarkable talent, and a future apparently full of promise and hope.

Aug. 27.—**WILLIAMS, Colonel MADISON JACKSON**, a prominent citizen and journalist of Alabama; died at Shelby Springs. He was born in Greenville, Butler County, Ala., in 1835. In 1854 he removed to Selma, where he was first employed in the office of the *Selma Reporter*, a newspaper owned and edited by Colonel N. G. Shelley, but of which in a short time he became part owner, and after Colonel Shelley's death sole proprietor. After the war he established the *Selma Daily Times*, which he edited and conducted with marked ability until the year 1870, when he disposed of it to its present management. In 1866 he was elected Mayor of the city of Selma, and subsequently on two or more occasions served as a member of the Council of that city—a position of honor and trust that he held at the time of his death. In February, 1871, he purchased the *Montgomery Mail*, which paper was soon after consolidated with the *Advertiser*.

Aug. 31.—**PHELPS, GEORGE D.**, an eminent merchant and philanthropist of New York City; died in Simsbury, Conn., aged 69 years. He was a brother of the Hon. Noah A. Phelps, whose death occurred five days previous. The subject of this sketch was a man of active Christian benevolence, and was one of the

founders of several of our national benevolent societies. In 1831 he was the first President of the New York Young Men's Society, which was the precursor of the Young Men's Christian Associations.

Aug. —.—**BROWN, Rev. THOMAS B.**, a venerable Baptist clergyman of Ray County, Ind., for more than fifty years in the ministry; died in that county, aged 85 years. He had been a soldier in the War of 1812.

Aug. —.—**CRAIG, JOHN**, a wealthy and benevolent citizen of Rochester, N. Y., who, besides liberal gifts during his life, bequeathed \$105,000 to various educational institutions of the Universalist denomination; died in Rochester.

Aug. —.—**GROVES, JOHN**, a centenarian of Portland, Me.; died there, aged 113 years. He was a native of Martinique, W. I., came to Maine while a boy, before the Revolutionary War, and was converted to Christianity when ninety-eight years of age.

Aug. —.—**JONES, Rev. JOHN TEOUNSEH**, a Baptist clergyman, a converted Ottawa Indian, educated at the Hamilton Literary and Theological Institution (now Madison University); died in Kansas, aged 59 years. He left his entire property, amounting to \$60,000, to aid in founding a theological department in Ottawa University, Kan.

Aug. —.—**WHITNEY, ASA**, an enterprising and energetic merchant, for many years resident in New York, whose attention was early called to the necessity and feasibility of a Pacific Railroad, and who by public addresses, and earnest appeals and petitions to Congress, succeeded in procuring the appropriations for the first explorations and surveys, which made its necessity apparent; died in Washington, D. C., aged 75 years.

Sept. 3.—**DE LEON, DAVID CAMDEN, M. D.**, a surgeon in the U. S. Army; died at Santa Fé, New Mexico, aged 50 years. He was born and educated in South Carolina; graduated at the Medical School in Philadelphia, and entered the U. S. Army as assistant surgeon. After passing through the Seminole War, he was stationed for several years on outposts of the Western frontier. At the breaking out of the Mexican War he went with General Taylor to the Rio Grande, was present at most of the battles which led the victors to the gates of Mexico, and entered that city when it surrendered, riding at General Scott's left hand. For these services, as well as for gallantry in action (when commanding officers were killed or wounded and he took their place), Dr. De Leon twice received the thanks of Congress, but was again assigned to frontier duty in Mexico, on the ground of his great energy and hardihood. At the outbreak of our civil war he resigned his commission, and was placed at the head of the Medical Department of the Confederate army. At the close of the war he went to Mexico, but after a year's residence in that country he returned to New Mexico, where he

had been stationed for many years, and owned property, continuing in the practice of his profession until his death. He was a man of fine literary culture, and a vigorous writer.

Sept. 5.—CARRIGAN, ANDREW, a prominent citizen of New York; died in that city. He was of Irish origin, had been a Commissioner of Emigration since 1847, and for many years president of that board, his zealous supervision and sound judgment doing much toward the perfection of that organization. The Emigrant Code of the State of New York, the adoption of which was largely due to his energy and statesmanlike foresight, remains the best monument of his wisdom and benevolence.

Sept. 6.—ADAMS, JONATHAN, an eminent civil engineer; died in Concord, N. H., aged 74 years. He was a native of Massachusetts, and commenced engineering at an early age, devoting himself closely to his profession through life. Before the advent of railroads he was for some years engaged in superintending the construction of canals in Virginia and other Southern States. He entered upon railroad engineering immediately upon its introduction into this country, and applied himself especially to that work until within a few weeks of his death. To enumerate the railroads upon which he has been actively employed, or concerning the construction of which he has been consulted, would be to name many of the most important lines in New England and New York. While engineer of the Northern road of Massachusetts, he became pleasantly acquainted with New Hampshire people, and for a long time made Lebanon his home, so far as his profession would allow. A short time before his death he inspected the route of the proposed branch railroad from Meredith to Conway. With an experience of over half a century, it is unnecessary to say that he was one of the most accomplished civil engineers in the country. Mr. Adams resided for a short time in Cambridge, Mass., where his son, then a member of Harvard College, was drowned early in 1871. From Cambridge he removed to Concord, where a residence for him was in process of construction at the time of his death.

Sept. 7.—STRONG, JULIUS L., a member of Congress from the First District, Connecticut; died in Hartford of cerebro-spinal meningitis, aged 44 years. He was elected to Congress in 1869, and reelected in 1871.

Sept. 10.—BROWNE, REV. SAMUEL J., a wealthy Presbyterian clergyman, formerly a minister of the United Brethren; died at Harrison Junction, Ohio, aged 85 years. He was born in England, March 19, 1788, and came to Cincinnati in 1798 with his father, Rev. John W. Browne, who was an English Independent minister. For many years, Samuel was a member of the United Brethren, but, parting with them on the question of secret societies, he joined the Presbytery of Cincinnati about four years since. He accumulated a large fortune by the rise of real estate in that city, and bequeathed the

sum of \$150,000 for the establishment of a university to bear his name, also land whereon to erect the building, and an endowment for professorships. He further gave \$12,000 and a lot for the erection of a church, and provided for a free school, with an annuity of \$600 for a teacher.

Sept. 12.—SKELLEY, SYLVESTER, a printer, journalist, and accomplished proof-reader; died in Brooklyn, L. I. His life had been an eventful one. He fought under Don Carlos in Spain, and, on the defeat of his cause, departed for France, where he made his way hundreds of miles on foot, to the seaboard, and took passage for London. Here he continued his occupation for a time as printer, but subsequently decided to emigrate to the United States. Arriving in New York, he obtained employment on the *World* and *Tribune*, on the former in the capacity of proof-reader. He was in San Francisco at the time the Vigilance Committee cleared the city of the thieves, and took an active part on the side of law and order. He became part proprietor of the *Alta Californian*, and as a journalist obtained an enviable reputation in the Golden City. At the outbreak of the war he enlisted, and as a private soldier fought in all the principal battles for the Union, receiving a commission at the close of the war, and then returning to his own profession. He was known as one of the best readers in the profession, and was a complete encyclopædia in general information.

Sept. 13.—DURFEE, BRADFORD M. C., a young merchant of great enterprise and philanthropy; died in Fall River, Mass., aged 29 years. In addition to local gifts, he built the fine dormitory at Yale College, known as Durfee Hall.

Sept. 17.—MARGARET —, a woman of color, the oldest woman in Philadelphia; died there, at the advanced age of 115 years. She was a member of Shiloh Baptist Church.

Sept. 23.—LOGAN, JOHN WESLEY, Bishop of the Zion M. E. Church, Syracuse, N. Y., a man of color; died at Saratoga, aged 62 years. He was a native of North Carolina, and at twenty years of age was still a slave. His master ordering him to go to church one day, he started for Canada in pursuit of one. In the early anti-slavery days he was an active and zealous agent with Gerrit Smith, Lewis Tappan, Putnam, Wright, and others, in the "Underground Railroad." He had resided in Syracuse for twenty-five years, and was a man highly-respected.

Sept. 23.—PATTERSON, REV. JONAS, D. D., a United Presbyterian clergyman; died at New Wilmington, Pa. He was president of Westminster College in that place for about seven years prior to 1866.

Sept. 25.—GREEN, REV. DAVID D., a Presbyterian clergyman and missionary; died at Doniphan, Kansas, aged 44 years. He had been, for a period of ten years, a faithful laborer as a missionary of the Board of Foreign Missions at Ningpo and Hang-Chow, China. Having

found it necessary to visit this country for a short period, he spent two years in organizing and developing the church at Doniphan, and was making preparations to return to his work in China, when he was seized with typhoid fever which, as above mentioned, resulted in his death. He was a man of remarkable purity of character, and fervent piety.

Sept. 26.—**AYRES, DANIEL**, an active and energetic business-man, of New York City, long at the head of the iron-trade; died there, aged 82 years. He was a native of New York, and his business experience was commenced in the celebrated iron-house of Blackwell & McFarlane, in Coenties Slip. Starting with them in the capacity of an errand-boy, he became a member of the firm before passing his twentieth year, and before attaining his thirtieth he was at the head of the firm. Blackwell and McFarlane died, leaving young Ayres and the son of McFarlane to carry on the business, and so successfully did they do it that in a short time their reputation for far-seeing enterprise was known among the trade throughout the country. The iron-work for many of the heaviest undertakings of the day was done by them, and Fortune seemed smiling upon all their efforts, when the failure of the managers of the Morris Canal to meet their liabilities brought ruin upon the house. Subsequently, however, the liabilities were all met, and Mr. Ayres became a member of the firm of Boorman & Johnson, with which house he continued until 1848, and retired with a competency. He was a man of fine literary tastes, and delighted in philanthropic enterprises.

Sept. 29.—**COAN, Mrs. FIDELIA CHURCH**, a missionary of the American Board, in the Sandwich Islands; died at Hilo, aged 62 years. She was born at Churchville, Monroe County, N. Y., February 17, 1810, was educated in Rochester, Palmyra, and Canandaigua, and in 1834 was a teacher in the Female Seminary in Middlebury, Vt. Soon after, she was married to the Rev. Titus Coan, and with him sailed as a missionary to the Hawaiian Islands, where she remained a faithful and earnest worker until her death, with the exception of the brief interval of a visit to her native land in 1870. Mrs. Coan was an accomplished scholar and a lady of great moral worth.

Sept. —.—**ALLEN, Rev. LORENZO B., D. D.**, an eminent Baptist clergyman and teacher; died in Minneapolis, Minn., aged 60 years. He was a native of Maine, the son of a Baptist clergyman; graduated from Waterville College (now Colby University) in 1835, with high honors, studied theology at Newton Theological Seminary, was settled as a pastor at Thomaston, and three or four other places in Maine, for ten or twelve years, and then removed to the West, where his fine reputation for scholarship and general executive ability soon led to his being called to the presidency of Burlington University, Burlington, Ia. He strug-

gled for some years with the difficulties inseparable from the position of head of an unendowed Western college, which he was expected, by sheer force of will, to raise to an equality with the old and richly-endowed colleges of the Eastern States; but the strain was too severe, and with impaired health and a feeling of discouragement he was obliged to relinquish the task. In 1866 he resigned, and removed to Minneapolis, where he built up a flourishing female seminary.

Oct. 1.—**ASPER, JOEL F.**, member of Congress from Missouri; died at Chillicothe, in that State. He was elected from the Seventh District, in the fall of 1868, by a majority of over 7,000.

Oct. 1.—**CROSS, GEORGE D.**, a prominent citizen and jurist, of Rhode Island; died in Westerly, R. I., aged 74 years. He was born in that town, January 24, 1799, and was in active business there during most of his life. He served six terms in the General Assembly; was one of the ten State Senators under the charter in 1828, was Chief Justice of the Court of Common Pleas for Washington County, and in 1840 was one of the commissioners for fixing the boundary-line between Connecticut and Rhode Island. In 1842, and again in 1853, he was elected a member of the conventions called to frame and amend the State constitution. He served as Senator, under the constitution, in 1849, and throughout his life held many offices of honor and trust in his native town, interesting himself especially in the matter of free schools, of which he was a strong advocate.

Oct. 1.—**SMITH, WILLIAM PRESCOTT**; died in Baltimore, Md. He was born there in 1822, and received a common-school education. He entered political life as a Whig, and was an ardent supporter of his party. In 1850 he received an appointment on the Baltimore & Ohio Railroad, and was henceforth connected with it and railroad interests generally, long holding the position of master of transportation on the Baltimore & Ohio Railroad; and for some years before his death that of general manager of the line between New York and Washington. Mr. Smith held the office of Collector of Internal Revenue for a brief period in 1866, and in 1867 visited Europe. He contributed during many years to the press, and evinced a warm interest in the progress of literature and science.

Oct. 2.—**EMERSON, BENJAMIN D.**, an author; died at Jamaica Plain, Mass., aged 87 years. He was a graduate of Dartmouth College, and was associated with his brother in the preparation of Emerson's Arithmetics. According to the provisions of his will, the bulk of his property is to be given to religious and educational purposes, among which Dartmouth College receives \$100,000.

Oct. 2.—**JUDD, Mrs. LAURA**, wife of Dr. G. P. Judd, a former missionary of the A. B. C. F. M., to the Sandwich Islands; died at Honolulu, aged

68 years. She was born in Plainfield, N. Y., April 2, 1804, and in November, 1827, sailed for the Sandwich Islands with her husband, where she lived and labored for more than forty years. Mrs. Judd was a woman of sound judgment, and thoroughly devoted to the missionary work.

Oct. 2.—**POWERS, Rev. PHILANDER O.**, a Congregationalist clergyman, and missionary of the A. B. C. F. M. to Syria; died at Kessab, near Antioch, aged 67 years. He was born at Phillipstown, Mass., August 19, 1805; graduated at Amherst in 1830, and at Andover in 1834. The same year he sailed for missionary ground, arriving at Smyrna in January, 1835. His career was unusually varied, as he labored not only in Broosa, but in Trebizond, Siras, Antioch, Oorfa, Marash, and Kessab. Upon the illness of his wife he was compelled to return for a short period to this country, during which he held a pastorate in East Windsor, Conn. He was the author of a valuable collection of hymns in Armeno-Turkish.

Oct. 3.—**CROSBY, First-Lieutenant EBEN**, Seventeenth Infantry, U. S. A.; was killed by the Indians, near Heart River, fifteen miles from Fort Rice, on returning from the Yellowstone Expedition. Lieutenant Crosby served with distinction during the entire war, losing an arm on the field of Gettysburg. He was appointed second-lieutenant Forty-fourth Infantry July 28, 1866, and May 27, 1869, was transferred to the Seventeenth Infantry, since which time he had served with honor to himself and to the regiment.

Oct. 3.—**MITCHELL, Rev. W. H.**, a prominent clergyman, of the Southern Presbyterian Church; died at his residence in Florence, Ala., aged 59 years. At the time of his death he was president of the Female College in that place.

Oct. 5.—**ADAMS, RODNEY L.**, a New York State journalist; died in Geneva, N. Y. He was born in Wilkesbarre, Pa., January 27, 1816. His newspaper career began about the year 1840, in the office of the *Rochester Democrat*. Subsequently, he edited the *Yates County Whig* (now *Chronicle*), the *Lyons Republican*, the *Syracuse Journal*, the *Fulton Patriot*, the *Geneva Courier*, and in the summer and fall of 1872 the *Rochester Liberal Republican*. He was a man of earnest convictions, and a vigorous, pointed writer. He was a Republican from the organization of the party, and, previous to that, had labored steadily on the side of liberty and reform.

Oct. 9.—**DEMING, HENRY C.**, an eminent scholar and author, formerly member of Congress from Connecticut; died at Hartford, aged 57 years. He was born in 1815, in Middle Haddam, and graduated at Yale College in 1836, and at the Harvard Law School in 1838. He served in the State Legislature in 1849 and 1850, and again from 1859 to 1861; and in the latter year he was elected Speaker. In 1861 he was a member of the Senate. He was elect-

ed by the Democrats to the office of mayor for six years. In 1861, on the breaking out of the war, he went to New Orleans as colonel of the Twelfth Regiment, Connecticut Volunteers, and participated in the capture of that city. In October, 1862, he was appointed Mayor of New Orleans, but resigned in February, 1863—at the same time resigning his office in the army, and returning home. In April, 1863, he was by the Republicans elected a member of the Thirty-eighth Congress. He served on the Committee on Military Affairs, and was made chairman of the Committee on Expenditures in the War Department. He was re-elected to the Thirty-ninth Congress, in which he served on the same committees, and also on the committee appointed on the death of President Lincoln. He was also one of the committee appointed to attend the funeral of General Scott in 1866. In the same year he was a delegate to the "Loyalists' Convention" in Philadelphia. At the time of his death he was United States Collector for his district. Mr. Deming's forensic ability was marked and widely known. He was one of the most eloquent public speakers in New England, and was a gentleman of fine culture, and of refined literary taste. Thirty years ago he translated, for the American public, Eugene Sue's two great works, "The Mysteries of Paris" and "Le Juif Errant."

Oct. 9.—**WELLES, Colonel C. F.**, a railroad and hydraulic engineer of some note; died at Auburn, N. Y., aged about 50 years. He had for many years past been engaged in developing railroad enterprise in Western Pennsylvania and Western New York, and was attending a meeting of railroad directors at Auburn when he died. He was one of the contractors for the construction of the Nassau Water-works of Brooklyn, L. I.

Oct. 10.—**WILLIAMS, Mrs. CATHERINE R. (ARNOLD)**, a celebrated authoress and poetess; died at her residence in Johnston, R. I., aged 82 years. She was born in Providence, R. I., near 1790, and was a granddaughter of Hon. Oliver Arnold, formerly Attorney-General of Rhode Island. Thrown upon her own resources at the age of twenty-three, she turned to her pen as a means of support, but before her reputation as a writer was fairly established she married Mr. Williams, and removed to the western part of New York State. The marriage, however, proved unfortunate, and two years after she left her husband, and with an infant daughter returned to the home of her childhood, and again took up her pen. Her first publication was a volume of "Original Poems" (1828), which proved a decided success, and was quickly followed by "Religion at Home" (1829), which passed through three editions. In 1830 she published her "Tales, National and Revolutionary," a second series of which was issued in 1835; "History of Fall River" (1838); "Biography of Revolutionary Heroes" (1839); "Neutral French; or, the

Exiles of Nova Scotia" (1841); and "Annals of the Aristocracy of Rhode Island" (1843-'45).

Oct. 11.—LADD, Rev. DANIEL, a Congregationalist clergyman, and missionary of the American Board, to Turkey; died at Middlebury, Vt., aged 68 years. He was born at Unity, N. H., January 22, 1804, but at twelve years of age removed with his father's family to East Burke, Vt. He graduated at Middlebury College in 1832, and at Andover Theological Seminary in 1835. The following year he sailed for Cyprus, under appointment from the American Board, but after five years the mission was discontinued, and he was stationed for nine years among the Greeks and Armenians at Broosa; later he spent fifteen years at Smyrna, and several years at the station at Constantinople. After thirty-two years of foreign service, he returned with his family to the United States, in 1867. For a year he supplied a church in East Burke, Vt., and then resided in Middlebury until his death.

Oct. 11.—POTTER, ASA, a prominent citizen of Kingston, R. I.; died there, aged about 68 years. He was a native of Kingston, and a member of the Potter family so conspicuous in the politics of the State. He graduated at Brown University in 1824. In 1851 he was elected Secretary of State, and reelected the two following years. For some years Mr. Potter resided in New York.

Oct. 14.—KENNEDY, Rev. J. F., a Methodist clergyman, financial agent of the Ohio Wesleyan University; committed suicide during a paroxysm of insanity, at his home in Delaware, Ohio. He was recently presiding elder of the North Ohio Conference.

Oct. 18.—CHAPMAN, Rev. GEORGE T., D. D., an Episcopal clergyman; died at his residence in Newburyport, Mass., aged 84 years. He graduated at Dartmouth in 1804, and, commencing the study of theology, entered the Episcopal ministry, and formed a parish at Lexington, Ky., remaining there until 1830. Henry Clay was one of his parishioners, and a close tie of friendship was formed, which continued until Mr. Olay's death. In later years he formed parishes in Bellows Falls, Vt., Worcester, Mass., Newark, N. J., Lee, Mass., and several other places. He had resided in Newburyport for fifteen years.

Oct. 18.—O'CONNOR, Right Rev. MICHAEL, Roman Catholic Bishop of Pittsburg; died at Woodstock College, near Baltimore. He was born in the County of Cork, Ireland, in 1810, and was educated at the Propaganda, Rome, where he was ordained priest. He came to this country, and was attached as missionary to the diocese of Philadelphia, and when Pittsburg was erected into a diocese, in 1843, he was ordained bishop, which place he held until his resignation, in May, 1860. He entered the novitiate of the order of the Jesuits about twelve years ago, in Germany, when his former rank was kept by him unknown. He was admitted into the Order of Jesuits, and

returned to this country, when he was made associate to the provincial society here. After holding the pastorate of St. Ignatius's Church, in Baltimore, for some years, he retired to Loyola College, until his health compelled him to go to Woodstock.

Oct. 20.—FARWELL, STEPHEN T., an eminent citizen of Cambridge, Mass., for twenty-seven years Treasurer of the American Educational Society; died in Cambridge. He was for some years a member of the Massachusetts House of Representatives and of the State Senate, and for twenty-four years the general agent of the Massachusetts Bible Society.

Oct. 21.—JOHNSON, Rev. JOHN W., a Baptist missionary in Swatow, China; died there, aged 53 years. He was born in Calais, Me., in 1819; graduated at Amherst College, and at Newton Theological Seminary; was ordained at Calais in 1847, and the same year sailed for China. In 1858 he was compelled to return to the United States, in consequence of a sunstroke, received in Hong-Kong. After a year spent in this country, he returned to his work, and in 1860 was the victim of a second sunstroke in Swatow, and again obliged to come home in 1869. In June, 1871, he returned for the last time to his post.

Oct. 24.—BIDWELL, MARSHALL S. an eminent lawyer and politician, died in New York City, aged 74 years. He was a native of New England, and at an early age migrated to Canada, where he practised law, rose rapidly in his profession, and entered political life while still a young man. He was returned several times from Kingston and Toronto to the Canadian Parliament, and during two terms was Speaker of the House. He was leader of the Liberal party previous to and during the rebellion of 1837, and became so formidable to the Government that he was ordered to leave Canada. He accordingly came to New York city, where he subsequently practised law in the higher courts. Mr. Bidwell was considered one of the ablest and best men at the bar. The late Daniel Lord once said that he esteemed his opinion more highly than that of any other member of the profession on intricate points. When the Liberal cause triumphed in Canada, he was urged to return and reënter political life, but he only made occasional visits there in connection with property he owned at Kingston. He was also suggested as a suitable Governor for the new Province of Ontario, and Sir John Macdonald, the Premier, stated that he would be the right man had he become a permanent resident in the New Dominion. Mr. Bidwell was at the time of his death president of the oldest savings-bank in New York City, a director in the American Bible Society, and a prominent member of the Historical Society, before which he delivered an address a short time before his death. Mr. Bidwell was endowed with a vigorous intellect, severely logical and judicial, while his strict integrity, and purely

consistent life, won for him the honor and respect of all who came in contact with him.

Oct. 24.—SCHOULER, General WILLIAM, a prominent journalist and politician of Massachusetts; died at Jamaica Plain, Mass., aged 58 years. He was born in Renfrewshire, Scotland, in 1814. While yet a lad he was brought to this country by his father, who established a cloth-printing business on Staten Island, N. Y. Subsequently, the family removed to West Cambridge, Mass., where they followed the same trade. Young Schouler, who early manifested a decided taste for literary pursuits, studied hard, and contributed many articles to the journals of the time. In 1842 he purchased the *Lowell Courier*, which he edited for six years, when he became editor of the *Atlas*, a Whig paper published in Boston; he was also associated with Thomas M. Brewer in its proprietorship and management. The *Atlas* became at once the leading Whig journal of New England, and vigorous articles appeared in it from the pens of such leaders as Rufus Choate, Edward Everett, and the Storrs. It was the favorite journal of Daniel Webster, who honored Schouler with his friendship, and whose speeches were always considered correctly printed only in the *Atlas*. During this period, Schouler represented Boston several times in the Legislature, and was a delegate to the Constitutional Convention of 1853. Soon after the election of Franklin Pierce to the presidency, in 1852, the power of the Whig organ began to wane, and Schouler went to Ohio, where he became connected with the *Cincinnati Gazette*. Though his reputation as a journalist was established, he did not thoroughly succeed in the West, and returned to Boston in 1858, and edited the consolidated *Atlas and Bee*. In 1860 he was appointed Adjutant-General of the State of Massachusetts—a position which he had also held in Ohio under Governor S. P. Chase. He served Massachusetts during the trying years of the civil war with great vigor and usefulness; and, as an intelligent second to Governors Banks and Andrew, he did much to prepare the State for the struggle in which it bore so noble a part. General Schouler published several works, the most notable of which were "Massachusetts in the Civil War," and "Political and Personal Recollections."

Oct. 25.—JOHNSTON, Hon. WILLIAM F., Governor of Pennsylvania from 1848 to 1852; died in Pittsburg.

Oct. 30.—METCALF, Rev. KENDRICK, D. D., an Episcopal clergyman and educator; died in Geneva, N. Y. He graduated at Dartmouth College in 1829; was Professor of Latin and Greek Languages and Literature in Hobart College for a period of twenty-five years. He received the degree of Doctor of Divinity from Columbia College, in 1850.

Nov. 2.—McPHERSON, WILLIAM M., an eminent citizen of St. Louis, Mo.; died there. He was largely identified with the interests of St.

Louis, and widely known as a man of benevolent impulses and deep religious feeling.

Nov. 4.—GUION, Rev. ALVAH, an Episcopal clergyman of Brooklyn, N. Y.; died in that city, aged 77 years. He was born in Bedford, Westchester county, N. Y. About 1852 he removed to Williamsburgh, where he founded Grace Church, became its rector, and remained there until about five years since, when he organized the Guion Church Society, in Greene Avenue, Brooklyn, erected the building, and ministered to its congregation, until failing health compelled him to retire in part from the work about a year since.

Nov. 7.—KIMBALL, CRAFT P., M. D., a pioneer settler, physician, and philanthropist, of Northern New York; died in Rutland, N. Y., aged 85 years. He served as surgeon in the army in the War of 1812, about which period he settled near Watertown, Jefferson County, where he lived for sixty years. His practice extended over all the adjoining towns, and at the time of his death he was the oldest physician in that region.

Nov. 10.—WRIGHT, Rev. EDWARD, a Presbyterian clergyman and teacher; died at Bloomington, Ind., aged 68 years. He was born in New York City, August 14, 1804, was educated for business, and became a partner in a prosperous mercantile house at the age of twenty-four, but upon his conversion abandoned his bright business prospects, and, having studied privately for a time, entered Princeton Seminary in 1833. In 1836 he was licensed by the Presbytery of Elizabethtown, and was first settled at White Plains. Removing thence to Southwestern Ohio in 1844, he preached in Reading, New Castle, and Pleasant Ridge; then being obliged to leave off on account of his health, he taught at Lexington, Ky., and at Clifton, Ohio. His health becoming somewhat restored, he again began to preach, and for nine years was a supply at Auburn, and adjacent points in the Presbytery of Fort Wayne. In April, 1865, he removed to White Rock, Ill., where he preached for three years. His health again failing, he removed to Bloomington, Ind., in June, 1868, in the vain hope that his strength might yet be renewed.

Nov. 11.—COE, ROBERT E., a young student of remarkable intellectual promise, died from the effects of an injury received at the gymnasium in New Haven, Conn. He was a son of Dr. Coe, for many years past secretary of the Home Missionary Society, graduated at Yale College in the class of 1872, and took a large number of the highest prizes, scholastic, literary, and social, in the gift of the college. He also won the prize offered for "the most graceful gymnast," at the exhibition in his sophomore year. His love of athletic sports probably hastened his death. While practising in the gymnasium a few weeks previous, his foot slipped, throwing him violently upon his head, and a severe illness supervened, from which he did not recover.

Nov. 18.—**HITCHCOCK, FRANK MURDOCH**, a promising young actor; died in Philadelphia. He was a member of the Arch Street Theatre Company, and his last appearance on the stage was made at that house, on the 9th inst., as *Lionel Lynz*, in "Married Life."

Nov. 18.—**VAN RENSSELAER, WILLIAM P.**; died in New York City, aged 67 years. He was the second son of the Hon. Stephen Van Rensselaer, of Albany, and an elder brother of the late Rev. Dr. Cortlandt Van Rensselaer. His mother was a daughter of Judge Paterson of New Jersey. After graduating at Yale College, in 1824, he spent four years in Europe travelling extensively, and pursuing legal studies in Scotland and Germany. For a number of years after his return, he resided in Albany and in Rensselaer County; but the last twenty years of his life were spent in Rye, Westchester County. He had left his home on Manursing Island, for the city, only a week before his death. Mr. Van Rensselaer inherited from his father many noted characteristics, prominent among which was his philanthropic tastes. His intellectual gifts were of a high order, his impulses noble, and he was equally firm in rebuking injustice and approving that which was good.

Nov. 14.—**STEVENS, Lieutenant-Colonel AHERTON H., Jr.**, U. S. Vols.; died at East Cambridge, Mass. He was formerly in command of the First Battalion of Massachusetts Cavalry, and Provost-Marshal of the Twenty-sixth Army Corps. He was the first Union officer to enter Richmond, and received its surrender from Mayor Mayo.

Nov. 19.—**BREWER, Rev. JOSIAH, D. D.**, a Congregationalist clergyman, and one of the earliest missionaries of the A. B. C. F. M. in Turkey; died in Stockbridge, Mass. He was a native of Berkshire County, graduated at Yale College, where he was afterward a tutor, and in 1830 sailed for the East, beginning his labors at Smyrna, the capital of Asia Minor. It was but three years after the Greek Revolution. The battle of Navarino had destroyed the Turkish Navy, and, in breaking the pride of the Moslem, had opened the door for influences from abroad. Mr. Brewer was the first to introduce schools and the printing-press. He established the first paper in Smyrna, where there are now a number in different languages. The schools which he founded have been the model for others, and have done much to introduce European education into the Turkish Empire. After a few years he returned to this country, and had since resided in New England—a part of the time in New Haven and Middletown, Conn., and for the last few years in Stockbridge, Mass.

Nov. 19.—**COCHRAN, GEORGE, M. D.**, an eminent physician of Brooklyn, L. I.; died there, aged 41 years. He was born in County Derry, Ireland, in 1841; was educated at Foyle College, in the north of Ireland, graduated at a medical-school in Glasgow, and shortly after

left for this country, where his uncle, Dr. Gillfillan, and his elder brother, Dr. John Cochran, had been in practice some years. Upon the death of the latter, George succeeded to a large practice, and secured the confidence of his brother's patrons. During the existence of the Metropolitan Police Commission, Dr. Cochran was appointed police-surgeon, and assigned to duty in Brooklyn, having the confidence of the commissioners and the police force. At the close of his public labors in this capacity, ex-Mayor Kalbfleisch appointed him Health-Officer of Brooklyn, under a law which restored to Brooklyn the control of its Health Department, and in this position he was untiring in his efforts to meet the difficult and exacting duties resting upon him. Dr. Cochran was also for years a visiting physician in the City Hospital of Brooklyn.

Nov. 21.—**DIMMICK, or DOMINICK, MILO M.**, a politician and political leader from Central Pennsylvania, died at Mauch Chunk. He was a native of Pennsylvania; and had been active in the politics of the Nineteenth Congressional District, which he represented in Congress for two terms, 1849–1853.

Nov. 22.—**OSTRANDER, Rev. HENRY**, an able and venerable clergyman of the Reformed (Dutch) Church; died near Saugerties, N. Y., aged 90 years. He graduated at Union College in 1799, was licensed to preach in 1800, and very soon thereafter settled as pastor of the Reformed Church of Coxsackie. He remained in this position till 1812, when he became pastor of the Reformed Church of Oaatsban, Ulster County. He served this church as its pastor till 1862, a period of fifty years—the Reformed Church of Saugerties, which was erected in 1825, being also under his pastoral care till 1840, when it became a separate charge. Retiring in 1862, at the age of eighty, Dr. Ostrander passed the residue of his life pleasantly and quietly at his home.

Nov. 23.—**DOD, Rev. CHARLES SQUIRE**, a Presbyterian clergyman, professor and college president; died at Centreville, La., aged about 61 years. President Dod was a native of New Jersey, a younger brother of the late Prof. Albert B. Dod, of Princeton. He graduated from Princeton College in 1833, studied theology in Princeton Theological Seminary, and, after a brief pastorate, was called to the professorship of mathematics and modern languages in Jefferson College, and about 1857 was elected president of the West Tennessee College at Jackson, Tenn., which position he retained until the closing of the college in consequence of the war. He subsequently removed to the Southwest, and had been of late, we believe, again in the pastorate. He had been connected with the Southern Presbyterian Church since the division at the beginning of the war.

Nov. 23.—**FISHER, Rev. GEORGE H., D. D.**, an eminent clergyman of the Reformed (Dutch) Church, died in Hackensack, N. J., in the

69th year of his age. He was a native of New Jersey, a graduate of Rutgers College, and New Brunswick Theological Seminary, and had passed nearly forty-eight years in the ministry. In 1849 he was president of the General Synod of the Reformed Church, which met that year in New York City.

Nov. 23.—ROBERTS, REV. JAMES A., a venerable Congregationalist clergyman; died in Berkley, Mass., aged 83 years. He was a native of England, and educated there. He was a man of quiet, reserved, and scholarly habits, had been ordained sixty years since as a Congregationalist minister, and had passed the last seventeen years of his life in Berkley.

Nov. 23.—WIGGINS, W. T., a young but very popular actor of St. Louis; died in that city, of small-pox, aged 27 years. He was a native of Rushville, Ill., and during the late war was a sergeant in the army. For the last six years he had acted the low-comedy parts in Ben de Bar's Theatre, St. Louis, and was very popular.

Nov. 24.—GRIFFITHS, WALTER S., a merchant, underwriter, and philanthropist of New York; died at his residence in Brooklyn, aged 64 years. He was born in New York City, in 1808, and, with the exception of a few years in Rochester, spent most of his life in Brooklyn. For some years he was a prominent forwarding merchant, and was one of the incorporators of the New York Warehousing Company. During the civil war he did much for the sick and wounded soldiers from Brooklyn. He took an active part in the great Sanitary Fair held at the Academy of Music, and was chairman of the War-Fund Committee. Always energetic and possessed of remarkable executive ability, he invariably pushed to a successful termination the work in which he happened to be engaged. When the Prospect Park Commission was first formed, he was an active member, and continued in the position until his resignation, about two years ago. Mr. Griffiths was the originator of the Home Life Insurance Company, of which he was president until his death. He was also one of the executive committee of the Chamber of Commerce, and a director of the Atlantic Fire Insurance Company.

Nov. 26.—DILLON, ROBERT JAMES, an eminent lawyer of New York City; died there, in the 68d year of his age. He was of Irish descent, educated in this country, and, having been admitted to the bar in early life, soon gained a reputation for his professional zeal and ability. He was deeply interested in many enterprises for improving the condition of immigrants, particularly those from Ireland. He was a trustee and director of the Irish Emigrant Society, and was afterward chosen counsel and vice-president of the Emigrant Savings Institution. His labors in both these institutions conducted greatly to elevate them to their present condition of power and influence. Mr. Dillon was a patron of the fine arts, and his refined taste and appreciation of landscape scenery con-

tributed in a great degree to the advancement of many of the delightful portions of the Central Park, in which he became especially interested before it was laid out, and for the establishment of which he labored assiduously before the Legislature in 1856; and for the advancement of which he toiled with varying earnestness, as commissioner, from his appointment in 1857.

Nov. 27.—JOHNSON, HENRY, a New York publisher; died at his residence in Gravesend, L. I., in the 58th year of his age. He was born near London, England, and came to this country when a youth, entering into the employment of the firm of D. Appleton & Co., publishers, with whom he remained over twenty years. About the year 1855, he became a partner of Robert Martin, in the serial and periodical publication of illustrated books, in which he met with great pecuniary success, the firm now being known as Johnson, Fry & Co. Mr. Johnson was largely identified with Brooklyn real estate, and was a careful, shrewd, and successful operator, and at the time of his decease was largely identified with the promotion and improvements of the new Boulevard running to Coney Island.

Nov. 30.—COLBURN, JOHN, Commodore United States Navy; died in New York City, in the 70th year of his age. He entered the service January 25, 1821, and was placed upon the retired list in October, 1864. Subsequently, he was promoted to the rank of commodore on the retired list, and was for a time light-house inspector.

Nov. —.—HENDERSON, REV. A. W., a Presbyterian clergyman and educator; died at Thornton, Ill., aged 60 years. He was a graduate of Union College and Princeton Theological Seminary, and, when his health failed in the ministry, he, with his wife, established a female seminary in Chicago, which was very successful. His delicate health requiring a change of climate, he spent several years abroad, and since his return he had devoted his energies to building up a church at Thornton, Ill.

Nov. —.—KUMMER, AGNES S., founder and principal of the Edgeworth School for Young Ladies, in Baltimore, Md.; died in that city. She was a native of Bethlehem, Pa., and was untiring in her zeal in the cause of education.

Nov. —.—LAMB, JOSEPH, a centenarian, long resident in Tennessee; died in Hawkins County, Tenn., aged 110 years.

Nov. —.—WOLVERTON, REV. THOMAS, a Baptist clergyman; died in Daviess County, Mo., aged 87 years, having preached for a period of sixty years.

Dec. 5.—JOHNSON, THOMAS A., senior justice of the Supreme Court of the State of New York; died at Corning. He was elected in the Seventh District, in 1859, for a term of fourteen years. He was also one of the Justices of the General Term.

Dec. 5.—MAXWELL, Brevet-General O. C., a

gallant officer of the late war; shot himself fatally in a fit of insanity, at Dayton, O. He was commissioned captain in the Second Ohio Infantry, August 31, 1861; was promoted to major, December 24, 1862; and the same month to lieutenant-colonel, and was honorably discharged on account of wounds, February 1, 1864. In March, 1865, he was appointed lieutenant-colonel of the One Hundred and Ninety-fourth Ohio; promoted to colonel, October, 1865; and the same month was mustered out with the regiment. His brevet rank dates from March 13, 1865. He afterward received a lucrative employment from President Johnson in the internal revenue service.

Dec. 7.—PIKE, SAMUEL N., a real-estate speculator, and distiller; died in Brooklyn, N. Y., aged 50 years. He was born in that city, of Hebrew parentage, was in business in Florida, Richmond, Baltimore, and St. Louis, and in 1848 began the business of rectifying and distilling whiskey in Cincinnati, where he built up an enormous trade, manufacturing at one time 12,000 gallons per day. Much of the money made in this way he invested in real estate in that city. Some of the handsomest buildings in Cincinnati were built by him, including the opera-house which bore his name, and which was burned a few years later. In 1863 Mr. Pike removed to New York, and went into business. He built the Grand Opera-House at Twenty-third Street and Eighth Avenue, and, in a little more than a year after its completion, sold it to James Fisk, Jr. At the time of his death, Mr. Pike was one of the largest real-estate operators in New York City, and was also a large manufacturer and dealer in whiskey.

Dec. 7.—WATKINS, GEORGE C., an eminent jurist of Arkansas; died at Little Rock. He was for many years Attorney-General and Chief-Justice of the Court of Appeals in that State.

Dec. 8.—CRAIG, ROBERT H., a brilliant actor; died at St. Louis, Mo., aged 31 years. He was born in New York, March 24, 1842, and made his first appearance on the stage at Barnum's Museum, September 10, 1860. He subsequently acted at the Boston Howard Athenæum, under Mr. E. L. Davenport's management. For several years he was connected with the Arch-Street Theatre, Philadelphia, where he began to rise into public favor as a comedian. In 1870 he came forward at the Boston Museum, and made a signal success as a burlesque actor, and with remarkably clever imitations of noted players. His last appearance in New York was made at the Grand Opera-House, as *Prince Fridolin*, in "*Le Roi Carotte*"—a part that did not admit of the display of the talent peculiar to the man, but in which, nevertheless, he was efficient and pleasing. He was said to be a painter of respectable talent, and the author of burlesques on the subjects of "*Faust and Marguerite*," "*Don Juan*," "*Hamlet*," and "*Camille*."

Dec. 9.—CONVERSE, Rev. AMASA, D. D., a Presbyterian clergyman and veteran religious journalist; died at Louisville, Ky., aged 77 years. He was, we believe, a native of Virginia. He was educated at Dartmouth College, whence he graduated in 1822. After completing his theological course, he was for some years in the pastorate at the South, whence he came to Philadelphia, and founded the *Christian Observer*, a Presbyterian weekly journal, old-school in theology, and Southern in its sympathies. He was a very able, though somewhat dogmatic editor, and, when the late civil war commenced, removed his paper to Richmond, Va., and, after the war, to Louisville, Ky., where it had continued to be the organ and exponent of the Southern Presbyterian Church. Mississippi College conferred the degree of D. D. upon him in 1846. His faculties and his power and vigor as a writer were retained to the very last week of his life.

Dec. 10.—SEEMULLER, Miss ANNE M. CRANE, a Baltimore authoress; died at Stuttgart, Germany. She was a native of Baltimore, and was better known by her maiden name, Anne Moncure Crane. Her principal works were, "*Emily Chester*," "*Opportunity*" (1867), and some brilliant stories and poems in the *Galaxy* and *Putnam's Monthly*.

Dec. 11.—LANDER, Miss SARAH W., an American artist and authoress; died in Salem, Mass. She was a sister of the late General Lander, and a woman of fine literary ability and taste. Of her series of sketches of foreign countries, published under the title of "*Spectacles for Young Eyes*," nearly 55,000 copies have been sold.

Dec. 13.—MARLEY, DANIEL, the largest dealer in antiques and articles of *certu* in this country; died in New York City, aged 63 years. He came to New York from England, about forty years ago, a friendless and penniless youth, and after some time, having earned a hundred dollars, he bought a lot of old goods, chiefly furniture, and opened a shop in Ann Street. One day Mr. N. P. Willis, the poet, in search of a desk, entered the shop, and, admiring the taste of the collector, made a notice of him in the *Mirror*, which drew attention to Marley and his wares. From that date his business flourished. He enlarged it from time to time, and, going up into Broadway, established himself, where his store became a great museum of elegant and costly antiques.

Dec. 14.—ROOT, Rev. N. W. TAYLOR, an Episcopal clergyman, and an accomplished writer; died of small-pox at the hospital in Portland, Me., aged 42 years. He was a native of New Haven, Conn., and son of Rev. David Root, of that city; graduated at Yale College, and for several years subsequently was employed on the editorial staff of the *New Haven Register*. During the late war he was chaplain of a Rhode Island regiment. He was a traveller of considerable experience, having visited Europe no less than eight times, during

one of his visits acting for six months as chaplain of the American Chapel at Paris. About six months previous to his death, he received an appointment as professor at Bowdoin College.

Dec. 14.—WALLBRIDGE, ARTHUR D., a young lawyer, poet, and author, of great promise; died in Rochester, N. Y., aged 29 years. He was a son of the Hon. S. D. Wallbridge, and was born in Gaines, Orleans County, N. Y., in 1848, graduated at Princeton, in 1867, studied law, and was admitted to the bar in 1871. He evinced poetic abilities of great promise, and was author, among others, of the well-known melodies, "Now I Lay me Down to Sleep," "Sleeping where the Daisies Grow," "Baby Meets Me on the Stairs," and "Gone." The first of these was once very popular.

Dec. 15.—CHOATE, HON. DAVID, a Massachusetts lawyer and jurist; died in Essex, Mass., aged 76 years. He was an elder brother of the eminent lawyer, Rufus Choate, and served with credit in both branches of the Massachusetts Legislature. He was a Republican, and held the position of Trial Justice for many years in Essex, and was an active and earnest supporter of benevolent institutions.

Dec. 16.—DE COUDRES, LOUIS, the oldest brass-founder in the country; died in Brooklyn, aged 83 years. At the early age of thirteen he was taken by James P. Allaire as his first apprentice, Mr. Allaire at this time carrying on a small brass and bell foundry. It was at this establishment the brass castings were made for McQueen, who had a machine-shop, and did the work for Robert Fulton, in applying his steam-engine to the first paddle-wheel steamboat, the Clermont of North River. Several years later Mr. Allaire started his steam-engine works in Cherry Street, New York, which became the leading establishment of the city, and famous over the entire country for the number and character of the engines it supplied to the first steamboats which ploughed the waters of this continent. Mr. De Coudres continued with Mr. Allaire more than half a century, some of the time as superintendent of the iron-foundry, and all of the time in charge of the brass-casting department, in which art his reputation was preëminent. This branch of the Allaire Works possessed for many years almost a monopoly in the trade of bell-casting. The first great fire-alarm bells put up in the City Hall Park were cast by Mr. De Coudres.

Dec. 17.—LOOMIS, REV. HUBBELL, one of the pioneers of Illinois; died at Upper Alton, aged 97 years. He was father of Prof. E. Loomis, of Yale College, and was the first president of Shurtleff College, Alton, Ill. He was a native of Connecticut, graduated from Union College in 1799, and, after several years' teaching, settled as a Congregationalist clergyman in Wellington, Tolland County, Conn., where his son, Prof. Loomis, was born in 1811. Not long after his birth, Mr. Loomis, whose

eminent scholarship had won him collegiate honors both from Union and Yale Colleges, became convinced that the views of the Baptists on the subject and mode of baptism were correct, and, receiving baptism, he became a clergyman of that denomination. A few years later he migrated to Illinois, and labored there zealously as a missionary. In 1832, when the late Rev. John M. Peck had obtained a college charter and a partial endowment for his "Rockspring Seminary," at Upper Alton, he secured the services of Mr. Loomis as its first president, and he remained at its head for nearly twenty years, exhibiting rare abilities as a teacher and presiding officer.

Dec. 18.—BISNOP, REV. ARTEMAS, a clergyman and formerly a missionary of the American Board of Commissioners of Foreign Missions to the Sandwich Islands; died at Honolulu, aged 77 years. He embarked for the islands as missionary, November 19, 1822.

Dec. 21.—HULIN, REV. GEORGE H., a Presbyterian clergyman and journalist; died in Bloomfield, N. J., aged 68 years. He was born in Saratoga County, N. Y., December 23, 1804, and entered upon the ministry at Weston, Ct. Subsequently he removed to Orrington, Me., and later to Onondaga Valley, N. Y., where he preached with great acceptance until in 1846 he assumed the editorial management of the *Religious Recorder*, a Presbyterian paper at Syracuse. The *Recorder* was finally merged in the *New York Evangelist*, and Mr. Hulin for a time was connected with that paper. In 1856 he removed to Bloomfield, where he resided until his death, though the state of his health prevented him from engaging actively in the ministry.

Dec. 28.—TOWNLEY, DANIEL O'CONNELL, a journalist of some note; died in New York City, aged 41 years. He was born at Newry, in the north of Ireland, in December, 1831, received a liberal education, and was a contributor to London and Dublin periodicals. In 1860 he came to this country, and was for a few years on the staff of the *New York Times*, previous to the establishment of the *Evening Mail*, when he resigned to accept an editorial position on that journal. He contributed occasional articles to *Scribner's Magazine*, and wrote humorous sketches under the nom de plume of "Alderman Rooney." A few months previous to his death he retired from journalism to act as business manager of the Grand Opera-House.

Dec. 29.—CONKRY, WALTER M., a wealthy and distinguished citizen of Norwich, Chenango County, N. Y., president of the Chenango Bank for twenty-five years; died suddenly at Norwich. He had been treasurer of the New York & Oswego Midland Railroad since its organization.

Dec. 30.—LORRAINE, COLONEL EDWARD, an eminent civil engineer; died in Richmond, Va., aged 55 years. He was born in New Orleans. He was for some years in charge of the U. S.

Government Survey of the Central Water Line, and at his death Chief-Engineer of the James River & Kanawha Canal.

Dec. 30.—**MORGAN, ALONZO D.**; died in Aurora, Cayuga County, N. Y., aged 41 years. He was a son of Hon. Edwin B. Morgan, formerly member of Congress, and was one of the proprietors of the *New York Times*, a young man of high moral character and fine culture.

Dec. 31.—**BROWN, JOHN A.**, a wealthy banker of Philadelphia, the third son of Alexander Brown, a Baltimore banker, whose four sons were subsequently at the head of great banking-houses in Liverpool, New York, Philadelphia, and Baltimore; died in Philadelphia, aged 85 years. Born in Ballymena, County Antrim, Ireland, May 21, 1788, he came to this country with his father about 1800, and during the whole period of his active life was identified with American interests. In 1818, his father, who had already established a banking-house in Baltimore, opened a branch house in Philadelphia, of which Mr. John A. Brown became the manager. Since then, the firms established by these sons of Alexander Brown have been known throughout the commercial world for their integrity, not less than for their control of vast resources. About thirty-four years ago, Mr. John A. Brown retired from the firm with a large fortune, retaining, however, his connection with some of the leading financial institutions of Philadelphia, New York, and elsewhere, his influence in business affairs remaining unimpaired until the failure of his health, about two years previous to his death. Good judgment, careful estimates of men, tact in dealing with opportunities, and perfect uprightness, were the prominent features of his business life. He was not an indiscriminate giver, but, where the approval of his judgment was secured, his charities were unstinted, often disbursed by thousands. He gave to benevolent objects the sum of \$508,000; \$300,000 of which was donated to the Presbyterian Hospital of Philadelphia with the provision that no part of the principal or income should be used in building, the payment of debts, or in any other way than the payment of current expenses after the hospital should be opened. The result of this wise and liberal provision was, that the friends of the hospital raised the entire amount necessary for the erection and furnishing the buildings from other sources, and now have a hospital liberally endowed.

Dec. 31.—**FORD, Rev. JOHN**, a Presbyterian clergyman and scholar; died at Parsippany, N. J., aged 86 years. He was a native of Morris County, and early in life displayed a great fondness for books, having mastered the French language in his youth, so that subsequently he was able to preach in that language. He graduated at Princeton in the class of 1812. About 1816 he was installed pastor of the Presbyterian Church in Parsippany, in which relation he continued until he

was seventy years old, when, according to a purpose formed long before, he retired. His resignation did not prevent his abundant labors in vacant churches, in mission-fields, and in assisting the pastors in his neighborhood. He was a scholar of far more than ordinary attainments; was a fine mathematician, and well versed in the Latin, Greek, and Hebrew languages. Mr. Ford was a powerful preacher, and had given several valuable discourses to the press, as well as an elaborate catechism of Christian doctrine.

Dec. 31.—**PRIESTLEY, JOHN**, a publisher and for seventeen years treasurer of the Century Club of New York City; died there, aged 60 years. He was born in Belfast, Ireland, May 29, 1812, and arrived in this country at the age of four years. His grandfather was a brother of the celebrated Joseph Priestley. Mr. Priestley began business in New York in the paper-trade, and in 1846 became publisher of the *Whig Review*, which he managed for a year. During that period he gave to American literature that remarkable poem of Edgar A. Poe, "The Raven," for which he paid \$10—a liberal sum for that day. He was elected to the Century, December 4, 1847, then in its infancy, and had been its treasurer since 1856. He was a man of singular purity of character and sterling worth.

Dec. 31.—**REED, JESSE D.**, a Baltimore journalist; died in that city. He was for many years connected with the *Baltimore Sun*.

Dec. —.—**ANNECKE, Colonel FRITZ**, a Prussian officer and journalist; died by accident in Chicago, aged 55 years. He was formerly editor of the *Anzeiger des Westens*, a German paper in St. Louis. During the late war he commanded a regiment from Wisconsin.

Dec. —.—**BREEB, GILBERT JUDSON**, a Democratic journalist; died in Poughkeepsie, aged 45 years. He was for many years a resident of Brooklyn, L. I., and was editor and proprietor of the *Banner of Liberty*, an exponent of extreme Democratic principles, though holding itself independent of that party. He was a frequent speaker at political gatherings, and his fluency gave him some power as an orator.

Dec. —.—**BOND, JOHN R. S.**, a Western journalist; died in Chillicothe, O., aged 50 years. He was the son of a pioneer of Ohio, and travelled in early youth from Venice, in that State, to Michigan, on horseback, through an almost unbroken wilderness. From Niles, Mich., he went in a skiff down the Kankakee and Mississippi Rivers, to St. Louis, a distance of 700 miles. He was the founder of the *Louisville Courier-Journal*, and had owned at different times not less than eight journals. At the time of his death he was editor of the *Scioto Gazette*.

Dec. —.—**LA ROCHE, —, M. D.**, an eminent physician and medical writer; died in Philadelphia, aged 77 years. He was the author of several medical works, and for some years had been engaged in preparing a history of medi-

cine. He was a man of decided talent and moral worth.

Dec. —.—**SNYDER, Mrs. MARY**, a centenarian; died at Leesville, Crawford County, Pa., aged 108 years.

OBITUARIES, FOREIGN. *Jan. 5.*—**Crossley, Sir Francis**, Baronet, member of Parliament, and great carpet-manufacturer; died in Halifax, England, aged 55 years. He was born in Halifax, in 1817, and was a son of Francis Crossley, a carpet-manufacturer of that town. Early in life he entered his father's business, which rapidly grew, and now furnishes employment for over 5,000 people. In 1852 he was elected to the British Parliament, representing his native town in the Liberal interest until 1859, when he was elected for the West Riding of Yorkshire, and afterward sat in the House of Commons for other divisions of the county. In 1863 he was made a baronet. He was a man of strong philanthropic feeling, giving largely to the interests of his native town and elsewhere. In 1857 he presented his town with a handsome park and pleasure-ground; he gave also \$60,000 for an infirmary, \$100,000 to foreign missions, \$50,000 to a fund for aged ministers and their wives, besides other large benefactions.

Jan. 6.—**GILLOTT, JOSEPH**, a celebrated manufacturer of steel pens; died at Birmingham, England, aged 72 years. He was of English birth, and began his business career as a grinder of cutlery in Sheffield; about 1822 he removed to Birmingham, followed the business of steel toy-making for a time, and finally entered upon the manufacture of steel pens, which has rendered his name so widely known, and through which he became immensely wealthy.

Jan. 12.—**ARLÈS-DUFOUR, JEAN BARTHÉLEMY**, an eminent French silk-merchant and advocate of free trade; died in Paris, aged 67 years. His original name was *Arlès*; he was the son of a municipal councillor of Lyons, in which city he was born in 1805. Becoming a silk-merchant, he married into the family of Dufour, eminent bankers of Lyons, and united the name of his wife with his own. He was a jurymen at the French Exhibition in 1849, and acted in the same capacity at the Great Exhibitions of London and Paris, held in 1851 and 1855, respectively. In 1853 he established a commission house in Paris for the sale of silks. In 1853 he was made Secretary-General of the Imperial Commission on Manufactures. Since 1855 he had published many articles relative to the textile fabrics exhibited at the Exposition of 1855. For fifteen years before leaving Lyons he was a member of the Chamber of Commerce and of the Municipal Council of that city, as well as of the Society of Primary Instruction and of the Council General of the Department. He received the decoration of the Legion of Honor in 1837, was promoted to be an officer of the Legion in 1854, and made commander in 1860.

Jan. 28.—**DIXON, Rev. JAMES, D. D.**, an eminent Methodist clergyman and pulpit orator; died at Wellesley Terrace, Manningham, England, aged 84 years. He was born in England, in 1788, entered the ministry in 1812, and in 1824 went for a year as missionary to Gibraltar. In 1841 he was elected president of the Wesleyan Conference. For a period of nearly sixty years he labored as a minister on circuit in various parts of England, continuing to preach after the loss of sight. He was exceedingly eloquent as a speaker, and strong in his denunciations against papacy and slavery. He was widely known as the author of several theological and biographical works. In the pulpit he had a patriarchal and venerable appearance, and was frequently compared in this respect to John Wesley. In 1862 he retired from the full work of the ministry, and settled in Bradford.

Jan. 29.—**LEWIS, Rev. JAMES, D. D.**, a Scottish clergyman of Rome, Italy; died in that city, of diphtheria. He went to Rome in 1864, and, although in danger from the papal authorities, opened his house for private religious services, which were continued for a space of three years. In 1867 the Papal Government ordered him to desist from such worship, under penalty of imprisonment. With the ready and prudent boldness which had characterized him during the trying days of the separation of the Free Church of Scotland from the Establishment, he obeyed the order, but in a very different manner from what was expected. He discontinued the private services, but rented a room and opened a public service just outside the gate of the city, immediately across the street from the English church, which was, in a manner at least, under the control of the British legation. Any attempt to interfere with him here would probably involve consequences impossible to foresee, and he was unmolested. Here he resolved to build a church, and money being contributed by friends in Scotland, Rome, and America, to further that object, he carried it forward regardless of the danger. A square building, looking as little like a church as possible on the outside, was erected, and, before its completion, the suspension of the Papal Government gave perfect religious license. In 1871 the church was dedicated, it being the only Protestant church built on Roman soil. The same day the college at Princeton gave him the title of Doctor of Divinity.

Feb. 2.—**DAWSON, BOGUMIL**, a German tragic actor, died in Dresden, aged 54 years. He was the son of a Polish Jew, and a native of Warsaw, born May 18, 1818. Having a taste for the stage, he fought against the fate which would have confined him and his fortunes to the uncongenial arena of the printing-office, and, abandoning his position as transcriber in the office of the Warsaw *Gazette*, he studied the mimetic art under Kudlicz. He made his first appearance in 1837 at the Polish

Theatre in Warsaw, and obtained an engagement shortly after at Vilna as general utility man. Subsequently at Lemberg, meeting a patron in the director of the Polish Theatre of that city, Count Starbeck, he was enabled to travel, visiting the chief cities of France and Germany. On returning to Lemberg he played in the German language, and thenceforward devoted himself chiefly to the German drama. In 1846 he played at Hamburg, and, refusing many other advantageous offers, he was finally invited, in 1849, to play at the first of German theatres, the Hofburg Theatre, of Vienna. Retiring from this in consequence of the ill-health of his wife, he was engaged in the Dresden Theatre. Subsequently he travelled on the Continent of Europe, in the British Islands, and in the United States, appearing at the highest-class theatres. A few years ago he returned from this country, and just after his return the insanity which finally led to his death developed itself strongly. His repertoire was very varied. His principal rôles were: *Hamlet*, *Richard III.*, *Macbeth*, *Othello*, *Shylock*, *Philip II.*, *the Duke of Alva*, and *Wallenstein*. In his treatment of these characters he displayed the most painstaking attention to detail, as well as an accurate study of the spirit, no less than the language of the character.

Feb. 5.—POOLE, JOHN, an English dramatist and author; died in London, aged 80 years. He had written for the stage since 1818. He was the author of "Little Pedlington," the comedy of "Paul Pry," and several volumes of essays and sketches.

Feb. 7.—GENIOT, Madame, a Parisian *charcutière*, or sausage and pork seller, of enormous size; died in Paris. In 1848, on some political occasion, she was selected to represent the Goddess of Liberty. At the time of her death she weighed 514 pounds, and her coffin measured nearly two yards across.

Feb. 8.—PEASE, JOSEPH, an English mine-owner, one of the largest employers of labor in England; died in Darlington, aged 75 years. He was a member of the Society of Friends, and the first of its members who ever sat in Parliament. He was also the president of the Peace Society, and established and maintained, chiefly at his own cost, an extensive system of education in connection with his collieries in the county of Durham.

Feb. 13.—CONTI, CHARLES ETIENNE, private secretary of Napoleon III.; died in Paris, aged 60 years. He was a native of Corsica, and was born October 31, 1812. He acquired distinction as a lawyer, politician, and a writer of verse, and was elected to the Council-General of his department. He received the office of Procureur-General at Bastia, under the republic, and was returned to the French Legislative Assembly, wherein he acted with the moderate democratic party, while General Cavaignac was in power. He supported the empire, and received October, 1851, the decoration of

the Legion of Honor, and was also appointed a Councillor of State soon after the overthrow of the republic. He succeeded M. Mocquard as private secretary to Napoleon III., and served him with great fidelity. He was returned from Corsica to the present National Assembly, where, before a hostile and uproarious audience he avowed, on a notable occasion, his fidelity to his fallen master.

Feb. 18.—ROGERS, G. H., a popular actor; died at Melbourne, Australia, aged 54 years.

Feb. 15.—DALY, Right Rev. ROBERT, D. D., Episcopal Bishop of Cashel, Ireland; died there, aged 90 years. He was made bishop in 1848.

Feb. 18.—OEHLER, Professor, a theologian of the latitudinarian school of Tübingen, the associate and supporter of F. C. Baür, and, like him, vehement in his attacks on the orthodox school; died at Tübingen.

Feb. 21.—BURNS, Colonel WILLIAM N., late of the Indian Army, and last surviving son of the poet Robert Burns; died at Dumfries, Scotland, aged 80 years. He was named after his father's friend, William Nicol, a master in the Edinburgh High-School, and one of the three celebrities named in "Willie brewed a Peck o' Maut." Colonel Burns was buried in the Burns mausoleum, at Dumfries, where his father, his brothers, and his world-widely celebrated mother, Jeanie Armour, rest.

Feb. 21.—GAGARIN, Prince PAUL, a Russian statesman, president of the Ministerial Council; died in St. Petersburg, aged about 79 years. He had been in the Russian service since 1807, having begun his career as a young army officer under General Kutuzoff. Transferred some years later to the civil service, he had filled many offices, and had been for some years past president of the Council of Ministers. He was a man of great skill and tact, and was universally respected for his straightforwardness and integrity.

Feb. 23.—VAUDOYER, LÉON, an eminent French architect, and member of the French Institute; died in Paris, aged 69 years. He was born in Paris, June 7, 1803; studied with his father, and with M. Hippolyte Le Bas; entered the School of Fine Arts in 1819, and gained the second prize in 1824, and the grand prize in 1826 for the plan offered by him for a palace for the French Academy, at Rome. During a protracted residence at the villa of the Medici, at Florence, he sent home to Paris plans and elevations of the arches of Trajan, at Ancona and Benevenuto; of the *Porte la Majeure*, and of the Augustan Gate, both at Fano; of the aqueducts of Claudius, and of the Temples of Venus, and of Rome. The two latter studies were exhibited at the Exposition of 1855. On his return to Paris in 1832, he designed, in connection with David (d'Angers), the national monument to General Foy, besides a large number of private monuments. He next undertook, with his father, the architectural drawings for the Conservatory of Arts

and Measures, which he continued alone after his father's death in 1849. In 1854, after a sharp competition, he was selected as one of the two architects to make the plans and superintend the construction of the new cathedral at Marseilles. He early gave close attention to the architecture of the period of the Renaissance, and, as a result of his investigations, presented, at the Exposition of 1855, fifteen designs, or, as he called them, "architectural studies of the Renaissance period." These were made by him at Orleans, for the Committee on Historical Monuments, and were so arranged as to give a most picturesque view of the appearance of some of the finest streets of that city in the fifteenth century. Many of the buildings had been destroyed in the various sieges of the city, and their reproduction was greatly commended, and procured for him the first gold medal of the Exposition. M. Vaudoyer received numerous commissions and appointments from the Imperial Government. He was elected to the Institute (Academy of Fine Arts), in February, 1868, in the place of his old preceptor Le Bas. He was also an officer of the Legion of Honor since 1855, having been a Chevalier of it since 1849.

Feb. 25.—GORDON, Rev. JAMES D., a clergyman and missionary of the Canadian Presbyterian Church, in one of the New Hebrides group of islands; was killed by the natives at Erromanga. He was a native of Prince Edward's Island, British North America, and a brother of the Rev. G. N. Gordon, who, with his wife, was murdered by the natives at the same place in 1861. Mr. James Gordon was a man of singular piety, self-denying in the extreme, and ready for martyrdom, if need be, for the cause of Christianity. He had labored in Erromanga for eight years, and translated portions of the Bible into the language of the people, besides preparing primers and hymns for their use. He also acquired a knowledge of the language of the island of Espirito Santo, and spent a winter there teaching the people. He prepared a phonetic primer in that language. Mr. Gordon acted for the first four years as a missionary of the Presbyterian Church of the Lower Provinces of British North America, then for two years as a representative of the Presbyterian Church of New South Wales. He resigned his connection with the church in the end of 1870. Since that time he had withdrawn from outside support, and had been alone upon the island, trusting himself unreservedly among the natives.

Feb.—KNIAZHEVITCH, M., a Russian statesman, and Minister of Finance; died in St. Petersburg.

Feb.—MILUTIN, NICHOLAS, a Russian statesman; died at Moscow. He was the leading spirit of the emancipation, and other reforms of the last fifteen years in Russia, and especially the leader of the Slavophile party, and his house in Moscow was the social and political centre of that party. Though holding no high office,

and never a minister (it was his brother, General Count Milutin, who had been Minister of War since 1862), yet Nicholas Milutin exercised, perhaps, the greatest influence in Russia on the Government. There was a magnetism in his personal character, which called out sympathy and coöperation. For the last three or four years he had suffered from a painful and severe disease, and had passed most of his time abroad.

Feb.—ROYE, E. J., ex-President of the Liberian Republic, was drowned in the harbor of Monrovia, while endeavoring to swim to the steamer just before her departure for Liverpool. He was of the colored race, and was born in Ohio, in 1815, received a fair education, and engaged in mercantile pursuits. About thirty years ago he emigrated to Liberia, where he soon became one of the wealthiest citizens. He was elected to the Liberian House of Representatives, and served as Speaker in 1849, and held the office of Chief-Justice from 1865 to 1868. He was elected President in 1869, and entered upon his duties January 8, 1870. During his term of office the people of Liberia voted upon changing the presidential term from two to four years. This measure was defeated, and a presidential election was held last year, resulting in the selection of President Roberts. Mr. Roye, however, refused to recognize this election, and attempted to remain in power. He thus infringed upon the laws, and was condemned to imprisonment, had escaped, and was endeavoring to leave the country, when he met his death.

Feb.—SAID PACHA, son-in-law of Mahmoud II., formerly Marshal of the Palace, and governor-general, in turn, of several provinces; died in Constantinople. He fell into disfavor, and was banished from Constantinople, but afterward was allowed to return to that city, where he adopted a life of seclusion, and was known as a very devout dervish.

Feb.—SMITH, WYNDHAM (The Assassin), eldest son of Sydney Smith, noted as a sportsman; died in London. He was educated at Cambridge, but from his earliest youth cared neither for literature, politics, arts, nor sciences. His tastes were for horse-racing, jesting, etc. His nickname, *The Assassin*, was fastened on him while in college. Some of his fellow-students turned loose a ferocious bull-dog into his rooms at night, and waited below in the quadrangle to watch the *dénouement* of their practical joke. He entered his rooms—a souffe was heard, and presently a window was thrown up, out of which the dog appeared, held suspended in the air by the left hand of its human antagonist, who proceeded with his right hand to draw a razor across the struggling animal's throat. From that night until his dying hour, the name of "The Assassin" clung to him.

March 3.—ASHBURNHAM, General, the Hon. THOMAS, C. B., of the British army; died in London, aged 65 years. He was colonel of

the Eighty-second Foot, and a brother of the late Lord Ashburnham, once Treaty Commissioner to the United States.

March 6.—**GOLDSTUCKER, THEODOR**, an eminent Sanscrit scholar, and professor; died in London. He was of German birth, but had lived in England the greater portion of his life. He was a man of fine, scholarly attainments, and was a standard authority upon Sanscrit literature; was professor of that language in the University of London, and left many works, the labor of years, in manuscript, among which is an immense Sanscrit dictionary, and a treatise on the administration of Hindoo law, both unfinished. It was said that he requested that his papers should be burned.

March 10.—**CHORLEY, HENRY FOTHERGILL**, an eminent English musical composer, critic, and author; died in England, aged 70 years. He was born at Blackleyhurst, Lancashire; educated in the Royal Institution, Liverpool, and, after spending a few years in a merchant's office there, went to London in 1834, and, joining the staff of the *Athenæum*, remained with it for thirty-five years. He was the author of "Sketches of a Seaport Town," "Pomfret," "The Lion," "Roccabella," and "The Prodigy," two plays, "Old Love and New Fortune," and "Duchess Eleanor;" two original operabooks—"White Magic," and the "Amber Witch;" twenty opera-books paraphrased from the French, German, and Italian languages; and about a hundred songs.

March 10.—**WELLS, REV. JAMES**, an eminent Baptist minister, forty years pastor of the Surrey Tabernacle; died in London. He was of humble birth, and his early education was meagre, but after his conversion he gave himself diligently to study, and during his pastorate had so greatly endeared himself to his people that his funeral was attended by ninety mourning-coaches and many thousands of weeping friends.

March —.—**CAMPBELL, McLEOD, D. D.**, a Presbyterian clergyman of Scotland, of latitudinarian views; died in Scotland. He was the author of a noted work on the atonement.

March —.—**DON MANUEL PANDO**, Marquis de Miraflores, Count of Villapaterna, a Spanish statesman and publicist; died in Madrid, in the 80th year of his age. He was born February 23, 1792, educated for public life, which he entered early, and for more than fifty years was constantly in the service of the Government, either as an ambassador, senator, or cabinet officer. He had been sent at different times in the capacity of ambassador, minister extraordinary, and minister plenipotentiary, to the courts of London and Paris. At home, he had been many times called into cabinets over which other ministers presided, and twice (in 1846 and 1863) had himself been president of the Council. Seven times he had been called to the presidency of the Senate. In this last capacity, where he presided from 1863 to 1868, he made great but ineffectual efforts

to bring about a cordial state of feeling between the principal aspirants for power; and, after the death of Narvaez, he advised the Queen to surround herself with a cabinet of the Liberal, Union, and Progressist parties. His advice was not accepted, and, foreseeing the result, he resigned his office as president of the Senate some time before the Revolution of September, 1868, which cost the Queen her throne, and remained in private life from that time to his death. The marquis was a Spanish grandee of the first class, and had been made Grand Cross of the Legion of Honor; Knight of the Golden Fleece; Grand Cross of Charles III.; Senator for life; Member of the *Real Academia de la Historia* of Madrid; Governor of the Royal Palace and Royal Patrimony, and decorated with all the orders of merit in Europe. He had written much and ably, mainly in reference to the history and politics of his own time. His principal works were: "An Historical and Legal Memoir concerning the Laws of the Succession to the Crown of Spain," 1833; "An Impartial Review of the Question of Succession, on the Occasion of the Spanish Marriages," 1847; "Louis Philippe of Orleans," etc., 1851; "Memoirs of the History of the First Seven Years of the Reign of Isabella," 1863; "Memoirs of my Own Life;" and a number of important memoirs and speeches.

March —.—**PRZEZDZIECKI, COMPTE ALEXANDRE**, a Polish historian and archaeologist; died in Paris. He was long a resident in that city, and was the author of an historical drama in French, entitled "Don Sébastien de Portugal," which had some success.

March —.—**SCHURZ, JOSEPH**, a Swiss soldier who had served through all the Napoleonic wars and was wounded forty times, died at Altorf, Switzerland, aged 110 years.

April 3.—**SCOTT, Admiral Sir JAMES, K. C. B.**, an officer of the British Navy; died in London, aged 81 years. He entered the navy in 1803, and served in the French, American, and Chinese Wars; was wounded at the reduction of Martinique; served at Walcheren, at the capture of Washington, and at the battles of Bladensburg, Baltimore, etc. He was recommended twenty times and gazetted nine times; received the navy and army war medals, and the Chinese medals; also, the thanks of both Houses of Parliament.

April 13.—**SHORT, Rt. Rev. THOMAS VOWLER, D. D.**, formerly Bishop of St. Asaph; died in London, aged 82 years. He was the son of Dr. Short, Archdeacon of Cornwall, born in 1790, and educated at Westminster School and at Christ Church, Oxford, where he took a double first class in 1812. He was shortly after appointed a tutor of Christ Church, and to a living in the gift of his college. In 1821 he was nominated Oxford preacher at the Chapel Royal, Whitehall; and, after holding other benefices in the Church, was promoted to the living of St. George's, Bloomsbury. In 1841

he was nominated by Sir Robert Peel to the bishopric of Sodor and Man, and in 1846 was translated to the See of St. Asaph, which he held for twenty-four years, and then resigned under a recent act of Parliament. He was the author of a "Sketch of the History of the Church of England to the Revolution," and of several other works.

April 18.—MITCHELL, EDWARD, an English sculptor; died in London, aged 41 years.

April 18.—SHEEPSHANKS, WILLIAM, an eminent English philanthropist; died in London.

April 19.—WESTMACOTT, Prof. RICHARD, R. A., F. R. S., an eminent English sculptor; died in London, aged 74 years. He was the son of Sir Richard Westmacott, a celebrated artist, and was born in 1798. Adopting his father's profession, he went to Italy in 1820, and devoted six years to the study of his art. His first exhibition at the Academy was in 1827. In 1838 he was elected an Associate; in 1849, R. A., and in 1859, Professor of Sculpture. Among his best ideal works were "Venus and Ascanius" in 1831; "the Cymbal Player," in the Duke of Devonshire's collection, exhibited in 1832; a group of a Girl and a Fawn; "Venus instructing Cupid;" "Paolo and Francesca," in 1838, and "Blue Bell," a bass-relief full of grace and beauty. His greatest success, however, was in religious compositions, of which his finest examples were the "Angel Watching," part of a large monumental group to the Ashburton family, in 1842; a bass-relief, "Go and Sin no more;" a recumbent monumental figure of the late Archbishop Howley, in Canterbury Cathedral, in 1850; and one of the late Earl of Hardwicke, at Wimpole. Mr. Westmacott had for some years previous to his death retired from the practice of his profession, occupying himself chiefly in the literature connected with his art, and in delivering lectures. He contributed to most of the encyclopædias and journals articles and essays on the subject of his professional study; and was the author of a "Handbook on the Schools of Sculpture," and an essay "On Coloring Statues."

April 27.—BEAMISH, Lieutenant-Colonel NORTH LUDLOW, K. H., an author of several military works; died in London, aged 75 years. Among his works was "The History of the King's German Legion."

April 30.—MAYHEW, HORACE, a popular English author; died in London, aged 53 years.

April 30.—NASSAU-ORANGE, WILLIAM FREDERICK HENRY, Prince of, Vice-Admiral of the Dutch Navy, and brother of the King of the Netherlands; died in Amsterdam, aged 52 years. He was born in Soestdyke, June 13, 1820. He was Viceroy of the grand-duchy of Luxemburg, and commanded the second division for the equipment of the Russian fleet. In March, 1853, he married the Princess Amalia Marie-de-Gloria-Auguste, daughter of Bernard, Duke of Saxe-Weimar-Eisenach.

April —.—BAMFORD, SAMUEL, an English

author; died near Manchester, aged 84 years. He was successively a weaver, warehouseman, sailor, public secretary, bookseller, newspaper correspondent, and Government clerk, and was several times a political prisoner. His two chief works, "Passages in the Life of a Radical," and "Early Days," give a detailed account of his connection with the political movements in Lancashire which brought him into notoriety. He is frequently quoted by Miss Martineau, in her "History of England during the Thirty Years' Peace," as an authority with regard to the events immediately prior to the Manchester massacre, in August, 1819, as well as to that deplorable event itself, which constituted an epoch in the history of the Government contest with radicalism.

April —.—BORGIA, ALEXANDER, Grand Commander of the Knights of St. John; died in Rome, Italy. He was a lineal descendant of Pope Alexander VI. and of Lucrezia and Cesare Borgia, a great admirer of that eccentric family, whom history, he always declared, had foully wronged.

April —.—PICTET, called DE LA RIVE, Prof. FRANÇOIS JULES, an eminent Swiss naturalist; died at Geneva, Switzerland, aged about 73 years. He was born in that city about 1800, graduated from the Academy of Geneva, and early devoted himself to the study of zoology and comparative anatomy, to which he subsequently added such profound researches into palæontology as made him the peer of Agassiz in this difficult but interesting science. He was elected Professor of Zoology and Comparative Anatomy in the Academy of Geneva about 1830, and prosecuted his favorite studies with unwearied assiduity till his death. His published works are numerous. The principal were: "Researches upon the Phryganidea," 1834; "The Natural History, General and Specific, of Neuropterous Insects," 2 vols., 8vo, 1841-'43, comparing the *Perlides* and *Ephemeroidea*; "Elementary Treatise on Palæontology," 4 vols., 8vo, 1844-'46 (a second edition with an atlas of 110 plates was published in Paris, 1853-'55); "Description of the Fossil Mollusks found in the New Red Sandstone of the Vicinity of Geneva," 1847-'51, 4to, with 51 plates; "Materials for Swiss Palæontology," 3 vols. (35 numbers) with numerous plates, 1854-'63; "Description of the Fossil Fish of Mount Lebanon," 4to, 1850; "Notes on the New Animals in the Museum of Geneva," 4to, 23 plates; "Palæontologic Miscellanies," 1863. He also prepared numerous papers for the Transactions of the Society of Physics of Geneva, and was a large contributor to the "*Bibliothèque Universelle*."

May 1.—MAYHEW, HENRY, an English author and reformer; died in London, aged 60 years. He was born in London in 1812; studied at Westminster School, which he left for a voyage to Calcutta, and on his return was articled to his father, a solicitor, for three years. His literary career commenced not far

from 1841, as one of the authors of the "Wandering Minstrel;" he was also one of the founders of *Punch*, from which he afterward withdrew. He wrote numerous tales and articles in magazines, but was best known by his "London Labor and the London Poor," a valuable cyclopædia of information on the condition of the working-classes (1851), published in numbers. Among his other works are "The Mormons, or Latter-Day Saints," published in 1852; "The Wonders of Science," in 1855; "The Great World of London" (1856); "The Upper Rhine" (1858); and "Young Ben Franklin" (1858). In conjunction with his brothers Horace and Augustus, he published a variety of fairy-tales and the following works of humorous fiction: "The Greatest Plague of Life," "Whom to Marry, and How to Get Married," "The Magic of Kindness," "Peasant-Boy Philosopher," "Tricks of Trade," etc.

May 9.—PENNEFATHER, General Sir JOHN LYSAGHT, G. C. B., British Army, Governor of Chelsea Hospital; died there, aged 78 years. He was born in 1798, entered the army as cornet in 1818, and in 1839 was promoted to the rank of lieutenant-colonel. He served in India for some years, and was a trusted officer under Sir Charles J. Napier, in the campaign in Scinde, commanding the infantry brigade at the battle of Meanee, in 1843, where he was severely wounded. For his services in Scinde, he received the thanks of Parliament, and the Order of the Bath. Returning home, he was for a time engaged on the staff in Ireland, and on the outbreak of the Crimean War was appointed to the command of the First Brigade of the Second Division with the rank of major-general, distinguishing himself at the battle of the Alma, and at Inkermann. In recognition of his services before Sebastopol he received several honorable distinctions, and on the conclusion of peace was made Governor of Malta. After holding this position five years, he was made commander of the camp at Aldershot, which post he resigned in 1865.

May 22.—FORRESTER, ALFRED HENRY (Alfred Crowquill), a celebrated artist; died in London, aged 67 years. He was born in 1805, and in early life was put into a notary's office, but, as soon as he became of age, he turned his attention to art and literature. He was associated with Theodore Hook and Father Prout, in the early numbers of *Colburn's* and *Bentley's Magazines*, and his name soon became familiar to the public as a designer of humorous and graceful drawings. He was one of the early contributors to *Punch*, and, besides his artistic work, he produced many writings of a lively character, including several burlesques.

May 26.—BEDFORD, WILLIAM RUSSELL, Duke of; died in England, aged 63 years. He was born in 1809, and represented Tavistock in the House of Commons from 1832 to 1851. He succeeded to the title of duke in 1861. He

acted with the Liberal party, and was patron of twenty-seven livings in the Established Church. He is succeeded by his nephew, Francis Charles Russell, born in 1819.

May —.—HAUCH, JEAN KARSTEN VON, an eminent Danish poet, novelist, and scientist; died at Rome, aged 82 years. He was born at Fredrikshald, May 12, 1790. He was educated at Copenhagen, and, after receiving his doctorate in Philosophy, was for nearly thirty years Professor of Physical Science in the Academy of Soroe. In 1846 he was appointed Professor of Scandinavian Literature, at Kiel. In 1848, in consequence of his liberal tendencies, he was deprived of his professorship, but through the kindness of the Queen Maria Sophia Frederick, found an asylum at Fredericksberg, in the suburbs of Copenhagen. After the death of Oehlenschläger, in 1850, he was made Professor of Æsthetics in the University of Copenhagen, and retained this position till a year or two ago. Von Hauch was a voluminous writer. His dramatic works, which are numerous, are of two classes, historical or classical subjects, such as "Bajazet," "Tiberius," "Gregory VIII.," "Don Juan," etc., all possessing great merit, and dramas of Danish life, of which there are five or six, which were as popular in Sweden and Germany as in Denmark. He had also published an Epic-Dramatic poem, the "Hamadryads," and a volume of lyric poems, which were very much admired by the Danish public. He had also written twelve or fifteen novels, in most of which he had interwoven the legends of the Scandinavian mythology, and which have been translated into most of the languages of Europe. He made an extensive scientific tour in Germany, Italy, and France, some years since, and, after his return, published "An Examination into the Rudimentary Organs, and their Function in Nature," and "Remarks on the Nervous System, and Animal Instinct." He has also contributed many dissertations and papers to a Danish scientific journal, "Blandinger fra Soroe."

June 1.—MACDONALD, JOHN SANDFIELD, a Canadian statesman, and cabinet officer; died in Cornwall, Canada, aged 60 years. He was born at St. Raphael, Glengarry County, Upper Canada, December 12, 1812; commenced business in early youth as clerk in a store, but, becoming dissatisfied, entered upon the study of law, and in 1835 was articled to a barrister at Cornwall, finishing his studies with Chief-Justice Draper in 1840. He built up a large and lucrative practice in Cornwall, and was elected to Parliament in 1841, was returned in 1843, and again in 1848, 1852, and 1854. In the latter part of 1849 he was appointed Solicitor-General under the La Fontaine-Baldwin Government, until its final breaking up in 1851. In 1852 he was elected Speaker in Quebec. In 1858 he was Attorney-General, having been elected the previous year for Cornwall. In 1872 he was again returned for that town.

With the exception of the period during which he was Solicitor-General, Mr. Macdonald was in the opposition, until late in his career he became what is termed an "independent member." He was one of the few Upper Canadians who have persistently opposed representation by population, and, although a Roman Catholic, was never an advocate of separate schools.

June 7.—HILL, MATTHEW DAVENPORT, Q. C., Commissioner of Bankrupts at Bristol, and late Recorder of Birmingham, an eminent philanthropist; died in Birmingham, aged 80 years. He was a brother of Sir Rowland Hill, and born in 1792. His education was mainly conducted by his father. In 1819 he was called to the bar of Lincoln's Inn; was one of the members in the Liberal interest for Kingston-upon-Hull from 1832 to 1834, and the latter year received a silk gown with a patent of precedence. He was appointed Recorder of Birmingham, and Commissioner in Bankruptcy in the Bristol district, but resigned the former in 1866, retaining the latter position until his death. Mr. Hill was active in promoting the establishment of reformatories for juvenile criminals, and had published in a collected form, under the title of "Suggestions for the Repression of Crime," a large number of charges addressed by him to grand juries in his capacity of Recorder of Birmingham, besides various pamphlets; among which may be mentioned "Practical Suggestions to the Founders of Reformatory Schools," "Mettray," "Tuscan Jurisprudence," and letter to the Right Hon. C. B. Adderley, "On the Insufficiency of Punishments simply deterrent." He also edited several biographies of men and women who have become benefactors of their country.

June 26.—OETTINGER, EDWARD MARIA, a German novelist and journalist; died in Germany, aged 66 years. He was born in Breslau, in 1806. He began his career as a journalist in Vienna, and afterward resided in nearly all the principal cities of Germany. Early devoting himself to bibliography, he possessed a knowledge of books, especially of historical and biographical works, surpassing that of the most eminent bibliographers of his time. He was a man of powerful intellect, exhaustive knowledge, and sparkling humor, endowed with a wonderful power of description. His last years were spent in poverty and sickness, which deprived him of sight. He left an unfinished work of much value, entitled "Moniteur des Dates."

July 2.—HILFERDING, ALEXANDER, a Russian author, and scholar; died at Kargopol, aged 42 years. He was one of the most erudite of Russian scholars, and a chief authority on all questions concerning the various Slavonic peoples, and had published numerous works on Slavonic literature. At the time of his death he was on a journey of exploration to certain imperfectly-known districts of the Archangel Government.

July 3.—BAGSTER, JONATHAN, one of the publishers of Bagster's Polyglot and other Bibles; died in London, aged 59 years.

July 18.—ITURBIDE, DON ANGEL de, son of Iturbide, Emperor of Mexico; died in Mexico.

July 25.—GUISE, DUKE de, eldest son of the Duc d'Aumale; died in Paris, aged 18 years. He was born at Twickenham, England, January 5, 1854. His mother was daughter of the King of the Two Sicilies. His death was the result of too close application to his studies.

July 31.—SMITH, AUGUSTUS, lessee or King of the Scilly Isles; died there, aged 67 years. In 1830, having immense wealth at his command, as a member of the famous London banking family, he obtained, through his father's influence with King William IV., a lease of the Scilly Islands, and devoted himself to the work of improving the physical and moral condition of the inhabitants, who were sunk in ignorance, apathy, and superstition, and not unfrequently reduced to a state of semi-starvation. He gave them instruction in agriculture, instituted schools, and made education compulsory. As a result of his work of forty years, they are now a thriving, active, well-educated people, competing successfully with the first market-gardeners in the kingdom, as purveyors of the earliest fruit and vegetables to Covent Garden.

July —.—DUFOUR, SELIM FRANÇOIS, a French journalist and author; died in Paris, aged 73 years. He was for sixteen years editor of the *Revue et Gazette Musicale*, and for some time also editor of the *Journal de St. Petersbourg*, and vice-president of the Society of Authors, Compositors, and Editors, in Paris.

July —.—LOW, WALTER, a publisher and bookseller, for many years, in the United States; died in London, by suicide. He was for a long time connected with the Harpers of New York.

July —.—MARCHISIO, CARLOTTA, an Italian vocalist; died in Turin, aged 35 years.

Aug. 8.—LEEDS, GEORGE GODOLPHIN OSBORNE (Scotch Viscount Dunblane); died at his country-seat, aged 70 years. He was born in 1802, and succeeded to the peerage in 1859.

Aug. 10.—SMITH, SIR ANDREW, K. O. B., M. D., F. R. S.; died in London, aged 75 years. He was born in Roxburghshire, in 1797, and educated at Edinburgh, where he graduated, in 1819. He was made Honorary Fellow of the Faculty of Physicians and Surgeons of Glasgow, of the College of Surgeons of Edinburgh, and of the Medico-Chirurgical Society of Aberdeen. From 1851 to 1858 he was Director-General of the Army Medical Department, and was created a K. O. B. on retiring from his office. He was the author of "Illustrations of the Zoology of South Africa" (1838-'47); "Origin and History of the Bushmen;" "History of Secondary Small-pox;" and various contributions to scientific periodicals.

Aug. 15.—SKEY, FREDERICK C., F. R. S., President of Royal College of Surgeons, and

medical author; died in London. He was surgeon to St. Bartholomew's Hospital, and author of "New Mode of Treatment of Ulcers" (London, 1837); "Operation for Lateral Curvature of the Spine" (1841); "Venereal Disease" (1841); "Operative Surgery" (1850); "Relative Merits of the Two Operations for Stone" (1854); "Hysteria" (1867).

Aug. 28.—QUAGLIA, Cardinal ANGELO, a Roman Catholic prelate; died at Rome, aged 70 years. He was born at Corneto, August 28, 1802, educated in the College for the Propagation of the Faith, at Rome; ordained a priest, in 1828, promoted to the bishopric, in 1846; was prefect of the congregation of bishops and regular clergy, and on the 27th of September, 1861, was appointed a cardinal by Pío Nono.

Aug. 29.—BETHUNE, Very Rev. —, D. D., Dean of Montreal, a venerable clergyman of the Established Church in Canada; died there, aged 85 years. His ministry there had extended over a period of nearly half a century.

Aug. —.—ALDIS, C. J. B., M. D., member of the Royal College of Surgeons, an eminent physician and philanthropist; died in London. In early life he was associated with the Earl of Shaftesbury in improving the condition of the dwellings of the poor in the worst parts of Westminster. He held appointments, the statement of which filled nearly half a column of medical directories.

Aug. —.—BEAUGÉ ET DE MELQUEIL, Madame ULICH, lady of honor to Marie Antoinette; died in Paris, aged 102 years.

Aug. —.—TRENCH, WILLIAM STEUART, an Irish manager of estates, and author; died in Kings County, Ireland, aged 64 years. He was born, November 16, 1808, at Bellegrave, Queens County, educated at the College Armagh, and took his degree at Trinity College, Dublin. Having held an agency over estates in County Monaghan, he was, in December, 1849, appointed agent over the estates of the Marquis of Lansdowne, County Kerry. In 1851 he was appointed over those of the Marquis of Bath, County Monaghan, and in 1856 over Lord Digby's estates in Kings County, holding the head supervision of the three latter estates until his death. In 1841 he obtained the gold medal of the Royal Agricultural Society of Ireland for "the best report on the largest quantity of land reclaimed in Ireland," which report was published in the "Transactions" of the Society. In 1869 he published his "Realities of Irish Life," giving an account of his college days, and of the several agencies to which he was appointed, and the dangers and difficulties of the situations, etc. In 1871 he published the novel "Ierne."

Aug. —.—WEST, Rev. J. J., a clergyman of the Established Church, England; died in London, aged 67 years. He was Rector of Winchelsea Parish, Sussex, for more than forty years. He was the representative man of the Calvinistic wing of the Established Church,

and often, in his sermons, handled his Arminian brethren with great severity.

Sept. 2.—GRUNDTVIG, NICOLAS, Bishop of the Danish Lutheran Church; died in Copenhagen, aged 89 years. He was a peculiar and imposing personage, a man of great and versatile gifts, an ardent patriot, and an enthusiastic Old Lutheran. As preacher, poet, and historian, his fame was widely known, and his wonderful power over the masses made a most decided impression upon the Church in the North of Europe. His numerous followers, who, owing to some of his peculiar views, constituted something of a sect and at one time held conventicles, regarded him as "the Luther of the North." Unpopular with the clergy on account of his orthodoxy, he was called by the King to the Church of the Redeemer in Copenhagen, and was the first to stem the tide of German rationalism which had been sweeping over the national Church. He was so ultra-national and so intensely anti-Germanic that he at one time proposed to banish from the country all German poetry, philosophy, history, and geology; and even the Symbolical Books, as the product of German authorship. His funeral was of an imposing character, and was attended by an immense concourse of people, composed of the clergy *en masse*, headed by the renowned Bishop Martensen and Prof. Dr. Clausen, the students, all the personages of high rank in Copenhagen, and large numbers of his adherents from all parts of the kingdom. A noticeable feature of the obsequies was the singing of the audience. There had been distributed in the church a collection of fourteen hymns of Grundtvig's own composition, all of which were sung with great enthusiasm by the vast assemblage of mourners.

Sept. 23.—HOHENLOHE-LANGENBERG, ANNE FEODOROWNA AUGUSTE CHARLOTTE WILHELMINA, Dowager-Princess of; died in Germany, aged 65 years. She was a daughter of the Duchess of Kent by her first husband, the Prince of Leiningen, and thus half-sister to Queen Victoria. She had married Ernest Christian, Prince of Hohenlohe-Langenberg, in February, 1828, and since his death, in 1860, has been dowager-princess. She leaves five children, three sons and two daughters. Her second son, Hermann Ernest, is the present Prince of Hohenlohe-Langenberg, and a major-general in the Baden service.

Sept. 26.—MARTINETTE, PHILIP, a celebrated acrobat and gymnast, long associated with the Ravel Troupe; died in New York.

Sept. —.—ANDERSON, Rev. WILLIAM, D. D., an eminent preacher of Glasgow; died in that city. He was a man of great originality and rare liberality. Though of great age, he acquired the Italian language very late in life. At the time of his death he was engaged in translating Sarpe's History. He held the pastorate of a United Presbyterian church in Glasgow for a period of over fifty years, and

his sermons were remarkable for their vigor and originality. One of his favorite themes was Christian benevolence, and his pictures of those who gave grudgingly, and especially of those who only helped the poor with an eye to their own benefit, were vivid and telling, and his denunciations terrible.

Sept. —.—HOPPNER, RICHARD BELGRAVE, an intimate friend and associate of Lord Byron; died in London, aged 86 years. He was consul at Venice during Byron's stay in that city, and kindly assumed the care of the poet's daughter Allegra.

Sept. —.—KOOH, Dr. C. F., a German philologist; died in Berlin, Germany. He was especially devoted to the Teutonic languages.

Oct. 2.—WILLES, Rt. Hon. Sir JAMES SHAW, Justice of Court of Common Pleas; committed suicide during a paroxysm of insanity, aged 58 years. He was the son of a physician in Cork, Ireland, and was born in 1814. He received his education at Trinity College, Dublin, where he took honors, and was graduated B. A. in 1836, and LL. D. in 1860. He was called to the bar by the Inner Temple in 1840, went the Home Circuit, and had a large business as a "leading junior." In 1849 he edited, with Sir Henry S. Keating, the well-known legal work, "Smith's Leading Cases," and in 1850 was appointed a commissioner of Common Law Procedure, and afterward assisted in drawing the Common Law Procedure Acts of 1852, 1854, and 1860, which regulated the practice of the English courts. In 1855, when a vacancy occurred among the Judges of the Court of Common Pleas, he was raised to the bench, and received the honor of knighthood.

Oct. 3.—GOSS, Rt. Rev. ALEXANDER, D. D., Roman Catholic Bishop of Liverpool; died there. He was consecrated bishop in 1853.

Oct. 6.—POLLOCK, Field-Marshal Sir GEORGE, Bart., G. O. B. and G. O. S. I.; died in London. He was born in that city in 1786. Entering the service of the East India Company in 1802, he joined the Bengal Artillery, in which he rose by successive steps, attaining the rank of captain in 1805, of major in 1819, of colonel in 1829, and of general in 1859. Shortly after proceeding to India, he joined the army under General Lake, and was present at the battle of Deeg, and at the sieges of Deeg and Bhurtore, in 1804-'5. He volunteered in 1815 to serve with the force under General S. Wood against the Nepaulese; and, having held some staff appointments, he was appointed, in 1821, to the command of the army sent to Burmah under Sir Archibald Campbell, where he gained great credit, and for his services in the Burmese War was made a C. B. In 1841 he was selected to command the armies on the west of the Indus, when, after forcing the Khyber Pass by a series of skilful and brilliant operations, he marched to the relief of Sir Robert Sale at Jellalabad. Having defeated the Afghan troops in three successive encounters, he took Cabul Septem-

ber 15th, in that year, effected the release of the prisoners, was joined by General Nott, September 17th, and led the army through the formidable passes back to India in October. For these services he was presented with a splendid sword by the Government of India, created a G. C. B., and received the thanks of both Houses of Parliament. In 1848 he was appointed British envoy at Oude, in 1844 a member of the Supreme Council of India; in 1846 he received the thanks of the Court of Common Council of London, for his distinguished services in Afghanistan, and the freedom of the city in a gold box, and the freedom of the Merchant Taylors' Company; in 1847 was voted a pension of £1,000 per annum by the East India Company; received in 1850 a medal for general services, with four clasps for the battle and the siege of Deeg, the Nepaulese War, and Burmese War; and in 1858 was nominated by the Crown one of the Directors of the East India Company, which post he held for two years. In 1861 he was appointed hon. colonel of the First Battalion Surrey Rifle Volunteers, and subsequently was nominated a Grand Commander of the Star of India; was gazetted to the brevet rank of field-marshal in June, 1870, and installed Constable of the Tower of London, December 23, 1871. He was created a baronet in March, 1872.

Oct. 13.—FONBLANQUE, ALBANY WILLIAM, an eminent author; died in London, aged 77 years. Intended for the bar, he became the pupil of Chitty, the well-known special pleader, but relinquished the profession and applied himself to literature. "Castlereagh's 'Six Acts,'" it has been said, "made a political writer of him." At first he contributed political articles to the *Chronicle*, under Perry and Black. On the death of the former, Clements, who had purchased the paper, dispensed with his services, and he became the chief contributor to, and afterward the proprietor and editor of, the *Examiner*, the then leading London weekly newspaper, which he conducted for many years with great brilliancy and ability. In 1837 he published a selection from his editorial contributions to that paper, under the designation of "England under Seven Administrations." Mr. Fonblanque having received from Lord John Russell's government an appointment in the public service, withdrew in a great measure from literary pursuits. He was the head of the statistical department of the Board of Trade.

Oct. 18.—AGUAS, MANUEL, a converted Roman Catholic priest; died in the city of Mexico. In his youth he was ardently devoted to his studies. Having been admitted to the convent of the Dominicans, he made the usual vows, received the sacred orders, and afterward occupied a high place among his brother monks. When the convents were abolished he became curate of a small village called Azcapotzalco, not far from the city of Mexico; and

not long afterward confessor to the canons of the cathedral. Desiring to overthrow the Protestants and their doctrines, which he often assailed, he began to read their books, in order to arm himself for the warfare. In this way he was led to exercise greater charity for them, then to doubt his former views, and finally to join their ranks. He soon became their champion, and a powerful defender of what he had formerly sought to destroy. Being popular among his brethren, he was finally elected bishop of the "Church of Jesus," the name adopted by the Evangelical party in the city of Mexico, and, throwing all his energy into the cause, he often preached as many as twelve times a week, until, crushed under the wear and tear and difficulties of his work, his health rapidly failed, and he sank from complete exhaustion.

Oct. 19.—COCHRANE, Sir THOMAS J., G. C. B., Admiral of the Fleet; died in London, aged 83 years. He had taken a part, though in a subordinate capacity, in all the naval battles of the early part of the century, and had distinguished himself in the Chinese and Indian Wars.

Oct. 19.—PUGHAS, Rev. JOHN, a prominent ritualist of Brighton, England; died there, aged 49 years. He was born at Cambridge in 1823, educated at Rugby, and Christ College, Cambridge, where he graduated in 1844, and was curate successively of Elsworth, Orwell, St. Paul's, and finally of St. James's Chapel, Brighton, where he was appointed incumbent in 1866. Here he introduced what were deemed innovations in the Church of England service, and was brought to trial for doing so before the Court of Arches. He appealed from the adverse decision of that court to the Judicial Committee of the Privy Council, but finally was admonished to discontinue the ceremonies he had practised, and the use of certain vestments in the communion service, of lighted candles and incense, mixing water with communion wine, and using wafer-bread. He refused to obey these admonitions, and was suspended from his functions in February, 1872, and since that time had remained in private life. In 1859 he published a hand-book of English ceremonies, a text-book of Anglican Ritualism; in 1839, "The Miser's Daughter;" "Poems and Ballads," 1846; "Book of Feasts," 1853; and several sermons, 1866.

Oct. 20.—WELWITSCH, Dr. FREDERICK, an eminent botanist of Dutch extraction, died in London. He had spent eighteen years in the pursuit of his favorite science in the Portuguese possessions on the west coast of Africa, and had made a collection of over forty thousand specimens of African plants. He was a standard authority on African botany, and had published several works on natural history.

Oct. 28.—BEECHER, Lady WRIXON, née ELIZA O'NEILL, once a famous actress; died in Mallony, England, aged 81 years. She was the daughter of John O'Neill, manager of a com-

pany of strolling players, and early displayed remarkable grace as an actress under his direction. She was first brought before the public as a substitute, and made so favorable an impression that she was forthwith attached to the Dublin Theatre, where her popularity was at once established. Ultimately she was engaged for Covent Garden Theatre, by John Kemble, making her *début* there in 1814, as *Juliet*, and a few days after personated *Belvidera*—making a startling sensation in both. Her grace, sweetness, delicacy, and refinement, as exhibited through a line of characters, won great admiration, and placed her in the next rank to Mrs. Siddons. Her career, however, was as brief as it was brilliant, closing in July, 1819, with her performance of *Mrs. Haller*. The following December she became the wife of Sir William Wrixon Beecher, M. P. for Mallony, who in 1831 succeeded to an ancient baronetcy, and whose death occurred in 1850.

Oct. 30.—COMBE, THOMAS, M. A., manager of the Clarendon Press at Oxford; died there, aged 76 years. He was the son of a bookseller in Leicester, and, removing to Oxford about 1837, was appointed manager of the press, which under his supervision greatly extended its operations, and from being an expense became a source of revenue. When the monopoly for printing Bibles, which it had so long enjoyed, came to an end, Mr. Combe determined to save the profit made by the maker upon the paper, and, as an Act of Parliament would have been necessary to enable the University to turn paper-maker, he took a mill at Wolvercote in his own name and at his own risk. After long and patient supervision, he succeeded in overcoming all difficulties, and in making the establishment profitable, so that the competition of other printers of Bibles and Prayer-books in no way injured the Clarendon Press. Out of no excessive means he found funds to build a graceful chapel to the Oxford Infirmary for the use of the convalescent inmates. He built also a large church in St. Barnabas, the poorer quarter of Oxford, which, like the previous edifice, was designed by Mr. Bloomfield. In the same city he erected one school-house, and paid half the cost of another; and to all works of charity he was a liberal contributor. Mr. Combe was also a great lover of art, and possessed a valuable collection of choice paintings. The honorary degree of M. A. was conferred on him by the university, in recognition of his valuable business services to her.

Oct. 30.—SAYN-WITTGENSTEIN-HOHENSTEIN, Prince ADOLPHUS VON, a German tenor of note; died on board a vessel bound from Bremen to the United States, aged 32 years. He was on an artistic tour.

Oct. 30.—SOBOLSHCHIKOFF, VASILY IVANOVICH, a Russian author, librarian of the Imperial Public Library at St. Petersburg; died in that city, aged 59 years. He was born at

Vitebsk, in 1813, received some elementary training in the Gymnasium, and at the age of thirteen became an assistant in his father's employ for five years, during a portion of which he was one of the writers in a Government office. In 1830 he received a post in the civil service at St. Petersburg, which he soon contrived to exchange for an appointment in the Imperial Public Library. So vigorously had he set to work in the mean time to educate himself, that before long he acquired such knowledge as enabled him to render no slight service to the institution. Under the auspices of Baron (now Count) Korff, he founded the section of "Books about Russia in Foreign Languages." He also introduced the arrangement by which the library was rendered fire-proof. As a writer he was known by his "Review of the Principal Libraries in Europe at the Commencement of the Year 1859," published in French as well as in Russian, by two books on the warming and preserving of buildings, and by a number of essays and articles on architecture and similar subjects.

Oct. —. DAHL, VLADIMIR IVANOVITCH, a Russian author and lexicographer; died in Moscow. He was born at St. Petersburg, educated at the Cadet Institute there, and served on board the Black Sea fleet. At a later period he held a commission in the Russian army, and served in the Polish campaign of 1831. Having studied medicine at Dorpat, he filled a medical post in one of the Government hospitals at St. Petersburg, and finally obtained an appointment in the civil service. But it was as a student of its popular literature that he made himself most useful to Russia. So diligent was he as a collector of Russian folklore that he was in possession of above 4,000 popular tales, besides more than 80,000 proverbs. The latter he published in a separate volume, the former he liberally communicated to other scholars, and many of them now enrich the great collection edited by Afanasief. As an author he gained a considerable reputation by various works, such as the stories he published under the pseudonym of the "Cosack Lugansky." But his great work—that which will render his name truly immortal—is the invaluable "Dictionary of the Living Russian Tongue," in four large volumes, which was completed in 1866. To this he devoted a large part of his lifetime, and it is sufficient to say that, for the study of the popular literature of Russia it is an absolute necessity. For some time previous to his death he suffered much from illness, but his love of study was strong to the end.

Oct. —. FINZI, FELICE, a gifted Italian linguist; died at Florence, aged 25 years. With Prof. Mantegazza, he founded the *Archivio di Etnologia e di Antropologia*, and was one of the promoters of the *Società Orientale*, of Italy.

Oct. —. GIUDICI, PAOLO EMILIANI, a popular Italian author; died in England, aged 60

years. He was born at Masomelli, Sicily, June 13, 1812, was a professor at Pisa from 1849 to 1852, and in 1859 was appointed to the chair of *Æsthetics* at the Royal Academy of Fine Arts at Florence, and secretary of the Academy. In 1862 he resigned his professorship, in order that he might devote himself more particularly to literary pursuits. In 1867 he was elected a Deputy in the Italian Parliament. Signor Giudici was the author of a "History of Italian Literature" (1844); "History of the Italian Communes" (1853-'54); "History of the Italian Stage" (1860); and a translation of "Macaulay's History of England."

Oct. —. GONZALES, GREGORIO GUTIERREZ, an Hispano-American poet of Colombia; died there. His reputation as a writer was high, and he was called the Byron of that country.

Oct. —. HIGHGASON, WILLIAM, an English centenarian; died in London, aged 107 years.

Oct. —. LIGIER, PIERRE, a famous French tragedian, born in Bordeaux, in 1797; died in Paris, aged 75 years. He was of very humble family, and served his apprenticeship to a glass-blower in Bordeaux, but, becoming enamoured of the stage, he attempted secondary parts at the theatre of his native city, and carefully saving his little earnings went to Paris in 1819 and made his *début* at the *Théâtre Français* under the auspices of Talma. From this theatre he went in 1825 to the Odeon, and some time after to the Porte St.-Martin. The parts in which he obtained his greatest successes were the *Doge* in "Marino Faliero," *Gloucester* in "Les Enfants d'Edouard," and *Louis XI.* He also played *Fredrick de Hohenstaufen* in "The Burgraves," and *Triboulet* in "Le Roi s'Amuse." His last successes in Paris were *Richard III.*, in 1853-'54, and *Tartuffe*, in 1854-'56. He acted in the provinces and in Italy, with great success, after he was sixty years of age, and did not retire from the stage till 1863. He was most popular in those parts where terror was to be excited by the sternness of his manner, and the grimness of his visage.

Oct. —. TADOLINI, GIOVANNI, an Italian musical composer; died in Bologna, aged 80 years. He was born in that city, in 1798. He commenced the study of music at an early age under Mattei and Babinì. At the age of sixteen he went to Paris, where he was a musician under Spontini at the Italian Theatre from 1811 to 1814. His first opera was "La Fata Alcina," written for Rubini and other performers, which was received with enthusiasm. He afterward wrote many operas, which were generally successful, for the theatres of Venice, Bologna, Rome, Milan, and Trieste. The most noted of these were: "The Princess of Navarre," "The Credulous Duke," "Tamerlane," "Mootar," "Mithridates," "Almanzor," etc. From none of them, however, did he succeed in acquiring a fortune, and from 1830 to 1845 he resumed his old employment

as musician at the Italian Theatre, though still composing new operas, cantatas, and rondos. Later in life he acquired a sufficient competence to enable him to live humbly and quietly at Bologna.

Oct. —. — VIGNERON, PIERRE-ROCH, a celebrated French artist; died in Paris, aged 88 years. He was a pupil of David and of Gros, and in 1819 exhibited the "Convoi du Pauvre," which was received with great favor. In 1847 he obtained the medal of the second class from the French Institute, and in 1854 he was decorated with the Cross of the Legion of Honor.

Nov. 1. — KELSIEFF, BASIL IVANOVITCH, a Russian revolutionary writer and journalist, born in St. Petersburg about 1835; died in that city. He was for ten years a pupil of the School of Commerce of that city, as a beneficiary of the Russo-American Company, and in 1855 entered the University of St. Petersburg for a two years' course in the Chinese and Mantchoo languages. In 1857 he embarked for Russian America, but, the ship having put in at Plymouth, England, he escaped from it and fled to London, where he studied Hebrew and undertook the translation of the Old Testament into Russian, following the interpretations of the Talmud. Falling in with Alexander Herten, he became soon after one of the editorial staff of the *Kolokol*, Herten's revolutionary journal, and prepared also several works for the propagation of socialist and materialist doctrines, and, with the assistance of Ogareff, published several supplements to the *Kolokol*, having the same end in view. Growing bolder by degrees, he attempted, in concert with his brother John, to rouse the inhabitants of Tulscha, a province of the Dobrudja, to insurrection against the Russian Government, and, making common cause with the insurgents of Podolia and Volhynia, to use incendiarism as a revolutionary measure. He was aided in this effort by a Polish Revolutionary Association, having its headquarters in London. Their scheme seemed likely to prove successful, as in all these provinces, as well as among the Cossacks of the Don, the Terek, and the Ural, are great numbers of a schismatic sect called "Raskolniks" or "Old Believers," who were ripe for revolution. Their archbishop opposed them, but they compelled him to fly into Turkish territory. Kelsieff next started a printing establishment at Tulscha, where he began to publish the works of the "Old Believers," and revolutionary documents also. The death of his brother disconcerted his plans, and Kelsieff returned to England in 1865, and removed the *Kolokol* to Geneva, where he continued its publication. After a time, however, wearied with his sufferings and disappointments, he gave himself up to the Russian Government, and after a brief imprisonment was set at liberty. Since that time he had lived in St. Petersburg, and engaged in literary pursuits. He had pub-

lished a history of the Raskolniks, and a narrative of his imprisonment.

Nov. 1. — MAGUIRE, JOHN FRANCIS, M. P., an Irish statesman; died in Cork, aged 57 years. He was a native of that city, and, having been educated for the law, was called to the bar in 1843. He represented the borough of Dungarvan from 1852 to 1865, when he was elected one of the members for the city of Cork. In Parliament he was an earnest defender of the interests of Catholics at home and abroad, and for many years was editor of the *Cork Examiner*, a Catholic paper of considerable influence in the south of Ireland. He took a leading part in promoting the growth of flax in Ireland, and established a company for introducing the linen industry into Cork. He was the author of "Rome and its Ruler" (1857-'59); an enlarged edition of the same under the title of "The Pontificate of Pius Ninth" (1870); "The Industrial Movement in Ireland in 1852" (1853); "Father Mathew" (1863); "The Irish in America" (1858); and "The Next Generation" (1871). Mr. Maguire was Mayor of Cork for some years, and was a strong advocate of self-government for Ireland.

Nov. 2. — AMAT DI SAN FILIPPO E SORSO, LUIGI, a Roman cardinal; died in Rome, aged 76 years. He was born at Cagliari, Sardinia, June 21, 1796; was educated at the college in Rome, was for some years legate of Bologna at Rome; was promoted to the cardinalate, May 19, 1837, was consecrated Bishop of Palestrina, March 16, 1852; and was Vice-Chancellor of the Holy Roman Church.

Nov. 5. — CLARKSON, JAMES BURNET, M. D., an eminent physician of Scotland; died at Edinburgh, aged 80 years. He was an intimate friend and family physician of Sir Walter Scott. He retired from practice many years previous to his death, to a fine estate near Edinburgh, where he entertained visitors hospitably and exhibited many valuable *souvenirs* of the friendship that existed between that great writer and himself.

Nov. 20. — LUCCA, FRANCESCO, a celebrated music publisher of Italy; died in Milan, aged 70 years. He was born at Cremona, in 1802, and was originally a music-engraver in the house of Ricordi.

Nov. 23. — JANET-LANGE, ANGE-LOUIS, a French historical painter; died in Paris, aged 54 years. He was born in 1818, and was a pupil of Collin, Ingres, and Horace Vernet. He adopted the manner of the last of these painters, especially in the numerous designs he made for woodcuts, which were published in a periodical, viz., *L'Illustration*. He also made a series of designs for military uniforms by order of Marshal Soult, though they were never adopted.

Nov. 25. — PLON, HENRI, a distinguished bookseller of Paris; died in that city, aged 66 years. He published Napoleon's "Life of Cæsar," and many other books of note.

Nov. 28.—BACHÉ, Dr. J. C. F., an eminent German scholar, editor of "Herodotus;" died at Heidelberg.

Nov. —.—BELLOGUET, Baron ROGET DE, a French archæologist and author; died in Paris. He originally belonged to the French Army, but retired from service in 1834, and devoted his whole time to archæological studies. The first works he published treat of the history of Burgundy ("Questions Bourguignonnes; Mémoires Critiques sur l'Origine et les Migrations des Anciens Bourguignons," 1847; "Carte du Premier Royaume de Bourgogne, avec un Commentaire sur l'Étendue et les Frontières de cet État," 1847; "Origines Dijonnaises," 1851). More recently, Baron de Belloguet concentrated his attention upon the difficult subject of Celtic antiquities, and the "Ethnogenie Gauloise," the first volume of which he published in 1858, was the result of his studies. It received from the Institute the Gobert prize. It comprises three parts: 1. A Celtic Glossary (a second and very much improved edition of this work appeared a few months ago); 2. "Types Gaulois et Celto-Bretons," 1861; 3. "Génie Gauloise." The "Ethnogenie Gauloise" is, undoubtedly, one of the most valuable contributions made by modern science to Celtic lore, and reflects the greatest credit upon the author.

Nov. —.—DELAPOORTE, MICHEL, a French vaudevilliste; died in Paris, aged 70 years. He was born in 1802, and commenced life as a painter, but was driven from his profession by failing sight, and eventually became completely blind. Previous to the complete loss of his sight, he turned his attention to dramatic literature. The best known of his pieces are: "Le Parisien," produced in 1838, "La Nouvelle Héloïse," "La Femme de Ménage," "Méphistophèles," "Masques de Velours," and "La Band Noire."

Nov. —.—LONDONDERRY, FREDERICK WILLIAM STEWART, fourth Marquis of; died in London, aged 67 years. He was born in 1805, was a marquis in the Irish peerage, and Baron Stewart in the United Kingdom. He was one of the Lords of the Admiralty, and Vice-Chamberlain of the Royal Household. He supported the Conservative party.

Nov. —.—MARQUET, Madame SABINA, née HEINEFETTER, an accomplished German singer; died in Baden, aged 67 years. She was born in Mayence, in 1805, and was one of six sisters, three of whom were famed *prima donna*. Early developing musical gifts, she travelled in her childhood over Germany, subsisting on the contributions received from the public for singing. At the age of twenty she received lessons from Spohr, who procured her admission into the Cassel Theatre, and, in 1829, appeared in Paris, at the Italian Opera, with credit, although Sontag and Malibran were singing at the same time. From 1831 to 1836 she performed with success in the various theatres of Germany, and, in 1841, went a

second time to Paris, where she sang in the "Huguenots." Some time after, she visited Brussels. Upon retiring from the stage, she made her residence in Baden.

Nov. —.—MERCANTINI, LUIGI, an eminent Italian musical composer; died in Palermo. He was the author of the "Garibaldi Hymn" (the "Italian Marseillaise").

Nov. —.—STEPNEY, COWELL, an English philanthropist; died at Carmarthen, Wales. Though an invalid the greater portion of his life, he gave largely of time, work, and money, for the elevation of working-men.

Dec. 7.—RANKLEY, ALFRED, a distinguished English *genre* and historical painter; died in London, aged 52 years. At the early age of twenty-one he brought before the public a scene from "Macbeth," and, three years later, "Othello lamenting over the corpse of Desdemona," both of which evinced decided genius. "Then came the Day of Shame," an illustration of Crabbe, in 1845; "Paul and Virginia," 1846; "The Village Church," 1847—a picture which was engraved, and was well received; "The Ruined Spendthrift," 1848; "Innocence and Guilt," 1849; "The Sunday-School," and "Contentment," 1850; "Eugene Aram," 1852; "Dr. Watts visiting some of his Little Friends," 1853; "Home revisited," 1854; "The Village School," and "From the Cradle to the Grave," 1855; "The Lonely Hearth," and "The Dame's Absence," 1856; also, "The Pharisee and the Publican." One of his best pictures was "Fetching the Doctor," a scene in a gypsy encampment. His last pictures were very successful—"The Return of the Prodigal," 1858; "A Sower went forth to Sow," 1863. His last exhibited picture was "Follow my Leader," 1867.

Dec. 9.—LORD, J. K., an English naturalist and author; died at Brighton, aged 55 years. He was formerly in the British Army, served as a captain of artillery through the Crimean War, and was in the Balaklava charge. He left the army to devote himself to natural history, and received the appointment of naturalist to the British North American Boundary Commission. The observations which he made in this capacity he published in "A Home in the Wilderness," "The Naturalist in Vancouver's Island," and in contributions to *Land and Water*, and other journals. He discovered several new species of fishes; and science owes to him many interesting observations on animals. Visiting Egypt, at the request of the Viceroy, he proved that the snakes of the charmers were harmless species, or, if dangerous, had had their poison fangs drawn, by actually allowing a snake to bite through his hand. The "Cleopatra asp," so called by the charmers, he examined, and ascertained that the horns were artificial. From Egypt, he was called to the Brighton Aquarium.

Dec. 23.—BEACONSFIELD, Mrs. MARY ANNE DISRAELI, Viscountess of; died in London. She was the daughter of Captain Viney Evans,

of the British Navy, and in 1815 married Wyndham Lewis, of Glamorgan, a gentleman of wealth, and a member of the British Parliament. He died in 1838, and the year following she married Mr. Disraeli, who had entered Parliament for the first time two years before, as the colleague of her former husband, representing the borough of Maidstone. Mr. Disraeli had at this time written some of his best novels, and acquired some political celebrity, but his subsequent splendid fortune was largely due to the social position and opportunities afforded him by his wife's dowry. He gratefully remembered this, and, dedicating to her one of his novels, termed her "a perfect wife." In 1868 she received from the Queen the title of countess, her husband having declined the title offered him. It is said that he wrote "Lothair" for her amusement.

Dec. — **MASSINGBERD, Rev. FRANCIS CHARLES, M. A.**, Chancellor of Lincoln Cathedral; died at South Ormsby, aged 72 years. He was born in Lincolnshire, in 1800, educated at Magdalen College, Oxford, where he graduated in 1822, and was presented with the living of South Ormsby in 1825, holding it until his death. In 1847 he became a Prebendary of Lincoln, and was appointed chancellor of that cathedral in 1862. He had exerted himself in the cause of the revival of the active powers of the convocation of the Church of England, and had written a "History of the English Reformation," 1857; "Law of the Church and State," 1857; "Prayer for Unity," 1861; "Lectures on the Prayer-Book. Lent," 1864; and several letters, pamphlets, etc., on religious questions.

Dec. — **MOLÉON, Sir DONALD**, an eminent Scottish Orientalist and statesman; died in London. He had spent some years in India, in the employ of the British Government, and in later years devoted his time and talents to the elevation of the poor and degraded in the darkest parts of the city of London. His life was an embodiment of Christianity, and, although greatly gifted in theological and ecclesiastical lore, he was always ready for any practical work in the cause of humanity.

Dec. — **POL, VINCENT**, an eminent Polish poet; died at Lemberg, Galicia, aged 65 years. His songs of *Janus*, written during the Polish insurrection of 1830, in which he fought as a common soldier, gained a wide popularity, and many of them are sung by the peasantry to this day. Scarcely less popular are the "Song about Our Country," and "Mohort," both full of the fervid patriotism which is characteristic of the best Polish poetry of the present time. For some years he filled the chair of Ethnology in the University of Cracow.

OHIO. The general prosperity of the State of Ohio, during the year 1872, has not been exceeded by that of any previous one. The returns of the assessors are not, however, completed in full until the year succeeding that to which they refer :

The balance in the State Treasury on the 15th day of November, 1871, was.....	\$748,176 27
The receipts for the fiscal year ending November 15, 1872, were.....	4,787,797 95

Total amount of funds in Treasury for the year.....	\$5,535,974 22
The disbursements during the year have been.....	5,058,435 83

Balance in Treasury, November 15, 1872....	\$447,538 84
--	--------------

On the 15th day of November, 1871, the public funded debt of the State was.....	\$9,022,721 73
---	----------------

The redemptions during the year were :

Loan of 1860.....	\$1,170 00
Loan of 1870.....	413,912 99
Loan of 1871.....	2,100 00
Loan of 1875.....	1,000 00
Loan of 1881.....	20,998 87
	<u>459,175 86</u>

Outstanding November 15, 1872.....	\$8,563,546 87
------------------------------------	----------------

Of the amount outstanding on the 15th of November, the sum of \$102,016 had ceased to draw interest, the holders thereof having been notified to surrender their stock for redemption, thus making the interest-bearing funded debt of the State \$8,461,531.87.

The funded debt is divided as follows :

Foreign debt—payable in New York City..	\$8,581,881 87
Domestic debt—payable in Columbus.....	1,665 00
Total.....	<u>\$8,583,546 87</u>

The local indebtedness of the State, on the 1st day of September, 1872, was as follows :

Net debt of counties.....	\$3,756,436 03
Net debt of townships, including debts created by boards of education, other than for separate school districts.....	447,283 10
Net debt of cities (first and second class)...	11,495,591 04
Net debt of incorporated villages.....	616,559 63
Net debt of school districts (special).....	1,274,723 17

Total.....	\$17,590,547 97
The amount of reimbursable debt, State and local, therefore, is.....	\$26,174,094 34
To which add irreducible debt.....	<u>4,083,475 08</u>

And we have aggregate debts in State.....	\$30,197,569 87
---	-----------------

In this statement the State debt is reckoned to November 15, 1872, and local indebtedness to September 1, 1872. To the local indebtedness above set forth is to be added, for debts created in aid of railroad enterprises, under what is known as the Boesel law, up to January 1, 1873, not less than \$4,000,000 more. On December 28d it was \$3,177,000.

The Adjutant-General reported that there were claims for reimbursement pending in the Treasury Department at Washington on account of expenses incurred by the State of Ohio during the late civil war, amounting to \$117,747.24, of which, claims to the amount of \$49,512.79 were prepared and presented during the year 1872.

The following is a general statement of the State's war account with the United States :

Total presented for payment.....	\$3,198,966 70
Total paid.....	\$2,826,247 94
Awaiting settlement.....	<u>117,747 24</u>
	2,943,995 18

Balance suspended and rejected.....	\$254,971 61
-------------------------------------	--------------

The Governor informed the Legislature that there was due from the General Government, to the States of Ohio, Indiana, and Illinois, a very large sum of money, on account of the five per cent. granted by Congress to the

several States, upon the sales of public lands. This five per cent. has been paid in full to all the States entitled to it, except Ohio, Indiana, and Illinois, which States have only received three per cent. A memorial was addressed to the Senate and House of Representatives at Washington, in January, 1872, by the Governors of the three States named.

The Assessors' returns and other official sources afford the following statistics:

Wheat.—Acres sown in 1871, 1,677,659; bushels produced, 22,274,378; average per acre, 13.27. This is an increase of 18,988 in the number of acres sown in 1870, and a decrease of 5,368 acres as compared with the average for the last thirteen years, which is 1,683,022; also an increase of 4,218,587 bushels as compared with the average for the thirteen previous years. The average bushels per acre for that time are 10.72, showing an increase in 1871 of 2.55 bushels per acre over that average. Ohio ranked second as a wheat-growing State in 1871.

Corn.—Acres planted, 2,682,165; bushels produced, 98,863,060; average per acre, 36.67. This crop is the largest ever raised in the State, and is an increase of 9,797,761 bushels on the crop of 1870, and a decrease of .89 bushel on the average per acre for that year. It is also an increase of 30,409,107 bushels on the average yearly production for the previous twenty-one years, and an increase of 3.84 bushels on the average per acre for that time. Ohio ranked third as a corn-growing State in 1871.

Oats.—Acres sown, 1,000,122; bushels produced, 82,696,127; average per acre, 82.69. This is the largest crop, by 6,123,453 bushels, ever reported to the State Department. Ohio ranks second as an oat-producing State.

Barley.—Acres sown, 81,253; bushels produced, 1,041,240; average per acre, 28.89. The average in 1871 is 4.89 bushels above the average for the ten previous years. Ohio ranks fifth as a barley-producing State.

Rye.—Acres sown, 37,207; bushels produced, 428,014; average per acre, 11.50. This is an increase of total production over the previous year of 96,816 bushels, and an increase of average production of 2.07 bushels. Ohio comes tenth among rye-producing States.

Buckwheat.—Acres sown, 14,972; bushels produced, 177,938; average per acre, 11.88. Decrease in bushels, 109,705; increase in average, .11. Ohio ranks the eighth State in buckwheat-raising.

Potatoes.—Acres planted, 100,630; bushels produced, 3,755,193; average per acre, 37.00; increase over previous year, 2,633,603 bushels; increased average, 17.27. Ohio ranks third in the list of potato States.

Comparative Aggregate of Grain Crops.—The total acreage of the grain and potato crops in the past six years reported is as follows: 1866, 4,635,559; 1867, 4,448,126; 1868, 4,770,047; 1869, 5,058,762; 1870, 5,168,400; 1871,

5,594,007. The acres sown in 1871 exceed the average acreage for the five previous years by the sum of 777,829, and is 425,607 in excess of the acres sown in 1870. The total production of grain and potatoes in Ohio for six years is as follows: 1866, 118,061,911 bushels; 1867, 104,724,257 bushels; 1868, 121,907,156 bushels; 1869, 126,401,382 bushels; 1870, 140,854,984 bushels; 1871, 164,635,950 bushels. The aggregate of the breadstuffs in Ohio, in 1871, shows an increase of 24,280,966 bushels over the aggregate for 1870, and an increase of 42,846,012 bushels over the average aggregate for the last five years.

Hay.—Acres, 1,377,876; tons produced, 1,526,806; average per acre, 1.10. Decrease from 1870, 27,816 tons; decrease in average, .01. Ohio ranks fifth in hay-production.

Flax.—Acres sown, 85,863; seed produced, 733,384 bushels; pounds of fibre produced, 24,477,861; increase in seed, 284,006 bushels; increase in fibre, 7,613,233 pounds.

Clover and Seed.—Acres sown, 454,099; tons of hay produced, 401,415; bushels of seed produced, 384,974; acres ploughed under for manure, 46,998. There was an increase in the acreage and production over 1870.

Tobacco.—Acres planted, 28,862; pounds produced, 36,177,630; average pounds per acre, 1,253. This crop shows an increase of 8,823 acres, an increase of 19,263,441 in pounds produced, and an increase of 409 pounds on the average per acre, as compared with the average for the six previous years. Ohio stands third in the production of tobacco.

Butter and Cheese.—Pounds of butter, 44,994,946; pounds of cheese, 32,394,152. Increase over 1870: butter, 1,974,392 pounds; cheese, 1,013,114 pounds. There were 8,524,612 pounds more butter made and 10,337,913 pounds of cheese manufactured in 1871 than the average for the eleven previous years.

Sorghum.—Acres planted, 23,072; pounds of sugar produced, 25,505; gallons of molasses produced, 1,817,042; average gallons to the acre, 78. Compared with 1870, there was a decrease in acreage of 378; an increase in sugar of 3,517 pounds; a decrease in molasses of 370,631; and a decreased average of 15 gallons.

Maple Sugar.—Pounds of sugar, 1,832,396; gallons of syrup, 271,113. Decrease from 1870 of 371,929 pounds of sugar, and increase of 14,980 gallons of molasses.

Sweet - Potatoes.—Acres planted, 2,693; bushels produced, 207,676; average per acre, 77. Increased acreage over 1870, 343; decreased production, 56,523; decreased average, 35 bushels.

Pasturage.—Number of acres in pasturage in 1871, 4,242,391, being an increase of 137,378 acres.

Uncultivated Lands.—The number of acres of uncultivated land in Ohio, in 1871, was 5,649,121, a decrease of 88,888 acres from the previous year.

Horses.—Number of horses listed for taxation, in 1872, 718,157; value, \$46,897,554; average value, \$65.87; increased number over 1870, 6,808 horses; decreased value, \$505,235.

Mules.—Number listed for taxation, in 1872, 22,958; value, \$1,589,535; average value, \$69.23; increased number, 972; decreased value, \$3,848; decreased average value, \$3.28.

Cattle.—Total number returned by assessors in 1872, 1,761,623; value, \$31,902,348; average value, \$18.10; increased number, 115,183; decreased value, \$3,740,136; decreased average value, \$3.54.

Sheep.—Number reported in 1872, 4,464,898; value, \$13,848,810; average value, \$3.10; increased number, 161,994; increased value, \$5,781,111; increased average value, \$1.23.

Hogs.—Number, 2,815,554; value, \$6,663,421; average value, \$2.37; increased number, 151,151; decreased value, \$2,626,993; decreased average value, \$1.42.

Wool.—The returns of the assessors show that the wool-clip of 1871 was 16,139,331 pounds, which is 572,190 less than the clip of 1872.

Dogs and Sheep-killing.—Number of dogs reported in 1871, 185,023; sheep killed by dogs, 39,726, valued at \$126,874; sheep maimed by dogs, 26,245, estimated damage, \$51,043.

Grapes and Wine.—Acres planted in 1871, 907; acres in vineyards, 11,219; pounds of grapes gathered, 19,292,980; gallons of wine pressed, 1,031,923. This is the largest crop ever gathered in the State, and, compared with that of 1870, shows an increase of 103 in acres planted, 329 in acres in vineyard, 3,439,261 in pounds of grapes gathered, and a decrease of 1,545,984 in gallons of wine pressed. The counties producing over one million pounds of grapes are as follows: Ottawa, 5,605,688; Erie, 4,628,436; Cuyahoga, 2,529,655; Lorain, 1,551,199; total, 14,814,978.

These counties produced about 75 per cent. of the crop gathered in 1871.

Orchards.—Acres in orchards, 383,647; bushels of apples gathered, 10,437,437; bushels of peaches gathered, 860,530; bushels of pears gathered, 126,982. Comparing with 1870, we have an increase of 6,350 acres in orchards, 550,891 bushels of peaches, 59,885 bushels of pears, and a decrease of 575,145 bushels of apples.

Coal.—The aggregate of stone-coal mined in 1871, as returned by the township assessors, is 55,316,666 bushels. The returns show that coal was mined in 37 counties in the State. The amount actually mined is doubtless largely in excess of the reported figures. An examination of the returns shows that one-half the coal reported mined was taken from the northeastern portion of the State.

Figures from the State Chemist, Prof. Wormley, show the result of analyses of the best iron-smelting coals of Ohio, from eight localities. The average of fixed carbon is 57.43 per cent., the highest, and therefore

most valuable for furnace-coal, being the Briar Hill (Mahoning County), 62.66, and the lowest, the Sunday Creek (Perry County), 53.62.

The English analyses of best furnace-coals give 50.19 for Scotch coal, 56.90 for Newcastle, 67.71 for Welsh coal. The analysis of Briar Hill coal, in full, is as follows: Specific gravity, 1.284; water, 3.60; volatile matter, 32.58; fixed carbon, 62.66; ashes, 1.16; sulphur, 0.85; color of ashes, red; character of the coke, pulverulent. The English analysis of Welsh coal is: Specific gravity, 1.315; carbon, 83.78; hydrogen, 4.79; nitrogen, 0.98; sulphur, 1.43; oxygen, 4.15; ashes, 491; percentage of coke, 72.62; fixed carbon, 67.61.

Iron.—Prof. Andrews, of the Geological Survey, who is in charge of the Southern Ohio district, reports iron-ore, in greater or less abundance, in the following counties: Muskingum, Licking, Perry, Hocking, Athens, Vinton, Jackson, Scioto, Lawrence, and Gallia. The ores in this district are of great excellence and purity, and the iron made from them has already a high reputation. The iron-ores of Southern Ohio are classified as limonites, or hydrated sesquioxides of iron, and siderites, or blue carbonates of iron.

In Vinton, Jackson, Scioto, and Lawrence Counties, the favorite ore rests upon a seam of limestone, and hence it is called the "limestone ore." It is remarkably free from sulphur and phosphorus, and the charcoal-iron made from this ore, according to Prof. Andrews, has no superior in the world.

The average percentage of metallic iron in a large number of the more important limonite ores of the limestone seam is 51.666; of the blue siderite ore, 88.050; of gray siderite, 35.526. The average of metallic iron in four samples of ore from the famous Cleveland iron district, England, is but 35.75 per cent., while the average of six samples from the fields in Southern Ohio is 36.57.

The ore least rich in iron is the "gray limestone." The Craig ore, found between Hamden and McArthur, Ohio, is a very rich limonite, and contains 58.62 per cent. of metallic iron. The "Hanging Rock" iron (for this name is generally given to all iron made south of the Hocking River) is everywhere celebrated for its superior quality.

Prof. Newberry says the quantity of iron-ore in Northeastern Ohio is large, but probably somewhat less than that found in the southern portion of our coal-fields. The kidney-ores exist in greater or less abundance in every township within the coal-area, and they are largely used in the furnaces in this locality.

Conspicuous bands of the "kidney" ore are found at several horizons in the lower coal-measures in Holmes County. In Columbiana County, the deposits of this ore are very rich. "In Tuscarawas County, at Dover and Mineral Point, the richest accumulation of kidney ore is over the gray limestone, and in the roof-shales of the Newberry coal. In Columbiana

County, there is some "black band" in the same position. In Mahoning County, from eight to eighteen inches of black-band iron-ore is found." Prof. Newberry reports the black-band stratum in different localities in Stark County, where it attains a maximum thickness of twenty feet, but is less rich in iron than in Tuscarawas County.

Pig-Iron.—The Secretary of State complains that the law under which statistics of iron-manufacture were to be returned to his office has this year been a dead letter, and he is therefore unable to give trustworthy statistics on this important branch of Ohio manufacture.

Iron and Steel.—From advance sheets of the national census, the Secretary compiles a table showing 62 iron manufactories of all kinds, in Ohio, in 1870, employing 5,888 hands, nearly \$8,000,000 capital, paying over \$8,000,000 annually in wages, using nearly \$10,500,000 material, and turning out products to the value of \$15,500,000. Since that year, the number and operations of these establishments have been greatly enlarged, as Cleveland alone, which in 1870 had but eight rolling-mills, had 14 in 1872. Ohio stands fourth in the manufacture of iron-rails, and in 1871 produced nearly 76,000 tons. Of rolled and hammered iron, Ohio manufactured more than one-tenth of all in the United States—the amount for Ohio being over 76,000 tons. Bessemer steel, of which 45,000 tons were made in the United States in 1871, is in Ohio manufactured only at Cleveland.

Marriages and Divorces.—The number of marriages, in 1872, was 26,808, exclusive of Coshocton County, whose probate judge could not, the Secretary says, be induced to report; an increase in the number of marriages over the previous year of 1,053. The number of marriages in 1872 was larger than in any year for fourteen years, except 1866, 1867-'68, in the first of which there were 30,479; in the next, 29,230; in the next, 28,231. In these three years, marriages, postponed during the war, took place. One thousand and twenty-six divorces were granted in 1872, which was 41 less than the previous year. Less than one-half the actions for divorce were brought by husbands. Of the whole number, 235 were for adultery. The proportion of divorces to marriages is 1 to 25.

Births.—The number of births in 1872 was 61,210; an increase of 1,293 over 1871. Of the births in 1872 only 384 were illegitimate.

Deaths.—The deaths in 1872 were 25,202, which was 43 more than the previous year. Eleven persons who died in 1872 were upward of one hundred years old.

Naturalizations.—Persons naturalized in 1872 were 3,001, or two more than the previous year.

Illiteracy.—Number of persons ten years old and over, who cannot read, 92,720; number between fifteen and twenty-one years old, and over, who cannot write, 173,172; of these, 134,102 are natives, and 37,070 foreign born.

School Attendance.—The returns of school attendance show a total of 645,639, of which 632,202 are native, and 13,437 foreign. The divisions, by sex and color, are 329,367 males, and 306,413 females, whites, and 5,697 male, and 4,747 females, colored.

Pauperism.—The number of paupers in county infirmaries, in 1871, was 4,651; in 1872, it was 4,985, an increase of 334. The number of paupers otherwise supported by the counties in 1871 was 866; in 1872 it was 2,434; an increase of 1,568. The total in 1871 was 5,517; in 1872, 7,419; an increase of 1,902.

Prisoners and Jails.—Whole number of prisoners in county jails reported during the year, 5,000; total cost of keeping them, \$50,587.95. These show the reports of eighty-one counties only.

New Structures.—Number of new buildings of all kinds erected in 1872, 16,994.

Banks.—Number of national banks, 146; capital, \$25,531,700; private and other banks, 1,881; capital, \$7,267,096. This shows an increase of fifteen in the number of national banks reported, and their capital has been increased \$2,755,790. The number of private banks shows an increase of thirty-five during the year, and the capital of these banks has been increased \$2,162,628.

Bonds, etc., exempt from Taxation.—The amount of legal-tender notes, or other moneys exempt from taxation, as returned for this year, is \$9,378,747, being a decrease on last year, of \$1,823,333.50.

Wealth and Taxation.—The total valuation of property, as returned to the Auditor of State for 1872, is as follows: Acres of land returned for taxation, 25,421,137; value of lands, \$699,478,744; value of real estate in cities and villages, \$330,684,784; value of personal property, \$494,159,590; total valuation of taxable property, \$1,524,323,118; increase over 1871, \$2,193,147. The taxes levied in 1872, collectable in 1873, were: State taxes, \$4,414,557.25; county, and local taxes, \$18,834,422.49; delinquencies and forfeitures, \$561,992.23; total, \$23,810,971.97. A map showing the amount of wealth *per capita*, as reported to the United Census Bureau, makes the Western Reserve, a large portion of Central Ohio, and a wide belt of Northern Central Ohio, average from \$750 to \$1,250 to every inhabitant. A considerable portion of Central Ohio, including the northern part of Scioto Valley, and almost the entire Miami Valley, average \$1,250 to \$2,000 *per capita*. Cincinnati, and the country immediately surrounding it, are the only parts of Ohio where the aggregate wealth averages over \$2,000 *per capita*. This map only represents developed wealth, and is no criterion of the actual resources of the country.

Incorporated Companies.—There has been a large increase of incorporated companies. Charters have been issued during the year, to 409 new companies, with an aggregate capital stock of \$138,206,960. Twenty manufacturing, rail-

road, insurance, and mining companies have increased their capital stock \$5,864,000.

Manufactures.—The Secretary of State gives the aggregate for the State, of "Selected Statistics of Manufacture," as follows:

Number of manufacturing establishments....	11,050
Number of hands employed.....	101,605
Amount of capital invested.....	\$196,673,640
Total value of products.....	\$283,568,813

The aggregate for the entire manufacturing industry of Ohio, as ascertained from Colonel Harrington, Acting Superintendent of the Census, Washington, is as follows:

Total number of manufacturing establishments.....	22,773
Total number of hands employed.....	137,300
(Besides steam-engines equal to 174,300 horse-power)	
Total amount of capital invested....	\$141,094,000
Total amount of wages paid.....	49,066,500
Total value of material used.....	157,131,700
Total value of products.....	269,714,000

The Secretary says: "From a careful examination of the tables of selected statistics published on the preceding pages, I am satisfied there are many important omissions in every class of manufacture. This fact is recognized by the Census Bureau in Washington. The total value of manufactured products in Ohio is doubtless \$300,000,000 yearly. This is almost three times the value of the entire grain-crop of the State."

Railroads.—The reports of railroad companies, having track in Ohio, are made to the Commissioner for the year ending with June 30th. By these returns there were 270 miles of track laid in Ohio during the year ending with June 30, 1872. Since that date, to December 15, 1872, there were 322 miles of track laid, and nearly 400 miles of road-bed were in advanced stages of readiness for the ties and rail. The following table, compiled from the returns to the commissioner of railroads, gives in the aggregate, and in condensed form, the capital stock, debt, earnings, passenger and freight traffic, dividends, accidents, etc., of all roads operated in this State:

Year ending June 30, 1872.	Entire Lines.	Lines in Ohio.
Capital stock paid in....	\$219,161,197 55	\$122,721,536 87
Funded debt.....	217,171,755 12	120,282,073 00
Floating debt.....	10,733,179 73	5,945,700 98
Length of line and branches, as proposed	7,408 miles.	Rail, 3,787 mls.
Cost of road and equipments.....	\$338,113,494 48	\$206,252,805 71
Gross earnings.....	65,603,078 12	34,267,799 97
Operating expenses.....	45,034,708 21	23,502,739 38
Net earnings.....	20,568,369 91	10,755,060 59
No. passengers carried.....	12,068,832
Tons freight carried.....	30,923,088
Interest paid on bonds..	\$2,736,329 06
Dividends paid.....	7,554,083 09
Number of persons killed.....	128
Number of persons injured.....	353
Number of animals killed.....	1,926
Amount paid for same.....	\$45,573 46
Number of employes.....	25,393
Per cent. increase of gross earnings for the year.....	12.74
Average cost per cent. of operating.....	68 32
Per cent. increase of net earnings for the year.....	11.93
Increase of rail laid in Ohio, including siding.....	375 miles.

The report of the Ohio Penitentiary shows a great diminution in the number of convicts, the average being 947, which is 67 less than during any year since 1867. This is attributed to the influence of the reformatory institutions for juveniles. The Reform Farm for Boys is reported highly successful in its operation. During the year, 148 boys were discharged, 98 of whom were returned to their parents and friends, and the remainder permitted to care for themselves, or placed out in proper employment. At the close of the year there were 864 inmates. The Girls' Industrial School is also progressing satisfactorily. During the year, 15 were discharged and 145 still remain. In the Soldiers' and Sailors' Orphans' Home are 402 children, two-thirds of whom are boys. The average age is ten years. In the Deaf and Dumb Institution are 338 pupils—197 males and 141 females. In the Institution for the Education of the Blind the average attendance is 111—56 males and 55 females. Of this number 69 are totally blind and 42 partially so.

On the 25th of September, the main portion of the Northern Ohio Lunatic Asylum, at Newburg, was destroyed by fire. The asylum was full of patients, none of whom were injured, though, in the work of saving them and extinguishing the flames, five lives were lost. The Central Lunatic Asylum, at Columbia, destroyed by fire in a previous year, has not yet been rebuilt, but the work has been commenced. The destruction of two out of the three State institutions for the insane has caused great suffering among that unfortunate class. Those portions of the Northern Asylum not entirely destroyed have been fitted up for the accommodation of as many as possible.

The General Assembly met January 1st, the Senate having 18 Republicans and 18 Democrats, and the House of Representatives 57 Republicans and 48 Democrats. The Senate effected an organization by the Lieutenant-Governor giving the casting-vote for the Republican nominees wherever a strict party division was made. The House organized by electing N. H. Van Vorhes as Speaker. On the 8th, Governor E. F. Noyes, and Lieutenant-Governor Jacob Mueller, took the oath of office. January 9th, the Senate took an indecisive ballot for U. S. Senator, and the House gave a majority for John Sherman. Next day the two Houses, in joint convention, reelected John Sherman to the United States Senate amid great excitement; the vote standing, John Sherman, 73; G. W. Morgan, 60; J. D. Cox, 5; Perry, 1; Schenck, 1. February 16th, there was an exciting scene in the Senate, upon a resolution declaring Senator Kemp (Democrat) not entitled to his seat on account of the improper rejection of the votes given his competitor, James Saylor, by the inmates of the National Soldiers' Home, at Dayton. Kemp was voted out, and his seat given Saylor,

but the excitement continued through several days. The General Assembly adjourned April 29th, until January 2, 1873, after a session of 120 days, during which 646 bills were introduced, and 189 joint resolutions offered for action in the two Houses; 141 general and 139 local laws were passed, and 70 joint resolutions adopted. Among the laws of general importance enacted were acts regulating the business of insurance in the State, and appointing a State Superintendent of Insurance; regulating coal-mines so as to provide for the greater safety of the miners; authorizing counties, cities, incorporated villages, and townships, to build railroads, and to lease and operate the same (commonly known as the Boesel Law); and redistributing the State for congressional purposes.

The Republican State Convention met at Columbus, March 27th, and nominated candidates for State offices as follows: Secretary of State, Allen T. Wikoff; Judge of Supreme Court, John Welch; member of Board of Public Works, Richard R. Porter. Nominations for presidential electors at large were also made, ex-Lieutenant-Governor John C. Lee and Alphonso Hart being chosen. The following platform of principles was adopted:

The Republicans of Ohio, in State Convention assembled, make the following declaration:

1. The Republican party of the United States had its origin in the necessities of the nation, and since it came into power has decreed and executed measures by which liberty has been preserved, and the Union saved from dismemberment, and slavery overthrown. Amid the disorganization and confusion existing at the close of the rebellion, the Republican party exercised its organizing and restoring power, and has succeeded in the difficult task of complete reconstruction, and has established freedom and equal rights for all people by irrevocable guarantees. In this great work, the Republican party has shown its wisdom and patriotism, and, by its unswerving good faith toward the national creditors, it has vindicated the national integrity and honor.

2. No other party known in history has so grand a record, and no other party in the United States can so proudly challenge the continued confidence of the people, and we declare that the good of the country demands that the Republican party should continue to administer the Government.

3. We renew our expressions of confidence in the present Administration of the General Government. Since it came into power, the taxes upon the people have been reduced, and the public revenues have been carefully collected and honestly applied, so that, while the burden of taxation has been lightened, the public debt has been diminished both in amount of the principal, and in the rate of interest. The administration deserves, also, the earnest approval of every friend of justice, order, and law, for the prompt and efficient manner in which it has suppressed Ku-klux disorders, and persecutions of loyal citizens in the South, a protection due from every good government to its people. And we refer with great satisfaction and pride to the system of pensions and bounties provided for our brave soldiers and sailors, and the homes founded and maintained for such as were disabled in the service of their country. These manifestations of public gratitude and justice must command the approval of every patriot. And we commend the policy of fairness and kindness toward the Indian tribes, as showing the wisdom and humanity of the President; and, in his efforts to reform

the civil service, we recognize a laudable desire to promote its efficiency and purity; and in the management of our foreign relations, including the important questions of international law involved in the Treaty of Washington, the Administration has shown rare wisdom, courage, and dignity, and has maintained the honor of the nation untarnished.

4. A large portion of the revenue necessary to defray the current expenses of the Government, and to pay its liabilities, must be derived from duties on imports. These duties should be levied with a view to equalize their burdens and benefits among the people, and so as to promote, as far as possible, the interests of every section and branch of industry, and so that labor of every kind may have constant employment and just reward.

5. We are opposed to further grants of the public lands to corporations and monopolies, and demand that the national domain be set apart for homes for the people, and for purposes of education.

6. As there can be no productive industry without a union of capital and labor, therefore we are in favor of such legislation as will give all proper guarantees for the safety and prosperity of the one, and remunerative investment of the other.

7. We have unbroken confidence in the integrity, prudence, and patriotism of President Grant, and are in favor of his renomination for a second term; and we present to the Republican party, for nomination for Vice-President of the United States, the name of Ohio's first war Governor, Honorable William Denison, a man eminently worthy of that high office.

The Democratic State Convention met at Cleveland, June 27th, and put in nomination the following candidates for State offices, all being Democrats: Secretary of State, Aquila Wiley; Judge of Supreme Court, John L. Green; member of Board of Public Works, E. J. Riley. The following platform was adopted:

Resolved, By the Democrats of Ohio in convention assembled: That the platform of principles adopted by the Cincinnati Convention, together with the clear interpretation of the same enunciated in the letter of Horace Greeley accepting the nomination of that convention for the office of President of the United States, affords common ground upon which the liberal men of all political parties can consistently unite in opposition to the present Administration, and its attendant official corruption.

Resolved, That our delegates this day chosen to represent us in the Democratic National Convention; to assemble at Baltimore, are requested to vote for the nomination of Horace Greeley and B. Gratz Brown as our candidates for President and Vice-President.

The Prohibitionists also had State candidates in the field, as follows: Secretary of State, Ferdinand Shumacher; Judge of the Supreme Court, Charles L. Fish; member of Board of Public Works, Melton Kennedy.

The election was held October 8th, with the following result:

Secretary of State.—Wikoff, 265,830; Wiley, 251,780; Shumacher, 2,045; Wikoff over Wiley, 14,050; over all, 12,005.

Judge of Supreme Court.—Welch, 268,223; Green, 253,086; Fish, 2,010; Welch over Green, 10,187; over all, 8,177.

Member of Board of Public Works.—Porter, 266,820; Riley, 250,365; Kennedy, 2,082; Porter over Riley, 16,455; over all, 14,373.

The total vote on Secretary of State was 519,655.

The vote for President, November 5th, resulted as follows:

U. S. Grant (Republican).....	381,853
Horace Greeley (Democratic-Liberal).....	244,331
James Black (Prohibition).....	2,000
Charles O'Connor (Straight-Democrat).....	1,163
Scattering.....	163
Total vote.....	529,498
Grant over Greeley.....	87,521
Grant over all.....	34,206

OLNEY, JESSE, A. M., an eminent teacher, and author of text-books for schools, born in Union, Tolland County, Conn., October 12, 1798; died at Stratford, Conn., July 30, 1872. He evinced in early childhood a remarkable aptitude for study, and, before reaching the age of sixteen years, was a fine classical scholar, and an adept in the science of geography, to which he devoted a large part of his life. He was a teacher for twelve years in the Hartford Grammar-School, and, while thus occupied, he was deeply impressed with the incompleteness of the old plan of teaching geography, which made the solar system the initial point, and blended that science with astronomy in a way most bewildering to the student. Reversing, therefore, the old method, he taught the learner to begin with the place in which he lived, and thence to advance until he had occupied the entire field to be traversed. This plan met with marked success. In 1828 he published his *Geography and Atlas*, which at once became standard school-books; successive editions being rapidly exhausted until the sale reached millions of copies. He served ten terms in the Legislature of his State, and was indefatigable in his labors in behalf of the common schools therein. To perfect himself in his favorite studies, he visited Europe in 1835, and again in 1838. In 1831 he brought out his "National Preceptor," which was one of the best reading-books that ever appeared in the United States. Its philosophical plan and orderly arrangement gave it universal popularity, and it was followed by a series of readers, outline maps, and arithmetical and historical text-books, all of great practical value. In 1834 he removed to Southington, and in 1854 to Stratford. In 1867 Mr. Olney was elected Comptroller of Public Accounts for the State of Connecticut. To his dying day he was remarkable for his industry, order, method, and studious habits, ever counting that day lost, in which he had not acquired some useful knowledge.

OREGON. The last fiscal period of two years in Oregon ended on the 6th of September. At the beginning of that period there was a balance of \$267,939.48 in the Treasury, and the subsequent receipts raised the total resources to \$942,570.51. The disbursements for the same period amounted to \$769,973.10, which left a balance of \$172,597.41. The State has no funded debt, but there are \$200,000 of bonds issued for the construction of the canal and locks at the falls of the Willa-

mette River, payable from the proceeds of sales of State lands, and \$90,477 of soldiers' bounty and relief bonds, besides outstanding warrants of the Treasury, amounting to \$76,883.69, and unaudited deficiencies to a small amount. The soldiers' bounty and relief fund in the Treasury is nearly sufficient to pay off the bounty and relief bonds. The assessed value of property in the State is about \$37,000,000, though its actual value is estimated at more than three times that amount. While the population has doubled in ten years and the value of property increased fourfold, the assessment-rolls show an increase of less than 85 per cent.

The State lands consist of 46,080 acres, granted by Congress for the support of a State University; two sections in each township for the support of common schools, 107,887 acres of which have been selected in the last two years; 90,000 acres granted for the establishment of an Agricultural College, which have been selected but not yet disposed of; 500,000 acres granted for internal improvements; swamp and overflowed lands for the benefit of common schools, of which 174,219.97 acres have been selected and reported to the School Land Commissioners; and about 500,000 acres of tide-lands.

A penitentiary is in process of construction at Salem, and is sufficiently advanced to accommodate all the convicts now under sentence. It has cost thus far \$159,000, about \$58,000 of which has been derived from the labor of the convicts. The penitentiary contains a school and a library, the latter being made up from contributions by the citizens of Salem. There have been 286 different persons confined in the penitentiary during the past two years.

The total number of persons in the State of school age, between four and twenty years, on the 1st of April, was 86,512, of whom 18,724 were males and 17,788 females. The average attendance at the public schools throughout the State was 12,120, and the number of teachers employed was 198, to whom the sum of \$68,097.82 was paid.

There has been a school for deaf mutes at Salem for the last two years, which was supported at an expense of little more than \$4,000. At the beginning of September there were ten male and eight female pupils in this institution.

The State University has not yet been established, and the Agricultural College is not thoroughly organized.

The first convention of the year was that of the "State Temperance Alliance," which was held at Salem on the 22d and 23d of February. It was determined, after much discussion, not to undertake the formation of a political temperance party, but the following resolutions were adopted:

Resolved, That we recommend the friends of temperance in the various precincts and cities of the State to meet on the second Wednesday evening

preceding each State election, to examine the rival tickets to see if true temperance candidates have been put in nomination for office, especially for the Legislature.

Resolved, That, in case it is found that true temperance candidates have been put in nomination by both Democrats and Republicans, we do not consider it necessary to nominate any separate ticket; and in case it is deemed that only one of the rival candidates for an office will honestly favor our cause, that that one be designated as our candidate; and in case no truly temperance candidate has been nominated for any important office, that an independent candidate be put in the field, in whom we have full confidence.

The following were also adopted, after a warm debate:

Whereas, This Alliance realizes the power of the ballot in all public reforms; and—

Whereas, Women are everywhere recognized as legitimate auxiliaries in the temperance movement, and have proved themselves active and efficient members of this Alliance, and have here freely exercised their right to vote; therefore—

Resolved, That we urge upon the Legislature of the State of Oregon the necessity of passing an act instructing the judges of elections to receive the votes of women upon the subject of temperance, under the fourteenth and fifteenth amendments, in their various precincts.

A bill was drawn up and unanimously adopted, to be submitted to the Legislature, as an amendment to the existing license laws.

The Republican State Convention was held at Portland, on the 20th of March. No State officers were to be nominated. J. G. Wilson was nominated for Representative in Congress, and delegates to the National Convention were named, and a ticket for presidential electors adopted. A platform was adopted, which lauded the achievements of the national Administration and of the Republican party, and contained the following declarations:

We admit of no distinctions between citizens, whether of native or foreign birth; and therefore we favor the granting of full amnesty to the people of those States lately in rebellion; and we here pledge the full and effective protection of our civil laws to all persons voluntarily coming to or residing in our land.

We favor the encouragement of railroads by the General Government of the United States, and hold that such disposition should be made of the public lands as shall secure the same to actual settlers only, in quantities not exceeding 160 acres.

That while we are in favor of a revenue for the support of the General Government, by duties upon imports, sound policy requires such adjustment of those duties on imports as to encourage the development of the industrial interest of the whole country; and we recommend that policy of national exchange which secures to the working-men liberal wages; to agriculture, remunerative prices; to mechanics and manufacturers an adequate reward for their skill, labor, and enterprise, and to the nation commercial prosperity and independence.

We believe that popular education is the sole true basis and hope of a free government, and shall ever oppose any diversion of, or interference with, the common-school funds or lands in this State, for any other than their legitimate purpose; and we condemn the act of favoritism by the last Legislature, whereby \$200,000, taken from the school fund, were granted to a corporation consisting mainly of Democratic leaders and party favorites, for the construction of a work which another corporation, entirely sound and

responsible, offered to construct for \$75,000 less; and that we are in favor of the passage by the Legislature of an efficient school law, such as shall secure to all citizens of our State a good common-school education.

We find no terms sufficiently strong to express our disapproval of those acts of the last Legislature whereby the swamp-lands belonging to this State have been taken from the needy settlers, and given without limit or proper competition in price to the land grabber and speculator; whereby the emoluments and salaries of State officers have been unconstitutionally increased, and the taxes increased thousands of dollars by the creation of new and unnecessary offices and salaries, for the purpose of providing for party favorites; and whereby the citizens of our metropolis have been deprived of and denied the right of controlling their police authority. And we equally condemn the administration of our State officers and laws as extravagant, reckless, illegal, and destructive, and we rightfully charge all these results as the acts of the Democratic party.

That the Republican party of this State are in favor of the General Government extending aid toward building a railroad from Portland, Oregon, to Salt Lake City, and from Jackson County to Humboldt, and we hereby pledge our party representatives to the support of the same.

That the indiscriminate licensing of persons to sell spirituous liquors without being placed under proper responsibilities for the abuse thereof, having been found by experience to promote the growth of crime and pauperism, and thereby to seriously increase the rate of taxation, the Republican party recognizes the right and duty of the law-making power to prevent and limit the evils and abuses of such sale, so far as concerns the public good, and is consistent with individual liberty, by refusing to license other than law-abiding and responsible persons, who can furnish sufficient sureties for good conduct.

That the Republican party of Oregon is in favor of obtaining assistance from the General Government for the construction of a wagon-road from the city of Portland to the Dalles, recognizing this as a most important and necessary improvement for the State.

We hail the "new departure" of the late Democratic party, taken by the action of their conventions in seven States, as an affirmation of the principles for which the Republican party has contended for the last ten years; and in the "passive policy" of that party, already assumed in several of the States, we recognize an acknowledgment of their hopelessness of success in the coming Presidential campaign.

The Democratic Convention was held at Dalles, on the 10th of April. John Burnett was nominated for Congress, and the following platform adopted:

Resolved, 1. That we, the Democratic party of the State of Oregon, are pledged to a strict construction of the Constitution, the restoration and preservation of the rights of the States to regulate their internal affairs, and especially the elective franchise, free from the control or interference of the General Government; the protection of individual rights in accordance with the fundamental laws of the land, including the rights to the writ of *habeas corpus*, trial by jury, and freedom from unreasonable searches and seizures.

2. That we are opposed to every species of corruption in all departments of the municipal, State, and national Governments.

3. That our motto is, no privileged classes and no privileged capital.

4. That we are in favor of a tariff to raise money only for the necessary expenses of the Federal Government, and not for the benefit of monopolists.

5. That we view with alarm the flagrant and open

violations of the Constitution by the party now controlling the General Government, in the passage and enforcement of the reconstruction and Ku-klux laws, and the corruption and fraud which characterize their administration of every department of the Government, and we pledge ourselves to use all lawful and peaceable means to secure a speedy correction of these outrages and usurpations.

6. That the freedom, welfare, and rights of the people are superior to the interests of corporations, and should be protected against the exactions of oppressive monopolists.

7. That we favor the appropriation of the fund arising from the sale of the swamp-lands to purposes of internal improvements and the aid of common schools.

8. That the construction of locks at the Falls of the Willamette is a judicious and effective safeguard of the commerce of the Willamette Valley, and we favor legislation to the end that the commerce of the Columbia River may be in like manner benefited and protected.

9. That the thanks of the people of Oregon are due our present State administration for its successful efforts in securing to the State the grants of land which otherwise would have fallen into the hands of grasping corporations.

The State election occurred on June 3d. The whole number of votes cast for Representatives to Congress was 25,484, of which Wilson received 13,167, and Burnett 12,317, making the majority of the Republican candidate 850. The Legislature consisted of 12 Republicans and 10 Democrats in the Senate, and 32 Republicans and 17 Democrats in the House. At the presidential election in November there were 20,138 votes cast, of which 11,820 were for Grant, 7,746 for Greeley, and 572 for O'Connor: Grant's majority over Greeley was 4,074; over all, 3,502.

The seventh biennial session of the Legislature began at Salem on the 9th of September, and continued until the 23d of October. One of the first things done was to rescind the resolution adopted by the Legislature of 1868, refusing to ratify the fourteenth and fifteenth amendments of the Federal Constitution. A portion of several days was occupied in electing a United States Senator to succeed George H. Williams. John H. Mitchell, who was nominated in a caucus of the Republican members of both branches of the Legislature, was finally elected. An act redistricting the State for representation in the Legislature increased the number of Senators from 22 to 30, and that of Representatives from 49 to 60. Among the bills passed during the session were the following: To provide for a Board of Immigration; to appropriate \$100,000 for the erection of new Capitol buildings at Salem; to establish a Reform School at Portland; to establish a uniform system of schools; to locate the State University at Eugene; to organize the Agricultural College, and provide for its support; to provide for common schools taught in the German language; to provide for a State geologist; to provide a school for the education of the blind; to prevent frauds in elections; and "to authorize the State to acquire possession of the canal and locks at the Willa-

mette Falls by lease, and to purchase the same, and to make appropriation therefor." A bill regulating the sale of intoxicating liquors, and making vendors responsible for the damage done by intoxicated persons, was discussed, but finally defeated. The act to encourage immigration was vetoed by the Governor, on the ground that it would raise the expenses of the year beyond the income, which is forbidden by the constitution. "The Assembly having taken no action," he said, "to correct our defective mode of assessments, or to provide for previous deficits, notwithstanding the creation of a State Board of Equalization, the public revenues will not approximate the appropriations within the constitutional limit. This appropriation, therefore, cannot be sustained in view of the present condition of the Treasury."

The election law provides that each elector shall "in full view deliver to one of the judges of election a single ballot or piece of paper on which shall be written or printed the names of the persons voted for, with a proper designation of the office which he or they may be intended to fill."

If any person offering to vote is challenged, he must be put to oath as to his qualifications, and required to answer certain prescribed questions to establish them. If he refuses, his vote shall be rejected. It is the duty of each judge of election to challenge "any person offering to vote whom he shall know or suspect not to be qualified as an elector."

After the votes have been canvassed, the poll-books and the ballots must be sealed up and sent to the county clerks.

Some difficulty with the Modoc Indians occurred in the valley of the Klamath River, near the California border, in the latter part of the year. By a treaty first made in 1864, and amended in later years, the Modocs had agreed to give up their lands and remove to what was known as the Klamath Reservation. All but a band of about 200, under "Captain Jack," "Black Jim," and "Scar-faced Charley," had complied with this agreement, but these not only refused to go upon the reservation, but were guilty of numerous depredations upon the white settlers. In accordance with a recommendation from the superintendent of the reservation, and other prominent citizens, the Commissioner of Indian Affairs had in July ordered the removal of these refractory Modocs to the Klamath Reservation. A delegation was sent to their camp on the 25th of November, to request the chiefs to meet the Superintendent on the 28th, at Link River. This they declined to do, and furthermore declared that they would not go upon the reservation. The execution of the order of the Commissioner was then turned over to the military department, and Captain Jackson, with a company of troops, left Fort Klamath for that purpose. He reached the camp of the Modocs, near the mouth of the Lost River, on the 29th of November, where he had an in-

interview with "Scar-faced Charley." The Indians refused to go peaceably to the reservation, and before the end of the interview fired at one of the officers. A fight ensued, in which three or four white men, and twelve or fifteen Indians, including "Scar-faced Charley," were killed. The Indians afterward retired to some high lands, known as the lava-beds, beyond the California border, from which the United States troops had failed to dislodge them at the close of the year. Negotiations are pending to secure a peaceable removal of the Modocs to the reservation, if possible.

According to the census of 1870, of the total population (64,685), ten years old and over, there were engaged in all classes of occupations, 30,651 persons, of whom 29,968 were males, and 683 females. There were, engaged in agriculture, 13,248, including 13,232 males and 16 females; in professional and personal services, 6,090, including 5,522 males and 568 females; in trade and transportation, 2,619, including 2,611 males and 8 females; in manufactures, and mechanical and mining industries, 8,694, including 8,603 males and 91 females.

The State contained 1,116,290 acres of improved land, 761,001 of woodland, and 511,961 of other unimproved land. The cash value of farms was \$23,852,989; of farming implements and machinery, \$1,293,717; total amount of wages paid during the year, including value of board, \$719,875; total (estimated) value of all farm productions, including betterments and additions to stock, \$7,122,790; orchard-products, \$310,041; produce of market-gardens, \$105,371; forest-products, \$259,220; value of home manufactures, \$87,376; value of animals slaughtered or sold for slaughter, \$1,865,737; of all live-stock, \$6,828,675. There were 51,702 horses, 2,581 mules and asses, 48,325 milch-cows, 2,441 working-oxen, 69,431 other cattle, 318,123 sheep, and 119,455 swine. The chief productions were 1,794,494 bushels of spring, and 546,252 of winter, wheat, 3,890 of rye, 72,138 of Indian-corn, 2,029,909 of oats, 210,736 of barley, 1,645 of buckwheat, 3,847 pounds of tobacco, 1,080,638 of wool, 12,575 bushels of peas and beans, 481,710 of Irish, and 1,970 of sweet, potatoes, 1,751 gallons of wine, 118,373 pounds of butter, 79,333 of cheese, 107,367 gallons of milk sold, 75,357 tons of hay, 1,210 bushels of grass-seed, 9,745 pounds of hops, 40,474 of flax, 10,988 bushels

of flax-seed, 1,207 pounds of wax, and 66,858 of honey.

The total number of manufacturing establishments was 969, using 88 steam-engines of 2,471 horse-power, and 236 water-wheels of 5,806 horse-power, and employing 2,884 hands, of whom 2,753 were males above sixteen, 67 females above 15, and 64 youth.

The total amount of capital invested was \$4,376,849; wages paid during the year, \$1,120,173; value of materials consumed, \$3,419,756; of products, \$6,877,387.

There were 168 establishments devoted to gold-mining, employing 880 hands; capital invested, \$321,520; wages, \$79,022; materials, \$29,930; products, \$417,797. These were distributed as follows: hydraulic mining, 26; placer, 139; quartz, 8.

The whole number of newspapers and periodicals was 35, having an aggregate circulation of 45,750, and issuing annually 3,657,300 copies. There were four dailies, with a circulation of 6,850; 26 weekly, circulation 30,400; 5 monthly, circulation 9,000.

There were 2,361 libraries, having 334,959 volumes. Of these, 2,195, with 273,427 volumes, were private, and 166, with 61,532 volumes, were other than private, including eight circulating libraries, with 7,150 volumes.

The total number of religious organizations was 220, having 135 edifices, and 39,425 sittings, and property valued at \$471,100. The leading denominations were:

DENOMINATIONS.	Organizations.	Sittings.
Baptist.....	23	4,750

P

PARAGUAY (REPÚBLICA DEL PARAGUAY), an independent state of South America, lying between latitude 19° and 27° 35' south, and longitude 54° 10' and 58° 40' west. It is bounded on the north by Brazil; on the east by the same empire; on the southeast, south

and southwest, by the Argentine Republic, and on the west by Bolivia. The area of Paraguay may be estimated at about 68,000 square miles, a considerable portion of its territory having been ceded, as a war indemnity, to Brazil, by a treaty concluded between the two Govern-

ments in the course of the year. (See BRAZIL.) The population is about 1,000,000.

President, Don Salvador Zovellanos, was elected December 12, 1871, for three years.

Of the commerce, once rather extensive, but paralyzed by the late war, little is at present known; the most recent statistics published are those of 1862, in which year the single article of *mata*, or Paraguay tea, was exported to the amount of \$1,465,808.

There is in the republic a line of railway (1863) from Asuncion to Paraguay, a distance of about 45 miles.

It is not surprising that the finances of the country are in a deplorable condition after such a protracted and disastrous war, as an indemnity for the expenses of which Paraguay agreed to pay \$200,000,000 to Brazil, \$35,000,000 to the Argentine Republic, and \$1,000,000 to Uruguay, and at a time when the total revenue of the republic does not amount to more than \$390,000, according to the budget for the year 1871. In that year the Government negotiated, with the house of Robinson, Fleming & Co., of London, a loan of £1,000,000 at 80, with interest at 8 per cent., for which loan it gave a guarantee of \$96,900,000, in the following State lands: plains, \$28,800,000; mountains, \$51,300,000; and pasturage and *mata* plantations, \$16,800,000.

The only events of importance, in the year 1872, were the transactions of the commission to settle the question of boundaries and the war indemnity (the results of which commission, together with the leading terms of the treaty, will be found in the article "BRAZIL," of the present volume), and the vigorous and determined efforts made by the Government, in coöperation with immigrant companies formed in England and other European countries for the purpose of inducing immigrants to settle in the republic, in order to renovate the condition of a country that has suffered so much from the ambition of former tyrannical rulers. Her Britannic Majesty's Emigration Commissioners issued, however, a manifesto, warning all British subjects against committing themselves to the tender mercies of a country which the commission's missionary described as situated partly in the tropics, and the climate, the employment afforded by the staple productions, the want of easy access to good markets, the language, the habits and customs of the people of which, render it a place by no means suitable for British laborers. All these objections were, of course, met by the opposite party; and, in October, an agent of the London firm engaged in promoting immigration to Paraguay, arrived in that country, with the object of making preparations preliminary to the reception of 200 English immigrants, to arrive in a steamer specially chartered for the purpose.

The agent alluded to was accompanied by an engineer, commissioned to explore the mountainous districts of Paraguay, supposed to be rich in mineral formations.

PARTON, Mrs. SARA PAYSON WILLIS, an American author and essayist, better known by her *nom de plume*, "Fanny Fern," born in Portland, Maine, July 7, 1811; died in Brooklyn, N. Y., October 10, 1872. She was a daughter of Nathaniel Willis, a publisher and editor, first in Portland, and afterward in Boston. Her mother was a woman of superior intellect and genius. Of her brothers, the late Nathaniel P. Willis and Richard Storrs Willis have attained literary eminence. Her parents removed to Boston when she was a child of six years. Her earlier education was obtained in Boston, but she was transferred in 1827 to the Hartford Female Seminary, of which Miss Catherine Beecher was then principal, and her eccentricities made a lasting impression on the people of that city. In 1834 she married Charles Eldridge, of Boston, by whose premature death in 1846 she was left a widow with three children, and in very straitened circumstances. A subsequent marriage, about 1849, with a Mr. Farrington, proved unfortunate, and the parties soon separated. Out of her still impoverished condition was developed her ability as a writer. In 1851 she offered an essay, signed "Fanny Fern," to one of the literary weeklies of Boston. It was accepted and acceptable, and there was an immediate demand for more, under the influence of which "Fanny Fern" grew rapidly into fame and favor. These leaflets were gathered into a volume, with the title of "Fern Leaves," and had a great sale, no less than 75,000 copies of the book having been sold. "Little Ferns for Fanny's Little Friends," her next book, sold to the extent of about 33,000 copies, and a second series of the "Leaves" reached an issue of over 30,000. In 1854, her first novel, "Ruth Hall," appeared. It was not a genial book, and over its family revelations and allusions a generous charity draws a veil of forgetfulness. "Rose Clark," published in 1857, was a more sunny work, and commanded a wider circle of readers than even the unhappy notoriety of its predecessor had attracted. The two novels were the only ones which "Fanny Fern" ever published; they provoked much criticism, and were read by thousands who sought, in their pages, the same grace and vivacity which had been the charm of her less pretentious writings. Her later works were "Fresh Leaves," 1857; "Folly as it Flies," 1868; and "The Play Day Book," 1869. Most of them were republished in England, and a volume, entitled "The Life and Beauties of Fanny Fern," was published in London, in 1855. In 1854, Mr. Robert Bonner, editor of the *New-York Ledger*, made a contract with her to write an article every week for his paper, and this contract was maintained without default till within a few weeks of her death. In 1856 she was married to Mr. James Parton, of this city, a well-known historical writer and essayist. After her marriage her published writings were not voluminous, but their

character was considerably modified and improved, compared with those of her earlier career. She was "a good hater," and her pen, gentle and mild enough when pursuing congenial themes, was pointed and galling when engaged in the chastisement of vice, cant, or snobbery. She had a fierce hatred for every sort of hypocrisy, and, with the inevitable tendency of one who pursues these subjects with pertinacity, she sometimes drifted into extravagance and uncharitableness. As a writer of brief sketches and essays for the weekly press, she excelled; and in the production of these she was indomitable in industry, fertile in resource, and boundless in patience. She showed her struggling sisterhood what woman could do with the pen; for, in spite of numberless obstacles, she won herself a place in current literature, a generous income, and many honest friends and admirers. Her life was not always sunny; but its closing years were unclouded, save by bodily ills; and, after a long, busy wrestle with life's problems, she slept well.

PENNSYLVANIA. The legislative body of this State adjourned *sine die* on the 4th of April. During the session, which was about seven weeks shorter than in 1871, nearly two thousand acts were passed, mostly of a private or local interest. It was estimated that "several among the members, representing mining and manufacturing districts, had over 150 of these private bills each," and that hundreds of such bills, it being impossible to give due attention to them, are passed without any one, except those immediately interested, knowing anything about them." To remedy this evil, by providing for the enactment of general laws concerning manufactures, mining, transportation, and the formation of stock corporations, is regarded as one of the chief subjects of organic reform needed in the State.

On the day next preceding the final adjournment, a measure of consequence, as it affects public order, passed both Houses, "by reading the bill by its title," under a suspension of the rules. It repealed "the conspiracy act," which was passed to restrain the miners, and prevent disturbances on their part, during the so-called strikes. By the repeal of that act, the miners are again allowed "to combine together for such purposes as they think proper, without the fear of an indictment for conspiracy, enforced by the State militia."

Among the laws of a public character passed by this Legislature, was "an act to reorganize the congressional districts of Pennsylvania in accordance with the act of Congress approved February 2, 1872." It passed both Houses at the close of the night session of April 3d. The opponents of the bill denounced its passage as "the consummation of a grave injustice." The President of the Senate, on the contrary, in his address to that body at the time of adjournment, congratulated its members upon the business transacted during the

session, and referred to this measure in a particular manner, saying: "The congressional apportionment—invariably a work of great difficulty and labor—has been made in a form which has received the approval of a decided majority of this body, and the mixed vote on the final passage of the bill is sufficient evidence that we have risen above partisan consideration in its construction."

The passage of the House bill entitled "An act to revise and amend the constitution of Pennsylvania," seems to be the most important measure enacted. The chief provisions of the act are as follows:

The said convention shall consist of 152 members, to be elected in manner following: Twenty members thereof shall be elected in the State at large as follows: Each voter of the State shall vote for not more than ten candidates, and the twenty highest in votes shall be declared elected, and the other 132 delegates shall be apportioned to and elected from the different senatorial districts, as formed by the apportionment act dated May 6, A. D. 1871. It shall be the duty of the delegates, so elected, to assemble in convention in the hall of the House of Representatives, at the State Capitol in Harrisburg, on the 12th of November, 1872. One-third of all the members of the convention shall have the right to require the separate and distinct submission to a popular vote of any change or amendment proposed by the convention. Nothing contained in the act shall authorize the convention to change the language, or to alter, in any manner, the several provisions of the ninth article of the Constitution, commonly known as the "Declaration of Rights," but the same was excepted from the powers given to the convention, and declared to be and remain inviolate forever. The convention was forbidden to create, establish, or submit any proposition for the establishment of a court, or courts, with exclusive equity jurisdiction.

George Connell, the State Senator-elect from the Fourth Senatorial District of Philadelphia, having died on October 26, 1871, a special election to fill the vacancy was held in that district on the 30th of January, 1872. Alexander K. McClure and Henry W. Gray were the candidates. Mr. Gray was declared elected, and installed in the vacant seat, the returns of election showing that he had received a large majority of votes over his competitor.

Certain statements having then been circulated, and doubts arising as to the legality of the election—returns in behalf of Mr. Gray, a number of citizens resident in the said district petitioned the Senate for an official investigation of the matter, that justice might be done to Mr. McClure, in case the facts charged were proved true. Long and animated debates ensued, as to the Senate's right to receive the petition, some members denying it on the ground that, by an express provision of the constitution, the application to contest the

seat of a member must be presented within ten days after the organization of the House. Others said that the above-mentioned provision contemplated only cases of elections held before the meeting of the Legislature, and not those of special elections, held during its session. This sentiment prevailed, and an investigating committee of seven was appointed.

The committee having effected their organization on the 21st of February, commenced at Harrisburg, and then proceeded to Philadelphia, where, in a continuous series of sessions, extending from February 26th to March 20th, inclusive, "they examined nearly one thousand witnesses for the petitioner and about eight hundred for the respondent." On the 23d, at Harrisburg, "they heard at length the arguments of the respective counsel." On the 27th the chairman submitted to the Senate the result of the investigation, in a short preliminary report, signed by four members of the committee, and introducing and embodying the resolution adopted by them, as follows:

The committee selected to try the matter of the petition contesting the election of Henry W. Gray as Senator from the Fourth District, make report:

That, having heard the parties in the case, and taken testimony upon the points in controversy between them, the committee have this day adopted the following resolution as their judgment and determination in the case:

Resolved, That the return of Henry W. Gray as Senator from the Fourth Senatorial District is false and fraudulent, and that at the special election in said district, on the 30th day of January last, Alexander K. McClure did receive a majority of the legal votes cast therein, and is entitled to his seat in the Senate, to fill the vacancy occasioned by the death of Hon. George Connell, late Senator-elect from said district.

C. R. BUCKALEW,
J. D. DAVIS,
A. H. DILL,
A. G. BRODHEAD, JR.

The report and resolution were adopted by the Senate; Mr. Gray was accordingly ousted, and Mr. McClure sworn in as Senator from the Fourth Senatorial District, on the same day.

A full and very lengthy report of this investigation, bearing the same signatures as the preliminary one just cited, was presented by the chairman on the 29th of March. It gives a detailed account of the investigation, and embodies the evidence of the sworn testimony, together with the remarks of the committee on the facts thereby established; concluding with their finding in the case, as follows:

The committee have found that by the rejection of the fraudulent returns from the ten divisions before mentioned, and by the correction of votes in other divisions, as heretofore stated, the majority of 891 for Colonel Gray upon the general return of the district is reversed, and a majority of 224 votes established in favor of Colonel McClure. Their conclusion, therefore, must be that the latter was duly elected Senator from the Fourth District, to fill the vacancy occasioned by the death of George Connell, late Senator-elect from said district. All of which is respectfully submitted.

C. R. BUCKALEW,
J. D. DAVIS,
A. H. DILL,
A. G. BRODHEAD, JR., } Committee.

The Republican party, in pursuance of a call issued by their Central Committee, under date of February 5th, met in State Convention at Harrisburg, on the 10th of April, "to nominate candidates for Governor, Judge of the Supreme Court, Auditor-General (should the Legislature provide for the choice of one by the people), and an electoral ticket; and also to elect senatorial and representative delegates to represent the State in the Republican National Convention to be held at Philadelphia, June 5, 1872." The following candidates for State offices were nominated: For Governor, John F. Hartranft, of Montgomery County; for Supreme-Court Judge, Ulysses Mercur, of Bradford County; for Auditor-General, Harrison Allen, of Warren County. The nominations of Mr. Mercur and of Mr. Allen were, on motion, made unanimous. The same motion was made in regard to the nomination of Mr. Hartranft for Governor, concerning which some reports stated that "the motion was carried with applause;" others stated that, the question being put, the favorers of Mr. Ketcham "vigorously voted 'no';" adding that "the Chair decided the motion carried; but a singular sound of hissing was mixed up with the applause."

The power of action conferred on the delegates to the National Convention appears from the following resolution, which was adopted unanimously:

Resolved, That the delegates from the State to the National Convention are hereby instructed to cast the entire vote of the State for General Grant for the presidency, and that on the question of the vice-presidency they are instructed to act together for the best interests of the Republican party; and, upon all questions arising in said convention, they cast the vote of the State as the majority of the delegates may direct.

The Committee on Resolutions reported the following among others, which were unanimously adopted by the convention:

Resolved, That we reaffirm our devotion to the principles of the Republican party, and our belief that the continued existence of said party is necessary to the maintenance and success of those principles. The grand and fundamental idea of the equality of all men in political rights is not possessed by any party, and can be sustained faithfully only by those who are sincerely committed to it.

Resolved, That the adoption of the thirteenth, fourteenth, and fifteenth amendments to the Constitution of the United States has not been sufficiently acquiesced in by all to render certain and secure their permanent incorporation in that instrument, and, hence, the administration of the Government can safely be intrusted only to that party which is heartily and beyond question committed to them and the policy necessary to put them into successful operation.

Resolved, That we are now more than ever called to question the policy of protection to American industry. If the laborer is worthy of his hire, and a fair day's work entitles the worker to a fair day's pay, we must continue to throw the protecting arm of the Government around those who toil for their daily bread. The protective policy alone makes labor contented and capital secure. It renders employment certain, and pay ample and satisfactory, while free trade means that our laborers and mechanics must either work for lower wages, or that our fac-

tories should be closed through foreign competition, and the working-men of the country deprived of employment.

Resolved, That we demand a continued adherence to the policy, hitherto preserved under Republican auspices in our State and in the nation, of a steady and gradual reduction of the public debt. The interests of the people require that the most rigid economy should be practised in the administration of both the national and State governments, and that the taxes should be reduced in both as rapidly as is consistent with the honorable maintenance of the public credit and the certain extinguishment of the public debt.

Resolved, That we are earnestly in favor of the earliest possible removal of duties on tea and coffee, and the prompt passage of the bill for that purpose now before Congress.

Resolved, That the Republican party has given full evidence during the past eleven years of its ability to administer the Government honestly, faithfully, and successfully; it has within that time maintained the honor of our national flag at home and abroad, preserved the Union from disruption and restored it to its integrity, secured to all classes and conditions of men the rights given to them by their Maker, and, having proclaimed liberty throughout all the land, and to all the inhabitants thereof, has given to that proclamation the full effect to which it was entitled, and we, therefore, in its name, claim from the people a continuance of their confidence, and fearlessly challenge their scrutiny into its acts.

Resolved, That we point with pride to the record of General Grant's administration of the national Government: not only has the weight of internal taxation been almost wholly removed from the people's shoulders, but \$800,000,000 of the national debt have been paid off—a result never before attained by any other people under like circumstances, and for which we are indebted to the rigid honesty, strict economy, and sterling integrity, which the President has brought to the administration of national affairs.

Resolved, That we will stand by the Government in the foreign policy so firmly marked out and adhered to by President Grant. The honor of the nation, we feel, is safe in his hands, and the flag under which he never suffered defeat will not be dishonored while he is kept in the front.

Resolved, That the oil-producing, mining, lumbering, and manufacturing interests require protection from the efforts of dangerous combinations, and that such laws should be enacted by the General Assembly of the Commonwealth as will protect said interests both in their development and the transportation of their productions to market.

Resolved, That we present with peculiar pride, and with an assured confidence of their success, the names of General John F. Hartranft for Governor, Ulysses Mercur for Supreme Judge, General Harrison Allen for Auditor-General, and the gentlemen this day named for delegates at large to the Constitutional Convention. They are all men worthy of an active and ardent support at the hands of the Republican party, and we call upon our friends throughout the State to rally as one man to secure their triumphant election.

After the reading of these resolutions, and before their adoption, an additional one was offered by a delegate, namely:

Resolved, That this convention do earnestly recommend our Senators and Representatives in Congress to vote for the speedy passage of an act of Congress extending pardon and general amnesty to all persons engaged in the late rebellion.

Which was not agreed to.

The Democratic party assembled at Reading, on the 30th of May, to nominate their candidates for State offices, etc., as follows: For

Governor, Charles R. Buckalew, of Columbia County; for Supreme Judge, James Thompson, of Erie County, who was nominated, without ballot, by acclamation; for Auditor-General, William Hartley, of Bedford County.

The following resolutions were adopted by the convention unanimously:

Resolved, That the Democratic party, while, in the future as in the past, firmly upholding the Constitution of the United States as the foundation and limitation of the powers of the General Government, and the safe shield of the liberties of the people, demands for the citizen the largest freedom consistent with public order, and for every State the right of self-government; that, to uphold the former and protect the latter, the Democracy of Pennsylvania can find no better platform on which to stand than the great leading principles enunciated in the inaugural address of President Jefferson and the farewell address of the immortal Jackson; upon these two great state papers we plant ourselves and enter the contest of 1872.

Resolved, That abused as the public confidence has been, by a long period of official mismanagement, waste, and fraud, this convention invites the coöperation of all citizens of the Commonwealth in the earnest effort which the great constituency it represents is about to make, to remove from our State administration every taint of political corruption. The interest of every Pennsylvanian is directly and vitally concerned in the eradication of all unjust usages and practices by which individual fortunes may be created at public cost, and the attempt to do this can be made certainly successful, by the union of upright and fair-minded men of all parties, and by sustaining candidates of unquestioned abilities and unspotted names.

Resolved, That this convention appeals to the people of Pennsylvania for the support of the candidate for Governor whom it has placed in nomination, because his election will secure at once a correction of existing wrongs and the permanent future prosperity of the State. It asks for his support, because he has been nominated not to subserve the views or promote the interests of any section or faction, but to meet the requirements of an urgent and common need; because he fully represents and in his life and character fairly illustrates the true spirit and principles of popular government; because he has been an earnest, sincere, and efficient opponent of the fraudulent practices and false doctrines of the party that has held power through many long years of misrepresentation and misrule; because he stands pledged, by the record of his whole life, to administer his office, if elected, for the benefit, and only for the benefit, of the people; because he can be trusted to secure careful, economical, and responsible control of the agents and officials and the treasury of the Commonwealth; because he can be relied on to withstand unfounded and unjust demands to the prejudice of public rights, to oppose with vigor the encroachment of powerful corporations, and energetically resist the grant to aggregated capital of privileges which could be used to injure, hamper, and impede the efforts of individuals in the various enterprises and fields of labor which the State affords, and because his action in the past is proof that his official influence will be used hereafter to prevent the mischief of special legislation, and to destroy the possibility of procuring the enactment of any statute by the use of money or any other corrupt means.

Resolved, That, in presenting the Hon. James Thompson for Judge of the Supreme Court, we have only to invite the consideration of the people to the integrity, impartiality, and preëminent legal attainments which have characterized the discharge of his judicial duties during his fifteen years' service upon the bench of the Supreme Court.

Resolved, That in the persons of the candidates presented for the offices of Auditor-General, Congressmen at large, and delegates to the convention to amend the constitution, we have candidates eminently worthy of the confidence and support of the people.

Resolved, That the grant by the radical Legislature of this State of numerous charters creating such corporations as the "South Improvement Company," "Continental Improvement Company," and others of similar character, is unjust to the interests of trade, is dangerous to the rights and liberties of the people, and as such meets with our unqualified condemnation.

The Labor Reform party of Pennsylvania held their State Convention at Williamsport, on the 7th and 8th of May, for the purpose of nominating candidates for the State offices, etc. A letter from Mr. Buckalew was read, informing the convention that he would stand as its candidate, provided the Democratic Convention, to assemble at Reading, indorsed him. The ballot for Governor resulted in the nomination of Mr. William P. Schell, who received 29 votes against 20 given to Mr. Buckalew. For Judge of the Supreme Court, James Thompson, of Erie County, was nominated, and for Auditor-General, E. Billingsfelt, of Lancaster.

A delegate, representing the party in the western counties, proposed a strong protective tariff resolution, "as the sense of the Labor Reform Convention," for adoption, which produced great excitement in the meeting. After debate it was defeated, and a less obnoxious one passed. The author of the rejected resolution "pledged the western counties to defeat the nominees of the convention on such platform."

The Temperance party of Pennsylvania assembled in convention at Altoona on the 14th of June, to nominate candidates and announce their principles. The following nominations were then made: For Governor, S. B. Chase, of Susquehanna County; for Supreme Judge, Joseph Henderson, of Washington County; for Auditor-General, Barr Spangler, of Lancaster; for Congressmen at large, George F. McFarland, A. J. Clark, and B. Rush Bradford.

The import of the resolutions adopted at this convention may be briefly stated as follows:

The first approves the action of the convention of August 9, 1871.

The second confirms the proceedings of the National Prohibition party at Columbus, Ohio, February 22, 1872.

The third declares that the traffic in liquor as a beverage is injurious to the best interests of society, and demands its suppression by law.

The fourth resolves against the great danger arising from the competition of the ruling parties for the liquor vote.

The fifth pledges the adoption of political measures, but not the sacrifice of moral means.

The sixth invites all citizens to join in the effort to rescue the State from the dominion of intemperance.

The other resolutions recognize the duty

of protecting American industry, justice to woman as a voter, and the equality of labor with capital, and express continued reliance on the blessing of Almighty God.

The general election of October 8, 1872, resulted in favor of the Republican party. For Governor, the total number of votes (the highest ever polled in the State) was 672,406, of which John F. Hartranft, Republican, received 353,387; Charles R. Buckalew, Democrat, 317,760; Samuel B. Chase, Temperance, 1,259. For Auditor-General, whole vote cast, 669,516, of which Harrison Allen, Republican, had 352,368; William Hartley, Democrat, 315,788; Barr Spangler, Temperance, 1,260. For Supreme Judge, whole vote cast, 669,162, of which Ulysses Mercur, Republican, had 354,819; James Thompson, Democrat, 313,876; Joseph Henderson, Temperance, 967. For Congressmen at large, the entire numbers of votes cast by the Democrats for their three candidates, respectively, were 311,076, 314,014, 313,534; by the Republicans for theirs, were 397,743, 360,946, 398,018. For delegates to the Constitutional Convention, the total number of votes which the Democrats polled for their nominees in all the counties of the State was 308,127; the Republicans for theirs, 399,719.

The Constitutional Convention consists of 133 delegates, of whom 69 are Republicans and 64 Democrats. In the State Legislature for the session of 1873, the Senate will have 18 Republican members, 14 Democratic, and 1 Liberal Republican; the House of Representatives, 60 Republicans, 39 Democrats, and 1 Liberal Republican; the Republican majority, in joint convention, being 23.

The Democrats ascribed their defeat to members of their own party in a great measure, in that not less than fifty thousand of them had failed to cast their votes on election-day.

At the presidential election held on the 5th of November, the Republican electoral ticket was elected by a majority of 187,728 votes over the Democratic. The official canvass shows that the votes cast for the latter were 211,961; for the former, 849,689; the total number of votes polled in the State, 561,690.

The delegates to the Constitutional Convention assembled at Harrisburg on the 12th of November, 1872. On motion, William M. Meredith, of Philadelphia, was declared unanimously elected president of the convention. Upon an invitation from the city of Philadelphia, a delegate moved that all sessions of the convention after January 1, 1873, be held in that city, which was agreed to.

A committee of fifteen was appointed by the president, on the 13th of November, to report next day "what committees should be formed, and what rules were necessary for the government of the convention." The two matters mentioned in this resolution were reported by the committee separately. As to the formation of committees, they recommend-

ed the appointment of 23, naming them by their titles, and indicating the number of their respective members. One of the committees set down in the list reported being "On Declaration of Rights," a portion of the reporting committee dissented from the rest on this one point, and presented a minority report. They averred that the convention had no power of appointing such a committee, as the Declaration of Rights was expressly exempted and excluded from the action of the convention by the act of the Legislature which had called the convention into being.

The majority report was, on motion, taken up for consideration. An earnest debate ensued, embracing the question whether the convention had the power of subjecting to its examination, for the purpose of revision and amendment, a subject expressly withheld and excluded from its action by the act of the Legislature under the authority of which the convention had assembled. Several among the delegates denied the existence of such power in the convention, mainly upon the reason mentioned before; a number of them, on the contrary, asserted it, upon the assumption that the Legislature had not the power of restricting the action of the convention by the exclusion of the Declaration of Rights. Some said that "the convention is equal, if not superior, to the Legislature." The result of the debate was, that the question on the appointment of a committee "On Declaration of Rights" was decided in the affirmative—yeas 106, nays 18.

Four more committees were, on motion, added to those recommended by the Committee of Fifteen, the number being thus increased to twenty-seven. Their appointment, together with the names of their respective members, was announced by the president on the 25th of November, their titles being as follows: No. 1, "On Legislature," seven members; No. 2, "On Legislation," fifteen; No. 3, "On Executive Department," nine; No. 4, "On Judiciary," fifteen; No. 5, "On Suffrage, Election, and Representation," fifteen; No. 6, "On Impeachment and Removal from Office," five; No. 7, "On Commissions, Offices, Oath of Office, and Incompatibility of Office," nine; No. 8, "On Education," nine; No. 9, "On Cities and City Charters," nine; No. 10, "On Counties, Townships, and Boroughs," nine; No. 11, "On County, Township, and Borough Officers," nine; No. 12, "On Militia," five; No. 13, "On Public and Municipal Debts and Sinking Funds," nine; No. 14, "On State Institutions and Buildings," seven; No. 15, "On Religious and Charitable Corporations and Societies," seven; No. 16, "On Railroads and Canals," fifteen; No. 17, "On Private Corporations, Foreign and Domestic, other than Railroads, Canals, and Religious and Charitable Corporations and Societies," fifteen; No. 18, "On Declaration of Rights," nine; No. 19, "On Future Amendments," five; No. 20, "On

Constitutional Sanctions," nine; No. 21, "On Schedule," nine; No. 22, "On Revision and Adjustment," five; No. 23, "On Accounts and Expenditures of the Convention," five; No. 24, "On Printing and Binding," seven; No. 25, "On Industrial Interests and Labor," nine; No. 26, "On Agriculture, Mining, Manufactures, and Commerce," nine; No. 27, "On Revenue, Taxation, and Finance," nine.

Having completed its organization and appointed all of its officers, the resolution for adjournment from the 27th of November, 1872, to the first Tuesday of January, 1873, when the convention should meet and continue its sessions at Philadelphia, was taken up, and passed by a vote of 69 to 42.

The following is a condensed statement of the public receipts and expenditures of the State within the year ending November 30, 1872, and the aggregate amount of her indebtedness up to that date:

Balance in Treasury, November 30, 1871.....	\$1,476,808 88
Ordinary receipts during the fiscal year ending November 30, 1872.....	7,148,637 45

Total in Treasury during year ending November 30, 1872.....	\$8,625,446 04
---	----------------

DISBURSEMENTS.

Ordinary expenses paid during year ending November 30, 1872.....	\$2,980,631 55
Loans, etc., redeemed.....	2,476,386 00
Interest on loans paid.....	1,706,063 88
Total disbursements.....	7,163,081 43

Balance in Treasury, November 30, 1872....	\$1,468,455 61
--	----------------

PUBLIC DEBT.

The public debt on November 30, 1871, was.....	\$38,980,071 73
Add Chambersburg certificates.....	299,748 91
Add Agricultural College Land Scrip fund, held in trust, as per Act approved April 8, 1872.....	500,000 00
	\$40,780,820 64

Deduct amount paid by Commissioners of the Sinking Fund during the year ending November 30, 1872....	2,476,386 00
--	--------------

Public debt, Nov. 30, 1872...	\$37,304,434 64
Deduct assets in Sinking Fund.....	\$9,300,000 00
And cash balance in Treasury.....	1,468,455 61

Amount of assets and cash.....	10,768,455 61
--------------------------------	---------------

Balance of public debt unprovided for.....	\$16,535,979 03
--	-----------------

which can be extinguished in ten years by the annual payment of \$1,600,000.

During the last six years, payments on the debt have been made as follows:

Amount paid in.....	1867.....	\$1,794,644 59
".....	1868.....	2,414,816 64
".....	1869.....	472,406 18
".....	1870.....	1,703,879 05
".....	1871.....	2,181,580 77
".....	1872.....	2,476,386 00

Total payments.....	\$10,962,608 24
---------------------	-----------------

Being a little over 29 per cent. on the debt due December 1, 1866, which was then \$37,704,409.77.

The education of youth appears to be in a most satisfactory condition. Although Penn-

sylvania has no school fund, and the annual appropriations of the Legislature for school purposes are limited to about \$800,000, the sum expended on public instruction each year is beyond proportion larger, "the people in the several districts voluntarily voting all other moneys necessary to support the schools." The ratio of the increase of the educational interest in the State may be inferred from the aggregate expenditures of the last six years in that behalf, or compared with those of the six years ending with 1866; they being as follows:

Total cost for tuition from 1867 to 1872.....	\$31,578,268 61
Total cost for tuition from 1861 to 1866.....	13,745,061 71
Increase.....	\$17,833,196 90
Total expenditures of the system from 1867 to 1872.....	\$42,952,153 11
Total expenditures of the system from 1861 to 1866.....	19,590,149 51
Increase.....	\$23,362,003 60

The soldiers' orphans are educated at the charge of the State in separate schools. The entire expense of the State for these schools, since they went into operation in 1866, is \$3,467,548.11. Their cost during the year 1872 was \$479,249.47.

For the diffusion of useful instruction among the people of all classes in Pennsylvania, the Agricultural College stands preëminent. By acts of the Legislature, the purchase of three experimental farms and the establishment of a college have been authorized; all of them being now in successful operation. Three courses are taught at the college, "agricultural, scientific, and chemical, to all which is added a general course of military instruction." The student may enter himself for any one of the courses at his choice. The number of students in attendance last year was 150; among them were 30 young women, whose admission to the college was first permitted about sixteen months ago.

By an act of the Legislature at the last session, approved April 12, 1872, a "Bureau of Labor Statistics and of Agriculture," with a commissioner, as head of the department, has been erected, the commissioner appointed, and his office already established at the Capitol building. The act defines the functions of the commissioner as follows: "The duties of such officer shall be to collect, compile, and systemize statistics, with reference to the subject of labor in its relations to the social, educational, industrial, and general condition, wages and treatment, of all classes of working-people, and how the same affect our permanent prosperity and productive industry. It shall also be the duty of such bureau to collect, collate, and classify statistics relating to the mineral, manufacturing, agricultural, and commercial productions of this Commonwealth. The fourth section makes it the duty of the chief of such bureau to report annually to the Legislature, in convenient form, the result of his investigations."

The following table, published by the Census Bureau, exhibits the mining industries of Pennsylvania, which is one of the most important mining States in the Union:

	PRODUCTS.		HANDS EMPLOYED.					WATER- WHEELS.		STEAM- ENGINES.		Establishments.

* Quantities not specified.

The Asylum for the Insane, and the other benevolent institutions, located in various parts of the State, but mostly in Philadelphia and Pittsburg, appear to have been excellently managed, and successfully performed the good

work for which they were respectively intended. All of them are placed under the superintendence and direction of a "Board of Charities." This Board was established not many years ago, and its members, with highly commendable solicitude, have steadily attended to the discharge of the delicate and manifold duties which they have assumed. They receive no pecuniary compensation. Besides the money from the State appropriated for the support of these institutions, private persons voluntarily contribute large amounts for the welfare of their inmates.

The two penitentiaries of Pennsylvania are conducted on different (almost contrary) systems in regard to the mode of helping the convicts confined within the prison; and both systems are said to work very satisfactorily. In the Eastern Penitentiary "the 'separate' or 'individual treatment' system of imprisonment is applied;" and it works so well that this penitentiary is said to be regarded as "the model prison."

The Western Penitentiary, which contains ample room for present demands, "is conducted on the 'combined' system of 'solitary' and 'congregate' imprisonment." The working of this system also is affirmed to "give entire satisfaction to all concerned."

The number of applications for pardons, presented to the Governor, within the year 1872, was 1,437, of which he granted 67.

The death-penalty was twice carried into execution during the year in Pennsylvania.

Disturbances of a very grave character occurred at Williamsport, on the 22d and 23d of July, the offenders being the mill-workmen on a strike. Their purpose was to stop and close the mills at work above and below the city, which they also effected. By the presence of the militia the riot was quelled.

According to the census of 1870, of the total population (2,597,809) ten years old and over, there were engaged in all classes of occupations 1,020,544 persons, of whom 886,209 were males and 134,335 females. There were engaged in agriculture, 260,051, including 258,772 males and 1,279 females; in professional and personal services, 283,000, including 192,674 males and 90,326 females; in trade and transportation, 121,253, including 116,714 males and 4,539 females; in manufactures and mechanical and mining industries, 356,240, including 318,049 males and 38,191 females.

The State contained 11,515,965 acres of improved land, 5,740,864 of woodland, and 737,371 of other unimproved land. The cash value of farms was \$1,043,481,582; of farming implements and machinery, \$35,658,196; total amount of wages paid during the year, including value of board, \$23,181,944; total (estimated) value of all farm productions, including betterments and additions to stock, \$183,946,027; orchard-products, \$4,208,094; produce of market-gardens, \$1,810,016; forest-products, \$2,670,370; value of home manufactures, \$1,503,754; of

animals slaughtered or sold for slaughter, \$28,412,903; of all live-stock, \$115,647,075. There were 460,339 horses, 18,009 mules and asses, 706,437 milch-cows, 30,048 working-oxen, 608,066 other cattle, 1,794,301 sheep, and 867,548 swine. The chief productions were 322,328 bushels of spring, and 19,350,639 of winter, wheat, 3,576,641 of rye, 34,702,006 of Indian-corn, 36,478,585 of oats, 529,562 of barley, 2,532,173 of buckwheat, 3,467,539 pounds of tobacco, 6,561,722 of wool, 39,574 bushels of peas and beans, 12,889,367 of Irish, and 131,572 of sweet, potatoes, 97,165 gallons of wine, 60,834,644 pounds of butter, 1,145,209 of cheese, 14,411,729 gallons of milk sold, 2,848,219 tons of hay, 200,678 bushels of clover-seed, 50,642 of grass-seed, 90,688 pounds of hops, 571 of hemp, 815,906 of flax, 15,624 of flax-seed, 1 silk cocoon, 9 hogsheads of sorghum, 1,545,917 pounds of maple, sugar, 213,373 gallons of sorghum, and 39,385 of maple, molasses, 796,989 pounds of honey, and 27,033 of wax.

The total number of manufacturing establishments was 37,200, using 6,230 steam-engines of 221,936 horse-power; and 7,603 water-wheels of 141,982 horse-power, and employing 319,487 hands, of whom 256,543 were males above sixteen, 43,712 females above fifteen, and 19,232 youth.

The total amount of capital invested was \$403,821,845; wages paid during the year, \$127,976,594; value of materials consumed, \$421,197,673; of products, \$711,894,344.

The whole number of newspapers and periodicals was 540, having an aggregate circulation of 3,419,765, and issuing annually 241,170,540 copies. There were 55 daily, with a circulation of 466,070; 8 tri-weekly, circulation 40,000; 2 semi-weekly, circulation 17,700; 382 weekly, circulation 1,213,395; 11 semi-monthly, circulation 825,100; 73 monthly, circulation 846,550; 3 bi-monthly, circulation 8,550; 8 quarterly, circulation 38,200.

There were 14,489 libraries having 6,377,845 volumes. Of these, 9,883, with 3,328,598 volumes, were private, and 4,966, with 3,049,247 volumes, were other than private, including 86 circulating libraries, with 330,153 volumes.

The total number of religious organizations was 5,984, having 5,668 edifices, with 2,332,288 sittings, and property valued at \$52,758,384.

The leading denominations were:

DENOMINATIONS.	Organizations.	Sittings.
Baptist.....	630	298,310
Episcopal.....	238	94,128
Evangelical Association.....	256	80,545
Lutheran.....	904	333,126
Methodist.....	1,296	446,453
Presbyterian.....	1,023	423,550
Reformed (late German).....	712	270,833
Roman Catholic.....	862	197,115

The condition of pauperism and crime is shown by the following statistics:

Total population.....	2,521,931
Number of persons receiving support during the year ending June 1, 1870.....	15,573

Cost of annual support.....	\$1,256,034

Number of persons convicted during the year.	3,327
Number of persons in prison, June 1, 1870.....	2,331
Native.....	2,353
White.....	2,083
Colored.....	444
Foreign.....	699

PERSIA, a country of Western Asia, called by the natives Iran. The ruler of the country has the title Shah (king), or Shahynshah (king of kings). Reigning sovereign, Nassar-ed-Din, born in 1829, eldest son of Shah Mohammed, succeeded to the throne at the death of his father, September 10, 1848. The children of the Shah are: Nuz-affer-ed-Din, heir-apparent, born in 1850, and Djilal-ed-Danleh, born in 1853. The Shah has the right of designating his successor to the throne. The area (according to a recent planimetric calculation made in the geographical institution of Perthes, Gotha) is 685,963 square miles. The present territory consists of the following parts:

Persia before the incorporation of Seistan, Kohistan, the western part of the Mekran coast, and the possessions of Omam.....	Miles. 554,576
Seistan.....	7,329
Parts of Kohistan formerly belonging to Afghanistan.....	12,093
Parts of Kohistan formerly belonging to Beloochistan.....	60,913
Coast districts recovered from the Imam of Omam.....	593
Islands recovered from Omam.....	559

The islands recovered from Omam are: Kishne, 515 square miles; Ormus, 12 square miles; Angar, 10 square miles; Harek, 22 square miles.

The population is estimated at from 4,000,000 to 5,000,000. According to a carefully-made estimate furnished by the British secretary of legation in May, 1868, the population of Persia at that period was as follows:

Inhabitants of cities.....	1,000,000
Population belonging to wandering tribes, Turkish, Koordish, Arab, etc.....	1,700,000
Agricultural population of villages and country districts.....	1,700,000
Total.....	4,400,000

The revenue of the Government, in 1868, amounted to 4,912,500 toman (a toman is variously valued, but may be stated at three dollars. The expenditures amounted in the same year to 4,250,000 toman. The Persian Government has no debt, and the royal treasury is reputed to contain gold, jewels, and other valuables, to the amount of 9,500,000 toman. The army of Persia is composed (according to the Russian work, "Military Statistical Collection," by Major-General Obrutchev, vol. iii., 1868) as follows:

I. Active army (Nizam).	
Ten divisions, or 100 regular regiments of 800 men each.....	80,000
Three squadrons of regular cavalry (body-guard of the Shah).....	500
Ten regiments of artillery, with 100 cannons.....	5,000
II. Reserve (Redif). Irregular cavalry, etc.....	45,000
III. Standing militia of the three provinces, Astrabad, Mazenderan, and Gilan.....	20,800
Total.....	151,300

Every regiment has 30 lieutenants, 40 sub-lieutenants, and 760 privates. The Persian soldier is liable to military service for his lifetime, but frequently receives long furloughs. The organization of the army is by provinces, tribes, and districts. A district contributes one battalion to the army, a tribe gives one, sometimes two regiments, and a province furnishes several regiments. The Christians, Jews, and Guebres, are exempt from all military service.

The imports of Persia amount to about \$15,000,000; the exports to \$7,000,000. The chief import is cotton goods from England; the chief articles of export, silk, opium, and cotton.

The large majority of the inhabitants are Mohammedans, the greater portion of whom belong to the sect of the Sheeah, which, since the sixteenth century, has gradually gained the ascendancy in Persia, owing chiefly to the support it has received from the dynasty of the Sôfees. The Sunnites, however, are numerous among the nomadic tribes. The sect of the Bâbi which was established about forty years ago, continues to have numerous adherents in spite of the most cruel persecutions to which it has been exposed, and is said to constitute at present a considerable portion of the population. The Oriental, or Gregorian Armenian Church has, in Persia, an Archbishop of Ispahan, who resides in the convent Armenaprgich in the suburb of New Djulfah (under him is a suffragan bishop at Calcutta, in India), and a second Archbishop of Tabreez, who resides in the convent of St. Thaddeus. The united Armenians have one bishopric (Ispahan), which has been established by Pope Pius IX. The Chaldees (united Nestorians) have an archbishopric at Kerkuk, and a bishopric at Sâlmâs. The aggregate number of united Armenians and Chaldees amounts to from 7,000 to 8,000. The total number of Nestorians is about 25,000; that of Armenians, 26,000. The Protestant mission among the Nestorians which was begun by the American Board of Commissioners of Foreign Missions in 1834, and transferred in 1871 to the Presbyterian Board of Foreign Missions, numbered, in 1872, two stations, 51 by-stations, 53 native preachers and catechists, 43 teachers, 38 schools, and 713 members.

The terrible famine, which devastated the country in 1871, continued through a part of the year 1872, and the condition of the population was generally reported to be wretched and unfortunate beyond description. But the beginning of a new era was expected from a reform ministry which the Shah appointed in the latter part of the year. Hadji-Mitza-Hussain-Khan, the new Minister of Foreign Affairs, heretofore Persian ambassador in Constantinople, Millkhum-Khan, the new Minister of the Interior, and the founder of the first lodge of Freemasons in Persia, and Hassan Ali-Khan, to whom the newly created Ministry of Public Works was intrusted, are regarded

as the ablest living statesmen of Persia. The great efforts of the Mohammedan priests to neutralize the influence of the liberal advisers of the Shah proved a complete failure, and the new Minister of Foreign Affairs received permission officially to announce that the Shah in the course of the year 1873 would make a tour through the great countries of Europe.

PERSIGNY, JEAN GILBERT VICTOR FIALIN, Duc de, a French Bonapartist, statesman, and diplomatist, born at St.-Germain l'Espinasse, department of the Loire, January 11, 1808; died at Nice, January 12, 1872. His father, after losing the remainder of his patrimony, joined Napoleon's grand army, and was killed, in 1812, at the battle of Salamanca. Victor, having received assistance from one of his uncles, entered the College of Limoges at the age of seventeen, thence passed to the cavalry school at Saumur, which he left after two years' training, with the rank of quartermaster in the Fourth Hussars. He was at this time a royalist, but under his captain's influence he changed his opinions and aided the revolutionary movement of 1830, which drove King Charles X. into exile. The young soldier, however, did not profit by the success of the revolutionists, for his conduct was deemed insubordinate, and he was dismissed from the army. He went to Paris in the hope of improving his fortunes, and was engaged on the staff of *Le Temps*. Having read about this time Las Casas's "Memoirs of St. Helena," young Fialin became at once an ardent Bonapartist, and renouncing his name of Fialin he assumed the name and title of Vicomte de Persigny, which had been hereditary in his family, but for two or three generations had not been in use. His claim to it as a younger son was, to say the least, doubtful. The young adventurer now published *La France Occident*, in the interest of the Bonapartes; but, from want of funds, was only able to issue one number. His zeal, however, won him the favor of ex-King Joseph Bonaparte, who gave him a letter of introduction to Louis Bonaparte, then residing at Arenenberg. Thus began that remarkable intimacy which had so much to do with the fortunes of both the aspiring Frenchman and the heir to the great Napoleon. Encouraged by the warm reception he had received, M. de Persigny began with ardent earnestness to reconstruct the Bonapartist party, by travelling through Germany and France, enlisting adherents, and inspiring hopes among the French people of seeing the proscribed Napoleons once more in power. He took a leading part in the descent made by Louis Bonaparte and his followers on Strasbourg, but, more fortunate than his companions and leader, escaped through the aid of Madame Gordon, the devoted woman who shared in the enterprise. After lingering some time in the Black Forest, M. de Persigny gained the Rhine, whence he repaired to England, and there published an account of the enterprise,

the failure of which he conveniently ascribed to fatality. Four years later he joined Louis Bonaparte in attempting to cause a revolt at Boulogne, and being made prisoner was arraigned before the Court of Peers, and sentenced to twenty years' detention. In the warrant for his trial he is described as Victor Fialin, calling himself de Persigny, and is spoken of as a dangerous man, a man of skill, intelligence, and resolution, and possessing remarkable talents for leading a conspiracy. The Government was, however, indulgent, and, after detaining him in the military hospital at Versailles, allowed him before long to go where he liked in France. During his imprisonment he wrote a treatise asserting that the Pyramids of Egypt were built to preserve the valley of the Nile from the shifting sands. As soon as Persigny learned of the Revolution of 1848, he hastened to Paris to promote the interests of Prince Louis Napoleon Bonaparte. He rallied the Bonapartists, organized them into a society, of which he was president, contributed to the publication of popular circulars and broad-sheets in his favor, traversed the departments, obtained admission to the committee of the Rue des Poitiers, and, more than any and all other men, brought about that state of popular feeling which resulted in the election of the prince as president of the French Republic by an overwhelming majority. After his election Prince Louis Napoleon made de Persigny his aide-de-camp, and gave him a high position on the staff of the National Guard. He was elected in 1849 to the Legislative Assembly, and therein zealously sustained his master, who soon assumed the title of Prince-President. He was one of the few conspirators treated with implicit confidence by Prince Bonaparte when planning the overthrow of the republic by the *coup d'état* of December, 1851. At the head of the Forty-second Regiment of the Line he took possession of the Hall of the National Assembly, and was named one of the Consultative Commission. When the prince, soon after this event, became Emperor, he made M. de Persigny Minister of the Interior, who, in that capacity, proved a willing instrument in carrying out the acts of his imperial master. He was advanced to the rank of count, and received a wedding-present of 500,000 francs from the Emperor on the occasion of his marriage in 1852. He became a Senator in December of that year. He resigned in 1854, and was appointed ambassador to England, and held that position, with the exception of a brief interval, until 1860, when he was appointed Minister of the Interior. He aimed at giving his administration a liberal character, but, when the elections of 1863 demonstrated the failure of his policy, he resigned, and received the title of duke from the Emperor. It is due to him to say that, in his subsequent position as Senator and duke, he invariably counselled a liberal policy, and the Ollivier Ministry of 1870

was prompted by him. He continued to take an active interest in public affairs, but fell from political influence with the empire, and after that time lived in retirement.

PERU (REPÚBLICA DEL PERÚ), an independent state of South America, and one of the earliest Spanish colonies in the New World. It extends from latitude 8° 30' to 21° 28' south, and from longitude 68° to 81° 20' west; and is bounded on the north by Ecuador, on the east by Brazil, on the south by the same empire and the republic of Bolivia, and on the west by the Pacific Ocean.

The territory of Peru, with an area estimated at 500,000 square miles, is divided into 14 departments, 2 fluvial departments, 1 littoral and 1 constitutional province, which, with their population and capitals, are shown by the following table:

DEPARTMENTS.	Population.	Capitals.
Amazonas.....	44,000	Chachapoyos.
Ancachs.....	317,000	Huarez.
Arequipa.....	200,000	Arequipa.
Ayacucho.....	210,000	Ayacucho.
Cajamarca.....	278,000	Cajamarca.
Callao.....	40,000	Callao.
Cuzco.....	464,000	Cuzco.
Huancavélica.....	160,000	Huancavélica.
Huánuco.....	90,000	Huánuco.
Ica.....	68,000	Ica.
Junín.....	232,000	Cerro.
Libertad.....	56,000	Trujillo.
Lima.....	350,000	Lima.
Loreto.....	58,000	Moyobamba.
Moquegua.....	85,000	Tacna.
Piura.....	172,000	Piura.
Puno.....	305,000	Puno.
Tarapacá.....	35,000	Iquique.
Total.....	3,799,000	

The foregoing figures, from official returns published in Lima in 1871, are, by some good authorities, regarded as too high by more than half a million.

The most numerous race in the republic is that of the aborigines, making, as it does, about 57 per cent. of the entire population; 23 per cent. are made up of mestizos (cholos and zambos); 12½ per cent. are whites born in Peru; 1½ per cent. Chinese; 1½ per cent. whites of other nationalities, among whom the Ecuadorians and Chilians are in a majority; Germans, Italians, and French, being likewise in good numbers. Lima, the capital, has a population of over 150,000.

President of the Republic, Manuel Pardo (August 2, 1872); first Vice-President, M. Cuestas; second Vice-President, F. Garmendia; President of the Council, and Minister of War and the Navy, General M. Medina; Minister of Foreign Affairs, J. de la Riva Agüero; Minister of the Interior, F. Rosas; Minister of Justice, J. E. Sanchez; Minister of Finance, J. M. La Jara; commander-in-chief of the Army and Navy, the President of the Republic; Inspector-General, General A. Segura; commandant of the Navy, Captain D. De la Haza; President of the Supreme Court of Justice, J. M. Casio.

The army, in 1872, was composed as follows:

	Men.
Infantry, 8 battalions.....	5,600
Cavalry, 3 regiments.....	1,300
Artillery, 2 brigades.....	1,000
Gendarmerie.....	5,400
Total.....	13,300

The fleet consisted of 6 iron-clads, and 6 other steamers, with an aggregate armament of 94 guns. Two of the iron-clads mount 14 guns each, one of them having 12 70-pounders of 4 tons, and 2 pivot-guns, 150-pounders, of 7 tons. Two others carry, on revolving turrets, 8 guns capable of throwing projectiles of 500 pounds' weight; when in action, they are but six inches above the sea-level; and are provided with facilities for casting streams of boiling water upon an enemy attempting to board them.

Chief among the articles exported from Peru are guano, nitrate of soda, Peruvian bark, sugar, and wool. The first two are mainly shipped to England; the exports of guano to that country in 1870 amounting to no less than \$16,250,000, and of nitre in 1871 to \$5,077,075.

Almost every article of necessity is imported from the United States, Great Britain, France, and other European countries, as very little, if any, attention is paid to home manufacture: silk fabrics and general fancy goods come from France; England supplies the woollen, linen, and cotton fabrics, railway material, coals, etc., while machinery of all kinds, agricultural implements, American manufactures in general, provisions, lumber, etc., are furnished by the United States: the last-mentioned commodity being exported from California and Oregon.

The value of imports at the port of Callao, for the year ending September 30, 1871, was as follows:

In American bottoms.....	\$4,023,600
In British bottoms.....	6,750,055
In French bottoms.....	3,425,000
In Italian bottoms.....	1,059,000
In North-German bottoms.....	412,000
Total.....	\$15,669,655

To this total may be added perhaps \$9,000,000 for merchandise imported in Salvadorian vessels, and for damaged goods; and about \$2,000,000 more for imports by the English line of steamers, *via* Cape Horn, and of which no returns had been made; whereby the figures of the table would be increased, in round numbers, to the sum of \$27,000,000.

The total imports of the republic were:

By the port of Callao.....	\$27,000,000
By the port of Iquique, about.....	5,000,000
By the port of Arica, about.....	6,500,000
By the ports of Islay, Mollendo, and others (about).....	4,000,000
Total (about).....	\$42,500,000

The import duties at the port of Callao, for the months of January and February last, were as follows: For January, \$303,185.87; for February, \$203,514.54; being a difference in favor of February, although a short month, of \$328.65.

The total value of the exports from the republic, through all ports, in the year last referred to, is estimated (no official statement of the exact amount having as yet been published) at \$50,000,000.

The following is a statement of the shipping movement, at the port of Callao, for the year ending September 30, 1869 :

ENTERED.

Steamers, 310, with an aggregate of 232,573 tons.
Sailing-vessels, 1,623, with an aggregate of 1,083,969 tons.
Coasters, 1,126, with an aggregate of 7,551 tons.

CLEARED.

Steamers, 305, with an aggregate of 273,355 tons.
Sailing-vessels, 1,641, with an aggregate of 1,045,847 tons.
Coasters, 1,002, with an aggregate of 7,490 tons.

The Peruvian merchant navy consisted, in the same year, of 95 craft of all sizes, with a total of 9,596 tons' measurement.

There is no direct taxation in Peru, and the public revenue is, in the main, derived from the sale of guano, but a very insignificant proportion accrues from customs duties. The budget estimates for the two years 1871 and 1872 were as follows :

REVENUE.	
Guano.....	\$44,915,451
Customs duties—Exports.....	\$4,818,000
Imports.....	229,800
Tonnage, etc.....	246,000
Miscellaneous receipts.....	5,393,600
Total.....	8,773,800
Total.....	
EXPENDITURES.	
Ministry of the Interior.....	\$6,460,004
Ministry of Foreign Affairs.....	409,043
Ministry of Justice, Public Instruction, etc.....	4,632,323
Ministry of War and Navy.....	10,870,763
Ministry of Finance, Commerce, etc.....	4,812,564
Administration of the Public Debt and Public Works.....	30,729,068
Total.....	\$57,913,764

According to the foregoing estimates, there would have been a surplus of \$1,069,087; but

such favorable result could scarcely be expected, for the revenue of former years showed large deficits.

Peru has a considerable public debt, divided into home and foreign, the former being estimated at \$2,500,000, exclusive of a floating debt, the amount of which is unknown. The external or foreign debt is made up of several small loans raised in 1860-'64, and of three large loans made in England in 1866, 1870, and 1872, as follows :

1860-'64 loans, at 4½ per cent.....	\$6,500,000
Consolidated 5 per cent. loan of 1866.....	50,000,000
Railway 6 per cent. loan of 1870.....	50,000,000
Railway 5 per cent. loan of 1872.....	75,000,000
Total.....	\$191,500,000

The 6 per cent. loan of 1870 was issued at 82½, and the 5 per cent. loan of 1872 at the price of 72, the latter loan being for the nominal amount of £36,800,000; but there was issued provisionally in July, 1872, no more than £15,000,000. The loans, secured on the guano deposits, and the general resources of the country, are to be repaid in twenty years by the operation of sinking funds.

The quantity of sugar manufactured in Peru is said to be over 700,000 quintals (of 100 pounds) annually; the valley of Cañete alone producing yearly about \$2,000,000 worth of sugar and rum. Most of the planters in that locality have steam-machinery, and employ as many as 1,000 Chinese laborers. Wool is produced in great abundance; large numbers of sheep have of late years been imported from Europe, for the purpose of improving the native stock; and no less than 3,964,501 quintals, or 44,803 bales, of wool were exported in 1870-'71 from the single port of Ilay.

The following is a list of the railway lines completed or in process of construction at the end of the year :

FROM	TO	Cost of Construction.	No. of Miles.	When commenced.	Date of Completion.
Arequipa.....	Puno.....	32,000,000	223	1869	1877
Arica.....	Tacna.....	39	1864	1866
Callao.....	Oroya.....	27,600,000	180	1868	1875
Chimbote.....	Huarez.....	37,000,000	173	1871
Chancay.....	Cerro Pasco.....	120	1870	1875
Eten.....	Feunafe.....	28	1867	1871
Ilo.....	Moquegua.....	6,700,000	63	1869	1873
Iquique.....	Noria.....	2,000,000	37	1867	1871
Lima.....	Callao.....	64	1860	1863
Lima.....	Chancay and Huacho.....	1,300,000	69	1869	1870
Lima.....	Chorillos.....	7	1866	1868
Mollendo.....	Arequipa.....	12,000,000	107	1860	1871
Pacasmayo.....	Guadalupe.....	2,700,000	14	1870	1873
Pacasmayo.....	Magdalena.....	5,000,000	69	1870	1873
Pisco.....	Ica.....	48	1869	1870
Total, in miles.....	1,153½

The Government has already expended \$24,000,000 for the alteration of the Chimbote line to a narrow gauge.

Such extensive railway-works require a much larger number of laborers than can be found within the republic; and, in order to meet the emergency, Mr. Meiggs, the principal contractor, has entered into an arrangement

for the importation of 5,000 free Chinese laborers, to be liberally paid and well fed, and returned, at the expiration of their term of service, to their own country at Mr. Meiggs's expense. The first instalment of coolies had arrived in 1871, and given unequivocal proofs of the success of the system, and of the superior utility of that class of workmen.

Besides the railways, other internal improvements are constantly going forward with unabating energy; and the difficult roads and bridges are diligently kept in order. In 1871, a sum of \$15,000,000 was raised to defray the expenses of irrigating the coast-lands, where it seldom, if ever, rains.

Public education is gradually becoming an object of the most careful consideration on the part of the Government, and neither money nor zealous exertions are spared to advance it.

The Archbishop of Lima, Dr. Goyeneche, died February 19, 1872; the funeral services were conducted upon a scale of grandeur which the Limenians are little accustomed to behold; the numerous religious communities, the President and his Cabinet, the diplomatic corps, the Supreme Court, and a division of the army, took part in the ceremonies. The total cost of the pageant was upward of \$25,000. As yet the will of the deceased prelate has not been opened, but it is supposed that his large fortune, variously estimated from ten to thirty million soles (dollars), is left to his immediate family. Dr. Goyeneche was appointed Bishop of Arequipa during the reign of Ferdinand VII., and, after holding that see for forty years, was, about eleven years ago, made Archbishop of Lima. He was born at Arequipa, January 20, 1784, and he died at the age of eighty-eight years, and was the oldest bishop and ablest archbishop in the Catholic Church; the first by reason of seniority, the second by reason of age. His life was spotless, and his virtues many; his only fault, if fault it be, was a remarkable desire to increase his wealth; but in countries like Peru, where the Church is dependent upon the state, and where the poor are so liberally cared for, the extensive employment of private means in charitable works is hardly necessary.

A commission of naval officers, presided over by Captain Manuel Ferreiros, port-admiral of Callao, was to proceed to England in February, for the purpose of superintending the construction of four ships-of-war, ordered by the Government. Two of these were to be formidable iron-clads, of the most improved class, and two wooden corvettes, all heavily armed. There were many conjectures as to the reason for the augmentation of the already powerful navy of Peru, the most probable solution of the question being the anxiety entertained regarding a similar action shortly before taken by the Government of Chili.

Messrs. Dreyfus established a new national bank in Callao, with a nominal capital of \$12,000,000. Sixteen miles of the Pacasmayo, Guadalupe & Magdalena Railroad had been laid, and the telegraph completed to Pacasmayo.

Among the proceedings on the 12th of February, in the Permanent Commission of the Government, sitting in Lima, was the passage of a resolution providing that thereafter all votes given by that body upon official ques-

tions should be secret. The action of the commission produced considerable discussion among the Lima journals, as the question of secret or open ballot was a political one. The secret ballot was decided upon by but one majority, and was regarded as a Government triumph.

The first steamer of a new French opposition line, from Bordeaux to Panama, arrived at Callao March 28d, with about fifty French women on board, brought out by a company formed for the purpose of supplying domestic labor to the inhabitants of that city. The contracts have been drawn up in France, duly signed and certified, the passage out and return to be paid by the employer, wages ranging from twelve to twenty dollars monthly, the term for five years, and a bonus of two hundred dollars given to the importer by the family receiving the servant. These terms were very satisfactory to the interested parties, and there can be no doubt as to the advantages gained by the domestics. But a number of Frenchmen congregated at the landing-place of Callao, and on the arrival of the women endeavored by all possible means to convince them of the indignity offered to their country, by the fact of the contract, even using, in some instances, violent measures to accomplish their purpose. So serious became the question, and so imminent the danger of disorder, that the French consul in the port was obliged to call upon the authorities for assistance.

The Government supporters in the standing committee of Congress evinced a desire to withdraw from the meetings of that body, and thus, by destroying the necessary quorum, render the qualification of the Senators and Representatives for the ensuing Congress a matter of impossibility. After a day or two, however, it was discovered that the danger had passed, and the Arenas and Pardo factions were as busily at work as before. The Government appeared to be very strong, and, although Mr. Pardo's forces were very powerful, the elements at the disposal of the administration were almost invincible. The reports from all sections were most satisfactory, and the republic was enjoying profound peace.

General José Antonio Paez, to whom South America in general is so deeply indebted, one of the heroes of the War of Independence, arrived at Lima March 18th. The authorities of Callao received him on board of the steamer; the carriage of the President, awaiting the general at the Lima railway-station, conveyed him to a sumptuous apartment, especially prepared in his honor; the cabinet ministers, the municipality and the different corporations of the capital paid him congratulatory visits, and a decree was signed by President Balta, ordering the payment of an annual pension to the general of eight thousand dollars, the decree being accompanied by a check for the amount of the first half-year. The general was pro-

foundly moved by these manifestations. The gratitude of Peru contrasts favorably with the conduct of Venezuela, the birthplace of the old hero.
